● Mr. GREEN. Mr. Speaker, I am pleased to be introducing today the Arts and Humanities Tax Reform Act of 1981. This legislation would amend the Internal Revenue Code to disregard, in the valuation for estate tax purposes of certain items created by the decedent during his or her life, any amount which would have been ordinary income if the item had been sold at its fair market value; to allow a charitable deduction based on the fair market value of a creation; and to establish new guidelines for deducting the business use of a place of residence.

Under present law, an artist's heirs pay an estate tax on the decedent's creative property which is based on its fair market value. Unfortunately, an artist will frequently request that the family destroy works of art at the time of his or her death in order to protect the heirs from exorbitant estate tax charges. I believe this is a great loss to the Nation, its artists, scholars and historians, and to the decedent's heirs. Section 2 of my bill provides that, when an artist dies, the estate tax charged the heirs will be based on the cost of the materials in the work, and not the price at which the item could be sold.

I would add that a work or creative property may be defined as any copyright, musical or artistic composition, letter or memorandum, or any similar property which was in the decedent's possession at the time of his or her death, and was created through the efforts of the individual. Second, I would point out that creative work does not include any property which was held by a decedent who was at any time an officer or employee of the United States and which was created by the decedent in carrying out an official duty.

While, for estate tax purposes, works are valued at market price, a creative work is valued for charitable deduction purposes at the cost of materials in the work. Section 3 of my bill would allow artists to take a deduction for donations to nonprofit groups at the fair market value of the donated property.

In making these changes, we would promote rather than discourage creativity and advocate the sharing of artwork and creativity with the public. By providing a tax incentive for the contribution of works to charitable organizations—museums, libraries, and galleries—and a lighter estate tax charged an artist's family, we are encouraging wider distribution of artwork, development of artistic resources in individuals, and are recognizing the importance of preserving an artist's creation.

Section 4 addresses a problem which is voiced again and again by artists, particularly in New York City. Under current law, a taxpayer is allowed to deduct expenses attributable to the business use of his or her place of residence only when a portion of the home is used exclusively and on a regular basis as a place of business. Many artists and writers who seek to deduct expenses for the business use of their homes and live in small quarters have a difficult time proving exclusive use of a portion of their home when it is not separated from the remainder of the dwelling by a wall. My bill addresses this problem and would allow the deduction in cases in which a portion of the home is used to a substantial extent and on a regular basis for business purposes, thus allowing a part of a room, not necessarily a separate room, to be considered a workplace for tax purposes. Section 4 also directs the Secretary of the Treasury to promulgate regulations in order to implement the substantial extent provision within 90 days of enactment of the legislation. Within 120 days of enactment, the Treasury must recommend to the House Ways and Means and the Senate Finance Committees legislation which would provide statutory standards to replace the substantial extent provision.

This legislation is designed to allow the artistic community to develop without fear of the tax burden which being an artist presently creates. In light of the severe budget cuts recently proposed by the administration in this area, I believe it is particularly important to provide these incentives to artists, and remove the disincentives to creativity which currently exist. I am pleased to have the cosponsorship of 24 of my colleagues and request support for this legislation from the entire House of Representatives. I have submitted to the RECORD the text of my bill for review by my colleagues:

H.R. —

A bill to amend the Internal Revenue Code of 1954 to disregard, in the valuation for estate tax purposes of certain items created by the decedent during his life, any amount which would have been ordinary income if such item had been sold by the decedent at its fair market value, to allow a charitable deduction based on the fair market value of such items, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Arts and Humanities Tax Reform Act of 1981".

SEC. 2. VALUATION OF CREATIVE PROPERTY FOR ESTATE TAX PURPOSES.

(a) In General.—Part III of subchapter A of chapter 11 of the Internal Revenue Code of 1954 (relating to gross estate) is amended by inserting after section 2032A the following new section:

"SEC. 2032B. VALUATION OF CERTAIN ITEMS CREATED BY THE DECEDENT.

"(a) GENERAL RULE.—If the decedent was (at the time of his death) a citizen or resident of the United States, then, for purposes of this chapter, the value of qualified creative property shall be determined under subsection (b).

"(b) VALUE OF QUALIFIED CREATIVE PROPERTY.—For purposes of subsection (a), the value of qualified creative property of the decedent shall not include any amount which would have been ordinary income if such property had been sold by the decedent at its fair market value (determined at the time of the valuation of such property).

"(c) QUALIFIED CREATIVE PROPERTY DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified creative property' means any copyright, any literary, musical, or artistic composition, any letter or memorandum, or any similar property—

"(A) which was held by the decedent at the time of his death, and "(B) which was created by the personal efforts of the decedent.

"(2) CERTAIN PROPERTY EXCLUDED.—The term 'qualified creative property' does not include any property—

"(A) which was held by a decedent who was at any time an officer or employee of the United States or of any State or political subdivision of such State, and

"(B) which was created by the decedent in carrying out his official duties as such an officer or employee."

(b) CLERICAL AMENDMENT.—The table of sections for such part III is amended by inserting after the item relating to section 2032A the following new item:

"Sec. 2032B. Valuation of certain items created by the decedent."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to estates of decedents dying on or after January 1, 1981.

SEC. 3. VALUATION OF CREATIVE PROPERTY FOR CHARITABLE DEDUCTION PURPOSES.

(a) IN GENERAL.—Subsection (e) of section 170 of the Internal Revenue Code of 1954 (relating to certain contributions of ordinary income and capital gain property) is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL RULE FOR CERTAIN PROPERTY CREATED BY THE TAXPAYER.—

"(A) IN GENERAL.—The reduction under paragraph (1)(A) shall not apply to any charitable contribution of property—

"(i) which is a copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, and

"(ii) which is contributed by a taxpayer whose personal efforts created such property.

"(B) EXCEPTION.—Subparagraph (A) shall not apply to any property—

"(i) which is contributed by any officer or employee of the United States or of any State or political subdivision of such State whose personal efforts created such property, and "(ii) which was so created by such officer or employee in carrying out his official duties."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1980.

SEC. 4. BUSINESS USE OF HOME.

(a) IN GENERAL.—Paragraph (1) of section 280A(c) of the Internal Revenue Code of 1954 (relating to exceptions for certain business or rental use; limitations on deductions for such use) is amended by striking out "exclusively used" and inserting in lieu thereof "used to a substantial extent and".

(b) REGULATIONS.—The Secretary of the Treasury or his delegate shall, not later than 90 days after the date of the enactment of this Act, prescribe regulations to carry out the amendment made by subsection (a).

(c) RECOMMENDATIONS FOR LEGISLATION.—The Secretary of the Treasury or his delegate shall, not later than 120 days after the date of the enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate recommendations for legislation which provide objective statutory standards, for allowing deductions in cases where a portion of a dwelling unit is used for business purposes on other than an exclusive basis.

(d) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1980.●

THE REAL PROPERTY TAX COMPENSATION ACT OF 1981

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. OTTINGER. Mr. Speaker, I am pleased to join my colleague from New York (Mr. LENT) in cosponsoring the Real Property Tax Compensation Act of 1981.

Our bill would provide relief for communities which are financially burdened with a great number of tax-exempt properties owned by foreign representatives living in the United States. The savings achieved could be passed on to the taxpayers by providing local property tax reductions.

With the United Nations' Building located in New York City, the New York metropolital area has become the principal place of residence for foreign embassies and delegates working at the United Nations, and for other international organizations.

Due to our country's role as host to foreign representatives and international organizations, bilateral and multilateral treaties to which the United States is a party have evolved which grant certain foreign governments exemption from property taxation. These are both desirable and necessary, but should not be at the expense of the local taxpayers who must carry the burden of financing municipal and school district services for their tax-exempt neighbors.

This problem was brought to my attention by the city of New Rochelle, N.Y., which, due to its location in Westchester County, only 15 miles from New York City, contains 23 such tax-exempt foreign properties. The total assessed valuation of these lands is $943,050 which represent a rather significant portion of New Rochelle's total assessed valuation of $390,404,777.

If taxes were being levied on these properties, New Rochelle would receive an additional $41,216 to finance its essential services. The school district would receive an additional $68,334; and Westchester County would collect an added $18,700.

Similar losses of potential tax revenue due to ownership of property by foreign representatives are being felt in many other communities as well. Eight homes in Mount Vernon owned by representatives of foreign countries will cost that city $30,400 in lost revenues this year, and the town of Mamaroneck will lose $19,230 because of the two properties owned by foreign governments exempted from its tax roles. The village of Pelham gains no tax revenues from $73,550 of assessed property within its borders because of ownership by foreign governments.

This legislation would allow for communities like New Rochelle, Pelham, Mount Vernon, and Mamaroneck to be reimbursed by the Secretary of the Treasury an equal amount of the real property tax revenue that the community would have received during the previous calendar year had these taxes been collected.

In these inflationary times, it is very difficult for local units of government, many of which are experiencing declining tax bases, to pay the cost of services rendered to tax-exempt representatives of foreign governments. The Federal Government has provided this tax-free privilege to foreign representatives and should assist communities in supporting services to these people.●

THE 63D ANNIVERSARY OF THE FOUNDING OF THE BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BRODHEAD. Mr. Speaker, today marks the 63d anniversary of the founding of the Byelorussian Democratic Republic. I join with my colleagues in commemorating this day, which is of such great importance to my constituents of Byelorussian descent and others around the world.

The Soviet aggression against Byelorussia in 1918 has been mirrored many times since. It is ironic that the Soviet troops poised to thwart the Polish people's quest for freedom are on land which was captured from Byelorussia. The Polish crisis has been a powerful reminder of the fact that only a small percentage of the world's population enjoys the kind of freedom that exists in America. As Americans cherish freedom, we must also support the efforts of those less fortunate who wish to obtain its blessings.

The Byelorussian Democratic Republic was formed on March 25, 1918. The brief period of freedom before the occupation of Byelorussia by the Soviet Red army remains in the hearts of those who love and cherish Byelorussia. These people have not given up hope that their country will once again be restored its freedom.

The United States remains one of the few nations on Earth where one's cultural heritage may be openly embraced and practiced from generation to generation. At a time when world events renew the threat of oppression around the world, it is particularly important that we speak out for a free Byelorussia.●

PRINCETON PRESIDENT SPEAKS TO NATIONAL NEED

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SIMON. Mr. Speaker, one of the distinguished leaders in the field of education in the United States is Dr. William G. Bowen, the president of Princeton University.

Recently, he spoke to the Princeton Club of Washington about the status of higher education and some of the problems confronting it.

In his remarks he quotes a Princeton alumnus, Dr. William O. Baker, former president of Bell Laboratories, as saying, "Talent is the basis for our whole national treasure."

I hope that in the rush to save some dollars, we do not erode this fundamental national treasure.

I hope my colleagues in the House and Senate will take the time to read the remarks of President Bowen.

REMARKS OF WILLIAM G. BOWEN, PRESIDENT, PRINCETON UNIVERSITY

I am very pleased to be here today and to have this opportunity to join with so many of our alumni in honoring those Princetonians who serve this nation so well as members of the Congress.

These are interesting—challenging—times for all of us, and certainly for those with direct and immediate responsibility for determining national priorities.

We meet today—through no prior arrangement on my part, needless to say—in the immediate aftermath of an announcement of the most sweeping budget-cutting intentions ever placed before the Congress. Some of the issues raised are so important for higher education, for the purposes Princeton serves, that I hope you will allow me to comment on two areas of particular concern: research and student aid. It has not been my practice to use these occasions to discuss pending legislative issues, but I depart from past practice today in the hope of encouraging all of us to think together about longer-term objectives held in common by universities, the government, and the society.

Reducing the rate of inflation and improving the overall performance of the economy are plainly important goals for the universities as well as for the society at large. Indeed, given their "handicraft" nature (with the emphasis at Princeton, for example, on the senior thesis, precepts, and supervised independent work at graduate and undergraduate levels), universities have been especially vulnerable to the inflationary pressures of recent years; thus, they have a direct institutional stake in the success of efforts to reduce the rate at which prices rise. Of course, there will continue to be lively debate among economists as to the right set of fiscal and monetary policies. (A distinguished economist, now himself out of favor, once said: "Only one man in a thousand understands the currency question, and I meet him every day.") There is, nonetheless, widespread agreement that reductions in Federal expenditures can help, and if a major effort is to be made to reduce

spending, it seems clear to me that there shold be no sacred cows: programs affecting every sector, including higher education, should be scrutinized carefully. It will not do to say: "Leave us alone; cut everyone but us."

As many of you know, we have worked hard, and successfully, at Princeton to balance our own budget, and I know from our experience both how painful it is to achieve reductions and how important it is to be prepared to cut selectively.

In Washington, as at Princeton, it is necessary to make the most careful choices in deciding which programs to terminate or cut back. It seems to me essential that immediate pressures for instant savings not lead inadvertently to the sacrifice of long-term goals critical to both the material and spiritual health of our society.

In the area of research, for example, it is important to understand the integral role that science and technology play in increasing productivity and the extent to which so many questions facing our society have scientific dimensions. For these reasons, among others, there is much to be said for having an eminently qualified science adviser in the White House. We should also remind ourselves of the contributions that can be made by scholars and advanced students in the humanities, the arts, and the social sciences. While economic circumstances may well require reductions in federal spending in these areas (and I believe that there are savings to be achieved), the ways in which this is done will matter greatly.

Within science and engineering, and in the spirit of being clear about priorities and being willing to make choices, let me stress the importance of distinguishing between basic and applied research—and then recognizing the more fundamental role of government in supporting the former. I believe it makes good sense to rely heavily on private companies to finance research at the applied end of the spectrum. In my view, lagging productivity has been—is—a major part of this country's economic problem; accordingly, new ideas and the capital expenditures needed to translate ideas into improved living standards should be encouraged within the private sector.

Of course, applied research grows from the seeds planted by basic research. And individual companies and industries, however generously motivated, cannot be expected to pay fully for research which by its nature can lead in unpredictable directions and which, if successful, almost certainly will bestow benefits so widely that no one firm or group of firms can capture them entirely for private uses. This simple rationale—the presence of what the economist calls "spillover benefits"—means that profit-making enterprises cannot be expected to replace government as sources of support for most research at the "basic" end of the spectrum. Our future welfare depends critically on the ever-changing base of knowledge created, as it were, for its own sake, and here government must continue to be an important partner in the national effort.

Unfortunately, the environment for basic research in universities has been weakened by inadequate support for, among other things, facilities and equipment. Thus, I am particularly distressed by one of the smallest "savings" included in the most recent budget proposals—namely deferral of a $75 million program within the National Science Foundation for the upgrading of major research laboratories. These laboratories have fallen far behind the state-of-the-art, and one recent study showed that equipment in university laboratories is now, on average, twice as old as equipment in industrial laboratories. I do not believe that failure to spend relatively modest amounts of money here is a real "saving" at all: on the contrary, I think the result will be further damage to research and training efforts vital to long-term increases in productivity.

One of the great benefits of conducting research in the university environment is that advanced students can simultaneously receive training and contribute their own fresh perspectives to the research enterprise. For almost 30 years, a major expression of this nation's commitment to future scientific leadership has been the merit-based, portable fellowship program of the National Science Foundation that has attracted—and then supported—some of the best young scientific talent in the world. This does not seem to me to be the place, among all places within the educational sector, in which it is wise to seek dramatic economies; thus, I hope the Congress will think hard about the implications of terminating this most successful program before acting on the request of the Administration that no new NSF Fellowships be awarded.

A less obvious, but perhaps significant, observation is that the community of basic research scholars constitutes a vital national resource for purposes of defense, as the experience of World War II dramatized so vividly. With the memory of radar and other war-time contributions fresh in mind, much support of basic research in the post-war period was clearly meant to conserve and strengthen this national resource. In current discussions of defense, these considerations seem to have faded somewhat; they should not. Nor can we afford, as a nation, to neglect teaching and scholarship in such fields as Near Eastern and East Asian studies.

Much as the United States has benefited historically from an educational system unmatched anywhere, our future will depend even more on creativity and trained intelligence. The field of communications, electronics, and computers offers one particularly dramatic illustration of this point, as Dr. William O. Baker, 39, a Trustee of Princeton and former President of Bell Laboratories, testified before a Congressional committee.

"Talent is the basis for our whole national treasure here. Although materials are vital for the structure of some of the machines, in general the work is characterized by its complete dependence on human talent. There are no oil wells, there are no grainfields, and there are no mineral resources in this field. It is a creation of human imagination and human vision."

If basic research represents a long-term investment in new ideas, student aid is a long-term investment in the human capital of the country—in the individuals who in their turn will provide the leadership, and the citizenship, on which the country must always depend. Current discussion focuses, understandably, on specific program elements. Each component of financial aid should be seen, however, as part of an integrated whole that has been built carefully, with bi-partisan support in successive administrations and successive Congresses, to achieve what are truly national objectives. As we seek to address weaknesses in elements of this financial aid structure, to set sharper priorities, and to correct abuses, we must remember why these programs of student assistance came into being in the first place.

The present combination of Pell Grants (named appropriately in honor of our distinguished alumnus who has done so much to build these programs), Supplementary Grants (which aid needy students at more expensive institutions), work-study programs, federal loan programs, State scholarship programs, and substantial programs of financial aid provided by individual colleges and universities, has been designed to assist students at various income levels to obtain access to educational opportunities that otherwise would be beyond their reach financially—to make it feasible for students from all economic backgrounds to attend the full array of private and public colleges and universities, including the more expensive ones. One result has been the achievement of a diversity of student backgrounds and perspectives that has been extremely valuable educationally as well as consistent with basic principles of equal opportunity—principles that must be given expression within the educational sector if they are to have meaning elsewhere in American society.

It would be short-sighted in the extreme to waste our most precious resources by in effect denying educational opportunity to talented young people who ask only the chance to develop their full potential. It would be contrary to the national interest to begin re-segregating major universities on the basis of financial means. And it would be very unwise, in my judgment, to disturb a rather careful balance that has been created between the complementary needs of the private and public sectors—especially as we move through a 15-year period when demographic trends are almost certain to create serious new stresses within all of higher education.

Fortunately, there seems to be broad agreement on these general propositions. I hope we shall have the wisdom—and the will—to translate them into sound legislative and administration decisions.

With regard to specific programs, let me begin by noting one area in which I believe savings can be achieved, consistent with basic principles of equity. Consideration should be given, in my view, to elimination of the educational benefits provided to college students under Social Security. These benefits are provided irrespective of financial need, and thus in some cases are provided to students otherwise able to meet their college cost. In many other cases, of course, these benefits are meeting real needs, but those needs can continue to be met through reaffirmation and extension of the government's commitment to need-base grant, loan, and work-study programs.

On my own scale of priorities, some of the changes in the Pell Grants suggested thus far, such as requiring a self-help contribution and looking afresh at the formula for determining the parental contribution also seem less damaging to long-term objectives than other kinds of cut-backs one might envision in this extremely valuable program. It should be recognized, however, that if the full range of proposals were adopted, some 600,000 currently eligible students could be removed from the program next year. Of even more immediate concern is the fact that a substantial supplemental appropriation will be necessary this year if the maximum grants under this program is not to decline precipitously from its intended level of $1,800 to something in the range of $1,200.

The loan programs, and the changes proposed in them, raise more complex questions that cannot discussed in full detail in the time we have together today. But I do want to suggest some priorities and principles for consideration.

The Guaranteed Student Loan program (GSL) is very important. If we are to expect each student to contribute to his or her own educational costs, it is essential that well conceived and well administered loan programs be available.

There is a compelling reason for governmental involvement in this particular type of loan program, in contrast with many other situations in which the government guarantees loans for commodities or business purposes of one kind or another. Put simply, when students seek loans for educational purposes, they have no collateral to offer; it is their human capital that is being augmented, but we do not, for excellent reasons, allow individuals to sell themselves or enter indentured servant status. This basic characteristic, so fundamental that it is often overlooked, explains why private capital markets cannot be expected to provide the requisite loan funds for students.

It does seem justifiable, however, to have different terms for different groups of borrowers. On the one hand, it seems proper—indeed important, from the standpoint of assisting needy students to borrow—that students with demonstrated need who simply must incur debt to meet educational costs not be asked to pay interest or accumulate interest obligations while in school. (To illustrate the importance of this provision, without the in-school subsidy the total cost of a Princeton undergraduate education would be increased by some $2,700 for a needy student borrowing under the GSL program, and this would be on top of an already substantial loan burden and an obligation to contribute both term-time and summer earnings. The impact on graduate students would be even greater.)

But considerable savings could be achieved if the in-school subsidy were restricted to need and eliminated for others who borrow to solve problems of liquidity or to extend payments into their working lifetimes. This latter group of students could be called upon to assume responsibility for interest charges incurred while in college. And it may well be right to allow interest charges for this group of borrowers, as well as for parents, to be set at some reasonable approximation of the market rate. I agree that it is hard to justify allowing individuals with adequate incomes to borrow at artifically low rates—especially when money markets make it possible for some to re-invest the loan proceeds so as to profit personally. There is no way to know how many students are in fact abusing the current program; certainly in our experience most students borrow reluctantly and for entirely legitimate purposes. In any event, allowing interest rates for borrowers above the strictly defined need level to reflect the cost of money more accurately would remove the possibility of abuse and also reduce considerably the cost of the program.

It is essential, however, that access to capital, under nonsubsidized terms, be maintained for students and parents (including those who have incomes well above normal notions of "need") who simply must borrow if they are to spread the costs of educational investments over reasonable periods of time. I know students at Princeton whose families simply could not meet expected family contributions without acccess to Guaranteed Student Loan programs, including some who have one or two brothers or sisters simultaneously going to college. It is difficult for me to believe that we want to discourage this form of investment.

I have been asked repeatedly if the Princeton student body will not become polarized between the very rich and those whose incomes are low enough to qualify for financial aid. So far, this has not happened. Students from families at all income levels are well represented at Princeton, but this has been possible—and will continue to be possible—only through access to loan programs that allow middle income families to invest in the education of their children—and that allow those students whose parents cannot or will not help them (for whatever reasons) to invest in themselves.

Why do those of us at Princeton care so much about all of this? Because of our conviction that the education we offer, and the research done by our faculty, make a difference—a most significant difference—to the life of this country. As Marvin Bressler, Professor of Sociology at Princeton has observed, Princeton has always believed that education is both a private treasure and a public resource. This year, eight seniors at Princeton won either a Rhodes or a Marshall Scholarship to study in England—out of a total of only 62 such awards nationwide. All eight have been receiving scholarships or financial aid in some form at Princeton—and I have no doubt that all eight will repay those investments many times over. It is up to all of us, both individually and through our government, to see that future generations of young people have the same opportunities. And it is up to us, too, to see that the universities in this country, including Princeton, continue to be the home of ideas—that Val Fitch, in our Physics Department, who won the Nobel Prize this year, will be but one more in a continuing stream of faculty whose insights and vision deepen our understanding of the world and our place within it.

To the many practical arguments for the support of research and education, let me add, in closing, what I believe to be a still more fundamental proposition. I shall use the words of this year's winner of the Woodrow Wilson Prize, Lewis Thomas '33, Chancellor of the Memorial Sloan-Kettering Cancer Center in New York. Dr. Thomas observed:

"As long as we are bewildered by the mystery of ourselves, and confused by the strangeness of our uncomfortable connection to all the rest of life, and dumb-founded by the inscrutability of our own minds, we cannot be said to be healthy animals in today's world.

"We need to know more . . . not for [the sake of] technology, not for leisure, not even for health or longevity, but for the hope of wisdom which our kind of culture must acquire for its survival."

It is this conception of the role of learning that speaks to many of us at deeper levels. For me, at least, it is compelling.●

MARTIN BOULEVARD SCHOOL JOURNEY TO WASHINGTON

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. LONG of Maryland. Mr. Speaker, on Thursday, March 26, 1981, 71 boys and girls from the Martin Boulevard Elementary School in Baltimore, Md., will journey to Washington to augment their studies of American Government with a first-hand look at their Nation's Capitol.

These students, led by Marilyn Runge, Shirley Cotton, Constance Barnes, Betty Cooper, Jancie Twigg, Muriel Holt, Deborah Carre, Michael Smith, Linda Bradds, Jett Davis, Mary Feist, Rose Leavel, Barbara Prescimone, James Richey, Deborah Watson, Lucille Johnson, Bernice Cyr, Kathleen Dumer, and Bunny Terrill will tour the Capitol Building and then meet with Congressman CLARENCE LONG. After that they will conclude their day's activities by visiting the Smithsonian.

I look forward to meeting with these students, their teachers, and parents to discuss with them the legislative process, and their questions about national issues. I am delighted that they are taking the opportunity to expand on their classroom learning.

The students who will visit us Thursday include:

Chong S. Kim, Marrie Lindermuth, Lisa Mangum, Marchelle Packer, Stacey Rawlings, Frances Sturgis, Tom Feist, Robert Leavel, Patrick Jacobson, Song U. Moon, Tommy Pfarr, Michael Poore, Davis Snyder, Chris Stuller, Eugene Van Pelt, Michael Whittington, Tammy Bloom, and Lendra Bowers.

Thomas Knowlton, James Shaw, Joe Barron, Gina Rappazzo, Shawn Taylor, Dancie Williams, Steve Pelekakis, Kelly Fike, Robin Hartly, Wendie Cyr, Robert Bowman, Mary Jackson, Nona Mae Shepherd, Rerri Britton, Kirsten Dumer, Valerie Shaub, Matt Terrill, and Kevin Zerkle.

Anthony Calo, Mark Booker, William Byard, Michael Caldwell, Robert Carre, Eric Cooper, Anthony Edgar, John Hauer, James Orndoff, Stewart Payne, Michael Smith, Christopher Twigg, Jerry Wanless, Dorne Beverly, Debra Brandt, Letitia Clark, Kimberly Hill, and Chantel Johnson.

Kim Bradds, Sandra Bradfield, Felicia Bromer, Deanna Brotzman, Susan Davis, Dareen Hart, Angela Elder, Leann Lipscomb, Anita Richey, Karen Steinacker, Tina Truett, Alicia Wilder, Julia Parry-Hill, Mike Bruce, Tracey West, Frank Seitz, and Linda Anshel.●

SOVIET PROPAGANDA: THE BIG—AND SMALL—LIE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MICHEL. Mr. Speaker, we are losing the war of ideas.

That is just not my view. It is the considered judgment of experts in the field and the position President Reagan took during his 1980 campaign. Beginning today I am going to insert in the RECORD articles and documents which show how we are losing this war. Our overseas information

program is underfunded, lacks sophisticated technology, and, most important, is not understood by the Congress. I hope to bring to the attention of the Congress and the administration the need for an increased and effective overseas information program.

The International Communications Agency and the Board for International Broadcasting are our best weapons in this war of ideas.

For the moment, however, I want to show how the Communists are using disinformation, that is, false information given to Western journalists to achieve some desirable end for Communist propaganda. Cord Meyer recently wrote a column about this disinformation. It is a chilling and terrifying story of the ease with which the Communists and their ideological allies manipulate the media.

I insert "The Soviet Propaganda Offensive" by Cord Meyer, the Washington Star, March 21, 1981, in the RECORD:

THE SOVIET PROPAGANDA OFFENSIVE

A courageous revelation in Moscow and new evidence of Marxist infiltration of the Roman Catholic Church in El Salvador are current reminders of the Kremlin's persistence in attempting to mislead and manipulate public opinion at home and abroad.

While the best-selling novel *The Spike* is an overblown dramatization of the danger of this Russian disinformation campaign, there is not doubt that in the real world the Soviets succeed more often than the Western press would like to admit in distorting the news.

If it had not been for the extraordinary courage of the Russian ballet dancer, Yuri Stepanov, the only available account of his reasons for returning to Russia after a two-month defection to the U.S. would have been the Izvestia interview with him in Moscow after his return.

Trying to discourage future defections, Izvestia quoted Stepanov as finding the U.S. a "nightmare" of violence and as outraged by CIA attempts to coerce him into spying. Shocked by this complete distortion of the facts, Stepanov, at great personal risk, sought out American correspondents in Moscow to explain that he has the most friendly feelings toward the U.S. and only returned to Russia because of concern for his wife's welfare.

Recalling that the KGB had threatened to break his legs if he did not keep silent, the dancer explained that he had to speak out to correct the record and concluded, "it is a question of honor." Stepanov's personal integrity has put a spike in the wheels of Moscow's mighty disinformation machine.

MARXISTS IN EL SALVADOR

Meanwhile, in a much more complex and damaging disinformation operation, there is now evidence that the Marxists have succeeded in infiltrating and winning over influential elements within the Catholic hierarchy in El Salvador, including Jesuit priests and lay workers. According to a recent report from the U.S. Embassy in San Salvador, Archbishop Arturo Rivera has reluctantly concluded that he has to remove from his Catholic organization radical priests and laymen who are actively supporting the communist guerrillas.

In his first move, the archbishop has fired the Salvadoran staff of the Catholic relief organization, Caritas, for complicity in hiding arms caches for the guerrillas in church refugee camps. Although proceeding cautiously because of threats to his life, Rivera is determined to weed out communist sympathizers in the Catholic radio station and newspaper who have astutely tilted their reporting in favor of the guerrilla cause.

While declaring the Church neutral in the political struggle and condemning the right-wing terror, Rivera has lent his full support to President Duarte's land reform and stated that the guerrillas "have made violence and loyalty to Marxism their watchword, and because of that the majority have turned their backs on them."

In his increasingly outspoken criticism of communist tactics, the redoubtable archbishop has staked out a position that contrasts with the stance of American Catholic bishops. In view of Rivera's conviction that the Salvadoran Church itself has been infiltrated, the American hierarchy might want to take a close look at their reporting from Church sources in San Salvador. They may be victims of a very sophisticated disinformation campaign.

As the recent unhappy experience of The New York Times demonstrates, even the most prestigious American newspapers are not immune to occasional deceptions perpetrated against them. In her column on the op-ed page of the Times on March 6, Flora Lewis quoted at length and approvingly from what she described as a "dissent paper" drawn up by people from the NSC, the State and Defense Departments and the CIA, dated Nov. 6, '80. She stated that this document "has been circulated in the manner prescribed when a policy has been established but serious doubts remain among an important group of knowledgeable officers."

A "SPURIOUS" DOCUMENT

She urged the Reagan administration to heed the call of the authors of this document for immediate negotiations with the communist guerrillas, but unfortunately the authors could not be found and no such official dissent paper existed. As certified by the State Department, the document she quoted was "spurious" and the authors of this fabrication have preserved their anonymity.

On March 7, the Times tried to explain that Miss Lewis had received the document from a news source she considered reliable and Miss Lewis in a subsequent column admitted her mistake. But the damage had been done and Castro will exploit the original column throughout the hemisphere to prove the U.S. government is deeply split.

There is no evidence that the Soviets or Cubans had anything to do with this ingenious hoax but domestic practitioners of the black art of disinformation have learned lessons from them. U.S. editors need to maintain the healthy skepticism that is the saving grace of journalism.●

THE NEED FOR GREATER SAVINGS INCENTIVES

HON. DAVE DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DREIER. Mr. Speaker, while many factors have led to our Nation's current economic hardships, one of the most significant is that Americans are simply not saving. As long as individuals continue to opt for consumption over saving, a serious shortage of available capital, high-interest rates, and low growth and productivity will grip the Nation.

The savings rate in the United States is dangerously low. In 1980, while the average Canadian worker saved 10.2 percent of his net disposable income and the average West German saved 14.1 percent, the average American saved only 5.7 percent.

A primary reason for this disparity is the American tax code that encourages borrowing and consumption but discourages saving. Our tax laws allow a deduction for interest paid on consumer loans, yet, at the same time subject interest earned from savings to tax rates as high as 70 percent.

Refining this aspect of our tax code becomes even more crucial in light of President Reagan's program for economic recovery. In my view, the President's proposal represents the most viable means offered to date for attacking the economic ills which plague our Nation. The President's plan is designed to leave a greater portion of after-tax income in American pocketbooks. It is imperative that we take steps to insure that individuals will save a substantial amount of that capital in an interest bearing account or invest those funds in corporate stocks.

While Congress has granted a temporary exclusion of $200—$400 for joint returns—for certain dividend and interest income, it is essential that we do much more to overcome the heavy bias against saving and investment inherent in our present tax system. For this reason, I am introducing legislation to provide a permanent exclusion for interest and dividend income of $750 for individuals and $1,500 for joint returns.

The more Americans save, the more resources we will have available for the capital formation needed to insure economic growth and prosperity. Furthermore, a capital-enriched economy will once again enable the United States to compete successfully with other industrialized nations in world markets. It is interesting to note that the Governments of West Germany, France, Canada, and Japan have all adopted saving-oriented tax policies, and all have reaped extensive benefits.

I firmly believe that the Congress must begin at once to create incentives to bring about a significant expansion in household savings. I urge my colleagues to join me by cosponsoring the legislation I have introduced to create a permanent exclusion for dividend and interest income of $750 for individuals and $1,500 for persons filing jointly. Given the proper tax climate, I am confident that the American public will once again save and invest

a much larger portion of their income, thus taking a giant step toward economic recovery.●

TRIBUTE TO THE LATE WILLIAM PETSCHEK

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. OTTINGER. Mr. Speaker, on Friday, March 27, 1981, an important event in the life of the Jewish Community Center of White Plains, N.Y., will occur when a dedication service is held to honor the late William Petschek, a devoted congregent for 37 years and an active member of his community. The temple will dedicate its lounge in William Petschek's memory, and I am pleased to be a part of this event.

William Petschek was born in Czechoslovakia and came to the United States in 1941 to live in Scarsdale, N.Y., until his death last year. He and his family are well known for their dedication to their community and their philanthropic gifts to many organizations. William's oldest nephew, Charles Petschek, has been active in the Jewish Community Center serving as a member of its board of trustees and as treasurer and vice president.

The contributions made to Westchester by the Petschek family are indeed impressive and I commend the Jewish Community Center of White Plains for dedicating its lounge to William Petschek's memory.●

BLUEPRINT FOR A HOUSE THAT WORKS—PART IV

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. LOTT. Mr. Speaker, the distinguished chairman of the House Judiciary Committee, the gentleman from New Jersey (Mr. RODINO), recently wrote a guest column for the Washington Star which I think merits the attention of all Members for what it says about the state of disrepair into which this House has fallen.

After lamenting the fact that it is difficult to get anyone to serve on his Judiciary Committee anymore due to its high-controversy, low-pork barrel potential, Mr. RODINO discusses some of the larger problems which confront this institution today. He suggests that we may have gone too far with some of the reforms of the last decade. Speaking of the prereform era, he says, "The old system was branded unfair and autocratic. Whatever its drawbacks, it has merits."

He goes on to suggest that one of our main problems may be that our committees and subcommittees are no longer representative of the House. To quote from his column:

We also need to try to bring about philosophical and geographical balance in the committees so that each body, ideally, would be a microcosm of the House itself. This would certainly help refine and temper legislation before it reached the House floor, and, wonder of wonders, perhaps make debate there more constructive and less partisan. And it might even, in time, raise Congress' ranking in public confidence near that of journalists, or used-car salesmen or economists.

Chairman RODINO takes a dim view of the recent proliferation of subcommittees, now at over 150, and their impact on the legislative process. In his words:

If the trend is not reversed, the day is not far off when every majority member will head a subcommittee. Then we will have no leadership—and no "followership." Everybody will be a boss.

Finally, he discusses the problems of scheduling committee meetings and hearings and the conflicts with conducting floor business, suggesting there must be a better way to get our work done, uninterrupted. And he concludes:

With these modest proposals for reforms of the reforms that I suggest, a better-crafted legislative product would reach the House floor for more thoughtful and informed debate and decision.

Mr. Speaker, I find myself in agreement with many of Chairman RODINO's observations and suggestions. In fact, in offering my Committee Improvement Amendments of 1981, House Resolution 100, I offered a very similar critique of a House that is not working anymore and suggested we needed a blueprint for a House that works. Among other things, my seven amendments to the House rules as they pertain to committees would, as Chairman RODINO has suggested, make our committees and subcommittees more representative of the House as a whole by mandating that party ratios on committees and subcommittees be the same as the House. And, in response to the problem of too many subcommittees, I have offered a rule change that would limit all committees, except Appropriations, to no more than six subcommittees, and all Members to no more than four subcommittee assignments.

To further enhance the goal of quality and representative legislating in our committees and subcommittees, I have proposed that we abolish proxy voting and the one-third quorum rule for marking up legislation, restoring the old majority quorum requirement for transacting any business.

My committee improvements package would also help to reduce the workload and duplication of effort in committees by abolishing the practice of jointly referring bills to more than one committee, while retaining split and sequential referrals.

Finally, my proposals would require the House to vote on an overall committee staff ceiling at the beginning of each year to enable us to retain control over that explosive problem. And House oversight procedures would be strengthened by requiring formal committee adoption of oversight agendas at the beginning of each Congress and House adoption of a consolidated oversight agenda, subject only to amendments from the Government Operations Committee and the majority and minority leaders.

I would urge my colleagues to join in cosponsoring House Resolution 100 when I reintroduce it on April 15, and direct their attention to my introductory remarks at page 3545 of the March 4 RECORD.

At this point in the RECORD, Mr. Speaker, I include the column by Chairman RODINO and commend it to the reading of my colleagues. The column follows:

[From the Washington Star, Mar. 19, 1981]

THAT OLD JUDICIARY JUST AIN'T WHAT SHE USED TO BE

(By PETER W. RODINO, JR.)

During most of my 32 years in the House of Representatives a seat on the Judiciary Committee was coveted almost as much as a run for reelection unopposed. I know that I had to wait in line to get to join the committee. (I must confess that I still yearn for reelection unopposed.)

But, among members of my party, that desire no longer flames. The truth be known, a Judiciary seat today is about as attractive to a member as the prospect of closing National Airport.

This development is, I guess, understandable. But it is also regrettable. For difficult legal and constitutional issues are on our committee's schedule. Their resolution will require dispassionate and even-handed consideration. It will not be easy. We have a nucleus of battle-tough veterans, along with some willing recruits to help in these decisions. But I do wish we had greater numbers. Today's politics make that impossible.

The current committee is composed of 28 members, 16 Democrats and 12 Republicans. Frankly, we encountered difficulty getting 16.

Through the 1950s and '60s—and as recently as six years ago, when the committee comprised 38 members—we had to turn away applicants. Judiciary was considered a choice and prestigious panel. Members were eager to deal with the great and difficult issues of national moment. We were writing history, and many wanted a hand in the writing.

TOO RISKY

The issues today are no less momentous. The great legislative and policy battles are not behind us. But nowadays membership on the committee is considered by too many too risky.

There are a couple reasons, I think, for this attitude. Foremost, of course, is the rise in truculence and power of the single-issue pressure groups. They can intimidate. One opposes them at one's peril. Consequently, many House members—no matter their con-

viction—are loath to be on the cutting edge of opposition to these single-minded groups. There is no political mileage in such a stance. Several new members have told me that they would have liked to have served on Judiciary, but that the social issues that will be before us for decision are so volatile that to take a single "wrong" stand or to cast one "wrong" vote is to invite defeat at the polls.

EMOTIONS RUNNING HIGH

This is not to imply that these groups don't deserve or won't get a fair hearing. These are difficult issues—school busing, school prayer, abortion—on which emotions run high on all sides, and on which the law and the Constitution are not precise. There are rational arguments on all sides. Honest debate and thoughtful decision must and will proceed even in the face of the threat of well-financed retribution against those who might go "wrong."

Another reason that Judiciary is no plum is the fact, to put it bluntly, that we have no money to spread around. No grants. No loans. No loan guarantees. No subsidies. It is not surprising, therefore, that, concurrent with the shrinking of Judiciary, the size of the committees with the cash has grown immensely. A spot on these panels permits a member to be hardly visible in controversy—while conspicuously dealing out federal dollars to grateful constituencies. It is a comfortable condition.

It is not at all nostalgic for me to wish that we might return to some of the procedures and reasoning prevailing before the House reforms of 1974. The old system was branded unfair and autocratic. Whatever its drawbacks, it had merits.

Now, I believe in accommodation. But accommodation should not be overriding. It seems to me that our steering and policy group, which now makes the committee assignments, should keep in mind a larger good than that of the member in its decisions. It now appears that it lets a member pick and choose his or her committee. Instead, it should, as was the practice in the past, assess the expertise and qualifications of new members and assign them where they could best contribute, even if that assignment were not the choice of the member.

I have been dwelling on the problems that politics and the assignment system have created for the Judiciary Committee. But others, Veterans Affairs and the District of Columbia panels, for instance, are beginning to experience the same difficulties. Few members have any interest in serving on them, and the method of assignments lets them go elsewhere.

MICROCOSM

We also need to try to bring about philosophical and geographical balance in the committees so that each body, ideally, would be a microcosm of the House itself. This would certainly help refine and temper legislation before it reached the House floor and, wonder of wonders, perhaps make debate there more constructive and less partisan. And it might even, in time, raise Congress' ranking in public confidence near that of journalists, or used-car salesmen—or economists.

Some uniformity should also be brought to the standing committees. If all the major ones were relatively the same size, we might begin to control the proliferation of subcommittees. They have been sprouting like, I suppose it is fashionalbe to say, government regulations. There are more than 150 subcommittees. There were 210 separate legislative entities in the House last year. If the trend is not reversed, the day is not far off when every majority member will head a subcommittee. Then we will have no leadership—and no "followership." Everybody will be a boss.

Other changes must be made if we are ever to regain the image of the House as a deliberative body. We have become mired in minutia, in capricious quorum calls and roll-call votes on trivial issues. Members now demand roll-call votes on routine approval of the journal of the previous day's business of the House. This practice, I might add, knows no ideology. The result is that consideration of important matters is continually interrupted and delayed, and issues of great urgency are not adequately debated.

Surely we could better schedule our time, so the entire House could sit to debate and vote on certain days of a week or month, free of committee duties, while at other times the committees could conduct hearings and draft laws without interruption by quorum calls or roll calls. This arrangement could be of great importance today, because we face not only tough social issues that will require calm decision, but also the very unusual remedies the president is proposing for our economic ills.

The hour is probably too late for a change that would have immediate effect. But issues of great national import will always be there. With these modest proposals for reforms of the reforms that I suggest, a better-crafted legislative product would reach the House floor for more thoughtful and informed debate and decision.

And then we might more nearly fulfill the obligation of the complete representative described by Edmund Burke: "Your representative owes you, not his industry only, but his judgment; and he betrays instead of serving you if he sacrifices it to your opinion."●

THE SISTERS OF NOTRE DAME DE NAMUR

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. STARK. Mr. Speaker, I would like to take this opportunity to pay tribute to the Sisters of Notre Dame de Namur, who, on the 28th of March, will celebrate 100 years of teaching the young people of the Ninth Congressional District of California.

On March 27, 1881, a convent and school were dedicated on the corner of San Jose and Lafayette Avenues in Alameda, Calif. Since that time, the Sisters of Notre Dame have been teaching both primary and secondary levels of students from Alameda, Oakland, San Leandro, San Lorenzo, and Hayward.

Their high standards of education and moral values have contributed much to the community of Alameda, the surrounding cities, the State and the Nation. The educational excellence provided by the Sisters of Notre Dame has become world renowned, drawing students from all over the world.

It is with great pride and admiration that I send my congratulations to the Order of the Sisters of Notre Dame de Namur and with hope and praise that I wish them 100 more years of devoted service.●

USO—JIMMY DOOLITTLE NIGHT

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MOORHEAD. Mr. Speaker, on the evening of April 27, the Los Angeles chapter of the USO will present its fifth annual Distinguished American Award to Gen. James H. "Jimmy" Doolittle.

Previous recipients of this very fine award were Rabbi Edgar F. Magnin, former President Gerald Ford, Bob Hope, and Gen. Omar Bradley. The addition of General Doolittle to this four-star group makes it a five-star cluster of unique distinction.

As most Americans are aware, General Doolittle's life epitomizes the concept of giving to one's country above and beyond the call of duty. It was just over 39 years ago, on April 18, 1942, that Jimmy Doolittle led a daring bombing raid over Tokyo. This celebrated mission gave all Americans a timely and needed boost in morale and turned General Doolittle into an instant and enduring American hero.

The Los Angeles area chapter of the USO is honoring General Doolittle because he has been an active supporter of the USO since it began operations in this home State of California in 1941. Both the man and the organization have had similar aims since the early 1940's. Both have given much to the men and women of the American military. Both have served the needs of their country and both have added luster to the ideal of patriotism.

As part of the USO's 40th anniversary celebration, it is fitting that the Hollywood USO should gather to observe the evening of April, 27, 1981, as "USO—Jimmy Doolittle Night." It is an honor for me to bring this special event to the attention of my colleagues.●

NATIONAL DEFENSE AND SYNTHETIC FUELS FROM COAL

HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. WILSON. Mr. Speaker, the present administration has requested an increase in defense spending for fiscal year 1982 with the promise of increasingly higher appropriations in subsequent years.

I support the President's request in full. Our national defense is of major concern to me and to my constituents. However, in the interest of that concern, I must question another defense-related proposal from the administration.

The President has requested termination of major Department of Energy demonstration projects that would provide us with synthetic fuels from coal, our most abundant resource. Energy production and the defense of our country go hand in hand. We cannot have an effective defense network without the fuel to make it run. And so it strikes me as more than a little ironic that, as we increase the Pentagon budget by billions, we simultaneously decrease our defense capability by canceling our strongest domestic effort to become energy self-sufficient.

I would remind the administration and my colleagues who will vote on the Department of Energy funds for these demonstration projects of a report submitted to the previous administration in March 1979 that deals with the effects of oil imports on national security. The report's conclusion is that oil continues to be imported in such quantities and under such circumstances that it poses a real threat to the national security of this country. That threat comes from the economic repercussions that accompany larger and larger payments for imported oil as well as the increased dependence on a small number of foreign oil suppliers. Long lines at the gas station are bad enough, but imagine the even graver implications a serious drop in foreign oil supplies will have in terms of national security.

This interdependence between imported oil and national defense is not new. As far back as 1959, a special Presidential committee concluded that unless there were limits placed on the amount of imported oil, our mobilization base would be devastated.

Again in 1975, the Secretary of the Treasury considered all factors relevant to the defense of our country and found that oil imports threatened to impair national security. According to the 1975 report, it is imperative that we "wean ourselves away from dependence on imported oil, conserve our use of petroleum, promote the use of alternative sources of energy, and, at least in part, staunch the outflow of payments resulting from the purchase of this commodity."

Yet little effort was made to follow that sound advice. In 1979, we found that the Nation had increased its dependence on a small number of distant oil producing countries. In the early 1960's, Venezuela was the largest external supplier of oil to the United States. Later, Canada became a large supplier. However, imports from Venezuela declined sharply as a percentage of total imports and Canada adopted procedures which virtually phased out all light crude exports to the United States. As imports from these traditional Western Hemisphere suppliers have receded in siginficance, there has been a corresponding rise in the Nation's reliance on Eastern Hemisphere sources, particularly those of the Middle East.

In the next decade, the United States probably will continue to rely heavily on Mideast supply sources. At the same time, the political volatility of the Persian Gulf poses a greater threat than ever before to our supply lines from that region. Consider the fact that six of the Middle Eastern nation now supplying oil to the United States must ship it through the narrow and vulnerable Strait of Hormuz at the southern end of the Persian Gulf.

Moreover, oil production in the Middle East is subject to terrorist attack. The Central Intelligence Agency has stated:

> There is a high probability that acts of nature, human error, or deliberately targeted terrorist attack will interrupt the flow of oil in one or more of the oil exporting nations during the next several years. Interruptions of oil supply, owing to guerrilla operations, acts of terrorism, or acts of nature are not likely of themselves to be a magnitude and duration which would result in severe economic disruption of free world economies, though they could exert strong upward pressure on prices in a tight world oil market. Extensive terrorist actions against key oil storage and transportation facilities in the Persian Gulf could, in particular, significantly affect the market by substantially reducing oil supplies for the time required to put those facilities back into operation, which could be several months.

In short, the potential for an embargo or other interruption in our foreign oil supply has not decreased since the embargo of 1973. To the contrary, developments in Iran demonstrate that U.S. oil imports can be seriously affected by internal disruptions in a country even if it is not a primary supplier to the United States.

As we discuss the effects of importing nearly $90 billion worth of foreign oil annually, we should review the monetary repercussions of excessive dependence on imported oil. Our efforts to strengthen the dollar at home and abroad are hampered by that dependence. As the price of imported oil rises, inflationary pressures and inflationary expectations mount. Uncertainties about supplies and costs inhibit the domestic investment we need for noninflationary growth. There is no question that a reduction in oil imports will speed the growth of the U.S. economy, lower the inflation rate, and strengthen the dollar.

The development of synthetic fuels is critical to the energy independence of this country. We took the first step in 1979 when Congress approved funding for synfuel demonstration projects. These projects turn coal, our most abundant energy resource, into clean, environmentally safe energy for utilities, industries, and other consumers. One full-size synthetic fuels plant can produce the equivalent of 100,000 barrels of imported oil every day. The $90 billion we now send overseas for oil each year could be better spent at home. America would no longer have to worry about supply interruptions since the coal would be processed and used near its source.

We simply cannot terminate a program so important to our economy and our national security. I urge my colleagues to reinstate funding for these vital demonstration projects.●

IMPORT QUOTAS NOT NEEDED

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. FRENZEL. Mr. Speaker, in the Wall Street Journal of March 20, an article by Charles Elia makes the point that for the first time since 1978, U.S. car makers again have begun outselling the Japanese in the small car segment of the market. That market represents 60 percent of total unit sales in the United States.

Mr. Donald F. DeScenza, analyst at Donaldson, Lufkin & Jenrette is quoted as follows:

> If auto makers needed government protection they needed it one or two years ago. I think my analysis clearly indicates they don't need import quotas now. They are demonstrating that they can compete and recover market share.

The evidence is mounting against any import quotas. Milton Friedman and Joseph Kraft have joined a long list of experienced observers of the U.S. economic scene who believes, as I do, that import quotas are bad policy.

This most recent comment by Analyst DeScenza, a close observer of the economy car market claims quotas are unnecessary, too.

The article follows:

[From the Wall Street Journal, Mar. 20, 1981]

DETROIT'S ABILITY TO COMPETE WITH JAPANESE IS CONFIRMED BY SMALL-CAR SALES, ANALYST SAYS

(By Charles J. Elia)

The Reagan administration is wrestling with one of the weightiest trade questions of its young life—whether to seek some sort of import limitation on Japanese autos or to leave the auto trade unfettered.

That policy question is likely to be resolved in coming weeks. Meanwhile, a little-noticed phenomenon has occurred. For the first time since late 1978, U.S. car makers again have begun outselling the Japanese in the small-car segment of the market. This market sector represents nearly 60 percent

of the total unit sales of autos, including imports, in the U.S.

Donald F. DeScenza, analyst at Donaldson, Lufkin & Jenrette, has been closely tracking the economy-car sector in the belief that "when the full commitment is made to building a good-quality economy car, American producers are unqestionably able to design and mass produce fully competitive vehicles."

Mr. DeScenza believes the demonstrated success recently of such new entries as Ford's Escort and Lynx and Chrysler's K-body cars, as well as General Motor's Chevette and X-body cars last year, confirms Detroit's ability to compete head-on with the Japanese.

"If our auto makers needed government protection, they needed it one or two years ago," he says. "I think my analysis clearly indicates they don't need import quotas now. They're demonstrating that they can compete and recover market share." The analyst calculates that, in the current model year's first four months, U.S. built units boosted their share of the economy-car segment to 59.2 percent from 56.2 percent for all of the 1980 model year, and that imports, including U.S.-made Volkswagens, dropped to a 40.8 percent share from a 43.8 percent share.

Checking specifically on Japanese imports he found that the first five months of this model year the newest U.S.-built small cars took a 36.3 percent share, up from 31 percent in the year-before period. At the same time, Japanese sales were static at about 31 percent of the small-car market. Toyota and Datsun both lost ground, he says Subaru was about even, and only Mazda and Honda increased their shares.

"The old generation of American small cars still in production, such as Monza, Camaro, Mustang, Fairmont and Spirit, and some of the imported economy cars from Europe gave up the most ground," he says.

Although rebates on U.S. cars may have helped boost sales recently, Mr. DeScenza believes that a fundamental change is under way and that it first became evident with sales of Chevette and other new GM models last year. "The new generation of American-built small cars is recovering market share from Japanese imports more quickly than we had thought likely even two months ago," he says.

"The ostensible peaking of the Japanese penetration of the market can't be attributed to voluntary restraint on the part of the Japanese companies, because dealer inventories of cars from Japan were steadily increased between March 31 and Dec. 31. 1980."

Ford and Chrysler "are entirely responsible" for the reversal of the two-year loss of competitive positon in the small-car market, he says. Ford's newer entries helped it boost its small-car share to 18.7 percent in the first four months of this model year from 16.4 percent in the 1980 model year, he says. Chrysler's share rose to 10 percent from 7.4 percent

Mr. DeScenza says pressures for some accommodation by Japan will remain high because of job losses in the U.S. and the need for U.S. makers to maintain or increase their profitability on newer small cars.

But he also believes that Detroit's newfound ability to compete in this sector will increase as GM brings out its new J-line cars this spring and both GM and Ford expand their small-car capacity. He has been recommending GM as the industry's investment-grade stock and Ford as an attractive, more speculative, issue.

Estimate cuts by Morgan, Stanley & Co. helped trip up Honeywell and Digital Equipment yesterday. Honeywell closed at 102½, off 5¼, and Digital ended at 84⅛, off 2⅝.

Ulric Weil, of Morgan Stanley, reduced his first quarter estimate on Honeywell to $1.75 a share from $2; the year-before profit was $2.08. He left his full-year estimate unchanged at $12.50, adding that he doesn't think it's as assured as it had been, largely because of the possibly adverse impact of currency translation. He'd been recommending Honeywell but told clients yesterday, "I'd be cautious short term." Honeywell declined comment.

Mr. Weil also reduced his Digital Equipment estimate for the year ending June 30, 1982, to $7.50–$7.65 a share from $8. He left his fiscal 1981 estimate unchanged at $6.35, adding that earnings this year could be five or 10 cents above his estimate.

"Order rates are moderating from the very satisfactory level of the fiscal second quarter," he says, "and are expected to moderate further in the June quarter." He adds that his revised estimate "doesn't change my basic long-term positive view toward the stock." Digital Equipment officials couldn't be reached for comments.●

NATIONAL TRANSPORTATION SAFETY BOARD REAUTHORIZATION

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MINETA. Mr. Speaker, I am today introducing legislation to reauthorize the National Transportation Safety Board for fiscal years 1981, 1982, and 1983. I am pleased that this authorizing legislation is being cosponsored by Congressman JIM HOWARD, chairman of the Committee on Public Works and Transportation, and Congressman GLENN ANDERSON, chairman of the Subcommittee on Surface Transportation.

The National Transportation Safety Board is an agency with important responsibilities for the safety of virtually all types of transportation activity: aviation, rail, highway, marine, and pipeline. In the last 2 years, the Board has conducted 121 major accident investigations and 3,062 field investigations, participated in 77 foreign investigations, and reviewed 7,322 accident investigations covered by other Government agencies.

Another important function of the Board is the issuance of recommendations to prevent the recurrence of transportation accidents. During the last 2 years, the Board has issued 828 recommendations: 197 in the area of aviation, 146 directed to rail, 201 to marine, 121 to pipeline, and 126 to highway. The Board reports that it has had an acceptance rate of 80 percent for its safety recommendations over the last 13 years.

The bill which I am introducing today will enable the Board to continue its important work. The bill authorizes funding levels of $18,540,000 for fiscal year 1981, $19,925,000 for fiscal year 1982, and $22,100,000 for fiscal year 1983. These funding levels will allow for small growth in the Board's human factors program. The program will focus on airframe crashworthiness, survivability, and human performance. Human factors cause more than 85 percent of all general aviation accidents. Clearly the greatest potential for accident prevention lies in the human factors aspects of accidents. The 1983 funding level contemplates a flat program level—no growth in NTSB staff or activities from the 1982 level.

The bill also includes some amendments to the Independent Safety Board Act of 1974, clarifying the Board's jurisdiction. The first amendment provides that the Board's investigations, other than investigations of marine accidents, shall have priority over investigations conducted by other Federal agencies. This amendment confirms arrangements which the Board has with other Federal agencies. The amendment makes these arrangements permanent and not subject to adjustment as a result of changes in the leadership of the agencies concerned. Designating a lead agency will help prevent duplicate investigations and unnecessary disputes over jurisdiction. The amendment does not prevent DOT's operating administrations from conducting concurrent investigations, required by their statutory responsibilities, or from taking any necessary regulatory enforcement actions.

The second amendment clarifies that the Board has authority to require the filing of reports on aviation incidents. The Board has asserted jurisdiction to investigate incidents and requires reports on them. Making the Board's authority explicit where it is now implicit will enhance the Board's investigative capability, since it will avoid arguments and delays which would compromise the investigation of incidents.

The third amendment makes explicit the authority of the NTSB to exercise physical custody, for examination or testing, or any transportation facility or equipment which is required for purposes of the investigation, except that the testing or investigation shall be conducted in such a manner as not to interfere with or obstruct, unnecessarily, the flow of goods and services in the interstate commerce.●

IOANNIS A. LOUGARIS VETERANS' ADMINISTRATION MEDICAL CENTER

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SANTINI. Mr. Speaker, I rise to introduce legislation which would rename the Veterans' Administration Medical Center, located in Reno, Nev., as the "Ioannis A. Lougaris Veterans' Administration Medical Center."

For over 40 years, Mr. Lougaris has worked on behalf of the veteran's in Nevada. He was instrumental in making the medical center in Reno a reality. In fact, on January 23, 1976, the veterans' hospital in Reno presented Mr. Lougaris an accommodation acknowledging that the veterans facility in Reno stands as a tribute to his dedicated services. Thus, it is only fitting that the Veterans' Administration facility in Reno bear his name.

I urge the House to act swiftly on this measure, which will make the VA Medical Center a living tribute to this fine, dedicated American. Thank you.●

U.S. ISOLATION

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DELLUMS. Mr. Speaker, the policy of the U.S. Government as regards El Salvador is subject to criticism on a myriad of points. One criticism is that the administration policy will serve to isolate the United States from the rest of the Americas.

I call attention to an article that appeared in the New York Times on March 5, 1981. It is written by the noted Mexican novelist, diplomat, and educator Senor Carlos Fuentes. Its message should be a warning:

LATINS' PRESSING QUESTIONS

(By Carlos Fuentes)

HANOVER, N.H.—Throughout this hemisphere, these are the questions that we Latin Americans are urgently asking ourselves:

Is the Reagan Administration out to prove the born-again machismo of the United States? But, then, why doesn't the United States show its bravery in Kabul or Warsaw? Since it cannot take vengeance in Iran, must it take it in El Salvador? Is it bravery or cowardice to bully and slap around a pale, underfed 9-year-old child? Why are Gen. Alexander M. Haig Jr.'s sabers rattling?

Is the Administration really winking at the Soviet Union? Is it actually saying: "Look, I do whatever I like in my backyard; you go on and do whatever you like in yours." Is the blood of the Polish workers to be shed on top of the blood of the Salvadoran peasants? Are we not witnessing a vast charade between the two superpowers? Do the United States and the Soviet Union really believe that the historic trend toward a world of pluralistic powers can be halted? Do they ignore the fact that Mexico and Poland, Hungary and Venezuela, China and Brazil are relentlessly drifting further and further away from the dominating spheres of the Dulles and Molotov eras? Or, do they know it only too well? Does Washington think El Salvador can be the cheap ticket for a nostalgic restoration of the 1950's?

Does the State Department think that any Latin American will swallow the gruyère-like white paper on Communist intervention in El Salvador? Does it think that we ignore the fact that the opposition in El Salvador has plural links not only with Moscow and Havana, but also with Bonn, Mexico City, Caracas, Paris, and Stockholm, thus faithfully mirroring the varied sources of support a democratic government in El Salvador could count on? Does General Haig think we ignore the fact that in civil strife arms are readily available from all quarters? That, furthermore, arms can be introduced with propaganda purposes, as in Korea and Vietnam? That, after all, four-fifths of the arms used by the Salvadoran rebels come from democratic, free-enterprise gun-runners in Florida, Texas, and California? Why doesn't the United States Government crack down on its own sources of contraband?

Who can hide the central fact that the problems of El Salvador cannot be the invention of foreign forces since those problems are bred in the marrow of a colonialism nearly 500 years old? That the army is the unlimited custodian of colonialism in El Salvador and that it will use the arms it gets from the United States to kill unlimitedly? Is this what Mrs. Jeane J. Kirkpatrick means by "moderate repression"? Can't she hear the thousands of innocent dead in El Salvador answering her that they are not "moderately dead"? If Jimmy Carter's human rights policy was selective, what about a Reagan antiterrorist policy that condones terrorism in Guatemala, Chile, Argentina, and El Salvador—even when the victims are United States citizens?

We ask ourselves: Will the somewhat ominous presence of Spanish-speaking United States Army advisers who have been in El Salvador since the autumn of 1980—many of them of Mexican and Puerto Rican descent—swell in size into a United States ground army in Central America? Does General Haig's reference to dealing with problems "at the source" foreshadow blockades and invasions of countries in the region? Do Senator Jesse Helms' fears of having to "draw the line" north of Mexico portend that Mexico might one day be the object of a "protective" United States intervention?

Is the Administration really aware that armed intervention, be it direct or inspired by the United States, against any Latin-American nation of whatever political stripe, will turn the whole Latin continent into a gigantic brush fire? That we will resist United States intervention in Cuba or Chile, El Salvador or Argentina, Nicaragua or Mexico?

Is Washington aware of the collision course with Mexico that it has charted through its imprudent elevation of El Salvador to the realm of strategic confrontation? Will Washington deny Mexico's legitimate interests in the region—first of all the interest of true stability, the stability that can be achieved only by the speedy dissolution of the ruinous colonial heritage of Central America? It is to be hoped that when the new ambassador takes up his post in Mexico City, he will forcefully inform the Reagan Administration of the true thrust and range of Mexico's preoccupations.

Meanwhile, we ask ourselves if we are to hear in El Salvador nothing but an echo of the corrupting United States intervention of 1954 in Guatemala, itself an echo of interventions past in Nicaragua, the Dominican Republic, Mexico, Haiti, Cuba, and Panama? Is not this the other fundamental reason, along with colonialism, of turmoil, instability, terrorism, hunger, and weakness in the area: United States interventionism, always, only, United States interventionism? Is there no lesson to be learned here? Will this tragedy go on forever, fatally, a poisoned curse on Latin America?

When we ask these questions we think that El Salvador is a test case. A test case of misguided United States expansionism in Latin America.●

CALL TO CONSCIENCE: IGOR GUBERMAN

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. WAXMAN. Mr. Speaker, with the signing of the Helsinki Final Act 6 years ago, the free world was filled with a new hope. By recognizing the indivisibility of human dignity and by establishing standards of moral behavior between the United States and the Soviet Union, these historic provisions seemed to signal a long-awaited cooperation between the two nations. The accords stipulated that the Soviet Union would honor and respect human rights and allow for a freer exchange of people, information, and ideas between the East and the West. Yet in the wake of the Madrid Conference, whose very purpose it was to review these provisions, we must sadly recognize that the Soviet Union views the accords as empty promises. The plight of Igor Guberman is testimony of the Soviet refusal to adhere to this agreement. Arrested on trumped-up charges, Guberman was stripped of all basic rights—persecuted simply because of his religious beliefs, his desire to leave the Soviet Union, and his refusal to be silenced.

Igor Guberman has been described as a "wit, raconteur, science buff, icon collector, social gadabout". An author of popular science fiction books for young people by trade, Guberman was very active in the Jewish cultural movement. He edited an underground journal "Jews in the U.S.S.R.", a publication devoted strictly to cultural and historical aspects of Jewish life and a long-time target of suppression by the Kremlin. Believing that all avenues of artistic self-expression were closed for a Jew in the Soviet Union, Igor Guberman applied for an exit

visa in December of 1978 to emigrate to Israel.

As the Soviet officials became increasingly aware of Guberman's influence in Jewish intellectual circles and his leadership in the emigration movement, they tempted him with the promise of an exit visa if he would keep an eye on emigrating Jews to denounce and prepare provocations against Jewish activists. Refusing to become a false witness to innocent people, Guberman rejected the offer. He was arrested in August 1976, ostensibly for illegally purchasing and selling icons—in actuality for his connection with "Jews in the U.S.S.R." and his activity with the Jewish emigration movement.

Tried and convicted on somewhat shaky evidence supplied by two known thieves, in a trial that has been denounced worldwide as a total mockery, Guberman was sentenced to 5 years at hard labor in the Gulag Archipelago in March of 1980. At his trial, the court also ordered confiscation of his property, which meant that his wife and two children would be left to survive with only the barest essentials. Guberman's sentence was upheld when it was revealed that he was the author of the satirical epigram "Jewish Charivari"; a piece which had been circulated in the Soviet Union and even Israel under the pseudonym Igor Garik. Today while the sentence has been reduced to working for the national economy and Igor's family has been permitted to join him, he is still held captive under brutal conditions in a free settlement under guard. He once wrote of the physical measures taken against prisoners:

A man is being beaten
We hear his screams and yet
We're still: we haven't eaten
And we're low on cigarettes.

Officials in the Soviet Union have clearly tried to make an example of Guberman, hoping that his fate would serve as a warning to other dissidents who refused to silence their hopes and grievances. His imprisonment is compelling evidence of the Soviet efforts to mute Jewish dissidence and of the persistence of anti-Semitism in that country. Today we again raise our voices in protest. Today, we reaffirm our commitment to human rights and to freedom for Soviet Jewry. It is a pledge we shall never break.●

IN HONOR OF DICK GROULX

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. STARK. Mr. Speaker, I will be unable to attend a banquet in my district on March 27, 1981, in honor of one of the more dedicated members of my community. The dinner is in honor of Richard Groulx, executive secretary-treasurer of the Alameda County Central Labor Union. Therefore, I would like to take this opportunity to pay tribute to him here.

The year 1981 marks the centennial of the American labor movement, and Dick Groulx has been a very important part of that movement in the San Francisco Bay area. He has worked for organized labor for 35 years, the past 14 as chief administrative officer of the Alameda Council.

The Dick Groulx recognition banquet honors a man that has long been a vitally important member of my community. It is only fitting that his contributions be recognized and honored by all of us.●

SOCIAL SECURITY FINANCING

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. WEISS. Mr. Speaker, I can think of no more important domestic issue facing our Nation today than the financial integrity of the social security system.

Social security affects almost every family in the United States in one way or another. A system as large and as important as social security must have the full support and confidence of the public.

Quite clearly, we are at a critical juncture for social security. I realize that the Congress will not have any easy decisions to make. However, I am convinced that we can put social security on a sound financial footing, and without cutting back benefits for older Americans or saddling today's workers with huge payroll tax increases.

THREE OPTIONS

In my view, the Congress is faced with three major options to strengthen social security financing.

First, benefits can be trimmed back for today's retirees. I strongly oppose this alternative because it will simply throw many older Americans onto the poverty rolls. The elderly are not the cause of our present economic woes today, but they are among the chief casualties. Older Americans should not be made scapegoats for inflation.

Nearly 3.6 million persons 65 or older lived in poverty in 1979, 400,000 more than in 1978. Information is not yet available for 1980. Many experts agree, though, that more older Americans will be added to the poverty rolls in 1980—perhaps of the same record-setting magnitude as in 1979.

Reducing social security benefits will only add to their economic misery. This option should be rejected out of hand as being both cruel and bad public policy.

Second, social security payroll taxes can be raised. I urge that we reject this measure because the payroll tax burden is already too heavy for today's workers. I strongly believe that we should look for a more progressive tax mechanism—such as the income tax—to finance the social security system, rather than rely essentially upon the regressive payroll tax. The payroll tax is basically regressive because it imposes a flat rate (6.65 percent) on earnings only up to a $29,700 ceiling. Thus, a worker earning $150,000 a year pays the same amount as an employee making $29,700. Finally, another payroll tax hike will be inflationary because most employers will pass on this increased cost of doing business to consumers in the form of higher prices.

A third option is to provide alternative financing for social security retirement, disability, and survivor benefits or medicare hospital insurance. I personally favor this approach because it will make social security's financing more progressive, while assuring the program's financial integrity.

Several alternatives exist to achieve this goal, including authority to borrow from Federal general revenues, interfund borrowing among the social security trust funds, a countercyclical triggering device when unemployment or inflation exceeds certain levels, or partial general revenue financing for social security cash benefits, or medicare hospital insurance.

Persuasive arguments can be made for all of these options. However, partial general revenue financing for medicare hospital insurance is probably the most practical comprehensive solution from a legislative feasibility standpoint.

This proposal would maintain the overall social security tax rate at its current level of 6.65 percent. At present, 5.35 percent finances retirement, disability, and survivor benefits and 1.30 percent is for medicare hospital insurance. My proposal would keep the total social security tax rate at 6.65 percent, but 6 percent would be allocated for retirement, disability, and survivor benefits and 0.65 percent for hospital insurance. In addition, general revenues would be infused gradually for hospital insurance to provide eventually about one-half of the cost of that program.

I am inserting a table to be included in the RECORD to show the effect of this proposal during the next 5 years.

PERCENTAGE CONTRIBUTION RATE FOR EMPLOYERS AND EMPLOYEES EACH

Year	Maximum earnings base	OASDI	HI	Total payroll tax
Present law:				
1981	$29,700	5.35	1.30	6.65
1982	(1)	5.40	1.30	6.70

PERCENTAGE CONTRIBUTION RATE FOR EMPLOYERS AND EMPLOYEES EACH—Continued

Year	Maximum earnings base	OASDI	HI	Total payroll tax
1983	(1)	5.40	1.30	6.70
1984	(1)	5.40	1.30	6.70
1985	(1)	5.70	1.35	7.05
Proposal:				
1981	$29,700	6	[2].65	6.65
1982	(1)	6	[2].65	6.65
1983	(1)	6	[2].65	6.65
1984	(1)	6	[2].65	6.65
1985	(1)	6	[2].65	6.65

[1] The maximum earnings base will rise proportionately each year in accordance with the average covered earnings under social security.
[2] General revenues will be infused gradually to finance approximately one-half of the cost of the hospital insurance program.

The time for partial general revenue financing for hospital insurance is long overdue. Several blue ribbon advisory groups have already urged that hospital insurance be financed totally or partially with general revenues, including the 1975 Social Security Advisory Council, the 1979 Advisory Council, and the National Commission on Social Security. This proposal has bipartisan support. In fact, our distinguished colleague, the ranking minority member of the Ways and Means Committee, Mr. CONABLE, has sponsored legislation to provide general revenue financing for hospital insurance.

Adoption of this proposal would make it possible to stabilize the overall cash benefits tax rate well into the next century. Moreover, it would provide tax relief for today's overburdened workers.

Equally important, it would make the financing of social security and medicare more progressive. The present payroll tax is regressive and has just about reached its limits of political acceptability. Any substantial increase in the near future will certainly encounter opposition from overburdened employees and employers.

The 6-percent rate for OASDI would also build up social security's assets quickly to secure levels. This would provide an added margin of safety if our Nation should experience economic hard times in the years ahead. A sufficient contingency reserve would make it possible to weather an economic storm without the necessity of seeking higher taxes to strengthen social security's financing.

REBUTTAL TO GENERAL REVENUE OPPONENTS

Before concluding I would like to respond to arguments raised by opponents of general revenue financing. First, they say that workers consider their benefits to be an earned right acquired by payroll contributions. Any Government contribution might weaken the earned right concept underlying social security.

However, this measure would continue the fundamental principles that have made social security an extraordinarily effective and popular program. The cash benefits portion would still remain a wage-related social insurance program, protecting workers and their families from loss of earnings because of retirement, death or disability. Workers would continue to receive benefits based upon their earnings record.

The argument for payroll tax financing does not apply, though, equally to hospital insurance. Unlike OASDI, the amount of hospital insurance benefits actually received by aged and disabled persons does not depend upon their prior earnings, but upon their health needs.

Second, opponents often ask: Why should there be general revenue financing for hospital insurance when our Nation is confronted with another deficit? My response is that President Reagan has proposed sizable income tax cuts as a means to stimulate our economy and raise additional revenue to reduce the deficit. I personally oppose this approach because it would funnel the relief largely to upper income persons. Moreover, they usually have their own battery of accountants and tax lawyers to whittle their taxes down considerably.

Partial general revenue financing, along with more balanced income tax reductions, could provide an equitable and balanced tax relief package. This is a preferable approach, I believe, because it would direct more tax relief to low-income and moderate-income Americans. A flat across-the-board income tax cut, on the other hand, will provide the greatest relief for more affluent taxpayers.

The administration's proposed 30-percent income tax cut, for example, would provide a $10,775 tax break by 1984 for a four-person family with $200,000 income, compared to just $109 in tax relief for a similar family with $10,000 income.

OTHER FORMS OF GENERAL REVENUE

I also want to stress that partial general revenue financing for medicare can be part of a broader package to tailor the recommendation to relevant substantive, budgetary, and even political considerations. For example, authority for interfund borrowing among the trust funds could scale down considerably the amount of general revenues needed to supplement the income lost from the hospital insurance trust fund by transferring 0.65 percent of the hospital insurance rate to OASDI.

The same would also be true for authority to borrow from general revenues or the imposition of a countercyclical general revenue mechanism to replace lost revenue when unemployment is high or to recoup lost revenue when inflation drives up cost-of-living outlays.

Any, or all, of these measures can help to fine tune or complement the partial general revenue financing proposal for medicare.

CONCLUSION

In conclusion, the Congress must act promptly to shore up the financing for the old age and survivors insurance trust fund, the largest of all the social security trust funds.

As legislators, we must recognize a fundamental fact. We are running out of options to solve social security's financing problems. Another payroll tax hike will probably undermine support for social security by triggering a backlash reaction from workers and employers who must bear this added cost.

Other options—such as a massive cutback in benefit protection—are equally unacceptable because millions of older and disabled Americans would have their income slashed at a time when prices are soaring.

The only realistic option, I firmly believe, is to provide partial general revenue financing for hospital insurance. It is clearly an idea whose time has come.●

SOCIAL SECURITY TAX RELIEF

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. GEPHARDT. Mr. Speaker, whether you are a Republican, a Democrat, or an independent, we all agree that the economy is in trouble and that we should do something about it. Inflation, unemployment, and high interest rates haunt every legislative decision we make. What we disagree on is the solution.

Most people believe that a tax cut should be part of the solution, but there is disagreement as to what form a tax cut should take. In my opinion, our goal in terms of tax policy should be to take small but long-range steps that will address inflation, the recession, and unemployment, preferably at one and the same time. In other words, a tax cut that would be noninflationary, reduce unemployment, yet stimulate productivity and thus aid in a turnaround of our economy, would be such a plan.

H.R. 1809, the Social Security Payroll Credit Act, is the answer to these concerns. This bill provides for a credit against income taxes equal to 10 percent of social security taxes paid in 1981 and 1982 for employees, employers, and the self-employed. In doing so, H.R. 1809 provides relief not only for the working man and woman, but for business as well by reducing its labor costs. It is a responsible and equitable alternative to a 10 percent across the board tax cut for individuals that President Reagan plans to propose this evening.

According to the Congressional Budget Office, H.R. 1809 will reduce the Consumer Price Index by 0.2 per-

cent while lowering the unemployment rate by the same amount. By putting more money into the hands of consumers and lowering labor costs, H.R. 1809 will increase real GNP. Additionally, by reducing the cost of labor to business, this proposal will create internally generated funds for investment. At a time when high interest rates discourage borrowing, this credit would have a positive impact on increasing productivity.

We are all highly cognizant of the problems regarding the Federal budget and the state of our social security system. The revenue loss from a 10-percent payroll tax credit would be $10.4 billion in fiscal year 1981. Obviously, that amount of money cannot be taken from the social security system. But over the next 2 years, while taxpayers are receiving some progressive relief from the regressive payroll tax through this income tax credit, there will be time enough to study and, hopefully, solve the long term financial needs of social security. In the meantime, the sanctity of the trust funds will be preserved for social security beneficiaries.●

HONORING JAMES B. EDWARDS

HON. THOMAS F. HARTNETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. HARTNETT. Mr. Speaker, today in behalf of the South Carolina congressional delegation, Congressmen SPENCE, CAMPBELL, NAPIER, HOLLAND, and DERRICK, I enter into the CONGRESSIONAL RECORD the following concurrent resolution for the South Carolina General Assembly honoring our friend and former Governor, Secretary of Energy, James B. Edwards. The people of South Carolina are proud to have Secretary Edwards serving in this important position. We have complete confidence that Secretary Edwards along with the Reagan administration will put together a comprehensive energy program that will promote conservation, exploration of alternative energy sources, and reduce the reliance of the United States upon foreign energy sources.

The resolution follows:

A CONCURRENT RESOLUTION TO COMMEND FORMER SOUTH CAROLINA GOVERNOR JAMES B. EDWARDS UPON HIS CONFIRMATION AS SECRETARY OF THE UNITED STATES DEPARTMENT OF ENERGY AND TO MEMORIALIZE SECRETARY EDWARDS AND THE CONGRESS OF THE UNITED STATES TO TAKE SEVERAL ACTIONS TO ENSURE RAPID DEVELOPMENT OF THE AGRICULTURALLY DERIVED ETHYL ALCOHOL FUEL INDUSTRY

Whereas, the members of the General Assembly were pleased to learn of the confirmation of former South Carolina Governor James B. Edwards as Secretary of the United States Department of Energy; and

Whereas, Secretary Edwards is one of a small number of South Carolinians to be honored by being named to a post on the Cabinet of a United States President; and

Whereas, the General Assembly, cognizant of the outstanding public service which Secretary Edwards has rendered to the State and the Nation in other high offices and positions of influence, is confident that he will continue to render valuable and able leadership in his new position; and

Whereas, recently events have occurred which have made it evident that the exorbitant costs paid for supplies of oil and its byproducts necessitate the rapid development of alternate sources of fuel supplies for the United States and indeed for the entire world; and

Whereas, it is becoming more evident that the United States has agricultural resources which may be used to develop large supplies of ethyl alcohol to be used for fuel or mixed with gasoline to produce gasohol; and

Whereas, the South Carolina Governor's Advisory Council on Alcohol Fuels is continuously assessing and developing policies and plans to promote the development of an efficient and economical alcohol fuel industry in our State; and

Whereas, it is the feeling of the members of the General Assembly that actions which have been taken by the states require support at the federal level in order to succeed in establishing this essential home grown alcohol fuel industry. Now, therefore,

Be it resolved by the Senate, the House of Representatives concurring:

That former South Carolina Governor James B. Edwards is commended upon his confirmation as Secretary of the United States Department of Energy.

Be it further resolved that he and the Congress of the United States are memorialized to take the following actions either by executive order or legislative recommendation:

1. Make available immediate low interest loans to finance alcohol fuel production and provide for rapid amortization of new alcohol fuel production plants.

2. Make permanent the federal excise tax exemption on gasohol, on a par with the present four cents exemption.

3. Require the federal government to implement the use of grain alcohol in its vehicles as soon as possible. Such use was authorized by Congress during 1980.

4. Require the federal government to stockpile ethyl alcohol fuel for defense purposes.

5. Appoint a Presidential Ad-Hoc Advisory Committee of people presently involved in agriculturally-derived ethyl alcohol fuel development to advise the President, the United States Department of Agriculture and the Department of Energy to insure the rapid development of the alcohol fuel industry.

6. Direct the United States Department of Agriculture to develop markets for the high protein byproducts of alcohol grain products.

7. Continue and accelerate the implementation of Alcohol Fuel Development Programs of the Department of Energy, the Department of Agriculture, and the Department of Commerce by making loan guarantees available to qualified applicants on a basis that will assure the development of alcohol fuel production facilities in all regions on the Nation.

8. Provide new incentives for on-farm production and use of alcohol fuels to be developed as a major part of our Nation's alternative and synthetic fuel energy program.

Be it further resolved that a copy of this resolution be forwarded to Secretary of the United States Department of Energy James B. Edwards and to members of Congress of the United States representing South Carolina.●

GREEK INDEPENDENCE DAY CELEBRATED

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BIAGGI. Mr. Speaker, today marks the 160th anniversary of Greek Independence Day, which will be celebrated by millions of Greek Americans across this Nation. This day holds a special significance to those of us in America who are in our third century of independence, for we owe a debt of gratitude to ancient Greece, where the roots of democracy began.

The Greek War of Independence was won in 1821 after the Greeks were able to crush their Turkish opposition under the able leadership of Archbishop Germanos of Agia Lavra. This noble patriot led his fellow churchmen into battle with their banner—the sign of the cross—raised high. Their resultant victory on March 25 brought freedom and peace to Greece which had been struggling under Turkish oppression for several centuries.

The celebration of this momentous occasion from the annals of Greek history is somewhat muted today as we look, for the 7th consecutive year, at the ongoing tragedy of Cyprus. This tiny island and its Greek population continues to be occupied illegally by the Turkish army. This occupation was both illegal and immoral and has resulted in thousands of Greek refugees being driven from their own land. The Turkish Government continues to refuse to account for the nearly 2,000 Cypriots who have been missing since the invasion. I renew my plea to our State Department to continue to press the Turkish Government for a full accounting of these missing Greeks and urge the current administration to direct its attention to this problem.

I am fortunate to represent the 10th Congressional District in Congress, which boasts one of the largest Greek American populations in this country. Greek Americans today are not only celebrating the 160th anniversary of Greek independence, but also the blessed Feast of the Annunciation. Included in my district are the communities of Astoria and Long Island City, well known for their hard-working, God-fearing, and loyal Greek Americans, who have family and religious values that have not and will not change over time. The Greek religion and culture are rich in symbolism and tradition, and have provided a strong

foundation upon which Greek Americans have built stable and productive family lives.

I salute my many friends in the Greek-American community in New York on their independence day. It is important to pause on occasions such as these, to reflect upon and to be thankful for, the many contributions which this community has made to our own American culture, from art to education to entertainment. May the year ahead hold for them many blessings, peace, and prosperity.●

REFORMS IN DEFENSE PROCUREMENT

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BROOKS. Mr. Speaker, I would like to call to the attention of my colleagues a letter recently sent by Senators GOLDWATER and METZENBAUM to Defense Secretary Weinberger urging far-reaching reforms in Defense procurement. This letter has had a chilling effect on those Defense officials and contractors who have over the years mismanaged and wasted the taxpayers' hard earned dollars on costly gadgets that are not needed and do not work. It has dashed the hopes of those in DOD who, in light of the record Defense budget, were preparing hundreds of questionable contracts to be awarded to favorite sole-source suppliers. Most importantly, the letter supports a standard of conduct in DOD procurement that every Member, Republican or Democrat, can support—buy only what you need and do so using full and open competition.

I wish to wholeheartedly commend Senators GOLDWATER and METZENBAUM for their incisive and courageous letter and request that it be printed in the RECORD so that my colleagues may refer to it as they are bombarded with the numerous spending proposals forthcoming from DOD.

The letter follows:

U.S. SENATE,

Washington, D.C., February 25, 1981.

Hon. CASPAR W. WEINBERGER,
Department of Defense,
The Pentagon, Washington, D.C.

DEAR SECRETARY WEINBERGER: In his State of the Union Address, President Reagan restated his intention to move immediately to strengthen the nation's defensive posture. "But even here," he said, "there was no exemption. The Department of Defense came up with a number of cuts which reduced the budget increase needed to restore our military balance . . . The aim will be to provide the most effective defense for the lowest possible cost."

We support the goal of upgrading our military strength and we commend the President for his determination to accomplish that objective in the contest of sound, cost-conscious methods of management.

We are convinced that the Department of Defense, whose budget will soon make up nearly a third of all Federal spending, is in a position to effect major savings without in any way sacrificing military muscle. These savings can be made in two major areas—improved procurement practices, including greater use of multi-year contracts, and more effective administration.

Procurement reform is by no means a new topic at the DOD. As long ago as 1967, for example, then-Secretary Robert McNamara estimated that the failure of the DOD to take advantage of competition contributed to the waste of as much as twenty-five cents on each procurement dollar.

Your predecessor, Secretary Brown, echoed Secretary McNamara's frustration in January, 1979, when he told the New York Times that "his key disappointment so far was his inability to induce genuine cost efficiency within the Defense Department." And in a report submitted to December 25, 1979, to the Chairman of the Senate Budget Committee on the implementation of OMB Circular A-109, the GAO stated:

"The greatest non-compliance with A-109 appears to be the services' reluctance to seek solutions to their weapon system needs through competition. Pre-conceived solutions are still being proposed as needs rather than seeking solutions through competitive proposals."

President Eisenhower once pointed out that the world's spending on arms "is not spending money alone. It is spending the sweat of its laborers, the genius of its scientists, the hopes of its children." That, we believe, is what we must keep in mind when we talk about financial efficiency in the DOD.

Today, just as it has for years, the DOD spends fewer than 10 percent of its procurement dollars through contracts let by competitive sealed bidding. Just as consistently, the Department takes the sole source route for over half of its procurement spending.

We are aware of the argument that sole source contracts are necessary in order to acquire sophisticated items that cannot be procured through price competition. This may be true in some cases, but it is also true that the Department routinely lets sole source contracts for items that could readily be purchased on the open market.

Two years ago, to take only one of many instances, we filed suit in Federal court to require the Navy to use competitive bidding to procure the CTX, an off-the-shelf light cargo aircraft. In spite of the clear intent of the Senate, made abundantly obvious in a colloquy between ourselves and the Chairman of the Armed Services Committee, and in spite of the existence of several competent suppliers, the Navy in the end procured the CTX through a sole source contract after our case was dismissed on a technicality. This decision by the Navy is typical of a procurement policy that operates without regard for saving taxpayer dollars.

There is no doubt that the fact that competition can lower the cost to the taxpayer of acquiring even highly sophisticated weaponry.

In 1973, a study prepared for the Joint Economic Committee examined the costs of twenty complex weapons systems including sophisticated electronics and missile systems. These contracts originally were awarded through sole source procurement, but for various reasons the costs were later readjusted by price competitive bids. The results were dramatic—price decreases averaging 51 percent. More recently, GAO's September 25, 1979, report to the Chairman of the Budget Committee on the status of DOD's efforts at procurement reform included data supplied by the DOD on its program to break out spare parts from larger systems for competitive acquisition.

At the Oklahoma Air Logistics Center, a turbine shroud cost $86.23 when procured on a sole source basis. Competitive procurement lowered the cost to $64.99.

A nut assembly that cost $246.29 on a sole source basis was acquired competitively for $36.75.

A panel assembly costing $1,454 on a sole source basis was purchased through competition for $245.

Those are laudable savings, but unfortunately, they are more the exception than the rule. In February of this year, the CBO estimated that over the next five years, modest improvements in procurement efficiency could reduce the Department's outlays by $16 billion and its budget authority by $22 billion.

In this time of budget austerity, we are convinced the opportunity exists to make the kinds of far-reaching reforms in procurement that have in the past eluded us. New legislation might be useful in this regard, but current law provides a more than adequate vehicle for a determined effort to improve the Department's efficiency in procurement.

Under existing legislation, sealed bid competition is specifically required for all procurement. Unfortunately, the law also provides 17 exemptions to that rule, several of which are exceedingly broad. As a result, DOD officials have been able virtually at will to purchase on a non-competitive basis.

We believe that these wasteful practices can be brought under control. But to do so will require a tough-minded, persistent and systematic effort to change fundamentally the way the DOD bureaucracy does its procurement business.

It is not enough simply to state a policy of enhancing the use of competition. Responsibility for implementing such a policy must be very precisely delegated. And to be effective, it must be placed in the hands of officials who are accountable personally to the highest level in the Department. Whenever competitive bidding is not used, the failure to do so should be specifically approved or disapproved at the level of the Office of the Secretary of Defense. Such a review procedure would require procurement officers to prove their case to an aide to you. When competitive bids are not used, a top level official, responsible directly to you, should be charged with this task. A general exception could be made for all contracts below a certain dollar amount and for emergency situations.

We would also suggest that the Department make greater use of formal advertising in awarding contracts. Currently, hundreds of millions of dollars in contracts are awarded each year, particularly for consultant services, with no notification to potential competitors that this work will be available. Why not simply require, when national security considerations permit, that all contracts in excess of $10,000 be announced in the Commerce Business Daily no less than thirty days prior to the closing date for submission of bids? We are confident that the free enterprise system will respond.

In order to facilitate that response, we strongly support enhancing the Department's flexibility in the area of negotiating multi-year contracts for the procurement of selected weapons systems. A contractor,

after all, cannot be expected to make major capital investment in machinery and raw materials in the absence of assurances that a market will continue in the future to exist. By discouraging necessary investments through single-year contracts, we lose for the taxpayer the economies of scale that should be realized in major acquisition programs. Those savings, we believe would amount in the long run to a far greater sum than we might have to pay out to compensate companies whose multi-year contracts must, for whatever reason, be terminated ahead of schedule.

Another problem—one that has implications for the Congress as well as the Department—is the annual spending spree in which DOD and virtually all other Federal agencies have indulged at or near the end of each fiscal year in order to clear the accounts and protect future appropriations. That pattern of bureaucratic self-protection inevitably produces wasteful spending, funds marginal projects, and adds enormously to the cost of government. It is necessary to reverse the incentive system by rewarding officials for saving money, rather than giving them powerful incentives to spend every penny available. We are certain that a Secretary who chose to bluntly confront that pattern of spending would have strong support in the Congress. Certainly, he or she would have ours.

But procurement reform is not the only area in which major savings can be made.

The Systems Acquisition Report quarterly update issued by the General Accounting Office on November 17, 1980 demonstrates that something is very wrong with the manner in which DOD has managed its major acquisition program.

In the S.A.R. issued in September, 1978, for example, the cost of acquiring 545 YAH-64 advanced attack helicopters was projected at $4.14 billion, or $7.4 million for each helicopter. In late 1980, that figure had risen to $5.85 billion or $10.7 million per aircraft.

In 1978, each Perry class frigate was expected to cost $139 million. In FY '81 the cost per ship rose to nearly $225 million. Inflation has been severe since 1978, but not severe enough to turn a figure of 139 into a figure of 225.

The program cost for the F-18 Hornet was estimated at $14.3 billion in 1978, with a cost per plane of approximately $14.8 million. For FY 1981, the F-18 program cost estimate has reached $29.7 billion and the unit cost will exceed $30 million. Again, inflation cannot account for the cost growth.

These are not isolated cases. Runaway costs characterize our entire defense procurement program.

These vast expenses have nothing to do with maintaining the strength of our military forces. They are, pure and simple, the result of a system that permits DOD officials to operate as though the public purse has no limits. It is a system that can and must be changed.

But no reform will have any beneficial effect as long as the DOD continues to bail out wasteful contractors. Admiral Rickover has described what happens when contractors know that they can always count upon the Pentagon to save them from the consequences of their own bad management.

"Large defense contractors can let costs come where they will and count on getting relief from the DOD through changes and claims, relaxation of procurement regulations and laws . . . or other escape mechanisms . . . they will make their money whether their product is good or bad; whether their price is fair or higher than it should be; whether delivery is on time or late."

We believe that the time is long past due for decisive action. The Defense Department should cut off contractors with records of waste, overruns, and poor management. There are companies that are prepared to give the taxpayer a dollar's worth of value for every dollar spent. Those are the companies that should get the government's business.

In order to put teeth into that approach, we suggest that you establish a second review process in the Office of the Secretary of Defense. Just as a top level official should be required to sign off on non-competitive procurements, so should cost overruns be intensely reviewed. Such a review ought to be triggered whenever an over-run exceeds the rate of inflation.

The Department can also do more internally. There is no reason why the DOD cannot do what every well-run private corporation does to control costs and improve its own productivity. But a glance at a random sample of GAO reports done over the past two years on DOD operations demonstrates vividly how far the Department has to go.

One report is entitled "Correct Balance of Navy's Foreign Military Sales Trust Fund Unknown."

"The Department of Defense," the report says, "does not know the correct cash balance being held in trust for countries involved in the Navy's foreign military sales program. This is despite the Navy's having spent thousands of staff days since early 1977 to determine why the trust fund account does not agree with detailed military sales case accounting records. Unreconciled differences in cash balances between the sets of records totaled $544 million, as of June 1, 1978."

Another GAO report is entitled, "The Air Force Should Cancel Plans to Acquire Two Computer Systems at Most Bases.

"The Air Force plans to install two computer systems at about 105 bases to perform such functions as accounting, finance, personnel, and supply. This program will cost about $600 million to $1 billion more than a one-system approach over an expected life of 20 years."

GAO concludes that this is unnecessarily expensive and restricts competition on the largest computer acquisition ever attempted in the government.

Another, selected at random, suggests that "The Army Should Use Available Serviceable Parts to Avoid Repairs."

"The Army unnecessarily spends millions of dollars to repair parts when more than enough serviceable parts are available to meet current needs. The Army needs to establish procedures for identifying repair actions, notifying depots that replacement quantities are available, and matching actions with quantities."

And there are many more. "DOD Continues to Subsidize the Foreign Military Sales Program By Not Charging For Normal Inventory Losses."

"GAO reported in September 1977 and August 1978 that DOD was losing millions of dollars because normal inventory losses were not being recovered on foreign military sales. The Arms Export Control Act was amended in September 1978 expressly to require recovery of these losses on certain inventory sales."

"Although the military services have since identified almost $600 million in inventory losses, governments have not been charged for their fair share of the losses as required by the Act. As a result, the United States has lost millions and created a subsidy to foreign government."

DOD Can Save Millions of Dollars by Improving Management of Air Force Inventories.

"Two Air Force Logistics Centers has over $50 million in excess stocks on order for items for which they had over $8 million of stock on hand exceeding current needs."

And so it goes.

The Navy's Material Handling Costs can be Reduced.

The Navy does not Know if it has Too Much Electronic/Electrical Depot Maintenance Capability, Too Little, or the Right Kind.

Defense Department is not Doing Enough to Maximize Competition When Awarding Contracts for Foreign Military Sales Programs.

We could add many more items to this list, but the point is that waste and inefficiency have over the years become a way of life for too many in the Department. The Nation cannot afford to permit this situation to perpetuate itself any longer.

We hope, Mr. Secretary, that you will seize the opportunity presented by President Reagan's approach to Federal spending to undertake major reforms in your Department's operation. By so doing, you will contribute to the Nation's economic health and to the real strength of our armed forces.

Very sincerely yours,

BARRY GOLDWATER.
HOWARD M. METZENBAUM.●

NEWSDAY EDITORIAL POINTS TO A NATIONAL WEAKNESS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SIMON. Mr. Speaker, one of the lessons we seem to be much too slowly learning is that in the United States our schools, and our businesses, and our Government must pay much more attention to foreign languages.

Recently Newsday had an excellent editorial, which I am calling to the attention of my colleagues in the House and Senate. It is short, but it tells an important lesson:

TONGUE-TIED AMERICANS

For a nation of immigrants, Americans seem remarkably uninterested in foreign languages.

At a two-day conference attended by top-ranking intelligence officials, much concern was voiced about the lack of language skills in the military. The end of the draft made a bad situation worse, and the Army is now forced to offer enlistment bonuses ranging up to $4,000 for recruits who are fluent in foreign languages.

A recent report by the President's Commission on Foreign Language and International Studies calls Americans' insufficiency in languages "nothing short of scandalous," and warns that it's getting worse.

The rest of the literate world has generally recognized that the younger the student, the easier it is to learn a new language. In many countries, foreign languages are

taught in elementary school. But in the United States they're often considered frills even on the secondary and college levels.

A great many people on this planet speak English, but a lot more don't. The joy of being able to converse with people other than tour guides and hotel desk managers when abroad, of reading a book in the author's own tongue, of becoming familiar with the nuances of different cultures is being denied to millions of Americans.

The situation is bad enough with relatively familiar languages like French, Spanish, and German. But the President's Commission says it's becoming critical in the Foreign Service and the military with others such as Arabic, Chinese, Russian, Korean, Japanese, Persian, and Polish.

The day may come when speaking a foreign language will be a patriotic duty.●

FRIENDS OF THE AD HOC CONGRESSIONAL COMMITTEE FOR IRISH AFFAIRS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BIAGGI. Mr. Speaker, as chairman of the 121-member bipartisan Ad Hoc Congressional Committee for Irish Affairs, I wish to share with my colleagues some recent endorsements which our committee has received for its work on behalf of peace and freedom for Ireland.

On Sunday, March 22, I had the distinct privilege and honor to address the annual communion breakfast of division 14, Ancient Order of Hibernians in Watertown, Mass. Division 14 is the largest division of the Ancient Order of Hibernians which itself is the largest Irish-American organization in the Nation. During the course of the breakfast I had the pleasure of discussing the Northern Ireland issue with the AOH's distinguished national president, Jack Connolly, and the national director, Dave Burke, as well as Massachusetts AOH president, Jerry Sexton. The relationship between the ad hoc committee and the AOH is a long and pleasant one. It was the AOH which requested that the committee be established and throughout our 43-month history, we have worked in concert on key issues.

During the visit to Watertown I was presented with two resolutions, one from the Boston city council, the other from the house of representatives from the State of Massachusetts. I would like to insert the full text of these resolutions in the RECORD at this point.

Finally, I would like to insert the text of the March 21 editorial from the Irish Echo, the largest Irish-American newspaper. It represents a general assessment of the Irish issue on St. Patrick's Day 1981. I again use this occasion to urge my colleagues to join the ad hoc committee and help us in our efforts to bring peace and unity to the great land of Ireland.

RESOLUTION HONORING CONGRESSMAN MARIO BIAGGI FOR HIS EFFORTS ON BEHALF OF HUMAN RIGHTS IN NORTHERN IRELAND

Whereas the cause of human rights in Northern Ireland has no stronger spokesman than Congressman Mario Biaggi of the Tenth Congressional District of New York; and

Whereas Congressman Biaggi is the founder and presently serves as the Chairman of the bipartisan Ad Hoc Congressional Committee for Irish Affairs, which has been one of the most effective voices in defense of the rights of the long-suffering people of Northern Ireland; and

Whereas Congressman Biaggi has been instrumental in working to achieve an American foreign policy which seeks peace with justice in that war-torn land; and

Whereas on Sunday, March 22, 1981, Congressman Biaggi will be the honored guest of the Ancient Order of Hibernians in Watertown; and

Whereas the people of Boston, who have such strong historical and cultural ties to the people of Ireland, are deeply grateful to the outstanding efforts by Congressman Biaggi to ensure a lasting peace for the people of Northern Ireland; Therefore, be it

Resolved, That the Boston City Council in meeting assembled hereby officially commends Congressman Mario Biaggi for his efforts on behalf of human rights in Northern Ireland and extends to him its best wishes for continued success in his most important work.

THE COMMONWEALTH OF MASSACHUSETTS HOUSE OF REPRESENTATIVES OFFICIAL CITATION

Be it hereby known to all that: The Massachusetts House of Representatives hereby offers its sincerest congratulations to Congressman Mario Biaggi in recognition of his dedicated efforts in the cause of a united Ireland.

The entire membership extends its very best wishes and expresses the hope for future good fortune and continued success in all endeavors.

IN LIMBO ON MARCH 16

As this is written the great day has not yet arrived, but when you read it the celebration of St. Patrick's Day 1981 will have passed. So we are in a sort of limbo.

It's a time for some thoughts on a number of matters. In Ireland a debate rages over just what sort of relationship will exist between Britain and Ireland if some positive step towards unity is taken by the two governments.

It appears that Britain's quid pro quo for supporting some type of progressive program leading towards the unification of Ireland will be a defense pact between the two nations. This rankles the pro-neutralizing forces in Dublin.

But supporters of this approach point out that there are so many defense pacts existing in the world now that one more—even between two old foes—is no reason to oppose the new approach which could bring about a unified Ireland.

To make matters more complicated government officials in both Dublin and London are vague at best when discussing this scenario. In many cases they simply will not answer inquiries about the matter.

The opposition parties in the Republic of Ireland are raising Cain over the whole matter. But it is difficult to see just what their point is. Old enemies such as France and Germany have prospered since they became allies and there are many other examples in the modern world.

Closer to home there is much conjecture as to how President Reagan will react to the Northern Ireland travail—if indeed there will be any reaction at all. It is certainly too early to tell.

So far he has refused to lift the ban on the sale of U.S. weapons to the RUC (the Northern Ireland police). That is commendable and perhaps he will surprise his detractors.

It is interesting too, to note his acceptance of an invitation to luncheon for St. Patrick's Day from the Irish Ambassador.

As for the formation of the "Friends of Ireland" by the Kennedy-Carey-O'Neill-Moynihan group we will wait a week to comment. Certainly if this organization can be as effective as the Ad Hoc Congressional Committee on Irish Affairs under the chairmanship of Congressman Mario Biaggi it will be a help. The Biaggi committee has the support of most of the major Irish American organizations. He and his colleagues have earned that support.●

AGRICULTURAL LANDS CONVERSION TO NONAGRICULTURAL USES

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. GOODLING. Mr. Speaker, I am pleased to have joined my colleagues in sponsoring House Concurrent Resolution 92, the resolution expressing congressional concern for the continuing permanent conversion of productive agricultural lands to nonagricultural uses.

In light of the present administration's desire to return various powers presently contained within the Federal branch to State, county, and local governments, I am pleased that this resolution finds it in the best interest of the United States to:

(1) Cooperate with local and state governments in their efforts to promote the continued use of important agricultural land for the production of food and fiber; and

(2) Encourage and assist people who are engaged in agriculture to protect and enhance the productive condition of their agricultural land.

Mr. Speaker, may I present a small example of how agricultural land can and is being preserved in my home State of Pennsylvania, and in the 19th District, my constituency. I believe that both models exemplify well how local governments can be efficient and successful in making their own determinations regarding farmland preservation.

The Pennsylvania land policy program was designed to address the loss of some 3 million farmland acres between 1959 and 1969. This breaks down to 115 acres per day, presenting

a significant problem to a commonwealth which ranks among the top 10 States in the production of 12 main agricultural commodities, among them apples, livestock, milk, and other dairy products, and poultry. In 1972, the value of the State's crops and livestock amounted to almost $1.4 billion. Farmers in the Keystone State, and particularly those in the southeastern section which includes the counties of Adams, Cumberland, and York, have been plagued with problems now familiar in many farming areas: Inflation, spiraling energy costs, market uncertainties, and increasing pressures from expanding suburbia.

A good portion of the State land program has been implemented since its inception in the midseventies. Highlights of this package include:

(a) *Preferential property tax assessments.*—Giving lower tax assessments to those farmers who voluntarily agree to maintain their land for agricultural purposes; also referred to as the "Clean and Green Act".

(b) *The land condemnation review board.*—Looking at specific State and local projects with an eye for possible effects on agriculture; can require a state agency or local government to make alternative arrangements.

(c) *The milk security fund.*—Requiring that milk dealers post bond as a protective measure for dairy farmers.

(d) *Exclusive agricultural zoning.*—Allowing municipalities to zone exclusively for agricultural lands.

Together, the measures enacted thus far have had an advantageous impact on the Pennsylvania agricultural base, which is stabilizing at approximately 9 million acres. In addition to these programs, a bill is currently before the general assembly which would permit the formation of agricultural areas or districts. If the bill should be enacted, a group of farmers could petition local municipalities to form such areas; these districts would not be subject to laws detrimental to agriculture, such as nuisance ordinances. Additionally, these districts might possibly offset the manner in which States condemn and/or tax property. With this method, a variety of options exists which would restrict more stringently the subdivision of prime farmland.

Agricultural land is the prime resource of the counties which comprise my own congressional district: Adams, Cuberland, and York. Although some of the best farmland in the State can be found in this area, a downward trend of farms continues in these counties and in the entire southeastern section of Pennsylvania. Unique to the region is the fact that it is adjacent to three metropolitan areas: Baltimore, Philadelphia, and Washington are all within 100 miles. Therefore, farmers have been feeling the acute repercussions of suburbinization combined with the economic problems associated with double digit inflation. These problems have caused older farmers especially to consider seriously taking their land out of productive use when the approach of retirement age reminds them of pensions and insurance.

When York County found that its small family farms were turning into subdivisions by way of investors, the planning commission responded with what could be termed a hybrid solution to preserve farmland. After numerous reported meetings and a great deal of good ole fashioned haggling among farmers, small residential property owners, developers, local officials, and planners, they came up with an approach that combines zoning regulations by means of the following techniques:

(a) *Low residential density control.*—All agricultural uses permitted; residential uses permitted in the agricultural zones only on a very low density basis (1 dwelling unit per 20–50 acres); however, dwelling units could be located on a minimum lot size of 1 to 2 acres; no commercial or industrial uses permitted.

(b) *Subdivision restrictions.*—All agricultural uses permitted; residential subdivisions (other than minor subdivisions) permitted only when connected to public water and sewer facilities; no commercial and industrial uses permitted.

(c) *Prime agricultural land preservation.*—All agricultural uses permitted; residential uses permitted only on soils other than the prime agricultural soils (Class I, II, and possibly III); commercial and industrial uses not permitted.

I am told that York has found this method simple, quick, understandable, and easily implemented by county municipalities. York decided upon this particular approach because officials there felt that they: First, needed to control the number of new dwelling units being built in their rural agricultural areas; second, needed to limit the amount of land being subdivided for speculative purposes; and third, wanted assurances that any new construction that did take place would be relegated to nonprime agricultural land. Two interesting variations of York's selected approach to zoning regulation include: First, uniform restriction of single family development lots, which in effect limits the number of new family dwellings permitted on an existing tract of ground to six plus the prime farmstead; and second, sliding scale restriction, which increases the permitted number of new family dwelling units for larger farms.

The effect of these efforts today is that the number of subdivisions in York County is now holding steady; in addition, farmers as well as real estate practitioners now accept the practices more readily as a necessary means to halt major piecemeal speculation in southeastern county.

The United States must begin to think about its role as a food and fiber provider for a world ripe with drought and hunger; about the imbalances of international trade; and about the contribution of one of the more highly efficient domestic industries to the national economy. It must also realize that farmers, while facing problems stemming from declining economic conditions the world over, like to maintain their sense of independence from what they often perceive to be misguided intervention by competing Federal agencies. Land use and its regulation have traditionally been the responsibility of State and local governments. I have highlighted two land preservation policies currently in use in my own State and district which I believe to be satisfactory. Let us at the Federal level strive to encourage and to support State and local farmland preservation policies. Let us learn from the mistakes of the energy crisis. Let us acknowledge that agricultural land is a vital resource, not to be taken for granted as we have done so often in the past. May I borrow generously from William Jennings Bryan, who said:

Burn down your cities and leave our farms, and your cities will spring up again as if by magic; but destroy our farms, and the grass will grow in the streets of every city in America.

Thank you.●

CONGRESSMAN CLAUDE PEPPER FLORIDA'S OWN CONGRESSMAN

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. PEPPER. Mr. Speaker, a very talented and lovely lady, Mrs. Marie Deskins, of Miami, did me the great honor recently of composing a beautiful poem entitled, "Congressman Claude Pepper." Mrs. Deskins' poem is not only a moving tribute to me but it is another fine example of the accomplishments being made by many of the senior citizens of our country. Mrs. Deskins will be 79 years old on April 4 and she remains alert and involved; an inspiration to all who know her. I, therefore, Mr. Speaker, insert her poem, which I shall always cherish, in the RECORD immediately following these remarks:

CONGRESSMAN CLAUDE PEPPER

The 1980 election plainly shows
That a man does not lose his knowledge
Or ability to serve his Country
Due to age . . . age is like Vintage Wine.
Men improve with age.
He stood up to adversity
When his lovely Mildred passed on.
Florida . . . young and old adore him;
His untiring effort for the aged;
The eternal struggle . . . for better housing;
For more protection and help;
No one person has done more.
The State of Florida is lucky
To have a man so wise and strong.
For the many years he has served us
May God Bless him . . .

So he may have many more years of life.●

ELEUTHERIA I THANATOS

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. NEAL. Mr. Speaker, today marks the 160th anniversary of the beginning of the Greek revolution that ended more than 400 years of repressive rule by the Ottoman Empire. Led by Prince Alexandros Ypsilantis, a small band of patriots, against overwhelming odds, began an 8-year struggle which culminated in the recognition of their sovereign rights by the Turkish Government in 1829.

Mr. Speaker, this is an important day for the Greek people as well as for all people who cherish freedom and democratic principles. After all, the concept of democracy was spawned by the remarkable leaders and thinkers of ancient Greece whose teachings inspired the Founding Fathers of our own country, as well as of other democratic nations.

It should be remembered, too, that in the year 1821, our own Republic was young and, therefore, the cause of Greek independence won the sympathies of many leaders in the United States. President James Monroe wrote:

> The mention of Greece fills the mind with the most exalted sentiments, and arouses in our bosoms the best feelings of which our nature is susceptible. That such a country should have been overwhelmed, and so long hidden, as it were, from the world under a gloomy despotism, has been a cause of unceasing and deep regret to generous minds for ages past . . . A strong hope is entertained that these people will recover their independence, and resume their equal station among the nations of the earth.

And so it was, Mr. Speaker, that the Greek Army, with European friends, stood up against the powerful Turkish Army, with its Egyptian mercenaries, and won back its country's freedom.

The Greek people have demonstrated time and again, often by shedding their blood, that they understand the value of this precious commodity called freedom. The heroics of the 19th century were matched by Greek efforts in World War II and its aftermath. They cried "OXI!" beating back Mussolini's invading force in 1940, and gave strong resistance to the Nazis until the Allies arrived to help repel the German army.

Therefore, Mr. Speaker, it is with respect and admiration that I join the Greek nation and the many Americans of Greek origin in the Fifth Congressional District and across the Nation in celebrating Greek independence. We also celebrate a century and a half of true friendship between the people of America and the people of Greece.

I take pride in informing this body that my State of North Carolina is in the process of declaring this day a State holiday for the celebration of Greek independence.●

TRIBUTE TO LEONARD ROHMER

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. OTTINGER. Mr. Speaker, I rise to bring to the attention of my colleagues the outstanding achievements of Leonard Rohmer, executive director of Westchester Jewish Community Services, Inc. (WJCS). Mr. Rohmer is a psychiatric social worker and has been with WJCS since 1957. On March 29, I shall be privileged to participate in his retirement tribute.

When Mr. Rohmer came to WJCS 24 years ago, it was a small family service agency with two offices. Since that time, Mr. Rohmer has presided over the agency's spectacular growth. Today, Westchester Jewish Community Services, Inc. is a nonsectarian child guidance and family mental health clinic with six branch offices throughout Westchester County, N.Y. It is, in fact, the sixth largest voluntary family service agency under Jewish auspices in the United States.

Throughout WJCS's growth, Mr. Rohmer has provided visionary guidance, steering it firmly in the direction of compassionate, highly qualified help to those in emotional stress. Mr. Rohmer's outstanding innovative skills have made WJCS a leading mental health force in Westchester with an excellent professional reputation.

Mr. Rohmer's contributions to the WJCS, indeed, to the entire Westchester community, will long be remembered. His dedication and perseverance have assisted thousands of emotionally distressed. He has encouraged the young, and given hope to the elderly and the frail. I commend him for his service, wish him luck in his retirement, and I thank him for 24 years of outstanding leadership for Westchester Jewish Community Services.●

LIBRARIES SEEK TAX GUIDELINES

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. GEPHARDT. Mr. Speaker, today I am introducing a bill to provide that any tax-exempt organization that operates a bona fide library as a permanent and principal part of its tax-exempt activities, be treated for tax purposes as a public charity in the same manner as other educational organizations such as schools and universities. The bill is limited to only those libraries which are operated as a permanent and principal part of the tax-exempt activities of the subject organization and were organized by a public act of the United States, of any State, of the District of Columbia, or of any possession of the United States, or were in existence prior to 1789; and second, ones which are open and available to the public at no charge and are operated as the sole activity of the subject organization to insure that only such libraries that are clearly organized to serve the public will benefit from this legislation.

Because of the investment income from their endowments, some tax-exempt organizations that operate a library as described above, run the annual risk that they will fail to meet the Internal Revenue Service guidelines to qualify as a publicly supported organization and that, therefore, they will be classified as a private foundation. Under existing law, unless a library meets the publicly supported financial test, it will not qualify as a public charity even though such library clearly serves a public purpose. Such libraries spend significant amounts in legal and accounting fees on an annual basis, funds that would otherwise go to the exempt purpose, for example, to purchase books, et cetera, to determine and insure that they meet the Internal Revenue Service guidelines. A library that does not meet these tests is usually classified as a private operating foundation and is required to pay a 2-percent excise tax on their net investment income. The purpose of the excise tax, as set out in the legislative history, is not to raise revenue for the Government, but to cover the Internal Revenue Service expense in monitoring private foundations, principally to insure that such organizations are promptly and properly using their funds for charitable purposes. The purpose behind the excise tax does not appear to be applicable to the class of libraries described in the bill.

A library that is classified as a private foundation also has a more difficult task than an organization classified as a public charity in soliciting funds from potential contributors. For example, a private foundation that is not an operating foundation may make contributions to public charities and private operating foundations, but generally may not make qualifying contributions to other private foundations that are not operating foundations. Because of the uncertainty as to whether a private operating foundation continues to qualify as an operating foundation—there are complex tests that must be satisfied annually—many individual contributors and other private foundations that are not operating foundations are hesitant to contribute funds to such an organiza-

tion even though it clearly serves a public purpose. As a result, funds that would otherwise go to a library described in the bill are diverted to other charitable organizations.

Although most libraries within the class of libraries described in the bill are able to satisfy the publicly supported test and qualify as a public charity, there are some libraries within that class that because of their endowment funds, are unable to satisfy these tests, and therefore are classified as private operating foundations. Because such libraries are classified as private operating foundations, they must pay an excise tax on their net investment income. One such library is the St. Louis Mercantile Library located in St. Louis, Mo. For taxable years after 1977, this will amount to $2,000 to $4,000 per year. In addition, this library must incur annual legal and accounting expenses to make sure that it falls within the private operating foundation guidelines.

I am not aware of many other similar libaries in the particular situation being faced by the St. Louis Mercantile Library. Thus, it is anticipated that the annual loss in revenue if this bill is enacted would be less than a few thousand dollars per year. The bill indirectly affects many other libraries because the passage of the bill will also relieve them of the necessity of continually insuring that they meet the publicly supported tests, and this is why the bill is supported by, among others, The Independent Research Libraries Association, whose members include the New York Public Library, the Henry E. Huntington Library, American Antiquarian Society, and the Library Company of Philadelphia.

The St. Louis Mercantile Library Association was established in 1846 to form a well-rounded collection of books for the information and convenience of St. Louis. The formation of the library was authorized and approved by a public act of the General Assembly of the State of Misouri. The library is maintained in its own building in downtown St. Louis.

Over the past 132 years, the library has assembled a notable collection of books, now over 213,000 volumes, comprising a general collection in the liberal arts area, with emphasis on history, biography, travel, philosophy, religion, and the arts. The library maintains one of the country's distinguished and most comprehensive collections of regional history pertaining to St. Louis and Western Americana.

The Western Americana Collection, with approximately 55,000 rare books, is probably the most comprehensive collection in that field in existence. The collection is frequently consulted and referred to by many students and historians in this field.

In addition, the library has one of the most complete files available in the St. Louis area for six local papers, including some 500 bound volumes of St. Louis newspapers beginning with 1812—a few of these cannot be obtained in any other library.

The library has also been the recipient of many valuable gifts during its existence. These gifts include the fragmentary journal of Pierre Laclede's stepson, Auguste Chouteau, describing the founding of St. Louis, and the original manuscript "Journal of the Proceedings of the First Legislative Council of the Territory of Louisiana, From June 3, 1806, to October 9, 1811." For individuals researching the organization of the territorial government of the Louisiana Purchase or about Missouri's first steps toward statehood, these documents are of extreme importance. Another notable possession is the four-volume elephant folio of Audubon's "Birds of America."

The library is open to the public and currently maintains a broad-based membership of over 2,000. While membership is necessary to check out materials—membership dues are currently a nominal $10 per year—anyone can use the books and collection on the premises of the library. The library is also made available to students from Washington University to observe the library's unique cataloging systems, reference department, and rare book room.

The St. Louis Mercantile Library should not be penalized by the private foundation rules and applicable exercise taxes. These provisions were not intended to penalize organizations that clearly provide a public benefit such as this library does. Further, other libraries of a similar nature likewise should not be burdened with the additional legal and accounting expenses to insure that they continue to satisfy the publicly supported financial tests.●

SOLUTION IN NORTHERN IRELAND MUST INVOLVE AN IMPROVED ECONOMIC CONDITION FOR ALL CITIZENS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BIAGGI. Mr. Speaker, as chairman of the 121-member Ad Hoc Congressional Committee for Irish Affairs, I wish to discuss an idea of fundamental importance to Northern Ireland—the state of her economy.

According to official figures released last week and published in an article in the Irish Echo, unemployment in Northern Ireland has reached 17 percent—more than double the rate in this Nation and considerably higher than the 10.2-percent rate in Great Britain. All told there are some 100,000 persons without jobs in Ulster.

It is not suprising that the highest unemployment figure in the North is registered in the Catholic town of Strabane in the county of Tyrone. Coincidentally, the towns with the highest rates beside Strabane: Cookstown, Dungannon, Derry City, Limavady, and Newry; also have high concentrations of Catholics. Our committee has long been concerned about discriminatory policies in the North which aggravate the unemployment problem.

The ad hoc committee maintains the position that a peaceful political solution is the only answer in Northern Ireland. We recognize that there must be a massive infusion of economic recovery aid provided if there is to be a durable future peace in Northern Ireland. In 1977, former President Carter endorsed the concept of the United States providing aid to Northern Ireland in concert with other nations once peace was achieved. I suggest that this Nation might consider some forms of immediate indirect economic assistance to the north of Ireland. Projections are that the situation will get worse before it improves. We must not allow the situation to deteriorate any further.

I call to the attention of my colleagues the Irish Echo article which details the grim statistics on unemployment in the north of Ireland:

ALMOST 100,000 OUT OF WORK IN THE NORTH

BELFAST.—The Northern Ireland jobless figure has almost touched 100,000 according to official figures released last week. A total of 99,849 people are out of work, representing more than 17 percent of the insured working population.

The British Industry Minister, Adam Butler, said the figures would go higher, but said he was encouraged that they were not as high as had been forecast, and that the rate of increase was slowing down. He thought the situation might level out sometime this year.

The North's unemployment figure, at 17.3 percent is significantly higher than the overall United Kingdom rate of 10.2 percent. Male unemployment in the North stands at 21.2 percent, female unemployment at 12.1 percent.

As usual, the Co Tyrone town of Strabane is the blackest spot, with almost 35 percent unemployed. It is followed on the blacklist by two other Tyrone towns, Cookstown and Dungannon, and then by Derry City, Limavady and Newry.

Condemnation of the figures came from many sources. Mr. Terry Carlin, Northern Ireland officer of the Irish Congress of Trade Unions, said the total was very likely to reach 125,000 later this year. He said of Mr. Butler's comments: "I am utterly appalled at the way he is trying to deceive people by pretending that things are going to get better this year. I find it hard to contain my temper in the face of an outrageous statement like that."

Mr. Carlin said that there was a large element of under-recording in the figures, which meant the true figure was already over 100,000.

Alan Burnside, of the Northern Ireland section of the Confederation of British industry, said the total was another unhappy

demonstration of the seriousness of the recession. The Government should pay more attention to the need to restore competitiveness to industry, he said.

Mr. Hugh Logue, economics spokesman for the SDLP, said the figures were an affront to the right to every citizen in Northern Ireland to work. Politicians and others should be united to put pressure on the British Government "to either provide work for all or to leave Northern Ireland to others to govern," he said, adding: "Instead, we are forced to observe a nocturnal hillside pantomime designed to retain the British in their continuing misgovernment of Northern Ireland."

Further criticism came from the DUP East Belfast MP, Mr. Peter Robinson, the Alliance Party and Republican Clubs—the Workers Party.●

TRIBUTE TO VICTOR JOHN BARICH

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. ANDERSON. Mr. Speaker, on March 27, 1981, the judicial district of Downey, Calif., will assemble at the Long Beach Elks' Club to honor its retiring clerk and administrative officer for the past 18 years, Victor J. Barich.

Born in Chicago, Ill., on December 16, 1925, Victor was educated at Fenger High School before joining the U.S. Navy to serve in World War II. After his military service, he made his home in the harbor area of Los Angeles. There he married Helen Marie Fuhrman on May 29, 1948.

Victor's court clerking experience began with the civil and criminal departments of the Los Angeles judicial district, where he served from 1947 to 1963. During that time he bacame the court clerk in charge at the San Pedro branch. In 1963 he took on dual responsibilities as clerk and administrative officer of the Downey Municipal Court—responsiblities that he has carried up to this day. I must point out that although Victor was working full time for the people of California and raising a family, he also made the time to further his education at Compton College, California College of Commerce, Los Angeles Harbor College, the IBM Course in Computer Systems and Management, and San Jose State's court administration program.

Besides compiling an unblemished record of service in the judicial community, Victor has established an impressive record of participation in service organizations. His memberships include 30 years in the Knights of Columbus; 35 years in the Croation Fraternal Union of Pittsburgh, Pa.; the Monte Vista Activity Club, where he served as president in 1972 to 1973; the Los Angeles County Clerks' Association, where he was chairman from 1968 to 1969; the Data Processing Committee, and the Civil Service Committee, which he chaired for 11 years. Additionally, in 1967 he represented Los Angeles County at the National Conference for Traffic Court Administrators and Court Clerks which was held in Chicago by the American Bar Association.

Mr. Speaker, without the dedicated service of men like Victor Barich, our court system could not accomplish the monumental task of delivering justice to the thousands who come forth yearly seeking resolution of legal problems. My wife, Lee, joins me in saluting Victor for his years of service, and we wish his wife, Helen, and their children Vickie, Mike, Joe, Tom, Jim, and Mary the very best of everything in the years ahead.●

BLYTHE ARENA—UP FOR AUCTION

HON. GENE CHAPPIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. CHAPPIE. Mr. Speaker, today I am introducing legislation to provide for the sale of Blythe Arena, an ice skating arena located in Tahoe National Forest, Placer County, Calif. Congress authorized construction of this facility, which is located in my congressional district, on April 3, 1958, and now Congress must act in order for Blythe Arena to be sold at public auction. Blythe Arena was built for the 1960 eighth winter Olympic games held in Squaw Valley, Calif., and enjoyed its heydey during this time. During the arena's 20-year history, it has served the community well as a recreational facility and as an Olympic figure skating training center.

The Blythe Arena is situated on a small isolated parcel of national forest land surrounded by private land developed and operated by private interests for various outdoor recreational activities. Because of the land's location in Squaw Valley, it has lost its national forest identity, and could be more effectively managed by non-Federal interests.

The bill which I am introducing provides the Secretary of Agriculture with the authority to sell Blythe Arena which is located on 5.22 acres of public land. The money received from the sale of Blythe will be reserved for a national forest land acquisition in California.

At a time of great concern over Federal spending, I do not think we can condone the use of taxpayers' money to operate Blythe Arena. Therefore, I am hopeful that a local enterprise will recognize the value of Blythe and operate the arena for the continued use of the community.

The bill follows:

A bill to authorize the Secretary of Agriculture to sell the portion of the Tahoe National Forest known as Blythe Arena

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture may sell at public auction, for not less than fair market value, all right, title, and interest in the approximately 5.22 acres of land which is known as Blythe Arena and located in the Tahoe National Forest, and which is depicted on a map entitled "Blythe Arena Sale or Exchange Proposal", dated February 1981, on file in the office of the Chief, Forest Service, Department of Agriculture.

SEC. 2. There is authorized to be appropriated for the acquisition, by the Secretary of Agriculture, of lands in the State of California an amount equal to the amount of any proceeds received from the sale of Blythe Arena under the first section of this Act. Lands acquired with funds appropriated under the preceding sentence shall be permanently reserved, held, and administered as part of the National Forest System.●

MUNICIPAL CLERK'S WEEK

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. GONZALEZ. Mr. Speaker, today I am introducing a resolution which would authorize the President of the United States to proclaim the week of May 10 through May 16, 1981, as National Municipal Clerk's Week. The purpose of this resolution is to recognize and honor on a nationwide basis those who bear the title of municipal clerk. The International Institute of Municipal Clerks, representing thousands of our Nation's most established professional public servants, has endorsed such recognition and has set aside this special week in honor of this group.

As a matter of historical perspective, the municipal clerk goes back to pre-Biblical times. The ancient cities of Greece had their own city secretary whose primary duty was to read aloud official documents. The office of clerk can be traced back to the Middle Ages, where initially, a clerk was any member of a religious order. This was derived from the word "cleric" or "clergyman." Our early American colonists established the office of clerk and it quickly became a way of life.

Mr. Speaker, since the earliest days, municipal clerks have been at the heart of virtually all the official acts of local government, bringing together the local residents and their government. The result of this has been the orderly maintenance of public records without which responsive local government could not exist.

At this time I would like to encourage my colleagues to join in with me in recognizing this special week for those special individuals who efficiently

serve the principles of local government day after day.●

CONGRESSIONAL SALUTE TO THE PEOPLE OF BYELORUSSIA IN COMMEMORATION OF THE 63d ANNIVERSARY OF THE DECLARATION OF INDEPENDENCE OF THE BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. ROE. Mr. Speaker, today marks a historic and momentous day for all freedom loving people who are deeply committed to the ideals of self-determination and independence of thought and action.

It was 63 years ago today, on March 25, 1918, that the executive committee of the First Byelorussian National Congress proclaimed the Byelorussian Democratic Republic, initiating a period of guaranteed freedom of speech, assembly, and the equality of all citizens under the law.

But, unfortunately, that exercise in freedom for the Byelorussian Republic was short lived. Under the leadership of Lenin, the new imperialist Bolshevik government of Soviet Russia reconquered the independent state Byelorussia.

To camouflage this aggression the Moscow regime arranged the proclamation of its own colonial state, the Byelorussian Soviet Socialist Republic, on January 1, 1919, in the city of Smolensk.

The Byelorussian people were the victims of both Communist aggression and imperialism, and later Nazi occupation. But they remained steadfast in their opposition to subjugation. Scores of brave Byelorussian heroes gave their lives in the fierce battle to save their homeland from the brutal Russian Communist forces.

Since 1921, the Russian Communist Party has controlled the internal affairs of Byelorussia, but the cultural heritage of its people has remained one of the strongest and richest in all of Europe. In their hearts, the Byelorussian people have a continued desire for the independence from the yoke of Soviet aggression.

Many brave Byelorussian citizens are today being held in Soviet prison camps. For most their crimes are nothing more than expressions of basic human rights for their fellow citizens. One great Byelorussian hero, Michal Kubaka has been sentenced to 6 years in a Soviet psychiatric prison for writing an essay entitled "Human Rights and Détente Are Indivisible."

During the 63 years of Soviet oppression, over 6 million Byelorussian citizens have been murdered or deported to Siberian concentration camps.

Mr. Speaker, the proud people of Byelorussia are an inspiration to us all and we join them today in their hope that one day their dreams of freedom and independence will be realized.●

OIL SHALE LEASING ON THE PUBLIC LANDS

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SANTINI. Mr. Speaker, today I introduced legislation with several of my Interior Committee colleagues dealing with an issue which my Mines and Mining Subcommittee has worked on for several years, oil shale leasing on the public lands. This bill would remove several constraints currently inhibiting efforts under the prototype oil shale leasing program to gain the technical and environmental information needed for a permanent oil shale leasing program. In addition, this proposal would confirm the Department of Interior's authority to lease oil shale lands for multimineral development.

First, although this bill would retain the 5,120-acre limitation on lease oil shale tracts, it would add language allowing an increased lease tract size when the Secretary determines that a larger area is necessary to permit long-term commercial operations. This new provision would assure the issuance of lease tracts of sufficient size to enable economic development of oil shale resources. Without this provision future leasing of oil shale in Utah and Wyoming would probably not occur, leaving future oil shale development to focus on only Colorado.

Second, this bill would lift the current limitation of one oil shale lease per person, association, or corporation in areas of poor quality shale. I believe that the one lease limitation inhibits technological development, in that it promotes the use of conservative methods known to be profitable rather than experimental methods which should be encouraged by the prototype program. It also presents a serious disincentive to developers, in that it prevents them from further benefiting from the experience and technology they have developed. The bill further provides that one additional lease may be held in any State where the lessee has achieved commercial production on both leases within that State and where the resources on one of the existing leases in that State will be depleted within 10 years. Also, any leases issued in order to avoid bypassing small acreages of Federal oil shale resources which could not otherwise be mined economically would not be included in the limitations on oil shale lease ownership. I believe that these provisions allowing lessees to hold more than the one lease currently allowed will result in the generation of more of the technical and environmental information needed to develop a permanent oil shale leasing program.

Third, this bill would authorize the Secretary to issue, to any person, association, or corporation holding an oil shale lease issued prior to 1985—and thus issued within the prototype oil shale leasing program—an additional lease or leases for the use of other public lands for any use other than the removal of any mineral deposits contained therein, connected with the development of oil shale operations on leased lands. The oil shale lessee would have to demonstrate that the lease is necessary and appropriate for its operations. Uses could include, among other things, disposal of oil shale waste and other materials removed from lands covered by an oil shale lease, and the building of plants, reduction works, or other facilities needed for the operations under an oil shale lease. Allowing such additional leases for the holders of prototype oil shale leases would permit the most efficient mining of oil shale resources, especially in the richest areas, since mining tracts would no longer have to accommodate the processing facilities and spent shale as well as the development operation itself. During the 96th Congress, the House of Representatives passed a bill providing the authority. It did not pass the Senate however.

Fourth, this bill would confirm the authority of the Secretary to issue leases allowing the mining, extracting, and disposing of all mineral deposits contained in lands covered by an oil shale lease. This confirmation of existing authority would facilitiate multimineral development of resources on leased lands. Such resources would include dawsonite and nahcolite.

Fifth, this bill would amend section 27(e) of the act to address fractional or indirect interests in oil shale lease in light of the new ceiling on lease holdings mentioned above. Currently, no person, association, or corporation may hold any interest in an association or corporation holding an oil shale lease, if that interest, taken together with other direct or indirect holdings greater than 10 percent, would exceed in the aggregate the maximum number of acres of the mineral in question allowed to any one lessee. Since the absolute limitation on the number of acres that can be held by a particular lessee has been changed to a restriction expressed in terms of numbers of leases, the provision charging shareholders with a pro rata share of a leased interest needs to be amended to reflect that change. Thus, this bill amends section 27(e) to provide that any fractional or indirect

interest in an oil shale lease will be counted against the leasehold ceiling—rather than a lease acreage ceiling—so that the sum of the fractional holdings of one person association, or corporation does not exceed the new leasehold ceilings.

I believe that enactment of these amendments to the Mineral Leasing Act will better enable the Department to gain the technical and environmental information needed to proceed with the permanent oil shale leasing program. This proposal would not only strengthen the existing prototype oil shale leasing program but is a necessary condition precedent to any future permanent leasing program as well.●

THE TRAGEDY OF ELDER ABUSE SUBJECT OF HOUSE SELECT COMMITTEE ON AGING HEARING/NATIONAL CONFERENCE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BIAGGI. Mr. Speaker, yesterday I along with my colleague from the House Select Committee on Aging— Mr. FRANK—conducted a hearing at Harvard University on the tragedy of elder abuse.

This hearing was conducted in conjunction with a first time National Conference on Abuse of Older Persons. This was another in a series of activities involving our committee as we seek to come to grips with this national scandal.

The leadoff witness at yesterday's hearing was James A. Bergman, regional director of Legal Research and Services for the Elderly, Inc., of Boston, the organization which convened the conference.

I would like to insert an excerpted version of Mr. Bergman's testimony as well as my own opening statement in the RECORD for the consideration of my colleagues.

I ask my colleagues to pay close attention to the end of Mr. Bergman's statement when he urges that no cuts be made in existing social service or legal service programs because of their adverse impact on the elderly. This is significant when we consider that the Reagan budget is proposing the elimination of the Legal Services Corporation. This deserves very close scrutiny.

The statements follow immediately.

TESTIMONY OF JAMES A. BERGMAN

Mr. Chairman, my name is James A. Bergman. I am the Regional Director of Legal Research and Services for the Elderly, Inc. in Boston, Massachusetts.

As the convenor of the First National Conference on Abuse of Older Persons, I extend my appreciation to you and the House Select Committee on Aging for conducting this hearing as a part of the conference. This Committee has taken a leading role in informing the public about the very serious problem of elder abuse. The three previous Congressional hearings on elder abuse have all been held by this Committee. With today's hearing and the one in San Francisco on April 3rd, which will be a part of the National Conference on Abuse of Older Persons which we are holding in that city, this Committee will again bring the issue of elder abuse to the attention of the citizens of this nation. For this continuing attention to the problem, we all are indebted to you.

In 1979 the problem of elder abuse was identified as an issue and a national tragedy. Until 1979, elder abuse was a hidden problem. With publication of four studies, including one conducted in Massachusetts by Legal Research and Services for the elderly, problem was brought to the attention of the public. The House Select Committee on Aging briefing on June 23, 1979 conducted by Congressman Robert Drinan in Boston created a national awareness of the problem. The June 11, 1980 hearing of the House Select Committee on Aging in Washington, D.C. demonstrated to the nation that elder abuse was in fact a national tragedy that could not be ignored.

This week and next at the National Conferences on Abuse of Older Persons in Cambridge, Massachusetts and in San Francisco, over 300 authorities on elder abuse, spouse abuse, and child abuse in the home and in institutions will be exploring where we are today and where we should proceed in the future in treating this national tragedy. Hopefully these conferences will provide guidance for local, state and national action so that we do not repeat the mistakes of the past and re-invent the wheel or the flat tire. We would err greatly if we ignored the experiences of those who have addressed the problems of child and spouse abuse. We would be even more foolish if we proceeded haphazardly to create programs to treat and prevent elder abuse without reflecting on what is the current state of our knowledge of the problem and the remedies already available. This conference and this hearing should provide an opportunity to learn, to reflect and to recommend a pathway for future action.

As of today, four significant studies of elder abuse have been produced, and they constitute the major empirical studies that have been done thus far. Thus, in one sense, the research which has been conducted on elder abuse is veneer thin.

On the other hand, research is often a few steps behind the experiences of persons working directly and daily with the problem. This is definitely the experience in the case of elder abuse. Nurses, doctors, social workers, psychiatrists, lawyers, police, clergy, community workers, families, friends, and neighbors daily are encountering cases of elder abuse in homes and in nursing homes, hospitals and mental hospitals.

In the approximately fifteen (15) states which currently have adult or elder abuse reporting laws, hundreds and thousands of reports of alleged cases of elder abuse, neglect, financial exploitation and abandonment are reported each year. The vast majority of these reports are confirmed when they are investigated. In Connecticut, which has a mandatory reporting law, over a thousand cases of elder abuse, neglect, exploitation or abandonment are reported each year. In South Carolina, which has a mandatory reporting law for all adult victims, the state agency projects that over 2,000 cases will be reported this year.

Our agency in the past year has received over 200 calls from legal, social and health service agency staff members and from family members or neighbors of victims and from victims themselves asking for advice on what to do about apparent cases of elder abuse, neglect or financial exploitation. These calls are all made voluntarily, without a mandatory reporting law and without much publicity about our program.

Our experience over the past three years has involved handling hundreds of cases of elder abuse, conducting research on this problem, training hundreds of persons in how to handle such cases, and drafting and lobbying for mandatory reporting legislation. This experience has led to conclude that there are four basic types of elder abuse victims, as follows:

1. The competent/consenting person, i.e., the person who is mentally competent and consents to receiving help with the problem;
2. The competent/non-consenting person, i.e., the person who is mentally competent, but either will not admit that there is a problem or will admit it, but in either case will not accept any help with the problem;
3. The incompetent person, i.e., the person who is not mentally competent and as a result is unable to understand the nature or consequences of the harm being done to them and therefore does not seek help; and
4. The emergency case, i.e., the case in which the person is in imminent danger of death or serious physical, mental or financial harm.

Of these four client types, the competent/non-consenting and incompetent clients make up the vast majority of the cases reported to us. Thus, the most common cases involve the following characteristics:

1. The victim rarely reports the problem;
2. Access to the alleged victim is difficult or impossible to gain initially;
3. When and if access is gained, the alleged victim will not admit that there is a problem and/or will not accept offers of assistance;
4. The victim is living with the abuser, who is a family member or caretaker;
5. The victim believes that little or nothing can be done to help;
6. The victim fears that nursing home placement is the only alternative and is opposed to that alternative;
7. Flexible services which meet the actual needs of the victim are rarely available;
8. Some victims are in need of guardians, and frequently no one is available to serve in that capacity;
9. The abuser frequently has a drinking problem which is a direct cause of the abuse;
10. The abuser needs counseling on how to deal with her feelings about and actions toward the victim; and
11. The abuse has been occurring for an extended period of time.

These characteristics are illustrated by a case I was called about just last week. A woman in her 70's lives alone and is bedridden much of the time. She can get around her house with the aid of a walker, but only with great difficulty. She has a homemaker seven (7) days a week to help with cooking, housekeeping and grocery shopping. The visiting nurse agency now refuses to see her because she will not follow the medical plan they have prescribed for her, and because they fear the woman's daughter. The woman's son has been appointed conservator to handle her financial affairs due to her advanced age and physical incapacity. The woman's daughter visits her two or

three times a week, and this virtually always results in verbal abuse and fequently in physical abuse. She has beaten her mother repeatedly. At least on one occassion she pushed her mother into the bathtub and then threw scalding hot water on her. This abuse has gone on for a number of years. The son and other family members know of the daughter's actions, but maintain that there is nothing they can do about her. They all fear her reactions, and they all agree she needs psychiatric help. She hysterically refuses to discuss that alternative. The elderly victim of this abuse will not go to the hospital to receive needed treatment because the daughter tells her that the doctors just want to put her in a nursing home. The woman refuses to consider placement in a nursing home. And, the woman will not agree to seek a restraining order against the daughter to keep her out of her home, nor will she file criminal assault charges against her. Thus, she admits that she is being abused, but she refuses to consent to take any action to prevent further harm. Because she is mentally competent, she has the legal right to adopt this course of action. Until she moves from being a competent/nonconsenting person to being a competent/consenting person, little can be done to help her.

Thus, our actual experience in the past three years has convinced us that the problem of elder abuse is indeed a major problem and one which we can no longer ignore. As I stated in my testimony before this Committee in June, 1980 in Washington, D.C., we have encountered cases of severe beatings, sexual abuse, major financial exploitation and some deaths of older persons. There is no question in my mind that elder abuse is a national tragedy and that we are far from dealing adequately with it.

As I stated earlier, four major studies on elder abuse have been conducted, as follows:

1. "Elder Abuse in Massachusetts: A Survey of Professionals and Paraprofessionals" by Legal Research and Services for the Elderly, Boston;

2. "The Battered Elder Syndrome" by Block and Sinnott;

3. "A Study of Maltreatment of the Elderly and Other Vulnerable Adults" by Douglass and Hickey; and

4. "Abuse of the Elderly by Informal Care Providers: Practice and Research Issues" by Lau and Kosberg.

Margaret O'Rourke of Legal Research and Services for the Elderly has prepared an analysis of these four studies. The following is her statement of the conclusions which can be drawn from those studies:

The research which has been done thus far and the thousands of cases which are already uncovered each year clearly point out the need for federal, state and local action.

On the federal level, four actions are required, now.

1. Federal legislation is needed which provides financial incentives to the states to pass mandatory elder abuse reporting and handling legislation;

2. Research funds are vital to enable medical, mental health, legal and social science researchers to conduct much more analysis of the nature and scope of the elder abuse problem;

3. Model project funds are vitally needed to develop more elder abuse response techniques; and

4. Current health, social, mental health and legal services must not be cut back or eliminated for the very vulnerable victims of elder abuse, neglect and exploitation.

This is no time to go back to reliance on private charity to help the needy; it didn't work in the 1800's; it didn't work in the early 1900's; and it definitely won't work when double digit inflation turns middle income persons into low income persons.

Statement by Hon. Mario Biaggi

Elder Abuse

I am especially privileged to convene this hearing this morning. The House Select Committee on Aging feels honored to have been asked to conduct this hearing in conjunction with the First National Conference on Abuse of Older Persons. In addition to being chairman of today's hearing, I serve as an original member of the House Select Committee and chairman of its Subcommittee on Human Services. I extend a warm greeting from our illustrious full committee chairman, Senator Claude Pepper.

I also wish to pay a special tribute to a new colleague in Congress, but by no means a new friend of the elderly, Barney Frank. In the few short months that Barney has served in the House, he has made a distinctly favorable impression upon his colleagues on the House Select Committee on Aging and we know he will have much to contribute.

It was almost one year ago that I conducted a hearing in my home city of New York on the topic of elder abuse—or "granny bashing" as some newspapers call it. At that time, I referred to that problem as, "a burgeoning national scandal". We reconvene another hearing today and find the same situation is still as grave as before but we have improved considerably in our abilities to both diagnose and understand the problem.

In the coming weeks, the House Select Committee on Aging will release a major report on elderly abuse. It will represent the culmination of a three-year-long committee investigation which includes my hearing and one held in this great city in June of 1979. It will be a precedent-setting document which will impact greatly on future policy directions which Congress will take to cope with the problem of elder abuse.

Numerous surveys were conducted as part of this report and I would like to present one which especially caught my attention. It was a survey of 22 police chiefs from major metropolitan areas representing some 27 million people. Their responses revealed the following:

64% said their officers had encountered situations where family members had physically abused or grossly neglected their elder relatives;

Nearly 1/3 of the police chiefs indicated that this type of abuse occurs frequently within their jurisdictions;

Another 50% of the police chiefs said they had encountered situations where family members have financially abused their loved ones.

The special interest I have in this survey stems in part from an earlier vocation I enjoyed—that as a police officer for 23 years in the city of New York. While serving in this capacity, I saw firsthand the problems of domestic violence. The significance of this survey is that it proves clearly that elder abuse is on the rise in America. One should note that this survey represents reported cases of elder abuse. Many thousands of older people fail to report acts of violence perpetrated against them by family members because of love—or fear or reprisal. I recall testimony presented at my New York hearing by a police officer who told the grotesque tale of a 78 year old woman who was beaten and robbed by her 36 year old grandson. These actions took place over a two year period and resulted in the woman being hospitalized on seven occasions. She refused to have her grandson arrested and had it not been for witnesses who saw the beatings, she might never have reported the case. Fortunately for the woman and society, her grandson was arrested, convicted and sentenced for a three to seven year period.

Elder abuse is basically broken down into four primary categories:

Physical—including beatings.

Psychological—verbal abuse and threats.

Material—theft of property or money.

Violation of rights—coerced entry into nursing homes.

Reasons for why acts of elder abuse are committed vary. At our hearings we learned that a primary contribution was economic stress placed on families. The cost of caring for an older relative, especially the cost of medical care not covered by medicare or medicaid has skyrocketed. These extra costs place a burden on the family budget which creates tension in the home which can be translated into violence against the elderly family member.

A survey conducted by the sponsoring agency of this conference, the Boston Legal Research and Services for the Elderly, indicated that the typical victim of domestic violence was a frail, 75 year old woman. Furthermore, 84% of the abusers were relatives and 75% of the victims lived with their abusers.

The Federal response to this national scandal has at best been inadequate. Congress, in 1980, came very close to enacting legislation which would have provided funds for shelters to aid victims of elder abuse. One of the very first bills I sponsored in the new Congress was H.R. 1007—a virtually identical bill, providing aid to victims of elder abuse. In addition, I call for the following legislative actions to be taken by this Congress:

Passage of H.R. 769, legislation to provide for programs of identification, prevention and treatment of elder abuse, neglect and exploitation. The bill would also establish a National Center on Adult Abuse. It would encourage States to enact mandatory reporting laws on elder abuse, something which only 14 States have.

Passage of legislation to provide a meaningful tax credit for families who care for an older relative for those costs, expecially medical which are not covered by another Federal program.

Passage of legislation to expand home health and respite care coverage under medicare.

Finally, I would like to urge that the upcoming White House Conference on Aging address this issue and offer definitive recommendations for prevention.

We look forward to hearing the expert testimony provided by the conference participants and especially look forward to receiving your recommendations. At the time of last year's hearing, I considered this to be a pioneer type of effort. This type of environment is not new to me. In 1969, when I first began my term in Congress, I authored the First Child Abuse Prevention and Treatment Act—pioneer legislative initiative which became law five years later and today remains a vital Federal program. Now, twelve years later, I find myself as the author of the First Domestic Violence Prevention and Treatment Act of the 97th Con-

gress. I can only hope for similar results. We can no longer consider the issue of domestic violence against the elderly to be a private matter. It is a public policy issue of great concern and we should pledge our most determined efforts to end the scourge of domestic violence against the elderly.●

MILITARY RETIREMENT PAY

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. GONZALEZ. Mr. Speaker, I am reintroducing a bill today to help those older military retirees disadvantaged by the current retirement pay system.

Prior to 1958, military retirement pay was based directly on the active duty pay scale; 50 percent of active duty pay for those who had served 20 years, 75 percent for those who had served 30 years. Then Congress changed the law, instituting a system of cost-of-living increases. Unfortunately, this has resulted in serious inequalities in retirement pay between those who retired when different pay scales were in effect.

Particularly hard hit have been those who retired before 1965. These men and women had joined and served in our Armed Forces, in many cases risking their lives, in the expectation of a comfortable retirement. Instead, today, because of continued inflation, many of them can only barely afford the minimal comforts of life.

My bill would help them. It calls for a one-time recomputation to basic rates of pay in effect when the bill becomes law, for those 65 years of age or older, and disability retirees with a rating of 30 percent or more.

The retirees in this category do not seek a windfall or a handout, only what they expected when they began the service of their country. From 1858 to 1958, retirement pay based on active-duty pay was a principal attraction of military service. It is hard to imagine the shock they felt by those who had served 15 or 20 years when Congress changed the retirement system—a system which they had been promised and on which they had counted.

Again this session Congress is being asked to raise defense spending. But we should not forget those who have already served in the defense of our Nation. I hope that we can pass legislation in this Congress that would give these older and disabled retirees the income they need and deserve in return for the many years of dedicated service which they have provided our country.●

BATTLING INFLATION ON THE HOME FRONT

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. GUNDERSON. Mr. Speaker, approximately 1 month ago President Reagan unveiled his economic recovery program to us. Since then, the CONGRESSIONAL RECORD has been filled with bipartisan endorsements of his basic proposals, usually cloaked in terms of all Americans "sharing" in the sacrifices that will have to be made.

Despite these endorsements and despite the promises of sharing budget cuts, the House Administration Committee today has the audacity to actually propose a 7.3-percent increase in 1981 authorizations over 1980 expenditures for our House committees.

It is widely recognized that the uncontrolled growth of spending by the Federal Government has resulted in the inflation which has been the demise of the American economy. And there has been no bigger offender than the committee expenses of the House of Representatives when it comes to Federal spending.

A comparison of fiscal year 1971 Federal Government outlays and estimated fiscal year 1981 outlays demonstrates a 210-percent increase in total Federal spending during the decade. Yet, during the same period of time expenditures for House investigatory and statutory committees have increased by a whopping 450 percent—over twice as fast as total Federal Government spending.

The current committee proposal for a 7.3-percent increase for 1981 will only add fuel to the raging fire of inflation at a time when we are looking to extinguish that fire.

There simply is no more logical place to begin our war against increased Government spending and inflation than with our own committee expenses. If we cannot tighten our own belt, how can we expect other Americans to make sacrifices? Clearly, at least a 10-percent reduction in total committee expenditures over 1980 levels is in order.

Please note that I have said a 10-percent reduction in committee expenditures, not authorizations. There has been a lot of talk about making 1981 authorizations 10 percent less than 1980 authorizations and billing that reduction as a 10-percent cut in committee expenses. That is a misrepresentation.

A 10-percent reduction in 1981 authorizations over 1980 authorizations will most likely lead to only a 1.8-percent reduction in total committee expenditures.

Mr. Speaker, it is time for the Members of the House of Representatives to pay more than lipservice to an economic recovery program for our country. If we are to commit ourselves to an all-out war against excess Government spending and inflation, let the first battleground be the committee expenses of the U.S. Congress.

I strongly endorse at least a 10-percent reduction in total committee expenditures over 1980 levels.●

GAO LETTER ON FOSSIL DEMONSTRATION PROJECTS

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. FUQUA. Mr. Speaker, I am placing in the CONGRESSIONAL RECORD a timely letter of March 24 from the Acting Comptroller General of the United States, Milton J. Socolar, on the possible shifting of Department of Energy fossil demonstration plant projects to the Synthetic Fuels Corporation. This letter was requested by the ranking minority member of the Science and Technology Committee, the Honorable LARRY WINN, the ranking minority member of the Subcommittee on Energy Development and Applications, the Honorable HAMILTON FISH, and me.

The legal opinions of the Comptroller General concludes that legal impediments do exist to shifting the fossil energy demonstration projects from the Department of Energy to the U.S. Synthetics Fuels Corporation, which would require enactment of legislation. The letter follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., March 24, 1981.

Hon. DON FUQUA,
Chairman, Committee on Science and Technology, House of Representatives.

DEAR MR. CHAIRMAN: By letter dated March 4, 1981, you and Congressmen Larry Winn and Hamilton Fish submitted a joint request for our legal opinion concerning the possible shifting of Department of Energy (Energy) synthetic fuels commercial demonstration projects to the Synthetic Fuels Corporation (Corporation), presumably after the President determines that the Corporation is established and fully operational. Specifically, you inquired whether there are legal impediments to the Corporation assuming the Government's obligations under the demonstration contracts to which Energy is now a party, the citations to the specific provisions of law constituting impediments, if any, and the reasons why they may be impediments. In addition, you make specific reference to five projects, namely, the SRC-I, SRC-II, Memphis Gas, Conoco High-btu gas and ICGG High-btu gas projects.

As you know, Energy may provide financial assistance for synthetic fuels commercial demonstration projects under two separate authorities: (1) the Federal Nonnuclear

Energy Research and Development Act of 1974 (Nonnuclear Act), as amended, 42 U.S.C. § 5901 et seq. (1976 and Supp. III); and (2) the Defense Production Act Amendments of 1980, Pub. L. No. 96-294, Title I, Part A, approved June 30, 1980, 94 Stat. 617, by delegation from the President in Executive Order No. 12242, 45 Fed. Reg. 65175 (October 2, 1980). In addition, these types of projects have been funded both from appropriations from the Energy Security Reserve established by the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1980, Pub. L. No. 96-126, approved November 27, 1979, 93 Stat. 954, 970, and from regular appropriations to Energy from the General Fund of the Treasury. Because of these factors, we have classified the synthetic fuels demonstration projects into three separate categories, which we treat separately, because the potential legal impediments affecting the transfer of projects to the Corporation differ for the three arrangements. The categories are:

(1) Projects receiving financial assistance from Energy pursuant to the Nonnuclear Act out of appropriations from the General Fund of the Treasury;

(2) Projects receiving financial assistance from Energy pursuant to the Defense Production Act Amendments of 1980 out of appropriations from the Energy Security Reserve; and

(3) Projects receiving financial assistance from Energy pursuant to the Nonnuclear Act out of appropriations from the Energy Security Reserve.

It is our understanding that all of the five projects referred to in your letter are in category (1).

In view of the time constraints we have not been able to obtain the views of Energy or other elements of the Administration on the questions posed. Nevertheless, subject to that caveat, we have arrived at the following conclusions:

(1) Legal impediments exist to shifting projects in category (1) from Energy to the Corporation, which require enactment of legislation;

(2) Adequate legal provisions have already been made in contemplation of an orderly transition to the Corporation of projects in category (2); and

(3) The major transition issues have been addressed and guidelines statutorily established for projects in category (3).

DISCUSSION

We believe that it is necessary both that Energy have authority to transfer its responsibilities and that the Corporation have authority to assume the transferred responsibilities associated with the synthetic fuels demonstration projects before a transfer can be legally made. Accordingly, we address the authority of Energy as well as that of the Corporation. In addition, throughout the discussion we quote the more significant provisions of law, as requested, in order to be as specific as practicable to facilitate the development of legislation by the Congress, if desired.

AUTHORITY OF ENERGY TO TRANSFER PROJECT RESPONSIBILITIES

The Department of Energy is authorized to use various forms of Federal assistance and participation "to establish and vigorously conduct a comprehensive, national program of basic and applied research and development, including but not limited to demonstrations of practical applications, of all potentially beneficial energy sources and utilization technologies * * *." Subsection 3(b)(1) of the Nonnuclear Act, 42 U.S.C. § 5902(b)(1).* Of course, these energy sources and utilization technologies include those associated with synthetic fuels.

The authorized forms of Federal assistance and participation include, but are not limited to, joint Federal-industry corporations; contractual arrangements with non-Federal participants; contracts for the construction and operation of Federally owned facilities; Federal purchases or guaranteed price of the products of demonstration plants; Federal loans to non-Federal entities; incentives to individual inventors; and Federal loan guarantees and commitments for alternative fuel demonstration facilities. Subsection 7(a) of the Nonnuclear Act, as amended, 42 U.S.C. § 5906 (1976 and Supp. III).

The forms of Federal assistance for synthetic fuels projects authorized by subsection 305(b)(1)(A) of the Defense Production Act of 1950 (Defense Production Act), as added by the Defense Production Act Amendments of 1980, 94 Stat. 619, classified to 50 U.S.C. App. § 2095(b)(1)(A), include contracts for purchases of, or commitments to purchase, synthetic fuel for Government use for defense needs; loan guarantees; and loans.

In pursuing its objectives, Energy must coordinate nonnuclear programs with the heads of relevant Federal agencies in order to minimize unnecessary duplication of programs, projects, and research facilities. 42 U.S.C. § 5903a. Aside from coordination, however, the Congress directed that:

"In the exercise of his responsibilities * * * [*the Secretary of Energy*] *shall utilize, with their consent,* to the fullest extent he determines advisable the technical and management capabilities of *other executive agencies* having facilities, personnel, or other resources which can assist or advantageously be expanded to assist in carrying out such responsibilities. The [Secretary] shall consult with the head of each agency with respect to such facilities, personnel, or other resources, *and may assign, with their consent, specific programs or projects in energy research and development as appropriate.* In making such assignments under this subsection, the head of each such agency shall insure that—

"(1) such assignments shall be in addition to and not detract from the basic mission responsibilities of the agency, and

"(2) such assignments shall be carried out under such guidance as the [Secretary] deems appropriate." (Emphasis added.)

Subsection 104(i) of the Energy Reorganization Act of 1974, as amended, 42 U.S.C. § 5814(i).

In addition, recent relevant Energy appropriation acts have included the following general provision:

"From this appropriation, transfers of sums may be made to *other agencies of the government* for the performance of work for which this appropriation is made." (Emphasis added.)

Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1980, Pub. L. No. 96-126, approved November 27, 1979, 93 Stat. 954, 973; Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1981, Pub. L. No. 96-514, approved December 12, 1980, 94 Stat. 2957, 2976.

Therefore, in general, the Secretary of Energy does have authority to assign to other executive agencies, with their consent, specific programs or projects in energy research and development as appropriate. This could also include transfer of related Energy funds.

We have limited this conclusion to "in general," because we are aware of at least one exception. The exception is Energy's authority to provide Federal loan guarantees and commitments for alternative fuel (including synthetic fuels) demonstration facilities under section 19 of the Nonnuclear Act, since subsection (q) thereof provides:

"No part of the program authorized by this section shall be transferred to any other agency or authority, except pursuant to Act of Congress enacted after [February 25, 1978]." 42 U.S.C. § 5919(q) (Supp. III).

As a minimum, none of the five projects listed in the first paragraph of your letter should be affected by the exception in section 19 of the Nonnuclear Act. Although we have not had an opportunity to review the funding arrangements in detail, it is our understanding that none of the five projects received Federal loan guarantees. Rather, each is in the nature of a joint venture, funded in part by Energy and in part by private industry through cooperative agreements.

AUTHORITY OF CORPORATION TO ASSUME TRANSFERRED PROJECT RESPONSIBILITIES

Even though Energy can, in general, assign programs or projects to "other executive agencies," the other agency must have authority to assume the project obligations assigned and to undertake their implementation.

We therefore now turn particularly to the provisions of the United States Synthetic Fuels Corporation Act of 1980 (Synthetic Fuels Corporation Act)**, which is Part B of Title I of the Energy Security Act, Pub. L. No. 96-294, approved June 30, 1980, 94 Stat. 633, classified to 42 U.S.C. § 8702 et seq.

We have identified several provisions of the Synthetic Fuels Corporation Act which could impede the transfer of Energy synthetic fuels commercial demonstration projects to the Corporation, in the absence of other legislation authorizing the transfers. This is particularly true if an objective is continued Federal assistance to and participation in such projects comparable to the extent and manner which now exists.

The first concern is the status and relationship of the Corporation to the Federal Government, since Energy's authority to assign specific programs or projects is limited to "other executive agencies" and Energy's authority to transfer appropriated funds is limited to "other agencies of the government." We doubt that the Corporation can satisfy either category for the purposes here.

Congress identified the Corporation in its "Findings and Purpose" provision in subsection 100(b)(2)(C) of the Energy Security Act, supra, 94 Stat. 617, classified to 42 U.S.C. § 8701(b)(2)(C), as "a Federal entity of limited duration formed to provide financial assistance to undertake synthetic fuel projects." The seven members of the Board of Directors of the Corporation are appointed by the President by and with the advice and consent of the Senate. Subsection 116(a)(2) of the Synthetic Fuels Corporation Act, supra, 94 Stat. 636, classified to 42 U.S.C. § 8712(a)(2). The primary source of

*Citations are to the 1976 edition of the United States Code unless otherwise indicated.

**Any references to "the Act" in this portion of the discussion only are to the Synthetic Fuels Corporation Act.

Corporation funds is the issuance of notes or other obligations of the Corporation "solely to the United States of America acting by and through the Secretary of the Treasury" in an authorized aggregate principal amount of $20 billion plus potential future additional authorizations not to exceed $68 billion. Subsections 151(a)(1) and 126(c)(11) of the Act, supra, 94 Stat. 667 and 649, classified to 42 U.S.C. §§ 8751(a)(1) and 8722(c)(11). And "[a]ll contracts and instruments of the Corporation to provide, or providing, for financial assistance shall be general obligations of the United States backed by its full faith and credit." Subsection 131(c) of the Act, supra, 94 Stat. 655, classified to 42 U.S.C. § 8731(c).

Nevertheless, in general, the "Directors, officers, and employees of the Corporation shall not be subject to any law of the United States relating to governmental employment." Subsection 117(c) of the Act, supra, 94 Stat. 638, classified to 42 U.S.C. § 8713(c). In addition, subsection 175(g) of the Act, supra, 94 Stat. 677, classified to 42 U.S.C. § 8775(g), provides that:

"Except to the extent expressly provided herein, the Corporation shall not be deemed to be an agency of the United States or an instrumentality of the United States."

Furthermore, subsection 175(a) of the Act, supra, 94 Stat. 676, classified to 42 U.S.C. § 8775(a), provides that:

"No Federal law shall apply to the Corporation as if it were an agency or instrumentality of the United States, except as expressly provided in [the Synthetic Fuels Corporation Act]."

In neither case is there express provision authorizing treatment of the Corporation as an "executive agency" for the purposes of transferring authority over Federally assisted projects to it or as an "agency of the government" for the purpose of transferring related appropriated funds to it.

Moreover, there are provisions which may preclude, or at least discourage, such transfer or reassignment of responsibilities. Subsection 119(b) of the Act, supra, 94 Stat. 639-640, classified to 42 U.S.C. § 8715(b), provides:

"(1) Notwithstanding any other provision of law, the President and any other officer or employee of the United States shall not make any delegation to the Chairman, the Board of Directors, or the Corporation of any power, function, or authority not expressly authorized by the provisions of this part, except where such delegation is pursuant to an authority in law which expressly makes reference to this section.

"(2) Notwithstanding any other provision of law, the Reorganization Act of 1977 (5 U.S.C. 901 et seq.) shall not apply to authorize the transfer to the Corporation of any power, function, or authority."

Thus the Synthetic Fuels Corporation Act prohibits transfers of power, functions or authority to the Corporation by means of either delegation or use of a reorganization plan.

In light of these provisions, we believe the status and relationship of the Corporation to the Federal Government require that the transfer of Energy synthetic fuels commercial demonstration projects to the Corporation be accomplished by legislation.

Secondly, under existing law, no transfers may be made to the Corporation without its consent. The authority of the Secretary of Energy to assign specific programs or projects even to "other executive agencies" is only "with their consent." 42 U.S.C. §5814(i). In addition, under section 168 of the Synthetic Fuels Corporation Act, supra, 94 Stat. 672-673, classified to 42 U.S.C. §8768, the Corporation "shall be liable for contract claims only if such claims are based upon a written contract to which the Corporation is an executing party."

The objectives of Energy, particularly under the Nonnuclear Act, may not coincide with those of the Corporation. Section 125 of the Synthetic Fuels Corporation Act, supra, 94 Stat. 644, classified to 42 U.S.C. §8721, establishes "a national goal of achieving a synthetic fuel production capability equivalent to at least 500,000 barrels per day of crude oil by 1987 and of at least 2,000,000 barrels per day of crude oil by 1992, from domestic resources." In addition, subsection 131(b)(2) of the Act, supra, 94 Stat. 655, classified to 42 U.S.C. §8731, provides in part:

"The proposal selected for financial assistance pursuant to *any solicitation* shall be that proposal which, in the judgment of the Board of Directors, is most advantageous in meeting the national synthetic fuel production goal established under section 125." (Emphasis added.)

"Consequently, it may not be safely assumed that the Corporation would willingly assume responsibility for all synthetic fuels commercial demonstration projects heretofore financially assisted by Energy if they are not viewed as "most advantageous in meeting the national synthetic fuel production goal."

Thirdly, "the Corporation shall not provide any financial assistance except as specifically permitted * * *." Subsection 171(a)(2) of the Synthetic Fuels Corporation Act, supra, 94 Stat. 673, classified to 42 U.S.C. §8771(a)(2). Subsection 131(b)(2) of that Act, supra, 94 Stat. 655, classified to 42 U.S.C. §8731(b)(2), requires that the Board of Directors give preference in the selection for financial assistance to:

"(A) the proposal which represents the least commitment of financial assistance by the Corporation and the lowest unit production cost within a given technological process, taking into account the amount and value of the anticipated synthetic fuels products; and

"(B) in determining the relative commitment of the Corporation, in decreasing order of priority—

"(i) price guarantees, purchase agreements, or loan guarantees;

"(ii) loans; and

"(iii) joint-ventures."

In addition, subsection 131(p) of the Act, supra, 94 Stat. 657, classified to 42 U.S.C. § 8731(p), provides:

"The Corporation shall not award financial assistance in the form of loans * * * or joint ventures * * * unless the Board of Directors determines that neither price guarantees, purchase agreements, nor loan guarantees will adequately support the construction and operation of the synthetic fuel project or will restrict the available participants for such project."

The Nonnuclear Act does not provide such financial assistance priorities. For example, it is our understanding that each of the five projects referred to above and in your letter is in the nature of a joint venture, the form of financial assistance given the lowest priority under the Corporation's governing law. These statutory priorities in the awarding of financial assistance may prevent the Corporation from continued funding of any of these projects should they be transferred to the Corporation.

Moreover, even if the Corporation should overcome the statutory hurdles of the funding priorities and decide to provide financial assistance for a project through the form of a joint venture, the projects transferred may not be able to satisfy the particular statutory requirements under which the Corporation may provide financial assistance through a joint venture. For example, subsection 136(a) of the Synthetic Fuels Corporation Act, supra, 94 Stat. 662, classified to 42 U.S.C. § 8736(a), provides, in part, that:

"* * * the Corporation shall not finance more than 60 per centum of the total costs of the synthetic fuel project module, as estimated by the Corporation as of the date of execution of the joint venture agreement."

It is our understanding that the Department of Energy is funding far more than 60 percent of the total costs for one or more of the five projects referred to in your letter.

Lastly, there may be other provisions of the Synthetic Fuels Corporation Act which conflict with particular clauses in the individual agreements associated with projects desired to be transferred from the authority of Energy to the Corporation. We have not examined these individual agreements. One example where further attention may be directed is in the area of patent provisions. In light of the discussion above, however, it may well be that these transfers may necessitate a fairly comprehensive renegotiation of existing project agreements.

IMPACT ON DIFFERENT CATEGORIES OF PROJECTS

The situation discussed above applies most appropriately to projects we have classified as category (1), that is, projects receiving financial assistance from Energy pursuant to the Nonnuclear Act out of appropriations from the General Fund of the Treasury. It is our understanding that all of the five projects mentioned in your letter are in category (1). We believe the legal impediments described require the enactment of legislation before category (1) projects may be shifted from Energy to the Corporation.

Projects funded by Energy through the Energy Security Reserve are in a different status, because of the enactment of other statutory provisions addressing their transfer to the Corporation. This includes both category (2) projects, which receive financial assistance from Energy pursuant to the Defense Production Act Amendments of 1980 out of appropriations from the Energy Security Reserve, and category (3) projects, which receive financial assistance from Energy pursuant to the Nonnuclear Act out of appropriations from the Energy Security Reserve.

An understanding of the use of appropriations to Energy from the Energy Security Reserve for the funding of projects and related restrictions and activities requires an integration of provisions in the following statutes under the heading "Department of Energy, Alternative Fuels Production":

The Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1980, Pub. L. No. 96-126, approved November 27, 1979, 93 Stat. 954, 970-971;

The Supplemental Appropriations and Rescission Act, 1980, Pub. L. No. 96-304, approved July 8, 1980, 94 Stat. 857, 880-881; and

The Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1981, Pub. L. No. 96-514, approved December 12, 1980, 94 Stat. 2957, 2975.

Additional relevant provisions are contained in section 121 of H.J. Res. 610 Making Continuing Appropriations for the

Fiscal Year 1981, Pub. L. No. 96-369, approved October 1, 1980, 94 Stat. 1351, 1357-1358.

The most significant provision for our purposes here is the following language from the Supplemental Appropriations and Rescission Act, 1980, supra, 94 Stat. 881:

"Upon the establishment of a 'United States Synthetic Fuels Corporation' (the Corporation) projects or actions initiated by the Department of Energy with appropriations under this head [Department of Energy, Alternative Fuels Production] shall transfer to the Corporation upon a Presidential determination that the Corporation is fully operational and upon a majority vote of the Board of Directors of the Corporation, except that funds obligated for feasibility studies, cooperative agreements, program management, and projects which do not meet the definitions of eligibility for funding as synthetic fuels projects in the Corporation shall remain with the Department of Energy: *Provided*, That (1) projects meeting the eligibility criteria for funding by the Corporation for which funding has been obligated or committed by the Department of Energy may be adopted by the Corporation as if they had been entered into by the Corporation (for the purposes of such transfers only, the Corporation shall adopt the terms of such projects, established by the Department of Energy, using the authorities of the Department of Energy regardless of whether the Corporation would otherwise have authority to do so); and (2) accepted proposals for loan guarantees, price supports, and/or purchase commitments for which financial assistance is not provided by the Department of Energy shall be considered as responses to a solicitation of the Corporation to the extent they meet the eligibility criteria for funding by the Corporation.

"Unexpended balances of funds obligated for projects shall transfer to the Corporation to the extent such projects and activities are transferred to the Corporation as provided herein."

It is evident that many of the concerns earlier pointed out regarding project transfers have been addressed and resolved in the foregoing statutory language with respect to projects funded by Energy through the Energy Security Reserve.

We believe that adequate legal provisions have already been made in contemplation of an orderly transition to the Corporation of projects in category (2), that is, projects receiving financial assistance from Energy pursuant to the Defense Production Act Amendments of 1980 out of appropriations from the Energy Security Reserve. Aside from the above-quoted language from the Supplemental Appropriations and Rescission Act, 1980, the Defense Production Act Amendments of 1980 contained language designed to minimize any transfer difficulties. Subsection 305(a)(1)(B) of the Defense Production Act, as added by the Defense Production Act Amendments of 1980, 94 Stat. 619, classified to 50 U.S.C. App. § 2095(a)(1)(B), specifically states that:

"The President shall exercise the authority granted by this section—

* * * * *

"(iii) consistent with an orderly transition to the separate authorities established pursuant to the United States Synthetic Fuels Corporation Act of 1980."

Consequently, in delegating certain responsibilities to the Secretary of Energy in Executive Order No. 12242 (September 30, 1980), including those relevant here, the President included the following provisions:

"1-107. The Secretary of Energy shall exercise the functions delegated to him under Section 305 of the Defense Production Act of 1950, as amended, in the manner consistent with an orderly transition to the separate authorities established pursuant to the United States Synthetic Fuels Corporation Act of 1980, as provided by Section 305(a)(1)(B)(iii) of the Defense Production Act of 1950, as amended."

"1-109. No new awards for purchases or commitments for financial assistance shall be made under the provisions of this Order after the date on which the President determines that the United States Synthetic Fuels Corporation is established and fully operational. That determination is to be made in accord with Section 305(k) of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2095(k)), and in accord with the appropriations to the Departments of Energy and the Treasury pursuant to the Supplemental Appropriations and Rescission Act, 1980 (P.L. 96-304; 94 Stat. 857, 880-882)."

"1-110. No award for a purchase or commitment for financial assistance shall be made which would preclude projects or actions initiated by the Secretary of Energy under the provisions of this Order from being transferable to the United States Synthetic Fuels Corporation."

45 Fed. Reg. 65175 (October 2, 1980). If these directions were followed by Energy, all category (2) projects should be readily transferable to the Corporation after the Presidential determination that the Corporation is fully operational, upon a majority vote of the Board of Directors of the Corporation.

In addition, we believe the major transition issues have been addressed and guidelines statutorily established for projects in category (3), that is, projects receiving financial assistance from Energy pursuant to the Nonnuclear Act out of appropriations from the Energy Security Reserve. The most significant factor here is the above-quoted language from the Supplemental Appropriations and Rescission Act, 1980.

The transfer of category (3) projects to the Corporation is not likely to be as neat and orderly as the transfer of category (2) projects. The Nonnuclear Act was enacted in 1974, substantially before the Synthetic Fuels Corporation Act of 1980. The Nonnuclear Act provides a funding mechanism for a greater variety of energy projects fulfilling a broader spectrum of purposes and with a far less structured order of priorities than does the Synthetic Fuels Corporation Act. Consequently, there are likely to be category (3) synthetic fuels commercial demonstration projects that do not satisfy the eligibility requirements of the Synthetic Fuels Corporation Act. There may also be projects that satisfy the Corporation's eligibility criteria, but which the Corporation may not want to accept, because they are not fully compatible with the Corporation's goals. In addition, projects eligible for Corporation financial assistance may contain provisions in their financial agreements that Energy, but not the Corporation, could fulfill, yet the Corporation can accept these projects. The Supplemental Appropriations and Rescission Act, 1980, addresses and establishes guidelines for the resolution of each of these matters.

Nevertheless, implementation of the statutory language still leaves considerable discretion in the interpretation and administration of its provisions, and the Board of Directors of the Corporation must still accept a transferable project by majority vote. Whether these issues with respect to category (3) projects will be smoothly and orderly resolved will depend, to some extent, on how well the parties concerned exercise this discretion. Moreover, these issues are also common to category (1) projects, which were also provided assistance pursuant to the Nonnuclear Act.

BUDGETARY TREATMENT

It is implied in the third paragraph of your letter that the transfer of synthetic fuels commercial demonstration projects from Energy to the Corporation is a move "towards off-budget financing of commercial scale projects." If one objective of the transfer of the projects to the Corporation is off-budget financing of commercial scale projects, this objective will not be accomplished under existing legislation.

The Corporation obtains its primary funding, to the extent provided in advance in appropriation acts, by issuing notes or other obligations solely to the United States acting by and through the Secretary of the Treasury. Subsection 151(a)(1) of the Synthetic Fuels Corporation Act, supra, 94 Stat. 667, classified to 42 U.S.C. § 8751(a)(1). Funds are authorized to be appropriated without fiscal year limitation to the Secretary of the Treasury for deposit in the Energy Security Reserve to purchase and retain notes and other obligations of the Corporation. Subsection 195(a)(1) of the Synthetic Fuels Corporation Act, supra, 94 Stat. 682, classified to 42 U.S.C. § 8795(a)(1).

Section 153 of the Synthetic Fuels Corporation Act, supra, 94 Stat. 669, classified to 42 U.S.C. § 8753, specifically addresses the issue of budgetary treatment and provides:

"The obligations and outlays incurred by the Secretary of the Treasury in connection with the purchase of notes and other obligations of the Corporation shall be included in the totals of the Budget of the United States Government. The receipts and disbursements of the Corporation in the discharge of its functions shall be presented annually in the Budget of the United States Government but shall not be included in the totals of the Budget."

Thus outlays for Corporation financing of synthetic fuels commercial scale projects will still be reflected in the Budget totals through the Department of the Treasury and the Energy Security Reserve. The receipts and disbursements of the Corporation are not included in the totals of the Budget to avoid charging the same expenses twice. Most of the funds for Corporation disbursements will come from sales of notes and obligations to the Secretary of the Treasury, who in turn will have charged the Energy Security Reserve appropriation account. In essence, the Secretary of the Treasury can be viewed as a middleman between the Corporation and the Energy Security Reserve, and there is, in fact, only one charge on the funds of the United States. Accordingly, although the receipts and disbursements of the Corporation are included in the Budget document for informational purposes only, the Corporation's financing of synthetic fuels commercial demonstration projects is not off-budget.

Sincerely yours,

MILTON J. SOCOLAR,
Acting Comptroller General
of the United States.●

THE 63D ANNIVERSARY OF THE PROCLAMATION OF THE INDEPENDENCE OF THE BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. ADDABBO. Mr. Speaker, today, March 25, 1981, is not just any other day for a group of people in the United States and a nation of people in the Soviet Union's westernmost republic. It is special to over 10 million people in the Byelorussian Soviet Socialist Republic and over 1 million Americans of Byelorussian descent because 63 years ago today, in the city of Minsk, the council of the Byelorussian Democratic Republic proclaimed the national independence of Byelorussia.

Unfortunately for the people of Byelorussia they had only a short time to experience their freedom from a Russian Government which for centuries had dominated their people, the Soviet Red army attacking and conquering Byelorussia in 1921.

One of the purposes of addressing the Congress is to educate the men and women of this country. As representatives of the people we have a duty to inform our citizens about issues they may not be aware of. I am sure that many Americans have never heard of Byelorussia. They have no idea of the harsh, oftentimes inhuman conditions the people of Byelorussia are forced to live under. They have not the slightest notion that millions of Byelorussians, men and women, young and old, were murdered or deported to concentration camps at the hands of the Soviet Government. To Americans who take pride in their culture, religion, and literature, they would find it difficult to comprehend how the people of Byelorussia could survive in a nation where the Soviet Government has sought to destroy their religion, culture, and literature through persistent and systematic policy of Russianization.

But while many citizens in this country would be shocked at the undemocratic conditions imposed by the Soviet Union, a power which shows no concerns for international law, nor in particular, human rights, they would marvel at the strength and courage of the Byelorussian people for remaining as strong and hopeful in someday regaining their rightfully deserved freedom.

This Congress and other Congresses of the free world must continue to do all it can to free those nations who have fallen victim to Soviet expansionism. As we acknowledge the 63d anniversary of the Declaration of Independence of Byelorussia we must remember that to forget one nation held captive, forcing people to be prisoners in their own homeland, is to forget them all.●

THE PEOPLE RESPOND II

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. GARCIA. Mr. Speaker, I am inserting into the CONGRESSIONAL RECORD a statement which exemplifies the concern people are feeling over the proposed budget cuts. President Reagan's economic plan would not affect every segment of this society equally; minorities and the poor would have to shoulder the greatest suffering while businesses and the rich would be favored disproportionately. As part of my continuing crusade against the inequities in the proposed economic plan, I am inserting today's statement to show that there are still citizens who are concerned over the impact of this plan:

ALBERT EINSTEIN COLLEGE OF MEDICINE,
Bronx, N.Y., March 20, 1981.

Hon. ROBERT GARCIA,
Longworth House Office Building,
Washington, D.C.

DEAR CONGRESSMAN GARCIA: I would like to express my concern about the proposed phasing-out of the PSRO Program. As one who has spent almost my entire professional career in the field of quality assurance, much of it directed to the recipients of federally-funded programs, I feel such a move would be a marked step backwards in efforts to contain costs and assure quality of health care. This is particularly true in view of the Reagan emphasis, quite proper in my opinion, to eliminate fraud, abuse, and, I would add, poor quality from the program.

My experience of over 30 years in this field has led me to conclude that at least one-third of ambulatory care provided is of an unsatisfactory nature, being either inappropriate or excessive, and that an equal, if not higher, amount of in-hospital care is also in this category. I believe, in the aggregate that there are more abuses to the system caused by the purveyors of health services than from the recipients.

The PSROs are not perfect. No undertaking of this magnitude can expect to become immediately effective. There are operational flaws, excessive regulations and questionable motivations on the part of some physicians involved. However, I see no viable, visible alternative in place at the present time. The States do not have the capability at present to utilize the peer review mechanism effectively and are much more subject to pressure of the local health industry to maintain the status quo.

I also feel very strongly that if the program is not funded at a level that permits effective operations, it will not be able to adequately maintain surveillance or control of the rising costs of medical care.

Sincerely yours,

MILDRED A. MOREHEAD, M.D.,
Director, Evaluation Unit,
Professor, Community Health.

COALITION OF NEW YORK CITY JUDGES,
New York, N.Y., March 11, 1981.

Hon. ROBERT GARCIA,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN GARCIA: Because of our unique responsibility to ensure that justice is administered equally and fairly, we as Judges have a stake in Congressional reauthorization of an adequately funded Legal Services Corporation. Both the orderly administration of justice, and the fairness of the outcome in individual cases, are generally dependent upon adequate representation. The programs funded by the Legal Services Corporation have provided much of this needed representation in New York City for the past thirteen years. In addition, thousands of needy people who have nowhere else to turn for advice and counsel prior to litigation in civil claims rely upon the services provided by the legal services programs funded by the Legal Services Corporation.

The President's proposal to eliminate all funding for an independent Legal Services Corporation is particularly abhorrent to us as members of the judiciary. We likewise oppose any reduction in the program's funding or a move to discretionary funding by the States. Accordingly, we urge continued authorization of the Legal Services Corporation at levels necessary to provide the services needed.

Limitations on or elimination of funding are not the only perils facing the legal services program, however. Other perils are proposals which would impose unreasonable restrictions on the legal services permitted, such as on representation of migrant workers and aliens, and on representation before administrative and legislative bodies on policy matters affecting needy clients. Such limitations deprive needy persons of necessary representation and cripple the morale of the dedicated staff who are committed to meeting the local needs of their clients.

In addition, there are proposals to allocate a substantial proportion of the federal funds to the private bar, often mislabeled "judicare". Characterizing such proposal as "judicare" implies an element of judicial approval which is untrue and therefore misleading. Although the private bar has and must continue to make substantial contributions to the representation of the disadvantaged, it cannot adequately duplicate the structured commitment and continuity of an independent and non-partisan staff devoted exclusively to the service of disadvantaged clients.

Accordingly, as judges, we support continuation of the Legal Services Corporation in its present form, and oppose the President's recent budget recommendation to eliminate this essential program.

Sincerely yours,

Housing Court Judge Arthur Aaron, Acting Supreme Court Justice Myriam Altman, Housing Court Judge Anthony Andreacchi, Supreme Court Justice Sidney Asch, Civil Court Judge Pelham St. George Bissell III, Supreme Court Justice Arthur Blyn, Civil Court Judge John A. K. Bradley, Housing Court Judge Antonio Brandween, Acting Supreme Court Justice Herman

Cahn, Appellate Division Justice John Carro.

Civil Court Judge Beverly S. Cohen, Acting Supreme Court Justice Leonard N. Cohen, Civil Court Judge Jay Cotler, Housing Court Judge Jay Dankberg, Civil Court Judge Ethel Danzig, Family Court Judge Nanette Dembitz, President of the Family Court Judges Association Leon Deutsch, Family Court Judge Elrich A. Eastman, Acting Supreme Court Justice Shanley Egeth, Supreme Court Justice Betty Ellerin.

Civil Court Judge Lester Evens, Appellate Division Justice Arnold Fein, Acting Supreme Court Justice Anne. G. Feldman, Civil Court Judge Shirley Fingerhood, Family Court Judge Kevin Fogarty, Civil Court Judge Helen E. Freedman, Court of Appeals Judge Jacob Fuchsberg, Supreme Court Justice Hortense Gabel, Civil Court Judge Ira Gammerman, Housing Court Judge Dianne Gasworth.

Housing Court Judge Harriet George, Civil Court Judge Kristin Booth Glen, Family Court Judge Mortimer Goetzels, Acting Supreme Court Justice Budd G. Goodman, Acting Supreme Court Justice Louis Grossman, Acting Supreme Court Justice Nat Hentel, Family Court Judge Bruce Kaplan, Supreme Court Justice Bentley Kassal, Civil Court Judge Solomon Katz, Civil Court Judge Martin B. Klein.

THERE'S MORE TO TAX CUTS THAN THE LAFFER CURVE

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. ROUSSELOT. Mr. Speaker, I rise to commend Mr. Bruce Bartlett's comment entitled "There's More to Tax Cuts Than the Laffer Curve," which appeared in the Washington Star today, March 25.

As the only California Representative serving on the Joint Economic Committee, I am pleased that Mr. Bartlett has upheld California's proposition 13 tax reduction as an example for the rest of the Nation. Mr. Bartlett's remarks make a strong case in favor of the administration's proposal to reduce marginal tax rates—a move I have endorsed for several years. I urge my fellow colleagues to read this concise analysis from the Washington Star in its entirety.

The article follows:

THERE'S MORE TO TAX CUTS THAN THE LAFFER CURVE

To judge by press reports and statements by leading members of Congress, one would believe that the American people are wildly enthusiastic about having government spending programs slashed to the bone but stand in united opposition to an across-the-board tax cut. If this is in fact the case, it represents one of the most profound reversals in human nature and political norms which has ever taken place.

Conventional wisdom obviously suggests, and is confirmed by experience, that Congress likes to cut taxes but shrinks away from any suggestion that spending be curtailed. This common-sense observation was, indeed, at the heart of the drafting of the Kemp-Roth tax bill.

The original idea was that spending was out of control and that Congress, particularly with its overwhelming Democratic majority (in 1977), would never make significant spending cuts unless put under great pressure to do so. On the other hand, because Congress enjoyed cutting taxes, it was possible that a major, across-the-board reduction in tax rates could be pushed through.

The idea was two-fold: to control spending on the revenue side by denying Congress the money to spend, and to achieve a reduction in government's share of gross national product by so stimulating the private sector that it would grow at faster rate than government spending. This was the essence of the Kemp-Roth proposal.

THE LAFFER CURVE

Of course, many different arguments were used to support and buttress the tax-cut program, one of them being the idea that a tax cut could—theoretically—pay for itself by expanding the tax base; i.e., the Laffer Curve. Unfortunately, rather than being an illustration of what was theoretically possible, the Laffer Curve got turned into the sole justification for Kemp-Roth, and the idea became implanted in the public mind that those of us supporting Kemp-Roth were somehow unconcerned about federal spending because the tax cut would pay for itself overnight. This was never the case.

The fact is that the Laffer Curve is simply a truism: people do not work for nothing; if you tax them enough they will stop earning taxable income and the tax base will erode, reducing revenue below what a lower tax rate would yield. Moreover, it is clearly true that some specific tax rates, such as the capital gains tax, could be cut with no net loss of revenue. Recent Treasury Department data indicates that the 1978 capital-gains cut, which was projected to "lose" $2.5 billion in revenue the first year, actually cost a mere $100 million, with the likelihood that when final data are available even this revenue loss may disappear.

But this does not mean that an across-the-board personal income tax rate reduction would accomplish the same effect, at least in the short run.

A STRONGER REASON

I always believed that the moral case for Kemp-Roth was stronger than the economic argument: people have a right to their own income and ought to be allowed to keep all but that which is necessary for the payment of basic government services. Regardless of whether the tax reduction produces one penny of revenue reflow, tax rates ought to be cut. Tax rates above 50 per cent could be justified only on the grounds of envy, a desire to punish those who are more successful than others. But I do not believe that the American people are an envious people. They do not care about equality of income, only equality of opportunity.

There remains the critical necessity of reducing the burden of government. But despite the professed desire of Congress to enact substantial spending cuts, recent history suggests that they will not be accomplished, nor can they succeed, without tax reduction. Last year the Congress tried its best to balance the 1981 budget and enacted some tough spending cuts. The budget is now $60 billion in the red nevertheless. This was caused mainly by general deterioration of the economy due, in large part I believe, to excessive taxation. Tax reduction, therefore, is necessary to the goal of getting spending reduced.

Lastly, I would say that the proper analogy to the Reagan program is not the Thatcher program in Great Britain, which is rightly condemned as a failure, but California's Proposition 13, which proved that spending can be controlled—but only when taxes have first been cut.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily

Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, March 26, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MARCH 27

9:00 a.m.
Special on Aging
To resume oversight hearings on the impact of proposed budget reductions in programs affecting the elderly, focusing on health and human services programs.
6226 Dirksen Building

9:30 a.m.
Finance
Energy and Agriculture Taxation Subcommittee
To hold hearings on tax and tariff proposals to aid the domestic refining industry.
2221 Dirksen Building

Labor and Human Services
Employment and Productivity Subcommittee
Business meeting, to mark up S. 648, authorizing funds for fiscal year 1982 for certain youth programs under the Comprehensive Employment Training Act (CETA).
4232 Dirksen Building

10:00 a.m.
Appropriations
*Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the National Highway Traffic Safety Administration, Department of Transportation.
1224 Dirksen Building

Commerce, Science, and Transportation
*Merchant Marine Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal year 1982 for the Maritime Administration, Department of Commerce.
235 Russell Building

Foreign Relations
To resume hearings on proposed authorizations for fiscal year 1982 for the Department of State.
4221 Dirksen Building

Judiciary
To hold hearings on the nominations of Rudolph W. Giuliana, of New York, to be Associate Attorney General, Theodore B. Olson of California, to be an Assistant Attorney General, D. Lowell Jensen of California, to be an Assistant Attorney General, and Carol E. Dinkins of Texas, to be an Assistant Attorney General, all of the Department of Justice.
2228 Dirksen Building

MARCH 30

9:30 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold oversight hearings on the implementation of the strategic petroleum reserve.
3110 Dirksen Building

Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
To resume hearings on S. 755, authorizing funds for fiscal year 1982 for Federal alcohol and drug abuse programs.
4232 Dirksen Building

10:00 a.m.
Appropriations
Energy and Water Development Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for energy and water development programs.
1318 Dirksen Building

Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Federal Aviation Administration, Department of Transportation.
1114 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To resume hearings on S. 601, to reduce and simplify certain licensing requirements in the broadcast industry.
235 Russell Building

Finance
Taxation and Debt Management Subcommittee
To hold hearings on miscellaneous tax measures, S. 388, 446, 464, 476, 500, 501, and 499.
2221 Dirksen Building

1:30 p.m.
*Agriculture, Nutrition, and Forestry
To resume hearings on proposed reauthorization of food and agriculture programs administered by the Department of Agriculture.
1224 Dirksen Building

Appropriations
Agriculture, Rural Development and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for agricultural programs.
1224 Dirksen Building

2:00 p.m.
Appropriations
Energy and Water Development Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for energy and water development programs.
1318 Dirksen Building

Armed Services
Strategic and Theater Nuclear Forces Subcommittee
To resume hearings on proposed authorizations for fiscal year 1982 for the Department of Defense, focusing on civil defense programs.
224 Russell Building

Commerce, Science, and Transportation
To hold hearings on proposed legislation authorizing funds for title III of the Marine Protection, Research, and Sanctuaries Act.
235 Russell Building

2:30 p.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To resume hearings on proposed authorizations for fiscal year 1982 for the Department of Energy, focusing on magnetic fusion, inertial fusion, geothermal electric energy systems, and nuclear materials security and safeguards.
3110 Dirsken Building

MARCH 31

9:00 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on the nominations of Seeley Lodwick, of Iowa, to be Under Secretary of Agriculture for International Affairs and Commodity Programs; John B. Crowell, Jr., of Oregon, and William G. Lesher, of Virginia, each to be an Assistant Secretary of Agriculture.
324 Russell Building

Environment and Public Works
Nuclear Regulation Subcommittee
To resume hearings to examine alleged delays in the Nuclear Regulatory Commission's licensing requirements for the operation of new nuclear powerplants, and to examine the impact of the recent *Sholly* vs. *NRC* decision by the U.S. Court of Appeals for the District of Columbia Circuit, to require that hearings be held prior to NRC issuing amendments to nuclear power licenses.
4200 Dirksen Building

9:30 a.m.
Appropriations
Agriculture and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Soil Conservation Service, Agricultural Stabilization and Conservation Service, and the Animal and Plant Health Inspection Service, Department of Agriculture.
1223 Dirksen Building

Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the International Trade Administration, Scientific and Technical Research Service, and the Patent and Trademark Office, Department of Commerce.
S-126, Capitol

Banking, Housing, and Urban Affairs
Securities Subcommittee
To hold hearings on S. 289, to provide uniform margin requirements in transactions involving the acquisition of securities of certain U.S. corporations by non-U.S. persons where such acquisition is financed by non-U.S. lenders.
5302 Dirksen Building

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings, in closed session, on proposed legislation authorizing funds for fiscal year 1982 for the National Aeronautics and Space Administration.
235 Russell Building

Labor and Human Resources
To hold oversight hearings on the implementation of family planning programs.
4232 Dirksen Building

10:00 a.m.
Appropriations
Energy and Water Development Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for energy and water development programs.
1318 Dirksen Building

Appropriations
Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of Management and Budget.
S-146, Capitol

Foreign Relations
To resume hearings on proposed authorizations for fiscal year 1982 for foreign assistance programs, focusing on military assistance.
4221 Dirksen Building

2:00 p.m.
Appropriations
Energy and Water Development Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for energy and water development programs.
1318 Dirksen Building

Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Agency for International Development; and to continue review of certain foreign assistance programs.
S-126, Capitol

Appropriations
*Labor, Health and Human Services, and Education Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for programs of the Department of Labor.
1114 Dirksen Building

Appropriations
Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the White House Office, Office of Administration, official residence of the Vice President, executive residence, special assistance to the President, compensation of the President, and other unanticipated needs.
S-146, Capitol

Select on Ethics
Business meeting, to consider further the proposed revisions to the Senate Code of Official Conduct.
6226 Dirksen Building

APRIL 1

8:00 a.m.
Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold hearings on S. 677, to provide an alternative to annualizing the cost-of-living adjustments on Federal retirement for civil service annuitants.
3302 Dirksen Building

9:00 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on proposed reauthorization for food and agriculture programs administered by the Department of Agriculture.
324 Russell Building

Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Bureau of Indian Affairs, Department of the Interior.
S-128, Capitol

Judiciary
Juvenile Justice Subcommittee
To hold hearings to discuss the proposed phase out of the Office of Juvenile Justice and Delinquency Prevention of the Department of Justice.
2228 Dirksen Building

Labor and Human Resources
To hold hearings on proposed authorizations for national centers for health statistics, health services research and health care technology programs, national research service awards, medical library assistance programs, and the National Health Service Corps of the Department of Health and Human Services.
4232 Dirksen Building

9:30 a.m.
Appropriations
Agriculture and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Farmers Home Administration, Rural Electrification Administration, and the Farm Credit Administration.
1223 Dirksen Building

Appropriations
HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Federal Emergency Management Agency and the Selective Service System.
S-126, Capitol

Appropriations
Labor, Health and Human Services, and Education Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for programs of the Department of Health and Human Services.
1114 Dirksen Building

Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the economic and statistical analysis program, U.S. Census Bureau, National Telecommunications and Information Administration, and the Minority Business Development Agency, Department of Commerce.
S-146, Capitol

Energy and Natural Resources
*Energy and Mineral Resources Subcommittee
To hold oversight hearings to review the strategic minerals and materials research policy of the United States.
3110 Dirksen Building

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on the administration's proposed budgetary recommendations for the Immigration and Naturalization Service of the Department of Justice.
412 Russell Building

10:00 a.m.
Appropriations
Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Secretary of the Treasury.
1224 Dirksen Building

Commerce, Science, and Transportation
Consumer Subcommittee

HOUSE OF REPRESENTATIVES—*Thursday, March 26, 1981*

The House met at 11 a.m.

Dr. Edward G. Latch, D.D., former Chaplain of the House of Representatives, offered the following prayer:

Be strong in the Lord and in the power of His might.—Ephesians 6: 10.

Almighty God, our Father, who has made us for Thyself so that our hearts are restless until they find rest in Thee, lead us into the green pastures of Thy presence and beside the still waters of Thy patience, that our strength may be renewed, our spirits restored and refreshment for daily tasks be given us.

When doubts disturb us and worries weaken us be Thou our guiding light that we may see that the way of truth is the way of wisdom, the path of honesty is the path of honor and the road of faithfulness is the road of faith.

Keep our spirits steady, our hopes stable and our good will strong that we may be instruments of Thy will leading our Nation to a higher plane of liberty and justice for all. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

CALL OF THE HOUSE

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

[Roll No. 19]

The SPEAKER. On this rollcall, 372 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call are dispensed with.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of House Resolution 81, the Chair announces that he has designated this time for the taking of the official photograph of the House in session.

Without objection the House will stand in a brief recess while the Chamber is being prepared for the photograph. The House will be in order when the photographs are taken. Members will please face the cameras. There will be about 10 flashes of the strobe lights and the process will take about 10 minutes. About 5 minutes after that we will go back into the House with the business of the House.

The Chair declares a recess.

RECESS

Accordingly (at 11 o'clock and 25 minutes a.m.), the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. WRIGHT) at 11 o'clock and 35 minutes a.m.

TAX CUTS AND INVESTMENT

(Mr. SHAMANSKY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAMANSKY. Mr. Speaker, I hope to be able to support the administration on tax cuts which will spur productive investment and creation of new jobs. Unfortunately, the tax reductions outlined so far by the President make too little a connection between tax reductions and such investment. I want a reduction in taxes to

cover, at least, the already scheduled rise in social security taxes and bracket creep, by which inflation forces wage earners into higher tax brackets. I also support improved depreciation allowances for business to encourage modernization and increased worker productivity.

But the administration's across-the-board cuts will not necessarily accomplish this. Instead, the bulk of the reductions may well find their way into the pockets of those already wealthy—without any productive investment required.

We must have more money deposited in America's thrift institutions. We need reasonable interest rates. Lower capital gains taxes also should be studied. More savings and better interest rates will stimulate the creation of new jobs. To achieve this I will support a tax reduction tied to productive investment. Thank you.

HONORARYCITIZENSHIP TO RAOUL WALLENBERG

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, today I introduced, along with 253 cosponsors in the House of Representatives, a bill which will grant honorary citizenship to Raoul Wallenberg, Swedish diplomat, whose heroism saved the lives of thousands of innocent men, women, and children from the Nazi purge in Hungary.

I deeply appreciate the almost unprecedented support shown by my colleagues in this legislation. The illustrious list of cosponsors includes both the majority and minority leaders of the House as well as members from every State of the Union and each territory represented in Congress.

In these days of intense legislative pressure on Congress, it is gratifying that we can give attention, in this strongly bipartisan way, to an issue which has clouded the American conscience for more than three decades.

Raoul Wallenberg, well educated Christian son of an eminent Swedish family, accepted an assignment in Budapest in the closing days of World War II. The assignment was given by the American War Refugee Board through the Department of State under then Secretary, Cordell Hull. Directions and money supporting his rescue efforts were supplied by the United States.

Armed with Swedish diplomatic papers, the 32-year-old Wallenberg coordinated the rescue effort to save the last remaining intact Jewish community in Europe at a time when 5 million Jews had already been taken to the gas chambers.

Wallenberg printed Swedish passports of his own design and with incomparable courage faced Nazi soldiers and death squads. He distributed passports to thousands of victims. He repeatedly risked his own life as he followed the death marches and went daily to the deportation trains where he literally pulled people out of the clutches of the Nazis.

He purchased and rented scores of houses in Budapest, equipped them with Swedish flags, and personally protected the refugees from the onslaught of the Nazis and the arrow cross.

For the man who saved so many by conferring citizenship upon them, our action here is a singularly appropriate, although symbolic, parallel. To confer U.S. citizenship upon him is to both protect him and to honor him through our belated gratitude.

Bestowing honorary American citizenship is a serious matter. Only once before in the history of our Congress have we given honorary citizenship. As one who earned my own citizenship in this Nation as an immigrant from Hungary, I am well aware of the preciousness which accompanies such an action.

However, in taking Raoul Wallenberg to our Nation's breast, we bring even more honor to ourselves than to him. We recognize our responsibility to him by commemorating the great achievements in his life, his contribution to answering the call of the American conscience of that time, and our involvement in his fate.

The story of his capture and incarceration by the Russians in the gulag archipelago is becoming increasingly widely known. The refusal of the Soviet Union to cooperate in revealing his whereabouts or fate is also well known. Time does not erase the sense of outrage of the civilized world that a diplomat and humanitarian could be held unaccountably in prison by a modern nation.

We cannot cease to persist in our efforts to protect individuals from these and other violations of human rights and international law.

We must continue to confront the Russians with the message that Wallenberg is not forgotten, and that his fate is linked to future relations between the East and West.

THE PRESIDENT'S BULLDOZER OF ECONOMIC PROGRESS

(Mr. FROST asked and was given permission to address the House for 1 minute.)

Mr. FROST. Mr. Speaker, Congress is being asked to climb on the President's bulldozer of economic progress. The blade is set at just the right angle to scoop out $49 billion in Federal spending and $51.4 billion in tax revenues in fiscal year 1982. What we often overlook is that the bulldozer will continue plowing well beyond 1982—and the blade will cut deeper and deeper.

The President's tax cut package cuts revenue by $51.3 billion next year and then deepens to $145 billion in 1984. He wants us to let that bulldozer go. He wants us to buy his supply-side scenario that the bigger the tax cut, the bigger and healthier the economy. Many of us—Democrats and Republicans—are skeptical, especially about what those tax cuts will do to the promise of a balanced budget.

The President's economic assumptions are—at best—vague and untested. In the tax area he assumes $44 billion in unspecified savings; he makes no provision for extending the jobs credit that encourages the hire of unemployed workers; he says nothing about extending the $200/$400 tax exclusion for dividends and interest.

In short, we do not have enough hard economic information to let the bulldozer run for more than 1 year at a time without a tightly set governor.

CONGRESS SHOULD NOT BE RUBBERSTAMP FOR PRESIDENT'S ECONOMIC PLAN

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute.)

Mr. WILLIAMS of Montana. Mr. Speaker, President Reagan and his Cabinet are to be commended for the zeal and determination which they have shown in drumming up support for a new look at Federal spending and taxation. But when they expect the House to be but a rubberstamp, when they expect the House to accept their plan as simply an article of faith, that is something else again.

Why should we accept on faith that the Republican plan of huge tax cuts for the rich will result in greater investment of capital in American business and industry? The Secretary of the Treasury says it will happen because it is part of their master plan or, as he calls it, their scenario. The prosperity they foresee, including drastic reductions in inflation rates, are not accepted by most of the Nation's best economists.

The Democrats in this House are taking a reasonable, prudent look at the administration's proposals. We will work quickly, but we will not be rushed, and along the way we intend to support the taxing and spending proposals which are in the best interests of the middle-income Americans.

□ 1145

The SPEAKER pro tempore (Mr. FROST). The Chair recognizes the gentleman from Texas (Mr. WRIGHT).

THE 100TH ANNIVERSARY OF BIRTH OF FRANKLIN DELANO ROOSEVELT

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, on behalf of myself and 120 colleagues from both sides of the aisle I am introducing today a joint resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

Next January 30 will be the centennial of President Roosevelt's birth. The resolution provides for a joint session of Congress to held on Friday, January 29, to pay tribute to this great American and to hear a memorial address by a distinguished scholar.

As originally drafted, the joint resolution also provided for the publication of a book, "The Days of Franklin D. Roosevelt: A Chronicle," prepared by Pare Lorentz. Because of the effort to cut costs throughout the Government during this period of stringency, funding for publication of that book has been deleted from the resolution. However, it does provide for acquisition of the book by purchase or gift and provides sufficient funds should purchase be deemed appropriate. Thus this valuable document would be available for publication at some future date if funds should become available, perhaps from private sources.

To arrange for the joint session, for nationwide observances, and for all other matters relating to the commemoration the resolution seeks to create a Special Joint Committee on the Centennial of the Birth of Franklin Delano Roosevelt. The committee would be composed of the President pro tempore of the Senate and Speaker of the House, seven Members of the Senate appointed by the President pro tempore of the Senate and seven Members appointed by the Speaker of the House of Representatives. In each House there would be four Members from the majority and three from the minority.

The joint committee would terminate not later than April 30, 1982.

Mr. Speaker, there have been few leaders in American history who have had so profound an effect upon this Nation as did Franklin Delano Roosevelt. Many of us in this House have vivid memories of his stirring leadership during years of crisis. President Reagan has spoken of the great influence President Roosevelt had on him. There are few people whose memories go back to the 1930's and 1940's who were not influenced by this great man. Therefore, I believe it is altogether fitting and proper that we honor his memory on the centennial of his birth.

MILITARY BASES ARE NOT "ISLANDS"

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ROEMER. Mr. Speaker, military bases are not, as the Supreme Court fictionalizes, mere "islands"—self-sufficient and self-contained. Military bases impact on local communities by asking for services, such as educating the children of servicemen, while crippling the local tax base used to provide those services—by reducing the local property tax roles, and freezing local sales tax revenues with competition from local tax-free commissaries.

Under the Reagan budget proposal Federal impact aid to compensate the locally affected school systems has been slated for sharp reductions. In other words, the Government says it is not really willing to help pay for services it continues to ask for.

For example, the Vernon Parish, La., school system spends over $8 million a year to educate the military dependents of Fort Polk, La. In the past the Government contributed $1.5 million to ease that overburdening. Now that contribution is subject to sharp cuts.

This imposes a hardship on the people living near military bases by overburdening their local services, and it imposes another hardship for the brave men and women serving in our Armed Forces—when they have to send their children to local schools which are not financially supported in an adequate manner.

CONGRESS AND CRIME

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HUGHES. Mr. Speaker, crime—and what to do about it—dominates public debate and private conversation in the Nation today. Frustration mounts over a criminal justice process which appears both ineffective and rudderless. The oft-mentioned villains are many overworked police, indifferent prosecutors, soft-hearted judges, and weak criminal laws. Unfortunately much of the recent rhetoric on crime has done little to create new initiatives; rather it has focused on increasing the climate of fear and powerlessness among the people.

In my view, the congressional role with respect to crime problems is threefold. First, we must attempt to redirect the dialog about crime to concentrate public attention on setting realistic crime-control goals. Second, Congress must provide the clear, simple and fair Federal criminal laws which can unite the Nation in their defense. Third, Congress must provide the impetus for the development of a Federal initiative to help States and localities with a modest amount of Federal funds.

In furtherance of the congressional leadership, and as chairman of the Subcommittee on Crime of the Committee on the Judiciary I plan on making a series of remarks on the floor of this House which raise what I perceive to be important crime issues. I also commit myself to follow up with hearings—and where appropriate legislation—on these issues. Next week the Subcommittee on Crime begins a series of hearings on pretrial services agencies and the dilemmas posed by the current bail law. In the coming weeks and months, the subcommittee will hold hearings on the problems of drug law enforcement, arson, and organized crime.

Another important obligation of the Congress is to provide modest financial assistance to States and localities to creatively respond to the crime problem. I will be working with Members on both sides of the aisle to develop the necessary consensus to maintain a Federal initiative on crime. I hope that you will join me in this important effort.

THE LATE ADM. JOHN S. McCAIN, JR.

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, last Sunday there passed away one of America's great war heroes and a very distinguished American, Adm. John S. McCain, Jr., U.S. Navy.

Son of a distinguished World War I career admiral of the same name, Admiral McCain was known to many Members of this House and of the other body, since for many years he served as Chief of the Navy's liaison with Congress.

A submarine commander in World War II, with an outstanding record, Admiral McCain, after serving with great distinction in his congressional liaison role, moved swiftly up through the Navy ranks in a series of important responsibilities, including Chief of Naval Information; Commander, Amphibious Forces, Atlantic Fleet, stationed in Norfolk, Va.; Commander, Eastern Sea Frontier with headquarters in New York City, and also serving as Military Representative to the United Nations, in which responsibility Admiral McCain and his family occupied the famous Bullfinch Mansion on the grounds of the late lamented Brooklyn Navy Yard; Commander in Chief, Naval Forces Europe; and finally, in the middle of the Vietnam war, Admiral McCain was named as Com-

mander in Chief of all U.S. forces in the Pacific, with top operational command over the fighting in Vietnam.

Ironically, while Admiral McCain served as CINCPAC, with headquarters in Honolulu, and traveled regularly to the Vietnam fighting fronts, his son, now Capt. John S. McCain III, USN, was being held for years as a prisoner of war in North Vietnam, having been shot down as a Navy pilot. At his headquarters Admiral McCain never revealed any sense of his personal concern as he exercised his heavy responsibilities as commander in chief, a characteristic display of personal courage and self-discipline.

Those of us who have had the privilege of knowing Admiral McCain, knew him as a warm and friendly person who liked to project a brusque, tough, "sea dog" demeanor, but also as one who had a clear understanding of the operations of Congress and who used that knowledge most effectively in support of the Navy and its interests. Admiral McCain was always outspoken and intensely loyal to the United States and a strong exponent of national defense.

In fact, throughout his long naval career and after his retirement Admiral McCain was known as one of the strongest and most tireless exponents, in the face of a rapidly growing Soviet threat, of the special attributes of seapower in providing a credible and effective deterrent to that threat. Jack McCain must have given literally hundreds of talks on this topic across the country and abroad. His presentations were direct and always instructive. He was the kind of special speaker who could keep his audience on the edge of their chairs. I think we can safely say that Admiral McCain, both in uniform and out, was in large measure responsible for the growing recognition in recent years, now reflected in the 1982 Navy budget, for changing the views of a substantial portion of the American people in appreciating the special role that seapower must play in the protection of a modern superpower like the United States.

One particular example will underline what I mean. Jack McCain made a very significant and little known contribution to the security of the United States more than a decade ago, which has helped to change history. As a regular lecturer on seapower he was the first knowledgeable defense professional who recognized the crucial importance of the Indian Ocean to the safety and security of the United States. Not only did Admiral McCain push this concept in his lectures but in the Department of Defense he was largely responsible for the discovery and development of what was more than a decade ago a very little known island in the middle of that ocean—but one which we all know today—Diego Garcia. Admiral McCain was doggedly insistent in persuading the Department of Defense to gain a lease on this island and establish it as a base for American naval and American airpower in that vast, largely unknown area of the world that we have all since come to recognize as extremely important.

Diego Garcia is admittedly a long way from the Persian Gulf. But, thanks to Jack McCain, it is at least the one spot in that vast expanse where Americans today have an operating base for our ships, our submarines, our patrol aircraft, and even our B-52's. And it did not come easily either.

Those of us who caught the inspiration of Admiral McCain in those days had a long fight on our hands to sell the Congress, bone-tired on Vietnam, on just how important Diego Garcia really was. We must pay high tribute to this determined, articulate sea dog for having made it possible for us to be at least partly prepared when the emergency finally presented itself.

Admiral McCain passed away quietly last Sunday as he and his remarkable wife, Roberta, were returning from a long overdue personal vacation in Europe. Mrs. McCain told me they had spent several very happy weeks in a leisurely tour of a number of European countries which they had long wanted to visit in a personal rather than an official capacity. It is appropriate that Admiral McCain should have passed away so quietly after such a happy interlude in a long career of tough and vigorous achievement.

Mr. Speaker, one of the best examples of America's change of heart in recent months on military power is the inclusion in the fiscal year 1982 budget of funds to procure another nuclear Navy carrier. Of course Admiral McCain was a submarine officer, not an aviator. But his father was a carrier task force commander and his son was a distinguished Navy aviator. What more appropriate tribute could a grateful Nation render to this distinguished warrior, than to name that latest carrier—which will certainly be sent, when commissioned, to fill a substantial void in the Indian Ocean, whose significance Admiral McCain succeeded in demonstrating so clearly to our Nation's leaders—than to christen it: *John S. McCain, Jr.*

Home is the hunter,
Home from the hill
And the sailor,
Home from the sea.

DISPLACED HOMEMAKER PROGRAMS FACE EXTINCTION

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, this weekend Department of Labor Secretary Raymond Donovan will decide the fate of 31 programs targeted at older, minority, and rural displaced homemakers. I want to stress to my colleagues the urgency of this decision since many programs face extinction on March 31.

In the 1978 reauthorization of CETA, Congress recognized displaced homemakers entering the paid work force as a group facing special disadvantages. We authorized the Secretary of Labor to spend up to 2 percent of title III funds for displaced homemaker programs. Thirty-one prime sponsor and six national demonstration grant awards were made in 1980.

In December 1980 a House Appropriations Committee report recommended that displaced homemakers continue to receive high priority in fiscal year 1981. The Department of Labor thus earmarked $1.7 to $1.9 million of 1980 title II-D carryover funds to maintain the programs through September 1981.

But now Secretary Donovan has frozen title II-D funds, and as a result, displaced homemaker programs have been also frozen.

Why should we save the programs? Because they offer valuable training for homemakers entering the work force. But equally important is that the Department of Labor began an evaluation of the programs in November 1980 that will run until September 1981. That evaluation, and the investment we have made in the programs, will be lost if we do not maintain them until at least the date the evaluation ends.

The programs only need $1 million, an 80-percent cut from fiscal year 1980 appropriations, to make it through the end of September. Surely Secretary Donovan can either scrape up some title III funds or discretionary funds or waive the title II-D freeze for the displaced homemaker programs. I ask my colleagues to contact Secretary Donovan and urge him not to abandon a worthwhile endeavor in midstream.

LETTER FROM A DEMOCRAT

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. SOLOMON. Mr. Speaker, I have heard for the last several weeks a number of my Democratic colleagues stand up here and read letters from special interest groups urging opposition to the President's economic recovery program.

I have got a very interesting letter here, which is not to me, but it is from one of my constituents to the Honorable JIM WRIGHT.

It says:

DEAR MR. JAMES WRIGHT: As a Democrat for some thirty years, I would like you to know that I am quite chagrined at the actions of the Democratic party in Congress—particularly these past few years when the Democratic party no longer represents middle class America.

As a Democrat I sincerely believe that you and your fellow Democrats in Congress due to your spendthrift ways, i.e., deficit budgets year after year, are the root cause of the inflation that besets our nation.

It says:

Please support President Reagan in his economic recovery program.

He says:

I belong to no special interest group. I have just been a loyal Democrat for 30 years.

Does that tell you something, gentlemen?

GOVERNMENT EMPLOYMENT IS A PRIVILEGE, NOT A RIGHT

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, yesterday in testimony before my appropriations subcommittee, acting officials from the General Services Administration—holdovers from the previous administration—attempted to paint a bleak picture of projected service cutbacks and employee layoffs if slight budget reductions proposed for GSA by the new administration are enacted.

These officials are obviously so used to having the Federal budget go up and up, that they are unwilling to accept any change in direction.

Employment in the Federal Government is not a right—it is a privilege.

Rather than create consternation and unrest, reductions in the Federal work force should bring Federal employees closer together.

Those having the high honor of serving the people should do so well, with dedication and pride, not with an attitude that the public owes them a job.

The aim of the Reagan administration is to help create millions of new jobs in the private sector, so that good workers leaving Government service should have no difficulty finding productive employment in the nongovernment work force.

□ 1200

TRIBUTE TO NATHANIEL GOLDSTEIN

(Mr. GREEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GREEN. Mr. Speaker, it is with sadness that I announce to my colleagues today the death earlier this week of Nathaniel Goldstein, a former New York State attorney general and leader in philanthropic causes. Mr. Goldstein had been active in New York City and New York State affairs for many years, and I believe Members of the New York delegation, as well as all Members of the House, should take a moment to pay tribute to Nathaniel Goldstein.

Mr. Goldstein was born and raised in New York City, and after attending college and law school there, involved himself in the affairs of both the city and the State. He led a fight to revoke a charter surreptitiously obtained by the Ku Klux Klan in New York, was involved in housing and urban affairs investigations with State legislative committees, and practiced law for many years in New York. Nathaniel Goldstein served with distinction as attorney general of the State of New York, from 1943 to 1954.

On a personal note, Nat Goldstein gave me sound advice at many critical times of my political career.

On the civic front, Mr. Goldstein served as chairman of the board of the Albert Einstein College of Medicine of Yeshiva University and played a leading role in the growth of that institution into one of the world's great medical schools. Among his many civic and charitable activities, he was an overseer of the Truman Research Institute for the Advancement of Peace at the Hebrew University in Jerusalem, and served as president emeritus of the American Friends of the Hebrew University. Additionally, he was a trustee of the Fletcher School of Law and Diplomacy. Mr. Goldstein made a significant and admirable contribution to New York City and State affairs through his work as an attorney, attorney general, and civic leader. For this he deserves our recognition. We shall miss him.

WISDOM IS WHERE YOU FIND IT

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, in browsing through the newspapers and periodicals, I came across two items deserving of mention here.

Columnist Hugh Sidey of Time magazine reports that a former high official in the New Frontier and Great Society says:

If we don't take care of the economy and our national security, there ain't going to be school lunches for anybody.

How refreshing to see such wisdom coming from such a source.

The second item appeared in this morning's Wall Street Journal. It quotes our good friend, the chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI as saying he is against a 3-year tax cut because such an approach—and I quote—"would take Congress out of the action" of setting fiscal policy.

Since the actions of the Democratic-controlled Congress are what got us into this mess in the first place, may I suggest that the chairman has, in effect, given us the best reason for a 3-year tax cut I have yet heard.

WE CANNOT WRITE THE PENTAGON A BLANK CHECK

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, as you know, this Congress is considering proposals by the President to reduce the overall growth of Government spending, and to decease expenditures for many domestic programs.

In part, these proposals direct the Federal bureaucracy to streamline its operations, and to ferret out waste, fraud, abuse, and inefficiency.

I believe that as we are considering these cuts in domestic spending, we should be mindful of the need for similar efforts in the programs of the Department of Defense. There is not a stronger believer than I in the need for more defense spending. However, we cannot write the Pentagon a blank check.

Therefore, today I am introducing a resolution which calls on the President and the Secretary of Defense to exercise every effort to remove waste and inefficiency from the operations and programs of the Department of Defense.

The intent of this resolution is not to cut necessary military programs, but to insure that every dollar the Congress appropriates for defense will be spent in an effective and productive manner.

I invite my colleagues in the House to join with me in this important resolution.

STEPS WITHIN ARMED SERVICES COMMITTEE TO COMPLETELY OVERHAUL PROCUREMENT SYSTEMS

(Mr. BEARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEARD. Mr. Speaker, the House Armed Services Committee is in the process of hearing testimony from the Navy and the Electric Boat Co. in regard to the delays and cost overruns connected with the Trident and its new fast-attack submarines.

While the testimony is both fascinating and enraging, I am afraid it is all old hat. We in the Congress have grown accustomed to watching major weapons contracts undergo a series of startling changes. The Trident submarine—like the Army's XM-1 tank and advanced attack helicopter—will end

up costing millions of dollars more per copy, will be deployed 2 or more years later than scheduled, and will perform considerably less effectively than original specifications demand.

Before yesterday's hearing began, I took some time to review the transcript of a 1978 Joint Economic Committee hearing that focused on problems with the Trident program. For a moment I thought I was reading this year's transcripts.

It is obvious that we in the Congress have learned nothing in helping to oversee military procurement contracts. I intend to take steps within the Armed Services Committee to completely overhaul our procurement systems. We must not allow the military to be exempt from our efforts to cut costs and eliminate governmental waste.

PUBLIC LAW GIVES EXPRESSION OF CONGRESSIONAL INTENT THAT THE UNITED STATES SHOULD ACT IN EL SALVADOR

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, in recent days we have heard many expressions from within this Congress of dismay about the Reagan administration's policies toward El Salvador. One of our distinguished committee chairmen has referred to efforts to obtain funding for El Salvador as a commitment akin to the Gulf of Tonkin Resolution. It is as though, Mr. Speaker, Congress had never endorsed the policies now being implemented in that country.

But in just last year's foreign aid authorization bill, Mr. Speaker, the Congress said this:

> It is the sense of the Congress that the United States should support those traditionally faithful allies of the United States which are responsible members of the Organization of American States, including Guatemala, El Salvador, Costa Rica, Nicaragua, Panama, and Honduras, against terrorism and external subversion.

Mr. Speaker, it is not unusual for Congress to refuse to accept responsibility for the policies that we demand, but Public Law 96-533 gives the Reagan administration a clear expression of congressional intent that the United States should act in El Salvador. That expression of congressional intent was signed into law just 3 months ago.

There are a lot of rocks being thrown inside a glass house.

JEWISH HERITAGE WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution—House Joint Resolution 155—to authorize and request the President to issue a proclamation designating May 3 through May 10, 1981, as "Jewish Heritage Week," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. ADDABBO. Mr. Speaker, reserving the right to object, and I shall not object, I rise to strongly urge my distinguished colleagues present today to join me in support of House Joint Resolution 155, to authorize and request the President to issue a proclamation designating May 3 through May 10, 1981, as "Jewish Heritage Week," a resolution I have sponsored for the second year.

Before I proceed, however, I would like to commend my good friend and respected colleague from New York (Mr. GARCIA) for his efforts in bringing this measure to the floor today.

What is Jewish Heritage Week? Simply put, it is "understanding." It is a time for the people of this country to explore the culture, traditions, and history of the Jewish community as they relate to the growth of our country as a whole. Previous year celebrations in New York have helped to strip away many of the half-truths and suspicions one ethnic group may have had toward another. Not surprisingly, one of the major successes of this educational venture is a growing awareness of how similar the history of one ethnic group is to another. We have shared many of the same trials and tribulations, and have faced like successes and failure. Yet even so, each group has made its own unique contributions to the American spirit.

In this sense, Jewish Heritage Week is not just for Jewish people. This year's theme in New York, "Free To Be You and Me," clearly shows how important it is for all of us to understand that though there are differences in our cultures and beliefs, these only serve to underscore the uniqueness of our country as a land where people of diverse backgrounds and interests can live and work as one Nation.

Today we have 236 cosponsors, Mr. Speaker, who have joined this bipartisan effort. They represent various localities who will hopefully contribute to this growing effort come May. We welcome the support of others to continue this tradition for the second year.

Mr. Speaker, I withdraw my reservation of objection.

● Mr. BIAGGI. Mr. Speaker, I rise as a cosponsor and strong supporter of House Joint Resolution 155, requesting the President to designate the week of May 3 to 10, 1981, as "Jewish Heritage Week."

The significance of this event is best understood if we take the time to reflect on the two most important ideals we Americans stand for—peace and freedom. Our Nation was conceived from these ideals and it has flourished largely because they are valued so highly by all those who cross our shores.

I have long advocated the need to better understand the uniqueness of a particular people so that we can learn and appreciate how much we really have in common—"Jewish Heritage Week" will provide us with such an opportunity.

The Jews have long been a persecuted people, and yet, through their suffering they have developed a great strength and a genuine appreciation of what peace and freedom really mean. As a result, the Jewish community has made significant contributions to our great Nation, making their experience an inspiration to all people.

In and around the week of May 3, a number of major events are celebrated by the Jewish community. They include Passover, the anniversary of the Warsaw ghetto uprising, Israeli Independence Day, and Jerusalem Day. By better understanding what these days mean to the Jewish community, we can better appreciate the true value of our Nation's rich ethnic heritage.

While many of these celebrations seek to focus on a significant event from the past, there is an important date on the Jewish calendar directing attention to a current tragedy that has meaning to us all. On Sunday, May 31, the Greater New York Conference on Soviet Jewry will sponsor for the 10th straight year, Solidarity Sunday, a day when Americans traditionally signify their unity with Soviet Jewry. The rally takes place in New York City, with about 100,000 people from around the country participating in a number of activities to express American solidarity with Soviet Jews. I am proud and privileged to have introduced a resolution, House Resolution 85, expressing congressional support for Solidarity Sunday. Over 80 of my colleagues have already joined me as cosponsors.

If there is one common trait found among us all, it is that we each have a different proud heritage. Like the Jewish community, we are all proud of our heritage and anxious for others to share in that experience. Like the Jewish community, we have all made special and significant contributions to this great Nation as a result of that heritage. Like the Jewish community, we are all in pursuit of two common goals—peace and freedom.

I urge my colleagues to join me in supporting Jewish Heritage Week, as a responsible and effective means of promoting those ideals.●

● Mr. LENT. Mr. Speaker, I rise to join my colleagues in support of House Joint Resolution 155, designating the week of May 3 through May 10 as "Jewish Heritage Week." As a cosponsor of this resolution, it is my hope that the resolution will enjoy the strong bipartisan support it attracted last year, when it was first proposed to this body.

Jewish Heritage Week commemorates the anniversary of many outstanding occasions within the Jewish culture, and it is particularly appropriate that it be celebrated at this time of the year. The months of April and May contain several significant dates in Jewish history, including Passover, Israeli Independence Day, the anniversary of the Warsaw ghetto uprising, Jerusalem Day, and Solidarity Sunday for Soviet Jewry. Beyond the recognition of such significant dates in Jewish history, Jewish Heritage Week provides a welcome vehicle for strengthening our appreciation and understanding of the tremendous richness of culture and tradition which the Jewish heritage has given to the world.

I urge my colleagues to unite in support of this resolution, and trust that it will be as successful this year as it was when approved 1 year ago.●

● Mr. FORD of Michigan. Mr. Speaker, I rise to express my support for House Joint Resolution 155, which I cosponsored, designating the week of May 3 through May 10, 1981, as "Jewish Heritage Week."

It is ironic that we should consider this resolution on the very day that another resolution is being introduced to make Raoul Wallenberg an honorary citizen of the United States. Through his great humanitarian efforts, 100,000 victims of Nazi terrorism in World War II Hungary were saved—many of whom were Jewish. Many of those saved are now productive citizens of the United States.

The purpose of Jewish Heritage Week is to alert the people of the United States to the contributions of the Jewish people and to remind us of the struggle the Jews have endured for centuries. I hope we will all continue to benefit from the contributions of American Jewry to our Nation. I am proud to be associated with this resolution.●

● Mrs. COLLINS of Illinois. Mr. Speaker, today the House will consider House Joint Resolution 155, a resolution which designates May 3 to 10, 1981, as "Jewish Heritage Week." This resolution calls upon State and local government agencies and interested organizations to observe the week of May 3 with appropriate activities.

Jewish Heritage Week commemorates the anniversary of many significant dates in Jewish history. As a cosponsor of House Joint Resolution 155, I call upon my colleagues to pass this resolution to continue appreciation and recognition to the culture, traditions, and history of the Jewish community and their contribution to American society.●

Mr. GILMAN. Mr. Speaker, I rise in support of the resolution—House Joint Resolution 155—now under consideration and I thank the gentleman from New York (Mr. ADDABBO) for his efforts to bring it to the floor today.

Mr. Speaker, the week of May 3 to 10, 1981, embraces a number of historical anniversaries of significance to the Jewish people—Passover, the anniversary of the Warsaw ghetto uprising, Israel's Independence Day, Solidarity Sunday for Soviet Jews, and Jerusalem Day—the anniversary of the reunification of Jerusalem in 1967. This is an appropriate time for the Jewish people to reflect with pride on their unique heritage and an opportunity for the American community to see what values and lessons they can take from that heritage.

I would like to call to the attention of my colleagues a rarely occurring event that will come between today's vote and the beginning of the events more commonly associated with Jewish Heritage Week—but an event which has special significance in this area—the once-in-28-year event of "birkat hachamah"—the blessing of the Sun, which will occur on April 8. In that ceremony, God is thanked and blessed for the creation of the Sun, an object of which we are more and more conscious these days. This event occurs every 28 years in observance of a cycle ordained in the Talmud. This year, many congregations will be gathering outdoors, as is the custom, and, because of the energy crisis of recent years, they will be reflecting on our dependence on the energy of the Sun, and how we can use it more extensively to help us reach our goals of energy self-sufficiency and the improvement of our standard of living. In Washington, similar meetings—many, of course, of a purely religious nature—will be taking place around the world at dawn on the 8th, as the Jewish people maintain the traditions of their heritage which even today have renewed meaning and importance.

Mr. Speaker, I ask unanimous consent that an excerpt from an article on "Birkat Hachamah" by Rabbi Bernard M. Zlotowitz be reprinted in the RECORD at this point, along with the text of House Joint Resolution 155, establishing Jewish Heritage Week:

In a ceremony known as Birkat Hachamah (blessing of the sun), God is praised for creating the luminaries and maintaining them in an orderly fashion. ("Blessed are You, O Lord our God, King of the Universe, who makes the work of creation.") This ceremony was last recited in 1953, and this year it will reoccur on Wednesday, April 8. The service is usually conducted outside the synagogue, early in the morning, and in the presence of a large assembly, because as it is written: "In the multitude of people is the King's (God's) glory" (Proverbs 14:28). However, if a person is unable to recite it publicly, he or she may do so privately.

The origin of this observance is based on a statement in the Babylonian Talmud (Berachot 59b): "Our rabbis taught: He who sees the sun at its turning point (the sun has four turning points which mark the beginning of the four seasons), the moon in its power (spring equinox), the planets in their orbits, and the signs of the Zodiac in their orderly progress (procession of the equinoxes) should say: 'Blessed be He who has wrought the work of creation.' And when does this happen? Abaye said: 'Every twenty-eight years when the cycle (the big or solar cycle) begins again and the Nisan (spring) equinox falls in Saturn on the evening of Tuesday, going into Wednesday.'" (The sun and moon were created on the fourth day, and therefore the beginning of the twenty-eight year cycle is always on a Wednesday which begins at the vernal equinox on Tuesday evening at 6:00 p.m.).

● Mr. BROOMFIELD. Mr. Speaker, increasingly, Americans are reaffirming their commitment to the basic societal and familial values and their fundamental belief in God. In times of global turbulence and a difficult economic situation at home, we all must turn to inner sources of strength and sustenance.

It is fitting, therefore, that we in Congress request the President to designate May 3 through May 10 as Jewish Heritage Week to recognize the generous inheritance we Americans have enjoyed from Jewish culture, tradition, and beliefs. The Jewish heritage, woven deeply into the fabric of America, has contributed significantly to the society of this country through the strong Jewish belief in God, closeness of family, and sense of service to community. Outstanding individual Jews are too numerous to mention; one can only say that in education, culture, science, government, business, medicine, civil rights, or in any other field, our country would have been far poorer without their contributions.

We are urging the President to mark the first full week of May as Jewish Heritage Week because that period falls close to dates which are important not only to Jews everywhere, but to all of us in the United States—Passover, the anniversary of the Warsaw ghetto uprising, Israeli Independence Day, Jerusalem Day, and Solidarity Day for Soviet Jewry. These days commemorate the faith, the hope, religious belief, the inner strength, and moral and physical courage which not only inspire us, but which reinforce our beliefs and our determination to contribute to American society.●

● Mr. MOFFETT. Mr. Speaker, this is an appropriate time for the House of Representatives to establish Jewish Heritage Week.

Recently, many Jews celebrated the festival of Purim, commemorating the Old Testament story of how Esther saved her people and her people's herit-

age from death by the Persians in the sixth century B.C. Purim is a time of celebration, marking the continuation of Jewish culture.

In keeping with the celebrative mood of this holiday, it is befitting that we establish a Jewish Heritage Week to take place May 3–10, 1981. The activities, ceremonies, and programs will not only dramatize Jewish history and traditions, but will also highlight the tremendous contributions which the Jewish people have made to the world community. How much further our culture is enriched by the endeavors of just a few, such as Albert Einstein, Issac Bashevis Singer, Leonard Bernstein, Sigmund Freud, and Anatoly Shcharansky.

I urge that this resolution be adopted.●

● Mr. CARMAN. Mr. Speaker, I wish to add my strong support to House Joint Resolution 155, which would set aside the week of May 3–10, 1981, as Jewish Heritage Week. It is a resolution I cosponsored which I expect to win overwhelming approval by this House.

It is appropriate that this Nation should commemorate Jewish Heritage Week at this time of year. The months of April and May contain such significant dates in Jewish life as Passover, the anniversary of the Warsaw ghetto uprising, Israeli Independence Day, Solidarity Sunday for Soviet Jewry, and Jerusalem Day.

Jewish Heritage Week began, on a yearly basis, in 1977. I feel it has led all Americans to a greater appreciation and recognition of the culture, traditions, and history of this country's Jewish community and of the impact of Jews in American history.

Mr. Speaker, every week we read in the papers of new acts of anti-Semitism both at home and overseas. We can help counter that detestable activity by focusing the spotlight of truth on the great contributions Jews have made to American life and culture.●

● Mr. MINISH. Mr. Speaker, I rise to express my enthusiastic support for the enactment of House Joint Resolution 155, designating the week of May 3–9 as "Jewish Heritage Week." It is most appropriate for us to call attention to the significant contributions made by the Jewish people to our Nation as well as to the rest of the world. For at this time of year, dates of major importance such as Passover, the anniversary of the Warsaw ghetto uprising, Israeli Independence Day, Solidarity Day for Soviet Jewry, and Jerusalem Day appear on the Jewish calendar.

Jews were among the first settlers when our Nation was in its infancy, and they have made contributions in every facet of American life, from trade unionism to philanthropic and scholarly endeavors to athletics and the arts. Not only is this week an occasion for the recognition of outstanding achievements, but also it is a time for reflection and for learning, to further our understanding of and appreciation for Jewish history, culture, and tradition. It is an opportunity to reflect on the struggles and persecution suffered by Jews in the Soviet Union and elsewhere, renew our dedication to the cause of human rights, and reaffirm our commitment to the independence of the State of Israel.

By setting aside this week as Jewish Heritage Week, we are giving recognition to our own country's long-held commitment to the melting pot, which we value so highly; therefore, I urge you, my fellow colleagues, to join me in supporting this important resolution.●

● Mr. DERWINSKI. Mr. Speaker, I rise in support of House Joint Resolution 155 designating May 3 through May 10, 1981, as "Jewish Heritage Week." By doing so, we as Americans are recognizing the history of the Jewish people and their contribution to our American way of life.

This year, the month of May will commemorate events which represent great joy and sorrow for the Jewish community and is thus a fitting time for the people in the United States to reflect on the role of Americans of the Jewish faith in the history and heritage of our country. As Americans of the Jewish faith ponder the meaning of Passover, the Warsaw ghetto uprising, Israel Independence Day, Solidarity Sunday for Soviet Jews, and Jerusalem Day, Jewish Heritage Week gives all Americans the chance to reflect and learn of the significant achievements that the Jewish religion, history, and culture have made to the world and, in particular, to the United States.

Mr. Speaker, by supporting House Joint Resolution 155 we will be expressing our gratitude to the Jewish community for their invaluable contribution to our society and our Nation.●

● Mr. GREEN. Mr. Speaker, I am very pleased to speak in support of House Joint Resolution 155, a resolution to declare the week of May 4 as national Jewish Heritage Week. Jewish Heritage Week originated in New York City 5 years ago in an effort to promote an understanding of Jewish culture and history as part of an appreciation of the myriad of racial, religious, and ethnic groups in New York City and in the Nation. I believe it is important to recognize continually that many nations and cultures have contributed significantly to the building of our Nation, and I feel that the declaration of a national Jewish Heritage Week is an important part of that process.

I was a cosponsor of a similar resolution last year when the first national resolution was passed which encouraged the celebration of this week all over the Nation under the theme of "Living Together, Learning Together." Plans for carrying out this year's theme, "Free To Be You and Me," are now underway, and passage of this resolution will greatly aid in expanding the celebrations nationwide.

As a New Yorker, I am particularly proud of the fact that this idea originated in my own city. This has been a project of the New York Jewish Community Relations Board, located in my own 18th Congressional District, in cooperation with the Board of Jewish Education and the New York City Board of Education. Jewish Heritage Week features concerts, contests, specially prepared school lesson plans on Jews and history and other activities in order to promote intercultural understanding. The events are nonsectarian and voluntary.

I am pleased to be a supporter of this resolution and to speak in its favor. I am hopeful that declaration of national Jewish Heritage Week will be an incentive for all to learn more about not only Jewish history and culture, but also every other ethnic, racial, or religious culture which has made its rich contribution to our Nation and our lives.●

● Mr. COURTER. Mr. Speaker, I rise in support of House Joint Resolution 155 designating May 3 through May 10, 1981, as "Jewish Heritage Week."

For over 3,000 years, the Jewish people have left a major impact on the societies in which they have lived. Equally so in the more than 200-year history of the United States, Americans of Jewish faith have made important contributions in all areas of business, science, culture, and politics, and the Judeo-Christian heritage collectively has helped mold the United States. By proclaiming this week as Jewish Heritage Week we are recognizing the weight of those contributions and the significant role the Jewish community has played in the history of our Nation.

I urge my colleagues to join me in supporting this resolution.●

● Mr. YATES. Mr. Speaker, it is a pleasure to rise in support of Jewish Heritage Week. Our Nation's most enduring strength is the vitality, the magnificence, of our heritages. These heritages are unique in their richness and diversity.

Today, we rise in support of Jewish Heritage Week, May 3–10. It is a particularly appropriate time, for April and May are months which reflect the greatness and complexity of this heritage. We are moved by the inspiration and celebration of the Passover saga, by anniversaries commemorating the courage of the Warsaw ghetto freedom fighters and the fortitude of the Israeli pioneers, by Solidarity Sunday in recognition of the continuing plight of Soviet Jews. We appreciate this

heritage in all its complexity, we cherish it, and we look forward to a joyous observance across the Nation.

The Jewish heritage is one of the countless heritages that contribute to our vigor as a nation, to our life and vibrance. To life—Le Chaim.●

● Mr. WIRTH. Mr. Speaker, I rise in support of the resolution offered by the gentleman from New York (Mr. ADDABBO) proclaiming May 3 through May 10, 1981, as "Jewish Heritage Week." Today we may enable this educational observance to continue for a second year, and help establish it as an American tradition.

At no time in our history as a nation has it been more important that we undertake to foster greater understanding between our religious and ethnic groups. Intolerance threatens the unity and integrity of our country, and obscures our common goals and purposes. Jewish Heritage Week, by promoting an appreciation of Jewish history and culture, exemplifies the efforts at mutual understanding that we in Congress should endorse.

We are in the midst of a season of remembrance for the Jewish people. In the next 2 months, Jews all over the world will experience joy on the celebration of Passover, pride on the date of Israel's independence, resolve on Solidarity Sunday for Soviet Jewry, and defiance on the anniversary of the Warsaw ghetto uprising. That we should better understand these emotions, and recognize the numerous contributions of the Jewish people to our Nation and our society, I urge my colleagues to give their support today to House Joint Resolution 155.●

● Mr. ANNUNZIO. Mr. Speaker, I was glad to join my colleagues in cosponsoring House Joint Resolution 155, which was introduced by my good friend from New York, the Honorable JOSEPH P. ADDABBO, to authorize and request the President to issue a proclamation designating May 3 through May 10, 1981, as "Jewish Heritage Week," and I am delighted today to join my colleagues in the House in paying tribute to the outstanding contributions that Jewish Americans have made to the vitality and greatness of the United States.

Jewish Heritage Week will be a reminder to all Americans of the valiant stand which the Jews have always made in the face of oppressive religious discrimination and persecution. During this special observance, it will be appropriate for us to join together in renewing our efforts to insure religious freedom for the Jews and for all peoples who are being harassed and persecuted in practicing their religion.

My own city of Chicago is a city of immigrants, and our entire Nation is a beautiful and creative mosaic of grand contributions made by each immigrant group. The designation of "Jewish Heritage Week" is a tribute to the role of Jewish immigrants in making our country strong and free, and Americans of Jewish heritage continue to carry forward the new-world tradition of determination, hard work, and courage. I urge the support of my colleagues for this resolution.●

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 155

Whereas the Congress recognizes that an understanding of the heritage of all American ethnic groups contributes to the unity of our country; and

Whereas intergroup understanding can be further fostered through an appreciation of the culture, history, and traditions of the Jewish community and the contributions of Jews to our country and society; and

Whereas the months of April and May contain events of major significance in the Jewish calendar—Passover, the anniversary of the Warsaw Ghetto Uprising, Israeli Independence Day, Solidarity Sunday for Soviet Jewry, and Jerusalem Day: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating May 3 through May 10, 1981, as "Jewish Heritage Week" and calling upon the people of the United States, State and local government agencies, and interested organizations to observe that week with appropriate ceremonies, activities, and programs.

The joint resolution was ordered to be engrossed and read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL DIABETES WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 84) designating the week of October 4 through October 10, 1981, as "National Diabetes Week," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. FORSYTHE. Mr. Speaker, reserving the right to object, I do so just to have an opportunity to express my gratitude to the committee for reporting this resolution.

Mr. Speaker, today the House takes up House Joint Resolution 84, legislation commemorating the week of October 4-10, 1981, as National Diabetes Week.

For the past 2 years, Congress has enacted a National Diabetes Week and it is especially appropriate that we should do so again this year. During the past few years, researchers have made significant breakthroughs in diabetes research. It is my hope that the increased public awareness of this disease will stimulate interest which will ultimately lead to a cure for diabetes.

While most Americans have some general knowledge about diabetes, not enough of us understand what a serious and deadly disease it is. Ten million Americans suffer from diabetes and 300,000 Americans die each year as a result of it. Diabetes is the third leading cause of death by disease in this country, after heart attack and cancer, and it often leads to stroke, kidney damage, gangrene, nerve damage, and blindness.

Diabetes has an impact on our economy, as well. Nearly $7 billion is lost annually through unearned wages, health care costs, and disability payments.

I am proud to be the sponsor of this commemorative resolution and I hope that every Member of the House will join with me today in voting in favor of House Joint Resolution 84. Our recognition of this disease can make a difference for the millions of Americans who suffer from diabetes and those who will be its victim in the future.

Mr. Speaker, I withdraw my reservation of objection.

● Mrs. COLLINS of Illinois. Mr. Speaker, today, unanimous consent will be requested to consider House Joint Resolution 84. A resolution I cosponsored, which designates the week of October 4 to October 10, 1981, as "National Diabetes Week."

The American Diabetes Association, Washington, D.C., affiliate, estimates that 10 million people in the United States are afflicted by diabetes. This figure increases by 6 percent a year.

Diabetes is the third leading killer in the United States, a leading cause of blindness, a major cause of heart disease, nervous disorders, and strokes.

Accordingly, the American Diabetes Association advises, along with an annual checkup, that a blood-sugar check be done. I certainly concur with such advice and urge all Americans, particularly those with a family history of diabetes, to get a sugar-blood check.●

● Mr. COURTER. Mr. Speaker, I rise in support of House Joint Resolution 84 designating the week of October 4-10, 1981 as "National Diabetes Week".

Diabetes is a major contributing factor to heart attacks, stroke, kidney failure, and vascular—blood vessel—disease. Significantly, diabetes is also the leading cause of new cases of blindness in the United States.

Approximately 10 million Americans are affected by diabetes. Diabetes occurs in twice as many women as men and is found more frequently among blacks and the lower income population.

It is estimated that diabetes is the fifth leading cause of death by disease in the United States.

Exciting research on all aspects of diabetes is now being conducted at medical institutions throughout the United States and abroad. The Association of Heredity, Viral Infections and Immunology has provided new leads in the treatment and ultimate prevention of diabetes.

By designating the week of October 4-10 as National Diabetes Week we are encouraging and supporting the efforts of medical institutions and foundations in educating the public and our Nation for continued research and progress against diabetes.●

● Mr. MINISH. Mr. Speaker, I rise in support of designating the week of October 4 through October 10 as National Diabetes Week. Unlike some of the ceremonial days and weeks which Congress sometimes designates, National Diabetes Week has a very practical purpose of public information which is clearly needed. Not only is there widespread ignorance among the general population about the nature of this disease, but even many of its victims are unaware of the encouraging strides in diabetes research and treatment of recent years. A national week will give the local diabetes groups around the country an opportunity to spread the word about their good work among those who need their help as well as those who can contribute to their efforts.

It is appropriate that Congress make this designation, since we have helped in a demonstrable way to make headway against this disease. I am proud to have worked to initiate the massive Federal push to stimulating and coordinating diabetes research, which was back in 1974. You can look at the Labor-HEW appropriations hearings for 1980 to learn something about the great advances coming directly from this Federal effort, a program which has literally saved lives. For instance, we are now getting the first results from the center for disease control demonstration projects against diabetes in 10 States. These programs aim over 5 years to reduce by half the number of excess hospital days among diabetics; to halve the deaths of juveniles from diabetic coma; and to reduce by 10 percent lower-extremity amputations among diabetics. Since the pilot project only started late in 1977, final results are not available yet, but I understand that early results suggest that we will meet or exceed these goals. When you consider that diabetes affects a 10th of our people, killing over 35,000 and hurting our economy by perhaps $10 billion annually, I think that you will agree that our program, which has produced such dramatic results on a relatively modest budget, represents money well spent.

Mr. Speaker, I am pleased to work on the local level with the Union Chapter of the Juvenile Diabetes Foundation up in New Jersey. I can truly testify that designating "National Diabetes Week" will have a very practical, beneficial effect on their work of public education. I am happy to support House Joint Resolution 84, and I urge all my colleagues to join me.●

● Mr. ADDABBO. Mr. Speaker, I rise in strong support of House Joint Resolution 84, to designate the week of October 5-11, 1981, as "National Diabetes Week." I commend my distinguished colleague from New Jersey, Mr. FORSYTHE, for taking the time and initiative to bring the subject of diabetes awareness to the attention of the Nation and to the House. National Diabetes Week is an important 7 days to the millions of Americans who suffer from this dreaded disease, as well as to the countless Americans who understand so little about its nature and scope.

It is obvious that there would not be the necessity of having to designate a week for this disease if millions of Americans were not in serious peril. But they are. Too few people have any idea that this disease is the third leading killer in America today. Too few people are aware that the leading cause of blindness in the United States is diabetes, and not enough people have learned that it is a major cause of stroke, heart disease and various other cardiovascular disorders.

We have always been a country that liked a good fight. Through time and energy spent on research we have conquered other crippling diseases, battling them to the point where they can cripple and kill no more. There is no reason why diabetes cannot be beat. What is needed is to educate the public, and create an awareness of just what diabetes is, who it affects, the damage it inflicts upon the human body, and what is needed to find a cure. National Diabetes Week is a way to do just that. Last year the designation of a week to bring this matter to the attention of the American public was a huge success nationwide. People learned that diabetes was not just a disease that someone else was afflicted with. Rather, they learned that diabetes can just as easily strike a family as it can strike a neighbor. What came out of those 7 days last year was that more research is needed to find a cure. That is why we need National Diabetes Week. We need it to get the word across to millions of Americans who are unaware what a tragic menace diabetes is. If we do not help spread the word, this is one battle I fear, we will not emerge victorious from.●

● Mr. LAFALCE. Mr. Speaker, I am proud to speak in favor of House Joint Resolution 84, a resolution which would designate the week of October 4-10, 1981, as "National Diabetes Week".

I am very personally concerned about the enormous impact this disease has on our Nation and its people and so have agreed to serve as 1981 voluntary fundraising chairman for the Western New York Affiliate of the American Diabetes Association. This issue is of such importance that I believe that designation of a special week will serve an important public purpose: To inform our fellow Americans of the risks, symptoms, and available treatments for this disease.

Approximately 100,000 western New Yorkers suffer diabetes, as do 10 million other Americans. It is a disease that is directly responsibile for over 300,000 deaths every year—making it our country's third leading cause of death, trailing only cardiovascular disease and cancer.

Diabetes is the leading cause of adult blindness in the United States, and its many devastating, sometimes fatal, complications include kidney and heart disease, diabetic neuropathy, and stroke. Disproportionately, it strikes the aged, the poor, and the black.

Economically, it is wreaking havoc. Over $5.3 billion annually is lost through wages and health care costs and disability payments tied directly to diabetes. This, of course, does not take into account the physical pain and suffering faced by its victims and the mental anguish experienced by a victim's family and friends.

It is not a disease that we have under control. The prevalence of diabetes is increasing by 6 percent annually, a rate which means that a child born today in the United States faces a one-in-five chance of contracting the disease if he or she lives to age 70.

There is reason for hope, Mr. Speaker. Although modern science and medicine have yet to find a cure for this disease, the use of insulin and a controlled diet can help a victim lead a normal, productive life. But insulin is not a cure and it does not check the progress of complications. Perhaps most critical, ignorance about the disease is its best ally. Diabetes reduces life expectancy approximately 30 percent from the time of onset, and every month and year that it continues without treatment is time that cannot be recaptured through medication. Hence, learning the danger signs—symptoms—of the disease, is crucial to the future health and well-being of a victim.

While the causes and means of preventing the disease are unknown, the symptoms are fairly easily understood by anyone who has been briefly informed of them. I hope that designations of a national week will serve to focus attention on the disease, arouse public curiosity regarding symptoms

and treatments, and raise the public's understanding about diabetes, and the need for continued funding.

The American Diabetes Association and its local affiliates have been carrying the torch in the effort to inform the public for many years. Through patient and public education, community service and detection programs and other forms of assistance to the victim and the public at large, this private, not-for-profit organization is a leader at both the national and local level. It deserves our praise and—because of their independent status—our financial support. We in Congress have repeatedly increased diabetes research funding and in so doing have been responsible for the revolutionary breakthrough achieved toward the cure, prevention, and control of diabetes.

Thus, another key aspect of this House joint resolution is to inform the public of the need for greater support in efforts to combat the disease. Funds are needed to continue the current outreach programs which inform victims of treatment, teach the public of diabetes symptoms, and provide research into the causes and cures of this disease. The inability of major research centers and organizations to raise funding needed for long-term projects on diabetes is a problem that might very well be remedied if more people understood the seriousness of the disease, the need to determine its origins, and the dramatic progress made through research toward realizing our goals for combating this disease.

Mr. Speaker, I believe that the people of western New York and the entire Nation will benefit greatly from National Diabetes Week. I am proud to have been a cosponsor of this resolution and a supporter of efforts to combat this dreaded disease.●

● Mr. BIAGGI. Mr. Speaker, as a cosponsor of this resolution, I rise in strong support of House Joint Resolution 84, to designate the week of October 5–11, 1981 as "National Diabetes Week."

Diabetes is a disease which afflicts nearly 10 million Americans and ranks third, behind cancer and cardiovascular disease, as the leading killer disease in this Nation. Of these 10 million Americans, nearly 1.5 million are juvenile diabetics or insulin-dependent. Of even greater concern is the fact that diabetes often leads to heart attack, stroke, kidney damage, gangrene and nerve damage. It has fearfully become the new leading cause of blindness, with diabetics showing a rate of blindness 25 times higher than nondiabetics.

By proclaiming National Diabetes Week, we can hope to encourage further efforts to find a cure for this malady which has nearly 300,000 lives annually. Our efforts to stimulate an end to this dreaded disease become all the more critical when one considers the economic impact of diabetes: this disease drains the American economy of $7 billion annually, through wages lost and costs for health care and disability payments.

I was proud to have cosponsored this legislation last year when one considers the achievements that have been made in the past 12 months. Researchers have developed new methods of providing insulin to diabetics and have even produced human insulin using recombinant DNA techniques which may ultimately provide an unlimited supply of insulin which will be cheaper and possibly even more compatible. Recent research has also located possible genetic markers for diabetes which may make it possible to identify some high-risk candidates before they develop the disease.

In light of this dramatic and heartening activity in order to work toward a total elimination of this destructive and debilitating disease, I urge my colleagues to join us in supporting this worthy resolution so that we may continue to work to help the millions of Americans who suffer from diabetes and to eliminate its effects completely for the next generation.●

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution as follows:

H.J. RES. 84

Whereas diabetes kills more Americans than all other diseases except cancer and cardiovascular diseases; and

Whereas ten million Americans suffer from diabetes and $5,300,000,000 annually are used for health care costs, disability payments, and lost wage costs due to diabetes; and

Whereas a national awareness of the diabetes problem may stimulate interest and concern leading to increased research and eventually a cure for diabetes: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 4 through October 10, 1981, is designated as "National Diabetes Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

NATIONAL RECOGNITION DAY FOR VETERANS OF THE VIETNAM ERA

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution—H.J. Res. 182—to designate April 26, 1981, as National Recognition Day for Veterans of the Vietnam Era, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. BONIOR of Michigan. Mr. Speaker, I reserve the right to object. Mr. Speaker, I will not object. I reserve the right to do so to make a few comments on this issue.

I want to take this opportunity to express my appreciation to the gentleman from Michigan (Mr. ALBOSTA), the gentleman from California (Mr. PANETTA), and the gentleman from New York (Mr. GARCIA), for their work on this issue.

I rise in support of the resolution and hope we can pass this and remind the American people of the debt of gratitude that we owe those people who served their country.

For over 200 years, this Nation revered its warriors who joined battle against those who sought, through force, to alter our chosen way of life. Today, places like Yorktown, Verdun, and Omaha Beach are objects of pilgrimages for those who never experienced their horror or their glory, yet feel a sense of intangible gratitude to those who did. The veterans of those conflicts, while experiencing a wide disparity in readjustment benefits, all received the most valuable yet most intangible of benefits: The almost unanimous gratitude and adulation of their countrymen.

On August 7, 1964, the House of Representatives, presumably with the overwhelming support of the American people, voted 416–0 in favor of the Gulf of Tonkin Resolution which gave the President a free hand for military action in Southeast Asia. Both the Congress and the country have since been considerably less enthusiastic in their support for those they committed to the Vietnam war.

While deploring that apathy, I can understand it. Vietnam was a war nobody wanted, in a land nobody knew, fought against a foe nobody recognized, for a cause nobody understood. It was a war that lacked clarity of ends or purpose, and in the end, it was, characteristically, not lost, but unwon.

According to General Westmoreland, the soldiers of this conflict were equal, or superior, to soldiers of past conflicts. They were generally better educated, better trained, and had a far lower battlefield rate of breakdown or desertion than their counterparts of World War Two. The house-to-house battle for Hue, the murderous shelling absorbed at Khe Sanh tested the courage of our soldiers no less than the battles of our previous conflicts.

But if the combatant was the same, the combat was not. As Phil Caputo wrote in "A Rumor of War:"

> The Vietnam war was mostly a matter of enduring weeks of expectant waiting and, at random intervals, conducting vicious manhunts through jungles and swamps where snipers harassed us constantly and booby traps cut us down one by one . . . . without a front, flanks, or rear, we fought a formless war against a formless enemy who evaporated like the morning jungle mists, only to materialize in some unexpected place. . . most of the time nothing happened but when something did, it happened instantaneously and without warning.

This was a guerrilla war that the United States attempted to fight conventionally and the paranoia and frustration of that situation was predictable.

Returning servicemen desperately needed the support of their countrymen upon their return to reconcile the questions in their own minds and to provide them with a feeling of honest service. Instead, they returned one-by-one, isolated and confronting a country that "never went to war." Congressman JOHN P. MURTHA stated it succinctly:

> They found discord and acrimony. They found criticism coming from some of our highest officials . . . they saw very little sacrifice at home and only the immediate family showing a concern for the individual who was away in the fighting force.

They went away feeling they were performing honest service for their country. They risked their lives, saw close friends ripped apart and maimed, then returned to a government which disclaimed responsibility and people who asked them how many children they had killed. This was devastating. Whether one agreed with the war or not—and I was one who did not—these people deserve our earnest attention lest they become the ultimate victims of the Vietnam war.

Let us examine some of the statistics on the Vietnam veteran. There were roughly 8.5 million people who served during the Vietnam era, 2.8 million of which actually served in Vietnam. The overwhelming majority of these have successfully adjusted to civilian life but of those who have not:

The overall suicide rate of Vietnam era veterans is now about 23 percent higher than that of nonvets of the same age. (VA)

An estimated 500,000 Vietnam veterans are in criminal custody—jail, parole, probation, or pretrial release. Black veterans are twice as likely to be incarcerated as black nonveterans. (AP)

Of those married before Vietnam, fully 38 percent were separating or divorcing 6 months after their return.

One Vietnam vet in three has recurring nightmares.

And 55 percent of all outpatients in the VA drug treatment program are Vietnam vets.

I do not need to go on but I am going to because the seriousness of this problem has to be hammered home.

John Wilson, a Cleveland State University psychologist, found in his study that among Vietnam veterans in the Cleveland area:

First, 48 percent of the blacks and 39 percent of whites were unemployed;

Second, 41 percent of both groups had alcohol problems;

Third, 59 percent of blacks and 67 percent of whites had drug problems; and

Fourth, 45 percent have poor family relations.

Mr. Speaker, I rise in support of the gentleman's resolution and hope that we can successfully pass this resolution to remind the American public once again of the present situation of Vietnam veterans.

Exactly 3 years ago this week I appeared before the House Budget Committee to advocate creation of a substantively endowed psychological readjustment and alcohol and drug abuse program for Vietnam veterans. I find that 3 years later, after 1 very successful year of operations, I find myself on the floor of this House advocating for its survival.

As we all know, the Reagan administration sent to the Hill a revised series of budget cuts, including a substantial amount to be taken from the Veterans' Administration in contradiction to previously announced statements that the VA would not be effected.

While I have always been of the opinion that in the $21 billion budget of the Veterans' Administration funds could be better used, I was astonished to learn that targeted for extinction were the minute and tiny programs recently created to assist the Vietnam veteran, totaling $67 million.

The programs destined for obsolescence by the Reagan administration include such important programs as the VA's Operation Outreach, which funds 91 readjustment counseling centers around the country. In my view, I do not feel that there has been a VA program which has done so much for so many for so little cost.

Another program destined for elimination is the disabled veterans outreach program, again, a program which was just created last year. This legislation allows the VA to provide services and assistance to service-connected disabled veterans to achieve maximum independence in daily living, and to the extent possible, to become employable and obtain and maintain suitable employment.

I would further urge the Veterans' Committee to mandate the commitment of funds to a serious health problem deriving from exposure to agent orange, a chemical defoliant used in Vietnam. Dioxin, a contaminant of agent orange, is one of the most lethal substances known to man. The use of the herbicide—also known as 2,4,5-T—was banned 2 weeks ago after a sprayed area in Oregon showed an alarmingly high rate of miscarriages. There is also evidence which suggests that the substance may induce birth defects, cancer, skin eruptions, and neurological disorders. The VA Outreach program has been ineffective, at best, and veterans have complained to me of their treatment when they have reported to VA hospitals for testing. The VA should be mandated to notify all 2.8 million Vietnam vets of their possible exposure to this deadly substance, describe symptoms, and offer full testing for all those vets who request it.

The extension of the delimiting date is an expensive item admittedly, but it, too, is a matter of justice. World War II veterans GI bill benefits covered full tuition in 95 percent of all colleges and universities in addition to providing a substantial monthly stipend. Vietnam veterans benefits until the early 1970's were actually less than those given to Korean vets.

It just seems to me, Mr. Speaker, to be a matter of justice. This House voted year after year, huge sums of money to keep these people in Vietnam—$52 billion a year at its peak. We asked them to perform a service in our name—service that entailed death, traumatic, and permanent injury and disfigurement of mind and body, and an assortment of diseases and afflictions that continue 9 years after the truce declaration. I am indignant and angry that this country could ask so much from a young person and then disregard their cries for help, cries that result directly from the person's efforts to serve.

We are not talking about Government largesse, we are talking about the responsibility and integrity of a government toward its people. If we tell them we had endless funds to keep them in the mud, the disease, and the horror of Vietnam, and yet, do not have $67 million to deliver programs to them, then we should not be surprised if few answer the clarion's call to the danger next time. Make no mistake, our neglect is noted. In a study at Cleveland State University, over 90 percent of the Vietnam veterans interviewed said they would refuse to serve in Vietnam again and well over 70 percent said they would advise their sons not to serve. That can have a serious impact for the future of our foreign policy.

We have a responsibility to each and every one of those people. I am constantly puzzled as to why it is so difficult to do the right thing for them. We have study after study confirming the need, we have declared that need a priority here in Congress, and if my constituents are any indication pas-

sage of these programs would certainly not be a political liability.

We are well aware that we are in tough times fiscally but there are moral obligations which transcend such times. I am convinced that the willingness to face these obligations, despite fiscal pressures, separates statesmen from politicians.

The words of Abraham Lincolin, "To care for him who shall have borne the battle, and for his widow and orphan" must take on a new meaning in this Congress or our patriotic declarations will ring hollow indeed. If we know who to call upon in time of war, then we should remember who to thank in time of peace.

Thank you.

□ 1215

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. Further reserving the right to object, I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding, I commend him for his statement, and I wish to join in his remarks.

Mr. Speaker, I rise in strong support of House Joint Resolution 182, a resolution to designate April 26, 1981 as "National Recognition Day for Veterans of the Vietnam Era." At this time I would like to commend and praise my distinguished colleague from Michigan, Mr. ALBOSTA, for working so diligently to bring this important matter before us today, a matter of great concern to the entire Nation, veterans and nonveteran alike.

National Recognition Day for Veterans of the Vietnam Era is a day over 2½ million Americans, including the 7,484 women who served their country with distinction in Vietnam, have long been waiting for. The time has come for their country to finally acknowledge their heroics and dedication under the most difficult of conditions during that terrible and brutal conflict. Equally important, it should be a day for the people of this country to come to grips with the multitude of problems, many of them highly complex, which the Vietnam veteran faces today. The people of this Nation must realize that the battle the Vietnam veteran is facing today, in rebuilding his or her life, mind, and body, is just as great a trial as the one faced on the battlefield, and all rightfully deserve our moral support and attention.

During the Vietnam era the people in the United States saw in their homes through the eyes of television, the horrors of Vietnam. We have never forgotten those memories and certainly neither have those who were there. To the brave Americans who lost their lives there is nothing we can do to bring them back, except honor their death. But to those who returned there is much we can and must do. We have to highlight the problems they are facing, whether they be in finding employment or helping them deal with the physical and psychological scars they face. Most important, however, we owe them the right to dignity, recognition, and respect.

That is why we need National Recognition Day for Veterans of the Vietnam Era. The veterans and their families deserve it, and the people of the United States owe it, and I urge my colleagues to support this worthwhile and long overdue measure.

Mr. BONIOR of Michigan. I thank the gentleman for his support of this resolution and for his remarks.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to my colleague, the gentleman from California (Mr. PANETTA), who has shown leadership in this area.

Mr. PANETTA. I thank the gentleman for yielding, and I wish to congratulate the author of this resolution, which I cosponsored, to establish this day of recognition.

Mr. Speaker, the recent national jubilation over the return of our 52 hostages from Iran was cathartic for our Nation. The enthusiastic and joyous outpouring of public support for the hostages was deeply moving and entirely justified, given the terrible 444-day ordeal of our citizens in Iran and given the frustrations and humiliations suffered by all our people here at home. The release of the hostages was received by Americans like a dry leaf receives a lighted match, because our people wanted desperately to celebrate the homecoming of our countrymen and to honor them for their loyalty and their courage.

Not too many years ago, another group of Americans returned from a traumatic ordeal in a country far from our shores. These were the 2.8 million veterans of the Vietnam war. But these individuals did not return to celebrations and parades; for the most part their homecoming went unnoticed by our people. America greeted her Vietnam veterans with a painful silence. If anyone did take notice of their return, more often than not anger and hostility were expressed, not respect and appreciation. It is time for the Congress to make amends for this Nation's indifference to Vietnam veterans. They served the Nation honorably during the most difficult conditions imaginable, and they deserve the heartfelt thanks of the American people. Although Vietnam veterans fulfilled their solemn commitment to the Nation, the Nation has not yet fulfilled its commitment to our veterans.

Mr. Speaker, as a Vietnam-era veteran and as vice chairman of the Caucus of Vietnam Era Veterans in Congress, I am very pleased to lend my wholehearted support to House Joint Resolution 182, which designates April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era." I want to express my deep thanks to the gentleman from Michigan (Mr. ALBOSTA), for his leadership in sponsoring this resolution. Working with him in getting this resolution so quickly to the floor has been a pleasure. Such a day of recognition is long overdue, and I am convinced that this day can have a healing effect on the scars of the Vietnam period. Passage of the resolution will be a signal to Vietnam veterans, to their families, and to their survivors that the Nation values their sacrifice and their service. We need to publicly acknowledge Vietnam veterans, for to do anything less would only further foil the self image of Vietnam veterans and add to the frustrations already felt. Our national treatment of Vietnam veterans has been shabby and shameful, and until we correct that we will not be able to heal the wounds of Vietnam.

But a day of recognition alone is not sufficient. If this Congress thinks it can win the hearts and minds of Vietnam veterans by voting a day of recognition, while at the same time eliminating programs designed to help Vietnam veterans, we will be in for a very rude awakening, indeed. As we cast our votes on this measure today, we should note that the Reagan administration has proposed the elimination of virtually every program enacted to help vietnam veterans. I am perplexed that President Reagan would praise the Vietnam war as a noble cause and then treat Vietnam veterans as ignoble warriors by proposing to eliminate Vietnam veteran programs. Every Member who cosponsored this resolution, and every Member who supports its passage today should be aware that if passage is followed by the wholesale gutting of programs to help Vietnam veterans, our veterans will justifiably feel betrayed and angry. We should not vote for this resolution if our support for it stems from a desire to appease. It is worth noting that, while over 250 Members have flocked to cosponsor this day of recognition, only some 80 Members have cosponsored legislation to reauthorize the psychological readjustment counseling centers—the vet centers—and even fewer Members have cosponsored legislation to provide assistance to Vietnam veterans suffering from illnesses associated with agent orange. It would truly be a shame if this day of recognition becomes an empty symbol, because if it does it will symbolize the emptiness of our national promise to care for our country's veterans. Such a symbol will only serve to intensify feelings of alienation and frustration among Vietnam veterans.

Mr. BONIOR of Michigan. I thank the gentleman for his supportive comments and for his leadership.

Mr. ALBOSTA. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to the gentleman from Michigan.

Mr. ALBOSTA. I thank the gentleman for yielding, and I also want to commend those who have spoken on the resolution up to this point.

Mr. Speaker, I rise today in support of House Joint Resolution 182, the measure calling for a "National Day of Recognition for Veterans of the Vietnam Era", on April 26, 1981.

Since I introduced the resolution last month, over 250 of our colleagues have joined us by adding their names as cosponsors. By passing the measure today we have the joint opportunity for extending a long overdue thank you to America's Vietnam veterans.

The measure, though, does not merely create a day to honor and recognize our veterans. It is a measure of substance. We are designating the week prior to April 26, 1981, as one for conferences and symposia around the country to highlight the problems and issues facing our Vietnam veterans, whose unique difficulties, we must understand, were unheard of by previous generations of wartime veterans.

Quite frankly, Mr. Speaker, our Vietnam veterans do not need another simple but well-intended gesture. They deserve a solid assessment by the Federal, State, and local governments, and the U.S. public at large of their struggle in the areas of employment, education, health care, and social adaptability. This should be the result of our action today.

Nine million Americans served in our military during the Vietnam era. Three million served in Southeast Asia. Of those, over 56,000 gave their lives. During the peak of the Vietnam war, this country spent $6 million per hour on battle. Is a week of our attention now too much to give these men and women in return for their sacrifices? I do not think so.

I trust this body does not either.

Mr. MILLER of California. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to my colleague, the gentleman from California.

Mr. MILLER of California. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman for his statement with respect to his support for this legislation, and also for the years of toil that the gentleman has made in this Congress for recognition and for services to the Vietnam-era veterans. I think it is most important that the Members of this Congress pay attention to the last part of the gentleman's statement. It is not enough for this country to recognize the Vietnam veteran, but there are, clearly, pending cutbacks suggested by this administration for the storefronts, which so many veterans in my district, both combat veterans and veterans of that time, tell me have been so terribly helpful to them. To cut that back at the same time we would pass a National Day of Recognition would send a message to the Vietnam-era veterans that would lead them to once again believe that this Congress has failed them. If, in fact, we go with those cutbacks, we will have failed the veterans in that respect.

While many of us in this Congress disagreed with our policy in Vietnam, I think that nobody can disagree that those people who went there paid a very heavy, heavy price that we have seen documented for the last decade. We owe it to these individuals to make sure that we make the full resources available to solve the problems that they have encountered as a result of this service to their country.

I want to again thank the gentleman from Michigan (Mr. BONIOR) for his leadership, and I hope the gentleman is right, that the new leadership of the Veterans' Committee will now recognize that we have still further to go in providing treatment and services for these veterans.

Mr. BONIOR of Michigan. I thank the gentleman for his contribution and for his kind remarks.

Mr. DASCHLE. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to the gentleman from South Dakota (Mr. DASCHLE), the chairman of the Caucus of the Vietnam Veterans in Congress.

Mr. DASCHLE. I thank the gentleman for yielding.

Mr. Speaker, I understand there are a number of Members who wish to talk on this matter, and I will not belabor the point. But I do wish to associate myself with the remarks of the previous speaker.

If all we do on this day of recognition is recognize those who have given their lives, those who have given their health, those who have given their offspring, then indeed I believe that this day of recognition will be a failure, a failure because it will again reiterate to those veterans who have waited for so long that the House and the Congress and the adminstration and this Government is putting off what has been put off too long.

Let this, rather, be not only a day of recognition, but a day of resolve, a day of dedication, a day that this Congress and this country finally resolves itself to come to some conclusions about what we are willing to do for those who have given so much. Let us resolve to pass the psychological readjustment and training program, not for 1 year, not for a Congress, but for a generation, so that we can deal with these people; and after we have provided them with drug abuse counseling, after we have provided them with the psychological care that they so desperately need, let us deal with the agent orange victims of this country, let us resolve that they are no longer going to have to wait 11 years in which to get the kind of treatment and medical care that they so desperately need. They cannot wait any longer.

After we have provided them with the medical care, after we have shown them the kind of dedication we have to resolving their psychological problems, let us then resolve to give them the jobs that they need to become productive citizens.

If we do that, and if we begin in that effort on this day, then I think indeed we can look back with a good deal of satisfaction.

Mr. BONIOR of Michigan. I thank the gentleman for his remarks.

Mr. Speaker, I withdraw my reservation of objection.

Mr. SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. WYLIE. Mr. Speaker, reserving the right to object, I want to compliment the gentleman from New York and the gentleman from Michigan for bringing this resolution to the House floor today so that I might express my own views on this very wrenching issue.

Mr. Speaker, I rise today in support of this resolution calling for the establishment of a national day of recognition for veterans of the Vietnam war. I am proud to join 230 of my distinguished colleagues in cosponsoring this resolution, which would help to focus attention on the unfortunate plight of our Vietnam veterans.

Recent studies commissioned by our Veterans' Affairs Committee and carried out by the Veterans' Administration reveal that three-fourths of our Vietnam veterans have been adversely affected, in some form or another, by their participation in that difficult and unpopular conflict. The studies show the many Vietnam veterans are burying themselves in alcohol and drugs. Others are suffering from mental and physical stress. Many simply have had difficulty adjusting to civilian society. From my seat on the Veterans' Affairs Committee I have heard firsthand about the unique problems of these veterans, and I believe they need our understanding and compassion.

Like all Americans, I shared in the celebration of the safe return of the Americans held hostage in Iran. Our Vietnam veterans, however, had no such joyous homecoming. Our soldiers in Vietnam gave their blood, and in some cases their lives, in their service to this Nation. They have too often been subjected to neglect and I fear disdain by some of their peers. While we must never forget the tragic lessons of Vietnam, neither must we allow our abhorence of that conflict

deter from the special recognition and treatment these veterans deserve. Each of these individuals deserves our help, our respect, and, most importantly, our recognition for the sacrifices they have made on our behalf.

Thank you, Mr. Speaker.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

□ 1230

Mr. CARMAN. Mr. Speaker, reserving the right to object, I rise in support of the resolution because it would honor those who might be called the forgotten soldiers, our brave men and women who served so gallantly in a place called Vietnam.

Setting aside April 26 as a national day of recognition for Vietnam veterans is the very least we can do for those who answered this country's call and went to Southeast Asia, regardless of how they felt about that conflict.

When they came home, unlike veterans of others wars, they had no tickertape parades, no cheering crowds, no bands. They need a special day of recognition from the American people. It is time that we made up for the lack of recognition they so justly deserve. It is time we let Vietnam veterans know that we are proud of them for doing their duty as Americans have done for over 200 years. It is time we give our Vietnam era veterans the belated honors they so richly deserve.

Mr. Speaker, I would also like to encourage all of our Vietnam veterans to join with the various veterans' groups throughout the United States if they do not already belong. Organizations like the VFW, the American Legion, AMVETS, Jewish War Veterans, as well as other very worthwhile veterans' groups serve the needs of former soldiers who did their job well.

I, too, would like to compliment all of the sponsors of this legislation in regard to this resolution.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. CARMAN. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I want to commend the gentleman from New York for his remarks in support of this resolution and the sponsors for bringing the resolution to the floor at this time. I think it is certainly an appropriate resolution and quite timely as we approach Vietnam Veterans Day.

Mr. Speaker, I rise in support of House Joint Resolution 182, requesting the President to declare April 26, 1981, a National Day of Recognition for Veterans of the Vietnam Era. The resolution also calls for a week symposia and conferences to address the many matters of concern to our Vietnam veterans.

Mr. Speaker, It is no secret to the Congress and the American public that the Vietnam veteran, unlike his World War I of World War II counterpart, has an exceptionally heavy burden to carry. In fact, the Vietnam veteran's burden, as many angry returnees have been claiming for years, has been our Nation's reluctance to properly welcome—much less honor—those men and women who served in a war that was anything but a clear-cut issue of right and wrong. In many respects that war is still not over.

I urge my colleagues to take a walk through their nearest VA hospital and to talk with both the VA staff as well as the veterans themselves. According to a recent study done by the Center for Policy Research and entitled: "Legacies of Vietnam: Comparative Adjustment of Veterans and Their Peers," over a third of those men who saw combat in Vietnam are now suffering from what is widely recognized as "posttraumatic stress disorder." Others refer to it as the "Vietnam syndrome." Simply put, the diagnosis is one of chronic stress, alienation, anxiety, depression and a general inability to function within society. Many veterans have an alcohol and drug abuse problem. Divorce rates are high. The symptoms of their problems are evident everywhere, be it in the city or in the rural areas. This is not to say that all of our veterans are experiencing difficulties of this magnitude. Many have readjusted quite well. But I am certain that almost all of them feel that their tour of duty on behalf of their country, has not been honored and acknowledged as such.

Mr. Speaker, I happen to share the sentiments of our veterans. I share them for many reasons. Both the administration and the Congress were slow in responding to the needs of our veterans in adjusting to their return home. It has been a constant struggle to keep the few funds alive for some of the centers put up to help them. Ironically enough, the budget cuts now being debated, included these counseling centers, and it was only with considerable push and commitment that the Veterans' Affairs Committee decided to restore those funds.

In addition to the problems of those veterans who made it home, we have also ignored the problems of those who are not yet home. I am talking about our missing in action. It is indeed unfortunate that for some 2,500 American families the war in Vietnam still lingers on. Most Americans are shocked to learn of the extensive number of missing servicemen still unaccounted for in the Vietnam war, and are particularly distressed to learn that many servicemen who were known POW's were never returned to us even after the Paris peace accords were signed in 1973. I have been working on the MIA/POW issue now for many years and while somewhat encouraged by the bits and pieces of progress, I am equally disheartened by the waning interest in the fate of these courageous servicemen.

Furthermore, I might add that in addition to the emotional problems of those who have returned to the States, there are a number of physical problems that remain to be addressed. For example, we are hearing, at an alarming rate, of the effect of the chemical defoliant known as agent orange, and its danger to one's health. In order to address that issue both directly and fairly, I have reintroduced H.R. 1962, a bill that would place the study of agent orange and its effects, within the jurisdiction of the National Academy of Sciences.

Mr. Speaker, the problems facing our veterans are as diverse as they are complex. These problems are unlikely to disappear with time or simply ignoring them. In fact, they are bound to grow and manifest themselves in new and equally distressing manners. In the interest of our veterans and in the interest of strengthening our Nation's social fibre, it is imperative that we take a long hard look at each one of these problems and work toward a recovery, in whatever form that may be necessary. A first step in the right direction would be the widespread and unanimous support of House Joint Resolution 182, properly commemorating the service of the Vietnam veterans. Accordingly, I urge my colleagues to support this resolution and I am hopeful that these brave men and women will be recognized with as much enthusiasm as displayed upon the return of the 52 Americans who were held hostage in Iran.

Mr. CARMAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

Mr. DAUB. Mr. Speaker, I rise to support House Joint Resolution 182 offered by my distinguished colleague, Mr. ALBOSTA.

The Vietnam veteran was, like all Americans, relieved upon the return of the 52 Americans from Iran. The Vietnam veteran did not wish to detract from that joyous occasion. His outlook on the American hostage homecoming seemed to be, as one veteran put it: "This time America's doing it right."

However, the warm reception received by the hostages could be contrasted with the reception received by Vietnam veterans upon their return. It can be said that, for all practical purposes, there was no homecoming for the veteran of the Vietnam era.

It was an unfortunate twist of history that much of the animosity toward Vietnam cruelly translated into animosity toward those who served in

Vietnam. This was a deep injustice not only to those who served, but to the country as well.

Recently, we have begun to realine our attitude toward the veterans of Vietnam, and Mr. Speaker, I believe that this is long overdue.

We cannot go back and give Vietnam veterans the homecoming they so richly deserved. But we can, in a small way, demonstrate that the country's attitude toward them are changing. We can demonstrate that not only are we proud of the sacrifices and efforts of the Vietnam era veterans; we are humbled by them.

One Vietnam veteran summed up the aspirations of his group well when he said:

> After all the talk about wanting more benefits, better programs, specific things, if you ask the Vietnam veterans what they have really wanted from the country all along, it gets down to this. They wanted the country to say, "Thanks."[1]

Mr. Speaker, this resolution is one small way of saying just that. Thanks.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do not intend to object, but I do not want to go on the record as endorsing the resolution.

I do hope it passes this House unanimously. I think it is high time we say in some significant way, "Thank you" to the Vietnam veterans. They have made sacrifices not only in terms of Vietnam, but sacrifices since they have been home. I think it can be said of our society that we have even heaped abuse upon the Vietnam veteran as he returned from battle.

I would also like to express some sense of dismay at some of the previous speakers who have seemed to, in some of their remarks, tried to turn this resolution into an anti-Reagan administration policy resolution. I do not think that is warranted. I think that it abuses what we are attempting to achieve here today.

It seems to me that President Reagan at some political risk during the campaign tried to make certain that he stated as a Presidential candidate that he felt the Vietnam veterans should be honored for what they did and how they served.

Since coming to office President Reagan has also reached out to the Vietnam veterans. He has made it very clear that he wants the Veterans' Administration to work on some of the problems they had faced, such as the agent orange matter.

So I am somewhat disappointed to hear some of my colleagues on the floor trying to turn this resolution into something that is antiadministration in its character.

I hope as we pass the resolution we do so unanimously to show we are united as a House of Representatives in our desire to say thank you to the veterans and not try to make it into a political effort of some kind.

Mr. BONIOR of Michigan. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. BONIOR of Michigan. Mr. Speaker, I thank the gentleman for his support of the resolution. I think the gentleman knows that the political comments that he alluded to were not privy or reserved just for the Reagan administration. Those comments can apply to the administrations that go back to 1963. Any intention to single this administration out certainly was not intended. However, it goes without saying and the people should note that it was the Reagan budget and Mr. Stockman's proposal to wipe out $67 million in Vietnam veterans' delivery programs. It was not the Carter budget, not the Johnson, Ford or Nixon budget. It was this budget.

To that extent it seems to me that we have to address that particular part of the "Thank you."

I would hope the gentleman would join me and others in doing just that when those particular programs, the vet center program, the DIVA program for disabled American veterans come before this Congress.

I look forward truly to working with the gentleman to change the direction of the administration on those policies as the Republican Senate has done recently on the vet center program.

I thank the gentleman.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I would say in response to the gentleman that I felt his comments were measured. There were a couple of other speakers who I thought more directly tried to tie the resolution to efforts of the Reagan administration.

I would say to the gentleman that of course along with some of the proposed budget cuts has come some expression of commitment by the administration to try to do things through other changes and try to provide those services through the established channels of the Veterans' Administration.

I think we have to have some kind of an open mind about whether or not that can be successfully achieved. I know the Vietnam veterans have reasons to be suspect of the VA, the way it has operated in the past toward many of their problems. I do not blame them.

I think a new administration may be able to overcome that and put the full resources of multimillion-dollar resources at the disposal of the Vietnam veterans.

I think that would be a major step forward and I think the administration ought to be given the opportunity to try to work in that direction as well.

Mr. ALBOSTA. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. ALBOSTA. I think quite frankly the veterans do not need a gesture by Congress, but they need an honest assessment of what their problems are and they need an administration that is willing to take some action to find the answers to some of their problems.

They served well for this Nation regardless of the outcome of this war. That is what we really need, that is what veterans need. We do not need to make this political on either side. I appreciate the cooperation on the opposite side of the aisle that I have gotten from Republicans. I think I want to keep it in the context that it was originally in, that we look for the solutions to these problems and we do not start going in political directions.

Mr. WALKER. I thank the gentleman for his comments. I could not have spoken them more eloquently myself.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

Mrs. HECKLER. Mr. Speaker, reserving the right to object, I take this time to speak in support of the general thrust of the resolution. I think the observance of Vietnam Veterans Day now becomes an important part of America's history, an event of recognition that has been lacking for too long.

I would like to see this Congress not only pass this resolution, but also act in support of the Vietnam veterans' interests regarding Operation Outreach, and in consideration of the problems caused by agent orange.

Mr. Speaker, I do support House Joint Resolution 182, to designate April 26 of each year as a day of national observance to recognize and honor our Nation's 8½ million veterans of the Vietnam era.

As the first Member of Congress to introduce such a resolution, I am pleased to see Congress—led by this body—today move toward this significant action.

Our Vietnam veterans—2½ million of whom served in the Indochina theater—need and deserve such a day. It is not a holiday, but a day of observance. A day for Americans everywhere to take a moment to pause and reflect on the sacrifice and service of the veteran of Vietnam.

The Vietnam era of our Nation's history began in 1964 and ended in 1975. Those 11 years were perhaps the most

[1] Roger Melton, as quoted recently in the Los Angeles Times.

difficult in our history since the Civil War. We need to heal the relations between parent and son; mother and child; brother and sister; friends and neighbors. This act would be a major step in that direction.

We sense a new national mood toward greater unity and resolve. An integral part of this movement is the recognition of the Vietnam veteran.

Today, as another ingredient of that new mood, the Committee on Veterans' Affairs, on which I serve, voted to reaffirm its March 15 budget recommendation of $25 million to the continuation of Operation Outreach, a program of storefront and peer and professional counseling centers for Vietnam veterans.

An evaluation of this program, released last week, by medical experts, has called this program an eminent success. We need this program. I would like to commend the distinguished chairman of the Veterans' Committee, the gentleman from Mississippi, the Honorable G. V. (SONNY) MONTGOMERY, and the ranking minority member of the committee, the Honorable JOHN PAUL HAMMERSCHMIDT, for their support of this program.

Operation Outreach, which is only 1 year old, will expire this October unless we fund it. It is fulfilling a need that has existed for years, to date providing 40,000 Vietnam veterans with readjustment counseling.

I have advocated this type of program for years. I have visited the Vietnam veteran readjustment counseling centers in my State. I have talked with the counselors and the veterans who have sought assistance.

I can say from personal standpoint that, second only to the GI bill, this is the most important and beneficial program the Vietnam veteran has.

A similar program was available to veterans of World War II but, while WW II veterans had such a program immediately after the war, Vietnam veterans have had to fight for a decade for this one.

Tomorrow, for the third time, the 6 million citizens of Massachusetts will officially observe Vietnam Veterans Day. In my State, March 29 is the official day, the day the last American left Southeast Asia.

I am pleased that Vietnam veterans in Massachusetts are in the forefront of the emerging national leadership of Vietnam veterans.

Tomorrow's observance will have a special meaning, since during the past year we have lost the truly fine young man who more than anyone else made the day a reality in Massachusetts, and who in turn had a national influence on behalf of the Vietnam veteran.

Mr. Speaker, we are all Vietnam veterans. I urge the House to speedily pass this legislation, and I urge that it become law.

Mr. Speaker, I withdraw my reservation of objection.

● Mr. SMITH of New Jersey. Mr. Speaker, I want to say how very much I support this resolution to designate Sunday, April 26, as "Vietnam Veterans Commemorative Day."

The men who fought in Vietnam have felt themselves neglected—justifiably. The war was not their fault; they did not make the policy; they did not want to be there. But they answered the call of their country, an honored tradition reaching back to Lexington and Concord.

Their courage was extraordinary. In the swamps and jungles of Vietnam the vast majority served with the same sort of devotion to duty we have come to expect from our fighting men. The storming of Hamburger Hill was as heroic as the taking of Pork Chop Hill. The defense of the perimeter at Danang or Khe Sanh was as gallant as the defense of Wake Island.

Yet, when our soldiers came home, they were seen, not as heroes, but as victims at best, villains at worst. Somehow these men were held responsible for the terrible divisiveness of the war. A book on their experience has aptly been titled "No Victory Parades."

As the war faded the Vietnam veterans were forgotten. The only time we remembered them was when they were portrayed as men unable to adapt to civilian life.

That is not a true summary. The great majority of these men—and women, too, I might add—are leading normal, productive lives. But they are bitter their country has forgotten them.

Mr. Speaker, some 58,000 men did not come home to any sort of welcome. They gave the last, full measure of devotion. 155,000 more were wounded. As a nation we must remember.

True, some have suffered from their experiences. Many need special care and treatment. Some are under psychiatric care. For all these men we should continue those special programs designed to help them. This country should repay their service with its thanks and compassion.

We should also continue to provide educational benefits to those who served in Vietnam. This is only right and proper.

But on Sunday, April 26, we will be able to say "Thank You" to our Vietnam veterans—a long overdue thanks to men and women of great courage.

Mr. Speaker, tomorrow is the eighth anniversary of the final withdrawal of American forces from Vietnam in 1973, and 8 years is a long time.

No time limit can be placed on gratitude. Vietnam was America's longest and least popular war. We do well to remember those who served in it, and fought their country's battles. I was an early cosponsor of this resolution—I am glad we are taking such quick action on it.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I have supported House Joint Resolution 182, to designate April 26, 1981 as "National Recognition Day for Veterans of the Vietnam Era," because I believe in the merit of the proposal. However, I do wish to express my reservations regarding the specific language that the authors of this proposal chose in order to justify passing this honor to our Vietnam veterans.

A day of recognition is by its very nature a symbol of appreciation, an accolade for an accomplishment of great merit. I believe our Vietnam veterans have earned this accolade. At the same time, it distresses me to read the negative language incorporated into the "whereas" clauses of this resolution. I found myself, and other Members as well, being forced between voting in favor of the resolution, and in effect ratifying these clauses, or voting against it, and insulting the service of those who fought in Vietnam. Consequently, I would like to explain my objections to this language that has been forced on the Congress.

A large number of our Vietnam veterans are in fact unemployed, Mr. Speaker, as the fourth "whereas" clause in the resolution indicates. It is unclear how many actually fit into this category, as studies vary. However, it is a little strange to pass a resolution which honors this misfortune. Similarly, there is no clear indication as to how many Vietnam veterans suffer from psychological damage directly related to their service. It is possible, although not in any way proven, that the figures used in the fifth "whereas" clause of the resolution, indicating that "As many as 280,000 Veterans suffer from this tragedy," are correct. But is that truly relevant to a resolution honoring the courage and sacrifice—in short, the affirmative, good service—of those who served in Vietnam?

I greatly fear, Mr. Speaker, that such language will serve to further the notion that Vietnam veterans are losers and victims. Nothing can be more wrong, and it disturbs me that a resolution would contain language taking such a tack.

Where in this resolution is there praise for citizens who took time from their lives and travelled halfway around the world in an effort to preserve freedom for a country that is now, sadly, under totalitarian control? Where is there thanks for the overwhelming majority of veterans who came home and maintained their dignity while the country was losing its own, who bore the badges and scars of their service with stigma, rather than praise? Where is there mention of the hundreds of thousands, if not millions,

who have used their GI bill benefits and gone on to positions of respect and authority, and who will one day be leading this country as the rightful inheritors of power, after having given of themselves like few others in their peer group?

It destresses me that some Vietnam veterans still suffer from unemployment and psychological problems, Mr. Speaker, and we on the Veterans' Affairs Committee have been working hard to remedy these ills. But it also saddens me that those who drafted this resolution have ignored the strength and contributions of those who wore the uniform during this most troubled period.●

● Mr. DOWNEY. Mr. Speaker, it was with acute displeasure that I learned that House Joint Resolution 182, a proposal to commemorate April 26, 1981, as a National Day of Recognition for Veterans of the Vietnam Era, was scheduled for a vote on a day when I am committed to be on business elsewhere. Were I present I would certainly vote "yes."

I was an original cosponsor of this resolution and spent a considerable amount of time alerting my colleagues to the worthiness of setting aside a special day for these veterans. I know only too well what injustices have been suffered by Vietnam veterans. My district is heavily populated by men and women who have mental and physical scars from their service in that war torn nation. To say that their sacrifice was ignored would be understating their plight. Not only did we turn our backs on their accomplishments, but we also turned our backs on their legacy—drug addiction, mental illness, physical destruction and what is probably the worst sin of all—we never even thanked them for fighting for us in what had to be a losing proposition.

Clearly we owe them this day and most assuredly, much, much more. But at least this is a beginning.●

● Mr. BIAGGI. Mr. Speaker, I rise in full support of House Joint Resolution 182, requesting the President to designate April 26, 1981, as "National Day of Recognition for Veterans of the Vietnam Era."

Tragically, many Americans would choose to forget rather than remember our involvement in the Vietnam war. But the simple fact remains, 2.8 million veterans served in Vietnam, and another 6 million served elsewhere during the Vietnam era. For those men and women there is no forgetting.

Instead, they are constantly reminded of their involvement and the seeming abandonment that followed. They are reminded each time they seek employment services and find those services to be inadequate; they are reminded each time they seek educational aid and find that aid to be insufficient; they are reminded each time they seek health care and find there are not enough VA hospital beds to meet the demand.

Certainly, these lack of adequate services in the areas of employment, education, and health care have hindered the Vietnam veteran's ability to return to the mainstream of American life. However, these obstacles cannot compete with—and are largely the result of—an unjust perception of their contribution to our Nation.

Due to the unpopularity of the Vietnam war, these veterans have been cast in a negative image that continues to burden them. They are torn apart by feelings of guilt and frustration for having courageously risked their lives for a cause many Americans either did not understand or thought was wrong.

We are all too familiar with the tragic consequences—the suicides, the drug addiction, the broken homes. Just recently, a Washington Post article discussed the unique problems the 7,484 female veterans of the Vietnam war are facing. One former Vietnam Army nurse was quoted in the article as saying:

> I want to go back to Vietnam and make it different. I want to come home to a marching band and a red carpet. I want to hear a "Thank You." I want to hear "I'm sorry." Most of all, I want to feel at peace with myself.

Fortunately, there is a tragedy resulting from the Vietnam war that is receiving the increased attention it deserves; namely, the nearly 2,500 Americans who are still prisoners of war (POW) or missing in action (MIA) in Southeast Asia. While past efforts have not been successful in obtaining a full acounting of these veterans from the socialist Governments of Vietnam, Laos, and Cambodia, the Congress recently announced its plans to reopen the investigation. In addition, I have joined my colleagues during past years in establishing National POW-MIA Recognition Day in hopes of rekindling the memory of the sacrifices made by the POW's and MIA's, and creating a greater concern about their fate.

Mr. Speaker, I am hopeful that Vietnam Veterans Day will help to encourage a greater awareness of the special needs of these courageous men and women who have suffered both physically and emotionally as a result of their service in the Vietnam War. The Vietnam era veterans should be saluted and rewarded for the outstanding service they provided this country.●

● Mr. MINISH. Mr. Speaker, it is with pride that I lend my support to a House joint resolution introduced by my distinguished colleague from the State of Michigan (Mr. ALBOSTA). House Joint Resolution 182 would designate April 26, 1981 as National Recognition Day for Veterans of the Vietnam Era.

First, may I commend my colleague for sponsoring this humanitarian legislation. This is an action which I believe, we have postponed for too long. The brave men who fought in the Vietnam conflict, including the 52,000 Americans who lost their lives, deserve appropriate recognition for their service in defense of our country. Sufficient praise for their valiant service and assistance for reentry into society have been sadly overdue.

Perhaps the 1980's have brought us to a certain historical perspective when we can now accept the problems and mistakes of the 1960's. It seems that the last decade helped to heal many of our Nation's wounds suffered during the Vietnam era. As the 1980's unfold before us, I see our Nation settling into a period of productivity when we will grapple with the fundamental challenges which will carry us into the year 2000. The 1980's have so far been a decade marked by renewed interest in patriotism and a pride for ourselves and our country. I, for one, am pleased to witness this change in attitude and hope that it continues.

I fervently hope that we use a national recognition day to expand our awareness regarding the role of the Vietnam veteran in our society. The figures pertaining to their reentry into the mainstream are all too grim. It is estimated that 480,000 Vietnam veterans between the ages of 25 and 39 are currently unemployed, and as many as 280,000 servicemen suffer psychological disorders produced by the Vietnam conflict and its aftermath.

Mr. Speaker, let us use April 26, 1981 to commemorate the brave deeds of these Americans who have been neglected for too long. Let us commemorate them with appropriate ceremonies, as well as expand our substantive assistance to these veterans, so they may soon be well integrated into society.●

● Mr. CORCORAN. Mr. Speaker, I urge my colleagues to support passage of the resolution now under consideration, House Joint Resolution 182, which establishes a national day of recognition for our Vietnam veterans.

As reported in Tuesday's Washington Post, the Center for Policy Research in New York recently concluded in a study for the Veterans' Administration that Vietnam combat veterans, since the end of the war, have suffered from drug and alcohol abuse with higher incidence than their counterparts who did not serve or fight in Vietnam. The study also discovered that those who fought were more likely to suffer from long-term stess than those who were not subjected to the violence of war.

Perhaps these findings are not surprising. But when combined with the hostile reception Americans offered the returning soldiers in the mid-

1970's, the damaging effects of combat turned into tragedy for Vietnam vets. Called into service for their country, our Vietnam veterans returned to a Nation disillusioned and upset by the stalemate in Southeast Asia. The returnees were neglected, spited, looked down upon. And if ignorance and condescension were not enough, the slow growth economy of the 1970's refused to absorb the vets with steady, well paying jobs.

It took the return of our hostages from Iran in January to bring the sad plight of Vietnam vets to the attention of the American people. To be sure, they will need more than a national day of recognition. But this day could be a signal of better things to come for this slighted group of soldiers, whose courage has rarely been commended.

Again, I encourage my colleagues to support the resolution sponsored by Congressman ALBOSTA, whose fine work in gathering support for this measure deserves our praise.●

● Mr. MONTGOMERY. Mr. Speaker, I am pleased to support House Joint Resolution 182 that would designate April 26, 1981 as a national day of recognition for veterans of the Vietnam era.

As of September 1980 there were about 9 million veterans in civil life who served during the Vietnam era, 32 percent, or 2.9 million of these veterans saw service in the Vietnam theater of operations; 96 percent of all Vietnam era veterans separated from the Armed Forces were discharged under honorable conditions. The overwhelming majority of these veterans have readjusted to civilian life without difficulty; however, there are some that still experience problems and we are continuing our efforts to lend assistance to these individuals.

Mr. Speaker, I am pleased to report to my colleagues that the Committee on Veterans' Affairs of the House is going to make a maximum effort this year to enhance the lives of Vietnam veterans. Much has already been done.

My colleagues know that the administration has recommended the termination of the psychological readjustment counseling centers for Vietnam veterans, a program enacted by the Congress about 2 years ago. This morning when our committee met to consider the administration's proposed reductions in veterans' benefits and services, the committee voted to retain these outreach centers. We all recognize that those Vietnam veterans with serious medical problems are most in need of help. It is our firm determination that we will continue to provide an effective independent medical system so that Vietnam veterans in need of medical care may receive that care in a hospital system maintained for their specific benefit. The Veterans' Affairs Committee is united in its determination to retain and strengthen the VA medical program.

In addition, Mr. Speaker, the committee included in its recommendations to the budget committee this morning $25 million to establish a small business loan program for Vietnam veterans. And, finally, the committee's recommendations to the Committee on the Budget will contain approximately $64 million to extend eligibility for vocational remedial training in order to assist those Vietnam veterans who continue to experience difficulty in employment.

Mr. Speaker, of course I support the resolution to designate April 26 in recognition of Vietnam veterans. They deserve the praise of the American people for their service during a difficult period in our Nation's history; however, I feel the greatest thing we can do is to do something constructive to provide benefits and services that will enhance the lives of these veterans. The naming of specific days in their honor alone will not do that.

I am pleased, Mr. Speaker, to support the resolution and commend the sponsors for bringing this matter to our attention this day.●

● Mr. ANNUNZIO. Mr. Speaker, I was glad to join my colleagues in cosponsoring House Joint Resolution 182, which was introduced by the gentleman from Michigan, the Honorable DONALD JOSEPH ALBOSTA, to authorize and request the President to issue a proclamation designating April 26, 1981, as National Day of Recognition for Veterans of the Vietnam Era, and I am delighted today to join my colleagues in the House in paying tribute to the outstanding contributions these veterans have made to the maintenance of our Nation's precious heritage of liberty.

This special day will be a reminder to all Americans of the tremendous debt of gratitude we owe to those veterans who served in the Vietnam war, and who sacrificed so much in dedication to the ideals of freedom. Their valor, their determination, their fortitude, and their courage stand as an inspiration to us all, for our Nation cannot maintain its strength and greatness without the willingness of our most precious citizens, our young people, to lay down their lives, their health, their dreams and aspirations in defense of the noble principles upon which our country was founded.

The people of our great land can never forget these valiant sacrifices, and I urge the support of my colleagues for this commemorative resolution.●

● Mr. MOFFETT. Mr. Speaker, today we are to consider a resolution calling for a national day of observance for veterans of the Vietnam war. This special day, April 26, 1981, would be celebrated across the country with appropriate programs, ceremonies, and activities which commemorate the sacrifices all Vietnam era veterans made for this Nation. I do not think that there is anyone in the House today who is not attuned to the plight of so many of the men and women who served during the Vietnam conflict. The news is full of reports and studies about the thousands who suffer daily from the acute traumas of the war. The special day of recognition is very timely, therefore, in focusing the entire Nation's attention on the Vietnam veterans who fought, and still continue to fight, a highly unpopular war. I heartily support the special day resolution.

A special day, or a week or a month, will not heal old wounds, however. The burden of stress and conflict which so many Vietnam veterans carry has been developing over a great many years and may never be completely erased. If we are truly to address the problems of many Vietnam veterans—unemployment, family disorders, readjustment difficulties—we might pay closer attention to the modest but effective programs that are helping these veterans today. Operation Outreach, for example, was only created during the 96th Congress but it has already proven to be a significant initiative for assisting veterans with stress problems; 91 community-based veterans centers have opened their doors since Operation Outreach became functional, counseling close to 50,000 Vietnam veterans. The budget for this program has been quite modest and the returns have been substantial. Unfortunately, the administration has proposed to not extend Operation Outreach past this year, as a budget cutting measure. I understand that the Veterans' Affairs Committee has recommended continued support for the program, nontheless, and hopefully Operation Outreach will be maintained. This is a small but meaningful way for Congress to demonstrate its sincere concern for the Vietnam veteran.

We in Congress might also show our concern by developing more responsive means of handling agent orange claims. The Veterans' Administration has shown little initiative in coming to terms with this problem, despite the fact that many Vietnam veterans are suffering physical disorders as a consequence of their exposure to the potent defoliant. I have attached at the conclusion of my remarks a press release on this matter.

In conclusion, let us honor the sacrifices made by all Vietnam veterans on the special day of recognition. And then let us put our commitment to all veterans into action by protecting the programs that assist them. News reports indicate that the White House is still unable to find a new Administrator for the VA. It appears that, in

terms of the treatment of veterans, the administration is taking the traditional business as usual attitude.

It is a crime against those veterans who served so valiantly.

At this point I include the following news release:

WASHINGTON.—U.S. Rep. Toby Moffett (D-Conn.), claiming a recent study indicates "major problems" with the government's handling of "Agent Orange" claims, expressed dismay over the Reagan Administration's decision to delay appointing a new head of the Veterans Administration and to shut down 91 storefront counseling centers.

The VA survey, entitled, "Veteran Satisfaction with Agent Orange Examination," was never publicized, according to Moffett.

"Agent Orange" is a potent chemical mixture used as a defoliant in the jungles of Vietnam. One of its main components has been linked with cancer, birth defects, liver and kidney ailments, skin disorders, and difficulties with the nervous system.

"The VA's own questionnaire," Moffett asserted, "shows that Viet vets exposed to 'Agent Orange' are not getting adequate treatment. Despite the very real concerns of the veterans, and despite their continued pressure on the VA to help them find answers, the VA has responded by burying its head in the sand."

Moffett said the in-house VA study indicated three main problem areas:

VA doctors are not discussing the results of their tests with potential "Agent Orange" victims

Many Viet-era veterans are convinced the VA is not giving proper attention to possible "Agent Orange"-related symptoms

The VA indirectly is acknowledging the existence of the problem: one question is worded, "Have you been seen by a non-VA physician *because of Agent Orange problems*?" [Emphasis added]

The VA, Moffett also charged, has failed for years to conduct any kind of "outreach" program related to "Agent Orange", has denied public participation in the 'Agent Orange' decision-making process, and has failed to develop a meaningful medical examination in its facilities. "There seem to be an overriding philosophy that, if they ignore the problem long enough, it will simply go away," said Moffett.

With the pending shut-down of the 91 counseling centers, the lack of a VA Administrator, and the results of the VA survey, it's no wonder that many Viet-era veterans feel their own government is treating them like second-class citizens.

We can only hope that the new Administration will appoint a VA chief who is sensitive to their special needs. Unfortunately, the early signals are not reasurring.●

● Mr. DERWINSKI. Mr. Speaker, I urge the House to give unanimous consent to the passage of House Joint Resolution 182, Vietnam Veterans Commemoration Day, which I was pleased to join in cosponsoring.

I think that many of us realized when the return of the American hostages from Iran received so much publicity and acclaim that this was in contrast to the lack of proper recognition given to the Vietnam veterans upon their return to this country.

The Vietnam veterans deserve to be honored for their service to their country, and since this resolution contributes to showing that America is proud of them, it certainly deserves our votes.●

● Mr. COURTER. Mr. Speaker, I rise in support of House Joint Resolution 182 to designate April 26, 1981 as "National Recognition Day for Veterans of the Vietnam Era."

It is with a great sense of honor that I have this opportunity to express my thanks to the men and women who served their Nation during the Vietnam war. Many Vietnam veterans, especially those who served in combat, returned to a nation unwilling to recognize their purposes or their experiences.

Many of the Vietnam veterans never wanted war. Like all the people of our Nation they would have preferred never to see it start, nor to have initially been involved. But they are the ones who accepted our personal responsibility.

We should be grateful and proud of our veterans not only for their courage and sacrifice in military service, but for their contributions to the community since returning home. And for those who suffer from their experiences in that war, we should show them that we care with our understanding. As a nation it is our obligation to provide assurances of comfort and to express our thanks. To designate a day of recognition for our Vietnam veterans is just one small token. The most the Nation can do for these men and women is not enough and this is nothing less than they duly merit.

I urge my colleagues to join me in supporting this resolution and wishing each of the Vietnam veterans every measure of success in the future and assure them that we have not forgotten the adversities they suffered and assure them of our support.●

● Mrs. COLLINS of Illinois. Mr. Speaker, it is with great pride and pleasure that I rise today in support of legislation which I have cosponsored and which is being considered by the House; House Joint Resolution 182, Vietnam Veterans' Commemoration Day.

This resolution authorizes and requests that the President designate April 26, 1981, as a National Day of Recognition for Veterans of the Vietnam Era and calls for nationwide activities dedicated to issues of concern to all Vietnam veterans.

I am sure that all of my colleagues would agree with me that veterans who returned home from the war in Vietnam did untold damage to their bodies and minds for the United States. Vietnam veterans do not need sympathy, they need recognition for their efforts to defend this Nation, they need job training and jobs so that they can be productive members of society, they need counseling to assist them overcome their problems. Most of all they need to really know that Congress acknowledges their sacrifice and service. We owe Vietnam veterans our respect and thanks.●

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 182

Whereas the valorous service of Vietnam veterans has never been properly commemorated or recognized;

Whereas the conflict in Vietnam claimed more than fifty-five thousand American lives;

Whereas three hundred thousand men were wounded and one hundred and fifty thousand permanently disabled during the conflict in Vietnam;

Whereas there are four hundred and eighty thousand Vietnam veterans between the ages of twenty-five and thirty-nine who are currently unemployed; and

Whereas as many as two hundred and eighty thousand Vietnam veterans suffer the intermittent psychological aftereffects of the Vietnam conflict: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate April 26, 1981, as a "National Day of Recognition for Veterans of the Vietnam Era", and to call upon the people of the United States to observe such day with appropriate programs, ceremonies, and activities, including a week of symposia hearings and conferences to be conducted in Washington, District of Columbia, prior to April 26, dedicated to those issues of concern to Vietnam veterans.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the joint resolution.

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment of the joint resolution.

The joint resolution was ordered to be engrossed.

AMENDMENT TO THE PREAMBLE OFFERED BY MR. ALBOSTA

Mr. ALBOSTA. Mr. Speaker, I offer an amendment to the preamble.

The Clerk read as follows:

Amendment to the preamble offered by Mr. ALBOSTA: On page 2, line 3 of the preamble strike: "Now, therefore, be it". and insert: "whereas the more than 2.5 million Americans who answered their country's call to duty and served honorably deserve the Nation's gratitude: Now, therefore, be it".

Mr. ALBOSTA. Mr. Speaker, the Senate Judiciary Committee yesterday did adopt an amendment to an identical bill. I offer that amendment, Mr. Speaker, in identical form. My hope is that the entire Senate body will pass that bill as it is put out in the Senate and ours will conform.

Whereas the more than 2.5 million Americans who answered their country's call to

duty and served honorably deserve the Nation's gratitude.

It would go in as another whereas. It is a simple amendment.

The SPEAKER pro tempore The question is on the amendment to the preamble offered by the gentleman from Michigan (Mr. ALBOSTA).

The amendment to the preamble was agreed to.

The SPEAKER pro tempore The question is on the third reading of the joint resolution.

The joint resolution was ordered to be read a third time, and was read the third time.

The SPEAKER pro tempore The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BONIOR of Michigan. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 391, nays 0, not voting 41, as follows:

The Clerk announced the following pairs:

Mr. Long of Louisiana with Mr. Madigan.
Mr. Pepper with Mr. Vander Jagt.
Mr. Brown of California with Mr. Young of Alaska.
Mr. Alexander with Mr. Marriott.
Mr. Brooks with Mr. Dickinson.
Mr. Edwards of California with Mr. Trible.
Mr. Santini with Mr. Quillen.
Mr. AuCoin with Mr. Marks.
Mr. D'Amours with Mr. Chappie.
Mr. Cotter with Mr. Dannemeyer.
Mr. Derrick with Mr. DeNardis.
Mr. Scheuer with Mr. Guyer.
Mr. Conyers with Mr. Erdahl.
Mr. Danielson with Mr. Coats.
Mr. Seiberling with Mr. Lewis.
Mr. Bowen with Ms. Ferraro.
Mr. Gibbons with Mr. Florio.
Mr. Shannon with Mr. Hansen of Utah.
Mr. Moffett with Mr. Lantos.

Mrs. BOUQUARD changed her vote from "nay" to "yea."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous matter, on the joint resolution just passed.

The SPEAKER pro tempore (Mr. TRAXLER). Is there objection to the request of the gentleman from New York?

There was no objection.

DAIRY PRICE SUPPORTS

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 117 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 117

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1986) to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and

the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit. After the passage of H.R. 1986, it shall be in order in the House to move to take from the Speaker's table the bill S. 509 and to consider said bill in the House.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. BONIOR of Michigan. Mr. Speaker, House Resolution 117 provides for the consideration of H.R. 1986, a bill to eliminate the requirement for semiannual adjustments in the level of dairy price supports. The rule provides 1 hour of general debate to be equally divided between the chairman and the ranking minority member of the Committee on Agriculture. This is a straight open rule, allowing any germane amendment to be offered under the 5-minute rule and there are no waivers of points of order. Upon conclusion of consideration of the bill, one motion to recommit will be in order.

Mr. Speaker, as my colleagues are probably aware, the Subcommittee on Livestock, Dairy, and Poultry endorsed a different version of this legislation which was included in H.R. 2594. The subcommittee proposal provided a formula for the semiannual adjustments of milk price supports through fiscal year 1985; extended authority for transfer of Commodity Credit Corporation (CCC) owned dairy products to the military and veterans hospitals through fiscal year 1985 and provided for the distribution of excess dairy inventories held by the CCC.

The Committee on Agriculture used the subcommittee proposal for markup and reported H.R. 2594, with a committee amendment in the nature of a substitute which constituted the text of H.R. 1986, the administration's proposal. At the request of the chairman of that committee, the Rules Committee unanimously agreed to report this rule providing for the consideration of H.R. 1986, rather than the legislation reported by the Agriculture Committee, and thus, discharging the committee from further consideration of that bill. The rule also provides for consideration of S. 509, the Senate companion bill, after passage of H.R. 1986.

Mr. Speaker, this bill would eliminate the April 1, 1981, adjustment in milk price supports. In the absence of legislative action, on April 1, the Secretary of Agriculture would be required to set the support price at 80 percent of parity and at the end of the fiscal year the requirement for semiannual adjustments in the dairy support program would terminate. The Department of Agriculture has indicated that foregoing the April 1 adjustment would result in a savings of $147 million in fiscal year 1981 and $86 million in fiscal year 1982.

This bill would not abolish the dairy price support program or reduce the current price support level. It is my understanding that the entire issue of revisions in the dairy program will be addressed in an omnibus farm bill to be reported later this year.

Mr. Speaker, the administration suggests that this bill is an important aspect of our national commitment to reduce Government spending. I am sure that this issue will be thoroughly debated when this bill is considered.

Mr. Speaker, I know of no opposition to this rule and I urge its adoption so that we may proceed to the consideration of this legislation.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is the rule on the first of the Reagan administration's bills to slow the growth of Federal expenditures.

The rule provides 1 hour of general debate for the consideration of H.R. 1986, the milk price support bill. The bill is open to all amendments which comply with the House rules. After passage of the House bill, the rule provides that it will be in order to consider the Senate bill, S. 509, in the House.

Mr. Speaker, this rule is unusual in that it actually provides for the consideration of a different bill number than the one reported by the Agriculture Committee. The Agriculture Committee reported H.R. 2594, while the rule provides for the consideration of H.R. 1986, which was introduced by the gentleman from Illinois (Mr. FINDLEY). This action was taken at the request of the chairman of the Agriculture Committee, since H.R. 2594 was amended with the text of H.R. 1986 in the Agriculture Committee.

Mr. Speaker, the bill made in order by this rule would eliminate the requirement that the Secretary of Agriculture increase the support price of milk to 80 percent of parity on April 1, 1981.

The administration has estimated that this will reduce fiscal year 1981 outlays by $147 million.

Mr. Speaker, the level of price support has given dairy farmers very strong incentives to produce an increasing volume of milk. As a result production has increased more rapidly than consumption. These surpluses of milk have to be purchased by the Government.

On March 1, 1981, the Government owned 367 million pounds of butter, 267 million pounds of cheese, and 587.5 million pounds of nonfat dry milk. In January 1981, the Government bought 49 percent of all the butter produced in the country.

Unless we act, this problem is going to continue to grow to the detriment of the dairy farmers as well as the taxpayers.

Yesterday, the other body passed S. 509, the comparable Senate bill, by a record vote of 88 to 5.

Mr. Speaker, I know of no opposition to the rule, and I reserve the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. DE LA GARZA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1986, to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1986, with Mr. FROST in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Texas (Mr. DE LA GARZA) will be recognized for 30 minutes, and the gentleman from Minnesota (Mr. HAGEDORN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, let me say to the Members of the House that H.R. 1986 is a clean bill reported by the Committee on Agriculture of the House of Representatives, or, rather, it is a bill which has been made in order by the rule which we have just adopted.

I would say to my colleagues that it is very simple legislation. All it does is this: It prevents an adjustment in dairy supports which would otherwise, under present law, become effective April 1, 1981.

Mr. Chairman, that is the entirety of the legislation. The administration uses the figure of $147 million as a savings, if the bill becomes law. The CBO estimates savings at $160 million. I must be very fair and very frank with the Members and say that there was an amendment offered in the committee, a compromise amendment that would have saved something like $120

million to $127 million. Therefore, there was a spirit of compromise present.

Mr. Chairman, allow me to present some background information and legislative history pertinent to this issue:

The Agricultural Act of 1949 requires the support of milk prices at such level between 75 and 90 percent of parity as is necessary to assure an adequate supply to meet current needs, reflect changes in the cost of production, and assure a level of farm income adequate to maintain productive capacity and meet future needs. The act was amended in 1977 and 1979 by first, raising the minimum level of support to 80 percent of parity through September 30, 1981, and second, requiring midyear adjustments to reflect any change in the index of prices received by farmers, interest, taxes, and wage rates—the parity index. The act specifies that the support be provided through purchases of dairy products.

The purpose of the milk price support program, as prescribed by the Agricultural Act of 1949, is to assure an adequate supply of pure and wholesome milk to meet current needs, reflect changes in the cost of production and assure a farm income level adequate to maintain productive capacity sufficient to meet anticipated future needs.

For the past 3½ years, the Agricultural Act of 1949 has required that the price of milk be supported between 80 and 90 percent of parity at the beginning of each milk marketing year, and that the level be adjusted semiannually on the basis of changes in the index of prices paid for farm inputs. The administration informs us that this level of price support has given dairy farmers very strong incentives to produce an increasing volume of milk, and that as a result, production has increased rapidly—more rapidly than commercial use. USDA says that these surpluses have had to be purchased by the Government and are continuing to grow at a rapid rate.

If H.R. 1986 is adopted, the dairy support price of $13.10 per hundred pounds—which was set last October 1—will be continued unchanged through next September 30.

The Congressional Budget Office advises that enactment of H.R. 1986 will have an anti-inflationary impact by eliminating a 90 cent per hundredweight increase in the support price for milk that would otherwise occur on April 1, 1981, and by saving Government costs of approximately $160 million in fiscal year 1981 and $86 million in fiscal year 1982.

Circumstances have compelled the committee to report this particular bill which deals only with the temporary, short-term issue of where to set dairy support prices for the 6 months from April 1, through September 30, 1981, without knowing what policies will be recommended by the administration to help maintain a stable and efficient dairy industry for the 4 years beginning October 1.

Some members of the dairy industry feel that this bill is unjust and undue or harsh treatment of their industry. There are others who, for various reasons, are willing to go along with it with the promise from us—and I hope that the Members concur—that we will come right back and address the question of a long-term dairy program in the 1981 omnibus farm bill which will be considered by our committee in the near future.

I might also say that one might ask, "Well, what is this Democratic chairman doing managing a House bill and speaking for legislation which has been recommended by a Republican administration?" I would say to my dear colleagues that this is not a partisan issue, and I think that I am fulfilling the responsibility of a committee chairman in bringing to the floor legislation upon which the committee has exercised its will. That is what we bring to the Members here today.

Also, I might say that the democratic leadership of the House—the Speaker and the majority leader—have impressed upon me, as the committee chairman of their party, the fact that we must be responsible and that we must be cooperative to the extent possible with the mandate of the people and the recommendations of the Reagan administration. On some administration recommendations we will agree, on others we might disagree. But always, we will act as responsibly as we are acting today, letting the committees work their will, and allowing the House to have the legislation before it to exercise its will.

I would hope that the American people and the dairy industry, including some who will be hurt drastically by this legislation, know that some of us who might have disagreed with the full text of this legislation are, nevertheless, cooperating to arrange action on the bill. Personally, under my responsibility as chairman of the committee, I am bringing this legislation to the floor so that the House can exercise its will in as responsible a manner as it can and in a spirit of cooperation with what we believe to be the will of the people and the Reagan administration's recommendation.

Mr. Chairman, I again say that we may not agree in some areas, we might not agree on the priorities, and we may disagree in the future. But, we must act responsibly. It is always our wish to let the committee exercise its will and let the House exercise its will. That is why we bring this legislation to the Members today.

Mr. HAGEDORN. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, I rise in support of H.R. 1986. Enactment of this bill will cut Government spending by an estimated $147 million by eliminating an increase in dairy price supports scheduled to take effect on next Wednesday, April 1, as now required by the Agricultural Act of 1949.

I want to emphasize that taking this action will not reduce the price support level now in effect for dairy farmers. It would simply hold the line on Government outlays for milk supports. According to administration estimates, if the April 1 semiannual adjustment is not foregone, net expenditures for this marketing year will total $1.7 billion.

This legislation is given great importance by President Reagan because it is the first test of his administration's mandate to restrain Federal expenditures. Recognizing the importance of this proposed action, the House Agriculture Committee turned away all amendments to this bill and approved it by an overwhelming and bipartisan vote of 30 to 7.

I would point out to my colleagues that the legislation before you today is a simple matter of fiscal restraint that will not cause substantial economic distress to dairy farmers.

In fact, dairy farmers can consider themselves to be in the front line in the country's battle against inflation. As Secretary of Agriculture Block has told dairy farmers:

> If you rise to the challenge and fight this first battle against inflation, you can then say to the rest of the country: "We were the first to take a stand against inflation; now you take yours".

Reducing Government spending should be a priority order of this Congress as much as it is with the administration. Elimination of an unneeded increase in milk supports in a time of surplus production is but one of many actions that should be taken by this Congress to reduce spending and be responsive to the will of the people.

I urge my colleagues to support the passage of this bill.

□ 1315

Mr. DE LA GARZA. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Chairman, as chairman of the Livestock, Dairy and Poultry Subcommittee of the Committee on Agriculture, I feel that it is important during this debate on this bill to shed some more light upon the situation that faces us in this country with regard to the so-called dairy surplus that we have and the problems of overproduction that seem to be facing us.

I would first point out that surplus milk production has not been caused by the support price being too high. That has not been the cause of it.

Consequently, foregoing this April 1 adjustment will not necessarily reduce production. In fact I think it will have just the opposite effect.

Dairy farmers are not getting rich. The average Wisconsin dairy farmer and his family work from 130 to 150 hours a week and the implicit wages for this work, allowing nothing for return of his invested capital comes to about $2.89 per hour for each dairy farmer in Wisconsin.

No, the expanded production that we see is the result of other sectors in agriculture being so bad, rather than dairying being so good. We keep hearing about how good dairy farmers have it. It is only because the rest of agriculture is dying that we are able to even say that dairy farmers have it somewhat good.

I believe that the expanded production that we have had in dairy in the recent past has been the result of at least four things:

First, cheap grain, brought on in part by the Soviet grain embargo.

Second, cheap cattle prices, which have reduced incentives for culling the inefficient dairy cows.

Third, the unrestricted imports of casein. Here, I think, is a good point to contemplate. We are asking our dairy farmers to make sacrifices to help us fight inflation. What sacrifices are we asking of the New Zealand farmers? What sacrifices are we asking of the Australian farmers? What sacrifices are we asking of the Irish farmers in terms of all the casein that we are bringing in from those countries? I think they, too, ought to be asked to sacrifice to help us fight inflation.

The fourth thing, of course, which has increased production has been the lagging U.S. economy which has softened demand for dairy products.

I might also point out that in the face of cutting down on dairy supports on April 1, we are also looking at the other end of it, this administration closing off some of the pipelines for getting rid of this dairy surplus. I speak specifically of the school lunch program, the commodity supplemental feeding program and the Public Law 480 program, all of which utilize these commodities and all three of which have been proposed for very severe cutbacks by this administration.

Now, the dairy support price program, I submit, is not out of control and it is not as expensive as some would allege. In 10 of the last 30 years of this program, USDA purchases have been at least at current levels.

Now, the gentleman from Ohio (Mr. LATTA) in talking about the rule talked about the tremendous amount of commodities that the Federal Government has purchased. Let us look at the past. From 1979 to 1980 the Federal Government purchased 8.2 billion pounds milk equivalent of butter, nonfat dry milk and cheese.

In 1953-54, the Federal Government purchased 11.3 billion pounds milk equivalent of the same commodities. In 1961, 11.2 billion pounds and, in fact, from 1961 through 1964, for 4 years running, the Federal Government purchased in each one of those years more dairy commodities than they purchased last year, and yet we are being told that the Federal Government has this tremendous stock of dairy products right now on hand. The following table clearly illustrates this:

TABLE II.—*USDA Net Dairy Purchases in Selected Years*

Marketing year:	*Billion pounds*[1]
1953-54	11.3
1957-58	6.8
1961-62	11.2
1962-63	8.8
1963-64	7.5
1964-65	8.2
1967-68	7.0
1970-71	7.1
1971-72	6.6
1976-77	6.9
1979-80	8.2

[1] Milk equivalant.

Yes, they are larger than they were in 1976 and 1977, but they are not even as large as they were in 1962. So that is just a myth to say that we own all these surpluses. The fact is that the Federal Government right now has about a 23-day supply of dairy products and, if anything should happen to interrupt our dairy producing States, our dairy production in this country, we would be very glad to have that supply on hand.

We have heard that the net outlays for this program was $1.3 billion last year. Yes, that was the outlay, but not the net. The net after what the Government sold back and what they have on hand as inventories was less than $315 million last year, so this is not a tremendous billion dollar program as we have been told, but less than $315 million total for last year. As the result of that expenditure, we have these valuable stocks on hand. The following table shows this:

TABLE III.—ACTUAL TREASURY COST DAIRY PRICE SUPPORT PROGRAM, FISCAL YEAR 1980

[In millions of dollars]

Stocks on hand at beginning of year	569.8
Plus cost of purchases	1,262.4
Total	1832.2
Less value of ending stocks (available for resale or distribution)	1,272.7
Cost of products resold or distributed	559.5
Less income from products sold	285.4
Subtotal	274.1
Plus storage, handling and transport	40.6
Net Treasury cost	314.7

Source: CCC annual report.

Over a 31-year history of this program, this program has cost the American people less that $1 per person per year, so that our consumers could have cheese, milk, dairy products, at a stable price and a price they can afford.

Now, let us look at what is going to happen on April 1 when this 80 percent is done away with, as I am sure it is going to be, I understand the will of the House and I know what is going to happen today; but on April 1 of this year the price support for our dairy farmers will be at the lowest level it has been since 1949. Make no mistake about it, in doing away with the 80-percent increase, the parity level on April 1 will be about 73 to 74 percent. That is the lowest it has been on April 1 since 1949.

Again, the following table shows this:

TABLE IV.—PERCENT OF PARITY

Marketing year (except as noted)	Support level equivalent: Percent	Support level equivalent: Percent [1]	Minimum percent of parity required by law
1949	90		75
1950-51: January 1950 to March 1951	81		75

Source: U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service.

Now, my dairy farmers and I know the dairy farmers of Wisconsin and California and New York and Vermont and in every State in this country are willing and ready to help us in the battle on inflation; but they do not feel that it is right, and I do not feel that it is right to ask our dairy farm-

ers to go back to 1948. We are asking no one else in our economy to go back to 1948, and yet we are asking the dairy farmers. That is why I feel that in just doing away with the 80 percent, without putting some kind of a floor underneath that, is being unduly unfair to the dairy farmers of our country and not worthy of the legislative process here in the House and in the Senate.

Now, this action that we are about to take here in the House in doing away with the 80-percent support price is only one of many actions I feel that is going to be taken this year in trying to solve the problem of inflation by going after the farmers. I feel quite strongly that what we are going to face after this action is taken today is legislation later on this summer to even have lower price supports for all our farmers in the future.

Do you know what is going to happen? We are going to face next year the same thing we faced in 1973 and 1974, more and more dairy farmers going out of business. We will see our stocks depleted down to nothing. We will see the demand for dairy products at the same level as we have seen in the past and where are we going to get the nonfat dry milk for our food industry? Where are we going to get the cheese and where are we going to get the butter? The same place we did in 1973 and 1974, from our foreign suppliers. That is not what we want to happen in this country and I do not think that is what any Member of this body wants to happen; but without making certain that we at least keep the same kind of floor under those dairy prices that we have had since 1949, that is precisely what is going to happen and that our dairy farmers will, in fact, be the ones to bear the brunt of fighting inflation and that our consumers will wind up to be the losers.

One final thing. We are told so often that our Government through our taxpayers dollars support agriculture and support dairy farmers too much, that we support our agriculture too much in this country. Well, in a recent issue of Hoard's Dairyman, March 25, 1981, in an editorial a table was produced, a table showing the per capita support of agriculture in various countries of the world. Listen to this:

In the European Economic Community, the per capita expenditure of money in support of agriculture is $74 a year.

In Canada, it is $29 per capita per year in support of their agriculture.

In Australia, $14.

Sweden, $35.

Japan, $63 per capita per year to support their agriculture.

New Zealand, $29 per capita per year, and the United States—you guessed it—$12 per person per year to support the agricultural base of our economy.

The table follows:

TABLE I.—COST OF AGRICULTURAL SUPPORT, 1976

Country	Per person employed in agriculture	Per capita of total population
EEC	$2,251	$74
Canada	1,154	29
Australia	1,116	14
Sweden	1,100	35
Japan	1,042	63
New Zealand	816	29
United States	575	12

Those were in previous years. In fact, last year it even got worse. And last year for the entire European Economic Community the total was $37.5 billion for a figure of $144 last year per capita in the European Economic Community to support their agriculture, and what was it in the United States last year: $37. So there is the story.

We continue to pull the rug out from underneath our farmers, then we come back and ask our farmers to put their heads on the blocks to be the first ones to help us in our battle against inflation.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 additional minute to the gentleman.

Mr. HARKIN. Now, I know that this legislation is going to go through the House. I know that the President is going to sign it. Quite personally, I am not opposed to doing away with the 80-percent support on April 1, but what I am opposed to, I am opposed to that April 1 support level falling to a level that it has not been at since 1949. I feel that if anything that is what this administration should do. They can under current law set the minimum support level on April 1 at 75 percent, where it has been since 1949.

I thank the gentleman for giving me the additional time.

Mr. HAGEDORN. Mr. Chairman, I yield 5 minutes to the distinguished ranking minority member, the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Chairman, I urge my colleagues to support H.R. 1986 without amendment. Unless we take favorable action on this measure, the present law requires that milk supports be increased next Wednesday, April 1, despite the fact that the dairy industry now is burdened with its most serious milk surplus in years.

H.R. 1986 would eliminate the requirement for an increase in dairy price supports for the last half of this fiscal year, which also is the dairy marketing year. That is all it would do. It would not change the present level of dairy price supports. But to eliminate the April 1 increase would save the Government some $160 million in purchases of milk products to support prices according to the Congressional Budget Office.

And that saving in Federal expenditures is the sole intent and purpose of this bill—to send a signal to the country that the Congress indeed will follow the mandate of the people in cutting spending.

If we take favorable action on this measure, dairy price supports would stay at $13.10 per hundredweight instead of rising to $14, as required by present law. The change amounts to less than 2 percent of cash receipts from the sale of milk, according to USDA estimates.

If we do not take favorable action, the April 1 increase in milk price supports would mean a 7-percent rise in farm milk prices but it would also mean retail milk prices would rise about 7 to 8 cents a gallon. Consumer costs would increase about $370 million this year, according to the Department of Agriculture—an increase that a milk industry representative states would come closer to one-half a billion dollars.

In submitting his budget revision to Congress on March 10, President Reagan reiterated his commitment to his economic recovery program to curb inflation and reduce unemployment. He asked the Congress to "* * * remember that the primary responsibility is to the Nation as a whole and there is nothing more important than putting America's economic house in order."

H.R. 1986, which encompasses the administration's proposal in regard to milk supports, is considered to be the first real test of the President's economic recovery program. I support it and I urge my colleagues to do likewise so that we may demonstrate to the people that we are willing to take this first of many steps that must be taken to strengthen our Nation's economy.

I have uniformly supported dairy farmers in all of their reasonable requests for legislative protection of the industry. Dairy farmers and dairy cooperatives have needed a safety net to protect the industry from violently high and low demands for milk and dairy products. This bill I believe is in the long- and short-term interest of the industry. We will deal with permanent dairy legislation in the 1981 farm bill.

□ 1330

Mr. DE LA GARZA. Mr. Chairman, I yield 4 minutes to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Chairman, last week we celebrated Agriculture Day—the first official recognition of the importance that agriculture has in the lives of the American people. The major point of that celebration was to help people in the cities understand

that the health of the American economy, as well as the health of the American people, is tied directly to the health of the American agriculture community. Truly, agriculture is the heartbeat of America.

Today, we will vote on the Reagan administration's proposal to delete the semiannual adjustment in the dairy price support program. Previous administrations, both Democratic and Republican, have done exactly this as a means of fine tuning the dairy price support program. I will support this effort to reduce excess stocks of dairy products.

Many of us however know that this bill is only a partial answer and alone will not solve the problem faced by dairy farmers, livestock producers and grain farmers.

My preference has been to address the problem in a gradual and less disruptive manner. I want to send the dairy farmer a signal that will assure a stable supply of milk. This bill, when coupled with the administration's failure to submit in a timely fashion an overall dairy program proposal for the 1981 farm bill does not send that signal to the American farm community nor to consumers.

In committee I supported an outright floor of 75 percent because without the April 1 adjustment, by September parity will be less than 70 percent. Obviously, such a turn of events will lead to small and mid-size dairy farmers going out of business. A floor of 75 percent of parity coupled with a sellback provision of 110 percent for CCC stocks—an increase of only 5 percent—would not allow these bankruptcies to occur. It he so chose, the Secretary of Agriculture could increase the sellback provision to 110 percent now.

Further, I am concerned that Members understand that by this vote we are not taking the first step toward throwing out the baby with the bathwater. The dairy price support program must remain an integral part of the 1981 farm bill.

The dairy price support program works. Over its lifetime it has provided reasonable returns to the producers and it has assured consumers of an adequate supply of pure and wholesome milk and dairy products. We must all remember that this program is meeting the goals of those who wrote this legislation in 1949.

In terms of the overall Federal budget this program has cost very little. In fact, when one looks at the cost to the American consumer in real terms these basic foodstuffs are lower in cost than they were when the program began. In terms of farm productivity in 1950, per cow milk production averaged 5,314 pounds and today average production per cow amounts to 11,875 pounds. This program has helped the farmer double his productivity and when this fact is coupled with the reduced amount of hours worked by Americans it shows that consumers buy more with less. Farm productivity has been passed on to the consumer. Thirty years ago 16 minutes of work earned enough money to buy one-half gallon of milk—today less than 9 minutes of work are required to buy the same item. Yes; the program does work and we are all the beneficiaries of it.

Once again I want to remind you that while we will vote to reduce CCC stocks today, this action alone will not eliminate the problem this action is intended to cure. Today's action is temporary and the long-term solution can only be addressed in the upcoming farm bill. In that bill we must address the impact that low grain and beef prices have on overproduction of milk and the accompanying buildup in dairy herds.

Before this year is out you will be asked to again vote on the health of the American dairy farmer and by extension, the American agriculture community. At that time I hope all of us will be able to support continuation of a dairy price support program at no less than 75 percent of parity and a stronger grain support section of that legislation. Increasing the sell back provision to 110 percent increasing grain and beef prices, will more than this bill or any other action, insure against continued overproduction of milk and increased expenditures for CCC dairy stock.

Mr. Chairman, my dairy farmers are willing to help in the fight against inflation and I will vote today for this bill, but I will continue to work to make sure that my farmers are not the only ones who are asked to cut back. I will continue to work to assure stability in the dairy support program so we do not destroy the inexpensive and ready supply of milk those hard-working dairy farmers have provided for our children and families.

Mr. HAGEDORN. I yield 3 minutes to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Chairman, this bill is requested by the administration, but our action today is much more than giving a boost to the administration. When we report favorably this bill, we will be winning one for all of us—consumers, taxpayers, and dairy farmers alike. This is truly one of those extremely rare agricultural bills which helps everyone—the consumer, the taxpayer, and the producer.

You say with astonishment, this bill will help the dairy farmer? Of course, it will. The dairy farmer is in deep trouble because of the 80-percent inflexible price-support system that has now been functioning for about 1½ years. This has caused an enormous buildup of Government stocks. They hang over the market. They mean trouble for dairy prices and prospects. The April 1 increase will simply make a bad situation even worse, so enactment of this bill is urgently needed in the interest of the dairy farmer.

Large Government stocks hurt the farmer, and the only sensible thing to do is to give the Secretary of Agriculture the authority to pass over this otherwise mandated April 1 increase. In other words, let him hold the line on dairy prices. This bill will not result in 1-cent reduction in the price support for dairy products. It will prevent an increase, but it will not result in any decrease. Do not buy the notion that all dairy farmers are—if you will pardon the expression—crying in their milk over this bill. That simply is not true. Some of them are, but there are a lot of thoughtful dairy farmers that see the absolute necessity for the enactment of this bill.

In fact, land grant universities recently took a survey of the States of Ohio and Michigan, asking dairy farmers their attitude on farm price supports, including dairy supports. You may be surprised to learn that about 30 percent of the dairy farmers polled in those two States wanted nothing to do with Government support programs.

So by voting for this bill you are actually being helpful to the dairy farmer as well as to yourself as a taxpayer and a consumer.

It is true that the President wants this bill. It is the first test in this House of his program to hold the line on Government spending, and the President will be pleased to see this become law. A lot of other people will be, too. I have been impressed with the breadth of support by the American Farm Bureau Federation, Common Cause, Pizza Hut, and Ronald McDonald, just to name a few. I urge passage of H.R. 1986.

Mr. DE LA GARZA. I yield 3 minutes to the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. Mr. Chairman, some time ago I saw a cartoon depicting a man who could sympathize with today's agricultural producers. He announced to his wife that he had bad news and good news. The bad news was that he had been fired. The good news was that his former boss had told him he was now a leader in the fight against inflation.

One more sector of agriculture is being asked to continue what has apparently become a tradition, a tradition I would like to see broken. Farmers are once again the point team in the fight against inflation.

The farmers of this country, in concert with our food production and transportation system, provide food for a hungry world. This bill is before Congress because we have too much milk. We hope that by skipping the April 1 price adjustment, dairy farm-

ers will cut back on their herds and not as much milk will be produced. What a problem: Farmers are producing too much food. We need to be selling more food around the world.

The farmers of this country have through the years provided the major foreign policy weapon: Food. Through grain embargoes we have told the world, if you want us to feed you, you had better do it our way. Farmers are among the most patriotic citizens you will find in this country. But they find it hard to understand why it is important to embargo grain to Russia, but it is all right to sell machinery, spare parts, computers, and the list goes on and on. They question why we allow subsidized foreign casein to be imported into this country, competing with our own domestic milk products.

I am going to vote to skip the April 1 increase, not because I think the dairy farmer is making too much money because he is not. This vote puts those of us representing agricultural areas on record that agriculture is committed to cutting Federal spending and willing to take its cuts. We will expect the rest of the economy to do the same. We will expect help with casein imports, and we will expect a strong farm bill this fall.

Mr. Chairman, I yield back the remainder of my time.

Mr. HAGEDORN. I yield 4 minutes to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Chairman, approximately 6 weeks ago, President Reagan unveiled an economic recovery program for our country that has as one of its primary goals a reduction in the rate of Federal spending. Such reductions were to occur in virtually all Government programs and affect all sectors of the American economy.

At the heart of our attempts to reduce the rate of Federal spending is a realization that excessive spending has created the inflation we are currently faced with. All Americans have suffered the cruel economic hardships of inflation and the President should be commended for his attempts to bring inflation and Federal spending under control. I certainly am committed to assisting him in reducing Federal spending.

Today, Mr. Chairman, we are considering the dairy price support program and, specifically, the elimination of this year's April adjustment in that program. We are not, however, considering the entire price support program or the other factors which influence the dairy industry.

I am gravely concerned that consideration of the April adjustment alone, without concurrent consideration of the entire dairy price support program and the other factors that influence the dairy industry, will lead the House into making a hasty decision it will soon regret.

I am not going to tell the Congress that there is not an overproduction problem in the dairy industry. There is such a problem. Similarly, I am not going to deny that the Commodity Credit Corporation had a line item of $1.3 billion for dairy purchases last year. The CCC clearly made those purchases.

Because of these facts, both the Carter and Reagan administrations have proposed the elimination of the April adjustment in dairy price supports. Proponents of the elimination argue that production will decrease if the April adjustment does not occur and, therefore, Government spending on the program will go down.

That is a nice economic theory; however, it ignores the reality which faces the dairy farmer on a daily basis.

In testimony before a recent field hearing of the Livestock, Dairy, and Poultry Subcommittee in Dubuque, Iowa, one of my constitutents noted that the price of milk rose 6.9 percent in 1980. Most of that increase went into the pockets of retailers and wholesalers, not dairy farmers.

The costs of his production, on the other hand, rose astronomically in comparison. For example, herbicides and insecticides in the last year increased 20 percent, oil increased 13 percent and some costs of production rose as much as 45.8 percent.

By eliminating the April adjustment in dairy price supports, the Congress is retaining the current limit on the per-unit price a dairy farmer receives on his production. Proponents of the elimination, therefore, argue that they have not cut the dairy farmers total income. This is true. The have, however, severely cut his real income.

And it is this cut in real income that will be the demise of any theoretical reductions in dairy production or Government spending intended by the elimination of the April adjustment.

Consider for a moment, you are a small farmer. Your interest costs are $30,000 annually. In addition, as mentioned earlier, all of your costs of production are increasing. Basic farm economics will tell you that your production must increase to keep real income at the same level.

Simply stated, when a dairyman is faced with a reduction in his real income, because total income is static and costs of production continue to rise, he will produce more so as to recover the diminished commodity profit over a great amount of production. This is the only way he can keep his real income at last year's level.

Obviously, there will be little or no savings to the Government if production increases and the CCC must continue to purchase even greater amounts of dairy products.

Mr. Chairman, I am firmly committed to reducing the rate of Federal Government spending. The plan we presently have before us simply will not accomplish that result.

There is a way, however, that we can reduce the present Government stockpiles of dairy products and the Federal cost of the dairy price support program which would benefit the dairy farmer as well.

First, the April price adjustment must not be eliminated. Rather, the entire price support system must be considered as a package with, not separate from, the following points.

Second, immediate action should be taken to stop the unrestricted importation of casein for human and animal consumption.

Third, greater attempts must be made by the Federal Government to promote and export American dairy products.

Fourth, the CCC buy-back level for dairy commodities should be increased to encourage more products to be in private hands as well as greater sales efforts of those products.

Fifth, the request for a hearing on a petition for changes in Federal milk marketing orders for reconstituted milk should be denied.

This, therefore, is the package that must be considered by the Congress insofar as the dairy industry is concerned. We will be back here this summer to consider many segments of this package in the farm bill in an attempt to preserve a fair dairy price support program of benefit to the farmer and the consumer alike.

To act now on but one of the parts of this package only serves to thwart our efforts to continue a program that has accomplished the purpose for which it was intended.

Dairy production and Federal spending will go up, not down, if we eliminate the April adjustment. We are telling you that right now. So, when consideration of the dairy price support program again occurs this summer in the farm bill, we do not want to hear that the intended savings which were to result from the elimination of the April adjustment were not realized and that further cuts must occur. You are forewarned of that result right now.

Mr. Chairman, I urge my colleagues not to eliminate the April adjustment in dairy price supports by itself. Its elimination simply will not reduce dairy production or Federal spending on the dairy program.

□ 1345

I want it said for the record that we told you so, that this thing today will not work. The way to deal with excessive milk production in this country is to deal with the whole parity program, is to deal with the casein issue, it is to deal with the buy back, it is to deal with the make allowance.

I do not know of hardly any Member of Congress who has come in here and advocated that the farmer not do his part in economic recovery. But we are saying: This is not the way to do it. We would rather have to look at the whole package.

Mr. HAGEDORN. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Chairman, I served as a member of the Committee on Agriculture when the 1977 general farm bill was written to include the dairy price support mechanism causing the April 1, 1981, semiannual inflation adjustment. I voted for the 1977 bill in committee and on the House floor. Further, I voted to extend those same terms for 2 more years on November 8, 1979.

I have always supported the dairy price support system.

In addition, according to the Louisiana Department of Agriculture, three parishes, all in my district, produced three-fourths of all of the milk in my State. My congressional district, further, is one of the largest dairy-producing areas in the South.

I believe I am still correct in stating that the only two cheese plants in the South are in my congressional district. Dairymen in my district have a net income of $100 per cow, and an average herd size of 100 cows. That produces for dairymen an average net income of only $10,000 annually. We all know that is not much money today.

Dairy farmers today must diversify agricultural production or seek supplementary income from other sources to be able to make it today. It is with this particular point fully in mind that it is most difficult to impose this extra economic hardship upon them.

Mr. Chairman, I am not anxious today to unravel the legislative assurances we gave dairymen in 1977 and renewed in 1979, but I must vote to deny the April 1 increase because it is one, indeed the first one, component of a total package of budget reductions recommended by the administration as the only blueprint or plan we have to stop inflation and save our economy.

Inflation indeed is the worst problem that dairymen have in our economy. Therefore, we really cannot destroy the only plan we have to combat it.

Indeed, this is the first vote on this program, and it is not protected by packaging we expect to be found in later rounds of budget cuts, where dozens and perhaps hundreds of other reductions will be found in one bill to be voted on up or down without being fully exposed and vulnerable to the amendment process. This first one stands all by itself. It is most difficult for those of us who support and represent the dairy industry to make this vote.

I intend to maintain this attitude, however, by supporting all of these cuts as they come before me throughout the budget revision process. In return, the dairymen I have talked with in my district do not object to my vote today because they are willing to do their part, provided everyone else does theirs, to save the economy of this country. They just do not want to be the only ones to bear the cuts. I find their attitude to be more than fair. Our dairymen are honorable Americans who respect and love the work ethic. They know what the cuts have to be across the board, including upon themselves, and they also know the loss will be temporary, in return for a long-term victory for us all.

If I can support this cut and dairymen can, then I think surely you can. If you cannot, then where is your solution to save our economy? If not this program, then what program? If not now, then when? If not you, then who?

Mr. DE LA GARZA. Mr. Chairman, I yield 3 minutes to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Chairman, I do not stand before the House today and ask that we try to fight the legislation before us. I think there is widespread support for the legislation, and for that reason I think we ought to accept the inevitable. But I think when we consider honest economic reform, when we look at those areas where we can truly have an impact on the budget and truly try to turn this economy around, I reiterate the statistics given us by the gentleman from Iowa. The $1 per year per person cost that this program means to the American people is worth that price.

We need compare that $1 only to the $400 per person that we now pay for imported oil. Compare that to the $350 that we pay per person for the interest on the the national debt. And we are today considering $1 per year per person for good dairy products that are produced in the United States.

I think that every single dairy farmer anywhere in this country will repeat what my dairy farmers told me this last weekend:

> We are willing to support the President, we are willing to go along with the Congress in fighting for economic reform, but keep in mind what that cost is to the dairy farmers across this country today.

As a result of this legislation, we can fully expect that each and every dairy farm family on the average will lose $6,000 so that the American consumer can lower a part of that $1 per year per person.

Keep in mind what minimum wage is today. When we consider that $3.35 is what we are willing to pay the American worker, we need only compare that to $2.89 we now pay for the dairy farmer per hour for the products that he provides. Keep in mind that we have an abundant supply of good quality dairy products in this country that we have come to accept as a routine fact. But that is not true in other countries, not in those parts of the world where dairy products are scarce. We have good dairy products today, not because we have provided the dairy industry with a preponderance of Federal dollars, but because they have made the very best of a program and they have made it work well.

I do not ask that we fight this dairy increase on April 1, but I do call on the administration to do what they have the administrative power to do, and that is to set a floor at 75 percent. There is no time, not 1 year, since 1949 that we have dropped below 75 percent of parity. Not one. And yet today we stand here, debating this issue, we are considering a parity level below 73 percent for the first time.

The administration can change that, and on April 1 I think it is incumbent upon them to set a floor of 75 percent so that we do not put the entire load, the whole effort to balance the budget and produce economic reform on the backs of the dairy farmers of America.

Mr. HAGEDORN. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. ROTH).

Mr. ROTH. Mr. Chairman, the dairy farmer, like everyone else, is suffering from severe inflation. I know that the dairy farmers are more than willing to bear their fair share of Federal expenditure reforms to get a grip on inflation. However, we must avoid the temptation to make the dairy price support program bear an unfair burden of the budget cuts, thereby inflicting an unfair hardship on the average dairy farmer.

All prices have increased, increased to a point where my wife dreads going to the grocery store or to the supermarket. But dairy products, I feel, are still a good investment and are a better buy today than they were 10 years ago.

In 1970, it took 10 minutes of labor to purchase half a gallon of milk. Today it takes 8 minutes. In 1970 it took 15 minutes of work to purchase one-half gallon of ice cream. Today it take 14 minutes.

Yes, everything has gone up and up, but dairy prices have gone up less than other products.

Those of us who advocate the cause of the consumer should remember that the small businessman and the farmer, especially the dairy farmer, are the best friends of the consumer. If we drive the small farmer off his farm, if we close down small businesses and drive our consumers into the arms of the large farmers and the chainstores, nationwide chainstores,

then we will see prices skyrocket for the consumer.

We are putting our dairy farmers, with this legislation, in an untenable position. I have taken a poll of over 72,000 dairy farmers and people in related businesses in the State of Wisconsin, and one quote I think epitomizes what the respondents have said. They have said:

Farmers have fixed costs. If the Government lowers our prices, we are forced to produce more, just to meet those fixed costs. Lower prices on milk will not decrease the supply. More milk will be produced to meet the rising costs of the farmers.

Let us not be so myopic. We must not create a severe future problem for a short-range gain. Our farmers are America's greatest economic asset. The future issue in the world is not going to be oil or energy or anything else; it is going to be food, because in only 19 years, in the year 2000, we are projected to have on this globe 6.2 billion people. We have approximately 4.2 billion today. That means for every two people you see today, you will see three in only 19 years, the year 2000.

Where is the food going to come from to feed this skyrocketing and expanding population?

Let us not destroy America's greatest economic asset. Let us not destroy the farmer for a short-term gain.

Mr. HAGEDORN. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. PETRI).

Mr. PETRI. Mr. Chairman, I wish to associate myself with the remarks of my colleague, the gentleman from South Dakota (Mr. DASCHLE).

Mr. Chairman, this is a bitter pill to accept.

We are seeing our dairy farmers being singled out while the tobacco and other farmers seemingly go scot free of sharing their load.

We in Wisconsin do not like to be cut anymore than anybody else. Specific cuts are always very painful and this first one is a terrible thing for people in my area.

This cut will cost the dairy farmers over $5,000 apiece on the average.

So it happens that the first ox to be gored is my own and my constituents' own.

Nonetheless I am going to vote, although very reluctantly, for the President's bill.

We have to look at the bigger picture. Inflation is out of control. Rising taxes are crushing the vitality of our people.

In his efforts to get a handle on spiraling Federal spending the President has proposed a national recovery program.

As part of that he has called for adjustments in the dairy price support program. I am willing to accept that.

But I want to remind my colleagues that we are not the only ones who have programs that the President has recommended cutting.

And I hope my colleagues show the same sort of determination when it comes time to cut the tobacco program, or aid to big cities, or eliminate some sort of bureaucratic fat or another.

I also ask that in the glow of success over this bill that we do not go on to destroy the entire dairy program. A properly functioning program will balance the market for dairy products and prevent wide swings of scarcity and abundance which are bad for everyone.

If the dairy program is working right, and if it is not undercut by massive imports, it should not cause large Government purchases year after year.

There are no sacred cows, Mr. Chairman, and I do not want to hear a lot of caterwalling or see a lot of crocodile tears when we get around to cutting somebody's else's program. Because there are those of us who are willing to take the cuts even when it affects programs in our own districts.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. PEYSER).

□ 1400

Mr. PEYSER. Mr. Chairman, I just want to be on record as saying that New York, as the gentleman probably well knows, is probably one of the largest dairy producers in the country as well as one of the largest dairy product consumers in the country. I and the majority of the New York delegation will be supporting the President in this effort on cutting back on the budget. It is a difficult acceptance for New York dairy farmers as well, as it is for dairy farmers in Wisconsin or Illinois or anywhere else.

I met with some dairy farmers yesterday from New York and they made it very plain, unhappily, but they were willing to accept this and they felt they could live with it. So I will certainly be voting in support of this measure.

As I say, most New York Members will join in that particular effort.

Mr. HAGEDORN. Mr. Chairman, I yield 5 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I have listened very carefully to the debate, especially to the great eloquence of the gentleman from Illinois. I would like to say that outside of his conclusion I respectfully disagree with everything he said; however, he did present his information well.

I would like to try to destroy some myths concerning the dairy program. I would like to show you, through the use of charts, what the program really does. I would like to remind everyone that what we do here today may have the opposite effect of what is intended.

First of all, let us consider the taxpayer savings if we cut back the support program.

The program does not cost $1.3 billion a year. This is the inventory purchase cost, not the real cost to the taxpayer. Let us look at the history of the operation of the program.

I asked my staff to put together this chart. I asked them to tell me how much of the CCC inventories of dairy products spoiled. They came back to me and they said, "Mr. Jeffords, we cannot even put it on the chart. The quantity would not show up." The red is for foreign donations by the United States. Sometimes we donate to other countries. The green is for domestic donations such as the school lunch programs, military hospitals, and other institutions. The black is other disbursements. The thin blue line is put there symbolically to show what has been wasted. What happens during those years when Commodity Credit Corporation purchases are low? The schools, et cetera, are required to go out on the open market and purchase, and we give them money from Federal appropriations to do that.

There really has not been any taxpayer loss, any waste, and no abuse.

I also want to point out another thing that is very, very important to remember. The last time that an administration picked on the dairy industry to say, this is our symbol, this is our fight against inflation, look at what happened. There is a similarity between that time and this. At that time we had problems with the grain sales. We were hoodwinked by the Soviets who bought a majority of our grain.

What happened then? The price of milk escalated because the support price for milk was too low. The grain feed prices got so high that milk production went way down.

The administration said then: "We have to fight inflation." Let us import milk products to keep consumer prices down. What happened? The price to the consumer did not go down as expected. The price to the farmer did drop. We have a rachet effect.

The farm prices then, when the imports came, went down and who was the loser? The consumer.

I am worried we are going to do something similar this time.

Let me go on to the next chart.

Let us take a look at what dairy price supports have done to the consumer. The consumer should be saying support the program. Dairy products overall are 27 points below the CPI for all food commodities which includes dairy. So this program is working well. Consumer dairy prices are about 20 points below the CPI. This program has worked so well that the consumers have benefited.

Let us take another example. Let us take a look at some of our favorite drinks, cola. Look where dairy products are relative to cola, about 25 to 30 points below the increase that we have seen in the price of cola since 1973.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

Mr. JEFFORDS. Would the gentleman yield an additional minute to me?

Mr. HAGEDORN. Mr. Chairman I will if the gentleman will yield to me.

Mr. JEFFORDS. I will be happy to yield to the gentleman from Minnesota.

Mr. HAGEDORN. I want to compliment the gentleman for preparing these very fine charts. I do not think we are here today suggesting that the dairy farmers have been skimming the cream off the Federal trough, but in fact we do have a problem and where production is exceeding demand, we need a temporary adjustment and certainly support of these programs, I think, will continue in the Congress.

But I compliment the gentleman on the fine work he has done.

Mr. JEFFORDS. I thank the gentleman from Minnesota. I cannot disagree with him. I cannot stand before this body and say we should do nothing at this time. I would not have any credibility with this body if I said we did not have a problem in the dairy industry in terms of production. I am concerned for the first time in history, that we are going below 75 percent. I am concerned about the future and that so many farmers will be forced out of business. We may end up creating a worse problem for the consumer, the taxpayer, than we have right now.

Let me go on to the next chart. There is some myth that the dairy farmers are making a lot of money. If you take a look at industries as a whole——

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has again expired.

Mr. HAGEDORN. Mr. Chairman, I will yield the remainder of the time which the minority has.

The CHAIRMAN. The gentleman from Vermont (Mr. JEFFORDS) is recognized for 1½ minutes.

Mr. JEFFORDS. I will go briefly through these charts. One chart shows the return on equity of dairy farms versus all manufacturing. It separates large, medium, and small farms. If you look at the return on equity for those farms, it becomes very, very obvious to anyone that our farmers are not making money. Farming is highly competitive; it is a very hard business. It is just not a profitmaking business; but a way of life. Let us take a look at the real price, in minutes worked, that it takes to buy dairy products. It has gone down over the years. It now takes less of your money to buy dairy products than in 1950 and substantially less. The program is working well.

My final message is that we must not overreact. Let me quote Secretary Ling when he testified before the Dairy, Livestock, and Poultry Subcommittee on March 25. He said, and I quote:

> The dairy industry must be handled carefully because short term mistakes may have very long lasting results.

So the point that those of us who come from dairy States want to make is that we must be very cautious when it comes to what we do now and in the future.

Yes: we must do something now, but it is so critical that we do not overreact. We may find ourselves right back where we were in the early seventies when the big loser was both the consumer and the farmer.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. Mr. Chairman, I rise to urge my colleagues to give careful consideration to the way in which they will vote on Representative FINDLEY's administration bill to repeal the final adjustment of the dairy price support.

The most obvious and compelling reason to reject this proposal is that it is a callous breach of faith with America's dairy farmers; 4 years ago, we voted in favor of passage of the 1977 farm bill. Among other things, this legislation mandated the continuation of a successful Government program which maintained stability in the market for a commodity precious to millions of Americans: Milk.

The milk price support program should be looked at in an historical context. In the early 1970's, President Nixon attacked the program publicly and held down prices while allowing increased imports. Consequently, an average of 20,000 dairy operations per year went out of business for 3 consecutive years. Milk production dropped, and what followed was the sharpest increase in dairy prices ever experienced by consumers. It should be noted that in the years that the present 80 percent of parity support price has been in effect, the increase in the cost of dairy products has gone up at an average rate of 12 percent less than the price rise of all other foods. Thus, the consumer has benefited greatly from the stability this program has.

There is no question that we must make some effort to reduce the Government stocks of dairy products on hand. There is no disagreement on the issue itself, but rather on the method by which it is done. Perhaps as important as revising the price support mechanism is the question of changing the Commodity Credit Corporation's (CCC) sell-back policy. Currently, the CCC buys up milk and dairy products, stores these commodities, and then sells the stores back to processors at 105 percent of the current purchase price. Obviously, with interest rates over 15 percent, processors have no incentive to retain inventories. Instead, they use the CCC as their reserve and, months later, buy back stocks at what amounts to a mere 5 percent increase or loan. Nor does the processor pay any of the warehousing costs. In essence, the taxpayers subsidize the storage costs, which figure large into the USDA's dairy program, and pay the added interest rate as well. The sell-back price should be raised; this would reduce the cost of the program.

Milk production—and overproduction—is clearly related to the price of grain and feed. During the past 2 years—until just recently—grain prices were very low. More cows were kept because feed was cheap, milk prices were steady, and beef prices were also quite low. The result: Overproduction. Now with grain prices somewhat higher, some dairy cows are being culled out and sold. This will reduce production and help bring it into line with demand.

I realize that farmers constitute only 2.8 percent of the Nation's populace, and an even smaller percentage is involved in dairy farming. For this reason, I submit that the dairy vote has become a symbolic rather than a substantive one.

The record will demonstrate that I have always been in favor of cutting the costs of Government and balancing the Federal budget. But it will also show that I have treated proposed reductions on a case-by-case basis. I urge my colleagues, then to cast their votes on this question in a manner consistent with fairness to the dairy farmer.

Mr. Chairman, I came really prepared to make a different speech, but I want to address one point that has been repeatedly raised on the minority side today and on occasion from our side and that is that we must not, we will not and we shall not ask the dairy farmer to stand alone, that all are going to bear this equally.

This sounds remarkably like the rhetoric of the Carter administration when they put on the embargo, that the farmer would not bear this burden alone, we should all bear it equally.

Let me suggest to my friends on this side of the aisle, there is no intention of this administration to ask everybody to bear the cost equally. We have been recently, for example, in another committee, at work on an investigation of the Energy Department and the investigation within the Energy Department of the special counsel's office. The proposal of this administration is to strip that office of 80 percent of its resources. This will mean that essentially the $7 billion additional that the American consumer bore because they

were overcharged by the oil companies during the price regulated period will go essentially unchallenged. The oil companies have already started backing out of tentative agreements to settle out of court.

Now there is no intention of this Secretary of Energy to bear that cost equally. So when we say here today that we are going to insist that all bear it equally, I am going to challenge the Members of this side of the aisle to join with us when we give them a chance to make good on their commitment today that all shall bear the cost equally of the Reagan program because they are not geared to do that.

If my friend from Illinois, my friend from Minnesota, and others join us when we come in on that particular issue, I will begin to believe some of the rhetoric about all bearing it equally.

But as of this date, Mr. Chairman, I have no inclination whatsoever that this administration intends to make the cost of their program bear evenly on all the American people, for they do not, if you look at the budget, they simply do not mean that.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. I thank my distinguished chairman for yielding one more time to me during this debate.

I want to end up my comments on this bill by once again making it as clear as I can to the Members of this body that when this bill passes, I do not say "If," because I know that it will pass, and after the President signs it and I do not say "If", I know that he will, that on April 1 of this year the dairy price support for our dairy farmers will be at a level less than it was on April 1, 1949.

I want to make that point once, twice, as many times as I have to make it, so that the people in this body understand what is happening and to send a message to this administration that our dairy farmers are willing to join in the battle against inflation, but do not send them back to 1948.

It is now up to the administration. After this legislation passes, it will be up to this administration to do what every administration, Democratic and Republican, has done since 1949, and that is to make sure that on April 1 that the minimum dairy support prices will be 75 percent.

Mr. DE LA GARZA. Mr. Chairman, I yield myself the balance of the time.

Mr. Chairman, I rise only to say that I concur with the remarks of the gentleman from Iowa and will assist him in every way possible in order to achieve that end.

Mr. OBERSTAR. Mr. Chairman, I rise in opposition to the legislation that will eliminate the semiannual increase in dairy price supports.

I do strongly support an amendment to establish a 75-percent of parity price support, which, though inadequate, would at least leave in place a price support mechanism and alleviate a hardship for the smallest and neediest among dairy producers.

A 75-percent price support program would, according to Agriculture Committee testimony, save $120 million in Government outlays compared to the claimed $147 million reduction that would result from passing H.R. 1986.

Passage of the Reagan administration's proposal will leave dairy farmers without a price support program for the first time since 1949 when dairy price supports were initiated. The price support program has not made dairy farmers rich. It has, however, established a measure of stability in milk production and milk marketing. It has kept a substantial number of family farmers in operation. It has preserved the institution of the American family farm.

Nonetheless, even with the price support program, the family dairy farm has at best operated on the margin of our economy, not sharing fully in the Nation's general prosperity but not quite a candidate for welfare either. I make that statement about those dairy farms that have survived; there are hundreds of thousands across this country that have not survived and I fear that those remaining may go under one by one if this bill passes and if no price support program is included in the upcoming omnibus 4-year farm bill which will be considered later in this session.

This past Friday, March 20, I held a farm forum at Almelund, Minn., in my district, to hear the views of dairy farmers about the pending legislation. What I heard was shocked disbelief that the Federal Government would abandon its commitment to dairy farming, that it would leave dairy farmers exposed to unequal and foreign government subsidized competition and that there is no consideration given in this legislation to protect against ever-increasing imports of casein which are winning the growth segment of the domestic dairy market.

I would like to share with my colleagues today comments that I have received from folks on the firing line, the dairy farmers out there in my district who are not making it rich but just barely making it, who are part of this great American free enterprise system of ours and are asking only for an opportunity to continue that tradition of private and personal initiative:

Frank Grundmeier—Hinckley: I believe that the proposed reforms would hurt the smaller family farms more than the large corporate or partnership farms because the larger operations can offset some of the low profit margin by the tremendous volume they are capable of. These new proposals could possibly be the beginning of the end of the small, but efficient, family farms.

Mr. and Mrs. Dorall Anderson—Moose Lake: Lowering prices would force dairymen to milk more cows in order to keep income up to meet payments and expenses.

Mr. and Mrs. Ken Murphy—Babbitt: If billions can be spent on overseas projects and military spending, it certainly stands to reason that the farmers of our own country should be supported.

Mr. and Mrs. Dave Skiba—North Branch: If we do not receive the dairy price support increase, we will have to increase our production either by increasing the size of our dairy herd or the production per animal in order to maintain our income over production costs.

Mr. David Svedberg—Cook: We send millions to El Salvador for arms but no powdered milk or butter to the starving in Somalia.

Mr. Albert L. Wanous—Director of Land O'Lakes: In 1980 it is estimated that 61 percent of all dairy operations had less than 30 cows. Only 5 percent had 100 or more cows. The Dairy Price Support Program has provided the price stability to maintain the family farm.

Mr. Chairman, in the short run I believe that we must preserve for the next several months at least a dairy price support system. In the long run I believe that we must, and for several years have advocated, that we convert to a system that includes in exchange for dairy price support production limitations similar to the corn and wheat signup programs or a quota system similar to that which operates so effectively in Canada and hope the Committee on Agriculture will give extensive consideration to some such innovative concept that will preserve the future of dairy farming in America.

I yield back the balance of my time.

● Mr. WALGREN. Mr Chairman, I rise in support of President Reagan's proposal to stop the April 1 automatic increase in Federal milk price subsidies and will cast my vote for H.R. 1986. On March 13, I wrote Congressman HARKIN, chairman of the House Subcommittee on Livestock, Dairy, and Poultry, urging that his subcommittee approve the Reagan proposal. I am pleased that the committee did in fact take that action and report this bill.

In recent years, the production and supply of milk have greatly outpaced consumption to the point that surpluses abound and the Federal Government is forced to buy almost 9 billion pounds of milk in the form of butter, cheese, and nonfat dry milk to keep prices artificially high. In January, the Federal Government purchased half of all the butter produced in this country. What this support system and the automatic hikes really mean are higher and higher grocery bills for our families. This antiquated system also makes Government purchases more expensive and is an enticement to dairy farmers and large dairy cooperatives to continue to overproduce milk, swelling the supply to unneeded proportions.

The Community Nutrition Institute has estimated that the April 1 increase of 7 percent would add 10 cents to a pound of butter, 9 cents to a pound of cheese, and 5 cents to a pound of nonfat dry milk. Eight cents would be added to each gallon of milk. With inflation rising at a rate of 12 percent last year, with heating and gasoline bills placing a crunch on the family budget, most Americans just cannot afford more inflation in their family food bills.

Not only can we bring some relief to family pocketbooks, we can also make a dent in the Federal deficit by passing this bill. The costs of the dairy subsidy program will have risen from $24 million 2 years ago to $1.7 billion if we do not stop the automatic increase. President Reagan has estimated that dairy subsidies could reach $3.2 billion by 1986. By not upping milk prices, taxpayers can save approximately $212 million in purchase costs and $18 million in storage, handling, and packaging of Government purchases. Again, according to the Community Nutrition Institute, by stopping the increase—

Consumers will pay over $440 million *less* for an estimated one percent more in dairy products, 0.42 index points will be shaved off what the food CPI would otherwise rise to during the summer, and the cost of the food stamp program would be spared an additional $17 million in cost between April and October 1981.

I applaud the President for taking on one of the time-honored sacred cows of the Federal budget. Creating artificially high prices and Government-guaranteed markets is simply not free enterprise. Long-term reforms of Federal farm programs are needed. Quick fix, inflationary farm price supports are not the answer. I urge my colleagues to support the President's proposal. In my view, most Americans will welcome our effort to restrain continually increasing family food prices.●

● Mr. CHAPPIE. Mr. Chairman, I represent a constituency in California where agriculture is the mainstay industry. With this in mind, I would like to make my support, and that of the majority of my constituents, known for the administration's proposal to forgo the April 1 dairy price adjustment.

While the Agriculture Committee debated the pros and cons of the semiannual dairy price supports, I gave careful consideration to the testimony of those who favor the April 1 adjustment. Their arguments could not offset the fact that the semiannual price support system has outlived its usefulness and, in my mind, gone haywire.

Today, many Americans are envious of the luxury currently enjoyed by the dairy industry where a farmer can rely on the Government, if not milk processors, to purchase the milk he produces. For the Government to guarantee a higher than market price for dairy products is extra icing on the cake. This is certainly not a luxury enjoyed by the majority of hardworking, self-employed Americans.

The facts are the U.S. Government is no longer in a situation to offer this luxury. One reason we can no longer ask the taxpayer to purchase dairy products in this manner is that we face the problem of where to store the enormous amount of surplus stock. Americans are asked to foot the bill in order to store, transport, and process a mind boggling amount of surplus stock. As of February 20, 1981, the U.S. Government owned 355 million pounds of butter, 253 million pounds of cheese, and 575 million pounds of nonfat dry milk. Clearly, a signal must be sent to our dairymen to cut back production until our market can once again determine supply and demand. If Congress does not take action to eliminate the April 1 adjustment, our constituents can look forward to paying an additional 10 cents for milk, 9 cents for butter, and 8 cents for cheese, while our budget deficit is pushed closer and closer to the $1 trillion mark.

It is important to note that elimination of the April 1 adjustment is only a stopgap solution to the problem of dairy surpluses. Those of us on the Agriculture Committee will give close scrunity to what future course price supports will take when considering the dairy portion of the farm bill. At that time, I feel certain that we will find a balance to insure adequate supplies of milk while providing our dairy farmers the opportunity for a fair return on their investment and labor.●

● Mr. RATCHFORD. Mr. Chairman, I would like to take a moment this afternoon to applaud the proposal advanced by the administration to delay the increase in dairy price supports scheduled to take effect on April 1, 1981.

As we are all aware, the bill before us today to delay the dairy price support hike is one of the earliest tests of the Congress willingness to hold the line on unnecessary Federal spending in spite of opposition from narrow special interest groups. If passed, this legislation will reduce Federal spending by over $230 million in the next 2 years, and will reflect the resolve of this body to make difficult decisions regarding priorities for Federal spending.

There are many areas in which I find myself unable to agree with the administration's budget cut proposals, believing that some of the spending reductions place unfair and unacceptable burdens on the Northeast region and on the truly needy. Yet I can only applaud the President's decision to seek a delay in the dairy price support increase as one clear area in which we can reduce nonessential Federal expenditures.

The case for a hike in price supports for milk at this time is strikingly weak. Costs of the price support program to the Federal Government have risen dramatically over the past 2 years, and have contributed to a growing problem of overproduction in the dairy industry. This year, there will be 11 billion pounds of surplus milk even without the April 1 price support increase, and without this bill to delay the increase the Government will simply be forced to pay higher prices and buy more surplus dairy products than currently necessary.

In this time of continuing inflation, the delay proposed today will both help to control Federal expenditures and also provide consumers some modest relief at the supermarket. It will require a modest sacrifice from some segments of the dairy farming industry, and yet the industry is already enjoying considerable protections at the expense of the Federal taxpayer.

Mr. Chairman, especially in light of some of the very severe sacrifices which the administration has proposed for low- and middle-income families in other program areas, I strongly urge my colleagues to join me in supporting this legislation to delay any immediate increase in dairy price supports.●

● Mr. KASTENMEIER. Mr. Chairman, I rise in opposition to H.R. 1986 which would defer the scheduled April 1 increase in dairy price supports.

This bill is the first major budget cutting proposal of the Reagan administration to reach the House floor. The President believes that Federal spending must be drastically reduced if we hope to win our fight against inflation and restore health to the economy.

None of us dispute the need to cut Government expenditures. I think it is safe to say that Members of both parties in Congress have demonstrated a willingness to give the President's economic program a fair hearing.

However, the White House has promoted the idea that Congress should approve President Reagan's economic program as a whole, and should not question the wisdom of individual budget cuts.

The bill before us today is a perfect example of why the Congress must exercise independent judgment on the various aspects of the administration's policy. H.R. 1986 will not save nearly as much money as the White House has claimed. In exchange for modest reductions in outlays, we risk a serious disruption of the market for dairy products, which will harm both consumers and producers of milk.

Since 1949, the Federal Government has supported the price of milk at between and 75 and 90 percent of parity.

Under the Food and Agriculture Act of 1977, Congress provided for a price support floor at 80 percent of parity, with semiannual adjustments of the support price on October 1 and April 1. H.R. 1986, by deferring the April 1 adjustment for this year, would result in a support price at 73 percent of parity in April. Obviously, in the following months the parity level of the support price would fall further.

Under the dairy program, farmers who cannot sell their products at the price support level on the open market can sell it to the Government's Commodity Credit Corporation (CCC) at the support price. If market prices subsequently rise, the CCC sells its stocks of dairy produce on the market. The CCC also uses its inventories for domestic and foreign nutrition programs.

The purpose behind dairy price supports is not to subsidize dairy farmers. Rather, the mission of this program is to stabilize the price and supply of milk and milk products, to the benefit of producers, processors, and consumers.

Despite recent surpluses, the program has worked well. In fact, dairy products have added relatively little to inflation. Since 1967, dairy prices have risen by 133 percent, but prices for all foods rose 162 percent while the general cost-of-living index rose 154 percent. Clearly, consumers have not been subject to unreasonable price increases for milk.

Of course farmers have benefited from the program. No longer faced with uncertainty over the price they can expect to receive for their product, dairy farmers have invested in their operations and have made large gains in productivity. It is ironic that in an economy plagued with productivity problems, we are undercutting the one industry that has become progressively more efficient.

It is also ironic that this increase in productivity, along with the problems facing other sectors of American agriculture, is responsible for drawing criticism to this program. The dairy price support program has become a victim of its own success.

Last year was a rough year for most farmers. Net farm income dropped from $31 billion in 1979 to about $25 billion in 1980. Dairy farmers, with their adequate price support program, were the exception. With feed grain prices low, yield per cow up, and a support price at 80 percent of parity, farmers were encouraged to devote more of their resources to producing milk and less to other commodities.

As a result, milk production rose by 5 billion pounds in 1980, and the CCC purchased 8 percent of all milk produced at a cost of $1.3 billion. The administration claims that without passage of H.R. 1986, outlays will reach $1.7 billion this year.

However, these costs are overstated. Let us keep in mind that the Government is not merely handing out money. It is purchasing a product, which can later be resold in the open market or used in domestic and foreign nutrition programs. In reality, the CCC estimates real costs to the Treasury for 1981 at about $315 million.

Nevertheless, the administration claims that its bill will lower Federal expenditures by $147 billion in the current fiscal year and $86 million in 1982.

From my perspective, the question is, will the savings resulting from a lower support price justify the resulting market disruption. I believe that answer is "No."

As I mentioned before, the administration's proposal would let the support price fall to 73 percent of parity. The last time it fell to about that level was in 1974. Farmers were losing $2.30 for every hundred pounds of milk sold. Production shrank, and market prices subsequently rose until they exceeded 100 percent of parity. It was in response to such price fluctuations that Congress placed the 80-percent floor on price supports with semiannual adjustments. I do not believe we should now put the American consumer back on this roller coaster.

Instead, there are many ways we can and should improve the ability of farmers to make a living in other commodities. To my mind, this is the best way to lower milk surpluses.

Finally, I would note that until very recently our dairy farmers have been led to believe that prices would be adjusted on April 1, and they have planned accordingly. It would be unfair to revoke the adjustment on such short notice.

In conclusion, Mr. Chairman, the current dairy program is not inflationary, and for a relatively modest expenditure of funds has brought stability to what was once a highly unstable market. I do not believe that consumers, producers, or the economy in general will benefit from the passage of H.R. 1986, and I urge my colleagues to reject it.●

● Mr. MINISH. Mr. Chairman, I rise in support of this measure to eliminate a proposed increase of $147 million in the dairy subsidy, which will otherwise go into effect on April 1. There is presently an oversupply of dairy products, and it does not make sense to just automatically increase support whose purpose is to keep supplies high. This built-in increase in the price of a basic foodstuff is, moreover, inflationary. It is part of a pattern of programed increases in the prices of basic necessities which fuels inflation rather than addressing the problem. We must break this overall pattern if we are to get a handle on inflation, and skipping the April 1 programed increase will be a step in that direction.

If I believed that canceling the increase would cripple or seriously harm our dairy industry, I would not favor it. But to encourage production, as the subsidy is supposed to do, when the Government is already committed to buying up a large surplus of dairy products, is overgenerous to an interest already highly subsidized and in fact prosperous. In fact, I think that the time has come for us to find new opportunities for our dairy products overseas particularly in hungry nations which have an abundance of petroleum and other strategic products which we need. I have every confidence that our dairy industry will thrive in an era of increased demand for their products. On the other hand, the subsidy will do no good to the consumer—that is, all of us—who must pay an increase whose rationale is no longer clear or compelling. When the rest of the Nation is called upon to accept sacrifices and cuts, to cope with radical increases in energy prices and other basic necessities, it would be singularly inappropriate for us to increase the already large benefits to this one interest. I hope that my colleagues will join in supporting H.R. 1986.●

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 1986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201 of the Agricultural Act of 1949, as amended (7 U.S.C. 1446), is further amended by deleting subsection (d).

Mr. JEFFORDS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I just rise to tell the body why I do not at this time offer an amendment with respect to the casein issue. It is very simply that I would get blown out of the water by a rule of the Chair, because I have been informed that the bill in its present form would not allow me to get into the casein issue.

But I want to assure the Members of the House and certainly my friends in the dairy industry that at a time appropriate I intend to do all I can to face and to do something with respect to the problem of the importation of casein. I want to commend the chairman of the subcommittee, the gentleman from Iowa (Mr. HARKIN) for speaking so forcefully and strongly about insuring that we do not set a precedent by going below 75 percent of parity, so essential to insure the long-term stability of the industry.

For the reason that I cannot under the rules offer an amendment on casein, I do not do so at this time.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Illinois.

Mr. FINDLEY. I thank the gentleman for yielding.

I want to take this opportunity to express my appreciation to the leadership on both sides of the aisle and especially to the gentleman from Texas (Mr. DE LA GARZA), the chairman, for expediting House consideration of this very important bill.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

I take exception that casein is some sort of a disruptive element in the milk production and marketing system of this country.

□ 1415

I note that the casein imports are much less than 1 percent of total milk sales. I note that the ITC undertook to study this problem in 1979, and indicated that there was no relationship between prices over production or anything in our milk system, to casein imports. I note that the ITC again studied it, updated it in December of last year, which is just now 3 months ago. I suggest that if the gentleman has a complaint against casein import, that he go back to the ITC and follow the normal rules that we have established under law to protect our producers from some kind of subsidized or unwarranted competition.

Mr. JEFFORDS. If we are following the normal rules perhaps I might agree with the gentleman. He knows as well as I know that, for reasons somewhat unclear, when casein was allowed to come into this country it was being used then as a chemical, for drugs, perhaps for therapeutic foods, but not as a substitute for daily products.

So, when the gentleman says follow the normal rules, I would be glad if it was categorized as it ought to be, as a dairy product. So, to say that we are playing the normal rules, to say that this is not significant, to say that it is only about 1 percent, you have to realize that our production is only 3 to 5 percent above demand, so that is 20 percent of the problem, or more. That is a significant part of the problem.

We should do something about it, and also point out that some of it is coming in by this loophole in our trading laws. Some 40 percent or more is coming from Common Market countries where production is highly subsidized. That means that our taxpayers are being used here to allow products to come in from the Common Market countries really in contravention of section 22. These products are over here costing the taxpayers money for concessions that were made in the GATT negotiations. So, I just do not agree that we are playing under normal rules.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Missouri.

Mr. VOLKMER. On that, we all recognize that the International Trade Commission is made up of five or seven members, and surely they can make an error once in a while maybe because of lack of evidence. We have seen a circumstance just recently developing where just last year in their hearings they made a decision that imported automobiles were not impacting at all on the American automobile manufacturers; yet, we see something developing, and this week we are seeing just the opposite. I agree with the administration and disagree with the International Trade Commission.

On the casein issue, if the gentleman from Minnesota would go to any grocery store, he would find in that grocery store artificial cheese. If he would listen to the testimony, he would find that in Duluth, Minn., there is a pizza manufacturer known as Geno's, and he would have found out in testimony before our Agriculture Committee that Geno's use nothing but artificial cheese. They do not use any type of American cheese.

What is happening to the other pizza huts? They use good old American cheese, but now, because of artificial cheese made from casein——

The CHAIRMAN. The time of the gentleman from Vermont has expired.

(By unanimous consent, Mr. JEFFORDS was allowed to proceed for 5 additional minutes.)

Mr. VOLKMER. The thing is, I could find it, and if that does not impact on American cheese, I would like to know what it does do. If people buy that cheese in place of American cheese, and we have testimony that they are doing it, to say that does not impact is just hiding your head in the sand.

Mr. FRENZEL. Mr. Chairman will the gentleman yield further?

Mr. JEFFORDS. I will be happy to yield.

Mr. FRENZEL. I thank the gentleman for yielding. I think the picture is very clear as it has been laid out for us by the ITC. I know that the increase in casein imports last year was imperceptible. It was almost level with 1979, and it seems to me that there has not been showing of any sort of unfair competition.

Mr. JEFFORDS. Let me interrupt there. The competition has been there. Remember the ITC report; they agreed that so much was coming in, agreed that it was being used as food. Their conclusion was, since there is no casein industry in the United States, therefore there is no competition; therefore it can come in. That is an absolutely ridiculous conclusion.

We do not disagree with the facts they came out with, but when it is well known what they are doing is using casein as a substitute for nonfat dairy milk and cheese, and they say, "Yes; we do not have any casein. Yes; there is no impact on the dairy industry," that is just a non sequitur.

Mr. FRENZEL. Will the gentleman yield further?

Mr. JEFFORDS. I yield.

Mr. FRENZEL. Mr. Chairman, there has been some discussion in the House today, and in the other body over the last several days, that imports of casein have become so excessive that the dairy price support program is seriously threatened. The simple solution, a few of our colleagues argue, is for the President to use section 22 authority to impose a quota not only on casein imports but also on any product containing as little as 5 percent imported casein.

The truth of the matter is that, although the volume of casein imports has increased over the last few years, there has been no evidence to show that casein imports have seriously displaced the use of nonfat milk in feed or in certain food products such that milk price supports are adversely affected. In fact, there is substantial evidence to the contrary.

In December 1979, the International Trade Commission (ITC) issued a report based on an extensive study of casein and its impact on the domestic dairy industry. The report concluded that there was "virtually no statistical relationship between imports of casein and mixtures of casein and purchases of nonfat dry milk under the price support program in recent years," nor was any "clear statistical relationship apparent between the imports and domestic production or consumption of nonfat dry milk." At the request of the Ways and Means Committee, the ITC updated the date through the end of last year and submitted a letter to the committee on March 20 declaring that the general conclusions of the 1979 study were still valid.

Since the ITC report did not fully address the question of interference with the dairy price support program, the Secretary of Agriculture agreed to conduct a section 22 study designed specifically for that purpose. The results of the new study are expected in June. Then we should better be able to determine the extent to which domestic users of imported casein would be willing to purchase nonfat dry milk at the extremely high prices insured by the current price support program.

At the present time, there is no domestic production of casein. American dairy producers have no interest in that market and have left the job of supplying this product to importers. The reason is simple—they can get a much higher price from the Govern-

ment for the excess nonfat dry milk that they produce. Now they want to have the Government guarantee a market share for their artificially high-cost nonfat dry milk by restricting the imports of a partially competitive product. To the extent that the two products are not interchangeable, domestic production of casein may develop—but at a much higher price.

Based on the evidence at hand, I see no basis for restricting imports of casein whether or not you are talking about doing it in this bill or waiting for a future omnibus farm bill. Imported casein meets a market demand that cannot be filled by domestic producers at a reasonable price.

Although some of the imports come from the U.S.S.R., the overwhelming majority comes from the European Community and Australia—both important trading partners with whom the United States has large positive trading balances. As GATT members they both would have the right to demand compensation for any arbitrary restriction on their casein exports to this country. The compensation could take many forms, but a likely form would be to create quotas against U.S. agricultural and machinery imports into their markets.

To limit imports of casein will strike at a number of our most important trading partners. Look at the 10 major suppliers of casein, the countries which furnish 97.4 percent of our imports. I note that in 1980 we had a total trade surplus with those 10 countries of $14.4 billion.

To limit imports from countries where we in general have trade surpluses is certain to invite retaliation by them against our products, particularly our farm products.

We cannot sell to others if we block their sales to us. Trade is a two-way street. This casein-limiting amendment destroys that principle, and will hurt a wide range of U.S. exports. I urge its defeat.

Mr. Chairman, the risks of quota legislation both to our own economy and to the standing of the United Sates in the world trading community are great. I hope that every industry does not attempt to use quotas to solve its economic dilemmas or to preserve some false advantage.

I would say further that casein is a bound duty under GATT. A good deal of it comes from trading partners like Australia and Europe, as the gentleman indicated, with whom we have enormous positive trade balances. Under GATT, they can demand competition. We sell, for instance, a good deal of agricultural products to Europe. They could quota up. They could demand payment back from us, and in my judgment, it is absolutely foolhardy, particularly at the level of import and level of effect of casein import, to even consider quotas in this business. Instead, we should learn how to improve our nonfat milk that we produce very efficiently and very effectively all over the world.

Mr. JEFFORDS. I would just like to make this comment: The gentleman hit on the really critical question here. It has nothing to do with the impact. The impact is obvious. It is a question of what we gave away at the negotiation tables to allow casein to come in under this loophole.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I thank the gentleman.

Mr. Chairman, we had hearings some weeks ago and we will have additional hearings tomorrow with the Secretary of Agriculture. Let me say that we do not have any surplus dairy products. We have a surplus when compared to domestic demand but not compared to the world market which is the market the Commodity Credit Corporation refuses to sell. We have a sales manager which the Congress created, but we will not let him sell anything. So, I suggest we amend this section before us by striking out the period at the end of line 5 and inserting a comma and adding the following: "for such time as dairy products owned by the Commodity Credit Corporation are offered for sale in world markets at competitive prices, through normal channels or under Public Law 480 or other foreign assistance programs.".

So this so-called surplus has been bought up by the Commodity Credit Corporation. They are paying storage on these dairy products, when the world is crying for food, and we are holding it off the market and reducing the price at home.

What is the benefit of what I am suggesting? It lets the man at home keep his cows and have a larger market. If we take this other step, we are doing the worst thing I can think of for the consumer, and let me tell you why. The Secretary of Agriculture is a hog man. You can get into the hog business in 9 weeks, but when you get rid of the dairy cows it takes 5 or 6 years to get a herd back in production. If we have a short feed crop, we are going to have people begging for milk.

I had a past experience with former Secretary of Agriculture Benson years ago. He held $10 billion worth of commodities off world markets, and all the time through foreign aid we were increasing other countries' farm production. I say what we should do here is keep our products available to the people of the world and not withhold them from the hungry.

So I would suggest, and I will ask my chairman to listen to me, that we add my amendment at the end of this bill, so the dairy products can be sold on the world markets through our foreign aid programs or in other such ways that can be worked out.

Mr. JEFFORDS. I commend the gentleman for his statement.

The CHAIRMAN. The time of the gentleman from Vermont has again expired.

(At the request of Mr. VOLKMER and by unanimous consent, Mr. JEFFORDS was allowed to proceed for 2 additional minutes.)

Mr. JEFFORDS. I would commend the gentleman and say that a couple of years ago I got a similar amendment on the dairy bill which allowed us to do something like that. I intend to do in subcommittee exactly what the gentleman suggests, that we ought to be able to allow the CCC, especially when they have large excesses, to sell them on the world market and not at domestic price.

Mr. WHITTEN. Let me say Congress created a sales manager but Agriculture will not give him the go-ahead sign to sell these commodities. They already have the authority and the sales manager in place for this purpose. If they do not let him sell the commodities, they do not need him.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Missouri.

Mr. VOLKMER. Just so we can keep the record straight for the gentleman from Minnesota who spoke earlier on casein, New Zealand provides us with right at 50 percent or more of our casein. You add that to Australia and Ireland, the only major country in Europe that provides us with casein. If we take those three countries out we have less than 10 percent, and of that more than half comes from Communist countries. I do not think we have to worry about buying casein from Communist countries.

Mr. FRENZEL. If the gentleman will yield, I would like to know what the Communist countries are? I understand from Russia we get from 1 percent.

Mr. JEFFORDS. Correct.

Mr. VOLKMER. That is correct.

Mr. FRENZEL. Half of 1 percent. Are there any others?

Mr. VOLKMER. Poland and Russia.

Mr. FRENZEL. Poland, we do have normalized trade with Poland?

Mr. VOLKMER. The point is, the gentleman said 50 percent came from Russia; 50 percent does not. It comes from New Zealand.

The CHAIRMAN. The time of the gentleman from Vermont has again expired.

Mr. OBEY. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. The gentleman from Wisconsin is recognized for 5 minutes.

Mr. OBEY. Mr. Chairman, I usually need a couple of laughs around here, and this debate has certainly provided them so far. As the gentleman from Indiana has indicated, the suggestion that this budget presented by this administration this year is anything remotely resembling a fair and square deal for everybody, and equal burden sharing for everybody, is just so much nonsense.

The fact is, if we look at that budget, if we exclude the almost $200 billion for defense which is not cut under the budget; if we exclude the almost $200 billion for elderly and entitlement programs which are nicked only a little bit under the budget; if we exclude interest, which we do not chisel on, but simply pay what we owe, we wind up with the lion's share of the budget cuts being focused on what I would call the investment portion of the budget.

We can argue about whether some of those are good investments or bad investments, but they represent somebody's idea of what a good investment is. In that portion of the budget, you will find that despite the administration's suggestion that we do not have a cut but just a reduction in the increase, you will find in that share of the budget that you have a $20 billion reduction from last year's level. You will find that in real terms in the investment portion of the budget we have a 16-percent real reduction. I hardly call that even burden sharing.

I would suggest there is also another reason for voting against this legislation, which I intend to do. That is because the administration is parceling out its dairy program on the installment plan. We know what the downpayment is today; it is the elimination of the April 1 adjustment. But Mr. Stockman has already indicated that in the regular farm bill the administration will probably present a parity figure which is below 75 percent. In addition to that, Secretary Block has already indicated that there are not going to be target payments for other commodity programs. When the administration is refusing to reveal its farm program in its entirety until we vote on this legislation, that indicates to me they have a whole lot more in store for dairy farmers that we ought to know about before we vote on this bill.

I would be perfectly happy to consider this bill once the administration drops the other shoe, but given the fact that they have not, and given the fact that I think I know what that other shoe is going to contain, I am not going to support it.

AMENDMENT OFFERED BY MR. FITHIAN

Mr. FITHIAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FITHIAN: Strike out the period at the end thereof and insert in lieu thereof the following: ", and inserting a new subsection (d) as follows:

"(d) Notwithstanding any other provision of this Act, for the period beginning April 1, 1981, and ending September 30, 1981, the Corporation shall not sell any stocks of dairy products owned or controlled by it for unrestricted domestic use at less than a price that reflects 112 per centum of the current support price for milk."

□ 1430

Mr. FINDLEY. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. FINDLEY. I reserve the point of order, Mr. Chairman.

The CHAIRMAN. The gentleman from Indiana (Mr. FITHIAN) is recognized for 5 minutes in support of his amendment.

Mr. FITHIAN. Mr. Chairman, I offer this amendment now, and I shall not take the full 5 minutes. I made this argument in the committee, but I think for those who follow the debate on the floor of the House we ought to establish the point that one of the costs of the dairy program which we certainly ought to eliminate is having the Commodity Credit Corporation of the U.S. Department of Agriculture bear the burden of the warehousing and the cost of inventory of milk products.

As must be obvious, the present sellback price of 105 percent in no way covers the warehousing costs of the product, without even discussing the issue of whether or not you can borrow money at 5 percent these days; clearly you cannot.

So this is what happens in essence. If I were a processor of a dairy product, if I were an ice cream manufacturer or were operating, say, a Pizza Hut or whatever, I certainly could figure out quickly that it would be cheaper to have the USDA carry the inventory for me and during short seasons of milk buy it back at 105 percent than it would be for me to borrow the money and pay the costs of inventory and handling and the warehousing costs and all the rest of it.

We got into the imbroglio in part at least because the administration put out some remarkable figures on what the cost of the program was. My good friend, the gentleman from Vermont (Mr. JEFFORDS), has, I think, adequately established from the other side of the aisle that those figures are fallacious. One reason they are very faulty is that in the assessment of the cost of the program they did not take back or subtract from it the sellback profit, the sellback amount or the donation amount to other departments.

The point I am making, however, is that we are fundamentally wrong unless this administration increases the price and we were fundamentally wrong because the last administration did not increase the sellback price so that private industry out there would have to pay its way.

There has been a lot of talk about that around town these days, about all of private industry paying its way. I would suggest that we arrive at that point by this amendment and subsequently everybody in the committee would arrive at the point where in fact private industry does bear its share. And I will assure the Members that no 105-percent sellback opportunity causes private industry, ice cream manufacturers, processors, food processors of all kinds, to bear their fair share of the cost of this program.

In fact, it is a subsidy to all the processors of milk products, and without this kind of change, which could, I point out to the House, be made by this administration without any effort on our part—and it could have been made by the previous administration, and it should have been done—without that adjustment to the sellback price, we are going to continue to mount fallacious figures around here as to the cost of this program.

Mr. Chairman, that is what my amendment is all about. I would now listen to my friend, the gentleman from Illinois (Mr. FINDLEY), on his point of order.

The CHAIRMAN. Does the gentleman from Illinois (Mr. FINDLEY) insist on his point of order?

Mr. FINDLEY. Mr. Chairman, I do insist on the point of order.

Mr. FITHIAN. Mr. Chairman, would the gentleman yield?

Mr. FINDLEY. I yield to the gentleman, yes.

The CHAIRMAN. The gentleman will first state his point of order.

Mr. FITHIAN. May the gentleman yield, Mr. Chairman?

The CHAIRMAN. The Chair controls the time. The gentleman from Illinois (Mr. FINDLEY) will state his point of order. If he wishes to yield after he states his point of order, he may do so.

POINT OF ORDER

Mr. FINDLEY. I thank the Chair.

The amendment offered by the gentleman from Indiana (Mr. FITHIAN) goes quite beyond the scope of the bill before us. The bill before us relates only to the mandate under which the Secretary of Agriculture must readjust the parity price support of dairy products on April 1, whereas the gentleman's amendment deals with the Commodity Credit Corporation, which is not subject to the bill now pending. It deals with the authority of that Corporation, and it deals with its policies relating to the disposition of inventory controlled by the Commodity Credit Corporation.

So, therefore, Mr. Chairman, very clearly the gentleman's amendment is not germane.

The CHAIRMAN. Does the gentleman from Indiana (Mr. FITHIAN) wish to be heard on the point of order?

Mr. FITHIAN. Only to this extent, Mr. Chairman:

The gentleman from Illinois (Mr. FINDLEY) raised this point of order in the Committee on Agriculture the other day. I pointed out to my friends on that side that it was the narrowest of constructions I had seen in the committee for 7 years.

But, Mr. Chairman, I do know what the ruling of the Chair will be in this case, so I withdraw the amendment.

The CHAIRMAN. Without objection, the amendment is withdrawn.

There was no objection.

If there are no other amendments, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. FROST, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1986) to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually, pursuant to House Resolution 117, he reported the bill back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. DE LA GARZA. Mr. Speaker, pursuant to the provisions of House Resolution 117, I move to take from the Speaker's table the Senate bill, S. 509, a similar bill to H.R. 1986, and move its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The motion was agreed to.

MOTION OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. DE LA GARZA moves to strike out all after the enacting clause of the Senate bill, S. 509, and to insert in lieu thereof the provisions of H.R. 1986, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

H.R. 2594 was laid on the table.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is their objection to the request of the gentleman from Texas?

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 85. Concurrent resolution congratulating the government and people of Spain on their commitment to democracy.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I have taken this time for the purpose of inquiring as to the schedule for the House next week.

Mr. DASCHLE. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Speaker, there is no legislation scheduled for the week of March 30, 1981, but the House will meet in pro forma sessions on Monday, Tuesday, Wednesday, and Thursday, at the regular times, that is, at noon on Monday and Tuesday, at 3 p.m. on Wednesday, and at 11 a.m. on Thursday. There will be no session next Friday.

Mr. LOTT. Mr. Speaker, let me make sure that I understand the gentleman.

There is no legislative business scheduled next week; is that correct?

Mr. DASCHLE. The gentleman is correct.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for yielding.

I note that in yesterday's debate we were told that we could not talk about the committee budgets individually because it would waste the time of the House, and yet the time of the House is going to be well taken up next week with plenty of pro forma sessions and no business. I am delighted that we saved so much wasted time.

Mr. DASCHLE. Mr. Speaker, will the gentleman yield?

Mr. LOTT. Mr. Speaker, the committee will certainly be involved in responding to the President's program and will be deliberating on each and every one of those budgetary recommendations that have been made, so certainly the work of the House will be taken up in committee business.

Mr. LOTT. Mr. Speaker, I have one further question of the gentleman.

The times we do come in for pro forma sessions will be the regularly scheduled times; is that correct?

Mr. DASCHLE. Yes, they will.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

ADJOURNMENT TO MONDAY, MARCH 30, 1981

Mr. DASCHLE. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it stand adjourned until noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. DASCHLE. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

HUNDREDS OF THOUSANDS OF STUDENTS AFFECTED BY STUDENT AID CUTS

(Mr. PEYSER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and to include extraneous matter.)

Mr. PEYSER. Mr. Speaker, the administration has moved now to stop the implementation of all Pell grants in this country, and as of last week the program, which affects well over 1½ million students for next fall's term, has been brought to a total halt. They are doing this because they are pressuring or trying to pressure the Congress to change regulations that would eliminate hundreds of thousands of students from Pell grants. Hopefully, we are going to resist this, Mr. Speaker.

Today I am putting in the RECORD a letter from Swarthmore College, located in Congressman EDGAR's district; a letter from the University of Minnesota Technical College, located in Congressman HAGEDORN's district; and a letter from Columbia University, located in Congressman WEISS' district, all urging the Congress to resist these attempts.

Mr. Speaker, the letters are as follows:

SWARTHMORE COLLEGE,
Swarthmore, Pa., March 20, 1981.

Hon. PETER A. PEYSER,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN PEYSER: Thank you for your letter of March 4 regarding the proposed budget cuts in student financial assistance. As you can see by the enclosed letter which was sent to two local newspapers, I am in complete agreement with you on this matter. My colleagues at Bryn Mawr

and Haverford and I will continue to fight the proposed cuts, and we thoroughly support your efforts and those of your colleagues to do the same.

Sincerely,

THEODORE FRIEND,
President.

SWARTHMORE COLLEGE,
Swarthmore, Pa., March 6, 1981.

EDITOR,
The Philadelphia Inquirer,
Philadelphia, Pa.

TO THE EDITOR: As presidents of the three colleges signed below, we are concerned to play our part in responding to federal initiatives that seek to reduce inflation and increase productivity for the benefit of the entire economy.

For several years our institutions have striven to maintain or to achieve balanced budgets in an inflationary economy. These successful efforts have required, among many other adjustments, large reductions in energy consumption, observance of federal controls and regulations, and reductions in faculty and staff. We believe we speak for institutions that have acted responsibly within their own missions and within the requirements of national policies.

Against the background of these efforts, we feel moved to question the wisdom of drastic reductions in funding of federal grants and loans for student financial assistance. Some higher education assistance programs may require pruning. The budget reductions now proposed, however, appear to us to cut too deeply and too indiscriminately. Estimates of the number of students that would be forced to drop out of college range as high as 500,000 to 750,000. In speaking for these students, we believe we are speaking not for a "special interest," but for lower and middle income American families, and for our nation's investment in leadership talent for the future.

Severe cuts in the budgets of the National Science Foundation, National Endowment for the Humanities, and National Endowment for the Arts would also adversely affect colleges and universities. Many of them like ourselves rely on opportunities for teaching faculty with strong research orientation to fund their research leaves from government sources.

The combined impact of the prospective cuts on student financial assistance, faculty research projects, and programs open to the public gives us, with the rest of the higher education community, serious concern. We continue to respect the need for controlling the national economy, and we continue willing to play our role in that effort. At the same time we are moved to ask whether national priorities are in just and proportionate focus. Our obligation as presidents of institutions committed to excellence in higher education forces us to put this question: are greatly reduced educational, scientific, and cultural expenses in the long run going to make us a stronger or a weaker nation?

THEODORE FRIEND,
President, Swarthmore College.
MARY P. MCPHERSON,
President, Bryn Mawr College.
ROBERT B. STEVENS,
President, Haverford College.

UNIVERSITY OF MINNESOTA,
Waseca, Minn., March 12, 1981.

Hon. PETER A. PEYSER,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN PEYSER: In response to your letter of February 20, 1981, we do share the concerns you have relative to the discussion on modifying the Guaranteed Student Loan Program and the Basic Opportunity Grant Program.

The Middle Income Assistance Act passed a couple of years ago has allowed more of the families who attend our college to participate in the Guaranteed Student Loan Program. As a result, the students taking advantage of financial aid programs increased from approximately 50% of our student body to 75% the past two years.

Concerning the Guaranteed Student Loan Program, it appears that because of the number of students on the Guaranteed Student Loan Program at the University of Minnesota, Waseca, any modification could create for some financial difficulties which may make it impossible for them to continue their college education. If it appears there are some misuses of this program by wealthy families, possibly some upper income levels, could still be set. We need to be aware, however, that upper middle income families qualify for virtually no financial aid programs other than the Guaranteed Student Loan Program. Therefore, the upper income limits should be set rather high so as to not further disadvantage this group.

Concerning the Basic Opportunity Grant Program, these funds are earmarked for the truly needy students. Cuts in this program could result in under-funding the needs of these students who have the least chance of any in gaining support from their parents. This would result in students having to drop out from school or at the very least force the college to fund this need differential from other campus based programs which in most cases are not sufficient to make up the differences that are likely to result in the reduction of this program.

I trust this information shares our feelings with you. Thank you for an opportunity to respond to this very important issue.

Sincerely,

EDWARD C. FREDERICK,
Provost.

COLUMBIA UNIVERSITY,
New York, N.Y., March 12, 1981.

Hon. PETER PEYSER,
House of Representatives,
Washington, D.C.

DEAR PETER: I write to re-emphasize our strong interest in the student aid programs that are so important to Columbia and to other universities and colleges. When others are proposing major cuts in student loan and grant programs, it is good to know that we have friends like you in Washington who understand our needs, and the needs of our students and their families.

In our brief meeting last Monday, you indicated that you are proceeding with plans to resist excessive cuts, as outlined in your February 27 letter to Columbia. We want very much to support the efforts of our elected officials who understand the importance of student financial aid.

Columbia President Michael Sovern shares this view, as confirmed by your telephone conversation with him. He would gladly consider his personal participation in advocating these programs, if that would be a meaningful contribution. He has already written Postsecondary Education Chairman Paul Simon and others to stress this need. A copy of this letter is enclosed for your information.

At Columbia, we plan to increase our activity and effectiveness in governmental relations. Our students, faculty, families and friends have made outstanding contributions as individuals to public affairs, but have rarely participated in a coordinated way on issues which affect the institution. Of course, they will each form their own views on public issues. It is appropriate that they decided for themselves how they should present their viewpoint to the Government. However, we believe that the University has a role in informing them of the impact on Columbia of proposed changes in Federal policy. Many here have already indicated their desire to become more active to help support these student aid programs. As you know, I have come here to establish a new Office of Government Relations and Community Affairs in order to give sharper focus to this important function.

We would like to help. Please let me know what you suggest for the next steps.

With best wishes,

Sincerely,

GREGORY FUSCO,
Vice President for Government Relations and Community Affairs.

COLUMBIA UNIVERSITY,
New York, N.Y., March 6, 1981

Hon. PAUL SIMON,
Chairman, Subcommittee on Postsecondary Education, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN SIMON: I write to express the deep concern of Columbia University over proposals for major reductions in federal student aid programs. We are particularly concerned about the Guaranteed Student Loan Program and the Pell Grant Program.

Our students use these programs to help themselves and their families pay their educational expenses. I note with pride that we admit qualified students to Columbia without consideration of their ability to pay. Last year institutional funds from general university income provided over $8 million to our undergraduate students with financial aid need. We shall spend still more of our own money next year. But we cannot do the job alone. Our ability to maintain our present admissions and financial aid policies is gravely threatened by suggested cuts in federal programs.

Columbia students borrowed over $37 million last year, shouldering obligations that they and their families will have to repay. The money they borrowed under the Guaranteed Student Loan Program was private capital; the federal government provided only an interest subsidy. A major portion of the increased cost of that subsidy is attributable to high interest rates and would fall dramatically if interest rates were reduced. If proposed changes drive voluntary lenders out of this program, where could our students locate other sources for the $37 million they provide?

The Pell Grant Program represented a new era in student aid. It is entirely need-based. Recognizing the cost differences at institutions, it still covers only a portion of these costs. The Pell Grant is a vital element in helping students invest in themselves. To reduce the grant award size by one-third or more would reverse a decade of wise investment in human resources and effectively repeal the federal policy of equal access to education.

While my responsibilities are principally focused on my own institution, my concerns have a broader range. I urge you to consider fully the implications of reducing these programs. The impact on our young people, on

their families, on institutions of higher learning and, ultimately, on our nation should be carefully assessed.

Columbia is ready and able to work with the Congress and the Administration in seeking alternative ways to operate these programs. However, we believe the current proposals for change would seriously damage higher education and must be improved.

I appreciate your interest in this important issue and hope to work with you to establish more effective federal programs of student financial aid.

Sincerely,

MICHAEL I. SOVERN.

CALIFORNIA FAVORS SAME-TIME/SUNDAY VOTING

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BIAGGI. Mr. Speaker, last August, several months before the 1980 election, I introduced legislation changing election day to Sunday and requiring same-time voting across the United States. My legislation was inspired by two major documented facts. First, U.S. voter turnout has declined in every Presidential election since 1960. Second, the voter turnout rate in Western European democracies where elections are held on Sundays averages nearly 90 percent.

Although unintended, mine turned out to be a legislative prophecy. The official 1980 voter turnout was the lowest for a Presidential election in 32 years, a dismal 53.95 percent. In addition, 1980 voter turnout declined from 1976 in every Pacific time zone State, where polls were still open when a Reagan victory was projected.

On the first day of this session, I reintroduced my same-time/Sunday voting initiative. The bill, H.R. 84, is presently cosponsored by 29 of my colleagues.

Survey results published in yesterday's Los Angeles Times provided important testimony to the widespread acceptance of this proposal. Out of some 1,000 California residents surveyed—including 883 registered voters—an overwhelming margin of 60 to 36 percent said they favored same-time/Sunday voting. I am inserting a copy of the article:

[From the Los Angeles Times, Mar. 25, 1981]

TV PREDICTIONS OF PRESIDENTIAL RACES OPPOSED

SAN FRANCISCO.—Three-fourths of California residents think that television networks should be prevented from predicting the outcome of presidential elections until the polls have closed in California, according to a California Poll released Tuesday.

By a margin of 60% to 36%, Californians said they would favor changing national elections by holding them on Sundays and having the polls close at the same time across the country.

In last November's presidential election, television networks began predicting the outcome as early as 5:15 p.m. PST, and President Carter conceded defeat while voters on the West Coast were still casting ballots.

The California Poll, conducted in January by the Field Institute, was based on telephone surveys of 1,061 California residents, of whom 883 were registered voters.

WITHHOLDING STUDENT AID FUNDS

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, I rise today to bring again to the attention of my colleagues the serious threat to Federal student assistance caused by the Reagan administration's refusal to process Pell grant applications for the coming academic year.

We are all aware of the importance of the Pell grant program in providing basic grant assistance to college students from low- and middle-income families. The processing of Pell grant applications by the Department of Education is not only essential if these basic grant awards are to continue, but colleges and universities across the country will be unable to calculate their own financial aid awards until Pell grant determinations are complete.

I should stress that the issue at hand now is not the level of funding for the Pell grant program. Regardless of what level of funding the Congress approves for student aid grants, the law provides a method for reducing grant awards in the event of less than full funding of the Pell grant program. Yet without any clear statutory authority, the administration has halted processing of student aid applications and is pursuing alternative regulations for the program.

Mr. Speaker, I can only view the administration's actions in failing to consider Pell grant applications in a timely fashion as irresponsible and grossly insensitive to the needs of students and their families. The administration has ignored the law in carrying out its administrative responsibilities, and is now approaching a point at which it may in effect "freeze" student aid funds which have been lawfully appropriated by the Congress.

Our memories must not be so short that we forget the lessons of a decade ago which led to prohibitions against the impoundment of appropriated funds by the President. The administration certainly should pursue its budget proposals through the established budget and appropriations processes; it must not anticipate or reverse congressional action by unilaterally bringing the student aid program to a halt.

I warn my colleagues in the House that the administration is on the verge of a serious breach of the legislative process which will have a dramatic impact on students. If the processing of Pell grant applications does not resume in the very near future, the complex student assistance structure at our colleges and universities will begin to disintegrate and students will have no way of knowing whether they will receive sufficient financial aid to allow them to attend college.

Mr. Speaker, I cannot believe that the administration wishes to encourage a confrontation with the Congress on this issue at a time when it is attempting to work in a bipartisan fashion to shape an effective response to our present economic problems. I strongly urge my colleagues in the House to voice their concerns regarding this serious threat to the student aid program, and to join me in requesting the administration to resume processing of Pell grant applications at the earliest possible date.

ARMS ESCALATION UNNECESSARY AND UNWISE

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, with a number of our colleagues of the Foreign Affairs Committee, I recently joined in a letter to Secretary of State Alexander Haig, expressing our serious concerns regarding the possible sale of sophisticated offensive equipment to Saudi Arabia for its F-15 jet fighter planes.

I fully recognize that the United States has a very real and legitimate interest in the security and stability of Saudi Arabia, particularly in the role the Saudis can play as a moderating influence on other nations of the region. But I must express my concern over what I consider the strong possibility that this sale will further stimulate the interest of other Middle Eastern nations in the purchase of additional arms.

There is no current external threat to Saudi security which requires this enhanced offensive F-15 capability. At an earlier time credence might have been given to the argument that Saudi Arabia needed a stronger defensive capability against a possible Iraqi attack. But rapprochement between Iraq and Saudi Arabia, coupled with the present Iraqi-Iran conflict, make it less likely that Iraq would or could launch a military undertaking against the Saudis.

The potential use of the Saudi F-15's in another Arab-Israeli war substantially magnifies Israeli security problems. Air superiority is essential to the defense of Israel, and if this sale is made Israel will have to stretch thin the capability of its already outnumbered air force, and divert some of

its aircraft from other essential missions in order to defend against possible Saudi air attacks. Enhanced Saudi weaponry may diminish, rather than bolster, Saudi security. Saudi F-15's could well become a preemptive attack target at the outbreak of any hostilities, making it altogether too likely that Saudi Arabia would be drawn into any conflict.

Israeli perceptions of the F-15 add-ons are emphatically negative. Saudi Arabia has participated in military hostilities against Israel in past conflicts, and remains a declared adversary. The Saudis have also financed Egyptian, Syrian, and Jordanian military efforts against Israel. Saudi financial and political support for the Palestine Liberation Organization, Israel's avowed enemy, is well known. While intelligence experts generally agree that Israel's present military capability is adequate to withstand any combination of Arab forces which might attack, Israel herself perceives a need for an increased military capability to compensate for the F-15 enhancement. The administration tentatively plans to offer to Israel an additional $600 million in military credits in fiscal years 1983 and 1984 for the purchase of aircraft and air defense equipment.

And thus the arms sales upward spiral continues. The sale of this enhanced equipment will undoubtedly whet further the appetites of other countries in the Middle East for additional arms sales. Egypt has already asked for major increases in U.S. military credits in light of the threat it faces from Libya, which has a huge Soviet-supplied arsenal and a highly irrational, aggressive foreign policy. Iraq, whose military capability has been depleted by its war with Iran, could see the F-15 add-on as an additional threat, and might seek additional Soviet arms at a time when their relations with the Saudis are at a relatively low ebb. Finally, all countries in the Middle East with whom we have friendly relations may review the F-15 add-on as a reward to Saudi Arabia for close relations with the United States, and may seek similar expressions of U.S. support. It is important in this connection to remember that most Mideast countries view their arms supply relationship with the United States as the sole test of U.S. reliability, and consequently as a political commitment.

I must admit that both the United States and Saudi Arabia see a real threat to the region from the Soviet Union. A potential of which the Israelis are well aware. The F-15 add-on's could bring some positive benefits to all nations of the area, if Saudi Arabia were to act as the pace-setter for the entire Middle East, instrumental in the development of a regional framework of defense cooperation directed toward deterring Soviet power, and an end to the differences that divide. Everyone could support an objective which saw the moderate Arab States and Israel galvanized together against a common external foe, rather than against each other.

THE GREAT ORANGE SQUEEZE OF 1981

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MILLER of California. Mr. Speaker, I want to draw the attention of the House to a federally sanctioned policy which, in a single act, squanders precious water resources, destroys nutritious food, and drives up food prices to consumers.

The law in question is the Agricultural Marketing Agreement Act of 1937 under whose auspices farmers in California and Arizona will destroy as much as 500,000 tons of navel oranges this year. Nearly half of the bumper crop will be kept out of the supermarkets by the action of a board appointed by the Secretary of Agriculture and thoroughly dominated by the same growers who will profit by this bureaucratically imposed orange squeeze. Meanwhile, as consumers are well aware, navel oranges are selling at 12 percent above last year's price.

Under slightly different circumstances, such practices would be called conspiracy in restraint of trade, not price stabilization. The marketing order system is an anachronism which should be significantly changed or repealed outright.

We know that every study of the system proves that it results in higher prices for consumers and higher profits for growers. And who makes the decisions? A board composed of 10 growers and a single consumer representative. Half of the growers' seats are dominated by a single cooperative which controls 50 percent of the market.

And there is another taxpayer subsidy in this outrageous practice. Many of these oranges were grown with federally developed, taxpayer subsidized irrigation water. Many of these growers are also clamoring for this Congress, and the California Legislature, to spend billions of dollars to build still more water projects to deliver subsidized water to the orchards and fields.

And meanwhile, acres of oranges—which Department of Agriculture marketing experts admit taste just the same as all others—lay rotting in the sun.

There is a special tragedy in this story, because it is not just money but food which is being wasted. These oranges could be provided to poor people in this country, to children whose school lunches are going to be reduced by this administration, to pregnant women and high risk infants whose WIC program is targeted for reduction by OMB.

Some of this fruit could be sent abroad in the Public Law 480 program. It would not jeopardize the domestic market to give these oranges to a country which lacks fresh fruit. It is, in fact, ironic that we cannot sell larger amounts to Japan, which refuses to limit its sales of cars to this country, because the Japanese have established rigid import quotas to keep U.S. oranges out.

I am shocked by the callousness of the USDA official in San Francisco who dismissed the notion of giving these oranges to the needy instead of sanctioning their destruction. "Oranges are not an essential food," he said. "People don't need oranges. They can take vitamins."

Perhaps that official would like to explain to consumers why the Government spends millions of tax dollars in water subsidies and other farm benefits to underwrite an unnecessary food. Maybe he should tell poor people where they should go to get the free vitamins. I find it difficult to believe that so insensitive a person is even remotely associated with this country's food program.

I want to mention in particular that when one of the large growers in the Central Valley, Carl Pescosolido, tried to give away a portion of the crop so that poor people in the bay area could have fresh fruit, he was charged with violating the marketing order and now faces a stiff fine.

I will soon introduce legislation to correct these abuses. I believe that, should the marketing order program remain in existence, the boards should be equally divided among producers and consumers. This Congress should not grant policymaking responsibilities to special interest groups with proprietary interests in the program they are charged with administering.

My bill will also require a public hearing if 20 percent of the board members favor giving the public an opportunity to comment on a proposed order. I can see no reason why the voices of 5 or 10 growers should be heard, but not the voices of millions of consumers who are now powerless to affect the orders.

I also propose that approval of 50 percent of the producers be required, not approval of those controlling 50 percent of the market. As I mentioned, such a provision gives a single producer, Sunkist, virtually a controlling hand in the marketing program.

Mr. Speaker, in a world in which thousands of people die of starvation and vitamin deficiencies every day, it is unconscionable and unthinkable

that this Government would sanction the willful destruction of foodstuffs for any reason. And certainly not to assure bigger profits to a small number of people.

I have asked the General Accounting Office to investigate several aspects of this current marketing order respecting navel oranges, and I hope that the Congress will take note of this situation and act quickly on my legislation to halt the immoral waste of food and the unjustifiable squandering of subsidized water in this program.

WHATEVER IS NEEDED TO GET THE NATION ON A BALANCED BUDGET AND REDUCE INFLATION WILL BE BEST FOR THE FUTURE OF COLLEGES AND FUTURE STUDENTS

(Mr. JOHNSTON asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. JOHNSTON. Mr. Speaker, my colleague from New York on the other side of the aisle has seen fit to introduce into the RECORD a letter from a constituent of mine in the Sixth District that complains that his educational institution will no longer be financially solvent in the event we withdraw Federal support.

I do not think it fair to give the country the impression that all people in the Sixth District of North Carolina are unwilling and unable to bite the bullet and withdraw their dependence on these outside funds. Many of our educational institutions are manned by courageous people willing to accept their share of the sacrifice.

I would like to introduce into the RECORD of this body today a letter from one of those people, an assistant director of financial aid in a small independent college. Those who are truly suffering, those colleges that are small, are probably in much worse shape than those supported by State and Federal funds, but this young lady had the courage to write and say, "We will do our share," and I want her to be recognized.

The letter is as follows:

MARCH 17, 1981.

Hon. EUGENE JOHNSTON,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN JOHNSTON: I support the O.M.B. Proposals.

As Assistant Director of Financial Aid at a private college, I am well aware of what effects these cutbacks will have on my institution and other private colleges as well.

However, I am not and will not be in agreement with the current laws governing student financial assistance.

I fully support the O.M.B. Proposals as set forth by the Reagan Administration. I believe that whatever is needed to get our nation on a balanced budget and reduce inflation will be best for our future students and the future of private and public colleges alike.

We as Americans, students, college administrators, etc., need to tap our creativity and develop new and different avenues for obtaining funds from the private sector. I believe we can and will do this. We all have drunk from the public watering trough long enough and have become lazy and dull witted.

The proposed cutbacks are a rude awakening to all of us. I do not doubt that private colleges like mine will suffer initially. However, I am optimistic for the future with the proposed changes.

My hope is that you, and our legislators, will continue to support the O.M.B. Proposals embraced by the Reagan Administration and not lose heart to the whims of special interest groups. Change is imperative, and the rapidity of change is even more crucial for success. I urge you to hold steady to the task.

Again, I lend my full support to the new O.M.B. Proposals governing student financial assistance.

Sincerely,

SUSAN S. KOONCE,
Assistant Director, Financial Aid.

THREE MILE ISLAND

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of my special order today.

The SPEAKER. Is there objection to the request of the gentlemam from New York?

There was no objection.

Mr. WEISS. Mr. Speaker, the accident at the Three Mile Island nuclear powerplant near Harrisburg, Pa., 2 years ago demonstrated very dramatically the very dangerous potential of nuclear power generation.

Since that, as myths about the safety of nuclear power have tumbled, increased public scrutiny has changed the course of debate over our national energy policy. To this day we still do not know the full extent of the damage done to the reactor or the impact of environmental and public health hazards posed by the accident which began on March 28, 1979. Cleanup at Three Mile Island has just begun, and it will take another 7 or 8 years to complete, at a cost estimated as high as $1.3 billion.

□ 1445

I have asked for this special order today to discuss the importance of developments of the past 2 years which grew out of the Three Mile Island accident, the future of nuclear power and to the Nation's energy future as a whole. No longer should anyone question the fallability of nuclear power. We are now faced with a very serious need to review and reconsider the role of nuclear power in our society. We in Congress must utlimately be responsible for national energy policy and to conduct a thorough and open discussion of nuclear power is our obligation.

I believe that we must bring about a fundamental shift in our attitude. Nuclear power is not safe, it is not economical, and it is not our only alternative.

In the past 2 years, nine major studies have been completed on various aspects of the Three Mile Island accident.

All of these studies identified significant inadequacies in regulation and operation of commercial nuclear facilities. Most focused on the lack of preparedness of both the Nuclear Regulatory Commission and Metropolitan Edison, the operating utility, to respond to the crisis. The studies also identified major gaps in the Commission's management of its regulatory responsibilities, as well as the previously underplayed need to consider the socioeconomic impacts of nuclear plant operation in future energy planning.

The general thrust of these nine investigations, it is fair to say, was that nuclear powerplants were not and could not be operated safely unless significant improvements were made in how plants are regulated, licensed, and operated. Most of these improvements have yet to be made. The overall safety of nuclear power operation, measured in terms of problems identified as a result of the Three Mile Island accident, has not been significantly increased. Nor does our current national policy of nuclear business as usual reflect the dangers and the costs of nuclear power, nor does it adequately respond to the Nation's need for energy.

I believe that we should begin immediately to phase out operating nuclear reactors. Some plants, such as the Indian Point Facility outside of New York City and the Zion reactors near Chicago, should be closed immediately. These plants create massive risks because they are situated dangerously close to densely populated areas. In both cases, evacuation in the event of a major accident would be virtually impossible.

As long as nuclear facilities continue to operate, however, it is vital that we strengthen safety regulations, including plant siting standards and emergency response requirements, and improve inspection and enforcement efforts.

The Director of the Nuclear Regulatory Commission's inspection and enforcement program recently admitted to a House subcommittee that his program's efforts were indeed insufficient.

We should not overlook the importance of the so-called hidden costs of nuclear power, such as plant decontamination and fuel enrichment. Because the Commission has allowed plants to operate without planning for decommissioning, and I should remind all of us that nuclear powerplants have a useful life of only between 30 and 40 years at which time they will have become each and every one of them so dangerous that they must, in fact, be decommissioned, but because the Commission has allowed plants to operate without planning for decommissioning, the financial burden of mothballing an aging reactor will either be borne by ratepayers at a high rate over a short period of time during the reactor's final years of operation or by the Nation's taxpayers in the form of a Federal bailout to the nuclear industry.

Department of Energy operation of fuel enrichment plants for commercial reactors already subsidizes a vital step in the nuclear fuel cycle. These costs, too, should be paid for by the nuclear industry. The artificial supports now enjoyed by the industry distort our Nation's economy and unfairly promote nuclear power over safer, less expensive energy sources.

It is quite clear now that nuclear power is not at all the fail-safe technology which its proponents long insisted it to be. The Three Mile accident itself and the ongoing problems created by the cleanup are proof that unforseen, unlikely, and possibly even unmanageable incidents occur with nuclear power. The potential for a major catastrophe with this type of technology is so great that we must take a skeptical view of the claims of nuclear experts who continue to assure us that nuclear power presents no real danger to public health and safety.

I do not think that it needs any special reminder from me to anyone to recall the days of March 28, the days following March 28 of 1979 when not just the Members of Congress, but the entire Nation literally was hanging moment by moment to see whether a massive crisis demanding the evacuation of hundreds of thousands of people, perhaps millions of people, would be necessitated. Even at that time, ironically, when we were only perhaps an hour or two into the incident, Members in this body took the floor to assure the world and all of our fellow citizens that no real danger existed. Of course, in the hours and days that followed, it became clear that we were at the edge of a very serious potential catastrophe.

The nuclear energy industry has been coddled by the Federal Government since the nuclear industry began operating. A recent Energy Information Agency study revealed that the industry had received some $47 billion in Federal subsidies over the past 25 years. The industry also enjoys protection from liability for its accidents, because of the Price-Anderson Act, which limits liability in the event of a major nuclear accident to $560 million, although Government estimates predict the cost of such an accident to be approximately $14 billion.

No other industry in the Nation is similarly protected; and yet, operation of nuclear plants continues to lead to rate increases to consumers and it is almost certain that the costs of nuclear power will continue to rise.

I am the sponsor of legislation which would eliminate this artificial ceiling on liability provided by the Price-Anderson Act. My legislation would make nuclear utilities fully liable for damage which might occur as the result of a nuclear incident. Rather than shielding the industry from accountability, my bill would force utilities to improve safety provisions and to act much more responsibly. The existing Price-Anderson limit, which I might add is 23 years old and has not even been increased for inflation, encourages slack management and irresponsible operation by failing to make the utility responsible for its own mistakes.

We are likely to consider legislation this year, this session, Mr. Speaker, regarding the cleanup of Three Mile Island. A bill has already been introduced which would establish a nuclear industrywide insurance pool to meet cleanup costs at all nuclear plants, starting with Three Mile Island. All utilities which operate nuclear facilities would be required to pay annual premiums to a central fund. Participation in this insurance pool would be mandated as a licensing requirement under this legislation.

The bill, as currently drafted, would create a disincentive for nuclear plant operators to manage nuclear facilities safely by protecting utilities from the financial consequences of a major accident. Utilities would pass on to ratepayers the costs of premium payments to the insurance pool, in effect establishing a retroactive bailout of Metropolitan Edison, operator of Three Mile Island, and any other utility which has a major accident. As a result, consumers of utilities which operate nuclear plants would be forced to bear the financial burden of Three Mile Island. I believe that the possibility of an accident should be made part of the risk investors take in the nuclear option, the same as in any other business enterprise. Shielding the nuclear industry from liability unfairly promotes and subsidizes one energy option at the expense of all other energy sources, and distorts the true costs of nuclear power.

The President's proposals to cripple or severely limit Department of Energy programs in all areas but nuclear, and, indeed, he has proposed a very substantial increase in subsidization and funding for nuclear energy, might lead Americans to believe that nuclear power, nuclear fission, is the only route to energy security and independence. In fact, nuclear fission falls behind virtually all other alternatives as a way of serving the needs of Americans. Solar energy and coal are both more plentiful. Conservation and more efficient energy use are more effective methods of meeting short-term electricity demands. Biomass production and wind-generated electricity create none of the extraordinary dangers associated with nuclear power. None of the nonnuclear alternatives force the Nation into the hazardous situation of having to find a solution to the nuclear waste problem. And although some of our most qualified scientists have been working on this problem for nearly 30 years, no solution is available to us today. Neither do alternative energy sources create the frightening potential for worldwide nuclear weapons proliferation or encourage nuclear warfare.

We are really discussing a matter of life and death for very large segments of our population, Mr. Speaker, and indeed we may be dealing with the question of life and death for civilization itself. I believe that nuclear power has proved itself to be an unacceptable gamble. While it costs taxpayers and consumers alike in escalating rates and provides less than 4 percent of our national energy requirements, it poses peacetime hazards on a scale never before faced by human beings. For both the long- and short-term good of the Nation, we should be moving away from nuclear power as quickly as we can and toward other more benign and more effective sources of energy.

● Mr. ERTEL. Mr. Speaker, 2 years after the accident at Three Mile Island we still find ourselves asking many of the questions posed in the first few days after the accident. One of these questions is: who pays for the accident?

As we have learned, there are many payments which need to be made. Last summer the Pennsylvania Public Utility Commission (PaPUC) decided that the ratepayers will pay for the higher costs of replacement power necessitated by the accident. In many cases this has meant that Metropolitan Edison's (Met Ed) customers, through no fault of their own, have seen their electric bills go up 50 percent, even though many have taken steps to conserve. So in one sense, the ratepayers are paying for the accident.

The PaPUC has also removed both the damaged TMI-2 reactor and the undamaged TMI-1 from the ratebase of the utility. This means that the fixed costs and debt on these two reactors must be funded somewhere else.

Under this circumstance, General Public Utilities Corp. (GPU), Met Ed's parent, has suspended the payment of all common stock dividends for the last five quarters. This action is likely to extend for some time into the future. The value of GPU stock has dropped from $17 a share to below $5 a share since the accident. So in this way, stockholders are paying for the accident.

Even though dividend payments have been suspended, this does not provide all of the necessary money to cover the fixed costs and debt on TMI-1 and TMI-2. To cover these costs, GPU has borrowed heavily from a consortium of banks. All assets of the utility have been pledged to the banks to secure the needed short-term loans to meet immediate expenses. Even the accounts receivable have been pledged to the banks. As such, the utility itself is paying for the accident.

While the financial burdens of the accident have been shared by many, there is still no answer to who pays for the actual cleanup of the accident. To date, cleanup has been covered by the $300 million in insurance on TMI-2. This was the most insurance available at the time of the accident. This insurance money will be exhausted in about 1 year. The current cleanup cost estimates are about $1.3 billion. No one knows where the $1 billion not covered by insurance will come from. The utility does not have the money. The stockholders do not have the money. The ratepayers are already heavily burdened.

If the cleanup money is not found the utility will go bankrupt. But this still does not find the money to clean up. This $1 billion has to be spent. It cannot be wiped off the books if the company goes bankrupt. In fact, bankruptcy only raises the total cleanup cost.

Cleanup has to occur. Public health and safety are jeopardized as long as the plant is contaminated. The Nuclear Regulatory Commission has made this point on a number of occasions. Most recently, the NRC stated this fact in the programmatic environmental impact statement by saying:

Until TMI-2 is largely decontaminated there is a small probability (which increases with time) of uncontrolled releases of radioactivity to the environment. Decontamination of the plant will eliminate this possibility for potential harm to the public and workers at TMI * * *. The staff therefore concludes that the full cleanup of the facility must proceed as expeditiously as is reasonably feasible, consistent with ensuring public health and safety and protecting the environment.

Still, we are no closer to answering the question of who pays for the cleanup than we were the day after the accident. In fact, we are further away from answering this critical question because the total cost of the cleanup has mushroomed.

We have been told that since the Government has been so closely involved with nuclear power, we should fund the cleanup at TMI. I reject this argument. Recently I wrote a letter to the editor of the Wall Street Journal discussing this argument. The following is the text of that letter which appeared in the March 5 edition.

THREE MILE ISLAND: WHO GETS THE BILL?

Recently, the Nuclear Safety Oversight Committee, chaired by Arizona Governor Bruce Babbitt, recommended to the President that the federal government incur all financial liability for cleaning the crippled reactor at Three Mile Island (TMI). This call—echoed by the Pennsylvania Public Utilities Commission and General Public Utilities (GPU)—proposes a raid on the federal Treasury amounting to approximately $1.2 billion. The assertion is that the government should pay clean-up costs solely on the basis of its long-standing association with the nuclear industry.

The federal government, the argument goes, sponsors nuclear research, promotes nuclear power, regulates the siting and design of nuclear power plants, licenses their operators and even approves and audits their plant procedure. Given this pervasive involvement, the Pennsylvania utilities commission and the utility think the federal government should clean up the nation's worst nuclear accident.

The state regulators and the utility allege the government is legally responsible because of its promotional and regulatory "involvement" with the industry—a kind of bill by association. If this "involvement" approach is accepted, taxpayers should prepare themselves for substantial payments to a diverse array of possible victims, whose only factual claim is that they had the good fortune to keep the bad company of the federal government.

Despite the undeniably large government role in the air transport industry, for example, no one has ever prevailed upon the federal government to pick up the tab for an airline crash without first proving that the accident resulted from a specific failure by the government.

Any monetary assistance to GPU from the federal government must rest on a solid policy basis rather than this makeshift, albeit ingenious, argument. The federal government did not decide to build the Three Mile Island reactor. It did not choose the site, the reactor or the operator. Rather, the government established minimum standards that the utility met in developing TMI. Federal standards sought to ensure the safety of the general public. The legislative intent was not to establish a casualty property insurance system to protect the utility from its own managerial decisions. Surely the utility recognized as much when it took out a casualty insurance policy of $300 million for its reactor.

Does there exist then a policy for federal aid to GPU? One could reasonably argue that in meeting its responsibilities for public health and safety, the federal government should help pay the billion-dollar clean-up costs. GPU cannot meet these costs on its own and, without federal help, the public safety will continue to be jeopardized by the still-contaminated reactor. One might also argue that the government retains its interest in the development of nuclear power and that a clean-up at Three Mile Island is necessary to the future of the nuclear option. It is on these and other relevant points that the federal role at TMI should be argued. There is no shortage of specious arguments to divert us from this critical debate, but we soon will be short of both time and patience.

ALLEN E. ERTEL,
U.S. House of Representatives.
WASHINGTON.

(Mr. ERTEL is chairman of the Congressional Ad Hoc Task Force on Three Mile Island.)

Against all of this background we are still left with the question of who pays for the cleanup. Recently I introduced legislation, H.R. 2512, which finally answers the question. Specifically, this legislation would establish a national nuclear property damages insurance program designed to supplement the currently available insurance. This program follows the model of a mutual insurance arrangement with annual premiums paid to a fund by all utilities operating nuclear reactors. Premiums would be established on the basis of the size and number of the nuclear reactors as well as the safety and performance experience of the individual utilities. Participation in the insurance program is mandated as a condition of receiving or retaining an operating license for the reactor.

If a utility has an accident in the future, this insurance would not be made available until all of the other commercially available insurance is exhausted, plus $50 million. Based on the insurance available today, this constitutes a deductible of $350 million.

For cleaning up TMI, the insurance program would initially provide up to 75 percent of the uninsured cleanup costs at TMI. When the cleanup is completed, GPU would be required to repay 50 percent of the money received from the insurance program over an extended period of time. This amounts to a nuclear utility industry loan to GPU of 37.5 percent of the cleanup costs and a grant for 37.5 percent of the costs.

It could reasonably be asked what burden this insurance program would place upon utilities throughout the Nation. One important feature of the legislation is that it does not intrude on the ratemaking authority of the State utility commissions. The State commissions have the flexibilty to determine how the premiums will be paid for. One could argue that the absence of adequate insurance is the fault of uitlity management, and, as a consequence, premiums should be paid from earnings before dividends. Obviously, the State commissions also have the authority to reflect the premium payments in the rates of the utilities' customers.

If the commissions pass through the premium payments, the impact upon ratepayers would vary from utility to utility. If there was such a thing as an average national ratepayer he would experience an increase in a monthly

bill for 500 kilowatt-hours of 3 cents for as long as the premiums are collected. This figure is based on actual 1980 generation. Using 1981 projected generation this figure would drop to about 2.5 cents. Premiums would be collected until an insurance reserve had been created. At that time, premium collection could be either suspended until there was a future need, or they could be rebated at the end of each year. In addition, the interest collected on the insurance reserve could also be rebated.

In assessing this cost, it is important to understand what each utility might experience if TMI goes bankrupt—as it will if a cleanup financing mechanism is not put into place. While it is hard to make forecasts, it seems reasonable to assume that capital will be available to utilities only at higher interest rates to reflect the increased preception of risk. An increase of 1 percent in interest charges would cost many utilities tens and hundreds of millions of dollars, tenfold more than the payment of premiums as provided under this legislation. It is certain, that these higher interest charges will be reflected into the rates of all utilities' customers and will be far more burdensome than the payment of insurance premiums which also protects the ratepayers if a future accident occurs.

We have had the charge that nuclear power is heavily subsidized and the real costs of nuclear power are not reflected in the rates to utility customers. This legislation would set a precedent for more accurately reflecting the cost of nuclear energy. While no one is suggesting that this legislation would in any way alter the economics of nuclear generation versus coal, oil, or gas, the bill does recognize that these costs should be reflected.

I am convinced that this is a sound and equitable approach to this difficult problem. Public health and safety must be protected at TMI, and unless we correct the deficiencies in the available insurance for all nuclear utilities, public health and safety will again be jeopardized by dragging out the cleanup when the next accident occurs. I hope my colleagues will join me in this legislation so that we can finally answer the question of how the cleanup at TMI will be paid for.●

● Mr. MARKEY. Mr. Speaker, I welcome this opportunity to remind our colleagues on this occasion, nearly 2 years after the near core meltdown at Three Mile Island, of some of the sobering economic facts about nuclear power in this Nation.

Nuclear advocates boast that no one was killed at Three Mile Island. They are wrong. There was one casualty. Since the Pennsylvania reactor went haywire 2 years ago, the nuclear industry has been economically comatose.

Shortly before Three Mile Island, a brokerage firm that specializes in the nuclear industry, Nuexco, was predicting that 61 new reactors would begin operation in the period 1979–84. Six months after TMI, the forecast was lowered to 50 new plants. Four months ago the estimate fell again to 21 plants. Today, Nuexco predicts that 17 plants at most will come on line between 1979–84.

An even more disturbing trend for the nuclear industry is the disappearance of new orders. To remain healthy the industry needs five new orders per year. Even before TMI, the future nuclear market was collapsing. From 1975 to 1978 there were only 13 orders for new reactors, and only 1 of those orders is still alive—the others have been canceled or indefinitely deferred. TMI accelerated this negative trend of no orders. In 1979 there were zero new orders. In 1980, no orders. Industry officials now foresee the possibility of no new orders for a decade, if ever.

The decline of the domestic nuclear power industry appears permanent as demand for electricity has dropped sharply and coal has become more competitive. People are using less electricity because of higher costs. The historical growth rate of electrical demand which averaged 7–9 percent 1974 has averaged 2.4 percent over the last 3 years. Westinghouse Electric Corp.'s latest 20 year forecast predicts a 2.9-percent electrical growth rate until the year 2000. What little new electrical capacity will be needed during the 1980's will be supplied by coal. Coal is now cheaper than nuclear power in most parts of the country. Despite the steep drop in electrical demand since 1975, there were 101 orders for new coal plants for over 46,000 megawatts of electrical capacity.

Today's electric power surplus generating capacity stands at more than 36 percent, up from 21 percent in 1973. A 20-percent surplus over peak demand is needed for reliable electric supply. Reserve capacity will decline slowly, utilities told Department of Energy last year but will still be at 27 percent by the end of this decade.

The last thread that might save nuclear power is suspect. That is the argument that nuclear power is essential to reduce our oil imports in our drive for energy independence. Over 90 percent of U.S. oil is used to run vehicles, make heat for buildings and industry, and provide materials for the petrochemical industry. Only 9 percent of U.S. oil is used to generate electricity which is the only form of energy nuclear power produces. Even that 9 percent cannot be replaced by nuclear power because much of it is for peak demand generating purposes for which nuclear power is uneconomical.

Instead of nuclear reactors, many utilities like the giant Southern California Edison now stress peak load management, cogeneration, and solar renewables. For SoCal Edison, it is a major shift in policy for a utility once a leader in the drive for atomic power. William Gould, its president, bluntly told the Atomic Industrial Forum that for the 1980's—

> It was not feasible to base resource additions on facilities with high capital costs, long lead times, and long gestation periods.

The sting in Gould's words is especially sharp considering it came from AIF's first president. For many utilities, the multibillion-dollar investments in nuclear power have become a millstone around their necks. The most unlucky of them all, General Public Utilities, owner of the crippled Three Mile Island reactor, is nearly bankrupt and begging for a Federal bailout.

Ironically, it may be the antigovernment administration of Ronald Reagan which gives it to them. During his Presidential campaign Reagan exhibited near messianic support for increased nuclear power development. The centerpiece of his energy program is a dramatic effort to breathe life into the dying U.S. nuclear power industry.

The first step for Reagan was to beef up Federal expenditures for nuclear power. In the name of fiscal austerity, Reagan slashed hundreds of millions of dollars from the energy budgets of coal, conservation, and solar technologies; conservation alone was reduced 79 percent by President Reagan. At the same time he gave extra handouts to nuclear power.

The Reagan administration will double the nuclear share of the energy research budget. In 1982, it is a grand total of $1.8 billion in atomic subsidies which consume 36 percent of the nonmilitary Department of Energy research budget. That is 36 percent of our energy budget for a fuel that contributes only 4 percent of today's energy supply—slightly more than wood in the United States.

Included in the nuclear largesse of President Reagan was a 2-year allocation of $438 million for the Clinch River breeder reactor, the Holy Grail of the nuclear industry. A breeder is a nuclear reactor which produces more fissile material than it consumes. This was a warm embrace of the plutonium fuel cycle—strongly supported by the nuclear industry despite the fact that its fuel can be fashioned directly into atomic weapons. Reagan's Budget Director, David Stockman, had described the breeder in 1977 as "a large uneconomic subsidy" and "incompatible with our free market approach to energy" but his complaints were ignored.

On the eve of the second anniversary of the Nation's most serious reactor accident, nuclear power is on the ropes and hoping for a rescue from the

Reagan administration. Even with Ronald Reagan acting as a cheerleader, it appears that the forces of the marketplace in combination with Three Mile Island have administered a knockout to the nuclear option.●

ADMINISTRATION PROGRAM FOR ECONOMIC RECOVERY NEEDS A DIRECT SAVINGS INCENTIVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GREEN) is recognized for 15 minutes.

● Mr. GREEN. Mr. Speaker, most Americans have applauded President Reagan's effort to cut the Gordian knot, and, by his program for economic development, to deal simultaneously with inflation, unemployment, soaring Federal spending, Federal taxes that are imposing rates on middle-income taxpayers that once were considered appropriate only for those with the highest incomes, enormous Federal deficits in good times and in bad, the lowest personal savings rate of any major industrial country, and a declining growth in productivity that, in the last couple of years, has turned into absolute declines in productivity. I share the administration's view that these issues are interrelated and must be dealt with together as the administration seeks to do.

Most criticisms of the Reagan program have focused on cutbacks in individual programs. A program designed to deal with Federal spending that has seemed beyond control has inevitably caused virtually every Member of Congress to feel pain at specific cuts. I have been no different from my colleagues in that respect.

However, today I address not the particular grievance my district may have with particular proposed spending cuts, but one of the basic economic assumptions of the President's plan. The point I seek to make is that the President's program for economic recovery needs a specific, direct savings plan.

The savings rate is important for several reasons. Money saved is available for investment. It is also available to fund Federal deficits without the need for the Federal Reserve System to print money—and the Reagan plan acknowledges that its program cannot provide stimulus that can instantly both provide tax cuts and eliminate deficits. So the savings assumptions in the Reagan plan are important.

More than 75 percent of the Reagan tax relief benefits flow to households; less than 25 percent flow to business. Since personal tax cuts far exceed those for business, it is the personal savings response to the personal tax reduction that is critical. Exactly what the saving assumption is under Reagan's proposal is uncertain. Treasury Secretary Donald Regan claims that he was misquoted as saying one-half or even two-thirds of the tax cut would be saved. Secretary Regan's testimony at the House Ways and Means hearing on February 24 indicated that the assumption was in line with the 17-percent marginal savings rate that resulted from the 1964 Kennedy-Johnson tax cut.

When I inquired of the Congressional Research Service what the savings rate was as a result of the Kennedy-Johnson tax cut, this was the response:

> The assessment of the effect of economic events on savings rates is a very difficult statistical process. Merely observing that the savings rate increased after the 1964 tax cut does not demonstrate that the tax cut caused the savings rate increase. There are relatively few economic studies which have attempted to measure the effects of past tax cuts on rates of consumption and saving. . . . Though a perfect consensus does not emerge from these studies, they appear to imply that a tax cut does have the immediate effect of increasing the savings rate because the increase in after tax income is not immediately spent. Over a period of approximately two years the amount of the tax cut which is saved will gradually decrease to an equilibrium level of approximately 15 to 20 percent, which is higher than the average savings level in the economy. The studies do not find effects for the 1964 tax cut which differ significantly from other permanent tax changes during the past two decades.

While the one-half to two-thirds marginal saving rate is uncharacteristic of past tax cuts, the 17-percent marginal rate is not an impossibility based on the Kennedy-Johnson experience, assuming all the other factors in the economy are the same as in 1964, which of course they are not.

The economic conditions at the time of the Kennedy-Johnson tax cut were significantly different from our current situation. The annual rate of change of the consumer price index during 1980 was 13.4 percent compared to 1.3 percent in 1964. The interest rates on 3-month Treasury bills are presently in the vicinity of 15 percent versus an average of 3.5 percent in 1964. The unemployment rate today hovers around the 7.3-percent mark while the 1964 rate was 5.2 percent. Thus, it is far from clear that households will save as much of a tax cut today as they did in the early sixties. In fact, to add to the dilemma, the tax cut may not be perceived as a tax cut at all when rising social security taxes and ratcheting up in income brackets as a result of inflation are calculated into the formula.

For that reason, I believe that the administration should add a specific saving incentive to its economic proposal and that such an incentive should be geared to the lower- and middle-income levels where the average propensity to save is the lowest. My saving incentive proposal differs from those that have previously been offered. The latter have involved tax deductions or exclusions which largely aid upper-income households which are already the major immediate beneficiaries of the Reagan proposals. Such households already tend to save a larger proportion of their income on average than more modest income households, and, therefore, I suspect the additional savings induced by such saving programs are minimal.

I propose, instead, that we subsidize low- and moderate-income saving. My program is modeled on a program that worked successfully in West Germany. The ingredients of my program for this country include the following:

Participants would have to commit to save or invest for 7 years;

The savings could be held at banks or invested in mutual funds or other vehicles similar to those allowed under Keogh and IRA programs;

The United States would commit to pay a substantial interest bonus of 14 percent of the value of the initial investment at the end of the investment period of 7 years;

The program would have an investment limit per year of $500 per individual and $1,000 for a married couple; and

The program would have an income limit of $15,000 adjusted gross income for an individual or $30,000 for a married couple.

Based on the German program, if all the eligible household units participated in the saving program—39 million individual returns and 37 million joint returns eligible of those who filed in 1978—the increase in saving would total $56 billion and the resulting interest bonus calculated at 14 percent at the end of 7 years would amount to $8 billion. Obviously, not everyone would participate in the program, however. Based on the German experience where participation peaked at 40 percent, the saving would total $23 billion and the outlay for interest would be $3 billion. Given the much higher bonus offered by the Germans and their lower inflation rate, however, a 20-percent participation might be more realistic for the United States. That assumption would yield $11 billion in saving and $1.5 billion in eventual interest bonus payments. Even this amount of personal saving would be a significant increase over the current $90 billion level.

Instituting a saving incentive program that is targeted to modest income savers would be even more urgent if the Kemp-Roth tax cut is enacted.

The reason for this is the comparative timing of the impact of the two programs. While a tax cut might provide some initial saving, econometric studies show that in a year or two that saving is eroded steadily by new con-

sumption. Since the average propensity to save is lower among lower income households, it is important to capture the marginal increase in income that will result from a tax cut and lock it into savings for a period of time. This will tend to promote the psychological change in attitude from consumer to saver that currently does not exist.

The other question of timing that makes my bill so important is that Kemp-Roth has a tendency to create immediate deficits while the saving program would delay outlays for 7 years. Savers must save for 7 years before they receive the interest bonus. Thus, we have 7 years of saving and 7 years of investment in private sector productivity before we make any Government outlays. This investment in private sector productivity and increase in dollars that could be used to offset the budget deficit are even more critical when one looks at the increase in inflation that resulted from the Kennedy-Johnson tax cut. Two major econometric studies estimated the increase in the rate of inflation to be in the vicinity of 0.5 percent by the third year after the tax cut. In today's experience, one-half of 1 percent is not an overwhelming increase, but in the context of 1964's inflation rate of 1.6 percent it certainly was significant. That Kennedy-Johnson increase could translate into an increase of as much as 3 or 4 percent given today's inflation pace.

In short, I believe that my saving incentive program can put an anti-inflation safety net under the deficits which the Reagan administration admits must accompany the first few years of its tax cuts. For that reason, I believe the administration should add a specific saving program, along the lines I have introduced, to its program for economic development.●

UNEMPLOYMENT COMPENSATION AMENDMENTS OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. CONABLE) is recognized for 3 minutes.

● Mr. CONABLE. Mr. Speaker, today I am introducing, at the request of the administration, the Unemployment Compensation Amendments of 1981. This bill is intended to implement the recommendations of President Reagan in his program for economic recovery.

Title I of the bill contains four sections which change the Federal-State extended benefit program to improve the targeting of compensation to the truly long-term unemployment in the most severely impacted States. To accomplish this, the bill would—

Eliminate the national trigger for extended benefits and thus target benefits to claimants in those States with high unemployment rates;

Change the State trigger for extended compensation to achieve greater targeting of benefits in those States with higher unemployment rates;

Establish a new qualifying requirement for claimants of extended benefits in order to require a greater labor force attachment by workers; and

Change the equation for determining the rate of insured unemployment to eliminate claimants for extended benefits.

Title II would establish a tighter work test requirement for regular unemployment compensation after a claimant had received 13 weeks of compensation under the applicable State law. The requirement would remove a disincentive from seeking employment in different occupational sectors while challenging workers to adjust to new economic and industrial realities.

Title III would establish requirements for service members that are more comparable to those which apply to civilian workers.

A detailed description of the bill is included below:

EXPLANATION OF THE UNEMPLOYMENT COMPENSATION AMENDMENTS OF 1981

Title I would change various provisions of the Federal-State Extended Unemployment Compensation Act of 1970. Section 101 would eliminate the national trigger for extended compensation. Under present law, when the national rate of insured unemployment reaches 4.5 percent, the extended benefit program, consisting of up to 13 additional weeks of unemployment benefits after the regular 26 weeks of benefits, triggers on in all States.

The purpose of the extended benefit program is to prevent hardship in areas where high levels of unemployment make it unusually difficult for unemployed workers to find jobs. Structural shifts in the national economy, however, produce large unemployment rate differentials. The elimination of the national trigger will target extended benefit funds only to those States whose workers genuinely need such extra help. In addition, this change will remove the work disincentive which is created in low unemployment States when the national trigger is on.

This change would be made effective on the date of enactment if the national trigger is "off". The changes would be effective on July 1, 1981, if for the week in which such date of enactment occurs there is in effect an extended benefit period on the basis of a national "on" indicator. Alternatively, if the national indicator is "on", the changes would be effective prior to July 1, 1981, in the week following the week in which an extended benefit period ends on the basis of a national "off" indicator. This section also requires the States to conform their State laws to the enacted changes as soon as possible in 1981, or early in 1982 in the case of any State whose legislature does not meet in a session which begins before September 1, 1981.

Section 102 would increase the level of insured unemployment necessary to trigger on extended benefits in a State. Under present law, the extended benefit program triggers on in a State when (a) the insured unemployment rate is 4 percent or above for 13 weeks, provided the rate is at least 120 percent of the average of the rates for the corresponding periods in each of the two prior years, or at the option of the State, (b) 5 percent without regard to the rate in the prior two years.

This section would increase the State trigger rates of insured unemployment to 5 percent and 6 percent, respectively.

The purpose of the extended benefit program is to prevent hardship in areas where high levels of unemployment make it difficult for unemployed workers to find jobs. At the same time, where workers can more easily find work, the receipt of extended benefits operates as a disincentive to job search. The proposed increases in State trigger levels reflect a better balance between these objectives.

This change would be made effective on October 1, 1982. This section would also require the States to amend their State laws in order to conform with the enacted changes by September 25, 1982, or as soon thereafter as possible in the case of a State whose legislature does not meet in a session that begins before September 1, 1982.

Section 103 would add a qualifying requirement as a condition for an individual's eligibility for extended compensation. The new requirement would be 20 weeks of work in the base period or the equivalent in wages.

Extended unemployment benefits are paid generally from the 27th up to the 39th week of unemployment. Such long-term benefits should not be paid to workers who were employed for less than 20 weeks in the base period used to establish their eligibility for regular benefits, or who, under State law, have previously earned wages which amount to less than the equivalent of 20 weeks of work.

The bill sets forth two methods for determining when a worker has earned the equivalent in insured wages to 20 weeks of work. One method is earnings covered by State law which exceed 40 times the individual's most recent weekly benefit amount. Since an individual's weekly benefit amount usually approximates half of that individual's average weekly earnings, 40 times that amount should nearly approximate the earnings for 20 weeks of work. The second method is one and one-half times an individual's insured wages in that quarter of the individual's base period when the worker's insured wages were the highest. A base period quarter has 13 weeks. Therefore, the total of one and one-half times the earnings in the high earnings quarter should approximate the earnings of 20 weeks of work. Each State may choose between the 20 weeks of work test or one of the two wage equivalency tests. Since States already use one of these methods for their regular unemployment compensation program, the additional qualifying requirements should not be administratively burdensome.

The changes required by this section would be made effective on October 1, 1982. This section would require the States to amend their State laws in order to conform with the enacted changes by September 25, 1982, or as soon thereafter as possible in the case of a State whose legislature does not meet in a session that begins before September 1, 1982.

Section 104 would change the method of calculating the insured unemployment rate (IUR). The present law includes individuals filing claims for extended benefits in the insured unemployment count. The amend-

ment would take extended benefit claimants out of the count.

The present method of calculating insured unemployment rates, by including those claiming extended benefits, is technically flawed and produces several anomalies. The payment of extended benefits may be delayed when unemployment rises; extended benefits may be paid in one State for several months while they are not paid in another State with an identical overall unemployment rate; and extended benefits may continue to be paid when overall unemployment is less than it is when the extra benefits began. Removing those claiming extended benefits from the count of insured unemployed will correct these anomalies. This change would be effective for weeks beginning after the date of enactment.

This change in the method of IUR calculation will require the States to recalculate their IUR's for the past 117 weeks prior to the date of enactment. The IUR is used to trigger the State extended benefit period within that State. Under present law, the extended benefit program triggers on in a State when (a) the insured unemployment rate is 4 percent or above for 13 weeks, provided the rate is at least 120 percent of the average of the rates for the corresponding periods in each of the two prior years, or at the option of the State, (b) 5 percent without regard to the rate in the prior two years. Under method (a), a State would calculate the average rates for corresponding periods in each of the past two years. A change in the method of calculating the IUR would therefore require a State to adjust its prior IUR rates in order that the percentage would reflect a true average for the corresponding periods. If different IUR's were used, inaccurate results would be reached. Section 104 of the bill contains a provision requiring this recalculation.

The changes required by this section would require States to amend their State laws in order to conform with the enacted changes as soon as possible in 1981, or early in 1982 in the case of any State whose legislature does not meet in a session which begins before September 1, 1981.

Title II of the bill would change the work test under the regular Federal-State unemployment compensation program. Section 201 would amend the Federal Unemployment Tax Act to strengthen the work test for recipients of regular unemployment compensation. Under current State law, those who refuse to accept "suitable work" are denied unemployment benefits. "Suitable work" is usually defined as a job similar to the person's prior employment, and thus generally requires those drawing unemployment benefits to search for work in their customary occupations at prevailing wages.

This section would adopt the work test of the Federal-State Extended Unemployment Compensation Act of 1970, as amended. It would require that, after the 13th week in which the individual was entitled to a partial or total payment, was unavailable for work, claimants whose prospects of returning to their line of work were not good would be disqualified for regular UI if they failed or refused to accept offers of "suitable work", as redefined, or to seek and apply for such work. With respect to such work, there would have to be an offer in writing or the job would have to be listed with the State employment service. Changes in current procedures would not be required for workers during the first 13 weeks of their benefit years.

"Suitable work" after the first 13 weeks would be defined under this new work test as work, (a) which is within the person's capabilities; and (b) for which the wage rate is not less than the higher of the Federal minimum wage rate set forth in section 6 of the Fair Labor Standards Act or the applicable State or local minimum wage rate; and (c) for which the gross average weekly pay exceeds the person's most recent weekly benefit amount plus, if applicable, the amount of supplemental unemployment compensation benefits.

These changes in the unemployment compensation work test seek to challenge workers to adjust to new economic and industrial realities. Economic events of the past decade have produced significant structural shifts in the American economy, with employment in a number of major industries declining while newer industries grow. By allowing unemployed workers to draw up to 6 months of compensation unless jobs in their occupations are available, the present unemployment compensation system discourages workers from seeking employment in new industries which, while they may initially pay lower wages, hold the prospect of growing employment and increasingly higher pay.

The changes required by this section would be made effective on October 1, 1982. This section would require the States to amend their State laws in order to conform with the enacted changes by October 1, 1982, or as soon thereafter as is possible in the case of a State whose legislature does not meet in a session that begins before September 1, 1982.

Title III of the bill would change the provisions of title 5, United States Code, which provide for unemployment compensation for ex-servicemembers (UCX).

The unemployment compensation program for ex-military personnel would be amended to make ineligible for benefits (under UCX) those military personnel who are not discharged under honorable conditions, or who voluntarily leave the military service, or are discharged for cause.

The military service is now entirely voluntary, and most separations from the service are voluntary. Unemployment compensation would be denied if the ex-servicemember resigns or voluntarily leaves the service, or is discharged for cause. In addition, only a discharge or release under honorable conditions would qualify an individual for benefits under the program. Every State provides for the disqualification of civilians who voluntarily leave their jobs, are discharged for misconduct, or refuse an offer of suitable work. The proposed amendment, therefore, would bring treatment of civilians and military personnel more in line, by establishing national rules for military separations that are voluntary or are not under honorable conditions.

The changes made by this title would be effective on July 1, 1981.

UNEMPLOYMENT COMPENSATION ACT AMENDMENTS OF 1981—BUDGET ESTIMATES

TITLE I—EXTENDED UNEMPLOYMENT COMPENSATION

The proposal is expected to result in the following changes in funding from current law:

[In millions of dollars]

	1981	1982	1983	1984	1985	1986
Outlays	−505	−1,218	−483	−202	−284	−286

TITLE II—REGULAR UNEMPLOYMENT COMPENSATION

The proposal is expected to result in the following changes in funding:

[In millions of dollars]

	1981	1982	1983	1984	1985	1986
Outlays			−285	−285	−272	−264

TITLE III—UNEMPLOYMENT COMPENSATION FOR EX-SERVICEMEMBERS

The proposal is expected to result in the following changes in funding:

[In millions of dollars]

	1981	1982	1983	1984	1985	1986
Budget authority	−60	−225	−237	−245	−247	−248
Outlays	−60	−225	−237	−245	−247	−248

●

COMMUNITY AGONY BEGINNING OVER ADMINISTRATION'S BUDGET, ALTERNATIVES OFFERED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WILLIAM J. COYNE) is recognized for 30 minutes.

Mr. WILLIAM J. COYNE. Mr. Speaker, the administration promises, in essence, that tax reductions of 30 percent spread over a 3-year period, combined with Federal spending cuts leading to a balanced budget in 1985, will so stimulate the private economy that inflation will be curbed, industrial strength restored, and joblessness reduced, providing, in the President's words, "A brighter future for all of our citizens." But will this occur? Even the conservative Business Week magazine feared the tax cuts would "touch off an inflationary explosion."

Yet something must be done. Chronic inflation hovers at about 13 percent a year. Unemployment by latest count was running at 8 percent with 8 million Americans out of work. U.S. manufacturers are losing markets abroad and facing tough competition with foreign products at home. The productivity growth rate in the past decade fell to half of what it had been for the previous 20 years.

These economic woes are serious. Not only the President and the Congress, but also the local governments, labor, and management must pull together to reverse these disturbing statistics—and the human distress behind the statistics.

If the Pittsburgh area I represent is typical, the administration's strategy is beginning to confront the American people and the Congress—even those of us who support the goal of reduced Federal spending—with agonizing decisions. As specific details of the reductions strike home, visiting delegations complain of false economies, heavy

burdens thrown on already troubled local governments, and cuts that impose disproportionate shares of the sacrifice on "our program."

Take the President's proposal to require tenants of subsidized housing to pay increased rents, going up to 30 percent of their income by 1985. From serving on Pittsburgh's Public Housing Authority Board, I know that tenants are hard pressed to meet current rents at 25 percent of their income. Moreover, as the administration seeks to cut back subsidized housing by $4.6 billion in 1981 and another $8.7 billion in 1982, I cannot help but visualize the long waiting lists of needy families hoping for assisted housing in our community.

Corporations doing business overseas, meanwhile, are alarmed over proposed reduction in Export-Import Bank funding: Direct loans would be slashed $800 million in 1981, $600 million in 1982; loan guarantees would be cut $1 billion this year, $1.2 billion the next. The President justifies this by asserting that "restoration of general economic health in the U.S. economy will be a more powerful stimulant to export expansion than costly subsidized loans." Foreign firms, however, typically get big subsidies from their governments. Corporate and union leaders fear that reduced Eximbank loans, which help keep U.S. firms on an equal footing, will hurt our trade balance and put Americans out of work.

During Eximbank hearings before the International Trade, Investment and Monetary Policy Subcommittee on which I serve, we heard testimony that "each billion dollars in exports creates 40,000 U.S. jobs." Gordon C. Hurlbert, president of the Power Systems Co. of Westinghouse, said large facilities with thousands of employees, including an east Pittsburgh plant, will be seriously threatened if Eximbank contraction causes the loss of Far East sales. And if large American companies lose their competitive edge in foreign trade the ripple effect will spread to the many small suppliers and subcontractors engaged by these international corporations.

During 1980, Allegheny County controller, Frank J. Lucchino reports, Federal assistance to the county amounted to approximately $177 million. The city of Pittsburgh, according to deputy city controller, Raymond E. Johnson, Jr., received $75 million in Federal assistance. Without being narrowly parochial, I believe most of my constituents expect me to examine the proposed reduction of these funds to make sure they do not do more harm than good. Prime Minister Margaret Thatcher, several years ago, using similar rhetoric about restoring the enterprise system, sharply reduced funding for British social programs as the Reagan administration now proposed to do. The soaring unemployment rates and high bankruptcies that followed, caution us against accepting promised results on faith.

I am not convinced, for example, that it makes sense to eliminate CETA—Comprehensive Employment Training Act—jobs. Throwing low-skilled employees back on welfare would not even be cost effective, and it seems to contradict the workfare, not welfare theme of Mr. Reagan. If some CETA programs are poorly managed, and if some fail to train participants so they can successfully enter the private job market when their public jobs end, I would favor the most rigorous efforts to correct these weaknesses. But why throw out a program that reduces the human and economic waste of unemployment?

The proposed elimination of $1 billion in Federal assistance for the operating cost of local mass transit systems would translate into a $16 million-a-year loss to the Pittsburgh Port Authority. County officials tell me that, if this Federal funding is withdrawn, they have three choices—to raise bus fares from 75 cents to an estimated $1.05, to seek further subsidies from local taxpayers, or to shrink services. The latter, of course, would hit hardest those who depend on public transit to get to work. It would also leave the community without an alternative to reliance on autos if the Nation has to experience long drawn-out gasoline crises.

Managers of our local school lunch programs say they would accept reductions more in line with the average Reagan cuts of about 7 percent, but they object to reductions of over 40 percent. Allegheny County schools would lose about $6.6 million a year. The administration says it only wants to halt subsidized lunches to people who can afford them. But because of the way the aid is leveraged, some fear the feeding programs will be wiped out entirely in many schools.

Pittsburgh has long been a leader in urban revitalization, with a big emphasis on self-help. Our urban redevelopment authority is continuing this tradition with UDAG—urban development action grants. Local officials say UDAG programs are stimulating over $100 million in private investment in response to $23 million in Federal aid, with a spinoff of 2,460 new jobs and nearly $2 million a year in new local tax revenues. Before my Committee on Banking, Finance and Urban Affairs, in response to concern over the future of UDAG, David A. Stockman, Director of the Office of Management and Budget, said:

> Our plan is to continue the UDAG function * * *. But our question is how can we incorporate that function into a basic community development program and not have to maintain the existing program structure. For 1981 we are proposing no change. For 1982 we are proposing to make UDAG-type obligations through a new legislative proposal that we will be sending to your committee shortly.

This supposed clarification still leaves me puzzled about what is contemplated for UDAG. Constituents who suggest that the Democrats are holding back on approval of the Republican blueprint need to understand that many parts of that blueprint remain sketchy or nonexistent. Despite this, the House Democratic leadership is moving ahead on a very tight schedule to complete action on a new budget by midyear.

Pennsylvania taxpayers have been getting back only 92 cents for every dollar its taxpayers send to Washington—compared with $1.07 by taxpayers in the West and $1.12 by those in the South. One of my tasks in reviewing the budget is to seek to correct this imbalance which amounts to subsidizing the drift of people, jobs, and industries from our area to the Sunbelt. It wastes energy and contributes to the instability of our great cities.

The barge operators inform me of another difficulty with the administration's proposals. Increased waterway user taxes and a program to recover the costs of the U.S. Coast Guard are of particular interest to Pittsburgh which handles more barge tonnage than any other inland port in the Nation. At a time of energy problems, the fuel efficiency of barges should be encouraged, not discouraged. According to the American Waterways Operators, a gallon of fuel can move a ton of freight 59 miles by truck, 202 miles by rail, but 514 miles by barge. Since coal and oil are major barge cargoes, the energy implications are multiplied. The question in my mind is not whether barge traffic should continue to pay for maintenance of the waterways. It should. But we need to make certain that this mode of transportation is being treated equitably with rail, highway, and air transportation.

I do not hesitate to give the President high marks on several counts. He correctly targets inflation as a major problem. He properly calls for reduced Federal spending. His initiatives create an atmosphere in which whole categories of Federal activities that were previously off limits to economizers and reformers have been opened up for review. It is in this spirit that I am seeking alternative methods of achieving the cost-cutting goals. Let me give two examples.

First, it is not widely recognized that the Treasury gives up more revenue each year—$19.8 billion—through income tax deductions for mortgage interest than it provides to poor people through all housing subsidies combined. These deductions serve the useful purpose of stimulating homeownership. However, no limit is set on

the amount a taxpayer may deduct for this purpose. Owners of mansions and vacation homes deduct all their mortgage interest payments, out of all proportion to need. I strongly favor consideration of a $5,000 ceiling on these deductions so the bulk of taxpayers do not have to pick up the tab for the wealthy. A Congressional Budget Office analysis indicates that the $5,000 ceiling would yield about $3.68 billion a year in additional Federal revenue. It would affect only 5 percent of all taxpayers, and even they could deduct all but the excess over $5,000. If this modest reform were adopted, half of the administration's proposed 1982 budget cuts could be restored in the following programs: Food stamps, aid to families with dependent children, CETA jobs, elementary and secondary education, basic education (Pell) grants for college students, legal services for the poor, small business assistance, housing and rehabilitation loans, urban development action grants, and support of the arts and humanities.

Unlimited mortage interest deduction is but one example of a whole array of tax breaks or loopholes for the affluent that require serious attention before the needy should be deprived of basic help for food, medicine, shelter, and jobs.

Second, everybody wants America to be strong, with adequate, well-equipped forces that can be deployed rapidly wherever they are needed and with a nuclear potential that is too powerful to challenge. However, I believe each addition to the defense budget should be treated with as much care as each cut from the nondefense budget. As responsible a person as outgoing Comptroller General Elmer B. Staats pointed to several billion dollars a year in Pentagon waste and mismanagement. In a 23-page letter to Secretary of Defense Caspar W. Weinberger, Staats itemized such cost-reduction opportunities as consolidating adjacent military bases, joint supply purchases, improved management of weapons systems, and multiyear contracting that would save an "absolute minimum of $4 billion a year by 1985."

Mr. Speaker, opinion polls indicate considerable support for the President's budget goals. Most of the mail which I receive in my office is written by individuals in general support of the President's goals. I should point out, however, that a good number of the letters contain a similarity in phraseology that may be more than coincidental. Be that as it is, some of these individuals indicate in their letters that if I did not support the President I would be regarded as an obstructionist. Further, I was also reminded, in no uncertain terms, that these individuals would remember me in a not too favorable light at the next election.

James Wilson makes a point that each of the great powers, executive, legislative and judicial "should be independent as well as distinct,"—"Lectures on Law", The Works of James Wilson. The division of the powers of the National Government was established for a purpose and that was to avoid a concentration of power in any one branch.

I think the citizens of this country would be ill-served if this body were to adopt the course of action recommended by some and that is simply to trust the President and approve his program without the needed scrutiny.

Edmund Burke, in his speech to the electors of Bristol, stated that: "Your representative owes you, not his industry only, but his judgment; and he betrays, instead of serving you, if he sacrifices it to your opinion."

The course of action advoctated by this administration, Mr. Speaker, deserves very careful examination because we are not simply considering a request for a reduction in Federal expenditures. We are considering a reordering of priorities, the effect of which, if adopted will be felt by many low- and moderate-income individuals.

The programs which we are considering reducing are ones which meet the needs of those most in need of assistance. We should examine these proposals very closely.

The Economist in its latest issue states that—

> Although the Reagan budget * * * attacks nearly 300 programmes, including some dear to the hearts of even Mr. Reagan's supporters, its main effect will be felt, negatively, on the poor, and positively, on the defense industry.

Social justice should not be sacrificed on the altar of an untested economic theory. And that, it seems to me, is what we are about to do if we adopt without careful examination this administration's still unclear proposals.

I am not advocating delay, Mr. Speaker, for the sake of delay. That would be obstructionism. I am advocating, however, delay for the sake of thoughtful reflection upon, and detailed analysis of, the recommendations that are before this body.

□ 1515

DOCTORS ORGANIZE TO PREVENT NUCLEAR WAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

● Mr. BINGHAM. Mr. Speaker, for the past week a group of doctors from nine countries, including both the United States and the U.S.S.R., have been meeting in the First Congress of the International Physicians for the Prevention of Nuclear War. These doctors are convinced that "the genocidal nature of nuclear weapons has rendered nuclear war obsolete as a viable means for resolving conflict," and they are determined to do everything they can to see that it never happens. As physicians they are dedicated to the prevention of illness, and they have special knowledge of the problems of medical response in nuclear war. They know that we cannot "assume that abundant medical resources and personnel will be available * * * [since] contemporary nuclear war would inevitably destroy hospitals and other medical facilities, kill and disable most medical personnel, and prevent surviving physicians from coming to the aid of the injured because of widespread radiation dangers. The hundreds of thousands of burned and otherwise wounded people would not have any medical care as we now conceive of it: No morphine for pain, no intravenous fluids, no emergency surgery, no antibiotics, no dressings, no skilled nursing, and little or no food or water. The survivors will envy the dead."

In detailed statements drawn up at last weekend's conference at Airlie House in Virginia, these doctors have set their sights on convincing world leaders of the necessity of ending the nuclear arms race because "the survival of civilized life is at stake." In a nuclear war, "the fabric of society would disintegrate and the medical care system, deprived of the facilities developed over the years, would revert to the level of earlier centuries. The surviving walking wounded, physician and layman alike, could only provide what mutual comfort the remnants of their individual humanity would permit. The Earth will be seared, the skies heavy with lethal concentrations of radioactive particles, and no response to medical needs can be expected from medicine."

Separate appeals were issued by this group of physicians to other doctors and to heads of government all over the world, and I include the texts of these at this point in my remarks:

AN APPEAL TO THE PHYSICIANS OF THE WORLD

DEAR COLLEAGUES: We address this message to you who share our commitment to the preservation of health. Our professional responsibility has brought us together to consider the consequences of the use of nuclear weapons.

We have participated in full and open discussion of the available data concerning the medical effects of nuclear war and its effects on our planet. Our conclusion was inescapable—a nuclear exchange would have intolerable consequences.

Enormous numbers would perish in the first hours and days of a nuclear war. The wounded survivors, burned and affected by nuclear radiation, would face unbearably difficult conditions, without effective medical aid, water or food. The consequences of a nuclear war would also be disastrous to succeeding generations. A major nuclear exchange would inevitably bring extensive

long-term consequences even to countries not directly involved.

No one should be indifferent to the nuclear threat. It hangs over hundreds of millions of people. As physicians who realize what is at stake, we must practice the ultimate in preventive medicine—avoidance of the greatest hazard the world will ever know. Your help is needed in this great endeavor. We urge you:

(1) to inform yourselves, your colleagues, and the general public about the medical effects of nuclear war;

(2) to discuss the medical consequences of nuclear war at meetings of members of medical societies, special symposia, and conferences;

(3) to prepare and publish in the medical press and specialized journals articles about medical consequences of the use of nuclear weapons;

(4) to speak about medical consequences of nuclear war to medical students and to your community;

(5) to use your influence and knowledge to help strengthen the movement of physicians for the prevention of nuclear war.

Respectfully yours,

PARTICIPANTS OF THE FIRST CONGRESS OF INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR.

AIRLIE, VA., *March 23, 1981.*

AN APPEAL TO THE PRESIDENT OF THE UNITED STATES OF AMERICA, RONALD REAGAN, AND TO THE CHAIRMAN OF THE PRESIDIUM OF THE U.S.S.R. SUPREME SOVIET, LEONID BREZHNEV

We, physicians from eleven nations, guided by our concern for human life and health, are well aware of the great responsibility you carry and of the enormous contribution you can make to the prevention of nuclear war.

As physicians and scientists, we have for the past several days reviewed the data on the nature and magnitude of the effects that the use of nuclear weapons would bring. We have considered independently prepared medical and scientific analyses from many sources. Our unanimous conclusions are:

(1) Nuclear war would be a catastrophe with medical consequences of enormous magnitude and duration for both involved and uninvolved nations.

(2) The holocaust would in its very beginning kill tens to hundreds of millions of people. Most of the immediate survivors, suffering from wounds and burns, affected by radiation, deprived of effective medical care or even water and food, would face the prospect of a slow and excruciating death.

(3) The consequences of nuclear war would continue to affect succeeding generations and their environment for an indefinite period of time.

Science and technology have placed the most deadly weapons of mass destruction in the hands of the two nations you lead. This huge accumulation imperils us all. The interests of the present and all future generations require that nuclear war be avoided.

The medical consequences persuade us that the use of nuclear weapons in any form or on any scale must be prevented. To achieve this, we offer you our sincere support.

As physicians, we remember that the eradication of smallpox required intense international communication, cooperation, and dedication. Nuclear war is a far greater threat to mankind. It will require even more intense collaboration among the nuclear powers to achieve an early cessation of the race to produce these instruments of mass destruction.

Respectfully yours,

PARTICIPANTS IN THE FIRST CONGRESS OF INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR.

AIRLIE, VA., *March 23, 1981.*

AN APPEAL TO THE HEADS OF ALL GOVERNMENTS AND TO THE UNITED NATIONS

Advances in technology in the 20th century have benefited humankind but have also created deadly instruments of mass destruction. The enormous accumulation of these nuclear weapons has made the world less secure. A nuclear conflict would ravage life on earth.

We speak as physicians in the interests of the people whose health we have vowed to protect. The scientific data concerning the medical consequences of the use of such instruments of mass destruction convince us that effective medical care of casualties would be impossible. We therefore urge that elimination of this threat be given the highest priority. No objective is more vital than to preserve the conditions that make possible the continuation of civilized life on earth.

As physicians, we know that the eradication of smallpox, coordinated by the World Health Organization, required intense international communication, cooperation, and dedication. Nuclear war is a far greater threat to humanity. Continuing discussion among the nuclear powers and other countries will be needed to achieve an early cessation of the race to produce these instruments of mass destruction, to prevent their spread, and ultimately to eliminate them.

Respectfully yours,

PARTICIPANTS IN THE FIRST CONGRESS OF INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR.

AIRLIE, VA., *March 23, 1981.*●

A SHARE-THE-BURDEN BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 5 minutes.

● Mr. REUSS. Mr. Speaker, Congressman RICHMOND and I released today a study prepared by staff members of the Joint Economic Committee, which shows that the Reagan administration's proposed $51.2 billion in fiscal year 1982 budget deficit reductions can be achieved with only 22 budget actions. The staff study, entitled the "Share-the-Burden Budget," is designed to demonstrate how groups which were exempted from the burden of the Reagan administration's budget cuts can in fact be made to contribute.

In testimony before the Joint Economic Committee on Tuesday, March 24, Chairman Murray Weidenbaum of the President's Council of Economic Advisers stated, in response to a question by Congressman RICHMOND, that he fully expected Congress to alter the composition of the administration's proposed budget cuts, and that, in his judgment, such changes would not damage the achievement of the administration's economic goals.

The JEC staff study follows:

A SHARE-THE-BURDEN BUDGET: AN ALTERNATIVE TO PRESIDENT REAGAN'S $51.2 BILLION EXPENDITURE CUT PROPOSALS

This alternative is designed to provide the targeted $51.2 billion budgetary savings of the Reagan proposal, without necessarily subscribing to that particular target. The savings would be obtained by the following four principles:

Simplicity—twenty-two budget changes are proposed rather than the Administration's hundreds;

Equity—the Administration's sharp cuts in programs for the needy are avoided;

Economic efficiency—this proposal also avoids the Administration's counterproductive slashing of programs which increase productivity and economic efficiency (investment in infrastructure and job training) and instead eliminates wrongheaded incentives which reduce efficiency (such as overincentives to consume);

Civil courage—powerful interests would have to pay their share.

The Administration has chosen to cut spending and the budget deficit the hard way: by making crippling cuts in hundreds of relatively small but vital programs, from legal services to Amtrak. These cuts inflict maximum damage—on the poor, the elderly, the sick, on school-children, and on economic development projects such as mass transit, urban water and sewer, railways, and many others—for minimal savings, a few millions or at most a few hundreds of millions in each case. The result is that the Reagan budget achieves its $51.2 billion in savings at the expense of a comprehensive attack on social programs.

The purpose of this proposal is not to avoid needed cuts in waste and abuse in all government programs, but to outline a way to share the burden of reducing government across those segments of society who have not yet been called upon to contribute. The cuts are achieved without touching the Reagan Administration's proposed military build-up, or its depreciation proposal, or its general income tax reduction. In short, Congress could theoretically acquiesce in every major part of the Administration's comprehensive economic package, and still save the vitally important programs for human and economic development which have been built over the years.

THE "SHARE-THE-BURDEN" BUDGET—FISCAL 1982 SAVINGS

	(*Millions*)
Total Savings	$52,689
A. Spending Reductions	15,754
1. Cut waste from the Department of Defense budget and improve efficiency in procurement and R&D (CBO estimates $16 billion savings over five years)	3,000
2. Savings in the Medicare and Medicaid programs through enactment of the Hospital Cost Containment Act	1,400
3. Savings possible in the food stamp program through improved administration	800
4. Index annual increases in Social Security benefits to the increase in the CPI or the increase in average wages, whichever is lower	3,815
5. (a) Increase military and federal civilian retirement benefits in line with inflation annually rather than semiannually	1,696

(b) Index annual increases to the increase in the CPI or average wages, as in #4	315
6. Terminate funding for the Clinch River Breeder Reactor.	175
7. Terminate spending for new construction on the Interstate Highway system (saving of $3.7 billion in 1982) but increase funding to maintain the existing system	2,300
8. Terminate spending for Recreational and Public Lands highways	54
9. Terminate funding for three Interior water projects: Central Arizona Proj., Central Utah Proj., North Loup/O'Neill Unit	296
10. Terminate nine Corps of Engineers water projects: Tenn.-Tombigbee Waterway; Libby Addition; Lock & Dam 26; Red River Waterway; Richard Russell Dam; Yatesville Dam; Skiatook Dam; Candy Dam; and Stonewall Jackson Dam	543
11. Increase airport user fees for corporate and recreational aviation	800
12. Impose waterway user fees, to recover one-half of direct costs	560
B. Better Enforcement	5,300
1. Fully fund Economic Regulatory Administration in the DoE, to fully recover petroleum and gasoline overcharges	5,000
2. Add $100 million to IRS budget for enforcement of taxes on interest (CBO estimates that $4 in revenues will be collected for each $1 added to the IRS budget)	300
C. Reduced Tax Expenditures	12,535
1. Repeal deduction for interest paid on consumer debt	6,040
2. Repeal deduction for interest on mortgages for other than principal residence	250
3. End excess of percentage depletion over cost depletion for oil and gas	2,360
4. End excess of percentage depletion over cost depletion for nonfuel minerals and for fuels other than oil and gas	960
5. Require that intangible oil and gas drilling costs be amortized rather than expensed	2,925
D. Increased Revenues	19,100
1. Double the excise tax on alcoholic beverages (current $5.8 billion)	5,500
2. Double the excise tax on cigarettes and cigars (current $2.6 billion)	2,500
3. Replace the current 4¢ per gallon excise tax on gasoline and diesel fuel with a 14¢ per gallon effective June 1, 1981, which would be adjusted quarterly thereafter in accordance with changes in producer prices ($13.1 billion in added revenues in 1982) less $2 billion rebate to essential users.	11,100●

VETERANS' ADMINISTRATION REVIEW ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. LEATH) is recognized for 5 minutes.

● Mr. LEATH of Texas. Mr. Speaker, in his budget adjustments submitted to the Congress on March 10, President Reagan has recommended a reduction in the Veterans' Administration budget of $747.7 million in budget authority and $830.9 million in outlays to the amounts requested by former President Carter.

As a member of the Committee on Veterans' Affairs, I recognize the need to bring about some reduction in the Federal budget. However, I would point out that under President Carter the Veterans' Administration sustained substantial budget cuts in fiscal years 1979–81. Congress put back some of the employee cuts but the VA has approximately 2,000 employees and 5,200 operating beds less today than in fiscal year 1979. Although benefits and services for veterans is high on my list of priorities, I will work with the chairman of our committee to bring about some legislative cost savings in order to accomplish a substantial reduction in total Federal spending.

Having said this, it should be noted there are some savings being proposed by OMB that would adversely impact on veterans. These I will not accept.

First, I am not willing to accept the proposed cuts in the medical program that would total more than $330 million during the next fiscal year. At a time when the Veterans' Administration is unable to treat eligible veterans for their disabilities, especially on an outpatient basis, the medical program cannot be cut by $330 million without denying even more veterans the opportunity to receive care and treatment in VA hospitals and outpatient clinics. This is compounded, Mr. Speaker, when 12 million veterans of World War II, whose average age is 60 years, are beginning to apply for admission to VA facilities for care and treatment. Health problems for these individuals will occur more often and the length of stay in VA hospitals will be longer as they get older.

Mr. Speaker, even though the proposed medical reductions are a major concern to me, I am even more concerned about Mr. Reagan's proposed plan to consolidate the functions of regional offices. Currently, there are 58 VA regional offices located throughout the United States. There is at least one regional office in each State. These regional offices process benefit applications and changes in compensation, pension, burial, and housing programs. Mr. Reagan's plan would consolidate into one location all the benefit processing activities of these offices. In other words, Mr. Speaker, the adjudication and loan guaranty operation in the current regional offices would all be transferred to one Federal location. It would probably take a building almost as large as the Pentagon to take care of the files and the 12,000 personnel envisioned to operate such a facility. One can imagine the bureaucratic rigor mortis that would set in with this kind of operation. Efficiency would go downhill. Files would be in a mess, and many of them lost. Mr Speaker, you would have one of the biggest bureaucratic snafus ever known to man.

The administration says this proposed consolidation would require no regional office to be closed. Anyone knows that if the adjudication and loan guaranty processes are moved out of the regional offices, hardly anything would remain. It seems obvious, Mr. Speaker, that regional offices would become nothing more than glorified contact offices, or they would be closed.

This we cannot tolerate so today I am introducing legislation that would prohibit the Veterans' Administration from exercising any authority to consolidate, eliminate, abolish, or redistribute the functions of any regional office, hospital, outpatient clinic, or any other facility, unless Congress approves such action.

My bill is cosponsored by the chairman and ranking minority member of the full committee, Mr. MONTGOMERY and Mr. HAMMERSCHMIDT. I have asked the chairman to allow the committee to consider this bill early, Mr. Speaker. In my view, it will pass by an overwhelming vote, not only in committee, but in the House itself. No Member of this body intends that any regional office or VA hospital be closed. Although the administration tells us closings are not in its current plans, if reductions are made in fiscal year 1983, 1984, and 1985 approaching the proposed reductions for fiscal year 1982, in my view, we will be faced with possible closing of VA facilities in some States. I do not think my colleagues will ever support such action and my bill is designed to see that such closings do not occur.●

TRIBUTE TO ADM. JOHN S. McCAIN, JR.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 10 minutes.

● Mr. MONTGOMERY. Mr. Speaker, America has lost one of its most distinguished military officers with the untimely death of Adm. John S. McCain, Jr., earlier this week. For over 40 years, he served his Nation from the time he graduated from the U.S. Naval Academy in 1931 until his retirement from active service in 1972.

It was my privilege to be a close personal friend of Admiral McCain and his devoted wife, Roberta. Many was the time I had an opportunity to visit with him in Hawaii and Vietnam while he served as Commander in Chief of

the Pacific during the height of the Vietnam war.

I remember well him telling me of the tremendous responsibility, and, yes, even burden it was to command the single largest military force in the history of our country. The decisions he made daily, and even hourly, rested heavily on his mind because of his concern for the some 1 million soldiers, sailors, and airmen under his command. History has proved that Admiral McCain was the right man for the right job during a very difficult time in our Nation's history.

An additional burden Admiral McCain had to bear personally during this time was his concern and love for his namesake and son, Capt. John S. McCain III, who was being held in an enemy prisoner of war camp in North Vietnam. It was not an easy burden, but one that he shouldered in the finest tradition of American military officers.

Mr. Speaker, as my colleagues are aware, Admiral McCain was a member of the premiere naval family in our Nation's history. His father before him was a four-star admiral with a major command in the Pacific theater during World War II. Admiral McCain, his father and now his son all served in similar positions in congressional liaison for the Department of Navy.

During World War II, John S. McCain, Jr., was one of the few naval officers to serve in both the Pacific and European theater of operations. In the Pacific as a submarine commander he was responsible for sinking 20,000 tons of Japanese shipping and in the European theater, his submarine served as the beacon ship for the Casablanca landings in North Africa. His exploits in World War II earned him a Bronze Star and Silver Star.

The McCain name is certainly not unfamiliar in my State of Mississippi. Admiral McCain's father was born in Mississippi and the Naval Air Station in my hometown of Meridian is known as McCain Field in honor of the original Admiral McCain.

Admiral McCain had many friends on Capitol Hill and that friendship grew out of the respect we all had for his abilities and dedication. His natural ability for leadership on behalf of the common good will earn him a well deserved place in the annals of military heroes.

Mr. Speaker, I deeply feel the loss of Admiral McCain, but can take solace in the fact that I had the privilege to know him personally and to benefit from his wise advice and counsel on national defense matters. I extend my deepest sympathy to Roberta, John III, and other members of the family and thank them for sharing their husband, father, and brother with the American people. We shall never forget the heroic exploits and quiet diplomacy that Admiral McCain performed on behalf of the country he loved so dearly.●

A NATIONAL EFFORT TO COMBAT DRUNK DRIVING—PART II

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. BARNES) is recognized for 5 minutes.

● Mr. BARNES. Mr. Speaker, I submit for the information of Members additional materials related to the growing national campaign to combat drunk driving. During a news conference on March 9, Senator CLAIBORNE PELL, of Rhode Island, and I were joined by numerous cosponsors in discussing legislation we had introduced on the subject. Copies of the House bill—H.R. 2488—along with statements of Senator PELL and myself appeared in the CONGRESSIONAL RECORD of Tuesday, March 24, on pages 4990–4993.

Also at the news conference were several victims of drunk drivers, including the national officers of MADD—Mothers Against Drunk Drivers. I am submitting for the RECORD at this time the statements offered by MADD founder and president Candy Lightner, of California; vice president Cindi Lamb, of Maryland; Pat Owen, whose two daughters and two nieces were killed by a drunk driver last year, and Marion Puryear, who was permanently crippled by a drunk driver:

STATEMENT OF CANDY LIGHTNER, FOUNDER AND PRESIDENT OF MADD

Good afternoon. Ten months ago my 13-year-old twin daughter, Cari was struck down and killed by a repeat offender drunk driver while she was walking to church on a Sunday afternoon. It was the second time in her life that she was hit by a drunk driver. When my daughter was killed she was walking inside a bicycle lane and was thrown 125 feet to her death.

The driver left the scene of the crime without even stopping to see if he could render aid or call an ambulance. The man who killed Cari had four prior drunk driving arrests. In fact, Cari's killer was out of jail on bail for another hit-and-run drunk driving crime for only 48 hours when he struck my daughter.

Following Cari's death, I learned that death and maiming by drunk drivers is one of the most serious health threats facing the American public. Yet I found there was no public outcry to eliminate drunk drivers from our highways. And, in general, people in Government at the Federal, State and Local levels had been unable to do anything to effectively curtail the carnage that occurs every 23 minutes on our highways. In fact, alcohol related crashes claim more lives each year than persons killed by handguns.

Unfortunately, the public is virtually ignorant of the tragic consequences caused by drinking and driving, and that ignorance is part of the problem which must be corrected. In the wake of my daughter's death, I decided to form a grassroots citizens organization called MADD—Mothers Against Drunk Drivers. The goals of MADD are to fight for effective reform of the system so that unnecessary deaths and injuries caused by drunk drivers can be measurably reduced and to warn the public that what happened to my family and the other families here today can happen to them. Our organization today has 20 active chapters established in 5 states and inquiries from victims from 20 more states who want to start chapters. Some of our chapter representatives are in the audience today.

Susan Midgett, whose young son was killed by a drunk driver while playing in the front yard of their Virginia home; Marie Tursi of Pennsylvania, whose son was killed by a drunk driver who later received only four years probation as punishment; and Tom and Dot Sexton of Maryland who also lost a son to a drunk driver.

In California, as a direct result of MADD's efforts, Governor Brown appointed a solution-oriented task force, and MADD was able to get a similar task force established in Sacramento County. I am a member of both task forces. Because of MADD's efforts, Sacramento is now the toughest county in California on drunk drivers. That happened because drunk driving is nothing more than a political problem that reacts to citizen pressure. The task force in California and a similar task force in Maryland hold out real hope for identifying what actions can be taken at the state level to help eliminate or at least reduce the incidence of drunk driving from our roads.

There is also a drunk driving task force in New York and recently the Governor of West Virginia announced that he will appoint a task force. I feel strongly that the Governor of every state should recognize drunk driving for what it is: One of the most serious threats to the life and limb of each citizen in their state. Therefore, I am calling on every governor to follow the lead of California, Maryland, New York and West Virginia, and appoint a solution-oriented task force to help reduce unnecessary deaths and injuries cause by drunk drivers.

In the next few weeks, MADD will write to each governor to formally make that request. There are inadequacies in the criminal justice system in each state that need to be corrected. For example, in California, MADD found that fingerprints of arrested drunk drivers had not been processed for years and the state's justice department is now nearly half a million sets of fingerprints behind in processing, or enough processing to take 62 people one year to process them. That kind of situation is intolerable and ridiculous and helps enable drunk drivers to continue killing and maiming. On the Federal level, MADD strongly supports the efforts here today in the introduction of the Pell-Barnes drunk driving legislation, and MADD urges that congressional hearings be held in the near future.

MADD is also seeking a Presidential blue ribbon commission on the national drunk driving issue. Five months ago we started a petition drive and we are in the process of circulating more than ten thousand petitions across the Nation. Each week, thousands of signatures of victims and concerned citizens pour into our Maryland headquarters.

Drunk driving is a threat that we as a society do not have to tolerate. The attitudes of judges, prosecutors, law enforcers and legislators must be changed. And there is a solution. It is simply that citizens who are victims, survivors and all potential victims must demand reform. This approach is working in California and Maryland, and

citizen pressure will work across the country. Thank you.

STATEMENT OF CINDI LAMB, NATIONAL VICE-PRESIDENT OF MADD

Hello, I would like to thank all of you for coming here today. I would like all of you to imagine that you woke up this morning to read this headline: "70 people die of swine flu." Now that would shake you up! Imagine the 6 o'clock news reporting: "70 killed in airline crash." You would take the time to find out why that happened. Either one of these headlines for just one day would arouse tremendous concern in all of us. And yet, 70 people will die today in alcohol-related auto crashes.

One million people every year are seriously injured or maimed by drunk drivers. I know what it is like to be a statistic. I am one. So is my daughter Laura. We were struck by a drunk driver who had 35 prior highway violations, including three previous drunk driving arrests. Laura, at the age of five months, became a quadriplegic. She is paralyzed from the shoulders down for the rest of her life.

The current trend of carnage on our highways is no longer being tolerated in many states and communities. We the victims have had enough! We are all frightened, we are MADD—and we are doing something to stop this epidemic of deaths and crippling injuries. There are viable solutions. There is action we can take at the grassroots level, State and Federal levels.

I wholeheartedly applaud the efforts of Senator Pell and Congressman Barnes for taking a definitive step in the right direction to correct this problem at the Federal level. If passed by Congress, and enacted by State legislatures, the Pell-Barnes legislation will translate into saving lives and sparing needless suffering.

The task force on the drinking driver initiated by Maryland Governor Harry Hughes sets an excellent example for all other States to follow. The legislative packet of bills stemming from the task force recommendation are currently under review by the Maryland General Assembly. The bills will receive a hearing this Wednesday, March 11th by the House Judiciary Committee headed by delegate Joe Owens of Montgomery County. As some of you may know, Joe Owens' committee has been a grave yard for legislation aimed at toughening Maryland's drunk driving laws over the past decade. I believe this is due to Joe Owens' political stronghold over the members of his committee.

This evening from 6 to 7 o'clock in front of the State House in Annapolis, members of MADD will hold a candlelight vigil for the victims and survivors of drunk drivers. This Wednesday morning at 11 o'clock, again at the Annapolis State House, Maryland MADD will picket chairman Owens and his committee to support the Governor's drunk driving legislation.

We will hold a counter-news conference to allow MADD victims to voice their feelings regarding Joe Owens and this needed drunk driving legislation in Maryland. The tremendous impact that victims and concerned citizens of MADD have made on the drunk driving crisis typifies what can and should happen throughout this Nation, community by community. We can solve this national epidemic! We can save lives and reduce crippling injuries! Together! Thank you very much.

STATEMENT OF MRS. PAT OWEN

My name is Pat Owen. I am from Lincoln, California. I am here with MADD to support Congressman Barnes and Senator Pell's legislation regarding drunk driving.

Last August I lost my two daughters, Sherry, age 18, and Michelle, age 16, my brother's daughters Lisa, age 20, and Rhonda, age 13, to a hit-and-run alleged drunk driver. Four other people also died in that crash that night. My 17-year-old niece Tina was left permanently paralyzed from her armpits down.

The accused drunk driver escaped with barely a scratch, he did not even stop to render aid. According to court records, he is a repeat offender. He has been found guilty on three other occasions. That man had no business being on the road that night. He did not have a valid driver's license. He was on probation for his third drunk driving arrest. The crash that killed my children was the second drunk driving accident the accused was involved in. It was no accident! It was a crime! One that could have and should have been prevented. I blame not only the driver of that car but the system as well. A system that must be changed.

As Representatives of the people, it is time for our lawmakers to take a firm public leadership role, and use the full powers of their office to protect the rights of the innocent victims, instead of just the rights of the criminal.

I am asking that President Reagan appoint a blue ribbon commission, properly staffed and funded, to find workable solutions to the national drunk driving crisis. I join Candy Lightner and MADD in calling on the governor of each State to appoint a task force, like in California and Maryland, to focus on solutions to each State's drunk driving problem. I have initiated a MADD chapter to combat drunk driving in my community, and I urge concerned citizens in every community to follow suit. I am asking that the news media keep the public fully informed on the drunk driving issue, help make the public aware of the dangers of drinking and driving, and publicize the need for changes in attitudes on this most threatening problem.

If Members of Congress and State legislators had listened to lawmakers like Senator Pell and Congressman Barnes before, maybe my children and thousands of others would still be alive today. How many more must die before there is firm action to toughen the system, a system that has allowed the drinking driver problem to escalate to epidemic proportions? Remember, the greatest deterrent against crime is the fear of the law. More people die in alcohol-related auto crashes in two years than in 10 years of the Vietnam War. Please, now is the time to get the drunk driver off the road. Let us work together to stop this indiscriminate killer. The next victim could be you. Thank you.

STATEMENT OF MRS. MARION PURYEAR

My name is Marion Puryear of Waldorf, Maryland. It was a beautiful Sunday morning in April of 1978. My family and I were driving to church when we were hit from behind by a drunk driver. As the car tried to pass us, the sideways movement sent our car rolling over and over. It was not the drunk driver's first offense, yet he was given this opportunity which stopped my life.

This drunk on the road brought my life to a dramatic standstill, and created untold heartache to my family. There I was . . . from a busy wife, mother and schoolteacher, reduced to a lifeless paralyzed human being whose neck was broken and whose paralysis extended from the armpits down.

No one can really understand this kind of tragic impact on an individual and a family unless they experience it. My teenaged children were in a state of shock, causing nightmares and emotional traumas. My husband suddenly had to become all things to us. It was overpowering, far beyond human endurance.

For three months I was in traction with a metal band screwed into my skull and weights hanging from the back of my head . . . totally immobile . . . my privacy was gone. Someone else had to take care of my entire body and its functions. This still continues to this day. For five more months I began the agony of trying to make a paralyzed body move. This has been the hardest, most depressing experience I have ever had to endure. It is not over yet. All these many months, amounting to years, it has been a daily battle to try to move and not give up when the pain gets unbearable or the task overpowering.

The drunk driver responsible for putting me in a wheelchair is an assigned risk, not only behind the wheel of a car, but also in the area of insurance with a maximum coverage of 20,000 dollars. My teaching income ceased as my personal expenses soared. So, another nightmare loomed before us. Who's going to pay the bills? Once it begins it never stops. Every time we turn around I am an extraordinary expense. It doesn't stop when one leaves the hospital. Not only are there constant medical expenses and physical therapy which now exceed 100,000 dollars, but someone has to come in and do the household chores as well. My future, my family's future has been dimmed by a drunk on the road. I would never wish such a needless tragedy to happen to anyone. Our Christian faith is the only thing that held us together. The grace of God is keeping us to this day. We take one day at a time.

For far too long our society has neglected this senseless tragedy created by drunks on the road. I sense a new awareness of this problem. I support the efforts of other victims of drunk drivers like "Mothers Against Drunk Drivers," concerned citizens, and lawmakers who are attempting to bring this issue to the forefront of the minds of the American public.

Unfortunately, drunk driving is not just a problem confined to my community. It is a statewide problem, it is a national problem. I applaud the efforts of Governor Harry Hughes and concerned lawmakers in Maryland to strengthen the state's drunk driving laws. I heartily endorse Congressman Mike Barnes' and Senator Claiborne Pell's bills which would effectively combat the national drunk driving crisis.

This major effort at the federal level, in conjunction with cooperation at the state and local levels will add up to important needed changes to help save other citizens and their families from having to experience the nightmare I have had to fight to overcome.●

PRESIDENT REAGAN REPORTS ON CYPRUS PEACE EFFORTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 5 minutes.

● Mr. ZABLOCKI. Mr. Speaker, on March 20, in accordance with provisions on Public Law 95-384, President Reagan submitted to the House a report on progress made during the past 60 days toward reaching a negotiated settlement of the Cyprus problem. I am pleased to note that the President has assured this body of the great importance he attaches to an equitable resolution of the Cyprus matter, and, in turn, I wish to offer my full support to him in all efforts toward that end.

Mr. Speaker, due to the high level of concern among my colleagues who share the President's interest in reaching a just and lasting settlement to the Cyprus problem, I insert for the RECORD the full text of President Reagan's report:

THE WHITE HOUSE,
Washington, March 20, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: In accordance with the provisions of Public Law 95-384, I am submitting the following report on progress made during the past sixty days toward reaching a negotiated settlement of the Cyprus problem.

A just, fair and lasting resolution to the problems of Cyprus will remain a priority for my Administration.

The talks between representatives of the Greek Cypriot and Turkish Cypriot communities are continuing. Under the chairmanship of United Nations Secretary General's Special Representative on Cyprus, Ambassador Hugo Gobbi, the two sides are undertaking detailed analytic review of basic issues. The parties have been addressing the following topics in rotation on the basis of one topic each meeting:

(A) Reaching agreement on the resettlement of Varosha under United Nations auspices.

(B) Initial practical measures to promote good will.

(C) Constitutional aspects.

(D) Territorial aspects.

Meetings were held on January 16, 21, and 28 and February 4, 11, and 18. After a mutually agreed upon recess, the meetings resumed on March 11. We expect the negotiations to continue on a regular basis. Throughout this period both sides have engaged in serious discussion of the issues involved. Each side has advanced proposals and the negotiators have been seeking to identify areas of agreement and reduce differences. Throughout these discussions the parties have maintained a congenial negotiating atmosphere, seriously addressing points for negotiation.

I am convinced that through these negotiations a foundation for a stable, enduring settlement on Cyprus is being laid. Both sides are seriously discussing steps to mitigate longstanding conflicts and, as was anticipated, progress is slow. However, the opportunity for a just and lasting settlement will not remain indefinitely. Therefore, the need for patience and persistent negotiating must be complemented by innovative and flexible approaches to the outstanding problems. After six years of effort, it is time to see a fair settlement that will benefit and serve all of the Cypriot people.

In this, my first report to Congress on Cyprus, I unhesitatingly reaffirm the support of the United States for the efforts of the Secretary General and his Special Representative on Cyprus. They have been vigorously and persistently seeking a just and lasting solution of the Cyprus problem. The Secretary General and other United Nations' officials have been creative in their proposals and unflagging in their patience from the inception of the negotiations. I commend their professional conduct and offer the commitment of my Administration to assist in their endeavors to resolve the Cyprus issue.

Sincerely,

RONALD REAGAN.●

HONORARY CITIZENSHIP FOR RAOUL WALLENBERG

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LANTOS) is recognized for 60 minutes.

Mr. LANTOS. Mr. Speaker, some 264 colleagues representing all 50 States join me in a joint resolution to grant honorary citizenship to the hero of the holocaust, Raoul Wallenberg, a Swedish diplomat, who, at the end of World War II, risking his own life day in and day out, saved approximately 100,000 innocent men, women, and children from death and destruction.

I deeply appreciate the almost unprecedented support shown by my colleagues in this legislation. The illustrious list of cosponsors includes both the majority and minority leaders of the House as well as Members from every State of the Union and each territory represented in Congress.

In these days of intense legislative pressure on Congress, it is gratifying that we can give attention, in this strongly bipartisan way, to an issue which has clouded the American conscience for more than 3½ decades.

I would like to explore what Raoul Wallenberg did, who he was, where he is now, and why the majority of the Members of this body are determined to grant honorary citizenship to him.

Raoul Wallenberg is the son of Sweden's most distinguished family, a graduate architect of the University of Michigan, who volunteered during the darkest days of World War II, at the request of the Government of the United States, to go to Nazi-occupied Hungary for the sole purpose of saving innocent human lives.

With a degree of courage unprecedented in the annals of history, putting his life on the line day after day, he saved from certain death close to 100,000 innocent men, women, and children.

Armed with Swedish diplomatic papers, the 32-year-old Wallenberg coordinated the rescue effort to save the last remaining intact Jewish community in Europe at a time when 5 million Jews had already been taken to the gas chambers.

Wallenberg printed Swedish passports of his own design and with incomparable courage faced Nazi soldiers and death squads. He distributed passports to thousands of victims. He repeatedly risked his own life as he followed the death marches and went daily to the deportation trains where he literally pulled people out of the clutches of the Nazis.

He purchased and rented scores of houses in Budapest, equipped them with Swedish flags, and personally protected the refugees from the onslaught of the Nazis and the Arrow Cross.

When the Russian Army occupied Budapest, they arrested Raoul Wallenberg. They arrested him because they mistakenly assumed that he was an American spy. And for 12 long years, from 1945 until 1957, the Soviet Union claimed they had no idea where he was. Then in 1957 they changed their story 180 degrees. They admitted that they had arrested him, they admitted that they took him to Moscow, they admitted that they had imprisoned him, but claimed that he died in prison. But the evidence is to the contrary.

Throughout the 1950's and the 1960's and indeed the 1970's, a tremendous variety of people who had no knowledge of one another came out of the Soviet prison system claiming that they had seen Raoul Wallenberg as recently as last year.

For the man who saved so many by conferring citizenship upon them, our action here is a singularly appropriate, although symbolic, parallel. To confer U.S. citizenship upon him is to both protect him and to honor him through our belated gratitude.

Bestowing honorary American citizenship is a serious matter. Only once before in the history of our Congress have we given honorary citizenship. In 1961, we honored Sir Winston Churchill for his unique contribution to preserve free societies, and it seems that the Congress of the United States is on the verge of honoring Raoul Wallenberg by bestowing upon him the highest honor this Nation is capable of bestowing on someone from abroad by making him an honorary citizen of the United States.

As one who earned my own citizenship in this Nation as an immigrant from Hungary, I am well aware of the preciousness which accompanies such an action.

However, in taking Raoul Wallenberg to our Nation's breast, we bring even more honor to ourselves than to him. We recognize our responsibility to him by commemorating the great achievements in his life, his contribution to answering the call of the American conscience of that time, and our involvement in his fate.

If indeed Raoul Wallenberg is alive, this act by Congress would enable our Department of State to attempt to bring back the ultimate American hos-

tage. It was just a short while ago that we all rejoiced when our 52 hostages returned from Iran after 444 days in captivity. Raoul Wallenberg will have spent over 13,000 days in the Soviet prison system in the Gulag Archipelago, and I am sure that Secretary of State Alexander Haig and the President will do their utmost to return this ultimate American hostage to a free society.

In honoring Raoul Wallenberg we are honoring ourselves as a Congress and as a nation, recognizing that beyond the problems of the day, the budget battles and our partisan fights, there are issues that unite us far more serious than our divisive partisan battles, and those issues are our common concerns for the very principles upon which this very great Republic was established.

Time does not erase the sense of outrage of the civilized world that a diplomat and humanitarian could be held unaccountably in prison by a modern nation.

We cannot cease to persist in our efforts to protect individuals from these and other violations of human rights and international law.

We must continue to confront the Russians with the message that Wallenberg is not forgotten, and that his fate is linked to future relations between the East and West.

I am confident that the House and the Senate will join in this resolution bestowing upon the hero of the holocaust, Raoul Wallenberg, honorary citizenship of the United States.

Before doing so, I shall be pleased to yield to my distinguished colleague, the gentleman from Hawaii (Mr. AKAKA).

Mr. AKAKA. I thank my friend and colleague very much for this honor.

Mr. Speaker, I rise in unequivocal support for this resolution to bestow honorary citizenship on Raoul Wallenberg. Surely few men in recent history have given so much to their fellow men; surely few men have given so much and received so little for their sacrifices. Raoul Wallenberg has either died a lonely death at the hands of Russian prison officials, or he remains a prisoner in a land where many have been shut away and few have lived to tell about it. In either case, he is, in the words of Richard Cohen, "a saint in that frozen hell of a place where Russia hides its soul."

At the age of 32, Raoul Wallenberg left his comfortable life in Sweden at the request of President Franklin Roosevelt. He then moved into a world of horrors whose watchword was death and the destruction of the human spirit. He issued protective passports to at least 20,000 Budapest Jews. He sheltered at least 13,000 of them in "safe houses," and he pulled thousands out of cattle cars on their way to Auschwitz.

Raoul Wallenberg was a man stronger, better and more courageous than most men born on this Earth. He risked his life to save the lives of strangers—in the name of justice and a greater good. In the face of terrifying physical danger, he was graceful and strong. His purpose was noble; his will undaunted.

Be he living or dead, Raoul Wallenberg is indeed a true portrait of what is good and noble in all of us. By virtue of his valor he is many things: He is beauty, he is justice; he is bravery, he is strength; he is wisdom and he is honor. He is the unexplainable greatness buried deep in the soul of the human race.

For these reasons, Raoul Wallenberg should be honored. If he is still alive, as many reports indicate, he should be freed from his living hell. And, if, indeed, he did die in a Moscow prison in 1947, his body should be returned to his homeland with all the honor he deserves.

The Soviet Union must be held accountable for the fate of Raoul Wallenberg. As a nation, we must use our greatness to intercede on behalf of Raoul Wallenberg as he used his greatness to intercede on behalf of victims destined for the Nazi slaughterhouse. It is meet and right that we should make his courage our courage.

I call on this body to join me in my support to gain honorary American citizenship for Raoul Wallenberg. No man deserves it more.

Mr. LANTOS. I thank the gentleman for his remarks.

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. LANTOS. I would be pleased to yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Speaker, I would like to express my gratitude to my colleague, TOM LANTOS, for giving us the opportunity to honor Raoul Wallenberg.

We are bestowing honorary citizenship on Raoul Wallenberg in the hope that this action may help us discover his fate. But we are also honoring him for his bravery and his humanity in personally saving thousands of people, including TOM LANTOS and his wife Annette, from the destruction of the holocaust. We honor him for living like the Jews under Babylonian captivity, who "Helped every one his neighbor, and every one said to his brother, Be of good courage."

Raoul Wallenberg was a man of good courage, and for that we must always be grateful.

I believe we should also express our gratitude to TOM and Annette Lantos for taking the lead on this issue, and on so many others dealing with human rights around the world.

TOM has spent his life working against totalitarianism in all its forms. As a teenager in his native Hungary, he fought in the anti-Nazi underground, and he has never ceased working for human freedom everywhere.

It is symbolic that one of TOM's first acts in the House has been to organize support for a heroic man who did so much for so many. I believe TOM will continue to serve as our conscience, reminding us of the many brave men and women who have suffered in the name of freedom. I think we should all be grateful to him for taking on this important task.

Mr. LANTOS. I deeply appreciate the gentleman's comments.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. LANTOS. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, I very much appreciate the distinguished gentleman in the well yielding to me, and I want to express my special appreciation to him for calling this special order today and for the leadership which he has provided, together with his lovely and distinguished wife, Mrs. Annette Lantos, in the effort to recognize and have public and international recognition given to the role which Raoul Wallenberg played in the saving perhaps in excess of 100,000 Hungarian Jews during the Second World War.

I think that the legislation which he is proposing, to have American honorary citizenship granted to Raoul Wallenberg, is fitting and appropriate, and I think that the Congress would be honoring itself and this Nation as well as Mr. Wallenberg in acting favorably upon that legislation.

Mr. Speaker, I want to associate myself fully with the statement that the gentleman has made and that he is making during the course of this special order. Again, perhaps it is fitting and appropriate, since the gentleman in the well and I are perhaps members of the smallest unorganized caucus in this body, both being Jewish, both having been born in Hungary and having been welcomed as immigrants into this land which we are proud to be citizens of.

I thank the gentleman for yielding to me, and I express my appreciation to him.

Mr. LANTOS. I thank the gentleman for his remarks.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. LANTOS. I would be pleased to yield to my colleague, the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Speaker, I would like to join my other colleagues in complimenting the gentleman from California. For a freshman, the gentleman has come in with a wonderful idea. He has captured the idea of what America should be about, the message that we should be communicating to the world, that we are still for human

rights and religious freedom, and that is what we stand for. That is what the whole free world is about.

So I think the idea of the gentleman's honoring Raoul Wallenberg with honorary citizenship is absolutely what we should be doing. Thank goodness the gentleman has had the wisdom to do it. I compliment the gentleman.

Mr. LANTOS. I am deeply grateful to the gentlewoman for her comments.

Mr. Speaker, briefly I would like to spend a few moments discussing who Raoul Wallenberg is, what he did, where he is now, and why we are honoring him.

Raoul Wallenberg is the son of Sweden's most distinguished family, a graduate architect of the University of Michigan, who volunteered during the darkest days of World War II, at the request of the Government of the United States, to go to Nazi-occupied Hungary for the sole purpose of saving innocent human lives.

With a degree of courage unprecedented in the annals of history, putting his life on the line day after day, he saved from certain death close to 100,000 innocent men, women, and children.

When the Russian army occupied Budapest, they arrested Raoul Wallenberg. They arrested him because they mistakenly assumed that he was an American spy. And for 12 long years, from 1945 until 1957, the Soviet Union claimed they had no idea where he was. Then in 1957 they changed their story 180 degrees. They admitted that they had arrested him, they admitted that they took him to Moscow, they admitted that they had imprisoned him, but claimed that he died in prison. But the evidence is to the contrary.

Throughout the 1950's and the 1960's and indeed the 1970's, a tremendous variety of people who had no knowledge of one another came out of the Soviet prison system claiming that they had seen Raoul Wallenberg as recently as last year.

In 1961 we honored Sir Winston Churchill for his unique contribution to preserve free societies, and it seems that the Congress of the United States is on the verge of honoring Raoul Wallenberg by bestowing upon him the highest honor this Nation is capable of bestowing on someone from abroad by making him an honorary citizen of the United States.

If indeed Raoul Wallenberg is alive, this act by Congress would enable our Department of State to attempt to bring back the ultimate American hostage. It was just a short while ago that we all rejoiced when our 52 hostages returned from Iran after 444 days in captivity. Raoul Wallenberg will have spent over 13,000 days in the Soviet prison system in the Gulag Archipelago, and I am sure that Secretary of State Alexander Haig and the President will do their utmost to return this ultimate American hostage to a free society.

In honoring Raoul Wallenberg we are honoring ourselves as a Congress and as a nation, recognizing that beyond the problems of the day, the budget battles and our partisan fights, there are issues that unite us far more serious than our divisive partisan battles, and those issues are our common concerns for the very principles upon which this very great Republic was established.

I am confident that the House and the Senate will join in this resolution bestowing upon the hero of the holocaust, Raoul Wallenberg, honorary citizenship of the United States.

● Mr. BIAGGI. Mr. Speaker, I wish to join Congressman LANTOS and the rest of my colleagues in support for honorary citizenship for Raoul Wallenberg. I have cosponsored Congressman LANTOS' resolution granting Mr. Wallenberg honorary U.S. citizenship.

American citizenship would provide the United States with the authority to formally approach the Soviet Union for information on this fine man. Wallenberg mysteriously disappeared after the 1945 invasion of Hungary. It is not known at this time if Mr. Wallenberg is dead or alive. The Soviet Government has claimed that Mr. Wallenberg died in prison in 1947. However, former inmates of Soviet prisons have claimed that they saw or heard of a Swedish prisoner by the name of Wallenberg.

I find the Soviet Government's arrest and detention of Mr. Wallenberg reprehensible. I find it even more distressing that Soviet officials refuse to provide the free world with details of Mr. Wallenberg's fate.

It should be noted that Swedish officials have done all they can to obtain information on Mr. Wallenberg notwithstanding their close proximity to the Soviet Union. We commend them for their efforts. However, the United States, as a world power, can exert greater influence on the Soviet Government.

Besides the fact that American citizenship will authorize the U.S. Government to make official inquiries into Wallenberg's fate, it will also honor him for his outstanding efforts in saving thousands of Hungarian Jews from extermination at the hands of the Nazis. I will be proud to call him a fellow American.●

● Mr. MICHEL. Mr. Speaker, I consider it an honor to join my colleagues in paying tribute to Raoul Wallenberg by bestowing honorary U.S. citizenship upon him.

I am not going to burden you by repeating the facts of the Wallenberg story, which are well known and which have been given by many of our colleagues today. I simply wish to say that what we are involved with here is something that transcends one human being.

In honoring Raoul Wallenberg we are, in a sense, honoring all victims of totalitarianism, wherever they may have fallen or where they may be today. We honor the victims of the slave labor camps, the death camps, the Gulag, Belsen, the reeducation camps of the Vietnamese Communists. In effect we say we will never forget the long agony of the captive nations. We condemn the brutality that exists wherever and whenever a political party or group gains total control, not only over government, not only over the tools of production, but of the very lives of the people. By our action today we honor, in our small way, the victims of these and other crimes against humanity, alive or dead.

Totalitarianism is the great evil of our time. It never existed in its pure form until this century. We pray that it will end before this century closes. And, if it does end, it will be because men and women with the spirit of Raoul Wallenberg are still willing to go out, look that evil in the face and say: "I am human and out of my humanity I condemn any attempt to totally enslave the human spirit."●

● Mr. FORD of Michigan. Mr. Speaker, there is no question that we owe a debt of gratitude to Raoul Wallenberg. Because of his actions and humanitarian work, Congressman TOM LANTOS and his wife are alive and well today. This, in itself, is a tribute to the greatness of the man we are honoring today by introducing a resolution making him an honorary citizen.

If the Soviets are holding this brave and brilliant man, let us put them on notice that we want to know his whereabouts and we want him freed. If this hero is dead, then we must be informed of this fact.

I am proud to be a cosponsor of this important resolution and look forward to its early passage.●

● Mr. HERTEL. Mr. Speaker, if it is true that the deepest depths of hell are reserved for those who in times of great moral crises do nothing, then the highest pinnacles in paradise are reserved for men like Raoul Wallenberg. His bravery in the face of the unspeakable atrocities of the Nazi Holocaust are without peer. Superlatives have not been phrased which capture the selfless humanity of this man.

In recognition of Raoul Wallenberg's unparalleled example of courage and compassion for others without regard for self, it is fitting that the U.S. Congress bestow our highest honor upon an individual, that of Honorary American Citizen, and further demand that the Soviet Union give a full and immediate accounting of the whereabouts or fate of Raoul Wallenberg.●

● Mr. GREEN. Mr. Speaker, I am pleased to have this opportunity to say a few words about one of the outstanding men of our century, Raoul Wallenberg. It is my hope that this statement and the statements of thousands of others throughout the world will not only elevate Mr. Wallenberg to the heroic status he clearly deserves, but will also lead to the truth of his condition.

The history of the world has shown that in critical times a few compassionate, giving, and courageous people can have a tremendous impact. All of these qualities describe Raoul Wallenberg. His story is well known. This Swiss diplomat could have abstained from activity in World War II at no cost to himself. Instead, at great risk to his own life, Raoul Wallenberg became deeply involved. In the end, through his intelligence, shrewdness, and most important his compassion, he saved the lives of 100,000 Hungarian Jews.

The tactics he used to save the 100,000 people is a testimony to his cunning. As a Swiss diplomat he issued self-styled protective passes to tens of thousands of Hungarians. He also purchased and rented all the houses he could find. Mr. Wallenberg then placed Hungarian Jews in these houses and claimed these homes as Swedish territory. Daily he was forced to defend these homes from the Nazis. His overwhelming presence and courage gave him great success in these confrontations.

After the war the Soviets took Mr. Wallenberg as a prisoner, claiming he was an American spy. Initially, the Soviets denied any knowledge of his case. Numerous reports from individuals who had seen him in Soviet prisons forced the Soviets to alter their reports. The most recent claims from the Soviet Union indicate that Mr. Wallenberg died of a heart attack in a Soviet prison in 1947.

However, since 1947 the reports from people who have seen and spoken with Mr. Wallenberg have continued. These reports have been received as recently as January 1981, and the sheer number of them suggests that Mr. Wallenberg did not die in 1947 and may well be alive today.

It is our responsibility to pursue this matter to the fullest degree possible. I am happy to cosponsor Congressman LANTOS' resolution proclaiming Mr. Wallenberg to be an honorary citizen and hope that this will give the United States additional negotiating power with the Soviets.

It is difficult to express in words what a credit Mr. Wallenberg is to humanity. That he saved the lives of 100,000 people is remarkable. That he could still be alive, wasting away in a Soviet prison is unthinkable. I salute this man and his work, and pray that if he is alive, the freedom he fought so courageously for on behalf of tens of thousands of people will soon be granted to him.●

● Mr. ROSENTHAL. Mr. Speaker, I rise today to pay tribute to an unrelenting humanitarian, Raoul Wallenberg. Wallenberg risked his own life time and time again in order to rescue Hungarian Jews from Nazi slaughter in the closing months of World War II. It is this selfless, heroic spirit which we honor today.

Mr. Wallenberg, a native of Sweden, arrived in Budapest in 1944 at the request of the American War Refugee Board. His diplomatic status enabled him to rescue tens of thousands of Jews bound for Nazi extermination camps by issuing Swedish protective passports. When Soviet forces entered Budapest in January of 1945, Wallenberg disappeared. Since his disappearance the Soviet Union has made only one official statement regarding Wallenberg's whereabouts. A February 1957 memorandum admitted to Wallenberg's imprisonment during the 1940's, the claimed that he suffered a fatal heart attack on July 17, 1947. Soviet authorities persist in their assertion that Wallenberg died in Lubyanka jail in 1947. Yet sufficient evidence exists to indicate that Wallenberg lived beyond that 1947 date, and could very well be alive today. Numerous groups worldwide have called upon the Soviet Union to reopen the case of Raoul Wallenberg and bring to light the details of his whereabouts.

At the Madrid Conference on Security and Cooperation in Europe held last fall the United States, along with Great Britain, Sweden, and Switzerland, urged reconsideration of the case of Raoul Wallenberg. As the conference convened to review the Helsinki human rights accords, Mr. Wallenberg's situation was cited as a prime example of Helsinki's provision for reunification of families.

Raoul Wallenberg's heroism and humanitarian service on behalf of the U.S. Government more than justifies the honorary citizenship which we seek to bestow as an official recognition of our eternal debt to him. Yet equally important is our public display of concern and continued vigilance in clarifying Mr. Wallenberg's fate. Our inquires on his behalf could then bring more pressure to bear on the Soviet Union, as we seek their compliance with the Helsinki accords.

Our efforts must be consistent and unending to make more people aware of this unjust and highly suspicious disappearance of a deserving, yet undecorated hero.●

● Mr. PHILLIP BURTON. Mr. Speaker, today I join over 220 of my colleagues in support of a resolution bestowing honorary citizenship on one of the heroes of the 20th century, Raoul Wallenberg.

I am certain the inspiring and tragic story of this man's life is well-known to us all, so I will not recount it here but only say that my wife Sala and I applaud our good friend TOM LANTOS for introducing this resolution.

We must use any measure available to us to pressure Soviet authorities to let the world know the true fate of Raoul Wallenberg—and to release him if he is still alive in a Soviet prison. This resolution is one more way of letting the Soviet Government know that millions of people throughout the world want to know the truth about this great man.●

● Mr. BONKER. Mr. Speaker, during the 96th Congress the Foreign Affairs Subcommittee on Human Rights and International Organizations, which I chair, held a series of hearings on the phenomenon of disappearances as a violation of human rights. At one of the hearings I raised the question of Raoul Wallenberg. I asked where is Raoul Wallenberg? What has happened to him? Why is it a crime to have saved tens of thousands of lives? His disappearance in January 1945 after the Russians had captured Budapest is one of the oldest cases of the phenomenon of disappearances.

In response to a request from the American War Refugee Board and the World Jewish Congress, Swedish diplomat Raoul Wallenberg went to Budapest in 1944 after the Nazis began deporting Hungary's 700,000 Jews to extermination camps. Working personally for 7 months, Wallenberg is credited with saving about 100,000 Hungarian Jews from extermination.

When the Russians captured Budapest in January of 1945, Raoul Wallenberg disappeared. The Soviets insist that he died in 1947, but over the ensuing three decades there have been eyewitness reports that Wallenberg is alive in a Soviet prison.

Subsequently we passed House Concurrent Resolution 434, to honor Raoul Wallenberg, and to express the sense of Congress that the U.S. delegation to the Madrid Conference on Security and Cooperation in Europe urge consideration of the case of Raoul Wallenberg at that meeting, and to request that the Department of State take all possible action to obtain information concerning his present status and secure his release.

House Concurrent Resolution 434 passed the House on October 2, 1980, and the Senate on November 19, 1980.

I am pleased to join my colleague TOM LANTOS in cosponsoring the resolution to bestow honorary citizenship on Raoul Wallenberg and commend him for his continuing efforts to find the whereabouts of this genuine hero of this generation.●

● Mr. LEHMAN. Mr. Speaker, I am pleased to participate in this special order to discuss the Raoul Wallenberg

issue. And I would like to commend my distinguished colleague, TOM LANTOS of California, for his tremendous efforts on behalf of justice for Raoul Wallenberg.

I have joined with Congressman LANTOS in introducing legislation today to make Raoul Wallenberg an honorary American citizen, and I strongly urge my colleagues to support the passage of this legislation. Passage of this legislation will increase the international pressure needed to have the Soviets reopen the Wallenberg case. As an American citizen, Raoul Wallenberg will be high on the U.S. agenda in our Government's deliberations with the Soviets, and a resolution to this mystery will be rigorously pursued.

As many already know, Raoul Wallenberg was a diplomat of the Government of Sweden, assigned to the Swedish Legation in Budapest, Hungary, at the request of the American Government. His work was secretly funded by the War Refugee Board. He was responsible for saving the lives of hundreds of thousands of Hungarian Jews between July 1944 and January 1945. On January 17, 1945, he was arrested by Soviet authorities and imprisoned. He has not been heard from since. Despite the announcement by Soviet authorities that Wallenberg had died in 1947, numerous reports from former prisoners have provided evidence that he was seen alive as recently at 1975.

Wallenberg's actions in Europe have proven to be a unique contribution of humanitarianism during the dark days of the holocaust. Jews and non-Jews have a responsibility to continue the search for Wallenberg who, as a Protestant, bought and rented scores of houses in Budapest, equipped them with Swedish flags, personally dragged Jews from their captors at the railroad station and in the streets, and physically defended them day after day when the Nazis tried to break into the homes that had become their lifeline.

Our efforts to determine the fate of Raoul Wallenberg and to possibly offer him some solace if he is alive will be a modest gesture to honor this man and the humanitarian ideal for which he was willing to risk his life.●

● Mr. BROWN of California. Mr. Speaker, until a short time ago, my knowledge of the role played by Raoul Wallenberg on the stage of World War II was sketchy if nonexistent. It occured during a time when man's inhumanity to man was in its ascendency. It was unreasonable to expect a person to even begin to believe that an ultimate solution had been found for the Jewish problem. It was, however, real enough for the United States to endorse the actions of a single man representing a neutral country, giving their sanction to this effort to save a few lives. The gesture was futile, but it did save several thousands of lives that would have otherwise been snuffed out. Many of these lives have found useful, productive pathways of service—a debt owed to Raoul Wallenberg, and I commend my colleague from California, Mr. TOM LANTOS, for introducing this bill.

Those thousands of lives saved by Raoul Wallenberg stand today as a symbol of one man's attempt to stand tall for humanity. It is time we, and all American citizens, pay homage and give credibility to our doctrine of human rights. This bill requesting American citizenship for Raoul Wallenberg will remind the world that the United States does remember its friends, and that we are as loyal to human rights as we are enemies of international terrorism.●

● Mr. FIELDS. Mr. Speaker, I would like to thank the gentleman from California (Mr. LANTOS) for this opportunity to add my name as a cosponsor of his legislation to confer honorary American citizenship to Raoul Wallenberg.

While I must admit that prior to this Congress, I knew very little about Raoul Wallenberg, it has become increasingly obvious to me that Raoul Wallenberg is indeed the lost hero of the Jewish holocaust.

For in the darkest hours at the end of World War II, this young Swedish diplomat came forth, at great personal risk, and sacrificed his freedom so that fellow human beings, by the hundreds of thousands, could be saved from Nazi extermination.

Raoul Wallenberg is indeed a great humanitarian and it is my fervent hope that just as Raoul Wallenberg saved thousands of lives by conferring Swedish passports and quasi-Swedish citizenship on people, we can now use the same device to perhaps save him.

While cynics may now ask why expend this effort on an individual, who the Russians claim died more than 30 years ago, I believe very strongly that this Nation, which commissioned Raoul, has an inherent responsibility to do whatever it can, even at this late hour, to determine what really happened to Raoul Wallenberg.

In good conscience, can we really do any less. For had Raoul Wallenberg decided to only safeguard his own freedom then hundreds of thousands of Hungarian Jews would not have survived the Nazi holocaust.

Rarely do we have such an opportunity to pass legislation for such a great human being who has made the ultimate sacrifices so that others may live.

I urge my colleagues to join us in this noble effort and to urge expedited consideration of this most important piece of legislation.

Let us all hope that one day in the not too distant future we will have an opportunity to personally meet this rare and courageous individual—Raoul Wallenberg.

Thank you, Mr. Speaker.●

● Mr. WEAVER. Mr. Speaker, Raoul Wallenberg is a man of great courage. His acts of humanitarianism are an example for us all. I deeply believe Mr. Wallenberg deserves the world's commendation. I want the United States to express its appreciation to Mr. Wallenberg by formally awarding honorary citizenship to him.●

● Mr. YATRON. Mr. Speaker, I join with my colleagues today in recognizing the tragic plight of Raoul Wallenberg. Mr. Wallenberg is the heroic Swedish diplomat who was instrumental in helping hundreds of thousands of Hungarian Jews to escape the Nazi death camps during the Second World War and whose whereabouts have been in question ever since.

Without consideration for his own safety, Raoul Wallenberg, an agent of the Government of Sweden acting at the request of the American War Refugee Board, risked his own life to bring hope and the promise of salvation to people who believed that they were doomed to the same fate as the 400,000 Hungarian Jews who had already been sent to their deaths. His actions stand as an outstanding example to all of us who would remain indifferent to the suffering and pain of others.

Raoul Wallenberg disappeared in 1945 when the Soviets marched into Budapest. According to various witnesses, he was attempting to buy food and medical supplies from the Russians for the Jewish ghetto when he was seized and taken away.

Various reports have emerged from Russia that indicate Raoul Wallenberg may still be alive and a prisoner in the Soviet Union. In spite of this evidence, the Soviet Government continues to contend that he died in a Moscow prison in 1947.

In January, an international Wallenberg hearing was held in Stockholm resulting in a request that the Soviet Union reopen the Wallenberg case. It is important that the United States emphasize its interest in resolving this matter. The world deserves an answer to what happened to this great man. It is a terrible tragedy that the man who did so much to save the lives of so many has had to sacrifice and suffer for helping his fellow men.●

● Mr. RITTER. Mr. Speaker, today I join with many of my fellow colleagues in urging Congress to bestow honorary citizenship upon Raoul Wallenberg. Mr. Wallenberg displayed extraordinary heroism in assisting tens of thousands of Jews to freedom from Nazi-occupied Hungary late in World War II. I feel it is only fitting and proper to honor this man who sacrificed so much for so many.

In 1944, Wallenberg, a Swedish diplomat, was sent to Budapest as a result of requests from the American War

Refugee Board and a representative of the World Jewish Council. His mission was to assist Jews to escape from the wholesale slaughter being conducted by Adolph Hitler. His mission and the activities he carried out, were both daring and successful. The Swedish Raoul Wallenberg Association has attributed Wallenberg's work to directly saving 20,000 Hungarian Jews. In addition, he assisted, with the collaboration of others, in aiding approximately 100,000 Jews to escape. Unfortunately, Mr. Wallenberg would never see the success of his work; he would never see the children he helped escape grow to adulthood; and he would never receive the thanks of a grateful world. Unfortunately, the yoke of oppression that Mr. Wallenberg helped to lift from the Hungarian people was only fated to be replaced by another form of oppression.

Mr Wallenberg's biography reads like a Greek tragedy. It is a mixture of triumph and tragedy. When Soviet forces eventually ended the Nazi occupation of Hungary in January 1944, one of the first actions they took was to arrest Wallenberg for suspicion of spying. The charges were unfounded and the act unpardonable. Instead of being hailed as a hero, Wallenberg was carted off as a common criminal.

Today a mystery surrounds the fate of Raoul Wallenberg since his incarceration by the Soviets 36 years ago. After repeated inquires as to his fate, the Soviets issued a statement claiming Mr. Wallenberg died of a heart attack in 1974. However, former prisoners in the Soviet Gulag system have claimed to have seen a man resembling Mr. Wallenberg during their confinement. In 1975, a Russian Jew, Jan Kaplan, met a Swede in the Butyrka Prison, who had been imprisoned for 30 years but still seemed healthy. If this man is Raoul Wallenberg, then the Soviets are once again heinously guilty of repression and the denial of human rights.

Why will the Soviets not reveal the real truth about Raoul Wallenberg? How much longer must we accept the lies and falsehoods offered to us by them? Hopefully, the actions we are taking today as Representatives of the people of the United States will help clear up the mystery of Raoul Wallenberg. If he is alive after all these years of unnecessary penal servitude, then grant him his freedom so that he can live out the remainder of his years with dignity. If he is dead, then, perhaps the knowledge of his fate will permit his soul to rest in peace.

Regardless of his fate, I am both proud and honored to join with my colleagues in asking the Congress of the United States to bestow honorary citizenship upon Raoul Wallenberg.●

● Mr. STOKES. Mr. Speaker, I would like to thank my distinguished colleague, the gentleman from California, Mr. LANTOS, for taking this special order so we can discuss the plight of an exceptional man who literally saved the lives of more than 100,000 Hungarian Jews from Nazi terrorism and death during World War II—Raoul Wallenburg. Today, Mr. LANTOS introduced a joint resolution which bestow honorary citizenship to this outstanding and courageous human being.

As a cosponsor of the joint resolution, I would like to remind my colleagues that if American is really committed to the principle of human rights and human life, we must not deter in passing this resolution. Mr. Speaker, from my vantage point the situation comes down to a man, Raoul Wallenberg who gave his freedom and possibly his life for the lives of 100,000 Hungarian Jews. Now, his human rights have been violated.

Mr. Speaker, America and nations around the world owe Raoul Wallenberg a debt of gratitude that may well be impossible to repay. At the request of the U.S. Secretary of State, this unselfish and courageous human being left his comfortable and safe domain as a Swedish diplomat to travel to Budapest in 1944 to aid the Hungarian Jews. The U.S. War Refuge Board financed and directed his activities.

But, Mr. Speaker, Wallenberg's only weapons were the Swedish protective passes he used to save the lives of 100,000 Hungarian Jews including our colleague, Mr. LANTOS. On a regular basis, he literally pulled Hungarian Jews from the cattle trains bound for the Nazi concentration camp fo Auschwitz and almost certain death. He gave them Swedish passes and aided them in gaining security until after the war.

Because of his activities, the Soviet Union considered him to be a U.S. spy. Ignoring his diplomatic immunity, the Soviet Union in 1947 arrested him.

Since his arrest, Jews around the world, the Swedish Government and U.S. officials have repeatedly asked the Soviet Union about Raoul Wallenberg. The response from the Soviet Union for those years has been in the form of misleading information and a general refusal to account in a credible manner for Wallenberg's fate.

Most recently, we have evidence from some prisoners who believe that as late as 1956 that Wallenberg was alive and in a Soviet prison. As a nation who prides itself on being the world leader in the area of human rights, we have been shamefully delinquent in aggressively pursuing the whereabouts of Raoul Wallenberg. We must rededicate ourselves today to find out if Raoul Wallenberg is still alive and what happened to him these 36 years.

Accordingly, Mr. Speaker, I envison the joint resolution introduced today by Mr. LANTOS to serve two purposes. First of all, we must repay Mr. Wallenberg, in some way, for the service he rendered to this country by, at the very least, making him an honorary American citizen. Second, we can use this as a platform from which to intensify efforts to find out from the Soviet Union actually if Mr. Wallenberg is alive and is so to have him released.

Mr. Speaker, I am sure my colleagues will agree that this is not a partisan issue. It is an issue of human life and integrity. Accordingly, I urge my colleagues on both sides of the aisle to join Mr. LANTOS and the cosponsors in bringing this injustice of over 36 years to an end.●

● Mr. OBERSTAR. Mr. Speaker Raoul Wallenberg is the symbol of heroic compassion rising to counter inhuman cruelty.

The world owes Wallenberg an inexpressive debt of gratitude. The United States bears special responsibility because Wallenberg acted on behalf of the United States saving the lives of thousands of Jews during World War II.

If he is still living, Wallenberg would be only 69 years old. He will have spent more than half of his life in a Soviet prison. There is overwhelming evidence that Wallenberg survived long after the Soviets claimed he had died.

Our colleague, the gentleman from California (Mr. LANTOS), feels a special debt of gratitude to Raoul Wallenberg. I am pleased to have joined with him in cosponsoring a resolution to make Wallenberg an honorary American citizen, following the precedent established when Congress designated Sir Winston Churchill an honorary citizen.

Extending citizenship to Wallenberg will give the U.S. State Department an incontrovertible right to seek from the Soviet Union all available information on the fate of Wallenberg following his capture at the end of World War II.

If he still lives, he must be released. If not, the true story of his last years must be made public.●

● Mr. ADDABBO. Mr. Speaker, I am honored in taking this opportunity in joining my respected friend from California (Mr. LANTOS), and the rest of my distinguished colleagues, in supporting the House resolution bestowing honorary citzenship on Raoul Wallenberg, certainly one of the greatest humanitarians of our time, and a man who will forever remain an inspiration to us all.

When one reads about the heroic feats Raoul Wallenberg performed during the Nazi occupation of Budapest, Hungary, an initial reaction may be to think that Raoul Wallenberg is a character found in a World War II novel. It seems impossible that one man could literally singlehandedly be responsible for saving up to 100,000

men and women, young and old, from an almost certain death at the hands of the Nazis. But is it true. In 1944, at the request of the U.S. War Refugee Board and the World Jewish Congress, he went to Budapest, Hungary with the goal of saving as many Jewish citizens as possible, claiming they were Swedish. In the face of Nazi intent to exterminate the Jewish race, he risked his life day after day and night after night for almost 1 year to save innocent men and women. No writer could have even made up the courage, dedication, and sacrifice Raoul Wallenberg displayed at that time. No writer could have ever dreamed up a character who did so much for so many.

There is the distinct possibility, that somewhere in the Soviet Union Raoul Wallenberg is alive in a Soviet prison. If he is indeed alive, as reports have suggested, then we as a nation, must do all within our power to exert pressure on the Soviet Government to release this innocent man. I pray that he is alive and that he be granted the freedom he so justly deserved.●

GENERAL LEAVE

Mr. LANTOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

□ 1530

A REAL CUT OR A PHONY CUT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Colorado (Mrs. SCHROEDER) is recognized for 10 minutes.

Mrs. SCHROEDER. Mr. Speaker, President Reagan has pledged to reduce the size and cost of the Government. He claims that his budget proposal would reduce Federal employment by 43,000 people over the next 18 months. While this is far less than the 200,000 Governor Reagan claimed he could eliminate during the course of the campaign, even this number is subject to doubt because it is in comparison to the Carter budget and not in comparison to current strength levels.

Whatever the size of the reduction, the American people want to know whether it is a real cut or only a phony cut made by substituting contract employees for full-time Federal employees. In announcing his hiring freeze on January 20, the President said that he would not use contract employees to substitute for Federal employees.

Well, the Office of Management and Budget seems not to have gotten the message. They have sent a draft, unsigned letter over to the Pentagon to see how it will fly. The letter says that 31,200 positions could be eliminated and substituted for by contract employees. It specified that the contracting out should be done in the areas of commissaries, hospital maintenance, depot maintenance operations, and audiovisual activities.

The draft letter goes on to dismiss concerns about contracting out to avoid personnel ceilings. Congressional enactments and OMB's own regulations do not seem to bother the drafter of this letter. Let me quote:

As long as the structured process and procedures prescribed in the Circular are followed, you are not circumventing either the hiring freeze ceilings imposed through the budgetary process.

In other words, fill out the right color forms, and do not worry about the law of the land.

This draft letter tells DOD to violate law, Executive order, and Presidential policy forbidding contracting out to avoid personnel ceilings. It is irresponsible and should be promptly revoked. The American people will not be fooled by phony cuts in the number of civil servants made by substituting contract employees for those on the Government's direct payroll.

Further, the policy expressed in the letter is one which leads to waste and lower productivity. Contracting out to avoid ceilings means paying more and getting less. A military which is run by contractors is not a military which can protect our Nation.

I insert the draft letter in the RECORD at this point:

OFFICE OF MANAGEMENT AND BUDGET
Washington, D.C.

HON. CASPAR W. WEINBERGER,
Secretary of Defense,
Washington, D.C.

DEAR MR. WEINBERGER: Two of the major goals within this Administration center on reducing the size of the Federal workforce and maximizing the efficient expenditure of funds. OMB Circular A-76, "Policies for Acquiring Commercial or Industrial Products and Services Needed by the Government," provides you with one of the necessary tools to achieve these goals. This Administration strongly supports the general policy of reliance on competitive private enterprise to supply the products and services needed by the Government. Through proper and effective implementation of the Circular you will be able to achieve economies and efficiences in operating commercial-industrial type activities by:

Determining the least cost method of providing essential services (contract or in-house).

Streamlining existing Government organizations ensuring they are organized and staffed for the most efficient performance.

Reducing long-range fiscal obligations through reductions in the Federal workforce when cost comparisons show a contract operation is more cost effective.

Enhancing productivity through the development of measurable job standards.

I am sure you are aware that the Department of Defense (DOD) has consistently been the leader in implementing OMB Circular A-76 and has accrued significant savings in the area of personnel resources as well as long-term expenditures. I look to your office for continued leadership and the requisite support needed to complete implementation of the Circular, including completion of all associated cost studies by September 1985.

On the whole, we are pleased with your fiscal year 1981-1982 plan to conduct cost comparison studies on 786 activities. We have, however, noted a trend over the past few years for the Services to withdraw earlier announced studies because of internal pressures. For example, 152 cost studies involving 3,846 personnel positions were deferred/cancelled in this same announcement. Additionally, we have also noted that certain functions such as operation of the commissaries and depot maintenance support has had very little exposure under the Circular. We believe that DOD, in fiscal year 1981—1982, by studying the three functions listed below which comprise approximately 52,000 personnel positions, could reallocate approximately 31,200 positions as a result of the cost comparisons. These functions are:

	Estimated personnel
Total operation of Commissaries	18,000
Hospital maintenance and selected total hospital operation	15,000
Depot maintenance and support operations	15,000
Audiovisual including the Defense Audiovisual Activity Production Facility located at Norton Air Force Base	4,000
Total	52,000

I strongly urge you and your staff to schedule these functions for cost comparison studies in fiscal years 1981-1982 to determine the most economical mode of operation. Accomplishment of these studies in that timeframe would move us closer to the realization of two of this Administration's goals. I look forward to your response regarding your plans to study the above listed functions.

Finally, we have received numerous inquiries regarding the relationship between OMB Circular A-76 and OMB Bulletin 81-6 concerning the statement "Contracting with firms and institutions outside the Government will not be used to alleviate or circumvent the effect of this hiring freeze." This statement complements and reinforces the provision in the Circular which precludes contracting out solely to meet personnel ceilings when contracting for goods and services. As long as the structured process and procedures prescribed in the Circular are followed, you are not circumventing either the hiring freeze or personnel ceilings imposed through the budgetary process.

In light of the trust and responsibilities placed in us by the American people, it is essential that we continue to work together in a partnership to ensure OMB Circular A-76 is implemented in an effective and timely manner. Please be assured that my staff and I will work closely with you in this endeavor.

Sincerely,

—— ——.

TULSA DEFEATS SYRACUSE

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of Oklahoma. Mr. Speaker, I appreciate this opportunity to commend my colleague from New York (Mr. WORTLEY) for his courage in entering this Chamber today. Stripped of his pride and a rick of New York dairy cheese by the outcome of last night's Tulsa-Syracuse basketball game, he bravely attempts to smile and act as if nothing truly traumatic has happened. For those here who are not as bleary eyed and strong of heart as Mr. WORTLEY and I, let the record show that Tulsa University defeated Syracuse 86 to 84 last night for the NIT championship. I applaud the outstanding performances of both teams, and I am particularly proud of Coach Nolan Richardson and his championship team. To Mr. WORTLEY, who informed me yesterday that "the Golden Hurricane will be gone with the wind," I can only reply, "Frankly, GEORGE, I told you so."●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. COTTER (at the request of Mr. WRIGHT), for March 25 and 26, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GREGG) to revise and extend their remarks and include extraneous material:

Mr. GREEN, for 15 minutes, today.

Mr. CONABLE, for 15 minutes, today.

(The following Members (at the request of Mr. DASCHLE) to revise and extend their remarks and include extraneous material:)

Mr. WILLIAM J. COYNE, for 30 minutes, today.

Mr. BINGHAM, for 10 minutes, today.

Mr. CONYERS.
Mr. SEIBERLING in 10 instances.
Mr. WEISS.
Mr. WON PAT.
Mr. HARKIN.
Mr. UDALL.
Mr. LONG of Maryland.

ADJOURNMENT

Mrs. SCHROEDER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 34 minutes p.m.), under its previous order, the House adjourned until Monday, March 30, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

919. A letter from the Acting General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, for research, development, test, and evaluation, and for operation and maintenance for the Armed Forces, to prescribe the authorized personnel strength for each duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

920. A letter from the Acting General Counsel, Department of Energy, transmitting a draft of proposed legislation to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982 and fiscal year 1983, and for other purposes; to the Committee on Armed Services.

921. A letter from the Acting General Counsel, Department of Energy, transmitting a draft of proposed legislation to authorize appropriations for conservation, exploration, development, production, sale, and use of naval petroleum reserves and naval oil shale reserves, for fiscal year 1982 and for fiscal year 1983, and for other purposes; to the Committee on Armed Services.

922. A letter from the Secretary of Education, transmitting proposed final regulation governing financial assistance to local and State agencies to meet special educational needs, and financial assistance to local educational agencies for children with special educational needs, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

923. A letter from the Director, Office of Personnel Management, transmitting a draft of proposed legislation to amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes; to the Committee on Post Office and Civil Service.

924. A letter from the Acting Administrator of General Services, transmitting reports on building project surveys for Traverse City and Mount Pleasant, Mich.; to the Committee on Public Works and Transportation.

925. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Consolidated Farm and Rural Development Act and the Small Business Act; jointly, to the Committees on Agriculture and Small Business.

REFERRAL OF SENATE AMENDMENT UNDER TIME LIMITATION

Under clause 5 of rule X and clause 2 of rule XXIV, the following action was taken by the Speaker:

The Senate amendment to the bill (H.R. 31) to amend the Truth in Lending Act to encourage cash discounts, and for other purposes, was referred from the Speaker's table to the Committee on Energy and Commerce for a period ending not later than April 8, 1981, solely for consideration of such provisions of section 303 of the Senate amendment as fall within the jurisdiction of that committee under clause 1(h), rule X.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER (for himself, Mr. ANTHONY, Mr. BETHUNE, and Mr. HAMMERSCHMIDT):

H.R. 2876. A bill to amend the Federal Power Act and the Public Utility Regulatory Policies Act of 1978 to place electric utilities, including members of registered holding company systems, on the same basis as nonutilities with respect to encouraging their investment in cogeneration and small power production facilities, and for other purposes; to the Committee on Energy and Commerce.

By Mr. BOWEN (for himself, Mr. THOMAS, Mr. COELHO, Mr. HUCKABY, Mr. JONES of Tennessee, Mr. WHITLEY, Mr. HATCHER, Mr. NAPIER, and Mr. EMERSON):

H.R. 2877. A bill to extend and amend the Food and Agriculture Act of 1977 for the purpose of assuring adequate supplies of upland cotton and its products to meet food and fiber needs of consumers at reasonable prices; to the Committee on Agriculture.

By Mr. BOWEN (for himself, Mr. THOMAS, Mr. COELHO, Mr. HUCKABY, Mr. WHITLEY, Mr. CHAPPIE, Mr. BREAUX, Mr. ALEXANDER, Mr. FAZIO, and Mr. EMERSON):

H.R. 2878. A bill to establish improved programs for the benefit of producers and consumers of rice; to the Committee on Agriculture.

By Mr. COLLINS of Texas:

H.R. 2879. A bill to amend the Securities Exchange Act of 1934 to provide uniform margin requirements in transactions involving the acquisition of securities of certain U.S. corporations by foreign persons where such acquisition is financed by a foreign lender; to the Committee on Energy and Commerce.

By Mr. CONABLE:

H.R. 2880. A bill to amend the Federal-State Extended Unemployment Compensation Act of 1987 to eliminate the National Trigger for Extended Compensation, change the State Trigger, provide for a qualifying requirement, and for other purposes; to the Committee on Ways and Means.

By Mr. DERRICK:

H.R. 2881. A bill to establish licensed permanent repositories for transuranic waste, high-level radioactive waste, and spent fuel, and for other purposes; jointly to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

By Mr. ERLENBORN (for himself and Mr. FRENZEL):

H.R. 2882. A bill to amend the Internal Revenue Code of 1954 to allow employees a deduction for savings contributions to employer retirement plans or to individual retirement plans; to the Committee on Ways and Means.

By Mr. EVANS of Indiana:

H.R. 2883. A bill to amend the Internal Revenue Code of 1954 to clarify the tax exemption for interest on obligations of volunteer fire departments; to the Committee on Ways and Means.

By Mr. GILMAN:

H.R. 2884. A bill to provide for the distribution within the United States of the International Communication Agency film entitled "In Their Own Words"; to the Committee on Foreign Affairs.

H.R. 2885. A bill to amend the Internal Revenue Code of 1954 to increase the limitations on the deduction for retirement savings, to allow such deduction to individuals covered by employer pension plans, and to provide for inflation adjustments in the limitations on such deduction; to the Committee on Ways and Means.

By Mrs. HECKLER:

H.R. 2886. A bill to amend title 38, United States Code, to extend the period of Vietnam-era veterans' eligibility for readjustment counseling and related mental health services; to the Committee on Veterans' Affairs.

H.R. 2887. A bill to amend title 38, United States Code, to establish a program of career development, advancement, and training assistance for veterans of the Vietnam era; to the Committee on Veterans' Affairs.

By Mr. LEATH of Texas (for himself, Mr. MONTGOMERY, Mr. HAMMERSCHMIDT, Mr. MOTTL, Mr. APPLEGATE, and Mr. WHITEHURST):

H.R. 2888. A bill to amend title 38, United States Code, to provide for improved congressional oversight of significant internal reorganizations of the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. LOEFFLER (for himself, Mr. ROUSSELOT, Mr. STENHOLM, Mr. HANCE, and Mr. SKEEN):

H.R. 2889. A bill to impose quantitative restrictions on the importation of lamb meat; to the Committee on Ways and Means.

By Mr. McGRATH:

H.R. 2890. A bill to amend the Internal Revenue Code of 1954 to provide for the establishment of, and the deduction of contributions to, education savings accounts and housing savings accounts; to the Committee on Ways and Means.

By Mr. MAVROULES:

H.R. 2891. A bill to amend title 10, United States Code, to establish a mechanism for preventing excessive profits on defense procurement contracts during a period of war or national emergency; to the Committee on Armed Services.

By Mr. MOTTL:

H.R. 2892. A bill to prohibit major petroleum producers, refiners, and marketers from acquiring, owning, or controlling any business (or interest therein) which is outside of the petroleum industry; jointly, to the Committees on Energy and Commerce and the Judiciary.

By Mr. O'BRIEN:

H.R. 2893. A bill to amend title 14, United States Code, to increase the base amount for computation of disability or death benefits for temporary members of the Coast Guard Reserve and members of the Coast Guard Auxiliary who suffer injury or death while performing authorized duty; to the Committee on Merchant Marine and Fisheries.

By Mr. PATMAN:

H.R. 2894. A bill to modify the project for the mouth of the Colorado River, Tex., and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ROE:

H.R. 2895. A bill authorizing the appropriations of funds to the city of Atlanta, Ga., to supplement efforts of the Atlanta Police Department in searching for the murderer of black children from Atlanta; to the Committee on the Judiciary.

By Mr. ROSE (for himself, Mr. ANDREWS, Mr. BROYHILL, Mr. CAMPBELL, Mr. DERRICK, Mr. FOUNTAIN, Mr. HARTNETT, Mr. HEFNER, Mr. HENDON, Mr. HOLLAND, Mr. JOHNSTON, Mr. JONES of North Carolina, Mr. MARTIN of North Carolina, Mr. NAPIER, Mr. NEAL, Mr. SPENCE, and Mr. WHITLEY):

H.R. 2896. A bill granting the consent of Congress to the agreement between the States of North Carolina and South Carolina establishing their lateral seaward boundary; to the Committee on the Judiciary.

By Mr. SANTINI (for himself, Mr. UDALL, Mr. MURPHY, Mr. RAHALL, Mr. HUCKABY, Mr. KOGOVSEK, and Mrs. BYRON):

H.R. 2897. A bill to amend section 21 of the act of February 25, 1920, commonly known as the Mineral Leasing Act; to the Committee on Interior and Insular Affairs.

By Mr. SHELBY:

H.R. 2898. A bill to amend the Internal Revenue Code of 1954 to increase the amount of dividends and interest which is excluded from gross income, and to make such exclusion permanent; to the Committee on Ways and Means.

By Mr. SOLOMON:

H.R. 2899. A bill to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition; to the Committee on Ways and Means.

By Mr. WEAVER:

H.R. 2900. A bill to promote forestry employment, control unneeded expenditures in vegetation management, and provide for safe use of herbicides on public forest lands, and for other purposes; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. WEAVER (for himself, Mr. DORGAN of North Dakota, Mr. DASCHLE, and Mr. ROE):

H.R. 2901. A bill to establish an Export Grain Bank, to maximize profits on the sale of certain American commodities in foreign markets, and for other purposes; jointly, to the Committees on Agriculture and Foreign Affairs.

By Mr. LANTOS (for himself, Mr. ADDABBO, Mr. AKAKA, Mr. ALBOSTA, Mr. ALEXANDER, Mr. ANDERSON, Mr. ANTHONY, Mr. APPLEGATE, Mr. ATKINSON, Mr. AUCOIN, Mr. BAILEY of Pennsylvania, Mr. BARNARD, Mr. BARNES, Mr. BEARD, Mr. BEDELL, Mr. BEVILL, Mr. BIAGGI, Mr. BINGHAM, Mr. BLANCHARD, Mr. BOLAND, Mr. BONER of Tennessee, Mr. BONIOR of Michigan, Mr. BONKER, Mr. BOWEN, Mr. BRINKLEY, Mr. BRODHEAD, Mr. BROOKS, Mr. BROOMFIELD, Mr. BROWN of Ohio, Mr. BROWN of California, Mr. BROWN of Colorado, Mr. JOHN L. BURTON, Mr. PHILLIP

BURTON, Mrs. BYRON, Mr. CARMAN, Mr. CARNEY, Mr. CHAPPIE, Mr. CHENEY, Mrs. CHISHOLM, Mr. CLAUSEN, Mr. CLINGER, Mr. COATS, Mr. COELHO, Mr. COLEMAN, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. CORCORAN, Mr. CORRADA, Mr. COURTER, Mr. WILLIAM J. H.J. Res. 81: Mr. FRANK, Mr. EDGAR, Mr. WEISS, Mr. MOTTL, Mr. MOAKLEY, Mr. DONNELLY, Mr. ECKART, Mr. EARLY, Mrs. SNOWE, and Mrs. SCHNEIDER.

H.J. Res. 96: Mr. STUMP.

H.J. Res. 128: Mr. BREAUX, Mr. GINGRICH, Mr. PEPPER, Mr. JACOBS, and Mr. ROBERTS of Kansas.

H.J. Res. 182: Mrs. COLLINS of Illinois, Mr. DYMALLY, Mr. SMITH of Alabama, and Mr. DE LUGO.

H. Con. Res. 43: Mr. IRELAND, Mr. FISH, Mr. PORTER, Mr. MILLER of Ohio, Mr. WEBER of Ohio, Mr. PEPPER, Mr. CONTE, Mr. GINGRICH, Mr. BROWN of Colorado, Mr. SIMON, and Mr. HORTON.

H. Con. Res. 60: Mr: ADDABBO, Mr. BEDELL, Mr. BEREUTER, Mr. BROOMFIELD, Mr. CONTE, Mr. DANIEL B. CRANE, Mr. CROCKETT, Mr. DAUB, Mr. DORGAN of North Dakota, Mr. DREIER, Mr. ECKART, Mr. EVANS of Georgia, Mr. FARY, Mr. GONZALEZ, Mr. HATCHER, Mr. LAFALCE, Mr. LUKEN, Mr. MCDADE, Mr. MARRIOTT, Mr. MAVROULES, Mr. MAZZOLI, Mr. MITCHELL of Maryland, Mr. NOWAK, Mr. RICHMOND, Mr. ROEMER, Mr. SAVAGE, Mr. SKELTON, Mr. SMITH of New Jersey, Mr. SMITH of Iowa, Mrs. SNOWE, Mr. STANTON of Ohio, Mr. STENHOLM, Mr. WEBER of Ohio, Mr. WEBER of Minnesota, Mr. WILLIAMS of Ohio, and Mr. WYDEN.

H. Con. Res. 91: Mr. STRATTON, Mr. WAXMAN, Mr. COLLINS of Texas, Mr. DOUGHERTY, Mr. CORRADA, Mr. CARMAN, Mr. FARY, Mr. STANGELAND, Mr. WEBER of Minnesota, Mr. MCDONALD, Mr. FORSYTHE, Mr. JEFFORDS, Mr. ROSENTHAL, Mr. CONTE, and Mr. MOFFETT.

SENATE—*Thursday, March 26, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray.

Blessed is everyone who fears the Lord, who walks in His ways! You shall eat the fruit of the labor of your hands; you shall be happy, and it shall be well with you. Your wife will be like a fruitful vine within your house; your children will be like olive shoots around your table. Lo, thus shall the man be blessed who fears the Lord.—Psalms 128: 1–4 (R.S.V.).

Our Father in heaven, we pray for our families. Protect spouses and children from loneliness, frustration, and distrust. Guard our families against the disintegrating forces so prevalent in the Federal City. Help the Senators and all associated in the business of this body to keep priorities straight and give to their families the love and attention which Thou dost ordain.

We ask this for Thy glory. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order the majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, there are a number of items on the Executive Calendar, and I hope that before we turn to the consideration of Senate Concurrent Resolution 9, which will become the pending business at 11 a.m. this morning, we might be able to dispose of all or part of those items and any other items that may be on the Legislative Calendar as well.

Mr. President, I have no other use for my time under the standing order, and I am prepared to yield it to the distinguished minority leader or to any Senator, reserving 2 minutes for the purpose of dispatching routine and unanimous-consent business.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader, the Senator from West Virginia, is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield such time as he may require to the distinguished Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank the minority leader.

(Mr. NICKLES assumed the chair.)

WHY THE F–15 EQUIPMENT SALE TO SAUDI ARABIA SHOULD BE STOPPED

Mr. PROXMIRE. Mr. President, the proposed sale to Saudi Arabia of AIM–9L air-to-air missiles and fuel and sensor tactical packs for existing F–15's is dangerous to both the recipient and its neighbor Israel.

Let me explain how the danger evolves to both nations.

First, Israel. Obviously, increasing the offensive firepower and range of the Saudi F–15's will pose a threat to Israeli air superiority in that region. Further it will allow the Saudi force to have enhanced air-to-ground interdiction capabilities.

The equipment provides about a doubling of combat radius for the F–15—out to 1,000 miles. While it is true that this increase in range would allow the Saudis to operate these aircraft against targets in Iraq or Iran, it is also accurate that it will permit the deployment of the F–15's to any base inside Saudi Arabia without degrading their capability against all Israeli targets.

So, the threat to Israel is obvious. But how about the threat to the Saudis? To understand this point it must be recognized that while Saudi Arabia has engaged in warfare against Israel on several occasions, the commitment has been meager in terms of equipment and personnel.

In any practical sense, the Saudi's have not fielded an active fighting force of significant dimension. It is to the advantage of Israel that the Saudis have displayed this reluctance to commit to an all-out war.

This likely will change if another war breaks out in the Middle East. The Israeli's will not be able to stand by without attacking the Saudi F–15's. They simply pose too great a threat to overlook.

Thus it would seem reasonable that the Israeli's will attempt to destroy the Saudi F–15's on the ground—prior to their use in any conflict.

What would this mean? It would most likely result in an all-out commitment of Saudi military forces to any war against Israel. They could not play a less active role after being attacked.

Thus the Saudis would be drawn into a deeper war at the expense of both nations.

Now let us stand back from the military implications of this sale and consider what it means for regional stability and arms control.

Does anyone rationally believe that providing the Saudis with this equipment will lessen the tensions in this region? The reaction to this sale is predictable. Within a short period of time, Israel will reanalyze its military needs and come to the United States for enhanced arms sales.

They will ask for more F–15's or F–16's or specialized equipment for these aircraft. And it will be difficult for the U.S. Government to say no. It will be difficult to say no because we have increased the threat to Israel ourselves.

And when the Israelis build up, it will not be long before the Saudis find that there must be additions to their air forces—be it from the United States or France or some other country. And the spiral continues. The increase in lethality and intensity of any potential war will mean greater casualties.

And what comes next? Is the AWACS the next military vehicle to be sold to the Saudis? It would seem a logical choice since the advantage the Israelis hold is not only in terms of quality aircraft but in tactics. Israeli pilots know how to avoid hostile ground-based radars. They know how to use the sea to mask their flight patterns. An AWACS would be the ideal battle control system for the Saudis to use to detect, intercept, and destroy Israeli aircraft over the entire region.

And lastly, Mr. President, we should not fail to recognize that this pattern of arms sales, as it did in Iran, can actually lead to internal strife in Saudi Arabia. There will be more Americans on the ground to support these aircraft. There will be more opportunities for assassinations, kidnapings, and killings of U.S. citizens.

Clearly it is not in the interests of the United States to complete this sale. The end result will be a less stable Middle East, an increase of tensions and an inevitable widening of any potential war. For these reasons, the Senate should reject the arms sale proposal.

AGGREGATE DATA PROVISIONS OF HOME MORTGAGE DISCLOSURE ACT

Mr. PROXMIRE. Mr. President, on March 12, 1981, the distinguished Senator from Utah (Mr. GARN) inserted in the RECORD the text of a resolution adopted by the Federal Financial Institutions

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Examination Council recommending a 1-year delay in the compilation of aggregate data provisions of the Home Mortgage Disclosure Act. The distinguished Senator stated at the time that the resolution had been unanimously approved by the Examination Council.

It should be noted for the record that, contrary to the information that had been provided to the Senator from Utah, the resolution was not unanimous. I have been informed by the Federal Home Loan Bank Board that, in fact, they voted against this resolution.

Mr. President, it is also important to emphasize that the resolution ignores a number of fundamental points. I ask unanimous consent that the text of a memorandum prepared by Banking Committee staff which analyzes the recommendation for a 1-year delay be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

THE CASE AGAINST A 1-YEAR DELAY IMPLEMENTING THE COMPILATION OF AGGREGATE DATA PROVISIONS OF THE HOME MORTGAGE DISCLOSURE ACT

INTRODUCTION

Last year, the Congress enacted legislation creating a new Section 310 of the Home Mortgage Disclosure Act (HMDA) which provides in part that beginning with data for calendar year 1980, the Federal Financial Institutions Examination Council shall compile each year, for each SMSA, aggregate data by census tract for all covered depository institutions. For the purposes of this paper, this part of the provision—the production of the aggregate SMSA-wide HMDA statement—will be referred to as Part 1. In addition, the Examination Council is also required to produce tables indicating, for each SMSA, aggregate lending patterns for various categories of census tracts grouped according to income level, racial composition and age of housing stock. For the purposes of this paper, production of these tables, which relate lending data to demographic data, will be referred to as Part 2.

The Act requires the Federal Reserve to bear the cost of producing the aggregate data and tables for the Examination Council. The data and tables for calendar year 1980 are required to be made public by December 31, 1981.

The Federal Reserve, which opposed the entire provision last year, recently took the initiative to seek an amendment in the law to delay the entire provison for one year so that the first aggregate data and tables made available would be for calendar year 1981 and would be made public by December 31, 1982. There is no justification for losing an entire year in the implementation of this provision.

The compilation of aggregate data provision enacted last year is probably the single most important improvement in HMDA made last year. It will provide a broad picture of lending patterns in each SMSA. It will provide an overall context to assist in understanding and evaluating the lending patterns of individual institutions. It will provide a capacity to measure changes and progress over time. It will provide an important new tool to assist in Fair Housing enforcement and implementation of the Community Reinvestment Act. It will provide important information to local officials to assist in developing local housing and community development initiatives.

In short, the provision represents a cost effective approach to increasing effectiveness in utilizing HMDA data. The proposal to delay the implementation of this provision would needlessly set back this entire process by a full year.

1970 VERSUS 1980 CENSUS DATA

The main argument advanced for a one year delay is that some of the demographic data from the 1980 census will not be available on time to meet the December 31, 1981 deadline for the 1980 aggregate data and tables submissions, so that 1970 census data would have to be used, rendering the value of resulting information questionable for analytical purposes. This argument ignores a number of important points.

UTILITY OF PART 1 NOT AFFECTED

First, almost all of the cost to the Federal Reserve to implement Section 310 is for Part 1 of the provision, the production of the SMSA-wide HMDA statement for each SMSA. This part of the analysis is highly useful, and does not involve in any way the use of demographic data from the census, so its value is not affected at all by the argument regarding validity of the demographic data.

HMDA statements by individual banks and savings and loans list each census tract identification number and then the number and dollar amount of loans for the particular bank or savings and loan for several categories—conventional mortgage loans, government insured or guaranteed loans, home improvement loans, and multifamily loans. Part 1 of the aggregate data provision would merely produce an aggregate HMDA statement for all covered banks and savings and loans in the SMSA. Since each census tract has specific boundaries associated with it, one or several census tracts grouped together can be used to identify specific neighborhoods within the city, and the aggregate amount of lending going to each neighborhood can be identified. The SMSA-wide aggregate HMDA statement can be used to compare lending among different neighborhoods within the city. In addition, in conjunction with the individual HMDA statements, the aggregate HMDA statement can be used to compare the lending patterns of individual institutions against the aggregate total for all institutions.

These uses of the aggregate HMDA statement can prove very useful to local officials, community groups and also agency examiners. And as indicated, producing this aggregate HMDA statement in each SMSA does not involve the use of the demographic data, so its value is not affected by the arguments relating to such data.

PART 2 WILL BE COST EFFECTIVE

To the extent that the debate about utility of the 1970 Census data has any relevance at all, it is to Part 2, the production of tables analyzing lending patterns according to various categories of census tracts based on income, race and age of housing. But as indicated above, almost all of the cost of implementing the aggregate data section is for Part 1. Part 1 is really the guts of the entire provision, while Part 2 provides a useful additional analysis. Once Part 1 has been accomplished, the additional cost of complying with Part 2 is only a slight additional cost. According to information provided by Resource Consultants, the organization which conducted the study for the Bank Board and the FDIC on the costs of aggregate data compilation, the cost of performing Part 2 would add at most about 5 percent to the total cost of implementing the entire project. Given the utility of Part 2 and its minimal cost, it is hard to understand any argument against also performing Part 2 in a timely manner.

While it is true that 1980 demographic data, to the extent that it is available, is more valuable than 1970 census data, it must be emphasized that 1970 census data it still, on the whole, quite valuable. There are, of course, some dramatic examples, such as in Washington, D.C., where dramatic changes have occurred in some neighborhoods. But in most cases, demographic data from the 1970 census still provides a good benchmark of where the low and moderate income neighborhoods are, where the racially concentrated neighborhoods are, and where the older neighborhoods are.

It seems hypocritical for some of the regulatory agencies to make the argument that the 1970 demographic data is obsolete and should therefore not be used for the Part 2 tables, since all four of the regulatory agencies have recently instituted procedures, as part of their fair lending enforcement and CRA implementation programs, which instruct examiners to use this very same 1970 demographic data for the same purposes of identifying low and moderate income neighborhoods, identifying racially concentrated neighborhoods, and older neighborhoods.

Examiners are given lists of census tract identification numbers with the key demographic data from the 1970 census reported for each census tract. These lists are designed for use by examiners in evaluating HMDA statements for the individual institution being examined. What the Part 2 tables are designed to do is, in essence, to extend this procedure by using it as one tool in evaluating the SMSA-wide HMDA statement for all institutions in the aggregate.

It has been argued by some that with use of the 1970 demographic data in evaluating 1980 lending patterns, there is a risk of abuse of the data in that the data could be used to argue that discriminatory lending patterns exist when in fact they don't exist. However, even if there are some errors in the data, this will not lead to such a misinterpretation. To the contrary, to the extent that census tracts are miscategorized because of reliance on 1970 data, it would tend to disguise patterns of discrimination that may be occurring.

For example, take the case of a census tract which was lower income in 1970, had become upper income by 1980, and therefore received a large number of loans in 1980. If 1970 census data were used, the census tract would be miscategorized as a lower income census tract. In that case, the Part 2 analysis would incorrectly reflect a high volume of lending going to this supposedly "lower income" census tract, thereby disguising to some extent any overall pattern of discrimination against lower income neighborhoods that may exist in the SMSA.

Take the opposite case of a census tract which was upper income in 1970 and has now become lower income, and is now being redlined. The Part 2 tables would reflect a low volume of lending going to a supposedly "upper income" census tract. Similarly the effect of this type of error would be to lessen the differential in the table that would otherwise exist between poor and wealthy neighborhoods. Thus, to the extent that errors arise due to miscategorization based on the 1970 demographic data, the result will be to understate, not overstate, the extent of differential lending patterns.

However, there is every reason to believe that the degree of such understatement can be minimized. It is crucial to emphasize that the tables required by Part 2 do not require precise detail on the income level, percent minority, or age of housing in a particular census tract. All that is required is placing the census tract in a broad category. For example, census tract would be broken down into these categories, 1) low and moderate income (below 80% of area median); 2) middle income (between 80% and 120% of area median); and 3) upper income (above 120% of median income).

For this type of broad purpose, in the overwhelming majority of cases the 1970 census data would be adequate. For the relatively small number of cases where the 1970

data is no longer appropriate, even as a rough benchmark, this will generally be known in the community and can be taken into account when evaluating the results.

Indeed if there is a strong reason to believe that certain census tracts should no longer be placed in the category that they were placed in by the 1970 census data, and if there is no readily available basis to identify the proper category for such census tracts, the Examination Council would have the discretion to simply leave such census tracts out of the analysis for the purpose of the Part 2 tables.

The statutory provision does not explicitly require the use of every census tract in the Part 2 tables. It requires production of tables indicating aggregate lending patterns for "various categories" of census tracts grouped according to various demographic factors. While clearly these tables should be as complete as feasible, if a relatively small number of census tracts can not be categorized, certainly the Examination Council can exercise reasonable discretion in leaving such census tracts out of the analysis for Part 2, as long as such omission is noted.

The argument regarding 1970 vs. 1980 demographic data has also tended to overlook the fact that much of the demographic data from the 1980 census will, in fact, be available soon. Indeed, all of the racial data by census tract is scheduled to be available on April 1, 1981. Census tract data on income level and age of housing is expected to be released on a state by state basis beginning in September or October of 1981, although the process will not be complete until sometime next year. From this schedule it is clear that some of the relevant 1980 demographic data will be available in all SMSA's, and in some SMSA's all of the 1980 data would be available. Clearly, the Examination Council has the discretion to make use of this available 1980 data as it determines is appropriate in developing its methodology for producing the Part 2 tables for the 1980 lending data.

It has been argued that it would not be feasible to use any 1980 demographic data with the 1980 HMDA lending data because of changes in census tract boundaries from the 1970 to 1980 reports. However, according to information from the Bureau of the Census, about 80 percent of all 1970 census tracts have had no boundary changes at all, and another 12 percent have had only very minor boundary changes (and would thus not significantly affect the reliability of the analysis). Only about 8 percent of the census tracts have had significant boundary changes. If 1980 demographic data is being used, and if there is no reliable alternative method of categorizing some of these 8 percent of census tracts where significant boundary changes have been made, the Examination Council could use reasonable discretion in excluding such tracts from the Part 2 tables.

STANDARD FORMAT

Another argument which was advanced by the Federal Reserve Board for delaying the compilation of aggregate data for one year is that a mandatory, standardized HMDA disclosure format does not become effective until the 1981 calendar year disclosures.

It is hard to believe that the Federal Reserve would actually advance this argument, since it is the Federal Reserve's own fault that the standard format has not been mandated for the 1980 calendar year disclosures.

It is clear from the legislative history of the amendments to HMDA enacted last year (on October 8, 1980) that it was intended that the standard format would be in place for the 1980 calendar year disclosures.

Yet, inexplicably, when adopting its amendments to Regulation C on December 1, 1980 for the purpose of the 1980 disclosures due by March 31, 1981, the Federal Reserve failed to mandate a standard format for the 1980 disclosures.

This would have been a simple matter to do, since the overwhelming majority of institutions have for many years been filing their HMDA statements on existing Form HMDA–1, which is a model form included in the original Regulation C.

However, while Form HMDA–1 has been the suggested model form, it has not been a required form, and a relatively small number of institutions have not used this format.

It would have been a simple matter for the Federal Reserve to mandate use of this form for the 1980 disclosures.

Instead, when adopting its regulation change on December 1, 1980, the Board of Governors stated in the preamble: "While the Board is not mandating the use of a standard disclosure format for 1980 data, it is strongly recommended that institutions use a format that is consistent with existing Form HMDA–1, to facilitate the aggregation of data required by the act."

Of course, HMDA requires that specific information be made available, so that even the small number of institutions that do not use the model form must disclose the same information as is disclosed in the model form. However, the information might be disclosed in a somewhat different manner. For example, columns might be arranged in a different order.

Obviously, it is possible to aggregate the data even without the standard format, but it clearly would be less costly if there were a standard format. The study conducted by Resource Consultants for the Bank Board and the FDIC analyzed the costs of aggregating data under the old regulations versus the cost if certain changes in the regulations, including use of a standard format, were made.

One of these changes—the standardized calendar year reporting period—has already been implemented. According to information provided by Resource Consultants, implementation of a standardized format could result in a further cost savings of about 25%.

It is possible that the Federal Reserve's statement in its December 1, 1980 announcement, that "it is strongly recommended that institutions" use the model form, will result in some increased standardization that will allow at least part of the additional cost savings resulting from the standard format to be achieved for the 1980 disclosures.

In any event, it should be noted that the Examination Council has recently estimated that the cost of implementing the aggregate data provision for 1980 disclosures, even with the lack of a standard format, may be as low as $300,000. This is even a substantially lower cost than what the Congress assumed when the provision was adopted last year, even assuming use of a standard format.

It is, of course, unfortunate that the Federal Reserve will not get the full benefit of the cost savings which it could have obtained if the standard format had been implemented for 1980 disclosures. Because of this failure, the Federal Reserve may have to spend somewhat more than it otherwise would have had to spend to implement the aggregate data provision. But the Federal Reserve has only itself to blame for the failure to achieve this additional savings.

CENSUS TRACT VERSUS ZIP CODE

Another argument advanced for the one year delay is that "a significant amount of 1980 HMDA data will be reported by Zip Code rather than census tract, making such data of virtually no value for aggregation purposes." However, the general rule in Regulation C has been that data must be reported by census tract, and almost all of the data has been so reported. The one exception to this applies to a relatively small number of SMSA's which were not tracted as of 1970, generally because they were not yet defined as SMSA's in 1970. For these SMSA's, which for the most part are also small in population, Regulation C has permitted reporting by Zip Code. However, this is not an argument for delay of the entire aggregate data provision, since the statutory provision only refers to aggregation by census tract. Clearly, if the data is not available by census tract in certain SMSA's, it would not have to be aggregated. To the extent that this factor comes into play, it will reduce the amount of aggregation required, and therefore provide an additional cost savings.

THE AMERICAN BAR ASSOCIATION AND THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in February of 1976, the American Bar Association, representing the organized bar of this country, overwhelmingly voted to recommend that the United States ratify the Convention on the Prevention and Punishment of the Crime of Genocide.

This constituted an amazing change of opinion by an association which two times previously had decided not to support ratification because the treaty "involves important constitutional questions * * *" not satisfactorily resolved. In 1949, prior to the hearings conducted by the Foreign Relations Committee of the U.S. Senate on this same subject, the ABA had decided not to support ratification because of the above-mentioned reason.

The turnaround by the bar association should signal that the most important organization representing lawyers and the legal profession in this country recognizes the desirability of this country adopting the Genocide Convention which, as I pointed out many times, every President since Mr. Truman, Republican and Democratic, has supported. Only the Senate stands in its way.

Subsequently, in 1970, following former President Nixon's request to the Senate to act on the Genocide Convention (one of seven Presidents from Truman to Carter to request such action), the ABA again considered the question. But by a divided vote of 130 to 126 in its House of Delegates, it declined to change its earlier stand.

Opponents of the treaty's ratification had frequently cited the ABA's pre-1976 position on the convention as justifying U.S. inaction. The opposition feared that it might undermine our constitutional structure.

In 1976, however, after considerable and careful study was given to each clause of the convention by its legal experts, the ABA decided that the Genocide Convention would not undermine the constitutional rights of American citizens, here or abroad, and therefore came to the conclusion that constitutional objections to the treaty were not valid. Thus, the American Bar Association reversed its position and overwhelmingly endorsed the Genocide Convention.

In his testimony, advocating support of the Genocide Convention before the Foreign Relations Committee in May of 1977, Bruno V. Bitker, chairman of the

ABA's Committee on International Human Rights, asserted:

There appears no provision in the Convention that would support a successful attack on constitutional grounds. No objections asserted on a legal basis justifies delaying ratification. If there are justifiable reasons of national policy for not ratifying, they have not been advanced.

Mr. President, the American Bar Association's support of the Genocide Convention makes it crystal clear that legal and constitutional objections to the convention are not valid. Certainly nothing is more basic to the ideals of this great Nation that to ratify this convention would outlaw mass murder of a national, ethnic, racial or religious group as such whether committed in time of peace or war.

The United States is now reestablishing its moral leadership in the world. If it now ratifies the Genocide Convention, it would be a clear demonstration that it is intent upon wiping from the face of the earth, any attempt to commit this most hideous crime. It is time to sign on the dotted line.

Mr. President, I thank again the minority leader and yield the floor.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER (Mr. HATFIELD). The Senator from Tennessee is recognized.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I renew my inquiry of the distinguished minority leader if he is in a position to agree to the consideration of some of the names on today's Executive Calendar.

Mr. ROBERT C. BYRD. Mr. President, the minority is ready to proceed with the first three nominations on the Executive Calendar and may be ready to proceed with the remaining two after a brief interlude.

Mr. BAKER. Mr. President, I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, in view of that, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the first three names on today's Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

SMALL BUSINESS ADMINISTRATION

The assistant legislative clerk read the nomination of Michael Cardenas, of California, to be Administrator of the Small Business Administration.

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. WEICKER. Mr. President, as chairman of the Senate Small Business Committee, I offer my strong endorsement of Michael Cardenas, whose nomination as Administrator of the Small Business Administration we are now being asked to consider.

For too long, the SBA has carried with it a reputation for mismanagement and abuse. Unlike some others, I do not believe the best way of eliminating those problems is to eliminate the agency. I believe the SBA can and should play a very definite role as an advocate, adviser, and management assistant to the small business owners of this country.

In order to assume this role, however, the agency needs a strong hand. SBA programs are in serious need of review and evaluation, and some very firm decisions need to be made. This responsibility must be taken especially seriously in light of recent budget decisions affecting major programs within the SBA.

Clearly, if this agency is to be responsive to the critical needs of small business, knowledgeable and effective leadership is crucial.

Mr. President, I have had the opportunity to meet with Mr. Cardenas, have carefully reviewed his background, and listened closely to his testimony at our hearing.

In those conversations, and in testimony before the Small Business Committee, Mr. Cardenas expressed many of the same concerns about SBA that I have just outlined. As a certified public accountant with 19 years' experience serving the small business community, he brings to the agency a breadth of firsthand knowledge about small business problems.

In our hearing, Mr. Cardenas also expressed a desire and a willingness to work closely with this committee in an effort to jointly address the many problems facing small business. He has pledged to remain accessible to us, and to assist us wherever he can when questions concerning his agency arise. I welcome this cooperation and regard it as an encouraging sign for the small business problems.

I am convinced that we have in Mr. Cardenas one who will bring great energy and dedication to the SBA.

Based on the vote taken by the membership of the Small Business Committee on March 24, unanimously recommending to the Senate that he be confirmed, it is clear the other 16 members feel as I do that Mr. Cardenas' qualifications and sense of commitment make him an excellent candidate for the job of Administrator of the Small Business Administration.

For the record, let me briefly review those qualifications. Mr. Cardenas is a resident of Fresno, Calif., with a long history of public and professional involvement there. He has been a certified public accountant since 1962, most recently as a partner in the national firm of Fox & Co. Before joining that accounting firm, he owned his own firm, specializing in taxation, auditing, accounting, and management service. He has served on the boards of many State and local institutions, including several universities and the Fresno Community Hospital. He was also the chairman of two regional offices of the Small Business Administration in California, and was appointed a delegate to the White House Conference on Small Business.

I look forward to working with Mr. Cardenas in reshaping the Small Business Administration. I urge the Senate to act quickly and affirmatively on this nomination.●

Mr. NUNN. Mr. President, I rise in support of the nomination of Michael Cardenas to be Administrator of the Small Business Administration. Mr. Cardenas is qualified to serve in this important position of responsibility, and it is important that he begin that service at the earliest practical opportunity.

Many of the major policy and budgetary decisions which will affect Small Business Administration programs for the next several years, including the disaster aid program, have already been made without the benefit of the advice of a confirmed Administrator.

With the confirmation of Mr. Cardenas today, the Senate Small Business Committee, the Congress, and the small business community will finally have a spokesman in place who has the President's confidence, will begin to provide the leadership for the day-to-day functioning of the Small Business Administration, and will be able to assist the Congress in its work of reviewing the President's economic recovery package.

Mr. President, the committee was unanimous in its favorable reporting on this nominee. I hope the Senate will vote to confirm Mr. Cardenas for the position of Administrator of the Small Business Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF STATE

The assistant legislative clerk read the nomination of O. Rudolph Aggrey, of the District of Columbia, to be a Foreign Service officer of the class of career Minister, a consular officer, and a secretary in the diplomatic service of the United States of America.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF JUSTICE

The assistant legislative clerk read the nomination of William Francis Baxter, of California, to be an Assistant Attorney General.

Mr. THURMOND. Mr. President, I rise to state my enthusiastic support for President Reagan's nominee to head the Antitrust Division of the Department of

Justice, Prof. William F. Baxter. There can be no question that Professor Baxter is highly qualified for this position, in light of his distinguished 25-year career in the field of antitrust as both a practicing attorney and a professor of law at Sanford University. His prolific writing in the area of antitrust has established him as a respected scholar with a keen understanding of this extremely complex field of law. Moreover, during his appearance before the Judiciary Committee, which unanimously voted to support his confirmation, Professor Baxter showed himself to be a thoughtful and decisive individual, with opinions and views that are well reasoned and equally well expressed.

Mr. President, I would note that the job that faces Professor Baxter, should he be confirmed, is not an easy one. Our antitrust enforcement policy has been the subject of mounting criticism in recent years. Some critics have gone so far as to charge that certain applications of the antitrust laws have worked to the detriment, rather than the benefit of consumers, because of unreasonable and counterproductive restrictions they have placed on legitimate business activities.

Such concerns over the effectiveness of the antitrust laws are magnified by the severe economic difficulties presently facing our country. In the last election, the American people sent an unmistakable message to Washington that they want to reduce the role of Government in the operation of our free enterprise system. At the same time, however, they rightfully expect to be protected by the Government from monopolistic practices that interfere with the efficient operation of the economy. Achieving the correct balance between these two objectives will not be an easy undertaking. However, it is both my personal conviction and the consensus of the members of the Judiciary Committee, that Professor Baxter will be equal to this challenging task. I therefore strongly urge this distinguished body to confirm the President's nomination of Prof. William Baxter as Assistant Attorney General for the Antitrust Division of the Department of Justice.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, I inquire of the distinguished minority leader if he is in a position to consider some of the items on today's Calendar of General Orders, and I especially invite his attention to Order No. 40, House Concurrent Resolution 85, which appears to be cleared on our calendar.

Mr. ROBERT C. BYRD. Mr. President, the item to which the distinguished majority leader has referred, Order No. 40, has been cleared on this side.

Mr. BAKER. I thank the minority leader.

CONCURRENT RESOLUTION RELATING TO SPAIN'S COMMITMENT TO DEMOCRACY

The Senate proceeded to consider the concurrent resolution (H. Con. Res. 85) congratulating the Government and people of Spain on their commitment to democracy.

The concurrent resolution was agreed to.

The accompanying preamble was agreed to.

The concurrent resolution, together with the premable, was agreed to, as follows:

Whereas the lawless seizure of the Spanish parliament by insurrectionist elements of Spain's paramilitary forces constituted a threat to the continuation of democracy in Spain; and

Whereas King Juan Carlos' personal appeal to maintain respect for peaceful constitutional order in Spain indicates the depth of his support for stability and democracy; and

Whereas the commitment of the clear majority of Spain's armed forces to remain loyal to King Juan Carlos and the Spanish democracy was instrumental in restoring lawful control of Spain's parliament; and

Whereas large scale public demonstrations by the Spanish people indicate the broad base of popular support for constitutional democracy government in Spain: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) the restoration of the normal business of the Spanish parliament in the aftermath of its outrageous military seizure symbolizes the strength of democracy in Spain and provides inspiration to all people everywhere who love freedom; and

(2) the continued democratic political development in Spain makes an important contribution to the foreign policy interests of the United States and the free countries of Western Europe.

SEC. 2. The Congress congratulates the government and people of Spain on their commitment to democracy and looks forward to the continuation and expansion of close and cordial relations between the United States and Spain.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no further need for my time under the standing order, and I am prepared to yield it back or to yield control to the distinguished minority leader.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

Mr. BAKER. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back.

RECOGNITION OF SENATOR MATTINGLY

The PRESIDING OFFICER. Under the previous order, the Senator from Georgia (Mr. MATTINGLY) is recognized for not to exceed 15 minutes.

Mr. MATTINGLY. I thank the Chair.

THE RECONCILIATION RESOLUTION

Mr. MATTINGLY. Mr. President, before casting my vote in support of Senate Concurrent Resolution 9, I would like to take this opportunity to praise Senator DOMENICI and the Senate Budget Committee. In taking inventory of the projected 1982 budget, the Budget Committee unanimously approved the largest savings package ever presented to Congress.

Last November, voters across the Nation instructed Washington to put America's economic house in order. The Budget Committee, in calling for a massive cutback in the growth of Federal spending, demonstrated that the message from the voters was heard and that Congress intends to implement the November mandate.

No one can disagree that the American worker has been saddled with unnecessary economic burdens. Americans are tired of double-digit inflation, high interest rates, huge Federal deficits, and wasteful spending—and rightfully so. Such frustration was demonstrated in the voting booths across the Nation in the most recent election.

As the President stated in his message to the Congress on March 10, 1981—

> There is nothing but politics as usual standing in the way of lower inflation, increased productivity, and a return to prosperity.

The action by the Senate Budget Committee is a step in the right direction and away from the "politics as usual" approach.

The reconciliation resolution, however, is only a first step toward economic sanity. Congress must move quickly in its consideration of the entire economic package, a package which calls for both sweeping spending and tax cuts. The quicker we move on the President's plan, the quicker we will revitalize our ailing economy.

In supporting Senate Concurrent Resolution 9, however, I remind my colleagues that budget cuts alone will not turn the economy around. We must re-

duce personal income tax rates and provide tax incentives to businesses to encourage replacement of obsolete and inefficient plants, machinery, and equipment.

The President's proposed tax cuts of 10 percent per year for 3 years will encourage people to save and invest more. This will help interest rates come down and will make it easier for businesses to buy new equipment, expand production, and increase output—the end result thus being a slowing down of the rate of inflation and the creation of jobs.

The need for such tax cuts cannot be overemphasized. They are a vital part of the economic recovery package, a package designed to put the American economy back on its feet.

In discussing the importance of the tax cut element, I remind my colleagues of the economic results when taxes were slashed in 1964. Because of such action, more income went into savings and business expansion, and inflation was held to 1.5 percent per year in 1963 through 1965. The same thing can happen again if Congress passes the President's proposed tax cut.

In conclusion, I again remind my colleagues that the American voters' message last November was loud and clear. The mandate was for a change—a change from the way Congress had conducted business in the past and a revolt against the economic results produced by the past irresponsible actions of Congress.

President Reagan has formulated a plan for America's economic recovery. The next step is up to the Congress. In approving Senate Concurrent Resolution 9, we are taking a step in the right direction. However, we can not stop here. Let us move responsibly and expeditiously in the weeks ahead to approve the President's program for economic recovery and thus make America once again a land of economic opportunity.

Mr. President, I yield the remainder of my time to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. NICKLES. I thank the Chair.

THE ADMINISTRATION'S ECONOMIC PROGRAM

Mr. NICKLES. Mr. President, I wish to commend my colleagues, Senator DOMENICI and Senator HOLLINGS, for their hard work on the budget resolution, and for their perseverance to draft responsible cuts in the budget.

In November, Oklahomans voted to reduce the cost of Government, to limit Federal spending, and to reduce their tax burden.

As a candidate in those elections, I stood firm in that same commitment, and had I not taken that position I would not be standing here today.

Now, as a representative of the American people, whose election was brought about by a broad-based discontent with the Federal Government, I urge my colleagues to support the budget proposals before us today.

I am pledged to balancing the budget. Mr. President, I am sure you are aware that there are only two ways we can balance the budget: One is through higher taxes, and the other is through reduced Federal spending. I believe the people spoke, and they said that they wanted less Government spending in their lives.

When we talk about cutting spending, we talk about cutting taxes. Many people, particularly in the press, have said that these tax cuts are drastic.

Mr. President, I think you are aware that the spending cuts we are talking about today actually are not spending cuts. In fact, the total amount of Federal Government spending for 1981 will increase by $75.6 billion, and the spending in fiscal year 1982 will increase by $40.1 billion, and when we are talking about billions of dollars it is very hard for the common American working man and woman to figure out how much money we are talking about. The budget authority that is proposed for 1981 will equal $3.135 for every man, woman, and child in the United States.

Mr. President, I think the United States has spent enough money. I think we need to balance the budget. I hope that we can balance the budget before 1984. I have been disappointed with the President's recommendation to balance it only by 1984. I had hoped this could be achieved by 1982 or 1983.

I think the solution is not in raising taxes. It has to be in reducing Federal spending. I think $3,135 is enough money to provide the needed sources of revenue, to provide the needed services which we have today.

Many people talk also about tax cuts. Mr. President, I am sure you are aware that we are actually reducing taxes. From 1980 to 1981, the total tax burden on the American people will increase by $80 billion; from 1981 to 1982, taking into effect all of President Reagan's tax proposals, the tax burden will still increase by $50 billion.

Everyone in this Chamber is aware, as are the American people, that the Federal Government has no wealth. The Federal Government cannot give anyone a dime unless it first takes it from someone else.

Big Government is the source of inflation. Therefore, we must control the growth of Government, which now consumes 42 percent of the average working American's earnings.

I applaud the bold steps which the new administration has outlined in the economic program. I believe that decisive action is needed to combat the intolerably high level of our current inflation, to reduce the rising burden of taxation, to cut down the growth in Federal spending, and to eliminate counterproductive regulatory measures. I urge the Congress to move quickly toward legislation that will carry out the intent of these budgetary actions within the next few months.

While I applaud the administration initiatives to hold back the growth in Federal expenditures, I also believe that much more can and should be done as has been outlined in the Budget Committee resolution, particularly in the area of entitlement programs which comprise nearly half of all Federal programs. For too long, the citizenry has been told that most of the budget is "uncontrollable" because of built-in entitling provisions in the law, beyond the reach of the Congress. I believe that nothing should be beyond the reach of the people and their elected Representatives. Programs must be examined more critically with respect to the magnitude of financing required and the relation of benefits to costs. Furthermore, legislative actions now should be calculated to restrain the future growth of entitlements so that the problem of so-called uncontrollables does not become ever more difficult to deal with.

Mr. President, I urge the administration and also this Congress to make additional spending reductions, in addition to what the President and the Budget Committee have proposed. Areas that should have been reduced further include synfuels programs and certain HUD programs—in particular, the UDAG program, community development grants, and also the EPA.

I am committed to the ideal upon which this country was founded, the inherent right of the individual.

Grounded in that basic philosophy are the freedom to succeed and the freedom to fail. Our economic system was born out of the individual, not the Government. We have achieved the highest standard of living of all countries in the history of mankind precisely because we have not had big government, but rather limited government designed to protect our personal and economic freedom.

Mr. President, if Government continues to grow the way it has grown for the past 50 years, our personal freedom, our economic freedom, and our religious freedom are very much in jeopardy. I believe that individual initiative, which has built this country, will also be the cornerstone in maintaining its freedom and its health in the future.

Government in recent times has removed that initiative, and has replaced it with policies that reduce the individual to nothing more than a revenue source for the Government.

I know what my constituents are saying and I hear them. If my colleagues' mail is anything like mine, it shows support by more than 40 to 1 of the budget cuts proposed by the President. I am speaking not only of a national mandate that occurred 5 months ago in the general election, but of an ongoing campaign by the American people for a change to end the Government spending policies of the past years. I do not believe that the American people are going to be satisfied until they see that change.

I cannot stress enough the importance of this body's support for the budget proposals. I speak not on behalf of DON NICKLES, but on behalf of the American people. Let us not be overcome by the special interest groups that flood our Capitol, but let us sincerely respond to the pleas of our people, and give them what they asked for last November. Let us give them less Government, less

spending, less Government regulation, less Government involvement in our lives.

Let us have the Government protect their freedom—their personal, economic, and religious freedom—so that our children can grow up and give to their children the same gift we have all received, that privilege and that pleasure of living in the greatest and the freest country in the history of mankind

I thank the Chair.

Mr. BAKER. Mr. President, will the Senator yield to me for a brief moment?

Mr. President, I thank the Senator for yielding. I believe I am correct in saying that this is the first major speech the Senator from Oklahoma has presented to this body, and I wish to remark on his service in the Senate today not just for his edification—I hope it is—but for that of our fellow Senators and his constituents in the State of Oklahoma, as well.

I would like to say, Mr. President, I have been now almost 15 years in the Senate—the distinguished occupant of the chair (Mr. HATFIELD) and I came here together—and we have seen a few Senators come and go. I do not recall ever seeing a freshman Senator who has come to this body and shown as much promise as has the Senator from Oklahoma. He has been unafraid of the task; he has risen to the challenge that the Senate inevitably presents to every Member; he has shown keen insight and an extraordinary grasp of the fundamental issues.

I wanted to say that on the occasion of this, his first, presentation on the Senate floor.

VITIATION OF SPECIAL ORDER FOR SENATOR PRESSLER

Mr. BAKER. Mr. President, I ask unanimous consent that the special order in favor of the distinguished Senator from South Dakota, Mr. PRESSLER, be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order there will now be a period for the transaction of routine morning business for not to exceed 20 minutes, with statements therein limited to 5 minutes each.

Mr. BAKER. Mr. President, I ask unanimous consent that the time for transaction of routine morning business be extended until the hour of 11 o'clock, exactly.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

AMBASSADOR AND MRS. SIDNEY RAND

Mr. DURENBERGER. Mr. President, two distinguished Americans have recently returned to Minnesota after service abroad. Dr. Sidney Rand, our most recent Ambassador to Norway, and Lois Rand, his wife, represented the United States with distinction and grace in a country which has belatedly been recognized as a major world factor.

Those of us from Minnesota, where the Norwegian heritage is strong, have always been aware of Norway's importance. Recently, however, all Americans have come to recognize the extreme importance of continued close relations with that country. Concern over the northern flanks of NATO, sensitivity to the problems of basing new theater nuclear weapons, and a recognition of the importance of Norway's oil potential have made us recognize how vital it is that our diplomats in Oslo be of the highest caliber.

By all accounts, Sid and Lois Rand were a superb team during their tour of duty. As an American, I regret that they could not have stayed on the job longer, in part because we have changed Ambassadors to Norway with abnormal frequency. As a Minnesotan, however, I am delighted that Sid and Lois are back home.

My colleagues will notice that I have referred to Sid and Lois Rand as a team. As our recent consideration of the Foreign Service Act reminded us, a diplomat's spouse is fully as involved in the conduct of our foreign policy as any diplomat. This is something which we have often taken for granted, but seldom explicitly recognized. I, therefore, believe it worthwhile to refer to a recent interview with Lois Rand which was published in the Minneapolis Tribune, on March 1, 1981, and I ask unanimous consent that this article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RANDS RETURN AFTER YEAR AT AMBASSADOR'S POST IN NORWAY

(By Margaret Morris)

"I've lived through other changes." Lois Rand said in her first interview since her husband, Sidney, was asked by the new administration to step down as U.S. ambassador to Norway. "And I honestly, for my own sanity, pay very little attention to it. We left Oslo on Feb. 14, which was exactly one year to the day that Vice President Mondale came to St. Olaf College to swear in Sidney."

"But you see, we anticipated it would happen," explained Lois Rand, chatting in the living room of the home of Sidney Rand's son, Peter, in Minneapolis.

"The notice to return to the country seemed sudden, even though we expected it. We had 2½ weeks to pack and take care of things involved in diplomatic protocol. The time element was the big problem.

"Fortunately we took only personal things and some art when we went to Oslo last year. He had help with the packing. We had our things catalogued and labeled so we knew what to take and what was to stay."

Before their departure the Rands held a big reception at the ambassador's residence—an immense house built in 1911 for the Nobel-O'sens, related to the Nobel-prize family. It sits on 3¼ acres, not far from Frogner Park, which is known to many Minnesotans. The mansion was purchased by the U.S. government in 1923.

"It is a magnificent house, with 20-foot ceilings," said Lois Rand. "The residence itself has 24,000 square feet. I don't know how to pinpoint the number of rooms. There are several large reception rooms, which are ideal for official entertaining. They can accommodate large crowds."

The Rands had 600 for their farewell reception Feb. 9.

"All the foreign diplomats and service officers came at 5 p.m. to present a gift," she said. "It is customary for the dean of the corps, who this time was the Russian ambassador, to make the presentation. We receievd a pair of silver candlesticks and a vase of contemporary Norwegian design."

The ex-ambassador's wife said that friends and other Norwegians with whom they had dealt came after a half-hour. They were invited for 5:30 and 6:30 p.m., staggering the flow of guests.

"I was conditioned for it by the many receptions we gave at St. Olaf College (where Sidney Rand served as president for 17 years). I enjoy meeting people, and I enjoyed the experience. I'm a great believer in the more experience in life you have the better off it is for one, and this has been a great one."

The Rands became known for ther parties. They entertained many American visitors, particularly Minnesotans. When the St. Olaf choir stopped on a 17-day European tour last summer, the Rands gave a buffet dinner. They also entertained a college tour group that came to Oslo later.

The most coveted invitations, however, were for the Rands' small dinners for 12 to 20. There you might have found Henry and Nancy Kissinger or Norway's prime minister Gro Harlem Brundtland dining on fare such as fresh baby lobsters.

Lois Rand, describing her life in Oslo, said there wasn't a lot of time for private activity. She served as organist at the American Lutheran Church in the heart of the city. She also did some accompanying for Susan Wold, a soprano from Spring Grove, Minn., who did some operatic singing on the continent. Wold married a Norwegian and is living in Oslo.

Lois Rand said she found the Norwegian women as liberated as Americans.

"At least as many women work outside of the home as in the United States. It is taken for granted that women will hold a job. Norwegian women gained much independence during World War II. They take a very modern view of life. In certain ways their life style is more predictable, since there isn't the great variety of climate and geography that we have in this country."

She added, "The standard of living is high right across the board. I see it as part of the Social Democrat state. There are some wealthy people. But there are not the extremes."

Norway's population is 4 million, which is just about the same as Minnesota's, she noted.

Asked whether Norway is concerned about the infusion of American pop culture, the ex-ambassador's wife said there is a great flow of rock-and-roll and country-western music.

"For Sidney and me, it was delightful to hear a typical western sound in Norway."

On the political front, she feels Norway will taken a more global role because of its geographical position at the north flank of the North Atlantic Treaty Organization countries and because the country has oil production now.

For the present, Lois Rand is at a crossroad. "I can't imagine either of us being willing to just sit," she said. "We have a good feeling that things will take a fresh direction. We look forward to a time of less structured living. We deliberately have not made plans."

The Rands left for Arizona and California last week to visit Lois Rand's parents in Phoenix, Ariz., and Sidney Rand's daughter, Mary Williams, and family in San Diego. Both the Rands two grown children by former marriages.

"When we return we will move into our condominium that we have been leasing

while we were in Norway," said Lois Rand. "It will mean condensing our living a good deal. But we started sifting and sorting when we left St. Olaf. It is a good feeling now."

CITY VENTURE CORP.

Mr. DURENBERGER. Mr. President, recently the Subcommittee on Intergovernmental Relations of the Senate Committee on Governmental Affairs held hearings on the recommendations of the President's Commission for a National Agenda for the Eighties and Federal urban policy issues, including the enterprise zone proposal.

One witness appearing before our subcommittee was Herbert F. Trader, president of City Venture Corp. and vice president for urban programs at Control Data Corp. Both companies are headquartered in Minneapolis, Minn.

City Venture Corp. is a for-profit consortium, formed to initiate, plan, and manage the implementation of job creation and community revitalization projects. Created in 1978, under the leadership of Control Data Corp. and the Minneapolis Star and Tribune Co., City Venture is rooted in the philosophy that many of society's most pressing problems can be turned into profitable business opportunities. City Venture is a composite of the know-how and resources of 14 stockholder organizations.

City Venture Corp. recognizes employment—creating jobs and matching jobs with the people that need them—as the key catalyst for an urban revitalization program.

City Venture's focus is on creating and sustaining jobs in inner city areas. This is accomplished by supporting the creation and development of new, small businesses; by encouraging the expansion of existing area business; and by attracting branch locations or expansions of existing businesses from outside the area.

City Venture acknowledges that job-related problems can often keep people from retaining their jobs and thereby incorporates programs for work force mobilization and stabilization as part of its strategy development for the revitalization of a project area.

Recognizing the complexities of the urban revitalization process, City Venture Corp. was founded on a comprehensive or holistic approach to urban revitalization, concentrating its work in three strategic areas:

Job creation,

Work force mobilization and stabilization, emphasizing education and training, and

Community revitalization.

Ongoing or completed City Venture projects include Todelo, Ohio; Minneapolis and St. Paul, Minn.; Philadelphia, Pa.; Baltimore, Md.; Miami, Fla.; Charleston, S.C.; and Benton Harbor, Mich. In addition, City Venture is negotiating possible projects with several other cities.

City Venture was formed by Control Data Corp. in the belief that there is good business opportunity for industry to join with Government and the local community to address the needs of decaying urban areas. Control Data has for many years addressed major needs of society as profitable business opportunities. City Venture is but one example of the creative, innovative approaches of this most unique company.

Mr. President, I ask unanimous consent that the February 26, testimony of Mr. Herbert Trader, President of City Venture Corp., be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF HERBERT F. TRADER, WASHINGTON, D.C.

Thank you, Senator Durenberger, Senator Sasser, ladies and gentlemen.

It is a privilege on behalf of City Venture Corporation to present testimony and join in the panel discussion before your subcommittee today, on the issues of urban enterprise zones and program, legislative, and regulatory incentives necessary for the private sector to invest and create jobs in the inner city.

In the time available to me today, I will briefly describe City Venture—our mission, current projects, and role in urban revitalization efforts—and suggest a number of incentives that government can provide business to foster a climate for the creation of jobs in urban areas.

City Venture is a for-profit consortium formed two and one-half years ago to plan and manage innovative, comprehensive and, most importantly, holistic programs for the revitalization of decaying sections of urban areas. In going about this task, we are careful to avoid the piece-meal and fragmented efforts which have unfortunately characterized past public sector led efforts.

The creation of jobs is City Venture's number one priority—jobs for the unemployed and underemployed that exist in large numbers in all of our cities. These jobs are made accessible to those who need them, and work forces are stabilized and become profitable, through comprehensive programs of education, training and counseling. In a typical City Venture project area, a minimum of 2,000 new jobs are targeted. The primary strategy for this job creation is the start-up and growth of new and small businesses. Of course, we augment this strategy with programs to assist local established businesses to remain and grow in the inner city and to attract additional businesses from the outside.

Our basic belief is that the private sector must take the lead in initiating and managing urban revitalization, and that it do so with the full cooperation of the residents, the businesses and the governments of the communities in which we work. We are convinced that, in the long run, City Venture is a solid business venture that will earn reasonable profits and will spawn other like activities, worldwide.

In contracting with City Venture, a client city agrees to target its resources to a specific project area that averages 200 acres, and a specific impact area that includes 40,000–60,000 residents, it is the residents of the impact area who will benefit most directly from the jobs and the resulting economic well being they represent.

City Venture recognizes that certain ingredients must exist for any revitalization project to succeed. In this regard, we require top level dedication and commitment from local political, business and community groups. It is City Venture's goal in every city in which it works to bring about basic neighborhood changes—changes that in time will make the neighborhood economically and culturally self sustaining, thereby reducing dramatically the requirement for outside assistance.

Our for-profit consortium is currently composed of 14 stockholders of which 12 are for-profit corporations and two are National and International Church Organizations. Control Data is the largest stockholder, with 35% of the authorized stock.

City Venture Corporation's formation grew out of successful and profitable experiences of our stockholders, principally Control Data, in the inner city. In 1968, Control Data began establishing plants in the inner city, bringing jobs to where they were needed most. These plants have become profitable—and are more successful than their counterparts in rural and suburban areas. Of course, these facilities didn't become successful overnight. Many of the programs of job training, counseling and employee stabilization which Control Data today markets were the result of the immediate needs of these facilities. The innovative technologies developed by Control Data, including Plato computer-based education, energy efficient facilities, and urban food growing and processing, as well as technology from other stockholders, provide much of the basis for City Venture revitalization projects.

Small business is at the heart of City Venture's job creation programs. Again, programs pioneered by Control Data form the basis for these efforts. These include the business and technology centers, facilities which provide services to small businesses, including manufacturing, laboratory and office space on very flexible terms, centrally shared model rooms, accounting, purchasing and legal services; and a complete range of computer services and computer-based management education programs. In addition, Control Data's small business financial and non-cash services are made available through the business and technology centers and Control Data business centers.

City Venture stockholders have expressed frustration with the traditional "check-writing" approach to inner-city problems. Increasingly, these stockholders are insisting upon follow-up on their social responsibility investments—they want their dollars and human resource efforts to be measured in terms of results and to leverage others to action. Of course, this has been Control Data's philosophy on social responsibility for a long period of time. City Venture is a manifestation of this philosophy.

City Venture currently has projects in Toledo, Ohio; Philadelphia, Baltimore, St. Paul and Miami. We are ready to begin projects in Charleston, South Carolina and Benton Harbor, Michigan. Recently, the British government contracted with City Venture to advise on the revitalization of the Docklands area in London.

In each of the cities where it has initiated its concepts. City Venture is taking an innovative, holistic, implementation-oriented approach. Initial results are encouraging. But the best estimates are that it will take anywhere from 3–5 years to make a substantial and lasting impact on a given neighborhood.

As I said earlier, the major focus of City Venture Corporation is job creation—but this job creation must be considered in the broadest possible framework—a holistic framework, housing security, education, training, recreation, transportation, energy efficiency and independent living, all must be addressed if jobs and economic self sufficiency are to be real and lasting.

City Venture's programs are designed to encourage investments that will produce profit for the private sector, tax increment for government, pride through jobs for the neighborhood, and most importantly, real opportunities for people to help themselves.

Real progress to date gives evidence that the goal of self sufficiency is not a theoretical one—but one that is possible, practical and already happening.

Soon after Control Data established City Venture, a similar organization—Rural Ven-

ture—to plan and manage holistic programs for human and economic development in small towns and rural areas, was created. As with City Venture, the core of Rural Venture's approach is job creation, primarily through small-scale agriculture, small-scale food processing and other types of small enterprise. All supported by appropriate education and training. Rural Venture's current projects are in the States of Minnesota, Virginia, and Alaska, and the New England region.

City Venture and Control Data believe that the following conditions—some of a general nature, some specific—are necessary for the private sector to invest and create jobs in the inner city:

The availability of seed capital to support the start-up of new businesses,

Tax incentives,

The expectation of business success,

Available facilities,

The expectation of investment success, and

Local commitments.

Let me briefly suggest the required legislative, regulatory or program support measures that are necessary to insure that each condition is met. You will notice that in some cases the incentives I suggest are to be addressed in the enterprise zone legislation, soon to be introduced in both the House and Senate.

The availability of seed or start-up capital to businesses desiring to locate in inner city areas, is absolutely essential. Sources of venture capital usually can be found. But for the enterpreneur, with little savings or opportunities for funds from family or friends, the first fifty, one hundred thousand dollars, or more in seed funds to start that new business is generally not available. As a result, new and innovative ideas go nowhere.

The shortage of seed capital results in large part from insufficient incentives for the potential investor in seed capital funds, versus other capital formation investment opportunities. Tax incentives should be considered, including a tax credit to provide a near term return on investment for a seed capital investor. The credit could be recaptured when a seed capital fund return is realized. Also, changes in the so-called "prudent man" limitation and creation of incentives for pension fund investments in inner cities should be considered.

Of course, tax incentives are always high on every list to encourage investment in the inner city and are a prime component of the enterprise zone legislation. A range of tax incentives are required for major investments to occur in urban areas by business, including significant tax credits for new jobs created, accelerated depreciation, and tax rate reductions. Property tax relief must be a part of any comprehensive policy to encourage investment in the inner city.

Corporate decision makers who are considering locating or expanding a business in an inner city area must have a legitimate expectation that the business will succeed. A number of issues could be addressed by the Congress to convince business leaders that a new business can prosper in an urban area. Industry—specific, vocational training funds must be available and tailored to and linked with the jobs the prospective business would create.

Land right-down techniques must be used to overcome often punitive facility costs in the urban area versus comparable acreage in suburban areas. The land cost issue is critical for many potential investments in a new or expanding business. If the site cannot be secured at a cost approaching comparable land in a suburban location, that fact alone frequently discourages an investment.

In addition, programs of small business management, education, technical and skill-training assistance must be available. One idea that we at City Venture have discussed would be to fund these types of programs using a very small percentage, perhaps one to two percent, of the proceeds from government-guaranteed loan programs, such as the SBA or farmers home programs. In addition to funding the needed management training and technical assistance, these funds in turn will spawn new small businesses providing these services.

City Venture and Control Data believe strongly that critical to the success of any business venture in the urban area are community support services for employees and their families, such as health, day care, education and pre- and post-employment counselling programs.

Also, business decision makers need to have available property and casualty insurance for their investment. Perhaps these insurance policies could be available in certain inner city areas through government guaranteed re-insurance programs.

The next condition that must be satisfied for investment in the inner city is available facilities. We suggest that programs be designed making land and facilities available without the requirement for pre-commitments on the part of investors to those areas. These programs should be addressed from both the public and private sector perspective. These facilities could be funded with UDAG or EDA type acquisition funds and those funds could later be repaid from rents accrued from the facility, or a share of the tax credit granted for jobs created as a result of that facility. From a private sector perspective, investors could be encouraged to provide reduced rent for small business clients in return for tax advantages or loan guarantees.

On the general subject of the availability of facilities for the location and operation of new businesses in the urban area, City Venture suggests the Congress consider requiring Conrail to release outright or sell at below market rates, excess and low priority land holdings in cities for job creation purposes. This land exists in many cities.

Business decision makers also need to expect that an investment will be successful, particularly in targeted areas. To this end, we believe strongly that any program of Federal assistance, whether financial support or tax incentives, must include a requirement for comprehensive, holistic management of the affected area as a condition for participation in Government funding programs. Such an approach is critical to City Venture's operations and, we believe, to any urban revitalization effort. Beside the many benefits that result from this type of comprehensive planning, such a holistic process will help convince potential investors that a safe and secure environment for the business and its employees will exist in that area.

On the subject of Federal funds to encourage investment in urban areas, in City Venture's experience programs that mandate funds for leveraged development in targeted areas such as UDAG, are preferable to unspecified programs where funds are available for a wide variety of purposes.

Another issue, in many cases beyond the purview of the Congress, but crucial nonetheless, is what local commitments are available to create a climate for successful investment and job creation in urban areas. The improvement of the physical environment by the municipal government in the potential investment area is critical. That improved physical environment must include available basic local services (police, fire protection, road network, public transportation), and streamlining of variance and zoning procedures.

Finally, in your legislative deliberations on urban policy, we strongly recommend you recognize that significant differences exist—in land availability and price, in property tax laws and structures, and in community infrastructure—among the urban areas of this country. As you formulate a response to the needs of urban revitalization, whether in enterprise zone or other legislation, administrative flexibility is needed to assure that the variety of problems and opportunities of urban America can be dealt with effectively.

These issues that I have addressed are suggestions that City Venture makes to your subcommittee, in your continuing deliberations on urban revitalization, that we believe necessary to encourage investment and job creation in the inner city. As you know, Mr. Chairman, Control Area Corporation has taken a genuine interest in the enterprise zone idea. As I mentioned earlier, several of the incentives mentioned in my testimony today are issues being addressed in various drafts of enterprise zone legislation. In addition, Control Data has been asked by the sponsors of the enterprise zone legislation, Senators Chaffee and Boschwitz and Congressmen Kemp and Garcia, to react to a draft of the proposed legislation that is scheduled for introduction in the ninety seventh Congress within the next month. I request the opportunity to submit at a later date for the record of this hearing the response of Control Data's chairman, Mr. W. C. Norris to the enterprise zone sponsors on that subject. The letter will stress the importance of enterprise zone legislation supplementing rather than supplanting current efforts, since Control Data strongly believes that successful urban revitalization programs depend upon combining the best of existing programs wtih appropriate new concepts.

In conclusion, Mr. Chairman, on behalf of City Venture and Control Data, I greatly appreciate the opportunity to appear before your subcommittee today and to participate in this panel discussion. Given the efforts of City Venture the past two years in urban revitalization efforts, we stand ready to be of assistance to your subcommittee in your continuing efforts to ensure that the urban areas of our country are revitalized and that job opportunities are created.

Thank you very much for inviting me to appear today.

Mr. DURENBERGER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. McCLURE). Without objection, it is so ordered.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The PRESIDING OFFICER. Under the previous order, the hour of 11 o'clock having arrived, the Senate will now proceed to the consideration of Senate Concurrent Resolution 9, which the clerk will state by title.

The legislative clerk read as follows:

Calendar No. 39, Senate Concurrent Resolution 9 revising the Congressional Budget for the United States Government for the fiscal years 1981, 1982, and 1983.

CALL OF THE ROLL

Mr. BAKER. Mr. President, I suggest the absence of a quorum, and I advise

the Senate that this will be a live quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators entered the Chamber and answered to their names:

[Quorum No. 6 Leg.]

Baker	Domenici	Kennedy
Baucus	Exon	McClure
Bentsen	Garn	Metzenbaum
Bradley	Gorton	Pryor
Bumpers	Heflin	Randolph
Byrd, Robert C.	Helms	Schmitt
Dodd	Hollings	

The PRESIDING OFFICER. A quorum is not present. The clerk will call the names of absent Senators.

Mr. BAKER. Mr. President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators, and I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll. The question is on agreeing to the motion of the Senator from Tennessee.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Carolina (Mr. EAST), the Senator from New Hampshire (Mr. HUMPHREY), and the Senator from Texas (Mr. TOWER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Louisiana (Mr. LONG), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Georgia (Mr. NUNN), are necessarily absent.

The PRESIDING OFFICER. Have all Senators desiring to vote voted?

The result was announced—yeas 92, nays 2, as follows:

[Rollcall Vote No. 41 Leg.]

YEAS—92

Abdnor	Exon	Metzenbaum
Andrews	Ford	Mitchell
Armstrong	Garn	Moynihan
Baker	Glenn	Murkowski
Baucus	Gorton	Nickles
Bentsen	Grassley	Packwood
Biden	Hart	Pell
Boren	Hatch	Percy
Boschwitz	Hatfield	Pressler
Bradley	Hawkins	Proxmire
Bumpers	Hayakawa	Pryor
Burdick	Heflin	Quayle
Byrd, Harry F., Jr.	Heinz	Randolph
Byrd, Robert C.	Helms	Riegle
Cannon	Hollings	Roth
Chafee	Huddleston	Rudman
Chiles	Inouye	Sarbanes
Cochran	Jackson	Sasser
Cohen	Jepsen	Schmitt
Cranston	Johnston	Simpson
D'Amato	Kassebaum	Specter
Danforth	Kasten	Stafford
DeConcini	Kennedy	Stennis
Denton	Lavalt	Stevens
Dixon	Leahy	Symms
Dodd	Levin	Thurmond
Dole	Lugar	Tsongas
Domenici	Mathias	Wallop
Durenberger	Mattingly	Warner
Eagleton	McClure	Williams
	Melcher	Zorinsky

NAYS—2

Goldwater	Weicker

NOT VOTING—6

East	Long	Nunn
Humphrey	Matsunaga	Tower

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call a quorum is now present.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

Mr. BAKER. Mr. President, what is the pending business before the Senate?

The PRESIDING OFFICER. The clerk will report the first committee amendment.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate? May we have order in the Senate? May we have order in the Senate?

The PRESIDING OFFICER. The pending business is Senate Concurrent Resolution 9.

The Senate proceeded to consider the concurrent resolution (S. Con. Res. 9) revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983, which had been reported from the Committee on the Budget with amendments.

Mr. BAKER. Mr. President, absent any other provisions or agreements that are made, will the next step in the procedure be for the clerk to report the first committee amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I will inquire of the distinguished minority leader and the managers of the bill on both sides what their preference may be in this respect. On previous occasions, we have considered committee amendments en bloc as original text. Absent that, as the Chair advised, we will proceed with committee amendments as they appear. I am prepared to do it either way. It appears to me that we might get to the substantive issues earlier, if we go with the business of aggregating the committee amendments en bloc, considering them en bloc, and treating them as original text.

I will yield, so the distinguished minority leader or the managers of the bill may respond to that query.

Mr. ROBERT C. BYRD. Mr. President, I will object to agreeing to the committee amendments en bloc, with the exception of the amendments down through line 20. I would not object to considering those amendments en bloc and agreeing to them en bloc.

The PRESIDING OFFICER. The Chair will advise the Senator that there are eight committee amendments through line 20.

Mr. ROBERT C. BYRD. Yes; I missed one on line 2. I would not object to agreeing to those first eight, down through line 20, en bloc.

Mr. BAKER. Mr. President, I may put that request in just a moment. I would like to check one point, if I may, before I proceed to make such a request.

In the meantime, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I guess theoretically, aggregating the first eight amendments, which would be through line 20 of the resolution, could save us 160 hours. I am sure it will not, since we are not going to be that involved, but I think that is material progress.

Mr. President, in view of the statement by the distinguished minority leader, I ask unanimous consent——

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate.

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President, I think it is very important, if I may take 30 seconds of my time, that Senators know what is going on.

Mr. BAKER. Mr. President, I thank the minority leader. I agree with every word he has just spoken.

Mr. President, in view of the statement just made by the distinguished minority leader, I ask unanimous consent that the committee amendments beginning with 1 through 8, through line 20 of the first page of Senate Concurrent Resolution 9, be agreed to en bloc and that the concurrent resolution, as amended, be considered as original text for the purpose of further amendment.

Mr. ROBERT C. BYRD. Will the Senator repeat that?

Mr. BAKER. Yes.

I ask unanimous consent that the committee amendments numbered 1 through 8, through line 20 on the first page of Senate Concurrent Resolution 9, be agreed to en bloc and that the concurrent resolution, as thus amended, be considered as original text for the purpose of further amendment.

Mr. ROBERT C. BYRD. Only through line 20?

Mr. BAKER. Only through line 20.

Mr. ROBERT C. BYRD. That would be considered as original text.

Mr. BAKER. For the purpose of other amendments.

Mr. ROBERT C. BYRD. Line 20. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments agreed to are as follows:

On page 2, line 1, beginning with "Reconciliation" strike through and including "Sec. 9." in line 2;

On page 2, line 3, strike "That", through and including "changes" on line 6, and insert the following: That H. Con. Res. 448, Ninety-sixth Congress, second session, adopted November 20, 1980, shall be revised pursuant to sections 304 and 301 of the Congressional Budget Act of 1974, by adding at the end thereof new sections 9, 10, and 11, as follows:

RECONCILIATION

SEC. 9. (a) Congress hereby determines and declares that it is necessary to make changes.

On page 2, line 14, strike "$10.7 billion" and insert "$14,667,000,000";

On page 2, line 15, strike "$4.8 billion" and insert "$2,868,000,000";

On page 2, line 16, strike "$61.3 billion" and insert "$52,144,000,000";

On page 2, line 17, strike "$41.4 billion" and insert "$36,423,000,000";

On page 2, line 19, strike "$88.4 billion" and insert "$59,023,000,000";

On page 2, line 20, strike "$79.7 billion" and insert "$47,694,000,000";

Mr. BAKER. Mr. President, what is the next step in the proceeding?

The PRESIDING OFFICER. The clerk will report the ninth committee amendment.

The legislative clerk read as follows:

On page 2, beginning with line 21, through the end of the resolution, insert new language.

The ninth committee amendment reads as follows:

On page 2, after line 20, insert the following:

(b) The Committees on Appropriations of the House and Senate shall report not later than June 5, 1981, legislation to reduce previously enacted appropriations by $13,300,000,000 in budget authority and $1,500,000,000 in outlays for fiscal year 1981; by $3,200,000,000 in outlays for fiscal year 1982; and $1,800,000,000 in outlays for fiscal year 1983.

(c) Not later than May 31, 1981, the committees named in subsections (c)(1) through (c)(30) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. Those recommendations shall be sufficient to accomplish the reductions required by subsections (c)(1) through (c)(30) of this section. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(1)(A) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $163,000,000 in fiscal year 1981; to reduce budget authority by $474,000,000 and outlays by $928,000,000 in fiscal year 1982; and to reduce budget authority by $659,000,000 and outlays by $618,000,000 in fiscal years 1983; and

(B) The Senate Committee on Agriculture, Nutrition, and Forestry shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $645,000,000 in budget authority and $3,000,000 in outlays for fiscal year 1981; $3,642,000,000 in budget authority and $3,400,000,000 in outlays for fiscal year 1982; and $4,210,000,000 in budget authority and $4,161,000,000 in outlays for fiscal year 1983.

(2) The Senate Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $966,000,000 and outlays by $966,000,000 in fiscal year 1982; and to reduce budget authority by $899,000,000 and outlays by $899,000,000 in fiscal year 1983.

(3) The Senate Committee on Banking, Housing, and Urban Affairs shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $6,146,000,000 in budget authority and $133,000,000 in outlays for fiscal year 1981; $15,460,000,000 in budget authority and $958,000,000 in outlays for fiscal year 1982; and $18,412,000,000 in budget authority and $2,274,000,000 in outlays for fiscal year 1983.

(4)(A) The Senate Committee on Commerce, Science, and Transportation shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $150,000,000 and outlays by $150,000,000 in fiscal year 1982 and to reduce budget authority by $300,000,000 and outlays by $300,000,000 in fiscal year 1983; and

(B) The Senate Committee on Commerce, Science, and Transportation shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,558,000,000 in budget authority and $884,000,000 in outlays for fiscal year 1982 and $1,598,000,000 in budget authority and $1,328,000,000 in outlays for fiscal year 1983.

(5) The Senate Committee on Energy and Natural Resources shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,071,000,000 in budget authority and $106,000,000 in outlays for fiscal year 1981; $3,714,000,000 in budget authority and $3,404,000,000 in outlays for fiscal year 1982; and $3,660,000,000 in budget authority and $3,628,000,000 in outlays for fiscal year 1983.

(6)(A) The Senate Committee on Environment and Public Works shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $185,000,000 in fiscal year 1982 and to reduce outlays by $900,000,000 in fiscal year 1983; and

(B) The Senate Committee on Environment and Public Works shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,350,000,000 in budget authority and $68,000,000 in outlays for fiscal year 1981; $4,935,000,000 in budget authority and $793,000,000 in outlays for fiscal year 1982; and $3,035,000,000 in budget authority and $1,872,000,000 in outlays for fiscal year 1983.

(7)(A) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $212,000,000 and outlays by $810,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 and outlays by $8,832,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 and outlays by $10,870,000,000 in fiscal year 1983; and

(B) The Senate Committee on Finance shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $96,000,000 in budget authority and $112,000,000 in outlays for fiscal year 1982 and $114,000,000 in budget authority and $132,000,000 in outlays for fiscal year 1983.

(8) The Senate Committee on Foreign Relations shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $150,000,000 in budget authority and $101,000,000 in outlays for fiscal year 1982 and $196,000,000 in budget authority and $167,000,000 in outlays for fiscal year 1983.

(9)(A) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $513,000,000 in fiscal year 1982 and to reduce outlays by $414,000,000 in fiscal year 1983; and

(B) The Senate Committee on Governmental Affairs shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that Committee so as to achieve savings in budget authority and outlays as follows: $4,776,000,000 in budget authority and $4,690,000,000 in outlays for fiscal year 1982 and $6,360,000,000 in budget authority and $6,388,000,000 in outlays for fiscal year 1983.

(10) The Senate Committee on the Judiciary shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $116,000,000 in budget authority and $13,000,000 in outlays for fiscal year 1982 and $133,000,000 in budget authority and $81,000,000 in outlays for fiscal year 1983.

(11)(A) The Senate Committee on Labor and Human Resources shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $39,000,000 and outlays by $49,000,000 in fiscal year 1981; to reduce budget authority by $658,000,000 and outlays by $622,000,000 in fiscal year 1982; and to reduce budget authority by $1,601,000,000 and outlays by $1,495,000,000 in fiscal year 1983; and

(B) The Senate Committee on Labor and Human Resources shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,388,000,000 in budget authority and $414,000,000 in outlays for fiscal year 1981; $10,303,000,000 in budget authority and $7,928,000,000 in outlays for fiscal year 1982; and $12,363,000,000 in budget authority and $10,913,000,000 in outlays for fiscal year 1983.

(12) The Senate Select Committee on Small Business shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $97,000,000 in budget authority and $67,000,000 in outlays for fiscal year 1981; $526,000,000 in budget authority and $390,000,000 in outlays for fiscal year 1982; and $564,000,000 in budget authority and $541,000,000 in outlays for fiscal year 1983.

(13)(A) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $14,000,000 and outlays by $14,000,000 in fiscal year 1981; to reduce budget authority by $32,000,000 and outlays by $32,000,000 in fiscal year 1982; and to reduce budget authority by $28,000,000 and outlays by $28,000,000 in fiscal year 1983; and

(B) The Senate Committee on Veterans' Affairs shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $414,000,000 in budget authority and $375,000,000 in outlays for fiscal year 1982 and $397,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1983.

HOUSE COMMITTEES

(14)(A) The House Committee on Agriculture shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $163,000,000 in fiscal year 1981; to reduce budget authority by $232,000,000 and outlays by $693,000,000 in fiscal year 1982; and to reduce budget authority by $400,000,000 and outlays by $362,000,000 in fiscal year 1983; and

(B) The House Committee on Agriculture shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $645,000,000 in budget authority and $3,000,000 in outlays for fiscal year 1981; $3,462,000,000 in budget authority and $3,400,000,000 in outlays for fiscal year 1982; and $4,210,000,000 in budget authority and $4,161,000,000 in outlays for fiscal year 1983.

(15) The House Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $966,000,000 and outlays by $966,000,000 in fiscal year 1982; and to reduce budget authority by $899,000,000 and outlays by $899,000,000 in fiscal year 1983.

(16) The House Committee on Banking, Finance and Urban Affairs shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $7,146,000,000 in budget authority and $143,000,000 in outlays for fiscal year 1981; $14,139,000,000 in budget authority and $808,000,000 in outlays for fiscal year 1982; and $16,534,000,000 in budget authority and $1,669,000,000 in outlays for fiscal year 1983.

(17) The House Committee on the District of Columbia shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $39,000,000 in budget authority and $40,000,000 in outlays for fiscal year 1982 and $56,000,000 in budget authority and $64,000,000 in outlays for fiscal year 1983.

(18)(A) The House Committee on Education and Labor shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $808,000,000 and outlays by $725,000,000 in fiscal year 1982 and to reduce budget authority by $1,681,000,000; and outlays by $1,532,000,000 in fiscal year 1983; and

(B) The House Committee on Education and Labor shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for program authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,282,000,000 in budget authority and $372,000,000 in outlays for fiscal year 1981; $8,578,000,000 in budget authority and $6,733,000,000 in outlays for fiscal year 1982; and $10,035,000,000 in budget authority and $8,968,000,000 in outlays for fiscal year 1983.

(19)(A) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $176,000,000 and outlays by $110,000,000 in fiscal year 1981; to reduce budget authority by $695,000,000 and outlays by $1,011,000,000 in fiscal year 1982; and to reduce budget authority by $903,000,000 and outlays by $1,537,000,000 in fiscal year 1983; and

(B) The House Committee on Energy and Commerce shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $764,000,000 in budget authority and $19,000,000 in outlays for fiscal year 1981; $4,885,000,000 in budget authority and $4,088,000,000 in outlays for fiscal year 1982; and $5,251,000,000 in budget authority and $4,846,000,000 in outlays for fiscal year 1983.

(20) The House Committee on Foreign Affairs shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $150,000,000 in budget authority and $101,000,000 in outlays for fiscal year 1982; and $196,000,000 in budget authority and $167,000,000 in outlays for fiscal year 1983.

(21) The House Committee on Interior and Insular Affairs shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $331,000,000 in budget authority and $84,000,000 in outlays for fiscal year 1981; $815,000,000 in budget authority and $369,000,000 in outlays for fiscal year 1982; and $796,000,000 in budget authority and $564,000,000 in outlays for fiscal year 1983.

(22) The House Committee on the Judiciary shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $116,000,000 in budget authority and $13,000,000 in outlays for fiscal year 1982; and $133,000,000 in budget authority and $81,000,000 in outlays for fiscal year 1983.

(23)(A) The House Committee on Merchant Marine and Fisheries shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $39,000,000 and outlays by $39,000,000 in fiscal year 1981; to reduce budget authority by $242,000,000 and outlays by $242,000,000 in fiscal year 1982; and to reduce budget authority by $479,000,000 and outlays by $479,000,000 in fiscal year 1983; and

(B) The House Committee on Merchant Marine and Fisheries shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $147,000,000 in budget authority and $15,000,000 in outlays for fiscal year 1982 and $60,000,000 in budget authority and $32,000,000 in outlays for fiscal year 1983.

(24)(A) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $513,000,000 in fiscal year 1982 and to reduce outlays by $414,000,000 in fiscal year 1983; and

(B) The House Committee on Post Office and Civil Service shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $4,737,000,000 in budget authority and $4,650,000,000 in outlays for fiscal year 1982 and $6,304,000,000 in budget authority and $6,324,000,000 in outlays for fiscal year 1983.

(25)(A) The House Committee on Public Works and Transportation shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $185,000,000 in fiscal year 1982 and to reduce outlays by $900,000,000 in fiscal year 1983; and

(B) The House Committee on Public Works and Transportation shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,350,000,000 in budget authority and $68,000,000 in outlays for fiscal year 1981; $6,446,000,000 in budget authority and $1,033,000,000 in outlays for fiscal year 1982; and $5,122,000,000 in budget authority and $2,697,0000,000 in outlays for fiscal year 1983.

(26) The House Committee on Science and Technology shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $82,000,000 in budget authority and $35,000,000 in outlays for fiscal year 1981; $78,000,000 in budget authority and $39,000,000 in outlays for fiscal year 1982; and $90,000,000 in budget authority and $59,000,000 in outlays for fiscal year 1983.

(27) The House Committee on Small Business shall report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $97,000,000 in budget authority and $67,000,000 in outlays for fiscal year 1981; $526,000,000 in budget authority and $390,000,000 in outlays for fiscal year 1982; and $564,000,000 in budget authority and $541,000,000 in outlays for fiscal year 1983.

(28)(A) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $14,000,000 and outlays by $14,000,000 in fiscal year 1981; to reduce budget authority by $32,000,000 and outlays by $32,000,000 in fiscal year 1982; and to reduce budget authority by $28,000,000 and outlays by $28,000,000 in fiscal year 1983; and

(B) The House Committee on Veterans' Affairs shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $414,000,000 in budget authority and $375,000,000

in outlays for fiscal year 1982 and $397,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1983.

(29)(A) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $36,000,000 and outlays by $710,000,000 in fiscal year 1981; to reduce budget authority by $3,659,000,000 and outlays by $7,861,000,000 in fiscal year 1982; and to reduce budget authority by $3,591,000,000 and outlays by $9,373,000,000 in fiscal year 1983: and

(B) The House Committee on Ways and Means shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings, in budget authority and outlays as follows: $978,000,000 in budget authority and $994,000,000 in outlays for fiscal year 1982 and $1,294,000,000 in budget authority and $1,312,000,000 in outlays for fiscal year 1983.

SEC. 10. Whereas, the enactment of savings required by this resolution is critical to the health of the economy of the Nation; and

Whereas, expeditious action on legislation pursuant to these instructions is critical to achieving the savings required by this resolution; and

Whereas, the Senate is committed to completing action on the savings legislation required by this resolution at the earliest possible time: Therefore, be it

Resolved, That it is the sense of the Senate committees instructed in section 9(c)(1) through (c)(13) of this resolution should begin deliberations on the legislation those committees are required to report under this resolution as soon as the resolution is agreed to in the Senate; and

It is the further sense of the Senate that Senate committees should report the legislation required by section 9 of this resolution as agreed to in the Senate, except to the extent that the amounts referred to may be modified in conference with the House of Representatives, by May 31, 1981.

SEC. 11. The Senate Committee on Governmental Affairs should report changes in laws to modify programs within the jurisdiction of that committee which would reduce the costs to the Government which result from waste, fraud, and abuse. Savings in appropriations and expenditures from trust funds from such statutory changes are estimated to be $700,000,000 in budget authority and $1,300,000,000 in outlays in fiscal year 1982 and $1,000,000,000 in budget authority and $2,000,000,000 in outlays in fiscal year 1983.

Mr. BAKER. Mr. President, I am authorized to modify committee amendment No. 9 in certain respects, and I send that modification to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The clerk will report the modification for the information of the Senate.

The legislative clerk read as follows:

On page 3, line 25, strike the word "to".

Mr. ROBERT C. BYRD. Mr. President, will the clerk go a little slower?

The legislative clerk read as follows:

On page 3, line 25, strike the word "to".

On page 4, line 1, strike the words "modify programs".

On page 4, lines 22 and 23, strike the words "to modify programs".

On page 5, line 19, strike the words "to modify programs".

On page 6, lines 4 and 5, strike the words "to modify programs".

On page 6, lines 23 and 24, strike the words "to modify programs".

On page 7, line 20, strike the words "to modify programs".

On page 8, line 4, strike the words "to modify programs".

On page 8, lines 20 and 21, strike the words "to modify programs".

On page 9, line 5, strike the words "to modify programs".

On page 9, line 25, strike the words "to modify".

On page 10, line 1, strike the word "programs".

On page 10, lines 12 and 13, strike the words "to modify programs".

On page 11, line 8, strike the words "to modify programs".

On page 12, line 4, strike the words "to modify programs".

On page 12, line 25, strike the word "to".

On page 13, line 1, strike the words "modify programs".

On page 13, lines 12 and 13, strike the words "to modify programs".

On page 14, lines 5 and 6, strike the words "to modify programs".

On page 15, lines 2 and 3, strike the words 'to modify programs".

On page 15, line 13, strike the words "to modify programs".

On page 15, lines 22 and 23, strike the words "to modify programs".

On page 16, line 8, strike the words "to modify programs".

On page 17, lines 4 and 5, strike the words "to modify programs".

On page 17, lines 21 and 22, strike the words "to modify programs".

On page 18, lines 13 and 14, strike the words "to modify programs".

On page 18, line 25, strike the words "to modify programs".

On page 19, line 11, strike the words "to modify programs".

On page 20, line 7, strike the words "to modify programs".

On page 21, line 2, strike the words "to modify programs".

On page 22, line 5, strike the words "to modify programs".

On page 3, line 4, strike "30" and insert in lieu thereof, "29".

On page 3, line 8, strike "30" and insert in lieu thereof, "29".

On page 4, line 7, strike "3,642,000,000" and insert in lieu thereof "3,462,000,000".

On page 21, line 10, strike "Whereas".

On page 21, line 13, strike "Whereas".

On page 21, line 16, strike "Whereas".

On page 21, line 18, strike ": Therefore, be it", and insert in lieu thereof, "; and".

On page 21, line 19, strike "Resolved, that".

Mr BAKER Mr. President, is the amendment modified in the respect reported by the clerk?

The PRESIDING OFFICER. The amendment is so modified.

Mr. BAKER. Now what is the pending business before the Senate?

The PRESIDING OFFICER. The amendment as modified.

Mr. BAKER. I thank the Chair.

Mr. ROBERT C. BYRD. Mr. President, I congratulate the distinguished majority leader on acting to modify the resolution at the beginning. In so doing, he has cured what otherwise would have been some several points of order that would lie against the resolution.

Of course, the Senate may always overrule the Chair if a majority of the Senate so feels disposed. But I congratulate the majority leader on his actions, which have removed certain impediments, certain phrases which might have provided impediments.

Mr. President, I have a few questions I should like to ask at this point so that we all understand what the ground rules are.

First of all, what is the overall time cap on this resolution?

The PRESIDING OFFICER. The time limit is 50 hours on the resolution.

Mr. ROBERT C. BYRD. Mr. President, what is the time limit on each committee amendment which has not been agreed to?

The PRESIDING OFFICER. There are 2 hours on the remaining committee amendments.

Mr. ROBERT C. BYRD. On each of the remaining committee amendments?

The PRESIDING OFFICER. I advise the Senator that there is only one remaining committee amendment, except the amendment to the title.

Mr. ROBERT C. BYRD. As to any committee amendment that has not been agreed to, is that committee amendment not an amendment in the first degree?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. So that any amendment to that amendment would be an amendment in the second degree and thus would be allotted only 1 hour.

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. May amendments be offered to the resolution after the 50 hours have expired, if such event should indeed become a reality—and I doubt that it will—may amendments still be called up and be voted on without debate?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Is it not true that while an amendment is pending, a quorum call, if requested, would have to come out of the time on the amendment?

The PRESIDING OFFICER. If the time allotted to that amendment had not expired, the Senator is correct.

Mr. ROBERT C. BYRD. If the time had expired on such committee amendment and just preceding a vote, would not—first of all, a quorum call would be in order, and that being the case, would not the time be gratis? It would not be charged against the 50 hours?

The PRESIDING OFFICER. The precedents of the Senate interpreting the Constitution of the United States have provided that the time for a quorum call immediately preceding the rollcall and the time consumed in the rollcall are not charged against the 50 hours.

Mr. ROBERT C. BYRD. I was going to get to the rollcall next, but the Chair has already responded.

I will ask the question for the record: With respect to time on rollcall votes, with the exception of the rollcall vote that is associated with the quorum in getting the Sergeant at Arms instructed, is not such time gratis, not charged against the 50 hours?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. And no amendments not germane are in order. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. And if such amendment is offered and a point of order is made prior to the Chair's ruling, would not a motion to waive the germaneness requirement of title 3 be in order and if such waiver were granted by a majority vote thus such amendment would be in order, even though not germane?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, do the majority and minority leaders control the time on the resolution itself, in other words 25 hours each?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. On any amendment that is called up does not the mover of the amendment control half the time, with the manager of the resolution controlling the other half of the time unless the manager agrees with the amendment, in which case would not the minority leader control the time in opposition thereto?

The PRESIDING OFFICER. That is correct; or his designee.

Mr. ROBERT C. BYRD. I beg the Chair's pardon.

The PRESIDING OFFICER. Or the designee of the minority leader.

Mr. ROBERT C. BYRD. Yes.

During the consideration of an amendment, while there is yet time on the amendment, as I understand it, no Member may suggest the absence of a quorum unless time is yielded to that Member by someone in control of such time as in the case of any other unanimous-consent agreement?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Mr. President, I think that satisfies my search for answers at this point. I, therefore, have no further requests and yield the floor.

Mr. BAKER. Mr. President, it is my intention to delegate to the distinguished chairman of the Budget Committee the management of time on amendments on this resolution in the absence of that claimed by the majority leader.

Mr. ROBERT C. BYRD. Mr. President, I yield the time on this side to the control of the distinguished Senator from South Carolina on the resolution.

Mr. DOMENICI. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I yield.

Mr. DOMENICI. Mr. President, by way of further clarification on the ground rules when the distinguished minority leader was speaking of gratis time and the calling of the quorum, I understand that that is a quorum call, before a vote; is that correct?

The PRESIDING OFFICER. Any quorum call preceding a vote.

Mr. DOMENICI. That is gratis, but we are speaking of only under those circumstances before a vote?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Mr. President, if the Senator will yield the floor, I have one more question that occurs to me at this time. Is it not true that in connection with this resolution, unlike the rules that ordinarily govern in the debate and action on bills and resolutions where language has been amended again or the numbers can be amended again and if necessary again, in order to achieve mathematical consistency or retain mathematical consistency? Ordinarily if an amendment is adopted except by unanimous consent that same language could not be directly amended a second time, but in this case am I not correct in saying it can be amended again?

The PRESIDING OFFICER. So far as it pertains to necessary changes in any figure or figures then contained in the resolution that would be correct.

Mr. ROBERT C. BYRD. I thank the Chair.

And I thank Senators.

Mr. DOMENICI. Mr. President, I yield myself such time as I may need for an opening statement and I yield that time off of my time on the resolution.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. DOMENICI. I am pleased to yield to the majority leader.

Mr. BAKER. Mr. President, I thank the Chair and I thank the Senator from New Mexico.

Mr. President, the minority leader is on the floor and I am sure may speak on this same subject. I previously indicated and I now wish to reiterate that the leadership on this side will not agree to any unanimous-consent requests in respect to the meeting of committees while this measure is pending.

Mr. ROBERT C. BYRD. Mr. President, I have discussed this with the distinguished majority leader and I was going to make the same statement that I would object to any committees meeting during the consideration of this request. I think Senators should be on the floor if at all possible, and obviously they cannot be on the floor and in committee meetings, too, and this is a matter of such importance that it seems to me it is imperative every effort be made that Senators be in attendance while this budget resolution is up before the Senate.

May I ask the distinguished majority leader about another matter which I have not consulted with him? Would it be possible for us to have some understanding as to the recognition of Members to call up amendments? I wonder if it would be agreeable to have an understanding that the Chair might alternate between sides so as to allow the majority side to call up an amendment, and then the minority call up an amendment; otherwise, it might be difficult for the minority to get recognition to call up amendments at times.

Mr. BAKER. Mr. President, responding for myself, and I have just conferred with the distinguished manager of the bill, the chairman of the committee, I think that is eminently fair and it tracks after the procedure that the distinguished minority leader utilized when he was majority leader and provided a degree of protection for Republicans when we were in the minority.

So I urge that the Chair do that and as and when there are amendments on both sides that they alternate recognition for the purpose of providing equal access to the procedure.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader for his characteristic fairness and courtesy.

Mr. DOMENICI. Mr. President, might I inquire of the distinguished minority leader: We do not have any sequence other than what we have just agreed upon in terms of rotating. Does the distinguished minority leader or the distinguished ranking minority floor manager have any present ideas as to the sequence of amendments?

Mr. ROBERT C. BYRD. I can only say that there are several amendments that will be called up on this side of the aisle. I believe that Mr. PRYOR will have an amendment that he wishes to call up very early on and, of course, we recognize that the majority in this circumstance would go first with an amendment. But when it comes our turn, I believe that Mr. PRYOR has the first amendment.

Mr. PROXMIRE. Mr. President, will the Senator yield on that?

Mr. ROBERT C. BYRD. I yield.

Mr. PROXMIRE. I discussed this with Senator PRYOR, and I have an amendment which for technical reasons might be desirable to call up ahead of his. I certainly will not do it unless Senator PRYOR agrees that is desirable.

Mr. PRYOR. I will only say to my friend from Wisconsin that I would personally prefer to bring the amendment up that I wish to propose, but I would certainly not stand in the way of my friend from Wisconsin.

I thank the Senator.

Mr. DOMENICI. I am not inquiring certainly for any rigid itinerary. I understand we have a great deal of flexibility, and I certainly think Senators all want that.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. DOMENICI. I am pleased to yield.

Mr. BAKER. I mentioned this to the minority leader just now. In view of the fact there appears to be a fair number of amendments and that it would appear that we need to make some arrangement for their orderly consideration, I hope that at the first convenient opportunity the two managers of this resolution might meet, confer, and canvass on both sides and establish an informal procedure for presenting those amendments in sequence.

Mr. ROBERT C. BYRD. I think that is an excellent suggestion, Mr. President, if the manager agrees on this.

Mr. HOLLINGS. Yes.

Mr. DOMENICI. That is fine with me.

The PRESIDING OFFICER. I thank the Senator.

Mr. DOMENICI. Mr. President, the Budget Committee, after an unprecedented work schedule that I am certain taxed the members and the staff alike as never before, has brought before the Senate an historic package of spending

restraints for fiscal years 1981, 1982, and 1983.

Let me summarize the recommendations of our committee to the full Senate:

We recommend that the Senate approve reconciliation instructions to 14 committees of the Senate. These instructions, if approved entirely by the Senate and implemented through legislative changes, would save $125.8 billion in budget authority and about $87 billion in outlays during the three fiscal years.

In 1982, the savings would be $14.7 billion in budget authority and $2.9 billion in outlays. For 1982, the savings would be $32.1 billion in budget authority and $36.4 billion in outlays. And, for 1983, savings would reach $59 billion in budget authority and $47.7 billion in outlays.

We have reported these savings recommendations to the Senate in the form of a revision of the second concurrent budget resolution for fiscal year 1982, approved last year by the 96th Congress. I should point out that we have reported the package within 9 days of the March 10 Presidential submission that contained many recommendations for reducing the rate of growth in Federal spending, having received prior thereto some of the recommendations that were ultimately included in the President's revised budget for 1982. Such rapid and substantial action could never have taken place without the active cooperation of the entire membership of the committee, especially the leadership of the ranking minority member, Senator HOLLINGS, nor without the support and concern of the Senate majority leader, Senator BAKER, to whom I give special thanks.

To give the Senate an idea of the magnitude of the undertaking, I point out that last year's reconciliation instruction, the first use of this invaluable tool for fiscal discipline, provided for savings of $6.4 billion in outlays. That struggle took 6 months, an averaged savings of about $1 billion a month. In contrast, the committee has recommended $36.4 billion in outlay restraint in 1982 and to the extent that we have taken one giant step in that direction that has taken us only about 4 full days of markup and an average savings far in excess of anything we have done before. Nothing more dramatically illustrates how the mood of the Senate has changed than this quick action on a substantial package of budget requests.

I would not want to leave the impression, Mr. President, that the quick action taken by the committee indicates in any way rash or ill-considered action.

Mr. President, I want to continue just for a few moments putting into perspective what we have done. It is absolutely clear that many of the restraints recommended by the committee are restraints that the Senate itself and various Senate committees have considered and in some cases accepted in the past. Many of the recommendations are the result of extremely close work between the Budget Committee staff and the administration during the period between November and January. Many of the recommendations have been made by such diverse groups as the Congressional Budget Office, the Bipartisan Coalition of the House of Representatives, the Chamber of Commerce, the National Federation of Independent Business, the Heritage Foundation, and individual Members of Congress, both Democratic and Republican Members.

Let me just give you a few examples of large cuts that are reflected in the resolution now before the Senate that have been considered by the Budget Committee in the past.

But before doing that I want to reiterate a point that I hope the Senator already understands. In developing its recommendations, the Budget Committee makes assumptions about specific policy changes that would be made to produce savings. That is the way we build our numbers. But the Budget Committee's assumptions are the specific ways in which savings would be achieved and are not binding on the committees which have jurisdiction over the programs.

If the Senate approves the reconciliation instruction now before it the committee which will be required to take action to produce savings may choose to do so in a totally different way than under the committee assumptions.

Turning now to some of the program changes, let me mention first our proposed instruction to the Banking Committee, which would assume a substantial reduction in authority for section 8 housing. This reduction parallels a recommendation by the Senator from Nebraska (Mr. EXON).

Mr. STENNIS. Mr. President, will the Senator in the Chair actively be inclined to have order? This is historical and is highly important.

The PRESIDING OFFICER (Mr. HELMS). The Senator's point is well-taken. The Senate will be in order.

Mr. DOMENICI. I thank the distinguished Senator.

It is the natural outgrowth of a series of General Accounting Office studies that have recommended wholesale changes in section 8. In short, it is a well-considered, well-developed restraint.

We recommended the elimination next year of the summer feeding program. That program, according to the GAO and the Department of Agriculture Inspector General, has been plagued by administrative programs, fraudulent meals claims, and widespread abuse. Today's newspapers carry reports of indictments in New York of people who have allegedly ripped off money from this program.

The recommendation for terminating is a direct outgrowth once again of independent work done by those agencies in power to study the effectiveness of the programs. It is not a rash or a harsh response taken in any heated moment.

In the food stamp program, a highly sensitive area, which has shown great growth during the past 5 years, the recommendations are wise and the result of many man-hours of work and study during the past several years.

For example, we have heeded closely the 1979 Inspector General's report on the program, and the November 1980 study by the Senate Appropriations Committee. The committee's study noted that the food stamp program had deficiencies of a serious nature, including, but not limited to, serious fraud and abuse, regulations that prevent adequate income verification, and questionable eligibility control; failure to give the Department of Agriculture adequate antifraud tools; failure to develop program efficiency standards required by the 1977 amendments; overpayments caused by emergency issue procedures; added costs by replacing allegedly lost stamps.

Despite our recommendation, the food stamp program, if all the assumptions were followed, would still have doubled in size between 1977 and 1982.

In the area of community development block grants and UDAG grants, we followed recommendations adopted by the Banking Committee and, indeed, have not adopted even more serious cuts recommended by Senator PROXMIRE, the former chairman of that committee, who recommended even deeper cuts. Again our rcommendations are moderate.

I could go through scores and scores of changes we have recommended, noting that the amount of study and the prior works that have gone into the recommendations, but I will not take that much time now.

I will state that I am prepared, as are members of the various authorizing committees and other members, in each case when these program assumptions are discussed by way of amendment to clearly indicate the history of the programs that are recommended for restraint, and to clearly indicate that this is not a quick and hurried process but that many of those changes have been under study for years, but the time was not ripe, and no one was seriously interested. We have now put them into this package and we are prepared to defend most of them—in fact, all of them—against the kind of general attack that one part of the American population has been picked out to take these cuts, which are obviously collectively desirable and which almost everyone agrees must occur.

Let me move to just one other area that might concern Senators. We are not attempting to place the burden of restraint on the poor. Social programs now make up the bulk of spending in the Federal budget. Budget restraint will naturally and in simple mathematical terms impact on those programs more heavily than on nonsocial programs. That is a given, but let me illustrate with some facts my conviction that our recommendations do not fall unduly on the poor.

We have not tampered with the basic social security old age benefit; we have not tampered with SSI, supplemental security income, nor with Head Start, nor have we laid any heavy hand on the basic "safety net" programs that have grown so rapidly in recent years.

In the national school lunch program we have asked for cuts of $1.5 billion in 1982 outlays. Those savings can be achieved without gutting by simply taking subsidies away from less-needy recipients. Under these assumptions, free meals will be continued for children from four-person families with incomes below $11,640. That means that a family

with a per capita income of $2,900 will be eligible for full funding for its children under this program.

The average disposable personal income in America for 1980 was about $4,500, so that families who make about two-thirds of the average disposable per capita income will be eligible for free meals under the school lunch program.

I submit that this is a generous allowance and not a harsh recommendation. It is consistent with the history of this great country that we help those who are in need.

Moreover, our assumption would retain partially subsidized school lunch programs for families with incomes between $11,600 and $15,600. Children with families above $15,600 would be expected to pay for their own meals, unless State and local governments decided to partially subsidize them.

It seems to me this is the kind and type of belt tightening that is entirely justified.

As I already noted, we are proposing to restrain the food stamp program, but I hope the Senators know it will still have shown a 100-percent growth in the past 6 years if all our assumptions are adopted by the committee of jurisdiction.

In areas of subsidized housing we propose funding in fiscal 1982 of 150,000 new units, still a substantial growth, although less than in recent years.

In aid to families with dependent children, if adopted by the committee of jurisdiction, this would mean that only one-sixteenth of the funds available in 1981 would be cut in 1982—less than 7 percent. Many of the AFDC changes assumed have previously been endorsed by the Committee on Finance of the U.S. Senate and have been passed by the Senate. They just never have become law.

Our medicare assumptions will still allow the program to grow by almost $8 billion between 1981 and 1982, Mr. President. Our medicaid assumptions will allow that program to grow by $800 million between 1981 and 1982, and by $1.3 billion between 1982 and 1983—hardly a cut when they are growing that much.

Other than public service programs, our recommendations would involve about 7 percent, Mr. President, of a cut in CETA; in the student financial assistance area our assumptions would allow growth of $500 million between 1981 and 1982—hardly a cut, a $500 million increase from 1981 to 1982.

In short, Mr. President, the rhetoric about this budget recommendation destroying the social compact between this Nation and her people is more than overblown, it simply is wrong, it is not true.

I must also note that we have not spared programs for the so-called middle-income and well-to-do groups. We have recommended restraint in the Export-Import Bank, used predominately by very large corporations. We have recommended cuts in Amtrak, Conrail, and in agriculture programs that benefit business.

We have endorsed restraint in business loans and in postal subsidies that benefit business greatly. We have asked for restraint and reform in the Federal civilian pay and retirement benefits. In short, once again, we have attempted to insure that all parts of Government and of the Nation bear this restraint package.

And, despite this historic effort—despite all of the rhetoric about the cruel and heartless Budget Committee and our President—the Federal budget would still grow by about 6 percent from 1981 to 1982 in outlays. And, most of this outlay growth would come in nondefense areas of the budget.

I will acknowledge that in the immediate past 4 years we have literally gone wild. The average growth was 16 percent, not 6, for a 64-percent increase in the Federal budget in 4 fiscal years.

Mr. President, the Budget Committee did not ask for this chore, this job. We were asked to initiate work on the administration's economic package because it was the view of the leadership and the administration that reconciliation was uniquely suited as a packaged concept. It happens that reconciliation falls within the Budget Committee's jurisdiction and so we were the appropriate forum in which to begin the action. We were asked to make recommendations on how money could be saved, and we have made these recommendations to the Senate. They are now before you.

We have no line-item jurisdiction, and any committee that is instructed by the Senate after we vote would have a great deal of latitude to save money in areas other than those we have assumed. The Budget Committee can only make assumptions.

We cannot compel Senate action nor committee action. Nevertheless, we are now bringing forth our version of the restraint package for full Senate consideration, as we have been asked to do, and we ask for the support of the Senate.

Finally, Mr. President, I would be remiss if I did not state emphatically that the unusual procedures adopted by the Budget Committee—unusual in the sense that reconciliation has heretofore been dealt with on a separate path from the rest of the budget—is simply the response of the committee to the urgency with which we believe the people of this country expect the Congress to act on the President's economic plan.

We are not attempting to dictate to other committees, nor do we see our work that we present to the Senate today as any expansion of our jurisdiction or authority.

We are acting at the Senate leadership's request, we are acting consistently with past precedents, and the procedures we recommend are fully consistent with the 1974 Congressional Budget and Impoundment Control Act.

Let me conclude my opening remarks by noting some technical matters concerning the reconciliation instruction.

First, it affects 14 Senate committees.

Second, it contains language telling these committees to begin their work on finding the savings that the Senate mandates even before the conference agreement with the House is reached on the instruction itself.

We have, indeed—when these recommendations are adopted, and if they are—told our committees to go to work now, not to wait and see what the result of the conference with the House and adoption of a full concurrent resolution is. This gives our committees an extra 30 days in which to do their very difficult work. That is outlined in section 10 of the resolution.

Section 11 of the resolution indicates the committee's judgment that an active effort by the Senate Committee on Governmental Affairs can lead to substantial savings in 1982 and 1983 through reduction of waste, fraud, and abuse.

These savings are not assumed as part of the formal reconciliation instruction, but are our best estimate of the level of Government-wide savings that might be achieved if an all-out assault on fraud and waste and abuse were made in this area.

One other facet of the resolution concerns the two-pronged approach toward reconciliation made by the Budget Committee. We have not only reconciled committees on programs within their direct spending jurisdiction, but also on the authorizing aspects of their jurisdictions. The precedent for this was the reconciliation instruction directed at some authorizations last year in both the Senate and House.

In addition, we believe that this procedure is fully within the Budget Act. If we had failed to continue this type of reconciliation, we would have failed to capture about $21 billion in restraint proposed by the President.

Our judgment was that the package concept that the Senate leadership asked us to retain could not be retained through any other approach other than the one we have adopted by these recommendations in this reconciliation resolution.

The work that we have brought to the Senate is the product of many hours of hard work and many hours of consultation within the Senate. It could not have been accomplished in such short order without extraordinary efforts on the part of many, in particular the Congressional Budget Office's programmatic staff, which worked around the clock to provide much of the technical backup which is now before this Senate. I wish to thank them personally, and the personnel who helped us, as well as our committee staff—majority and minority—which worked without break for weeks to help bring this to the floor today.

Mr. President, I yield the floor.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

The Chair inquires whether the Senator wants his time charged against the resolution or the amendment?

Mr. HOLLINGS. Against the resolution.

The PRESIDING OFFICER. The Senator may proceed.

Mr. HOLLINGS. Mr. President, the Senate now has before it one of the most significant pieces of legislation it will consider this session. Senate Concurrent Resolution 9 initiates the reconciliation process to revamp our spending priorities. Getting inflation under control and our economy moving again is no simple task. It will require work on many fronts. One of the most critical areas is control of Federal spending. The resolution before us provides the best means to achieve significant, broad scale reduction in spending.

Senate Concurrent Resolution 9 marks the Senate's commitment to major spending restraint. The instructions in the resolution would save a total of $87 billion in outlays through fiscal year 1983. But it is not only a commitment to reduce the spending within appropriated items.

More importantly, it is a signal that we are prepared to make maior reductions in spending for the so-called uncontrollable items, those entitlement programs whose skyrocketing growth has resulted in much of our budget woes.

When this resolution was introduced on February 24, I said that it was a further example of the Senate's leadership in achieving budget savings. Well, not only has the Senate demonstrated its leadership by moving quickly on this reconciliation resolution, but the Budget Committee has reported total outlay savings of $4.7 billion more than recommended by the President.

As we begin our debate today, it is important to note that the reconciliation process is a partnership. It requires the cooperative efforts of all committees. When the aggregate levels of savings needed to meet our fiscal policy goals are agreed to, the individual committees will have the responsibility to review the laws within their jurisdiction and determine how best to change them in order to achieve the necessary savings. This is only appropriate since these committees have the expertise to thoughtfully consider changes in laws they helped to enact.

Mr. President, although I endorse the reconciliation process and the level of savings to be achieved through this resolution, I am deeply troubled by the economic assumptions used by the committee in arriving at these savings. With the exception of interest rates, the Budget Committee relied on President Reagan's assumptions about the future direction of our economy.

I, as well as the Congressional Budget Office and most private sector economists, have serious reservations about the validity of these assumptions. The flaws contained in them endanger the President's program and could seriously damage the credibility of our efforts to control spending.

The administration's economic assumptions can only be described as wildly optimistic. Many impartial observers have described a long list of miracles that would be needed to make these projections come true. But these assumptions are of more than passing academic interest. The administration has hidden large future deficits behind its overly optimistic and largely unjustified economics.

President Reagan's assumptions of lower inflation, sharply declining interest rates and rapid economic growth combine to hold down the growth in Federal outlays. But when the CBO examined the Reagan program of tax and spending cuts, using more conventional and widely accepted methods, the results were dramatically higher spending than projected in President Reagan's budget.

For example, the deficit in fiscal year 1982 is estimated by CBO to be $67 billion, not the $45 billion projected by the administration. Even in fiscal year 1984, when the President says there will be a small surplus, the CBO analysis reveals a substantial $49 billion deficit. I should point out again that the CBO estimates assume that all of the President's proposals are enacted with no change by the Congress.

A particularly serious flaw in the administration's economics is the prediction of the future rate of inflation. The administration would have us believe that the Consumer Price Index will fall dramatically from 11.1 percent in this year to 8.3 percent next year.

I am sure we all hope that will be true. But it is a hope against reason. Such a deceleration in the inflation rate can only come about if there is a similar decline in the rate of wage gains. In a strong economy that is very unlikely.

In fact, recent collective-bargaining agreements do not contain the kind of wage moderation that is essential to reducing inflation. The pact with the coal miners calls for a 36-percent increase over 3 years, hardly the kind of settlement that supports the wage deceleration predicted by the administration.

The Reagan expectation that real economic growth in 1982 will accelerate to 4.2 percent from the 1981 level of 1.1 percent also seems founded on little more than hope. The administration's economic proposals provide little of the stimulus needed to encourage and sustain such growth. The proposed tax cuts exceed the spending reductions by only a small amount, certainly not sufficient to generate the magnitude of economic growth predicted.

The CBO analysis of the President's program shows that the roughly comparable tax and spending cuts do not have any significant effect on either the economy or the budget deficit in the short run. Even with the President's programs, CBO estimates that real growth in 1982 will be only 2.5 percent, only a little over half what the administration hopes for.

To President Reagan's credit, he says, "If you do not support my program, present an alternative."

I like that kind of politics. I like that realistic approach to the problems of Government.

Mr. President, I did submit a tax reduction proposal in the Budget Committee. It specified the kind and size of tax cuts, restricting it to a supply side tax cut, and limiting it to $20 billion in fiscal year 1982 rather than $54 billion proposed by the administration. This would give us a balanced budget by 1984.

In the interest of time, I ask unanimous consent that this tax reduction proposal be printed at this point in the RECORD.

There being no objection, the proposal was ordered to be printed in the RECORD, as follows:

TAX REDUCTION PROPOSAL

(By Senator ERNEST F. HOLLINGS)

TAX REDUCTION PROPOSAL

[Fiscal years, in billions of dollars]

	1981	1982	1983	1984
Individual	−087	−7.7	−29.2	−42.9
Marriage penalty	−.2	−3.8	−7.2	−8.6
$1,000/$2.000 interest and dividend exclusion	−.5	−3.9	−9.0	−12.3
Personal rate cut of 5 percent in 1983			−13.0	−22.0
Business	−4.3	−13.7	−21.4	−28.2
2-4-7-10 depreciation	−4.3	−13.7	−18.6	−19.0
Corporate rate cut to 40 percent in 1983			−2.8	−9.2
Total tax reduction	−5.0	−21.4	−50.6	−71.7
Supply-side incentives as proportion of total (percent)	100	100	74	70

These tax proposals would accomplish two objectives, (a) to stimulate the supply side of the economy and (b) to lower the personal tax burden. In the first two years of the program all, 100 percent, of the tax reductions are targeted toward those areas where supply-side effects can be maximized. Only in the out years, 1983 and 1984, are there reductions in personal tax rates, which are a very large part of the President's tax proposals, because it will not be until that time that productivity can be expected to rise more rapidly so that we can afford those kinds of tax cuts.

The business tax cuts are front-loaded, not phased-in gradually as in President Reagan's proposals. The 2-4-7-10 depreciation proposal was passed by the Senate Finance Committee last year. In addition I have proposed a reduction in the corporate tax rate from 46 percent to 40 percent beginning in 1983. This provides for an attractive future business climate and thus will have a positive effect on investment spending now.

A final point. For a long time the Federal Reserve has been the only anti-inflation game in town. These tax proposals, combined with substantial cuts in Federal spending, will establish the Federal Government as an equal partner in the anti-inflation battle. This will help to ensure against any rise in interest rates that would stifle the business tax and supply-side incentives which I have proposed. This measure is essential to protect those supply-side tax cuts.

The President's tax cuts are compared to our own in the next table.

[Fiscal years, in billions of dollars]

	1981	1982	1983	1984
President [1]	−8.9	−53.9	−100.0	−148.1
Hollings	−5.0	−21.4	−50.6	−71.7
Difference	−3.9	−32.5	−49.4	−76.4

[1] Includes individual income tax reduction and depreciation reform.

President Reagan claims to reduce the Federal deficit to $45.0 billion in FY 1982 and to

balance the budget in FY 1984. The Congressional Budget Office has analyzed his spending proposals and has found an additional $50 billion in spending in 1984 leading to a deficit of at least that amount. Revenues are probably lower as well but CBO has not yet completed its analysis.

FEDERAL DEFICIT (—)

[Fiscal years in billions of dollars]

	1981	1982	1983	1984
President	—54.9	—45.0	—22.8	0.5
CBO reestimates	—60.9	—67.5	—63.8	—48.5
Hollings	—58.9	—45.8	—30.9	----

Marriage Penalty: About 40 percent of married couples currently pay more income taxes than they would if they paid taxes as individuals. This proposal was adopted by the Senate Finance Committee last year. It grants a 5 percent tax credit against the first $30,000 of earnings of the lesser earning spouse. In 1982 this credit would be raised to 10 percent.

Arguments:

1. Focuses tax reductions on the supply-side by removing part of the disincentive to work of the secondary earner in the family.

2. Lowers the tax burden in such a way that supply is increased thus placing a moderating influence on inflation.

Interest and Dividend Exclusion:

This would raise the current interest and dividend exclusions of $200 for single returns and $400 for joint returns to $1000 for single returns and $2000 for joint returns.

Arguments:

1. Focuses tax relief on savings and thus the supply side of the economy.

2. Reduces the bias in the tax code that favors consumption.

3. Helps to provide the savings necessary to finance additional investments and hence growth in productivity.

Personal Rate Cuts:

The personal tax burden is rising due to inflation. This proposal would reduce personal tax rates by 5 percent beginning in 1983. This thus, partially, addresses the question of tax burden, but places the relief in 1983 when productivity has hopefully improved.

2–4–7–10 Depreciation:

This was proposed last year by the Finance Committee. This proposal classifies assets into five categories depending on their current useful life. The new tax lives for equipment are as follows:

Old tax lives:	*New tax lives*
6.5 years or less	2
7.0 years to 11.5 years	4
12.0 years to 16.5 years	7
More than 16.5 years	10

Structures would be depreciated over about 20 years, though there are a couple of options available. The investment tax credit would be changed as follows:

Old		New	
Tax lives	Credit (percent)	Tax lives	Credit (percent)
3 yr or less	0	2	2½
3 yr to 5 yr	3⅓	4	6
5 yr to 7 yr	6⅔	7	10
7 yr or more	10	10	10

Arguments:

1. Stimulus is front-loaded, put into effect immediately.

2. Stimulates investment and productivity growth.

3. Distributes benefits evenly across asset classes and does not distort the tax code as does the President's proposal.

4. Does not provide for benefits which are greater than immediate expensing as does the President's proposal.

Corporate Rate Reductions:

Corporate tax rates are to be reduced from 46 percent to 40 percent beginning in 1983.

Arguments:

1. This measure is an incentive to business to invest and will help raise productivity.

2. Provides for future tax relief. The profits made then from current investments will be taxed at a lower rate. This will stimulate investment now.

Mr. HOLLINGS. Mr. President, this proposal will not be presented now because under the rule it is not germane.

Mr. STENNIS. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HOLLINGS. I thank the distinguished chairman, the Senator from Mississippi.

Mr. President, these are only some of the areas in which I believe the Senate may be damaging its credibility by accepting the Reagan economic assumptions. Let us not fool ourselves into believing that by following the President's program we will be led out of the land of deficits and into the promised land of milk, honey, and budget surpluses. It will not be that easy.

Although the reconciliation instruction includes only total levels of savings to be achieved by each committee and does not require changes in specific programs, I am disturbed by some of the working assumptions used by the committee in arriving at the level of savings. Some of these assumptions are clearly shortsighted. In such areas as child nutrition, the cuts are pennywise and pound foolish. They may achieve short-range budget savings—they do so but only at the expense of greatly increased costs in other areas, such as education, health, and welfare in later years.

Rather than spending cuts, these reductions actually cause a spending increase in later years. This is not sound policy, either for the budget or the American people.

The committee also rejected a proposal to change cost-of-living adjustments to major retirement programs. My proposal would have changed the computation of the COLA's in three respects. First, it would annualize all Federal COLA's so that civil service and military retirees, who now receive COLA's twice a year would be treated the same as social security and veteran pensioners. Second, it would index all COLA's to the lesser of the increase in the Consumer Price Index or the National Wage Index to provide a measure of equity between workers and retirees. Third, it would pay all COLA's on October 1 to provide uniformity and make payments consistent with the October-September fiscal year. Together, these changes would save $8 billion in fiscal year 1982 outlays and save a total of $39 billion in outlays between fiscal years 1981 and 1986.

By rejecting this proposal, the committee has merely delayed the day of reckoning and made the task of reducing Federal spending all the more difficult. There is no doubt that we will have to face this question. I only hope we will have the courage to do so sooner rather than later.

Mr. President, while I have taken exception to some of the assumptions made by the committee and its economic base, I fully support the resolution itself and the level of savings it will achieve.

I commend President Reagan for submitting his budget reductions and giving emphasis to the economic affairs of the party politic. I particularly commend his Director of the Office of Management and Budget, Mr. David Stockman, for producing the presentations. We have had our differences in those presentations, but he has done a brilliant job in presenting the program to us clearly and cogently so that we could act on the reconciliation process on the floor of the Senate at an early date.

Major spending reductions are essential to restoring a sound fiscal program. Therefore, I reiterate I fully support the resolution itself and the level of savings it will achieve.

Further, the reconciliation process assures Congress that budget decisions are made with regard to both their overall macroeconomic effect and their consequences for specific programs and individuals. Given the magnitude of savings the Budget Committee is recommending, we need the fiscal coordination inherent in this process.

Reconciliation also sends a signal to the American people that the Congress is serious about its pledge to reduce Federal spending. It is the first of but a series of steps we must take to get spending under control, reduce inflation, increase productivity, and get our economy moving in the right direction to the benefit of all Americans.

Mr. President, I particularly want to thank and commend the staff of the Congressional Budget Office for their hard work around the clock. They have been working since last fall, and into the late evenings in the past several weeks, in order to get the economic and statistical information and data necessary for us to act as a Budget Committee.

I especially commend and thank the minority staff, our former majority staff. They are experts. They are still, in my opinion, the better informed of the groups who really worked on this budget. They have also been working on weekends and late evenings. They have done a magnificent job.

The resolution before us is in large part the result of the tireless efforts of our distinguished chairman, Senator DOMENICI. During the committee deliberations, which often ran late into the evening, he presided over us with fairness, yet always kept us moving toward our goal. Under his guidance, the committee recommended the largest savings bill ever reported in the Senate.

Senator DOMENICI's skill, his perserverance, his determination, and his willingness to coordinate, confer, and com-

municate has played no small part in achieving this result.

It has been a privilege and pleasure, really, to work with him.

I would notify the manager of the bill, I am ready to proceed. The distinguished Senator from Arkansas has an amendment and then our next amendment will be presented by Senator CHILES. I think if we work together, and not only notify each other but notify other Senators, we can keep this debate moving.

Mr. DOMENICI. I thank the Senator. We will move to a couple more opening statements on our side and then we will proceed to Senator PRYOR's amendment.

I would be remiss if I did not thank Senator HOLLINGS for his kind words. They are greatly appreciated. We could not have gotten here without his expert advice, diligence, and dedication that he has for the budget process. I believe the Senate knows that.

Mr. President, I now yield 5 minutes to the distinguished Senator from Wisconsin, the time to be taken off the resolution.

Mr. KASTEN. Mr. President, the time has come; the challenge is now. During the next few days this body has a chance to reverse the long trends of deficit spending and make a sincere effort to restore this Nation's economy.

I hope, Mr. President, that the Senate will pass the recommendations of the Senate Budget Committee overwhelmingly—thus signaling to the entire country that actions speak more eloquently than words. As a member of the Budget Committee I intend to support the reconciliation instructions before us.

It seems to me that the real danger we face during the next few days is whether we will chip away here and there, finally gutting the package to the detriment of our Nation's future.

I realize that some of the savings are difficult votes. They were difficult for me in the Budget Committee and they will be equally difficult here on the floor. But as a new Senator who faced the voters just a few months ago. I am convinced that an overwhelming majority of the American public wants cuts. They want them now.

Mr. President, during the past weeks we have listened to economists of nearly every persuasion. While they have disagreed on many aspects of the economic recovery program, it is safe to assert that they all agreed on one thing—that it would be difficult to cut too much money out of the budgets for fiscal year 1982 and fiscal year 1983. Cutting spending is what we are here to do. This is only the first step; what we do during the next 50 hours does not decide the outcome of the other important cornerstones of the President's program: First, tax cuts; second, regulatory reform; and third, a stable monetary policy. But moving toward a responsible fiscal policy now is a major step this body must support. Without this package of spending cuts, we jeopardize the hope, the chance, for economic recovery.

Whether our goal is to balance the budget, or to provide room for a tax cut, or both, we need these cuts. Few of us would agree on every proposed cut in this package, but we ought to agree unanimously on the need to slow Federal spending.

Many of us in the Budget Committee would have preferred even greater cuts, but we have reported a package which we believe can be supported by the full Senate.

I emphasize that the Budget Committee voted 20 to 0 for this package. I believe, Mr. President, that we ought to pass the full cuts with equal bipartisan support by the full Senate.

Mr. President, I commend the distinguished Senator from New Mexico, Senator DOMENICI, for his skillful efforts in putting together this package. I believe that Members on both sides of the aisle will agree that, during the committee's work, Senator DOMENICI was even-handed, fair, open, and candid.

I am sure that same kind of debate in the full Senate will lead us to reinforce our understanding and commitment to these spending cuts.

Mr. President, today we have an opportunity to take the first step in the long process of restoring prudent fiscal policies to our Government and restoring hope to the American people. This is an historic debate and challenge. What we do here may be the most important action of this session.

I thank the distinguished Senator for yielding.

Mr. DOMENICI. I yield time from the resolution to the junior Senator from Indiana.

How much time does the Senator desire?

Mr. QUAYLE. Two minutes.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. QUAYLE. I thank the distinguished chairman for yielding me time.

Mr. President, I support Senate Concurrent Resolution 9. The resolution, though simple in content, is a history-making document in the Federal Government's budget annals.

As the committee report states, this resolution encompasses the "most massive single reduction in Federal spending in the Nation's history." As a new Member to the Senate and to the Senate Budget Committee, I am pleased to join in this effort to bring the Federal budget under control.

This resolution contains $2 billion more in spending reductions than those proposed by President Reagan. The total spending reduction in this reconciliation recommendation is $36.4 billion. This is an unprecedented action on the part of Congress.

Why has Congress acted with such speed and diligence to undertake the review of Federal programs and find avenues for fiscal economy? The answer, Mr. President, is very simple. The Members of this body heard the voice of the people on November 4, 1980. The people are demanding that we reduce the growth of Government. The people are demanding that we lessen the involvement of the Federal Government in their lives. The people are demanding that spending be reduced and their tax burden lightened. We would be negligent, indeed derelict, in the holding of our public trust if we ignored the cries of the people.

But, cries are also heard that we are turning our backs on "social progress" made over the past 20, 30, or 40 years. Such statements are nothing more than attempts to continue in the same spendthrift way of the past 20, 30, and 40 years. The reductions proposed in this resolution would bring the total level of Federal spending at a larger level than any previous year. The Federal budget in fiscal year 1982 will be more than fiscal year 1981, and the fiscal year 1981 budget will be approximately $75 billion more than the fiscal year 1980 budget.

Between fiscal year 1979 and fiscal year 1981, the budget increased 32.7 percent, from $493.6 billion to an estimated $655.2 billion. The proposal before us now is a modest increase of 6 percent. We cannot continue to fritter away Federal dollars. Those dollars are the taxes the American citizens pay, the burden of which is increasing steadily.

In this resolution, we are not eliminating needed programs. We are restraining this growth in Federal spending. This restraint is an important first step in coming to grips with our declining economy. This turnaround in Federal spending is one of the significant realizations of the budget reconciliation process.

The Budget Committee has proposed target spending reductions. The committee has recommended ways to achieve these reductions but the details are left to the discretion of the individual committees. However, the budget process used enables Congress to look at spending reductions as a whole, rather than a piecemeal basis.

Finally, Mr. President, we must seek action on the total economic recovery package presented by President Reagan. First, are the spending reductions incorporated into this resolution. Second, are the needed reductions in the tax rates for individuals and accelerated depreciation allowances for businesses. Third, the heavy burden of Government regulation must be lessened, and fourth, the formulation of a steady and consistent monetary policy.

In Senate Concurrent Resolution 9, the Budget Committee has taken action to reduce the rate of growth in Federal spending. By recommending the consolidation of programs, the committee has voted on the side of efficiency and reduced regulation. It is important that we pass this resolution, Mr. President. The American people are wanting to see action.

Mr. President, I commend the distinguished chairman of the committee, Senator DOMENICI, on the way he forcemarched us to the $36 billion reconciliation process in a very steady and deliberate manner. I feel that his leadership on this subject was with a great deal of foresight and a great deal of intent, and certainly the outcome was historic in nature.

I should like to point out a couple of things. First of all, during those 3 days of debate and markup of the budget process, we heard all sorts of complaints. We heard statements that this was un-

doing 30 years of social legislation in 3 days. We heard statements that this was the most regressive act that Congress or a committee has taken ever. We heard statements that this reconciliation motion was Robin Hood in reverse, that we were taking from the poor and giving to the rich. We heard statements that this was really taking it out on the backs of the poor, that this was a despicable act that the Budget Committee or Congress was about to take.

Mr. President, as has already been noted and reported, the vote of the Senate Budget Committee was 20 to 0. The vote of the committee is very interesting, because with all those accusations having been stated against the Budget Committee and the budget reconciliation process, one would have thought—commonsense every once in a while prevails around this place—that perhaps one Senator would have voted against that reconciliation motion. The fact is that when the final count was taken, no one was willing to vote against any kind of spending reductions.

I submit for the record that the reason why no one was willing to vote against it was that the message of the electorate that we all heard last November is perhaps still reverberating in the ears of many Senators and Representatives.

So I applaud my chairman for his leadership.

Mr. HATFIELD. Mr. President, there has been ample discussion of this reconciliation instruction resolution in the past few days. Both parties have caucused on it, and members of both parties are aware of what this resolution does and how it does it. So I will be brief.

This resolution is fundamentally flawed in three respects. First, it fails to adequately address the problem of so-called uncontrollable Federal spending—that portion of the budget driven by entitlement programs and other payments mandatory under the law. Senator SCHMITT, the chairman of the Labor, HHS, Education Subcommittee of Appropriations, and a Senator well acquainted with entitlements and other transfer payments to individuals, addressed the Senate on Monday and gave an excellent exposition of what is and what is not controllable in the Federal budget. He pointed out that in a Federal budget of nearly $700 billion, only $75 billion can be considered truly discretionary money that can be moved from one program to the next, spent here or there, in response to changing national needs.

The rest of the massive Federal budget is straitjacketed into entitlement programs, interest payments, and indexation schemes that compound our problems rather than relieve them. When inflation rises and we wish to restrain Federal spending, we cannot do so because indexed transfer payments increase. When unemployment increases, unemployment compensation gobbles up a greater percentage of the budget, consuming money that could be used to stimulate investment and revitalize the economy. And all the while discretionary programs get squeezed out from under the ceiling we impose, and Members wonder where all their favorite programs went.

Mr. President, those discretionary programs have not caused the problem of runaway Federal spending, and cutting them will not solve it. The Appropriations Committee funds those programs, and for 36 of the last 37 years our committee has appropriated less money than requested by the President. I am not making a special plea for appropriations. I am only saying that when we are suddenly confronted with a reestimate of spending much higher than we hoped, the cause will be entitlements and indexed programs, not ones funded in bills reported to this body by the Appropriations Committee.

To the extent this resolution does not address entitlements and indexation, it fails to address the fundamental problem of spending. It does not make sense to have the ax fall on programs over which Congress has most control, and protect those over which it has little.

There is one discretionary program that has apparently escaped the ax—defense. That is the second fundamental flaw of this resolution. The administration plans to more than double the Pentagon's $171 billion annual budget to $368 billion in fiscal 1986. For fiscal 1982 alone, budget authority would rise $25.8 billion. That increase in defense authority consumes more than 50 percent of the decrease in some 300 Federal domestic programs that the Budget Committee has instructed other committees of the Senate to carry out.

In his recent state of the Union speech, President Reagan rightfully decried the mounting Federal deficit which is approaching $1 trillion. He illustrated how large a sum this was by saying it constituted a stack of thousand-dollar bills 67 miles high. It might be pointed out that a similar stack equal to the Reagan defense expenditures in the next 5 years would reach 100 miles high.

This enormous commitment to weapons and personnel poses profound questions, and some potentially enormous dangers.

Mr. President, I fear we are ignoring an excellent chance to build a more efficient Defense Establishment. Instead, we have fallen prey to the same mistakes we have made with social problems. They cannot be solved just with sums of money. But we are asked to spend huge sums on this problem while entitlements increase and discretionary programs dwindle. And Members will wonder where all their favorite programs went.

Finally, Mr. President, I will reiterate my belief that this resolution, in forcing authorizing committees to lower authorizations so as to reduce appropriations in fiscal year 1982 and fiscal year 1983, does violence to the Budget Act and the comity of the Senate. The technical parliamentary problem has been solved, but we know the practical effect will be the same, and we know what it does to committee jurisdictions.

The statement of the managers on the conference report on the Budget Act reads in part:

> It is intended that the authority to prescribe "any other procedure which is considered appropriate to carry out the purposes of this Act" applies only to the specific procedures for the enactment of budget authority and spending authority legislation for the coming fiscal year and not to the jurisdiction of committees, the authorization of budget authority, or to permanent changes in congressional procedure.

Yet this resolution does intrude on committee jurisdiction, and it does address authorization of budget authority.

We have had President Reagan's fiscal year 1982 budget for 2 weeks. No committee has held detailed hearings on it. How do we know now that it is necessary and proper, for example, to reduce energy programs by $3.7 billion in fiscal year 1982 and by $3.6 billion in fiscal year 1983? In 2 weeks or so we will be considering the first concurrent resolution on the fiscal year 1982 budget. Let us set the ceiling as low as we like, as low as the President wants, and then let our individual committees make the decisions necessary to achieve that goal. I know Appropriations can do it—we have for 36 of the last 37 years. I am confident my fellow Republican chairmen and the new leadership of the Senate can do it, too.

Do we not have the discipline? Do we really need this resolution to chain us to our desks so we do not make a raid on the Treasury? I do not think so, Mr. President.

I support the President's program. I do not support achieving it in this way.

Mr. ROTH. Mr. President, I would like to discuss briefly the Senate Budget Committee's report on the revised second concurrent budget resolution. In particular, I would like to review for just a moment the language in the report directing the committees to consider revisions in their programs which would increase the flexibility permitted to State and local officials in managing their Federal aid funds.

I have long been concerned that our federal system of government is becoming overburdened with unnecessary regulation, high administrative costs and needless complexity. These problems are a result, to a large degree, of the chaotic Federal aid system which consists of too many narrow categorical programs and is ensnared in a web of crosscutting regulations, mandates, and other Federal directives.

When I was first elected to Congress in 1966, I was astounded at the lack of sound, basic management data concerning assistance programs within the Federal Government. Well over a thousand assistance programs were in existence and the President's management arm, the Bureau of the Budget did not have the foggiest notion where the programs were, who was eligible for which programs, and what types of assistance were in existence. I was able to pull together this information, after months of work, and published in 1969 the Roth Catalog of assistance programs. This catalog was the forerunner of the present-day Catalog of Federal Domestic Assistance, the primary information source on assistance programs today.

It was incredible to me that even Fed-

eral managers could not tell me what Federal assistance programs were available. Yet, the complexity of the system, the almost unfathomable regulations and requirements and the incredible number of recipients involved in assistance programs helped make it difficult for Federal officials to cope with the maze of programs.

If Federal agencies have had a difficult time grasping the Federal aid handles, it is easy to see how State and local governments have become mired in the sticky quagmire of assistance applications, compliance reports, audits, and accounting procedures which encircle Federal assistance funds. Approximately 60 crosscutting requirements are currently attached to a wide variety of assistance programs.

Each of these requirements is implemented through a series of specific regulations issued by each assistance agency, each in its own, individual way. Some grant programs are so burdensome to administer that State and local taxpayers end up paying extra money for the aid their jurisdictions receive. One study found that in a selected number of Government programs, up to $25 per capita was spent by local governments to administer and accept certain Federal programs.

One of the President's grant consolidations illustrates perfectly the burdens the existing categorical system imposes on State and local governments. The roughly 40 programs proposed for a new health and social services block grant currently encompass 437 pages of law and 1,200 pages of regulation. These 40 programs now are sent out in 6,800 separate grant awards to approximately 24,000 grant recipients. Over 7 million man-hours of State and local government effort, supported by local tax funds, are used just in filling out federally required reports for these programs. In addition, 3,300 Federal employees are paid to administer these separate, categorical programs.

Mr. President, this one example illustrates the unbelievable complexity of the system and reveals quite clearly the rigid, overregulated nature of the existing grants system. President Reagan's consolidation proposals will help reduce some of the redtape and controls over State and local governments. Even if all nine consolidations are approved, however, some 350 to 400 aid programs, most with their redtape and regulations untouched, will still remain. A 20-percent reduction in the aid programs proposed for consolidation will squeeze local governments between the rock of reduced funds and a hard place of the remaining rule-encumbered grant programs.

I support, in general, the President's proposed reductions. But in making such cutbacks, we must insure that State and local recipients are allowed to effectively alter their priorities and use Federal funds to address the needs of their taxpayers more adequately. I agree with the President that we must shift more authority for programs and functions to State and local governments. We cannot, however, shift functions to State and local governments, reduce resources, and continue to burden lower levels of government with the rules and regulations of the categorical aid system.

We can and must do more to streamline the assistance system and I agree with the Budget Committee that along with the budget reductions proposed by the committees, greater flexibility must be built into the Federal aid process wherever possible. Several weeks ago, I met with several of the Governors representing the National Governors' Association. They discussed with me their concerns that budget cutbacks in assistance programs can be absorbed effectively only if States and localities are free to establish their priorities and use assistance programs to better meet the needs of their citizens.

As a result of that meeting, I asked that the National Academy of Public Administration convene a panel of experts to review this issue and recommend methods of easing the hammerlock of grant regulations. The language adopted by the Budget Committee in its report broadly reflects the recommendations of the Academy and I am pleased to support the committee's efforts on this vital matter.

I commend the chairman of the Budget Committee, the distinguished senior Senator from New Mexico, the distinguished ranking member of the committee, the junior Senator from South Carolina, and the other members of the committee for their efforts in this matter. I believe it is vitally important and hope the authorizing committees will work diligently to implement the recommendations contained in the Budget Committee's report.

GASOHOL PROJECTS

Mr. BOSCHWITZ. Mr. President, I have discussed this matter with Senator DOMENICI, and do not believe we will have to take up much of the Senator's time.

Several of my colleagues and I are concerned that included in the proposed rescissions for fiscal year 1981 is the loan guarantee funding for 15 gasohol projects already approved by the Department of Energy. These projects were authorized under title II of the Energy Security Act, which established a national gasohol program.

The Department of Energy selected these 15 projects out of the 57 applicants, and has completed final negotiations.

I ask unanimous consent that a list of these projects be included at this point in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

DOE ACOHOL FUEL FUNDING

Companies selected:

1. New Energy Company of Indiana.
2. Circle Energies Corporation (Kansas).
3. U.S. Ethanol Corporation (Louisiana).
4. Michigan Sugar Company.
5. Minnesota Alcohol Producers.
6. Grain Fuels Inc. (Pennsylvania).
7. Energy Conversion Corporation (South Carolina).
8. Gulf Coast Resources (Iowa).
9. Agrifuels Refining Co. (Louisiana).
10. D. W. Small & Sons, Inc. (Maine).
11. Agri Power, Inc. (Michigan).
12. American Development Corporation (Nebraska).
13. Andco Energy Corporation (New York).
14. J. E. Serrine Company (South Carolina).
15. Tennol Inc. (Tennessee).

Mr. BOSCHWITZ. Mr. President, a February 3 letter signed by 19 Senators to the Secretary of Energy said that—

It was the intent of Congress in authorizing and appropriating these funds that worthy projects would be selected and awarded as expeditiously as possible.

I emphasize "expeditious" because it certainly was not expeditious for the Department of Energy to encourage these projects to go through the final negotiations and line up private investment in these projects, which amounts to about $10 million, and then to back off on the final loan guarantee commitments.

I ask unanimous consent that the letter from the 19 Senators be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., February 3, 1981.

Hon. JAMES B. EDWARDS,
Secretary of Energy,
Washington, D.C.

DEAR MR. SECRETARY: We are, like you, committed to reducing this nation's dangerous dependence on foreign sources of oil as quickly as possible. We strongly believe that, if we are to be successful, the United States must develop a diversified energy supply system, and employ a wide variety of technologies and feedstocks. Of all the domestic alternatives now under consideration, the production of alcohol fuel from biomass has significant near-term potential for contributing to the nation's high grade liquid fuel needs.

As you are aware, the Congress recognized this important potential of alcohol fuels in passing the Energy Security Act, Title II of which authorized the awarding of loan guarantees for alcohol fuel production of these funds for a total of approximately $1.2 billion (the equivalent of what the U.S. spends in five (5) days on oil imports). To date, fifty-seven applications have been filed, and sixteen firms have been invited to negotiate on final guarantees. Consequently, there remains both a significant number of worthy projects interested in applying for funding in a new solicitation and substantial amount of funds remaining to be obligated.

Mr. Secretary, it was the intent of Congress in authorizing and appropriating these funds that worthy projects would be selected and awarded as expeditiously as possible so that construction could begin and the "first generation" of alcohol fuel plants could begin commercial operation. The goal of maximum private sector participation is one we all share, but loan guarantees are necessary at this stage in order to bridge the psychological risk factor that still remains with respect to alternative energy projects. With the completion of these "first generation" facilities, full participation by the financial community will follow.

The loan guarantee program is not a subsidy, but an important investment in the nation's energy future. At a time of increasing uncertainty and instability in the world's oil producing regions, it is even more critical than ever before that we put our words into

action. For this reason, we respectfully urge that you: (1) expedite the current negotiations so that commitments can be made as soon as possible and project construction can begin; and (2) promptly announces a new solicitation to commit the remainder of the loan guarantee funds for commercialization of alcohol fuel production.

Thank you in advance for your consideration of this request.

Sincerely,

Bob Dole, James A. McClure, Larry Pressler, Charles A. Grassley, Strom Thurmond, Charles H. Percy, Rudy Boschwitz, David Durenberger, Wendell H. Ford, Quentin N. Burdick, Max Baucus, J. Bennett Johnston, John Glenn, Gary Hart, Walter D. Huddleston, John Melcher, Edward M. Kennedy, Howard M. Metzenbaum, Lloyd Bentsen, U.S. Senators.

Mr. BOSCHWITZ. Mr. President, there has been some controversy lately concerning the economic feasibility of gasohol projects, and although I do not want to get into that matter at this point, I believe that funding and going forward with these 15 projects could help us in assessing the viability of future projects.

I am hesitant to bring up this issue on the floor, and have decided not to offer an amendment at this time, because I do not want to detract from the reconciliation bill. I support that measure wholeheartedly.

I am bringing this up because I would like to clear up any confusion that may exist as to the action of the Budget Committee.

At the time the committee considered this matter, we had two motions pending before us; one, by Senator QUAYLE, would have eliminated the rescission for the 16 loan guarantees, and one, by Senator KASSEBAUM, would have cut an additional $3 billion from the strategic petroleum reserve.

Unfortunately, because of Budget Committee procedures, Senators were forced to make a choice between these two measures. So Senators who supported the $3 billion SPRO cut had to vote against Senator QUAYLE's motion to fund the gasohol projects.

I believe, though, that had the motions been combined, most Senators would have supported the gasohol loan guarantees.

I feel comfortable in urging funding for these projects because this is for loan guarantees only. It does not affect at all outlays in fiscal year 1981, fiscal year 1982, and fiscal year 1983.

To fund these projects would require $270 million in BA in fiscal year 1981 only.

I would like to urge the Energy Committee and the Appropriations Committee to examine these 16 loan guarantee projects and to try to include funding if possible. I believe there was an implicit commitment made by the Government to these 15 projects, and we should make an effort to comply with that commitment.

Thank you, Mr. President.

Mr. RIEGLE. Mr. President, I share the concerns of my friend, Mr. BOSCHWITZ, about the reductions in the alcohol fuels program. I think that we are finally at the point where alcohol fuels can have a substantial impact on our energy supply problem, but this will never occur in the absence of Federal support.

We have the technology, the capacity, and the interest to make gasohol a success. Farmers in my State of Michigan are enthusiastic about the prospects of opening another market for their products. Unfortunately, it is still difficult to attract the necessary private financing to construct alcohol facilities on a scale that will allow us to reach the billion-gallon goal within the decade.

Michigan has been very active in this area, and we have several plants under construction. These plants were made possible through USDA support, both technical and financial. I know of at least four more plants in Michigan that are planned, and have received initial approval from the Department of Energy, but which suddenly had all Federal financial support withdrawn and now their future is in jeopardy.

Banks are reluctant to back gasohol projects due to their relatively low level of experience with ventures of this type. I have spoken with numerous bankers in Michigan and have found agreement on the point that, for the time being, the Government would have to assume some of the risk in gasohol ventures. Once we have a number of plants built and operating, the private financial markets can supplant the Federal role. I reiterate, however, that the Federal participation is a necessary link in the effort to make gasohol the commercially viable industry that the administration envisions.

Farmers and consumers are confused about this proposal to reduce Federal support for gasohol. Many people have spent time, energy, and huge personal sums to develop plans for gasohol projects. This activity has been predicated on the notion that Federal loan guarantees would be available to facilitate negotiations with private lenders. Now the Federal Government is telling farmers that their investment is for naught, unless banks can be convinced to loan the money without a Federal guarantee. This borders on a violation of a promise or commitment to gasohol proponents, especially in the case where DOE had given provisional approval for a facility.

Consumers now have no idea where the Government stands on gasohol. The Energy Security Act contains specific allotments for gasohol financing, but that is now withdrawn. Does this indicate a lessening of our commitment to alternative fuels production in this country? Given the fact that the funds are, in part, being transferred to the synthetic fuels projects, one would have to conclude that we no longer feel that gasohol is a viable energy source. This contradicts everything that we have stated and enacted in recent years, and confirms the belief that the United States has no coherent energy policy.

Gasohol has great promise, not only for farmers but for consumers and for the economy, in general. I have recently received a report describing the employment benefits that we will realize from the gasohol program. Entitled "American Jobs From Alcohol Fuel," by Employment Research Associates, the report estimates that a 6-billion-gallon gasohol industry would create 960,000 jobs. I ask unanimous consent that the report be printed at the end of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. RIEGLE. Mr. President, I hope that the administration will rethink its policy with respect to gasohol, and that the Congress will continue its position of strong support for the development of alternative, renewable fuel sources.

EXHIBIT 1

AMERICAN JOBS FROM ALCOHOL FUEL

(By Marion Anderson and Carl Paris)

INTRODUCTION

The production of fuel alcohol is needed now. Since we are currently importing almost half of the oil which we use, our fuel supply is vulnerable to upheavals, wars, or changes of leadership in the major OPEC nations. Our industry, our transportation system, and our national security have become dependent on a steady flow of liquid fuel. Some countries have few alternatives. They have neither the technology nor the feedstocks to create another supply of fuel. But we do.

Alcohol fuel is not a new idea. Henry Ford designed cars to run on either gasoline or alcohol. But as we became a major oil producer, and the price of foreign oil remained low, there seemed to be no need to develop sources of supply from our abundant renewable resources. So until the mid 1970's, the concept of making alcohol fuel from biomass languished.

After the first Arab oil embargo, the writing on the wall became clear. Alternatives would have to be developed. Nuclear power has many opponents and provides no liquid fuel. Synfuels from coal or oil shale are environmentally questionable and cannot be operational for a decade. Alcohol fuel from biomass can be put into production immediately as both the technology and the feedstocks are available.

In this report, we explore the economic impact of investing $12 billion between 1981–1986 to build plants capable of producing 6 billion gallons of fuel alcohol.[1] Over two-thirds of the production will come from grains, especially from corn. The other one-third will come from sugar crops, cull potatoes, biomass wastes and municipal solid waste.

In order to do this analysis, we developed an economic model of the fuel alcohol industry. This model was used in conjunction with Input/Output tables developed by the Bureau of Labor Statistics. The first part of the model dealt with the jobs generated during the period of construction of the alcohol fuel plants. Both the construction jobs and the industrial jobs generated were included. The second part of the model detailed the jobs generated by the operation and maintenance of the plant itself. These jobs would be ongoing as long as the plants were in operation.[2]

In creating this economic model, we relied on data developed by Raphael Katzen Associates. Their data delineated the equipment needed to construct alcohol fuel plants of 10 million and 50 million gallon annual capacity. Although a number of smaller and probably larger plants will be built, the job generating impact of producing them would be similar to plants in the 10–50 million gallon range.

It is important to note that the development of the alcohol fuel industry will bring healthy economic growth. The product is

[1] If this fuel alcohol (ethanol) is mixed with gasoline in a 1:9 ratio to produce gasohol, approximately 60 percent of U.S. liquid fuel consumption would be in the form of gasohol.

[2] Throughout this report, dollar figures are in 1980 dollars, and "jobs" means person-years of work.

badly needed. It would provide real jobs—needed jobs—within the society, and the capital investment would be widely dispersed in both agricultural communities and industrial centers.

The $12 billion invested in this industry would save $9.6 billion year in and year out from being exported to OPEC.[3] The money would stay here, the jobs would stay here, and our country would benefit both by becoming stronger economically and by being less prone to engage in wars to protect the sources of the liquid fuel which we want.

This initial investment in producing alcohol can be a significant step towards obtaining a major portion of our liquid fuel from our own renewable resources. For within a few years, improved technology will be available for the production of billions of gallons of alcohol from waste paper, forest waste, wood, agricultural residue, and other products which contain cellulose.[4]

CONSTRUCTION AND INDUSTRIAL JOBS CREATED—409,000

Hundreds of thousands of new jobs will open up in the economy when the move is made to produce major quantities of ethanol. Many of these jobs will be in industries which have been hard hit by the sustained inflation and recession.

TABLE I.—*Jobs generated with a $12 billion investment in ethanol plant construction*

(Dry Milling)

Industry	*No. of Jobs*
Construction	159,970
Fabricated structural metal	60,090
Miscellaneous professional services (engineering)	20,550
Basic steel and blast furnaces	15,930
Other fabricated metal products	11,360
Wholesale trade	8,810
Miscellaneous business services	7,900
Retail trade	5,270
Service industry machinery	4,720
Truck transportation	4,700
General industry machinery	4,270
Cement and concrete products	3 510
Electric transmission equipment	3,340
Special industry machinery	2,580
Electric lighting and wiring	2,570
New highway construction	2,530
Primary aluminum and aluminum products	2,300
Iron and steel foundries and forgings	2,060
Wooden containers	1,880
Scientific and controlling instruments	1,820
Machine shop products	1,710
Primary copper and copper products	1,190
Millwork, plywood and other wood products	1,190
Electrical industrial apparatus	990
Miscellaneous stone and clay products	830
Material handling equipment	740
Farm machinery	650
Household appliances	630
Typewriters and office equipment	520
Computers and peripheral equipment	450
Hotels and lodging places	390
Sawmills and planing mills	350
Electronic components	250
Heating apparatus and plumbing fixtures	240
Metal working machines	230
Construction, mining and oilfield machinery	210
Stone and clay mining	170
Logging	120
All other	72,020
Total job gain	409,000

[3] When oil is at $40 a barrel.

[4] The cellulose in these products is broken down into sugars which are then made into alcohol.

Construction jobs—160,000

Erecting $12 billion worth of alcohol fuel plants in five years constitutes an enormous amount of construction. It will require 160,000 person-years of labor.

The plants themselves will be widely dispersed throughout the United States. This dispersal is possible for two reasons. First, because the feedstocks are varied and thus are not confined to one geographical region. Second, because alcohol fuel plants do not require an enormous initial investment for each plant as do nuclear or other very high technology plants. Therefore, the plants and thus the construction jobs will be widely dispersed throughout the country. Every section of the nation would gain jobs from this industry.

Large and medium sized cities will be erecting municipal solid waste plants. Farm communities in the corn belt will build alcohol plants with corn and agricultural residues as feedstocks. States in the deep south can use grain sorghum, and states producing sugar cane can use the cane as a feedstock and burn the bagassee (the cellulosic pulp) to fuel the plant. Florida and California will construct plants running on citrus waste. Michigan will have plants utilizing fruit wastes. Maine and Idaho can have potatoes and possibly wood chips for their feedstocks. Washington, Montana and other wheat growing states will be able to use wheat as their feedstock. Wisconsin and other states with important cheese processing industries can build plants using cheese whey for processing to ethanol.

Industrial jobs—210,000 jobs

About 210,000 jobs will be generated in the many industries needed to produce $12 billion worth of alcohol fuel plants. The equipment needed for alcohol fuel plants includes tanks, pumps, drums, conveyors, condensers, cookers, pipes, agitators, heat exchangers, boilers and valves.[3] The jobs gained during the production of these items and other necessary equipment would be dispersed throughout the country as a large variety of skills and industries will be involved.

The primary metal industries would gain over 21,000 jobs. Almost 16,000 jobs would be in basic steel and blast furnaces. About 1,200 jobs would be in copper, 2,300 in primary aluminum and aluminum products, and 2,060 in iron and steel foundries and forgings.

The metal fabricating industries would gain about 90,000 jobs. Fabricated structural metals would gain over 60,000 jobs. There would be over 11,000 jobs for people in other fabricated metal products. Special and general industry machinery and machine shop products would have over 8,500 more job opportunities.

There would be about 3,600 jobs generated in the wood industries. These would include jobs in logging, sawmills, and the manufacture of wooden containers.

Services, truck transportation, wholesale and retail trade—39,000 jobs

A substantial number of jobs would open up for the people in the services sector of the economy. Over 20,000 of these jobs would go to engineering firms since there would be extensive design and construction work in the building of alcohol fuel plants.

OPERATION AND MAINTENANCE JOBS CREATED—71,000 JOBS

The operation and maintenance of the alcohol fuel plants at a 6 billion per year level of production will require 31,800 people. This averages about five direct jobs per million gallons of alcohol produced.[5]

A substantial number of jobs will be needed in the supporting industries. Over 39,000 jobs will open up in truck transportation, wholesale trade, food products for yeast production, industrial and inorganic chemicals, coal, electricity and gas.

TABLE 2.—*Jobs Generated Annually From Operating, Maintaining and Supplying the Alcohol Fuel Plants*

	Jobs
Personnel for plant operations	31,800
Food products (yeast)	300
Industrial, organic and inorganic chemicals (enzymes)	600
Truck transportation	8,380
Wholesale trade	7,010
Coal, electricity, gas	8,880
Other	13,970
Total jobs gained	70,940

The jobs, both in the operation of the plants and in the industries which supply them, will be steady, on-going jobs.

These estimates are conservative since we did not factor in any of the jobs generated on-farm from growing and harvesting the crops. Nor did we factor in any increases in the sales of farm machinery as farmers' incomes rise as their crops become more profitable.

FEEDSTOCKS

The production of ethanol is an essentially simple chemical process which has been practiced for centuries. Alcohol fuel production involves the fermentation of sugars carried out by yeasts, and the subsequent separation of the alcohol from water via distillation. Starchy substances must first be broken down into sugars by the action of certain enzymes. This process converts only the starches and sugars into alcohol and leaves the proteins and minerals intact.

The raw materials—the feedstocks—which may be converted to ethanol in this way include a wide range of agricultural and waste products, most of which are readily available today. These include wastes such as cheese whey, municipal solid waste (MSW) and food processing wastes, as well as certain grains and sugar crops.[6]

During the next several years, we can expect to witness the introduction of certain crops grown specifically for their high starch or sugar content and for their high biomass yield per harvested acre. Crops such as sweet sorghum, fodder beets, and Jerusalem artichokes are being thoroughly tested and refined in universities, laboratories and farms across the country. These crops hold the promise of dramatic increases in ethanol production in the years to come.

An estimate of the potential ethanol output from various feedstocks is presented below (Table 3). The 6 billion gallon total, which forms the basis of this study, is an ambitious goal—but neither unrealistic nor unattainable. Estimates of potential output by the mid 1980's have been as high as 50 billion gallons, as suggested by the Center for the Biology of Natural Systems, in St. Louis, Missouri.

TABLE 3.—*Feedstocks for 6 billion gallons of ethanol production*

(Anhydrous ethanol)

Feedstock	*Millions of gallons*
Corn	3,500
Wheat	400
Grain sorghum	500
Industrial potatoes, sugar beets, fodder beets	300
Sweet sorghum, high energy sorghum	250
Sugar cane	250
Citrus waste	100
Other food waste	150
MSW	220
Cheese whey	80
Waste wood, agricultural residue	250
Total gallons produced	6,000

[5] This figure will vary substantially depending upon both the size of the plant and the level of automation.

[6] The high protein residues are primarily from the grains.

These figures are approximate. If certain crops which have a high alcohol yield come into production soon, the feedstock mix would probably be modified. Similarly, municipal solid waste (MSW) could provide much more than the estimated 220 million gallons if additional plants were constructed in just a few U.S. cities.

Grains

Corn, grain sorghum, and wheat are the most important grain feedstocks. Of the estimated 6 billion gallons of production, 4.4 billion gallons will come from these three sources. Corn will provide the feedstock for the bulk of the output. Of the three grains, it is the most plentiful, the most widely dispersed geographically, and has the highest alcohol yield per acre.

A total output of 3.5 billion gallons of ethanol would require approximately 1.4 billion bushels of corn. In terms of 1979 production, this represents about 16% of the total U.S. corn crop.[4] Almost 90% of the corn crop goes to feed animals in the United States, Western Europe, and Japan. Converting a portion of the corn to alcohol, and using and exporting the distillers dried grain (DDG) as a feed supplement, will permit us to maintain the protein requirements of livestock, and at the same time provide us with billions of gallons of liquid fuel.

At present, there are two major grain-to-ethanol processes: dry milling and wet milling. The dry milling process produces an average of 2.5 gallons of ethanol and approximately 17 pounds each of DDG and carbon dioxide from one bushel of corn. Wet milling results in a wider range of co-products, including: corn gluten meal, corn gluten feed and corn oil, along with the ethanol. The initial investment is higher for the wet milling process but, the co-products are of greater financial value.

Although some critics have argued that high levels of alcohol production might have a destabilizing effect on grain prices, a report by the Solar Energy Research Institute concludes:

The binding constraint on alcohol production will be distillation capacity, not feedstocks. The deflationary effects of joint feed products outweigh the inflationary effects on corn and wheat prices at high levels of alcohol production. From a logical perspective, this result is unremarkable and unsurprising. Any increase in the processing of a commodity (the starch) to be converted to a useful product (such as fuel) while leaving the other portions of the commodity in a more useful form than they were previously (the protein) must increase the value of that commodity relative to others.

Sugar crops

Sweet sorghum, sugar beets, and sugar cane are the major sugar crops to be used as ethanol feedstocks. The six billion gallon scenario envisions a significant increase in sugar crop production. The advantages of using sugar crops include lower processing costs[7] and high alcohol yields per acre of harvested crop. However, the raw material costs are relatively high. In the case of sugar cane, the bagasse (the cellulosic pulp that remains after the juice has been extracted) may be burned to fuel the alcohol plant, yielding considerable savings in fuel costs. It has been estimated that bagasse could provide up to 160 percent of the energy required by a sugar cane-to-ethanol plant.

However, the by-products of these sugar crops contain almost no protein and are thus less valuable than those of grains. This must be taken into consideration in any rational alcohol fuels program to ensure that higher alcohol production does not take place at the expense of protein requirements.

[7] Since the fermentable sugars are already in a usable form, the saccharification stage of grain processing (which converts the starches to sugars) is avoided.

Other feedstocks

High energy sorghum is a hybrid of sweet sorghum and grain sorghum. It has a higher sugar content than grain sorghum, and also provides a high protein residue which sweet sorghum lacks. High energy sorghum is a promising feedstock which could come into production within the next several years, provided that a vigorous planting program is pursued.

Fodder beets, a relative of sugar beets, may prove to be an even more valuable alcohol fuel feedstock. Alcohol output from fodder beets can be as high as 900 gallons per acre. This is three and one-half times as great as the average yield from corn.

Waste products

Cheese whey, a waste product of the cheese processing industry, is a serious water pollant. Manufacturers are often required to to process and purify the whey at their own expense in order to minimize environmental damage. The potential exists to recoup some of these costs through the conversion of the whey into ethanol, thus converting a portion of the waste product into a valuable fuel. Due to its high moisture content and the resulting high transportation costs, cheese whey-to-ethanol facilities would be most economically situated near several cheese processing plants.

Citrus wastes and other food wastes could make an important contribution to ethanol production. However, these wastes tend to be seasonal, and would be most useful in a multiple feedstock situation—supplementing other, continuously available feedstocks.

Waste wood including bark, twigs, leaves, and paper processing wastes, and agricultural residues such as corn stover and wheat straw will become increasingly attractive feedstocks as ongoing research makes the conversion of these and other cellulosics to alcohol more economically feasible. The potential ethanol output from these feedstocks is many times greater than is indicated in this 6 billion gallon scenario. The National Alcohol Fuels Commission places potential output from cellulosics at 4.7 billion gallons a year by 1990.

A major portion of the contents of municipal solid waste (MSW) can be successfully converted to alcohol. Since MSW disposal is frequently very expensive for cities, the feedstock can be obtained either at no cost or at negative cost. As Fuel Alcohol, the final report of the National Alcohol Fuels Commission says:

"It is a potentially appealing source of alcohol. About 65 percent of municipal solid waste is cellulose, the basic ingredient needed to produce alcohol from that source. Conversion of the usable cellulose fraction of these wastes to alcohol could help to alleviate an environmental problem by giving economic value to the wastes. A further attraction to converting municipal waste, both solid waste and sludge, to ethanol or methanol is its wide distribution in urban areas. Alcohol from urban wastes could supply fuel for city populations and complement the alcohol fuel produced by agricultural or forestry products in rural regions.

Gasoline consumption and solid waste generation are both functions of population size. A correlation also exists between regions receiving imports of crude oil and petroleum products, population size, and municipal waste production. Regions that receive 90 percent of the imported oil generate 80 percent of the waste. Hence, alcohol made from urban waste in the most populous parts of the country could displace imported oil where it is most needed."

Larger cities, particularly those in the midwest and northeast which have experienced waste pollution problems, fiscal crises and liquid fuel shortages, could find considerable relief by converting their MSW to alcohol.

IS THERE A CHOICE BETWEEN FOOD AND FUEL?

One of the criticisms levelled at producing fuel alcohol from grains, is that its production implies a tradeoff between food and fuel. Therefore, the question to be addressed is whether the production of alcohol from corn and other grains decreases the world's supply of needed foods.

The world has an oversupply of starch and an undersupply of protein. In the grain distillation process, only the starch in the grain is converted to alcohol. During the process of fermentation, yeast is added. The residue of the distillation process, the distillers dried grain, contains not only the protein that was originally in the grain, but also the protein from the yeast. Therefore, the distillers dried grain is higher in protein than was the original ear of corn.

After distillation, the protein from the grain is more accessible to poor nations. For when the starch and liquid are removed from the grain, the bulk is reduced by two-thirds. Instead of poor nations paying expensive freight charges on three shiploads of grain, they have to pay for only one shipload of the protein rich supplement.

The distillers dried grain has been shown to be an even more nutritious cattle feed supplement than that which livestock are currently being fed. The DDG is not only good for animals; research done under a National Science Foundation grant to the University of Nebraska indicates that the protein could be extracted from the DDG and used as a human food supplement. This could be an important new source of protein for human beings.

A good deal of every grain crop is wasted annually because it is diseased, or in the case of potatoes, undersized. This portion of the crop could be used for alcohol production and would represent an important net gain of income for farmers, when as unsaleable crops get turned into fuel alcohol.

CONCLUSION

Investing $12 billion during the next five years in the production of fuel alcohol would yield rich dividends for our society. It would show that we are serious and committed in moving towards the production of liquid fuels from our own renewable resources. We have the technology to do it and we have the feedstocks.

A $12 billion investment is not a large sum for this country. In fact, the Administration in Washington seems to be so concerned about our sources of liquid fuels, that they are preparing a much larger expenditure—$17.4 billion by 1986—for the building of a Rapid Deployment Force for use in the Persian Gulf area. And building that force will not generate one drop of fuel.

This $12 billion investment, aside from providing us with a serious start in solving our energy problems, will provide 960,000 jobs. These jobs in construction, metal fabrication, steel, and engineering, will create the kind of healthy growth in the capital goods industries which our nation needs. The product which they produce, fuel alcohol, is the only solution to our liquid fuels shortage that can be realized during the next few years.

The time to build and begin production is now.

Mr. SASSER. Mr. President, I appreciate the opportunity to speak today in sup ort o' the alcohol fuels loan guarantee program.

I support efforts to decrease Federal expenditures and am committed to seeking a balanced budget. The alcohol fuels loan guarantee program will have very little effect on the Federal budget, though, but would go a long way in helping the United States to solve its energy problems.

The fuel alcohol projects affected by

this program would help us to reduce our dependence on imported petroleum. In case of a national emergency, these plants could play a critical role for our national security.

In addition to the energy benefits, these projects would significantly help their regional economies, as well as contributing to the overall economic well-being of our Nation.

The alcohol fuels plants would provide substantial direct employment and tax revenues during their operation. The capital would also create employment for thousands of workers in the engineering, design, procurement, fabrication, and construction fields.

Government support is necessary to reap the advantages of an alcohol fuels industry, and the alcohol fuels loan guarantee program would provide the necessary incentives, at a minimum cost to the Government. For those reasons, I am pleased to go on record today in support of the alcohol fuels loan guarantee program.

Mr. GRASSLEY. Mr. President, I would like a moment to address the important issue of energy production in this country. I am concerned, as are most Americans, with our Nation's dangerous dependence on foreign oil to meet our energy needs. The price of imported oil—which is affected by declining supply, increased demand, and political decisions of the OPEC nations—has risen dramatically in recent years, and has contributed to domestic inflation.

It is clear that we must encourage an increase in our own domestic production of petroleum resources and find alternative sources of energy. Alcohol fuels have emerged as a viable energy alternative, and much Government and private effort has gone to development of this source. Not only can alcohol be produced domestically from abundant raw materials such as grain, wood, coal, and garbage, but it is also a ready substitute to petroleum in our transportation sector. It is from this perspective that I have come to be a great supporter of all programs to promote the development of this alternative source of energy.

The administration, in its efforts to get our budget under control, has terminated the FmHA and Department of Energy alcohol fuel loan programs, while retaining tax incentives for the production of alcohol. I applaud the administration's efforts to formulate a comprehensive economic policy that will regain productivity and economic growth in this country, and I support these budget reductions that are necessary to achieve this growth. Unfortunately, there have been a few casualties in the battle for fiscal responsibility. I am concerned, in this instance, with 15 gasohol fuel plants that will be canceled as a result of the President's budget reductions. Much money and human energy has been spent by business people in the private sector, since they were given the Government's go-ahead on these projects. At this late date, it would be an act of bad faith to impose the added cost to these businesses that would arise from a withdrawal of Government loan guarantees.

I am not asking, however, that an additional $270 million be put back into the budget for these 15 projects. Though I think these projects are important and worthy of Government support, I also believe that a healthy economy—of which these budget reductions are a crucial step—is our greatest priority. I simply urge, therefore, that as the authorizing Committee on Energy and Natural Resources deliberates the instructions of the revised second concurrent resolution, it also seriously consider the feasibility of funding these 15 projects within the aggregate totals it has to work with.

Our energy needs and costs will not subside, and the development of alternative sources is vital. Alcohol fuels, as an alternative source, should receive a fighting chance, for I believe that the production of these fuels will benefit the agriculture sector, as well as the Nation as a whole.

● Mr. PERCY. Mr. President, I rise to join my other colleagues in voicing my full support for the development of alcohol fuels in the United States.

Earlier this week, the Governmental Affairs Energy Subcommittee held a factfinding hearing on alcohol fuels that demonstrated that they provide the possibility of some measure of energy independence to this Nation this decade.

Bobby Unser, twice winner of the Indianapolis 500, extolled the use of methanol as an automotive fuel. Since 1965, alcohol fuels have been the exclusive propellants used at America's most popular and most famous auto race.

In Brazil, we were told, the country has embarked on an ambitious program to replace gasoline with alcohol fuels made from biomass. Already, 850,000 cars are operating on pure alcohol fuels in Brazil.

The potential for making alcohol fuels is enoromus in the United States. My own State of Illinois has enough coal and biomass to become the gasohol capital of the United States.

Mr. President, the full development of this valuable energy resource is not a partisan issue. It has the full support of the elected and appointed officials of both parties. In Illinois, Gov. James Thompson, a Republican, supports alcohol fuels and has mandated that the State fleet utilize gasohol. Illinois Institute for Natural Resources is now funding several alcohol fuels projects.

I was pleased that the Republican Party platform specifically supports the development of gasohol.

Alcohol fuels can enhance our national security by providing us with another source of reserve fuel. For this reason, I have asked for a study of the feasibility of creating a national defense alcohol fuels reserve. Letters have been sent to the Secretaries of Energy and Defense and the Acting Director of the Federal Emergency Management Agency asking them to consider the idea.

We must be willing to take risks to develop alcohol fuels. Brazil, which took an enormous risk in going the alcohol fuels route, is now succeeding in reducing dependence on imported petroleum. Over 600,000 new jobs will be created through its program without driving up the price of food commodities.

Under President Reagan's leadership, I am convinced that we are headed on the right path. Let us now start marching double time to develop alcohol fuels. I ask that my opening remarks at the Governmental Affairs Subcommittee hearing and a statement by Adm. Thomas H. Moorer, former Chairman of the Joint Chiefs of Staff, be inserted in the RECORD.

The statements follow:

OPENING STATEMENT OF SENATOR CHARLES H. PERCY

Good morning. I want to welcome my colleagues, and the public, to the first hearing in the 97th Congress of the Governmental Affairs Subcommittee on Energy, Nuclear Proliferation and Government Processes.

It has been said that Americans lack a conservation ethic, that it is endemic for Americans to waste gasoline and electricity. In fact, the opposite is true: the importation of foreign oil has dropped 25.6 percent in the last twelve months, a tribute to the conservation spirit which Americans are developing quickly and surely. With the decontrol of oil prices earlier this year, our reliance on scarce energy supplies from abroad will diminish even more.

But we cannot delude ourselves: until our nation becomes totally energy self-sufficient, we must continue to prepare for sudden emergency shortfalls and develop new ways of producing and conserving energy here at home.

As impressive as our reduced use of liquid fuel imports is, we may not be able to sever our import connection for many, many years. Until that day comes, our daily productivity, our daily sustenance, will be dangerously susceptible to sudden supply disruptions from the oil exporters of the world—many of whom are hostile to American interests, many others of whom are now headed by less than fully stable regimes.

The Reagan Administration is to be heartily congratulated for the actions it has taken to strengthen our nation's defense military fighting capability. But as long as we rely on foreign oil to run our cars, our farm equipment, and our defense vehicles, our national strength and security will have a vulnerable Achilles' heel.

Lest we become too complacent about our national trend towards energy conservation—lest we begin believing that our energy problem will solve itself—it should be borne in mind that, despite our import reductions, we are paying almost the same price for foreign oil as we were one year ago: nearly $82 billion annually, or $10 million an hour. The price of imported oil has risen 26 percent in a single year.

How can we develop new domestic energy resources to displace imported petroleum? What can be done quickly to assure a steady supply of transportation fuels, including domestic petroleum, synthetic and alcohol fuels—which can be utilized on an everyday basis or in a national emergency?

I have called this hearing to focus on the development of one invaluable non-petroleum liquid fuel whose growth is still in its most infant stage in this country, and can be produced in every state throughout the nation: alcohol fuels.

There are two major kinds of alcohol fuels: one, methanol, which could be made from coal; and the other, ethanol, which is generally created from biomass.

If this country is committed to developing and utilizing its vast coal reserves, the 1980s will see the conversion of large amounts of coal—including the high sulfur coals of the Midwest, into methanol, a clean, cool burning fuel that can make a major contribution to the energy security of the United States and the West.

This June, I will conduct a Subcommittee field hearing in Carbondale, Illinois, to examine high sulfur coal's potential as an export commodity, when converted into an

alcohol, a synfuel, or burned straight. We will hear testimony later this morning specifically addressing the potential of converting high-sulfur coal into methanol in the not-too-distant future.

Ethanol from biomass may have an even more immediate future. Ethanol plants can come on stream in 18-24 months, while larger methanol plants need up to 10 years to get started. Both are needed, yet ethanol development has been more severely impacted by the budget announcements of recent days, and it now warrants a close examination of its economics, its potential, and its consequences.

On August 12, 1980, I chaired a hearing of the Permanent Subcommittee on Investigations in Springfield, Illinois to review the quality and adequacy of existing federal programs for ethyl alcohol from biomass, or ethanol. Witness after witness appeared before me, including then—Illinois and now U.S. Secretary of Agriculture John Block, and affirmed their interest in producing greater and greater amounts of alcohol fuels. The fuel worked, in large quantities it was economic to produce. There was a general feeling that, if enough of it was produced, it would be used. What was needed was temporary Federal financial support to get ethanol production on its feet until it could sustain itself. Also needed was a reduction in the regulatory red tape and lack of technical assistance under the program.

Over seven months have passed since the hearing. During the interim the American people, in a loud and clear voice, demanded a sweeping change in government policy. They have not been disappointed. President Reagan has moved boldly and decisively to curb the growth of government, revitalize our economy, and cool runaway inflation.

I am pleased that the President, and Office of Management and Budget Director Stockman have left the important four-cent-a-gallon federal highway tax exemption for gasohol untouched, as well as the 20 percent investment tax credits for alcohol fuel production which become effective in 1980.

However, the administration has moved in one critical area that needs some further public examination and discussion.

The Administration has suggested that the Office of Alcohol Fuels be downgraded within the Department of Energy and that funding for alcohol fuels subsidies be eliminated. The establishment of this office was specifically mandated by the Congress in the Energy Security Act of 1980, which I supported. This move has been interpreted by the investment community as the government officially turning its back on alcohol fuels. I don't think that is what the President intended, but that has been the unfortunate side effect.

What alcohol fuel producers have long been looking for is a ready market for their product. If the ethanol cannot be sold, why invest in its production?

What these budget cuts may lead to is the development of new approaches to instill producer confidence and market certainty. Ultimately the success or the failure of alcohol fuels will rest on the shoulders of private investors.

Last year, for example, I sent letters to the chief executive officers of the 50 U.S. corporations with the largest vehicle fleets, asking them to consider switching to non-petroleum based fuels for their vehicles. Already, Nabisco and the Fireman's Fund have responded positively.

The Bank of America will soon have 141 vehicles operating on pure methanol. The bank is finding that methanol provides 20 per cent more energy efficiency than gasoline, and that the vehicles are easier to maintain than their gasoline powered counterparts.

The United States Postal Service is now retrofitting 40 of its vehicles to pure alcohol fuels use. Later today, we will hear a progress report from an assistant postmaster general.

But more still can be done. First, I am suggesting today that the United States explore the creation of a strategic reserve for alcohol fuels, to reinforce our strategic petroleum reserves and keep energy dollars in this country.

Wisely. Congress in 1976 created the Strategic Petroleum Reserve (SPR) to develop a centralized emergency supply of oil for use in a sudden import shortfall. Our eventual goal is to store 750 million barrels of petroleum in SPR.

Today, however, the U.S. relies on foreign suppliers to provide the fuel for SPR—ironic in light of SPR's intent to insure against foreign oil cut-offs. For a variety of reasons—an unwillingness to offend one of our primary oil suppliers among them—the fill rate for SPR is years behind schedule today; only 123 million barrels of oil have been set into place.

I would suggest augmenting SPR with an additional strategic reserve, one filled exclusively from domestic energy resources.

This new strategic reserve could be in dispersed storage locations, to guard against the likelihood of a sabotage or enemy attack. DOT reportedly does not have the capability to quickly repair equipment potentially damaged should such an attack occur on our SPR facilities in Louisiana and Texas.

It may be wisest to fill this new strategic reserve with alcohol fuel, a biomass product which can be produced not just in a few select states, but in every state and territory. A national strategic alcohol fuels reserve could be used on-site by many alcohol-producing farms, to fuel our vital agricultural machinery. A certain share of the strategic reserve could be allocated to National Guard detachments, fire and police departments, and other emergency vehicles. Finally, the strategic alcohol fuel reserve could be filled to guarantee a sure and adequate supply of fuel to our nation's farmers, making our invaluable agricultural producers even more secure against enemy attack or the machinations of our oil importers.

The viability of a strategic alcohol fuel reserve will have to be examined in another forum. The proposal needs maturing, modification, and comment.

I have sent letters to Defense Secretary Weinberger, Secretary of Energy Edwards, and the Acting Director of the Federal Emergency Management Agency Bernard Gallagher, asking for their comprehensive evaluation of the strategic alcohol reserve idea.

The efficacy of creating such a reserve has recently received the full endorsement of Admiral Thomas H. Moorer, former Commander of the U.S. Pacific Fleet, Commander-in-Chief of the U.S. Atlantic Fleet and the NATO forces; and Chairman of the Joint Chiefs of Staff. In a written statement prepared specifically for this Subcommittee hearing, Admiral Moorer affirms that—

"The credibility of our military forces as a deterrent and the capability of these forces during war directly depend on the continued availability of (liquid) fuels. . . . Ensuring the continuous flow of various forms of energy, in addition to petroleum . . . to maintain the general productivity of the nation is also a priority national security issue. For without a functioning industrial base and an adequately fed populace, our national security and the perception of that security will be impaired. The disruption of that flow will thus be among the highest priorities of any nation intent on destroying the defense capabilities of the United States."

Admiral Moorer continues by stressing that the farm communities of the United States, by "establishing a national Defense Alcohol Fuel Reserve to meet their needs, . . . can make an important contribution to national resiliency."

Second, I have introduced Senate Bill 328, the "Gasohol Tax Repeal Act." This long-overdue measure would remove the outdated $55 tax which all manufacturers of stills and condensers must now pay each year. S. 328 would also eliminate the $22 tax these manufacturers pay for each still and condenser produced. Alcohol fuels production should be increased by the removal of these needless tax constraints.

In addition, it is essential to develop an export market for Distillers Dried Grain (DDG), a protein rich byproduct of the alcohol fuels distillation process. DDG serves as excellent animal feed. It is two-thirds more compact than corn, and can help save costly transportation and storage charges.

Efforts underway in other countries placing a premium on developing alcohol fuels have been impressive. The Organization of American States has funded ethanol development studies for Colombia and Costa Rica. In Africa, the International Development Corporation has financed an ethanol plant in Malawi. Zimbabwe and other African countries are already producing alcohol fuels. Of course, our distinguished witnesses from Brazil, from Volkswagen, and from Ford Motor Company will describe today the dynamic work they have already undertaken in Brazil and West Germany.

Alcohol fuels may emerge in this decade as a truly international fuel, regardless of whether it is made from grains, sugar, fodder beets, cat tails, Jerusalem artichokes, or just plain corn. We must pool our knowledge about alcohol fuel technology, and production potential, possibly through the United Nations.

Our witnesses this morning represent a diversified group of people. We have an internationally known athlete, a successful investment banker, several noted engineers and energy experts, and a Park Service supervisor. What these individuals have in common, simply stated, are success stories associated with alcohol fuels. Our witnesses believe in the potential of alcohol fuels; they believe in the need for alcohol fuels. At least one of our witnesses was willing to risk his means of livelihood to demonstrate the importance of alcohol fuels. Indeed, while individual circumstances may differ between witnesses, their stories, together, offer a striking, compelling case for the viability and the enormous potential of alcohol fuels, for the United States and the world. This morning's hearing should be taken by the business community considering investments in alcohol fuels as a signal that there is already a real place for alcohol fuels in our country. With ingenuity, perseverence, and patience, the role will be even greater in the very near future.

WRITTEN TESTIMONY, MARCH 24, 1981

Senator Percy, thank you for allowing me to submit written comments for consideration by your Committee. I am Admiral Thomas H. Moorer, U.S. Navy, former Commander-in-Chief of U.S. Pacific Fleet; Commander-in-Chief, U.S. Atlantic Fleet and Atlantic NATO Forces; Chief of Naval Operations and Chairman of the Joint Chiefs of Staff. Currently I serve as Advisor to the Georgetown Center for Strategic and International Studies.

These experiences lead me to the conclusion that we must now move expeditiously to reinforce our conventional and strategic military forces and focus widespread interest on national security. The need for such actions is becoming increasingly clear to most Americans, and is being very well articulated and pursued by the new Administration and the new Congress.

I'd like to talk specifically about two aspects of our country's preparedness: the capacity to supply high-grade liquid fuels, and reducing the vulnerability of that capacity.

With some exceptions—a few ships and a significant number of submarines driven by

nuclear power, and our larger missiles powered by exotic fuels—our military cannot operate without assured supplies of petroleum-based liquid fuels.

The credibility of our military forces as a deterrent and the capability of these forces during war directly depend on the continued availability of these fuels.

Recognizing this, the Department of Defense has taken the necessary steps to ensure the availability of adequate supplies and has developed contingency plans to deal with supply interruptions. The military maintains peacetime operating stocks and a war reserve of fuel. The level of this reserve is based on a variety of factors, including size and type of forces in a particular operating theater, conditions within that theater, sortie rate for aircraft, estimated losses, and the period of time before resupply trains or ships can arrive. Fuel resupply by air is always possible, but should be held to emergency conditions.

To the extent possible, resupply from storage areas or refineries within or close to the operating theater is the preferred option. However, resupply from the United States is an option that must be available to the military.

The top national priorities for fuel during a military emergency are: first, the Defense Department itself, then defense contractors to maintain the flow of war material, and then common carriers to transport these materials to the operating areas.

Clearly there are other high national priorities for the allocation of petroleum during a military emergency such as transporting defense workers to their jobs and continuing essential services and a variety of systems needed to maintain the general productivity of the nation.

Feeding our military personnel, American citizens, and under certain conditions, our allies, must and does have a high priority in the allocation of fuel during emergencies. Further, ensuring the continuous flow of various forms of energy, in addition to petroleum, throughout the country to maintain the general productivity of the nation is also a priority national security issue. For without a functioning industrial base and an adequately fed populace, our national security and the perception of that security will be impaired. The disruption of that flow will thus be among the highest priorities of any nation intent on destroying the defense capability of the United States.

Can we ensure the flow of needed energy in the event of a national emergency? Major refineries, ports, gas and oil pipeline terminals, major electric power plants, and critical switching centers in the electrical grid are certain to be prime targets for incoming missiles.

The vulnerability of these critical points in our energy production, processing, and distribution systems was pointed out in a recent study for the Federal Emergency Management Agency entitled "Dispersed, Decentralized, and Renewable Energy Sources: Alternatives to National Vulnerability and War."

The findings of that report are:

1. Current U.S. energy systems (fuels and electricity) are highly vulnerable, due to requirements for imported resources and due to the centralized nature of the systems themselves.

2. Dispersed, decentralized and renewable energy sources can reduce national vulnerability and the likelihood of war by substituting for vulnerable centralized resources.

3. National policies and goals need to be developed to strengthen current inadequate energy emergency contingency planning and incorporate decentralized and renewable energy supplies into those plans.

4. Local policies and goals need to be developed to implement the range of programs described in the concept of the Defense Energy District.

5. National energy self-sufficiency programs (including synfuel development and Strategic Petroleum Reserve) are highly centralized, thus highly vulnerable. A better strategic opportunity is the development of dispersed local and regional approaches.*

6. Current funding levels (both private and public) for decentralized and renewable energy are inadequate. National priorities should reflect the strategic value and importance of the decentralist/renewable energy opportunity.

The vulnerability of concentrated energy systems was put into historical perspective in the above-mentioned report:

Dr. Roser, Chief Electrical Engineer for RWE, Germany's largest utility, expressed this concern when he stated, "The war would have finished two years sooner if you (the Allies) had concentrated on the bombing of our power plants earlier . . . . Your attacks on our power plants came too late. This job should have been done in 1942. Without our public utility power plants we could not have run our factories and produced war materials. You would have won the war then and would not have had to destroy our towns. Therefore, we would now be in a much better condition to support ourselves. I know the next time you will do better."

Underscoring the surprise of German officials that the Allies did not target and destroy power plants was Reichminister Albert Speer's (Minister for Armament and War Production) comments, "I think that attacks on power stations, if concentrated, will undoubtedly have the swiftest effect; certainly more quickly than attacks against steel works, for the high quality steel industry, especially electro-steel, as well as the whole production of finished goods and public life, are dependent upon the supply of electric power . . . . The destruction of all industry can be achieved with less effort via power plants."

In contrast, Japan's energy systems were less vulnerable, as reported in the conclusions of the Allied Bombing Survey:

"Most of the power requirements of Japan, however, come from hydro generating plants, which are so numerous, small and inaccessible that their destruction would be impractical, if not impossible. If their supply could be eliminated or drastically curtailed by some other means, electric power supply could be reduced to a point where the shortage would assume economic importance. It has been shown that neither the transmission nor the distribution system is, of itself, vulnerable."

In the United States, the nature of our industry and our transportation system as well as the vastness of our land makes high grade liquid fuels our Achilles' heel during a military emergency. I believe that the farm communities of the United States, which play such a vital role during times of peace and war by providing needed food supplies, can make an important contribution to national resiliency.

Certainly, farming operations require special attention for:

They are almost totally dependent on high grade liquid fuels—gasoline and diesel.

They are at the end of the distribution pipelines for both these fuels.

Their productivity is only reached by accommodating nature's time schedule. A disrupted fuel supply at a critical time could be disastrous.

Their products must be trucked, or sent by rail or barge to the marketplace, and liquid fuel is again needed in the transportation process.

To reduce their particular vulnerability, many farmers have already begun to produce their own fuel. In the process, they are effectively building a dispersed alternate fuels capacity. A large number of decentralized alcohol plants can help ensure production and delivery of food by providing a continuous supply of high grade liquid fuels.

To reinforce national security by transforming certain farm communities from energy consumers to energy producers and by ensuring adequate back-up supplies of fuel during an emergency, we need to carefully explore a range of options such as:

Including supplies of high grade liquid fuels for farm communities in all fuel allocation contingency plans.

Encouraging farmers to maintain petroleum fuel reserves on their farms by keeping storage tanks topped off.

Reducing the dependence of the farm community on imported high grade liquid fuels by producing fuel grade alcohol within the community.

Developing Federal or State programs to encourage farmers and farm communities to establish a national Defense Alcohol Fuel Reserve to meet their needs during an emergency, as the Strategic Petroleum Reserve will serve military, industrial and urban communities. Such a program would not only provide the needed reserve, but would also stimulate the advancement of the alcohol fuels industry. This will in turn reduce our crippling dependence on imported oil, and enhance the sustainability of rural communities in the event of a prolonged or particularly damaging national emergency.

In terms of what type of alcohol—ethanol, methanol, or formulated alcohol fuels—I believe we should let advancing technology, local conditions and free market practices make that determination. I suspect we need all forms of fuel grade alcohol to meet our needs, particularly during a national emergency. The challenge is to get on with the expansion of the alcohol fuels industry so that we can ensure an adequate supply of food at all times and thereby strengthen our national security.

The technologies already being developed within this new industry will soon be advanced to the point where they will be ready for export to other countries, particularly the developing nations. This will in turn permit them to enhance their national security using locally available resources.

Thank you, Mr. Chairman, for the opportunity to present my thoughts on this important subject.●

*While I support the need for decentralized energy systems, particularly to service farms and rural communities, we will continue to need major, concentrated energy systems to power our industry and to serve metropolitan areas.

ALCOHOL FUELS

● Mr. HUDDLESTON. Mr. President, I wish to concur in the remarks of my colleagues regarding the importance of continuing an aggressive program for the development of alcohol fuels.

An aggressive alcohol fuels program can yield us high-quality, clean-burning fuels made from renewable resources as well as from coal. Detailed analyses undertaken by the National Alcohol Fuels Commission show that present generation fuel ethanol distilleries, using non-petroleum boiler fuels, can produce ethanol that, when blended with gasoline to make gasohol, can result in a positive energy balance and oil savings of up to 500,0000 barrels per day in 1990. Further, second generation plants, using cellulosic waste feedstocks and fuels such as municipal garbage and incorporating additional energy-efficient technologies can provide even more oil savings.

The reduction of our dependence on foreign oil is absolutely essential to our national security and economic recovery. It is ironic that an administration as security conscience as this one should minimize the fact that our military cannot operate as either a deterrent or a fighting force without assured supplies of fuels, and an industrial and agricultural base, also dependent on adequate fuel supplies, behind it.

Further, the economic benefits of alcohol fuels production go beyond the very obvious benefits of oil import reduction. It has the advantage of being a decentralized technology, so that significant job creation and economic benefits would be dispersed nationwide. It can use a wide range of feedstocks, including agricultural and urban wastes. And, it has special potential for helping to insulate our farmers from escalating oil prices and, consequently, offers the rest of us some protection from rising food prices.

Alcohol fuels are one of the few short term alternatives to foreign oil that we have. We know right now that a 90-percent gasoline, 10-percent alcohol blend works. In a few short years, I am confident that a significant percentage of American vehicles could be operating on pure alcohol. But, not if we stop the alcohol fuels program before it is barely off the ground.

Less than 1 year ago, the Congress passed the Energy Security Act setting a goal for the domestic production of alcohol fuels from biomass in 1990 that would equal at least 10 percent of the Nation's annual gasoline consumption.

We established a more immediate goal of at least 60,000 barrels per day of biomass derived alcohol fuel by the end of 1982.

We appropriated $1.05 billion for financial assistance programs in the Department of Energy and the Department of Agriculture to help us toward that goal.

According to the final report of the U.S. National Alcohol Fuels Commission, even if this entire amount were committed to the construction of ethanol plants, only about 1.6 billion gallons of production capacity could be built—less than 20 percent of the 1990 alcohol goal. Clearly, when we passed the Energy Security Act last year, we in Congress were already depending upon a high degree of private sector investment independent of Government loans and guarantees. We were merely providing a startup program to help a fledgling industry penetrate a tough traditional market.

Yet now, a few short months later the administration is proposing that the private sector do it all.

This approach assumes that we have the time to wait for the market to respond to rising oil prices and changing market conditions.

We do not have the time. With the possibility of another oil supply interruption just around the corner, Government has a responsibility to expedite the production and use of the few energy alternatives currently available.

The administration approach also assumes an availability of private capital for investment in these plants that simply does not exist. And, it virtually assures the domination of the alcohol fuels industry by the few large companies that do have capital.

I strongly believe that to totally eliminate this program now could set back alcohol fuels development for years. I congratulate my colleagues for focusing attention on this problem, and will be working with them to reach a solution.●

GASOHOL

● Mr. JOHNSTON. Mr. President, the Energy Security Act of 1980 specifically recognized the role that renewable resources can make in our Nation's effort to reduce our dependence on foreign oil. Many of these technologies and particularly ethanol production for the purpose of making gasohol can come on line quickly. Unlike some other alternate fuel resources, gasohol is already technically feasible and can give us immediate benefits. However, if these technologies were as financially lucrative as some in the administration would lead us to believe, I have no doubt that a massive private construction program would already be underway. That is not the case and it is clear to this Senator that the prime obstacle is difficulty in finding financing for these projects.

Meeting this capital need is precisely why the Congress wisely decided to create a loan guarantee program to stimulate ethanol production. Given our current economic crisis, it is fair, right and inevitable that some cuts in the gasohol program be made. But it is pennywise and pound foolish to eliminate the program altogether.

I welcome and applaud this clarification of the Senate's intention to find a way to salvage a portion of this important initiative within the range of reductions established by the Budget Committee. Frankly, it would be my preference to save more and find other areas to trim back, but we all must sacrifice part of our preferences if we are to get our economy back on the right track. The 16 projects selected by DOE for negotiation alone, at the minimum, should be saved. Just these projects are estimated to produce energy savings equivalent to 50,000 barrels of oil per day and that will make a significant contribution in our effort to reduce oil imports.

Despite extensive conservation efforts, fuel switching and the introduction of more energy efficient capital stock, most official energy forecasts agree that fuels demand in the United States is likely to grow 1 percent per year over the next 20 years. That means U.S. energy consumption will increase from 39 million barrels per day of oil equivalent in 1979 to 46 million barrels per day of oil equivalent by 2000. Although U.S. oil consumption is expected to decline from 18 to 15 million barrels of oil per day over this period, these forecasts also generally agree that oil imports will remain at 7 to 10 million barrels per day for the next 20 years.

Clearly, this continued level of dependence on imported oil is economically disturbing, not only because it means that we will continue to send billions of dollars overseas each year to pay for this oil but also because our continued oil dependence will only further escalate oil prices, inflation at home and make fewer dollars available for the creation of new U.S. jobs. Moreover, no one needs to be reminded of the serious national security implications of this continued reliance on uncertain foreign oil supplies. Gasohol alone will not solve our Nation's serious energy problem, but gasohol is a tool we can ill afford to abandon as we seek to find constructive ways of reducing our dependence on foreign oil.●

● Mr. QUAYLE. Mr. President, I am pleased to join with my colleagues in a colloquy to clarify the actions taken by the Budget Committee regarding the alcohol fuels program administered by the Department of Energy.

First, let me state unequivocally that I support the Presidents' efforts to reduce Federal spending. We have gone far too long before placing curbs on Federal spending. The Reagan administration came with a mandate from the people of this Nation to bring spending under control. The process we are undergoing today is a first step taken by the Congress to join in the administration's efforts to reduce the size and scope of the Federal budget.

During consideration of recommendations to the Energy and Natural Resources Committee, I offered a motion to include $270 million for the DOE alcohol fuels program. This motion was defeated by a slim one-vote margin. The committee then voted in favor of a motion by Senator KASSEBAUM which dealt with the financing of the strategic petroleum reserve. Considering the slimness of the margin by which my motion failed and the fact that some Senators could have voted against my motion in order to support the proposal on the strategic petroleum reserve, I join in this colloquy to establish support for the DOE alcohol fuels program.

It was just last year that Congress adopted the Energy Security Act. It has been less than 1 year that this measure has been enacted. Yet given the serious nature of our energy situation, the Congress wrote language into the measure that would insure the Department of Energy act expeditiously on the alcohol fuels program. Within 1 month solicitations would have to be made and a decision on the applications within 120 days.

The alcohol fuels program, as found in title II of the Energy Security Act, is slated to achieve a production level of 60,000 barrels per day of alcohol from biomass by the end of 1982. The Department of Energy was given jurisdiction over biomass projects that produce over 15 million gallons per year. The assistance offered by this title was to take the form primarily in loan guarantees.

In addition, projects must meet certain requirements in order to be eligible for consideration for loan guarantees. Applicants must meet a credit-elsewhere test and they must also bear a reasonable degree of risk. Priority was to be given to those not using petroleum or

natural gas as process fuels and to those applying new technologies.

Mr. President, the magnitude of these projects has not been tried before and they do present a financial risk to the private money markets. The tax credits that are available to alcohol fuels, which I support, may not be enough for projects of this capacity.

Furthermore, Congress directed the Department of Energy to act with speed because we cannot afford to waste time in developing domestic energy sources. In October of 1980, just 5 months ago, DOE selected an initial seven projects to begin negotiations for loan guarantees. From these initial seven projects, 263 million gallons of ethanol would be produced, which if blended with gasoline would yield more than 2.6 billion gallons of gasohol. Later an additional nine projects were chosen, however, one dropped out.

All of these 15 projects have made some degree of financial commitment, because the law states that applicants must assume a reasonable degree of risk. Engineering plans and design studies have been undertaken. The cost of building the initial seven projects alone will run over $500 million, with several millions of dollars in private funds having already been spent. While contractual obligations have not been made, by passing the Energy Security Act. Congress made a public policy decision that it wanted to see alcohol fuels developed and developed quickly. The administration's recommendation to terminate the alcohol fuels program is reneging on the policy decision made last year by Congress and carried out by the Department of Energy.

I respectfully urge the distinguished members of the Energy and Natural Resources Committee to weigh carefully the recommendations of the President and the Budget Committee with regard to the alcohol fuels program.

Finally, I thank the Senator from Minnesota for the opportunity to join in this colloquy on the DOE alcohol fuels program.●

● Mr. METZENBAUM. Mr. President, since the oil boycott of 1973 and the subsequent runup of OPEC prices, Presidents of both parties have called time and again for reducing this Nation's dependence on foreign oil. The Nixon administration had its "project independence." President Ford worked vigorously to promote the same concept. President Carter spoke of "the moral equivalent of war."

But today, Mr. President, we have an administration whose idea of energy policy is to terminate Federal support for technologies that are essential to the Nation's basic long-term interests.

We are being asked to cut back on energy conservation in spite of the fact that a barrel of oil conserved is the cheapest barrel of oil available in the world today.

We are confronted with proposals to slash funds for solar energy and for the other renewable, decentralized energy sources that might compete in the future with oil and natural gas.

We are told by David Stockman that we do not need to promote these energy sources; the market will sort them out.

I am a believer in the free market. But I do not believe that this administration's nonprogram in alternate fuels can or will promote free market solutions.

The fact is, Mr. President, that saying "leave it to the market" in the energy industry means one thing and one thing only—and that is "leave it to the oil companies."

Leave it to oil companies—companies that have already attained a dominant position in coal and are buying up uranium leases, uranium milling plants, and solar energy patents.

Leave it to the oil companies and we can be certain of one result—that we will not, in the future, have serious competition between different energy sources. Instead, we will see new fuels and new technologies introduced at a pace—and a price dictated by the bottom-line interests of a few huge corporations that we are allowing to control our energy future.

That is not healthy.

It is a blow to the free enterprise system.

It endangers our national security.

It works directly against the welfare and prosperity of every nonenergy business and every consumer in the country.

During consideration of the resolution before us, the Budget Committee failed by one vote to restore $270 million for a major initiative in alternative fuels. I refer to the DOE's loan guarantee program for gasohol. That program was enacted just last year, as title II of the Energy Security Act.

I need not remind my colleagues of the urgency this body assigned a few short months ago to the rapid development of an alcohol fuels industry.

Last year, the Congress also enacted into law legislation I introduced to insure a free market for gasohol by prohibiting oil company discrimination against gasohol through their credit card policies.

Title II specifically mandated the DOE to move as expeditiously as possible to issue loan guarantees. The clear intent of Congress was to bring this new industry on line in the shortest possible time.

Sixteen projects have been approved—and businessmen have expended over $10 million in private funds in the expectation that the Federal Government would proceed as promised.

These businesses stand to lose their investments.

But even more important, this Nation stands to lose gasohol—to lose the competition it will bring to the energy industry and the relief that it will provide us from our dangerous reliance on foreign oil producers.

Gasohol is an American product, whose raw materials depend only on the incomparable productivity of American agriculture.

It is a product whose development will provide for American agriculture a far more stable market than we have had in recent years.

The last administration promised our farmers a major gasohol program to help offset the impact of the Soviet grain embargo.

But today, the embargo remains in place and the promising beginnings of a gasohol industry are being nipped in the bud by pennywise and pound-foolish budget cuts. We should, Mr. President, restore the entire $740 million program as originally proposed rather than just the $270 million restoration proposed in the Budget Committee.

Mr. President, this Nation needs gasohol, and we need it now.

I hope that before this budget process is finished, the Congress will see fit to review our commitment to this all-American source of energy for our Nation's future.●

GOVERNMENT ALCOHOLS FUEL LOAN GUARANTEES

Mr. THURMOND. Mr. President, I wish to associate myself with the remarks of my distinguished colleague from Minnesota (Mr. BOSCHWITZ) and other Senators, relating to the alcohol fuel plant loan guarantee programs.

Alcohol fuel, produced from renewable resources, is an alternative energy source capable of providing this country with significant quantities of high-grade liquid fuel in the future. However, before this result can be accomplished, there must be plants built to demonstrate to private financial sources that this program is a sound one. Government loan guarantees for construction could accomplish this goal, without draining the Treasury or bloating the Federal budget. Once the feasibility of this developing industry has been shown, private financial markets will provide loans to finance future projects, and the Government will have helped to promote this vital industry at little or no cost.

I urge Chairman MCCLURE and the other members of the Senate Energy Committee, along with the members of the Appropriations Committee, to carefully consider the need for continuing Government loan guarantees in this area if at all possible within the President's budget.

Mr. DOMENICI. Mr. President, pursuant to the general understanding, if it meets with the approval of the distinguished minority manager of the bill, we are prepared to let Senator PRYOR proceed with an amendment at this point.

The PRESIDING OFFICER. The Chair points out that the Chair understands this to be a second-degree amendment; therefore, unanimous consent will be required for it to be in order at this time.

Is there objection?

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the amendment be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 19

(Purpose: To reduce outlays in fiscal year 1982 for procurement by $2 billion)

Mr. PRYOR. Mr. President, I have an amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR), for himself and Mr. DECONCINI, Mr. MITCHELL, Mr. LEVIN, Mr. BAUCUS, Mr. PELL, and Mr. RIEGLE, proposes an unprinted amendment numbered 19.

On page 2, line 25, strike out "$3,200,000,000"; and insert in lieu thereof "$5,200,000,000."

On page 2, line 18, strike out "$36.423,000,000"; and insert in lieu thereof "$38,423,000,000."

Mr. PRYOR. Mr. President, the amendment that I am offering today is on behalf of myself and Mr. DECONCINI, Mr. MITCHELL, Mr. BAUCUS, Mr. LEVIN, Mr. PELL, and Mr. RIEGLE, and it further reduces outlays in fiscal year 1982 for procurement by $2 billion.

Before I discuss this amendment, I would be remiss if I did not pay high tribute to the very splendid job done by the Budget Committee in bringing this resolution to the floor. The Budget Committee has taken the first steps in laying out a framework for reducing Federal spending on a massive scale. I commend my colleagues on both sides of the aisle who spent many, many hours on this resolution that we will begin voting on this afternoon.

I believe that the members of the Budget Committee recognize the call we heard from the people of this country for discipline in our Federal spending, and I believe this resolution demonstrates that fact. I also think it is noteworthy that they went further in their cuts than the administration had proposed. However, I also recognize the fact that we are 100 diverse people in this great body, representing 50 diverse constituencies and our priorities may sometimes differ.

I expect realistically that by the time we finish this budget resolution that we will have considered amendments which, if passed, could have brought us back to the President's recommendations and maybe even over the President's recommendations. This is why, or one reason why, I am offering an amendment today to reduce by $2 billion outlays for fiscal year 1982 for Federal procurement or other unneeded expenditures that the Appropriations Committee of the Senate deems proper.

Mr. President, for example, we should look at procurement and I hope if this amendment passes we will establish the legislative intent of this body that this is one area that the committee could look at very carefully. Reducing unneeded and wasteful procurement will not reduce one single service to the people of this country. It will not cause one child to go hungry at lunchtime. It will not require one veteran to go without a hospital room. My amendment would simply require the Appropriations Committee to take a long, hard look at the procurement budgets of each agency and to examine what they are spending each year, such as in the area of consultants, furniture purchases, fancy audiovisual materials, and any unnecessary luxuries that the taxpayers of this country can no longer afford.

This amendment strikes at the fat in Government. It does not strike at the heart of some of the various programs.

The first question is, Is a $2 billion cut in Federal procurement or other areas reasonable? Yes, it is. In fact, it is a very modest and conservative figure in view of the total procurement costs of the Government that were documented time after time by the General Accounting Office.

We are not talking about small potatoes. We are not talking about a few boxes of Kleenex here or there. We are talking about 1 of every 8 tax dollars that the American public invests in their country that we are spending for supplies or services for the Federal system. It is an extremely modest approach, to look at how these dollars are being expended and certainly how they could be more efficiently spent in hitting the target much better.

Federal procurement in fiscal year 1982 will be well over $100 billion. If the Appropriations Committee, in its wisdom, decided to take a 2-percent figure, and target those areas that they find most wasteful, we would be saving the taxpayers, in the 1982 budget, a total of $2 billion.

Almost complete figures compiled by the Federal Procurement Data System put the total Government-wide figure for procurement expenditures at the astonishing amount of $110 billion for fiscal year 1980.

That amount is going to continue to grow. Some of the items that I found interesting that our Federal Government purchased in fiscal year 1979 were some $7.6 million for draperies, awnings, and shades. We spent $739,000 for musical instruments. We spent $735,000 for phonograph records. We spent over $105,000 for games, toys, and wheeled goods. We spent over $4 million for perfumes and for toilet preparation articles and for powders. And we spent $1.5 million for underwear and nightwear.

I will not go down that long list, but I am saying that there are literally thousands and perhaps millions of items and articles that are being purchased today by the Federal taxpayer through the Federal Government that I feel we could make significant savings on, and a $2 billion attempt at savings I think is most reasonable and very, very conservative.

My amendment is not necessarily related to or directed to procurement spending. It is not specifically saying that procurement is all the Appropriations Committee can cut because I believe that we are wasting billions of taxpayers' dollars throughout many areas in Government. This amendment would simply mandate the Appropriations Committee to come up with an additional $2 billion savings and to report those savings to Congress for our consideration.

This amendment is simple. It amounts to $2 billion or roughly 2 percent of the Federal procurement dollar, and it is painless. Furthermore, it is a forced belt tightening of the managers of our Federal procurement system. It is a better management technique for our entire Federal system and it is a cushion that this Senate, I firmly feel, should go on record as supporting today, a cushion against the possibility of going too high in the budget expenditure process. It is an extremely small sum for most of our Departments and our agencies to absorb, and I think this amendment makes sense and I hope that it will have support on both sides of the aisle this afternoon.

Mr. President, I wish to reserve the remainder of my time, but I yield to my friend from New Mexico.

Mr. DOMENICI. Mr. President, I yield myself 10 minutes in opposition to the amendment.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I think the Senator knows that I have the greatest respect for him and if he does not know that I have great concern as to how much we are going to fund the military for the year of 1982, then I am telling him that now.

But the Senate should know that while this is an exciting concept, it just will not work. First of all, the Senator knows that if he were going to reconcile against an authorizing committee, it would have gone to Armed Services and reconciled it against some existing authorizing legislation. But that would not lie, and I am sure the Senator knows that. That would be subject immediately to a point of order because, in this reconciliation instruction, we only recommended reconciliation against direct spending in the military, and we had a very real purpose in doing that.

So what the Senator has done is taken the same number and said, "Well, I will ask the Appropriations Committee"—and this is not just some nice, pretty request; he punches in a number that they will cut $2 billion in outlays in 1982.

Well, we do not even have the 1982 appropriations before us. In addition, it does not adjust budget authority anywhere. It just says to cut outlays. While he talks about procurement, it just sort of hangs there as an instruction to cut $2 billion in outlays. He would like to think it is going to come out of the military, and it just will not happen.

In addition, the Senate should know that this Budget Committee had a very precise idea in mind. Everyone knows that the military function, 050, for the United States is going to be up in 1982. The question is how much is it going to be up, and we clearly intend a thorough debate on that issue. How much is it going to go up; and how much is right, and how much can we afford. But we have not done that here because this is a reconciliation that cuts from the Federal expenditure package. It does not add.

So we said the Senate, in the first budget resolution, will have an opportunity to thoroughly debate the issue of

what is an appropriate increase for military preparedness.

Now, the Senator will have an opportunity when that first budget resolution comes to the floor and the Budget Committee has had a mark for aggregate budget authority and outlays for military preparedness. He will have an opportunity to look at that and ask is there too much in there for procurement? 'Should I squeeze that down a little bit?" He will have an opportunity to look at what Defense has told the authorizing committee, and what Defense has told the Budget Committee. And, if he is not satisfied with their procurement, if he is not satisfied they are going to save enough in audiovisuals or the other items he has mentioned, he can come before the Senate and in a very sensible and orderly manner suggest that the function on military preparedness be cut even more than the numbers recommended.

But the Senator should know that that is not what is happening here. He is not waiting for that event, he is not waiting for that debate, but rather just punching in a $2 billion outlay cut in 1982 against the Appropriations Committee, against appropriation levels that are not even yet determined. He is saying, in advance—

We will tell you that it will be $2 billion less than whatever you had in mind it was going to be.

So while technically I do not object on any parliamentary ground, I say to my good friend it is a good idea, and its time will come. He can rest assured that, on the floor of this Senate during the next 3 or 4 months, not once but probably three or four times, the Senate will debate the procurement policies of the U.S. military. They will do it in a functional debate on the first budget resolution. He will do it then. Armed services will bring an authorizing bill to the floor obviously with items that have to be purchased in their opinion, and he can address it then.

The final act will be an appropriations bill, and it will come here and he can debate that point again. But I urge that we postpone that debate until he finds out for 1982 what the recommended increases that the President has made, as modified as it goes through these committees actually is. Whether the Senator is satisfied, and whether this Senate is satisfied, that procurement has taken its fair share of the cuts or conversely has procurement been given too much latitude to spend in light of our economic policies, our social concerns, and other things can be considered at that time.

So I hope we will vote on this rather quickly, and I hope nothing I have said here is taken by the distinguished Senator who offers it to be in any way critical of it or of him.

I will just say that it does not test anything. It is kind of a good idea, but the vote is irrelevant on the $2 billion reduction in outlays in 1982 as against the Appropriations Committee.

It certainly cannot be directed against the military, this cannot have that kind of force. It is just saying at this point that this Senate thinks we ought to look at whether or not we ought to cut procurement, by about $2 billion, and it does not mean anything other than that. It would set a bad precedent here to say to the Appropriations Committee that "The idea is that you save this much here in outlays."

As I say, it is not technically objectionable, but it really does not make any sense in the context in which we are handling budget authority or outlays and trying to ratchet down authorization bills that are the subject matter of appropriations. We are not looking for cuts in the military. We are trying to find out what is the appropriate level of increase, and that is going to provide plenty of opportunity for debate as between the Secretary of Defense's numbers and someone else's numbers, and I can say here publicly we are going to look at those numbers and scrutinize them carefully and there will be a rather healthy debate in the committee in due course, and in other committees and in the Senate.

So I hope the Senate will not accept this amendment and I hope the Senator understands that I must oppose it on the grounds I have stated. While I take note of the fact, and I am sure his constituents will, that he is concerned about waste, this just will not resolve or stop any of that waste.

(Mr. COCHRAN assumed the chair.)

Mr. PRYOR. Mr. President, I would like to respond to my good friend from New Mexico, the chairman of the Budget Committee.

Certainly, I want my friend to know that he in no way said anything that I take personally, but I would like for my colleagues in the Senate and the very distinguished chairman of the Budget Committee to recognize two or three facts. In my statement I never mentioned the Department of Defense. I never mentioned the military.

I must say that before this debate began I did hear, a little mouse told me, that the issue that was going to be raised and be talked about on this amendment concerned a cutback in military procurement, and maybe this bill ought to go to the Armed Services Committee.

Let me say to my distinguished friend that the Appropriations Committee itself is already charged with finding $3.2 billion in savings, and I am simply saying we should add $2 billion to that figure, making it $5.2 billion, and I am going to trust the wisdom of the Appropriations Committee to look long and hard into each agency and each department to see where those savings could be made.

Mr. President, I would like to also state that the General Accounting Office—you have raised the issue of defense, and I am not going to debate that issue, but the General Accounting Office—on March 3, 1981, talked about the Defense Department. It did not condemn the Defense Department unmercifully for their spending, but it pointed out several ways that DOD procurement could save millions of dollars for the taxpayers.

First, a reduction in consultants is possible, with many millions of dollars there.

Second, multiyear contracting as a viable acquisition method could substantially reduce Government expenditures.

The third item is increased competition among contractors which could better insure that the Department of Defense obtains acceptable products and services at the lowest prices. I am reading from the GAO report of March 3.

Another area is productivity-enhancing opportunities at the Department of Defense, which GAO says are entirely possible.

The next item is further consolidating supply activities; and the other item I would like to just mention briefly is better visibility and interchangeability of wholesale and retail inventories that can reduce investment and make better use of assets, thereby saving hundreds of millions of dollars.

That, Mr. President, was from the General Accounting Office. I do not know of any of those items which, if they were in fact put into practice or implemented by the Congress or by the Department of Defense or mandated by the Appropriations Committee of the Senate, would in any way endanger our national defense posture. In fact, it may have a way of helping it.

A few more little items, Mr. President, and again from the General Accounting Office, we find we might look at the area of dumping or fourth-quarter spending, which some other Members of the Senate have already raised very eloquently. We might look at those luxury items contained in the Comptroller General's report to the Congress on May 2, 1979, such as $8,000 mahogany bookcases, and saunas, and party favors, and color televisions.

We might look also at the September 29, 1980, report where we find case after case of contract workers in the Federal system being paid by two agencies at the same time.

We might also look at the January 9, 1980, report where we can see there can be much improvement and much more efficient management of the millions of dollars in maintenance and repair of real estate now owned by the Federal Government.

I think the 2 percent or $2 billion, as the Senator says, is no magic figure. But to be honest, Mr. President, I do not think there are any magic figures in this town.

I just hope, once again, that this will not be considered as an antimilitary vote. That is not what this is about. It is about the entirety of our Federal system. And I will trust the Appropriations Committee, in its wisdom, to look at those expenditures and make those suggestions.

Mr. President, it is my understanding that my good colleague from the State of Michigan would like a few moments, and I yield to him such time as he may desire.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. I thank the Chair and I thank my friend from Arkansas. Mr. President, I support Senator PRYOR'S

amendment to direct the Appropriations Committee to realize a $2 billion savings in Federal procurement. It is a manageable assignment. Various subcommittees of the Government Affairs Committee, on which I serve, have looked at the problems of managing the Federal bureaucracy from a number of angles and have concluded that there is a great deal of room for elimination of wasteful spending practices.

Senator PRYOR has been actively involved in seeking to reduce the costs to the Federal Government from needless consulting contracts. I highly commend him for his efforts. Senator COHEN, as former ranking minority member and now chairman of the Subcommittee on Oversight of Government Management, which I formerly chaired, led a thorough investigation into the problems of year-end spending.

The report issued by our subcommittee estimated a potential savings of some $2 billion were Federal agencies to adopt administrative procedures to reduce the appalling yearend spending spree governmental agencies engage in in order to use up their budgeted dollars before the close of the fiscal year.

Just this year our Subcommittee on Oversight of Government Management held hearings on debarment and suspension procedures in the Federal Government, in which it was estimated that if the Federal agencies would simply not do business with companies that commit fraud or misperform for other Federal agencies, significant savings could be realized.

It is long overdue that we recognize the substantial budgetary savings that can be made with improved management.

I find it far more responsible to cut the budget by stopping the wasteful year-end spending binge by Federal agencies than by kicking unemployed workers in the teeth. I find it far more responsible to cut the budget by stopping the gush of funds to fraudulent contractors than by destroying our commitment to the working people of America who paid into the social security system with the understanding that if they died, the social security system would give their children a hand through college. I find it far more responsible to eliminate the unnecessary contracting to the so-called beltway bandits than to decimate programs for economic recovery such as EDA and UDAG.

I support Senator PRYOR's amendment and urge my colleagues to do likewise.

I thank the Chair and my friend from Arkansas. I commend him on his leadership in this area.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I yield as much time as the distinguished Senator from Oregon desires.

Mr. HATFIELD. Mr. President, what is the time situation?

The PRESIDING OFFICER. The Senator from New Mexico has 22 minutes remaining on the second degree amendment and the Senator from Arkansas has 13 minutes and 40 seconds remaining.

Mr. HATFIELD. Mr. President, I wish to commend the Senator from Arkansas for the concept which he brings to the floor at this time. I would only argue with the Senator on the basis that it is ill-timed. The concept is excellent. I think there is a need at this point to perhaps review some of the actual activity that is already underway in the appropriations process and the budgetary process, which really addresses itself to these precise and exact issues.

I would refer to one document that I would hope that the Senator from Arkansas and others who support his amendment would take the time to read. This is Calendar No. 1008, Senate report, Department of Housing and Urban Development, independent agencies appropriations bill, 1981.

In this bill and in the report of this bill we address the very subjects of fraud, abuse, waste, and error.

I am speaking now of the Appropriations Committee—

> Most recently, the committee included a comprehensive package of general provisions and report language in the fiscal year 1980 Supplemental Appropriations Act to address these problems. That package directed agencies to improve management, accounting, and internal controls; eliminate unresolved audits; collect overdue money owed to the Government; prevent withdrawal of cash by Federal grantees in excess of their immediate needs; and properly discipline employees guilty of fraudulent behavior associated with their official duties.

The Senator from Michigan raises a very valid point and again I would refer to this document of what the Appropriations Committee is doing.

On page 120, limit on last quarter spending:

> In section 414 of the bill, the committee has recommended a limit on last quarter spending. . . . The committee firmly believes that immediate action of this kind is necessary to stem the wasteful flow of public funds during the closing days and hours of the fiscal year. Taxpayers are legitimately demanding that agencies stop this practice and Congress must take action now to see that they do so. . . . All agencies and departments are expected to comply strictly with the provisions that implement all necessary management and internal controls to make certain it is carried out.

That is an instruction in the Appropriations Committee.

Overdue debts owed the Government:

> The committee has included this general provision requiring agencies to take action to improve collections of overdue debts, charge reasonable interest on overdue debts, and reduce the amount of debts written off as uncollectible.

Page 122 on consultants:

> In section 417 of the bill the committee has recommended that a general reduction of $28,297,000 funding for consultant services.

And on we go.

Now, Mr. President, I appreciate very much the kind of concern expressed by the Senators on this amendment and the intent of it. I believe that through the regular appropriations procedures we will achieve these very objectives that they seek in this amendment.

Let me say that the budget resolution, as I am sure Senator DOMENICI has already indicated, has provisions before us in section 11 of this resolution of savings for elimination of waste and fraud and abuse, $1.3 bilion in 1982 and $2 billion in 1983.

The President has also been very diligent in this area. President Reagan has an additional $8.8 billion in savings in the 1982 proposal and this is aimed at administrative savings, just the same items that Senator PRYOR is offering.

So let me merely indicate that the Senate Appropriations Committee is diligent in this process. I have read some of the provisions in this report indicating our action and our expectation of compliance.

Mr. President, I would like to just add one other thought at this time. I think we have to recognize a very fundamental point here. There is a certain limited base upon which the Appropriations Committee can act. Let us take as an example, as I shared with my colleagues yesterday, a $659 billion budget for fiscal year 1981. And because the package of rescissions has exempted the military from any kind of rescissions and because we are not addressing the direct payment part of the budget, the direct spending, nor have we addressed the major entitlements to the program, out of a $659 billion budget we have $100 billion left in discretionary funding.

Reduce that to the bases of those programs, agriculture, commerce, health, housing, education, welfare, natural resources, energy, space, et cetera, et cetera.

I think we have to recognize the kind of baseline that we are addressing when you say to the Appropriations Committee, "And another $2 billion" or "add another $3 billion." Especially as we deal with fiscal year 1981, and what this resolution includes for the appropriations instructions for fiscal year 1982 and fiscal year 1983.

Some of these same sponsors I know are deeply committed to some of the social programs in this country. Let me say what you are doing is you are eroding the base upon which the Appropriations Committee can hopefully function and maintain the commitment to some of these very social programs that the Senator from Michigan is so deeply concerned about, the Senator from Arkansas, the Senator from Montana, and others who are joining in this amendment.

Please do not lock us into a tighter situation than we are already in.

I want to assure you that we will do every conceivable thing we can to achieve these objections so eloquently stated in this amendment, and we would welcome any additional instructions, suggestions, or recommendations during the budgetary appropriations process.

Mr. DOMENICI. Will the Senator yield?

Mr. HATFIELD. I am happy to yield.

Mr. DOMENICI. Mr. President, how much time have we remaining?

The PRESIDING OFFICER. The Sen-

ator has 14 minutes remaining on the amendment.

Mr. DOMENICI. I believe the Senator from Oregon has made a most eloquent argument against this amendment. What we are saying is, it sounds good but we ought to know what is going to happen or what might happen. We are not even sure it will happen, or what might happen if we just arbitrarily say another $2 billion in outlay cuts in 1982 directed at the appropriations process.

What we have done in this reconciliation instruction is cut budget authority as per the rescissions and then traced into 1982 the natural savings that flow from that.

Someone can come down and say, "instead of the natural flow of cuts into 1982, let us add $3 or $4 billion more." But they ought to know you will not have any place to take that unless it is from the areas the Senator just described. If they have any idea that there is a whole bunch of programs they want to fund, that are just around and there is a lot of money, that is not the case. It is already as tight as it can get. We have cooperated to do what is reasonable. The Senate ought to know that you do not find in the direct appropriations process $2 billion just around on trees. That process has been squeezed over the years and is going to be squeezed more here. Eventually, this institution will have to look at entitlements. The Senator mentioned that. That is absolutely right.

Mr. HATFIELD. I appreciate the Senator's comments. Let me add a further comment on economic life. The rescission for fiscal year 1981 which will be part of the instructions in this resolution can only be applied to the last quarter of fiscal year 1981.

Bear in mind we are going to have to take this rescission package—that has exempted the military, that has exempted the cuts that would be a budgetary reflection of any action on entitlements and direct spending—and we have to apply that total rescission package to the last quarter of 1981.

We are not going to be in the process of reducing budgets; we are going to be in the process, if this amendment and others pass, of excising programs. There is a great difference between reducing and excising.

I just want to make that point clear. I am in total sympathy with the objective stated, but I just have to face the reality of what the appropriations committees can and cannot do in the area of reality and within restrictions.

If the Senator would amend this to have all of that funding taken out of the military budget or out of the Senate stationery allowance, I would certainly join in the amendment. But there is no likelihood of that happening and the Senator from Arkansas knows it. Yet the procurement savings I think, very frankly, could all be taken, which this amendment represents, out of the military. But I face that reality on what the mood of the Senate is.

Mr. PRYOR. I think that is an issue that the Appropriations Committee should decide. I hope they will do it with the wisdom with which they customarily act.

I would also say I applaud what the Appropriations Committee has done in the past in laying out these general principles we hope to accomplish. But this is an amendment, I say to my friend from Oregon, where we are attempting to implement those principles simply by adding a dollar figure to them. I hope this dollar figure will be accepted.

Mr. HATFIELD. I appreciate the Senator's comments, but may I just state these are not general principles; these are directions.

The PRESIDING OFFICER. Who yields time?

Mr. PRYOR. I yield 5 minutes to my distinguished friend from Montana.

Mr. BAUCUS. Mr. President, I am pleased to be a cosponsor of Senator PRYOR's amendment. The issue is very simple: Are we serious about cutting fraud, waste, and mismanagement in Government? That is what it boils down to.

President Reagan was elected, in part, because the people of our country believe there is waste in Government, that the Government is spending too much, and that we have to find a way to get rid of a lot of this nonsense.

Mr. President, I know there is waste in Government. You know there is waste in Government. The people of this Nation know there is waste in Government.

And, the Senate Budget Committee knows there is waste in Government. In section 11 of the budget resolution before us today, the committee recognizes that waste, fraud, and abuse exist in Government.

But section 11 does not curb waste, fraud, and abuse. It merely states that the Senate Committee on Governmental Affairs should report changes in laws to accomplish savings in waste, abuse, and fraud. But it does not require that these savings be produced. It is merely wishful thinking, these savings do not appear in the budget totals.

Mr. President, let me say that I applaud the Senate Budget Committee's intentions. The committee recognizes the existence of waste and, in its report, the committee states that it is its hope that those agencies, such as the Inspector General's offices, whose function is to fight waste, fraud, and abuse, be exempted from the budget reductions in this resolution.

But, Mr. President, I believe that we can curb waste and fraud today. This budget resolution provides a vehicle to accomplish this vital task. This amendment that I cosponsor does it.

This amendment is a good amendment. It sounds good and it is good. And it is a serious amendment. Just as the Appropriations Committee reduces appropriations by $2 billion, they can find ways to cut spending by $2 billion.

We all know that $2 billion is very, very conservative. There is much more than $2 billion in waste in our Federal Government.

The GAO in a summary this January has identified $3.7 billion in waste and mismanagement in Government. At this point Mr. President I ask unanimous consent to place in the RECORD the GAO summary.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

FINANCIAL SAVINGS AND OTHER BENEFITS

GAO cannot compel the agencies or the Congress to accept its recommendations. Thus, action on our recommendations rests on the persuasiveness of our arguments. Agency management and the Congress must be convinced that our analyses are sound and that it is in their interests to take the actions we recommend. Agencies' awareness of the Congress' attention to our reports no doubt stimulates their interest in and attention to recommendations made to them.

The effect of GAO's activities on financial savings and improvements in the operations and effectiveness of Government programs and activities cannot be fully measured. The increase in governmental effectiveness from actions taken on some of our recommendations simply cannot be stated in dollars and cents.

When actions taken by the Congress or an agency lead to measurable savings, we record them. The following table summarizes the $3.7 billion in collections and other measurable savings which we identified as attributable to our work during fiscal year 1980. Of the $3.7 billion listed, about $2.8 billion represent one-time savings, while the benefits of the other $900 million will extend into future years as well. These amounts were $2.6 billion, $1.9 billion, and $700 million respectively for fiscal year 1979.

This chapter also describes savings not fully or readily measurable and other benefits from GAO activities.

COLLECTIONS

Collections attributable to our activities totaled $69.5 million. Of this, $4.7 million represented our recovery of debts that Government agencies had been unable to collect.

Progress in developing the capability of other agencies to refer uncollectible debts directly to the Department of Justice has greatly reduced GAO's direct collection activity. For example, following our recommendations, the Social Security Administration recovered $26 million in benefits overpayments to persons whose earnings exceeded an annual exempt amount. Other major collections included recoveries by the Veterans Administration for educational assistance overpayments or student loans, the Department of Health and Human Services for excessive carryover balances from Head Start grantees, and the Department of Defense for a use charge on foreign military sales from Defense inventories.

OTHER MEASURABLE FINANCIAL SAVINGS

Other measurable savings consist largely of actual or potential savings from actions taken or planned by the Congress and Federal agencies. In most instances, the potential benefits are estimated.

ADDITIONAL FINANCIAL SAVINGS NOT FULLY OR READILY MEASURABLE

Much of our work recommends changes either to promote the efficiency of program operations or to achieve the results for which an activity or program was initially designed. Given the nature of this work, not all the resulting improvements or savings can be measured. Examples of achievements not readily measurable are presented here.

ESTABLISHMENT OF A LOAN PROGRAM TO STIMULATE SMALL-HYDROPOWER DEVELOPMENT

In our report to the Chairman, Senate Committee on Natural Resources, and the Chairman, Senate Subcommittee on Energy Conservation and Supply, we concluded that

development of small hydropower resources through the Rural Energy Initiative Program has not been effective. We pointed out that (1) a small- hydropower loan program authorized by Title IV of the Public Utilities Regulatory Policies Act of 1978 (PURPA) was not being pursued by the Department of Energy (DOE) and (2) a loan program funded and managed by DOE as authorized by PURPA would be the best environment for pursuing the development of small-hydropower resources.

In June 1980, the Congress enacted sections 408 and 409 of the Energy Security Act which directs the Secretary of Energy to establish within 6 months such rules and regulations needed to fully implement Title IV of PURPA. (EMD-80-66, April 1, 1980)

AUTOMATIC DATA PROCESSING

Actions taken or planned, estimated savings.

Reduction in the WWMCCS ADP program—Defense (nonrecurring), $46,700,000.

Termination of the Army's Tactical Operations System Program—Army (nonrecurring), $51,500,000.

Reduction in number of computer systems to be acquired under Phase IV program—Air Force ($4,600,000 estimated annual savings and $737,000,000 nonrecurring), $741,600,000.

Elimination of planned acquisition of additional computer for telecommunications purposes that can be handled by existing equipment—Defense ($380,000 estimated annual savings and $260,000 nonrecurring), $640,000.

Reduction in appropriation request for computer upgrade—National Security Agency (nonrecurring), $1,000,000.

Termination of TACFIRE procurements—Army (nonrecurring), $153,100,000.

COMMUNICATIONS

Termination of SSS satellite development—Defense (nonrecurring), $51,400,000.

Consolidation, automation, and elimination of telecommunications centers—Defense ($91,000,000 estimated annual savings and $183,000,000 nonrecurring), $274,000,000.

Increased use of FTS by military installations—Defense ($10,300,000 estimated annual savings and $25,300,000 nonrecurring), $35,600,000.

Consolidation of management and selected data circuits—GSA, FBI, IRS, Secret Service, and Alcohol, Tobacco, and Firearms (estimated annual savings), $180,000.

Channel-pack certain data circuits supporting the National Criminal Information Center—FBI (estimated annual savings, $156,000.

Correction of programming error on special computer-controlled communications equipment—Defense (estimated annual savings), $36,000.

Reduction on cost of WATS line used by the Army Survivor's Benefit Program—Army (estimated annual savings), $22,000.

Reductions in appropriations and improvements in DOD's Dedicated Communication Services—Defense (estimated annual savings), $5,000,000.

Termination of additional DSCS II satellite procurement—Defense (nonrecurring), $105,200,000.

COMMUNITY DEVELOPMENT AND HOUSING

Regulations issued increasing the terms of Housing Assistance Payment contracts with housing developers to 20 years from 5 years resulting in savings of subsidy costs—Housing and Urban Development (estimated annual savings), $150,000,000.

Elimination of rent reduction incentive in an effort to contain increases in section 8 existing housing costs and streamline program administration—Housing and Urban Development (estimated annual savings), $49,600,000.

Revision of rent-adjustment schedule for District of Columbia Government public housing tenants—District of Columbia Government (estimated annual savings), $456,000.

Updating rent schedule for public housing—District of Columbia Government (estimated annual savings) $679,000.

Recovery of costs of utility consumption on tenant-owned appliances in public housing—District of Columbia Government (estimated annual savings), $72,000.

CONSTRUCTION

Avoidance of unnecessary additional construction at an electronic/electrical rework facility and other expenditures—Navy (nonrecurring), $13,563,000.

Denial of additional funding for construction projects at the Veterans Administration Medical Center in East Orange, New Jersey—Veterans Administration (nonrecurring), $7,900,000.

Denial of funding request for a solar hot water system and connecting corridor for the Nursing Home Care Unit project at the Gainesville, Florida, Veterans Administration Medical Center—Veterans Administration (nonrecurring), $252,000.

Cancellation or reduction in scope of planned construction projects and transfer of excess equipment—Bureau of Prisons (nonrecurring), $1,426,000.

CONTRACTING POLICIES AND PROCEDURES

Improvements in contracting procedures—Bureau of Prisons (estimated annual savings), $69,000.

Guidance provided to contracting officers on incorporating most economical rate into contracts with halfway houses—Bureau of Prisons (estimated annual savings), $1,000,000.

CRIMINAL JUSTICE

Increased utilization of Federal Community Treatment Centers—Bureau of Prisons (estimated annual savings), $109,000.

EDUCATION

Congress directed the Bureau of Indian Affairs to close two schools—Interior (estimated annual savings), $10,000,000.

Reduction in the District of Columbia Public Schools' budget for the operation of the Capitol Page School—District of Columbia Government (estimated annual savings), $22,000.

Increased services provided to East-West Center by University of Hawaii—State Department (estimated annual savings), $200,000.

EMPLOYMENT AND TRAINING

Arrangement for Army to be prepared to train Navy and Marine helicopter pilots to avoid equipment procurement—Defense (nonrecurring), $60,000,000.

Termination of DOL's Employment Security Automation Project—Labor (nonrecurring), $129,000,000.

Curtailment of costly recruitment activities in Puerto Rico during the 1979 apple harvest and implementation of recommendations to prevent misuse of CETA funds in future harvests—Labor (nonrecurring), $275,000.

FINANCIAL MANAGEMENT

Reduction by $6.6 million of foreign currency holdings in Europe—Defense (estimated annual savings), $528,000.

Establishment of requirement for the payment of interest on the U.S. investment in the Panama Canal—Defense (estimated annual savings), $20,000,000.

Reduction of $5.2 million in cash balances held by accounting and finance offices—Defense (estimated annual savings), $416,000.

Improvements in audit information and accounting systems increases recovery of overpayments identified in internal audit reports—Health and Human Services (estimated annual savings), $4,800,000.

Improvements in cash management procedures for remitting payments to insurers for Federal Employee Health Benefits and Group Life Insurance Programs—Office of Personnel Management (estimated annual savings), $4,650,000.

Improved procedures to prevent duplicate payments to halfway houses—Health and Human Services (estimated annual savings), $150,000.

Changes in systems for determining value of imported merchandise resulting in lower Customs Service administrative costs—Customs Service (estimated annual savings), $1,800,000.

FOREIGN MILITARY SALES

Change in pricing to recover a four-percent charge on foreign military sales items produced on Government-owned plant and equipment—Defense (estimated annual savings), $34,444,000.

Change in pricing to recover a one-percent charge on foreign military sales items sold from Defense inventories—Defense (estimated annual savings), $8,357,000.

Reduction of appropriations as a result of agency's failure to collect quality assurance costs on foreign military sales contracts—Defense (nonrecurring), $32,000,000.

Denial or reprogramming request for damage claims reimbursement to a foreign government—Defense (nonrecurring), $12,300,000.

MANAGEMENT

Reduction in the 1980 GSA appropriation request for records declassification activities of the National Archives and Records Service—GSA (nonrecurring), $200,000.

Reduction in the expenditures for film preservation by the National Archives and Records Service—GSA (nonrecurring), $1,246,000.

Reduction in space requirements and corresponding expenditures for the VA records processing center in St. Louis, Missouri—GSA (estimated annual savings), $623,000.

Reduction in appropriations for DOD's Tri-Service Medical Information System—Defense (nonrecurring), $12,500,000.

Reduction in requested Defense appropriations for recreation specialists positions for the Army in Europe—Army (nonrecurring), $4,400,000.

Closing of enlisted dining facility and replacement of military personnel with civilians at the Naval Weapons Support Center—Defense (estimated annual savings), $33,600.

Closing of consulates and consulates general posts overseas—State Department (estimated annual savings), $1,900,000.

Reduction in costs by filling certain positions with civilians instead of sworn officers—District of Columbia Government, Metro Transit Police, U.S. Park Police ($947,000 estimated annual savings and $265,000 nonrecurring), $762,000.

Reduction in staffing level for Office of Investigations, U.S. Customs Service—Customs Service (estimated annual savings), $1,900,000.

MATERIEL MANAGEMENT

Implementation of system enhancements to improve tracking of costs and schedule baseline for the strategic petroleum reserve—Energy (non-recurring), $240,000,000.

Implementation of disposal regulations and utilization of existing Customs Service storage facilities to reduce storage costs for property forfeited or voluntarily abandoned at ports of entry—Commerce and Interior (estimated annual savings), $57,000.

Location of unrecorded assets at Army retail supply activities which were needed to fill local and Army-wide requirements—Army (nonrecurring), $10,700,000.

Identification of low-cost low-use items available from commercial supply sources—Defense (nonrecurring), $6,700,000.

Implementation of a new war reserve item essentiality system which better identifies critical items to an aircraft's mission and better allocates funding for war reserve parts having higher priority—Air Force (nonrecurring), $67,700,000.

Proper consideration of serviceable materiel returns in forecasting inventory requirements—Army (estimated annual savings), $46,000,000.

Reduction of excess watercraft in storage and readjustment of Product Improvements Program costs—Army ($153,263 estimated annual savings and $6,144,000 nonrecurring), $6,297,263.

Reductions in Army's fiscal year 1980 ammunition-related appropriations and improvements in ammunition war reserve materiel inventories—Army (nonrecurring), $120,200,000.

Reduction in fiscal year 1980 Defense appropriation to encourage DOD to dispose of unneeded inventory retained for possible sale to foreign governments—Defense (nonrecurring), $11,300,000.

Reduced requirements for war reserve spare parts for the U.S. Air Force, Europe—Air Force (nonrecurring), $23,348,000.

Reduction in appropriation request to reflect savings possible by using available serviceable parts to avoid repairs—Army (nonrecurring), $3,000,000.

Reduction in inventory requirements through elimination of duplication of unfilled orders in buy computations—Defense (estimated annual savings), $25,000,000.

Consolidation of two Defense mail-order catalog systems, to reduce operating costs—Army, Navy, Air Force (estimated annual savings), $1,588,000.

MEDICAL CARE

Contract for a feasibility study on using expanded function dental auxiliaries was not awarded—Veterans Administration (nonrecurring), $611,000.

Correction of errors in computing hospital, skilled nursing facilities, and home health reimbursement limits—Health and Human Services (estimated annual savings), $546,000.

Reduction in Veterans Administration expenditures for fee dental care and increased operational efficiency at Seattle dental clinic—Veterans Administration (estimated annual savings), $890,000.

MILITARY READINESS

Reduction in flying hour requirements of about 8,000 hours annually—Navy and Marine Corps (estimated annual savings), $8,100,000.

PAYMENTS TO GOVERNMENT EMPLOYEES AND OTHERS

Enactment of legislation to allow the payment of a cash incentive to military personnel who move their own household goods—Defense (estimated annual savings), $6,000,000.

Correction of pay and personnel procedures in the Army National Guard and Reserve to eliminate erroneous payments—Army (estimated annual savings), $1,100,000.

Reduction in erroneous welfare payments—District of Columbia Government (non-recurring), $1,600,000.

Elimination of veterans' benefits for certain military dropouts—Defense and Veterans Administration (estimated annual savings), $215,000,000.

Collection of educational assistance overpayments and defaulted educational loans from veterans—Veterans Administration (estimated annual savings), $6,000,000.

Identification of sugar ineligible for the Agricultural Payment Program—Agriculture (nonrecurring), $800,000.

Reduction in civil service disability retirement costs—Office of Personnel Management (estimated annual savings), $140,000,000.

Reduction in sick leave appropriation—Defense (nonrecurring), $58,800,000.

Reduction of payments to States under Public Law 94-565 and other land payment adjustment acts—Interior (estimated annual savings), $46,000.

PROCUREMENT

Correction of procurement actions that violated various appropriations laws—Interior (nonrecurring), $583,000.

Termination of unauthorized personnel service contracts—State Department (nonrecurring), $50,000.

Termination of planned sole-source contract award on the Ft. Hood solar energy project—Energy (nonrecurring), $20,000,000.

Reduction in cost of base support operations by contracting certain functions—Army (estimated annual savings), $2,590,000.

Improvement in bid solicitations to move household goods resulting in savings in permanent change of station funds—Defense (estimated annual savings), $4,000,000.

Reductions of Government-furnished materials provided to contractors—Defense (nonrecurring), $415,300.

Cancellation of purchase request for two switching locomotives—Marine Corps (nonrecurring), $800,000.

Reduction of Defense appropriation request for economies possible in shipping cargo overseas—Defense (nonrecurring), $22,600,000.

Cost avoidance by obtaining lower rates for moving DOD shipments of household goods overseas—Defense (estimated annual savings), $8,000,000.

PRODUCTIVITY

Improved productivity at Air Force maintenance depots resulting in cost avoidance in fiscal year 1980—Air Force (nonrecurring), $70,000,000.

Improvement of productivity at Navy shipyards—Navy (nonrecurring), $82,300,000.

REAL PROPERTY MAINTENANCE

Cancellation of one of two FRAM destroyer overhauls scheduled during fiscal year 1980—Navy (non-recurring), $15,000,000.

Improvement in combat vehicle maintenance practices in Mainz, West Germany—Army, nonrecurring), $40,000.

RESEARCH

Eliminating two proposed energy research contracts—Energy (nonrecurring), $2,600,000.

Modification of plans for fluidized-bed combustion test facility—Energy (nonrecurring), $52,400,000.

REVENUES

Change in classification of machine-processed cigarette leaf tobacco resulting in increased import duties—Customs Service (estimated annual savings), $2,000,000.

SOCIAL SECURITY

Resolution of uncleared 1974-1976 Social Security earnings enforcement cases and improvement of control system for resolving such cases—Health and Human Services (estimated annual savings), $8,700,000.

Reduction in estimate of the first year cost of section 301 of the Social Security Disability Amendments of 1980—Health and Human Services (nonrecurring), $22,000,000.

TRANSPORTATION

Reduction in number of vehicles in the interagency motor pool in Honolulu, Hawaii—GSA (nonrecurring), $206,000.

Elimination of five AMTRAK routes based on route criteria and standards—National Railroad Passenger Corporation (estimated annual savings), $59,000,000.

WEAPONS SYSTEMS

Reduction in contract cost for development and production of the F-16 aircraft—Air Force (nonrecurring), $19,064,000.

Deletion of requirement for certain special electronic equipment which was not needed for the planned future mission of the B-52G aircraft—Air Force (nonrecurring), $8,000,000.

Reduction of appropriation request for the advanced strategic air-launched missile program—Air Force (nonrecurring), $41,800,000.

Reduction in appropriation for the surveillance towed array sensor system—Navy (nonrecurring), $119,400,000.

OTHER ITEMS

Reduction of number of military dependents authorized overseas—Defense (estimated annual savings), $3,204,000.

Restriction of trading of commodity options—Commodity Futures Trading Commission (nonrecurring), $990,000.

Elimination of funds for low-cost/no-cost energy conservation program expansion—Energy (nonrecurring), $15,000,000.

Improvements in land acquisition practices—Agriculture and Interior (nonrecurring), $41,500,000.

Mr. BAUCUS. Mr. President, in addition, the various reports of the various Inspectors General in the various agencies identified at least $1 billion in waste and mismanagement.

We do not often see those reports. The agencies do not publicize them. It is embarrassing. They do not want to publicize them. But they are there. At this point, Mr. President, I ask unanimous consent to place in the RECORD summaries of audit findings from various Inspector General semiannual reports.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SEMIANNUAL REPORT, APRIL 1, 1980–SEPTEMBER 30, 1980, OFFICE OF INSPECTOR GENERAL, U.S. DEPARTMENT OF LABOR

AUDIT RESOLUTION ACTIVITY,[1] APR. 1 TO SEPT. 30, 1980

[1] This table does not include internal, ADP, or any other reports issued which did not question or recommend for disallowance any costs. Audit resolution occurs when the contracting official has issued a determination as to the appropriate disposition of questioned items of cost, and the auditor has no disagreement.

[2] "Dollars" signifies both questioned costs and costs recommended for disallowance, thus, these audit exceptions may be attributable to different kinds of problems, ranging from poor management to statutory violations. The program agency grant officer will determine the extent to which the unresolved costs are actually disallowed.

[3] The differences between the beginning balances in this schedule and the ending balances in the schedule in the previous semiannual report are a result of refining our management information system. The largest adjustment was the removal of $20,000 000 from the balance representing draft audit reports for Native American grantees which were shown as final reports.

Bryan B. Mitchell, Acting Inspector General.

OIG Accomplishments Toward Reducing Fraud, Program Misuse and Management Inefficiency.

Ms. Alair Townsend, Assistant Secretary for Management and Budget.

Attn: Mr. Harry Hadd.

I. Cost savings financial information current as of December 31, 1980, reflects progress in achieving FY 1980 savings goals of $134.0 million.

A. Audit

Some audit savings are defined as audit disallowances in which Principal Operating Components (POCs) concur. Such disallowances are entered into the Departmental accounting system as accounts receivable. Other audit savings occur as documented cost avoidance resulting from audit recommendations.

[Dollars in millions]

Actual savings—Fiscal year 1980:	
POC concurred in disallowances:	
October	$2.8
November	2.0
December	12.7
Subtotal savings	17.5
Documented cost avoidance:	
October	4.5
November	----
December	----
Subtotal savings	4.5
Total savings	22.0

B. Investigations; Investigations accomplishments reported through December 31, 1980

Indictments, 137.

Convictions, 145.

Savings Attributed to Investigations:

Source: Fines, Recoveries, and Restitutions, Fiscal year 1981 goal, $1,750,000; Credit to OIG, actual through December 31, 1980, $745,702.

C. *State Medicaid Fraud Control Units (SMFCU)*

Information below is an update for the entire fiscal year 1980 through December 31, 1980.

Indictment/Information, 616.

Convictions, 378.

Savings attributed to SMFCU

Source:	*Actual through December 1980*
Overpayments identified	$26,297,202
Fines	2,371,687
Restitutions	10,379,289
Total	39,048,178

II. Legislative initiatives for additional reduction of fraud and abuse:

A. Investigation has evidenced extensive fraud and costs related to fraudulent SSA applications. Legislation should be initiated to increase maximum penalties for Social Security Number fraud to specify that it is illegal to counterfeit, alter, buy or sell social security numbers and/or cards.

U.S. DEPARTMENT OF COMMERCE,
Washington, D.C., November 30, 1980.

Hon. WALTER F. MONDALE,
President of the Senate.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

DEAR MR. PRESIDENT AND MR. SPEAKER: Pursuant to Section 5(b) of the Inspector General Act of 1978, I hereby transmit for your review a report covering the activities of the

Office of Inspector General for the period April 1, 1980, to September 30, 1980.

The appendices to the report include the information specifically required by Section 5(a) of Public Law 95–452.

Sincerely,

MARY P. BASS,
Inspector General of Commerce.

OTHER AUDIT ACTIVITIES

DOLLAR SAVINGS RESULTING FROM OIG ACTIVITIES

During fiscal year 1980, our audit efforts resulted in $5.9 million of estimated savings and approximately $0.4 million in cost avoidance or deferrals, excluding the LPW program changes. In addition, we made recommendations for improvements for which savings although great, are not readily determinable. Our preventive investigative efforts assisted Department officials in identifying and avoiding loan actions totaling $5.3 million which carried associated undue risks.

We previously reported $4.5 million in cost savings on the LPW program. A breakdown of this figure into costs questioned and sustained in interim audits, taken together with the figures for this period, indicates $2.1 million in actual savings and $5.1 million in costs questioned and sustained by EDA officials in interim audits. A portion of the potential $5.1 million savings will be reduced by overruns upon final audits. An additional $69 million in costs questioned awaits review by EDA officials. We estimate that additional millions in savings will result when these questioned amounts are resolved. Additional savings will also result as our LPW staff completes audits of the other $3 billion in grants.

STATUS OF RESOLUTION OF COSTS QUESTIONED IN AUDITS

During this fiscal year, 3,015 audit reports and $90 million in questioned costs were resolved. Approximately $123 million costs questioned are unresolved at the end of the current reporting period, representing a $10 million increase over the prior period. About $81 million of costs questioned have been outstanding over six months. Approximately 50 percent, or $65 million of the outstanding costs questioned are in EDA's Local Public Works (LPW) programs. While the LPW program is the primary reason for the increase, the program also represented almost half of the $90 million resolved during fiscal year 1980.

During this fiscal year, the Office of Procurement and ADP Management's outstanding questioned costs were reduced by $13 million and it resolved a total of $33 million in questioned costs. While the Minority Business Development Agency has reduced its total unresolved questioned costs over 2 years old from $9 million to $2 million as reported on page 77, the total amount remaining unresolved has increased by $800,000 to $5.5 million. Statistical presentation of audit resolution activities begins on page 30.

As discussed on page 15, we are continuing to work with agency officials through task forces to resolve outstanding audit recommendations.

HOTLINE COMPLAINTS: AUDIT RESPONSE

Since the inception of the hotline, an increasing number of complaints have warranted review by the Office of Audits. In the past six months, the audit effort expended on hotline complaints has increased significantly and we anticipate that this trend will continue.

Some of the hotline complaints have involved contract improprieties, mismanagement involving both contractor and Departmental operations, waste of funds or material, and suspected misuse of contract/grant funds. The examples below show how auditors have pursued these complaints by evaluating existing circumstances, reporting identified weaknesses and recommending actions for more effective operations.

Questionable construction project

A private citizen's complaint, filed with the General Accounting Office and referred to us, alleges that EDA is funding the planned construction of a strawberry cold storage facility which the complainant believes will not be economical to operate, will create excess storage capacity and will offer no benefit to the local area's farmer cooperatives which the facility is intended to serve.

We have confirmed that in 1976 EDA awarded a grant under the Title I Public Works Program. The award was made despite two separate EDA studies which had concluded that construction of the facility would create excess cold storage capacity and had recommended that approval be denied because enabling legislation prohibits funding projects that will create excess capacity. EDA is reevaluating this project and will report its findings to us.

Misclassification of travel obligations

We found several National Oceanic and Atmospheric Administration (NOAA) finance offices miscoding travel obligations by recording them under other object classifications, thus avoiding travel fund limitations. The number of miscoded entries indicates a problem more serious than clerical error. NOAA officials have agreed to review all financial records to make the appropriate adjustments. We plan to review the financial obligations of other operating units to determine whether similar misclassifications exist elsewhere. Details on our findings and recommendations begin on page 74.

Improper vehicle acquisitions

The complainant informed us that a Regional Office of the National Marine Fisheries Services had acquired passenger motor vehicles without obtaining the specific authorizations required by law.

DEPARTMENT OF TRANSPORTATION,
Washington, D.C., October 31, 1980.

Hon. NEIL GOLDSCHMIDT,
Secretary of Transportation,
Washington, D.C.

DEAR MR. SECRETARY: I respectfully submit this Semi-Annual Report on the activities of the Office of Inspector General for the six-month period ended September 30, 1980. Highlights of our accomplishments are contained in the Executive Summary which begins on page iii.

The Inspector General Act of 1978 requires that you forward this report within 30 days to appropriate committees of the Congress. In transmitting the report to the Congress, the Act provides that you may include whatever additional comments you consider appropriate.

I am prepared to discuss or provide additional information on any of the items contained in this report.

Sincerely,

FRANK S. SATO.

Restitution/recovery	$27,500	$97,068	$124,568
Cost savings/avoidance	$430,000	0	$430,000

U.S. DEPARTMENT OF EDUCATION,
Washington, D.C., October 31, 1980.

Hon. SHIRLEY M. HUFSTEDLER,
Secretary of Education,
Washington, D.C.

DEAR MADAM SECRETARY: In accordance with the requirements of Section 5 of the Inspector General Act of 1978 (P.L. 95-452), I am submitting the first semiannual report of the Department's Office of Inspector General. The report provides a summary of our activities during the period April 1, 1980 through September 30, 1980.

The Act requires that you submit this report, along with any comments of your own, to appropriate Congressional Committees and Subcommittees within 30 days.

We look forward to working with you and other Departmental officials and with the Congress in an effort to improve efficiency and economy in the Department's programs and activities and to prevent and detect fraud and abuse.

Sincerely yours,

JAMES B. THOMAS, Jr.,
Inspector General.

Student Financial Assistance. An audit of a college's administration of student financial assistance programs disclosed that the school had:

Made awards to ineligible students;

Not documented its determinations of student financial need; and

Not identified disbursements to specific students.

As a result, an estimated $440,000 of $9.4 million administered by the college had been improperly used. Further, the allowability of an additional $1.3 million was questioned. Resolution of these findings is dependent upon the outcome of legal proceedings between ED and the college.

Reports prepared by non-Federal auditors also identified deficient practices at other postsecondary institutions. Common problems were: High default rates, insufficient matching funds by institutions, insufficient documentation to support awards, discrepancies in reported data, missing student affidavits, and incomplete or missing promissory notes. OIG is planning to review the effectiveness of the ED student financial assistance program review process.

D. Audit resolution: During the last 6 months, 1,718 audit reports were issued, of which 1,403 required or will require action on the part of program managers before resolution can be completed. During this same 6-month period 1,247 audits were resolved. For the audits requiring action, the following table presents receipts, closures, and comparative balances by principal action office as of April 1 and September 30, 1980:

Office	Status of audits unresolved as of Apr. 1, 1980			Audits received during 6 mo period	Audits closed during 6 mo period	Status of audits unresolved as of Sept. 30, 1980		
	Total	Over 6 mo old				Total	Over 6 mo old	
		Number	Percent				Number	Percent
OPE	1,221	358	29	1,299	1,141	1,379	472	34
OM-DGP	126	76	60	86	74	138	94	68
OESE	12	10	83	6	12	6	1	17
OSERS	11	8	73	3	5	9	5	55
OVAE	9	7	78	5	2	12	7	58
OERI	3	1	33	1	1	3	2	67
NIE	27	10	37	3	12	18	11	61
Total	1,409	470	33	1,403	1,247	1,565	592	38

As of April 1, 1980, there were 470 unresolved audit reports over six months old, 12 of which had deficiencies over $250,000 and were being tracked by use of a quarterly reporting procedure. As of September 30, 1980, the total increased to 592 of which 13 had deficiencies over $250,000. Five are awaiting legal action, one is being held pending the outcome of an investigation and the remaining seven are being held for further information and analysis. The total monetary deficiency noted in these 13 audits is $19,494,642, while the combined total for all open ED audits as of September 30, 1980, exceeds $48 million.

A major result of audit resolution is the amount of funds recovered. Of the 1,247 audit reports resolved during the period, 471 contained findings involving monetary deficiencies. The following information summarizes action concerning the resolution of the 471 audit reports containing monetary deficiencies for the six-month period:

Total costs questioned by auditors	$17,050,552
Costs sustained by program managers	11,487,694
Additional disallowance identified during program reviews triggered by these audits	1,498,631
Total potential recoveries	12,986,325

Of the total $12,986,325 marked for recovery by ED, the following actions were taken:

Amount collected by the time of final resolution	$1,873,626
Accounts receivable established by ED's Division of Financial Management—(Note: A receivable account is established even though an auditee may subsequently appeal the Department's findings.)	7,685,606
Offset against the auditee's Departmental Federal Assistance Financing Systems account	2,310,404
Auditee required to take steps to reimburse the student financial assistance program account for costs determined ineligible	1,116,689
Total	12,986,325

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., October 31, 1980.

Memorandum

To: The Secretary.
From: Inspector General.
Subject: Semiannual Report on Operations of the Office of Inspector General.

Attached is my fourth semiannual report for the six-month period ended September 30, 1980.

The report contains an overview of the activities in the Office of Inspector General with emphasis on our major accomplishments. As required by the Inspector General Act of 1978, I have also listed and described those audit reports with outstanding recommendations which have not been closed. Several of these reports were shown as delinquent in my last semiannual report of March 31, 1980.

Section 5 of the Act requires that you transmit this report to the appropriate committees or subcommittees of the Congress within 30 days after its receipt, together with your own report containing any comments you deem appropriate.

JUNE GIBBS BROWN.

B. Costs questioned or unsupported, and other savings: The external audits consist primarily of preaward audits, and interim or final cost-incurred audits of contractors and grantees. As a result of the external audits for FY 1980, $65 million of costs claimed or proposed by the contractors and grantees were questioned [1] or unsupported.[2]

SUMMARY OF QUESTIONED OR UNSUPPORTED COSTS, APR. 1-SEPT. 30, 1980

[Dollar amounts in millions]

	Preaward	Interim/final	Total
Total amount audited	$121	$498	$619
Questioned or unsupported:			
Amount	$23	$27	$40
Percentage	19	4	7

SUMMARY OF QUESTIONED OR UNSUPPORTED COSTS' FISCAL YEAR 1980

[Dollar amounts in millions]

	Preaward	Interim/final	Total
Total amount audited	$180	$800	$980
Questioned or unsupported:			
Amount	$34	$31	$65
Percentage	19	4	7

The Bureau of Indian Affairs (BIA) and the Water and Power Resources Service (WPRS), have the highest percentage of costs not approved:

COSTS QUESTIONED OR UNSUPPORTED, FISCAL YEAR 1980

[Dollar amounts in millions]

	Preaward	Interim/final	Total
Amount	$0.6	$6.8	$7.4
BIA percentage	20	26	25
Amount	$8.6	$3.1	$11.7
WPRS percentage	26	22	25

The high percentage of costs questioned or unsupported on interim/final audits is of special concern because these audits serve as a basis for settlement of reimbursement claims with contractors and grantees. Based on our preliminary analysis of the Interior Procurement Data System and other analyses, we have audited only a small percentage (less than 25 percent) of contract costs. Accordingly, many such contracts are closed without audit. We are developing strategies to improve audit coverage of the contracting and procurement activities; however, because of limited resources many areas have received insufficient audit coverage.

Information received to date from contracting and other officials shows that audits have reduced reimbursement claims from contractors, grantees, and lessees by $2.9 million during the six-month period (for FY 1980, $8.5 million was disallowed). Because of the time required for reviews, negotiations, and decisions by contracting and other officials, and the delays resulting from litigation, some of these disallowances result from audits performed prior to FY 1980. Accordingly, a percentage of the savings from the costs questioned in FY 1980 will be realized in the future and reported in subsequent semiannual reports.

Our review and negotiation of indirect cost rates with the state agencies and Indian organizations is one of our key strategies to prevent abuse and waste. Our efforts during the six-month period ending September 30, 1980, have resulted in substantial cost avoidance (a savings totaling $6.4 million). We reviewed indirect cost proposals of 31 state organizations, and reduced the proposals $734,000. Our reviews of the indirect cost proposals of 85 Indian organizations resulted in reducing the proposals $5.7 million. One proposal alone was reduced $621,000 because duplicative costs and unallowable capital expenditures were included in the proposed indirect cost pool.

There are two main reasons for the large variance in the percentage of questioned proposed indirect costs of Indian versus state organizations.

The Indian organizations do not have sophisticated accounting systems as do state organizations, and many lack the experience

[1] Questioned costs are synonymous with recommended cost adjustments because the particular cost charged may not be proper under the terms and conditions of the contract or grant or applicable rules and regulations.

[2] Unsupported costs are costs for which supporting documentation is lacking at the time of the audit.

in dealing with the indirect cost concepts. As part of our negotiation process, we have conducted several group and individual training sessions to assist those who must work with the process.

Internal audits which emphasize improvements in Interior's operations, systems, procedures, and programs have also resulted in significant benefits in one-time savings and in savings of a continuing nature. These audits unquestionably produce greater efficiency, economy, and effectiveness. They also serve to deter fraud, abuse, and other improprieties; Section II G presents some examples of the multi-million dollar impacts of these audits.

AUDITS

During the period April 1 to September 30, 1980, the Office of Inspector General issued 238 audit reports. One hundred and forty-one of these reports had monetary values associated with them as follows:

Questioned Costs	$124,338,000
Savings and Management Improvements	91,228,000
Improper Loan Payments and Guarantees	30,920,000
	*246,486,000

* This includes a monetary finding of over $163 million in an audit of the interest credit agreements of the Rural Housing Construction and Repair Loan Program.

During the same period, we closed 268 reports, 152 of which contained monetary findings. At the time of issuance, the monetary value associated with these reports amounted to $2,743,000 for questioned costs; $1,927,000 for savings and management improvements and $2,415,000 for improper loan payments and guarantees.

Adjustments during the audit resolution process changed these amounts, resulting in the following monetary values at time the reports were closed: questioned costs (Disallowances) $1,924,000, savings and management improvements $3,356,000, and improper loan payments and guarantees $1,312,000.

Claims which were established on the basis of the above disallowances were disposed of as follows: collected $1,066,000, in process of collection of $295,000, and collection waived under authority of existing legislation or the provisions of the Federal Claims Collection Act of $563,000.

On September 30, 1980, we had a total of 642 open audits. One hundred ninety-four of them had been issued within the last months, 194 were from 6 to 12 months old, 175 from 1 to 2 years, and 79 were over 2 years old.

The monetary values associated with these reports at the time of their issuance amounted to over $517 million. Even though all these reports are still open, many of their findings have been resolved, reducing the monetary value of the unresolved portions of these reports to $412 million.

A representative selection of our audits is highlighted below. In many cases corrective action has already been taken or is in progress.

FARMERS HOME ADMINISTRATION PROGRAMS

Low Income Housing Repair Grant Program: This FmHA program provides home improvement grant funds to elderly homeowners who cannot be assisted through other FmHA loan programs because their incomes are so limited they could not make the required loan payments. Grant funds, which may not exceed $7,500 are used for repairs to make the dwelling safe and sanitary or remove health hazards. The funds may not be used for cosmetic purposes or to improve the convenience of the dwelling. In fiscal year 1979, 6,842 grants totaling $19.0 million were made. In fiscal year 1980 FmHA awarded 8,589 grants amounting to $24 million.

Mr. BAUCUS. Mr. President, in addition, during the last 2 years I have been chairman of an oversight subcommittee of the Judiciary Committee. I was disappointed to find the waste that we found in the 2 years that we held hearings. The Department of Education title III program had a lot of waste. A small example is EPA, which for a couple of years took unused airline tickets and threw them in a cardboard box and did not bother to get them reimbursed. There are countless examples.

Mr. President, I ask unanimous consent to insert at this point a summary of my subcommittee's work.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

A SUMMARY OF THE WORK OF THE JUDICIARY SUBCOMMITTEE ON THE LIMITATIONS OF CONTRACTED AND DELEGATED AUTHORITY IN THE 96TH CONGRESS

Mr. BAUCUS. Mr. President, Ralph Waldo Emerson once said:

"There is nothing that so astonishes man more than commonsense and plain dealing."

Those words from the 19th century seem even more true today.

Americans are practical people, commonsense is our guide. The American question is, "Does it work, or doesn't it?"

All too often, however, Federal programs and Federal agencies lose sight of that principle. Today an alphabet soup of Federal agencies, bureaus, offices, and departments is spread all over Washington, D.C. Like the tentacles of an octopus, this bureaucracy has spread, increasingly affecting all our lives.

But as we all know, bigger is not always better. As Federal programs grow larger and spend more, they do not necessarily become more effective or efficient. In fact, often just the opposite is true.

It seems to be a fact of political life that creating new programs is far easier than eliminating those that are obsolete and wasteful. It is far easier to pass politically popular spending bills than to cut wasteful spending from an agency's budget.

But like it or not, this too is part of our responsibility as U.S. Senators. Our job must include cutting waste and fat from the Federal bureaucracy.

Senator Burton K. Wheeler was one of Montana's most distinguished U.S. Senators. As chairman of the Senate Commerce Committee he understood that Congress must constantly oversee the Federal bureaucracy, and described that role as follows:

"Had it not been for the (Congressional) inquiries into the Justice Department and the Teapot Dome deal, the American people might not yet have known that the Harding Administration was responsible for the most cynical gang of looters that ever descended on the national capital. Since then, numerous other Congressional committees have acted as 'watchdogs' over our ever-growing bureaucracy. I consider them to be absolutely essential to our system of checks and balances—and in the best tradition of a truly democratic republic. Federal office holders today wield vast power and allocate millions, even billions of dollars; all of them are as human as the rest of us, and inevitably a percentage of them are inefficient or crooked. Only surveillance by experts in another branch of government can keep crookedness and laxity to a minimum."

Federal programs have changed greatly, and grown enormously, since Burton K. Wheeler served here. And, the "watchdog" role he talked about is just as critical today

The General Accounting Office, Congress investigating arm, estimates that as much as 10 percent of the Federal budget may be wasted each year just through fraud. That money comes right out of the pockets of American taxpayers. For example, the people of Montana paid $1.4 billion in Federal income taxes between October 1, 1978, and September 30, 1979. Yet, if the 10-percent estimate is accurate, $140 million of that was wasted, nearly $200 for every Montanan.

Wasted money, mismanagement, abuse, and fraud can be found in every Federal program. Congress must lead the fight to find it and eliminate it.

This Congress began work amidst a lot of fanfare about cutting Government waste. We were supposed to be the Congress that would review and analyze Federal programs—and cut the fat from the budget.

I welcomed this effort, and made it a high priority on my agenda. But how successful were we in cutting Government waste and what lessons have we learned in the past 2 years? I have conducted ongoing investigations into several programs and agencies: the General Services Administration (GSA), the Justice Department's Land Division and its Civil Division, the title I.I program of the Department of Education, the Environmental Protection Agency (EPA), the Small Business Administration (SBA) and others.

I am proud to say that we made some significant improvements in these programs. As a result of our work, we have saved taxpayers hundreds of millions. The savings are outlined in the attachments. But I would not be honest if I said we were 100-percent successful. Compared to the enormity of the task, we barely scratched the surface.

Too often our best intentions have been thwarted by a bureaucracy that has become entrenched over the past decades. Presidents come and go, so do Members of Congress—but Federal agencies and their programs seem to live eternally, growing larger all the time. And, as new programs are added to old ones, the number of people dependent on Federal programs grows. Every Federal program develops its own constituency that fights for its continued existence. But the lobbyists for cutting wasteful spending are far less vocal.

Congress also has a tendency to take a meat-ax approach to cutting Federal spending. It is easy and appealing to cut a department's budget by a certain percentage. Although I have advocated across-the-board cuts on certain occasions, such an approach does not always solve a problem. Letting an agency decide where to cut its budget will not insure that wasteful spending is eliminated.

To stop waste effectively, each specific program must be analyzed, investigated and scrutinized. Each program must be judged on one criterion: Does it work the way it is supposed to work, is it accomplishing its goals? In short, oversight must be performed by Congress.

This kind of effort is not glamorous. Instead, it involves long, tedious hours of digging for the truth. And, it requires long hours following up an investigation to make sure improvements actually take place. This is the kind of work that should occur, however, before Congress appropriates $1. This work is essential if we are to restore confidence in the Government.

I hope our commitment to cutting wasteful spending does not end at the end of this session of Congress. We have only just begun to do the job.

Attached is a summary of the projects undertaken by my subcommittee during the 96th Congress.

The summary follows:

"SUMMARY

"1. THE GENERAL SERVICES ADMINISTRATION (GSA)

"Problem.—Charges of abuse, mismanagement, fraud and waste have plagued the General Services Administration for some time.

"Investigation.—The Subcommittee requested copies of audits conducted on GSA activities by the agency's own auditors. We looked at the Federal Buildings Service, which constructs and/or leases all federal buildings in the nation; the stockpile of strategic raw materials, consisting of at least $7-billion in such materials; and contracting procedures at the agency.

"Hearings.—The subcommittee conducted hearings on the findings of our investigation. The head of the GSA audit unit testified that he and his unit's findings and reports were worse than the actual audits claimed or stated. He also said his audit's findings were ignored by officials at GSA. The subcommittee found that the strategic stockpile was ridden with serious abuse, such as negotiated contracts and a virtual revolving door between the agencies and companies it did business with.

"Status.—As a result of our hearings and investigation, GSA added 100 auditors to its Internal Audits section. According to Howard Davia, head of the audits section, each auditor saves the federal government at a minimum of $375,000 to $400,000 a year. Our investigation was a very positive first step. But much more remains to be done. Many of the abuses we uncovered at GSA continue to plague the agency. Constant review and analysis of the agency is absolutely essential.

"GENERAL SERVICES ADMINISTRATION—METREX

"Problem.—The agency has had a long series of difficulties regarding awarding of large contracts without benefits of competition. The practice is known as sole-sourcing or non-competitive contracting.

"GSA has also left a long trail of controversial procurements involving automatic data processing equipment, computers, related software and telecommunications capability. Many such contracts have trailed on for years, involving add-ons totalling many millions of dollars.

"Other such contracts have not benefitted agencies as a whole, despite inflation claims to the contrary. Also, contracts like this invariably benefit the Washington area, and pay few dividends to States whose taxpayers foot the bill.

"METREX envisioned adding certain minimal capabilities to all Federal phones in the Washington area, some 300,000 in all, that would allow more conference calls and a greater ability to transfer phone calls.

"GSA had received an unsolicited proposal from the local telephone company, C & P, that would have allowed that organization to obtain the contract without competition or even adequate advertisement of the availability of the contract. GSA had orally accepted the proposal, and was preparing to award the contract on an interim, five-year basis; an unheard-of situation.

"Interim contracts are usually for only a few months to begin with. Second, the contract was for an eventual total of at least $300 million.

"What compounded the situation was that this was in fact an interim contract. It was to inevitably be followed by a permanent second contract, which was virtually guaranteed to be awarded to C & P. Once the technology was installed for the first contract, it would be prohibitively costly to rip it out by awarding the second contract to another company.

"In effect, then, the award of the first contract guaranteed a Federal expenditure of almost $1 billion to the same company, on a non-competitive basis. The successor contract was alleged to be in the neighborhood of $700 million, although it was extraordinarily difficult to get the agency or company to put a specific dollar figure on the agreement.

"Investigation.—The Subcommittee found out about the existence of the contract, and ferreted out exactly what it involved, specifics of the contract and players in the game. It found out how far contract negotiations had progressed, who was involved at GSA and the phone company and what terms of the unsolicited proposal were.

"As a result, METREX was slated for inclusion in the Subcommittee's GSA hearings, with the Commissioner of Automated Data and Telecommunications Service, Frank Carr, as a witness. Hearings were duly held.

"Hearings and results.—After thorough preparation by Subcommittee staff, ADTS Commissioner Carr was subjected to close questioning about need for METREX, its cost, its benefits, and non-competitive aspects of the procurement. His answers were not responsive and were highlighted in the press, embarrassing the agency and calling the entire procurement into question.

"The Subcommittee sent a number of letters signed by me to OMB, House and Senate Appropriations Committees, GSA's Administrator and related people, asking that the procurement be killed. These letters indicated by intent to pursue the matter and subject the system to intense scrutiny.

"An intent to introduce amendments to delete funds from GSA's appropriations was included in the letters. All these pressures combined with renewed press attention, had the effect of causing GSA to withdraw and cancel the proposed procurement.

"Net saving.—A minimum of $300 million. An eventual saving of at least twice that much because of the impossibility of carrying through with the secondary procurement.

"Status today.—Such an inactive procurement can be revived at any time by the agency, should an agreement be struck by the agency and a potential contractor. Renewed vigilance is essential to ensure that a repetition is not sprung upon Congress. It could happen at any time. Knowledge on their part that the Subcommittee is keeping a vigilant eye on the procurement process as GSA is the constant, effective deterrent.

"II. THE DEPARTMENT OF EDUCATION—TITLE III PROGRAM

"Problem.—Title III of the Higher Education Act of 1965, the Strengthening Developing Institutions Program, was designed to help small, struggling institutions enter the 'mainstream' of higher education.

"Over $4.5 million has been spent by six Montana schools during the 15-year existence of the program. Over $1 billion has been spent by 800 schools nationwide.

"Investigation.—In August, 1979, one Montana school was unable to obtain answers from Office of Education officials concerning their FY 1979 grant that was to begin in September.

"Their unanswered questions were basic to the program: How much money were they to receive? When would they receive it? On what could the money be spent?

"After checking with other Montana institutions and discovering they were having similar problems with the Office of Education, the subcommittee began a formal review of the entire program.

"We reviewed tens of thousands of pages of documents, including two General Accounting Office reports, internal Office of Education audits and O.E. staff technical reviews.

"Hearings.—After two days of public hearings at which seven witnesses testified, including Congressman Pat Williams, the subcommittee found and documented arbitrary decision-making, poor management, questionable use of funds and conflicts of interests, all resulting in waste of government funds.

"Status.—As a result of our investigation, the subcommittee sent 12 recommendations to the Senate Subcommittee on Education to amend Title III legislation.

"Of 12 recommendations six were enacted into law and two were implemented through administrative changes in the Department of Education. These included:

"1. Long-range plans are required for each institution applying for funds;

"2. Institutions are no longer required to use consulting firms known as 'assisting agencies';

"3. An objective proposal evaluation process has been established to prevent special consideration being given to institutions based on racial characteristics of student population;

"4. Institutions are required to plan for future self-sufficiency once Federal funding has ceased;

"5. Priority is given to cooperative arrangements that are geographically and economically sound; and

"6. Percentage of funds set aside for two-year institutions was increased.

"The two recommendations implemented administratively are:

"1. Regular site reviews by Department of Education personnel are now being conducted; and

"2. Regular financial audits are being conducted for the first time.

"Perhaps the greatest improvement has come in administration of Title III. Problems noted by Montana schools in 1979 had substantially disappeared in the FY 1980 funding cycle. Top program personnel have been replaced and new administrators are more committed to the program.

"Since it will be another year before new legislative changes are implemented (due to time lag in issuing regulations) further oversight of the program should be limited to contact with state education officials to assure that problems do not reoccur. The General Accounting Office should be asked to do an audit of the program sometime in 1982 or 1983.

"III. THE DEPARTMENT OF JUSTICE—LANDS & NATURAL RESOURCES DIVISION

"The Subcommittee's first review of a government agency was the Land and Natural Resources Division of the Department of Justice. The 'Lands' division is the federal government's litigator in a very broad area including hazardous wastes, pollution control, marine resources, wildlife protection, Indian claims and resources and land acquisition.

"In recent years, Congress has vastly expanded the National Park System. However, the number of lawyers needed to do all the attendant legal work has not been increased to meet the increased work load.

"Our review concentrated on three areas: land acquisition, hazardous wastes and wildlife protection. A public hearing was held on April 11, 1979.

"Land acquisition

"The Lands division handles much of the legal work involved when the federal government acquires lands necessary for public use. This includes initiating and prosecuting condemnation proceedings in the U.S. District Courts.

"At the time of our hearing, there was a four-year backlog in federal land purchases. Because of land price inflation, this backlog was costing the federal government at least $10-million a year.

"We succeeded in getting an additional 20 personnel slots through the Congressional authorizations and appropriations process. Although it will take five or six years to get caught upon land acquisition cases, millions of dollars already have been saved. The savings will increase each year, reaching and staying at the $40-million mark by 1984.

"Each additional attorney working on the backlog of land acquisition cases saves the government many times more than it costs to employ him. Not providing the resources needed for land acquisition cases is just simply being, "penny wise and pound foolish."

"Hazardous waste

"The tragedy of Love Canal focused public attention on the fact that hazardous wastes have been indiscriminately dumped for years throughout the United States. At the time of our hearings, the Lands Division had only one attorney working on hazardous wastes disposal cases. No one even knew where the old dump sites were.

"As a result of our efforts, the Hazardous Wastes section was created, and eleven attorneys added to its staff.

"So far, 53 civil suits have been filed by the Hazardous Waste section. These suits seek to prevent further disposal of toxic wastes at certain sites, to enforce cleanup orders at other sites and/or mandate the monitoring of other sites. Also, we are at last finding out where the sites are.

"Wildlife protection

"Our investigation found a massive illegal trade in wildlife amounting to tens of millions of dollars each year. As a result of this trade, the domestic poultry industry was suffering hundreds of millions of dollars in damages each year from Newcastle's disease, an exotic disease transmitted by certain imported birds.

"Following our investigation, we increased the number of attorneys in this section from one to eight. To date some 200 cases have been filed in the U.S. Major poultry organizations are noticing a significant decrease in Newcastle's disease.

"IV. THE ENVIRONMENTAL PROTECTION AGENCY—OFFICE OF RADIATION PROGRAMS (ORP)

"Problem.—The subcommittee's inquiry focused on reckless awarding of sole-source contracts and abuse of in-house consultants by the Office of Radiation Programs (ORP). The situation at ORP was brought to our attention by a "whistleblower" who wanted to improve the situation.

"Dr. David Rosenbaum, deputy assistant administrator for Radiation Programs, was arbitrarily ordering sole-source contracts for firms and universities that were not always the only or best contractor available.

"Dr. Rosenbaum authorized hiring consultants and experts who supervised or, for all intents and purposes, replaced permanent EPA employees.

"Investigation.—In several cases, these consultants and experts were engaged in a conflict of interest by being paid as employees of contractors and working on specfic contracts as researchers while they were paid by EPA for consulting work in the same research areas covered by the contracts.

"Basic percentage figures for competitive versus non-competitive contracts at ORP are indicative of the problem. While overall competitive contracts for EPA amounted to 79 percent of total awards, the figure for ORP was only 49 percent. The ORP sole-source contracts proposed or awarded amounted to more than $2 million.

"Hearings.—Contract officials from EPA testified at the subcommittee's September 25, 1980, hearing that Dr. Rosenbaum violated EPA procedures in many instanecs by contacting potential contractors in advance of the procurement process and personally soliciting contract proposals, which he received before the contracts office did.

"Environmental scientists at ORP and the Bureau of Mines testified that many of the justifications for sole-source contracts were misleading or false. Contract officials testified they were at the mercy of the program office for the purpose of verifying information contained in justifications.

"Dr. Rosenbaum testified he had problems with resources and caliber of ORP staff. Therefore, he testified, he needed to hire consultants and experts to buttress regular staff. This practice violates the intent of a Presidenial directive which prohibits the hiring of consultants to buttress an understaffed program office.

"Examples of specific abuses uncovered by the subcommittee include the following:

"When an ORP employee prepared a scope of work for a contract to assist in preparation of public hearings on a uranium mill tailings program, he listed several contractors who could perform the work.

"But when his material was submitted to Dr. Rosenbaum's office, it was rejected, and the employee was ordered to copy verbatim an earlier sole-source contract for the Scientists Institute for Public Information.

"ORP proposed a $285,000 sole-source contract for Cal Tech to study field monitoring techniques for radon. Dr. Thomas Tombrello of Cal Tech was to be a principal investigator (research) on this contract, but was not to be paid under the contract, which would have paid other investigators on the contract far less than $10,000 each.

"Instead, Dr. Tombrello was to be hired as an expert at EPA, and would have been paid $192.72 per day, which would have amounted to $25,053.60 for the 130-day period for which experts are hired. Simultaneously, Dr. Tombrello would have been paid by Cal Tech, clearly an apparent conflict of interest, at least. The subcommittee determined other sources were available to perform the contract.

"When the contracts office at EPA learned of this, they cancelled the contract award pending further review, so at least $285,000 was saved by the subcommittee's inquiry.

"Contracts for analyzing radon experiments and techniques were awarded by ORP to the Universities of Texas and Wisconsin. Upon examination of justifications for these sole-source contracts, the subcommittee discovered they were virtually identical.

"The work to be performed could probably have been done by one contractor for half the price of the total of both contracts, which amounted to $110,000.

"Dr. Rosenbaum proposed a $164,000 contract for the American Statistical Association to establish a program of visiting fellows at ORP. The subcommittee found other sources could have performed this sole-source contract. Furthermore, the proposal for the contract was written by Donald Rubin for the Association.

"Rubin is a senior editor at the Association, but is also a full-time consultant at EPA, another apparent conflict of interest.

"Status.—As a result of our inquiry at ORP, EPA's Inspector General began a separate investigation. It is nearly complete. A hard-hitting report should be forthcoming.

"There is evidence that abuse of Federal contract and consulting regulations is not limited to ORP, and is extensive. I have requested a GAO investigation of every office at EPA and their contracting and consulting procedures. GAO staff tells the subcommittee they have discovered agency-wide procedures requiring correction, and will detail abuses in an impending report to be finished by July 1981.

"V. THE SMALL BUSINESS ADMINISTRATION—SECTION 8(a) PROGRAM

"Problem.—The Small Business Administration's 8(a) Program is an example of good government intentions gone bad. The program, authorized by Section 8(a) of the 1953 Small Business Act, is designed to assist minority small business owners by providing Federal contracts from every agency. It is a mammoth program.

"Since the program's inception in 1963, 4,353 firms have been certified as 8(a) contractors. More than 24,000 contracts have been awarded under the program at a cost to taxpayers of nearly $7 billion.

"Despite this staggering amount of Federal dollars, only 174 firms have graduated or completed program requirements in the past 12 years. The FY 81 budget for the 8(a) Program is $6.2 million.

"Investigation.—In September, 1979, the SBA Inspector General released a comprehensive review of 1,505 firms in the 8(a) Program. Of firms reviewed, 526—36 percent—were found to have serious deficiencies ranging from eligibility problems to criminal fraud.

"Twenty-one percent of such firms were headed by individuals who did not have management control of companies, or owners who were not socially and economically disadvantaged, a requirement for program entry.

"More than a year has passed since the report was released. As of the September 25, 1980, subcommittee hearing on the 8(a) Program, no problem firms at all had been terminated from the program. In addition, the subcommittee found several millionaires were receiving 8(a) assistance.

"Subcommittee staff examined all 526 problem firms, the first time they received such scrutiny outside SBA. Examples of firms investigated include:

"The owners of Information Planning Associates of Gaithersburg, Maryland, drained the company by increasing salaries while it was losing money. Its net worth decreased from a positive $32,285 in 1974, to a debit of $108,515 by the end of 1978. Yet, total company officers' salaries increased from $41,124 in 1975 to $164,571 in 1977. During this same period, the principal owner increased his salary from $25,000 to $73,900, and increased his personal assets from $153,350 to more than $1.1 million.

"The owner of the Maddox and Stabler Construction Company of Los Angeles had a net worth of $3.4 million and annual income of $286,295 while participating in the 8(a) Program. The Inspector General suggested this firm be removed from the program, but SBA management balked.

"In the case of Multi-Mac Service Corporation, a janitorial firm based in Hampton, Virginia, an uneducated black janitor was used by a white businessman as a front to obtain 8(a) assistance.

"When the innocent black owner discovered the White businessman was stealing funds from the 8(a) firm, he turned him in to SBA. The agency subsequently terminated the firm. But when the honest black merchant tried to reapply for 8(a) assistance, he was turned down.

"Although SBA requires 8(a) firms to seek non-8(a) contracts and not rely on Federal support. Systems and Applied Sciences of Riverdale, Maryland has performed only $18,233 in non-8(a) work, compared to more than $6.2 million in 8(a) contracts. Yet, SBA refuses to terminate this company.

"Status.—We have seen no indications that the SBA intends to promptly remove undeserving firms from the 8(a) Program. However, with a strong Inspector General in place at SBA, and through constant Congressional oversight, firms which enter the program in the future will be more thoroughly scrutinized. Without such oversight, the SBA 8(a) Program will continue its record of patronage, waste, corruption, and incompetence.

"VI. THE DEPARTMENT OF DEFENSE—MILITARY SALES TRUST FUNDS

"Problem.—When the Iranian revolutionary regime unilaterally abrogated at least $9 billion in pre-agreed U.S. military sales contracts, the U.S. government was stuck with a series of contracts between pre-Revolutionary Iran and a variety of individual, private military contractors.

"While frantic efforts were made by our government to make our allies and various branches of our armed services absorb obligations to procure many weapons in question, debate centered about what would happen in the case of contracts that could not be laid off to allies or our armed services.

"The subcommittee asked could contractors here at home go to court and enforce such contracts against the U.S. government

and Treasury, declaring they were ready to deliver goods and had to be paid; if not by Iran then by the U.S. taxpayer.

"Investigation.—With tips on this situation coming from many sources, it was discovered by the Subcommittee that no one in Congress had the desire to pursue the inquiry to determine eventual liability. We went to GAO, which was willing to undertake the task.

"A report was prepared over a one-year period. As soon as the subcommittee discovered that the Iranian arms purchase trust fund posed such a problem, we began looking into the next largest trust fund, which turned out to be the Saudi Arabian Trust Fund. A similar request was made for an audit of that fund by GAO for the same reasons.

"Results.—GAO discovered first that in the case of the Iranian Trust Fund, there was definite vulnerability of the U.S. Government to lawsuits by private companies who had entered into arms purchase agreements with Iran, and who were victims of unilateral cancellation by the revolutionary regime.

"They found that in the specific situations experienced at the time, it was quite conceivable that lawsuits would be brought by companies whose contracts had not only been cancelled, but which could not have them picked up by our allies or U.S. armed services.

"In those cases, GAO found, contractors could probably go to court and obtain judgments against the U.S. Treasury. Liabilities, although no definitive figures could be computed, might amount to billions of dollars.

"This had enormous potential ramifications for the U.S. in the case of Saudi Arabia, since claims by contractors involved with that country were substantial, mounting up into the billions. In light of predictions that Saudi Arabia was in danger of following Iran into some form of revolutionary upheaval, potential hazards for the public purse were obvious, especially in light of the fact that the Iranian situation showed that not enough money was on deposit to cover unilateral cancellation of contracts. The Pentagon, both in the Iranian and Saudi situations, had not and was not requiring deposit of adequate funds to cover such an eventuality. GAO urgently recommended that action be taken immediately to require adequate deposits and that the Pentagon take action to position us properly so that vulnerability was reduced.

"Net saving.—If the proper actions are indeed taken, the saving to the Treasury in terms of reduced liability is in the neighborhood of $3–7 billion.

"VII. FEDERAL ADVERTISING AND PUBLIC RELATIONS

"Problem.—Steady growth of Federal advertising and public relations programs.

"Investigation.—226 letters were mailed to Federal entities requesting data on expenditures for advertising, public relations and public information activities, for fiscal years 1978, 1979 and 1980.

"Also sought was a breakdown of which media used—television, radio or print—and whether these activities were done internally or contracted outside.

"From obtainable figures, the Federal government spent at least $132,272,800 in FY 1978 for public relations, public information and related activities; at least $167,311,275 for such activities in FY 1979; and as of May 30, 1980, spent at least $148,451,124 for FY 1980, for the same activities.

"One group of agencies had already spent more as of May 30, 1980, three-fourths of FY 1980, on these products and services than that same group of agencies spent in each of the last two fiscal years for the same products and services.

"Examples of products from all agencies were obtained and reviewed. Some include examples:

"1. 'Cities are for Living'; (DOT).

"2. 'Common Sense in Buying a Used Car'; (DOT).

"3. 'On the Run', a 28-page glossy allegedly designed to help runaway youth in transportation centers; (DOT).

"4. 'Transportation U.S.A.', with a picture of a lobster and an article entitled, 'When Lobsters Travel, They Go By Air'; (DOT).

"5. 'Interoffice Safety Memo to the Entire Staff', a colorful brochure that notes 12 steps to office safety: 'Walk, don't run', 'On stairs, don't run, walk'; (HUD).

"6. 'International Bulletin', with an article entitled, 'How to Get an Apartment in Poland,'; (HUD).

"7. National Oceanic and Atmospheric Administration produces many movies and films. Two are: 'Clam and Oyster Sam,' an educational musical comedy designed for general audiences . . . with toetapping tunes such as 'Everybody Gotta Love an Oyster, No body Doesn't like a Clam'; (Commerce).

"8. Another example produced by NOAA was a Seafare recipe brochure, with many recipes for seafood.

"Results.—An amendment to reduce advertising, public relations and public information budgets by ten percent (an across-the-board cut has been attached to the State, Commerce and Department of Justice appropriations bill, Transportation appropriations bill and to HUD's appropriations bill). The amendment was lost in conference for State Commerce and DOJ, but was kept with the other two.

"Status.—As remaining appropriations come up on the Senate floor, this amendment will be offered. Future work includes reviewing newsletters, magazines and newspapers that agencies mail to what they view as their constituencies."

Mr. BAUCUS. If we are concerned about oversight responsibilities in this Congress, if we want to help President Reagan on the fifth leg of his economic program, we can help cut out a large portion of waste and fraud today. We can set a real target to achieve those kinds of savings.

The objections I have heard to this amendment are are not grounded on a solid foundation. First, the Senator from New Mexico says it is not relevant.

Well, it is very relevant. I am confident that the Appropriations Committee can find $2 billion in savings in Government waste.

The second objection I heard is that the Appropriations Committee is already doing this.

Mr. President, this objection proves our case, if the Appropriations Committee is already doing this. Our amendment should be accepted. They have identified waste in HUD, and I commend them. They can do the same in other agencies. But most importantly, they have agreed with us that the waste is there.

Finally, the Senator from Oregon says,

"Well, be careful, because only $100 billion is left in the so-called controllables.

I submit there is $3.7 billion plus another $1 billion in waste and we should eliminate it.

It is that simple. We should assist President Reagan in his effort to cut out fraud and waste.

Let us all join together, Democrat and Republican, and pass this amendment unanimously. We all want to cut fraud and waste. This is a serious effort to do it. We in Congress can be just as mean as junkyard dogs in trying to cut fraud and waste. Here is an effort to get the job done. I am very surprised, frankly, that the other side of the aisle opposes this effort to cut $2 billion of waste in Government spending.

I commend the Senator from Arkansas for his excellent amendment. I urge my colleagues to join us in passing it.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Senator has 10 minutes and 40 seconds remaining on the second degree amendment. The Senator from Arkansas has 8 minutes and 18 seconds.

Mr. DOMENICI. Mr. President, I am prepared to take 2 minutes and vote. If the other side wants to put theirs down, I shall yield the remainder of my time. If not, I shall reserve it. I would like to get on with it, if I may.

Mr. PRYOR. Mr. President, I am glad to yield to the distinguished Senator from Arizona.

Mr. DECONCINI. Mr. President, I rise in support of the Pryor amendment. Listening to the debate here, I realize the seriousness of trying to direct the Committee on Appropriations once again to address the overexpenditures. As the Senator has mentioned, this is not beyond the capacity of this committee. Having served on it for over 4 years, I know sometimes we do a good job; sometimes we do not. If this amendment is adopted, and I hope there will be overwhelming support on both sides of the aisle, I suspect the Committee on Appropriations can meet that goal with no great problem, certainly no greater problem than the Budget Committee has already instructed and has in the past instructed the Committee on Appropriations to cut out.

The Senator from Montana has mentioned that we are after fraud and waste. If it is available, it should be taken out, like any other surgery on any part of the anatomy that is detrimental to the health of a healthy person. I think that is what we are trying to do here.

I rise, as part of the Appropriations Committee, although only one Member, of course, in support of the amendment of the Senator from Arkansas. I hope it is adopted.

The PRESIDING OFFICER. Who yields time?

Mr. PRYOR. Mr. President, I think that is all of the Senators on our side of the aisle who desire to say something. I do reserve the right to close, if I may.

Before I go further, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PRYOR. Does the Senator from New Mexico have any further statement to make? If not, I shall simply close on my amendment.

Mr. DOMENICI. I say to the Senator,

go ahead and then I shall close and we shall vote.

Mr. PRYOR. Mr. President, I shall take just a very short time in summary. I hope the Senate, as a body, will look at this particular amendment, which is going to save $2 billion of taxpayers' money. I hope it will not be a partisan vote. I hope it will be a vote that truly reflects some of the gnawing concerns and worries and fears of the American public that there is additional money that we can find in waste, fraud, and abuse throughout our Federal system.

I must say, and I hope my friend from New Mexico, the distinguished chairman of the committee, will listen to me just a moment, that I did not think I could believe my ears just a moment ago when I heard the distinguished chairman say to his friend and to our friend from Oregon (Mr. HATFIELD) that there is no more fat in the budget to cut, that the Budget Committee has brought before us a budget that is free from fat and there is no more we can find in that budget to take out. I was amazed at that statement, because I firmly believe that there is a lot of fat left that we can take out of the budget.

I think we can go throughout the entirety of the Federal spectrum, Mr. President, and find those items and those expenditures which simply do not make sense. When, many times, the General Accounting Office comes up here to the Hill and testifies about the waste, fraud, and abuse in these programs, what we do is simply take the reports and stack them up in a corner of our office and, next year, we move to another office and end up throwing them away; and somehow, we are not heeding the advice of the General Accounting Office. I am simply saying that, one, we should heed their advice by attacking fraud, waste, and abuse in these areas; and that, second, we should follow the philosophy of the Committee on Appropriations in their findings and their guidelines by adding an actual dollar figure to the amount we want to take out in addition to the amount that they are already going to be mandated to find in these areas.

I am not talking about cutting off human services; I am not talking about taking away any program; I am talking about the frills of Government and I am talking about some things we might do without or postpone purchasing until we can get through the fiscal year 1982 situation.

Mr. President, I think this is a good amendment. I hope it will be accepted by the Senate and I think it will be a clear word to the American taxpayer that we are doing something not only to back up the President, but something to back up the people of this country, who are mad, frustrated, and concerned.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Is the Senator prepared to yield back his time? I am prepared to do so.

Mr. PRYOR. I shall delay yielding back all of my time. I would like to hear the remarks of the very distinguished chairman of the Committee on the Budget.

Mr. DOMENICI. I have no further remarks, Mr. President.

Mr. PRYOR. Mr. President, I am prepared to yield back my time.

Mr. DOMENICI. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back. The vote then occurs on the amendment in the second degree of the Senator from Arkansas. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

The result was announced—yeas 35, nays 65, as follows:

[Rollcall Vote No. 42 Leg.]

YEAS—35

Baucus	Eagleton	Metzenbaum
Bentsen	Exon	Mitchell
Biden	Ford	Moynihan
Boren	Glenn	Nickles
Bradley	Hart	Pell
Bumpers	Helms	Proxmire
Burdick	Huddleston	Pryor
Byrd, Harry F., Jr.	Kennedy	Randolph
	Leahy	Riegle
Cranston	Levin	Sarbanes
DeConcini	Matsunaga	Tsongas
Dodd	Melcher	Williams

NAYS—65

Abdnor	Grassley	Nunn
Andrews	Hatch	Packwood
Armstrong	Hatfield	Percy
Baker	Hawkins	Pressler
Boschwitz	Hayakawa	Quayle
Byrd, Robert C.	Heflin	Roth
Cannon	Heinz	Rudman
Chafee	Hollings	Sasser
Chiles	Humphrey	Schmitt
Cochran	Inouye	Simpson
Cohen	Jackson	Specter
D'Amato	Jepsen	Stafford
Danforth	Johnston	Stennis
Denton	Kassebaum	Stevens
Dixon	Kasten	Symms
Dole	Laxalt	Thurmond
Domenici	Long	Tower
Durenberger	Lugar	Wallop
Fast	Mathias	Warner
Garn	Mattingly	Weicker
Goldwater	McClure	Zorinsky
Gorton	Murkowski	

So Mr. PRYOR's amendment (UP No. 19) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 70–770, appoints the Senator from Mississippi (Mr. COCHRAN) to the Migratory Bird Conservation Commission, in lieu of the Senator from Oklahoma (Mr. Bellmon), retired.

The Chair, on behalf of the Vice President, pursuant to Public Law 86–380, appoints the following Senators to the Advisory Commission on Intergovernmental Relations: The Senator from Delaware (Mr. ROTH), and the Senator from Minnesota (Mr. DURENBERGER).

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The Senate continued with the consideration of Senate Concurrent Resolution 9.

Mr. DOMENICI. Mr. President, according to our previous understanding, the senior Senator from Florida is going to proceed with the next amendment.

May I inquire of the Senator what is the general nature of the amendment?

Mr. CHILES. The general nature is veterans.

Mr. DOMENICI. It will be a veterans amendment?

Mr. CHILES. Yes.

Mr. DOMENICI. It is my understanding that Senator CHILES will yield 6 or 8 minutes to the distinguished Senator from Oregon who wishes to make an opening statement. That is satisfactory with me.

Mr. CHILES. Mr. President, I yield with the understanding that I do not lose my right to the floor.

The PRESIDING OFFICER. Until the time on the committee amendment is used or yielded back it would take unanimous consent to consider amendments in the second degree.

Mr. DOMENICI. Mr. President, I so ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 20

(Purpose: To restore funds for veterans' medical services)

Mr. CHILES. Mr. President, I send to the desk my amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

Mr. DOMENICI. Mr. President, may we have order?

The PRESIDING OFFICER. We will have order in the Chamber. The point is well made and the Senate will be in order.

The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) for himself and others proposes an unprinted amendment numbered 20.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "$52,144,000,000" in line 17, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: to reduce budget authority by $51,844,000,000, and outlays by $36,153,000,000, in fiscal year 1982; and to reduce budget authority by $58,723,000,000, and outlays by $47,394,000,000".

On page 11, beginning with "$414,000,000" in line 12 strike out through "$404,000,000" in line 15 and insert in lieu thereof the following: $114,000,000 in budget authority and $105,000,000 in outlays for fiscal year 1982; and $97,000,000 in budget authority and $104,000,000".

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, on time on the resolution, we have sort of worked ourselves into an unanticipated and, I think, unnecessarily awkward procedural situation. As I understand it, until the time on committee amendment No. 9 is utilized or is yielded back, no other amendment in the second degree will be eligible except by unanimous consent. Will the Chair advise me if that is a correct interpretation?

The PRESIDING OFFICER (Mr. GRASSLEY). The Senator is correct.

Mr. BAKER. Mr. President, I suggest that, in order to avoid this rather awkward situation, on our side I would be prepared to yield back our time on committee amendment No. 9, if the distinguished minority leader or the minority manager would do likewise. Then we would be out of that thicket where we have to ask unanimous consent for second degree amendments to come up.

Mr. ROBERT C. BYRD. Mr. President, that is a very worthwhile suggestion. This will allow Senators to call up amendments in the second degree without having to ask unanimous consent to do so, the time on committee amendments not having run.

The manager on this side has indicated his willingness to yield back his time.

Mr. BAKER. I thank the distinguished minority leader.

With the consent of the distinguished majority manager, I yield back any time on this side on committee amendment No. 9.

The PRESIDING OFFICER. The Chair recognizes the Senator from South Carolina.

Mr. HOLLINGS. We yield back the time on committee amendment No. 9.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair recognizes the Senator from Florida.

Mr. CHILES. Mr. President, the clerk has reported the amendment, and I wanted to say that on behalf of myself, Senator DECONCINI, Senator SASSER, Senator CRANSTON, Senator BENTSEN, Senator RIEGLE, Senator ROBERT C. BYRD, Senator SARBANES, Senator KENNEDY, Senator BAUCUS, Senator LEVIN, Senator HUDDLESTON, Senator FORD, Senator DIXON, Senator JACKSON, Senator MOYNIHAN, Senator LEAHY, Senator BURDICK, Senator EXON, Senator RANDOLPH, Senator ZORINSKY, Senator BUMPERS, Senator MELCHER, Senator MATSUNAGA, Senator BRADLEY, Senator BIDEN, Senator METZENBAUM, Senator EAGLETON, Senator GLENN, Senator CANNON, Senator WILLIAMS, and Senator PELL that I am offering this amendment to restore funds for veterans' medical services.

This amendment restores the $330 million of cuts proposed by the President for staffing, equipment, and other operating expenses of VA hospitals and clinics—$25 million was restored in committee; we are moving to restore the remaining $300 million here on the floor.

Mr. President, I am an enthusiastic supporter of the campaign to fight inflation by cutting excessive Federal spending and moving us toward a balanced budget. Reducing Federal spending has been my top priority here in the Senate. I voted for the whole package that came out of the Budget Committee. That package contained cuts that had $2.3 billion more cuts than President Reagan recommended. I expect to vote for the package that finally emerges after we finish our work on the floor. But I do not believe the American people want us to cut back on those who cannot fend for themselves—disabled veterans, low-income elderly or hungry children. A poll by Louis Harris, published February 19—the day after the President's first package of cuts was announced—shows dramatically the public support for veterans programs. While the overwhelming majority of the public wants cutbacks in programs, a full two-thirds opposes cutting veterans benefits.

In many other programs, two-thirds or more favored major cuts. The public clearly recognizes that the Nation should provide compensation to those people who gave of their lives and bodies in its defense. I, therefore, think we have to be more selective in where we make the cuts than the Budget Committee was, especially in this area.

Providing direct medical care is one of the most basic of our veteran's services. While the VA manages to operate at much lower cost than private medical facilities, it is still subject to the same inflationary pressures for energy, supplies, and other services. They must pay competitive salaries if they are going to attract competent doctors. And the need for services is increasing as more and more veterans reach retirement age. In addition, we have never yet met the commitment to provide services for the large number of Vietnam-era veterans. As the budget committee pointed out in its own markup materials, most VA hospitals are over 25 years old and in need of substantial repair. Too many veterans face lengthy travel or long waits for service because we do not have enough clinics to serve them. To cut back on outpatient clinic care will simply end up putting more people in hospitals which is a more expensive form of care.

Mr. President, the single proposed cutback that most disturbs me in this area is the reduction in staffing. The administration proposes to cut 9,200 staff from the VA, about 5,000 of them in medical care. While I am sympathetic to reducing the Federal bureaucracy, removing doctors, nurses, and medical support personnel is not going to streamline Government. It will only lead to longer waits and service that is less responsive to the need of patients. Restoring the medical staff only requires over a hundred million dollars.

The second major item, costing about $60 million, is the reduction in outpatient visits for both World War I and more recent veterans. No justification is given for the general reduction in outpatient services. In the case of World War I veterans, the administration does not show a reduced number of visits, but does not provide enough money to pay for them. That simply does not add up. Over the last few years, we have been trying to minimize medical costs by limiting the construction of new hospitals and providing for more outpatient care. If we allow the proposed cuts to go through, we are going to find we do not have that outpatient care. The veterans are going to then have to go into the hospitals, and that adds additional costs. So the results for the Government are going to be higher costs for the care that we are proposing.

Another proposed cut in cost-effective services is the $28 million reduction in community nursing home care and the hospital-based home care program. Like outpatient clinics, these are services which can keep people out of the acute-care hospitals.

One of our great problems with veterans now is that many of their illnesses are based on age. They are chronic illnesses. Those people could be cared for in a home care hospital situation or in a nursing home. To take them out of that situation and to place them back into an acute care hospital is simply going to add to the cost.

The administration also reduces its budget estimate substantially by assuming a much lower rate of inflation. While I would certainly be happy to see a vastly lower inflation rate next year, I am not willing to see veterans deprived of services because we use an estimation on inflation rates that is considerably below what could be achieved. The Congressional Budget Office estimates that inflation will be 1.2 percent higher than the administration levels in 1982, and 2.8 percent in 1983. With inflation still roaring along at double-digit levels, I just do not see how we can get down to 8.3 percent in 1982 and 6.2 percent in 1983, as estimated by the administration.

I want to commend my colleagues on the Veterans' Affairs Committee for working to send the Budget Committees a recommendation that met the President's savings goals. I note, however, that one way they reached that goal was to shift many of the cuts out of medical care into other areas. What concerns me even more, is that reaching that goal requires "unspecified legislative savings" of over $300 million. I am just not confident that $300 million more can be saved without doing serious damage to the veterans medical care system.

I therefore hope my colleagues will join me and adopt this amendment.

Mr. President, the Disabled American Veterans, the American Legion, and the Veterans of Foreign Wars all support this amendment. I ask unanimous consent to have printed in the RECORD a letter from the national commander in chief of the VFW.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Washington, D.C., March 26, 1981.

Hon. LAWTON CHILES,
Ranking Minority Member, Special Committee on Aging, Washington, D.C.

DEAR SENATOR CHILES: On behalf of the 2.5 million men and women of the Veterans of Foreign Wars of the United States and our Ladies Auxiliary I assure you you have our full support in the amendment to S. Con. Res. 9 to be submitted by you and the Honorable Jim Sasser to reduce cuts in the Veterans Administration budget by $300 million.

Reductions in the Veterans Administration budget proposed by the Administration, if sustained, will have devastating effects upon the VA hospital and medical care system, benefits to which veterans and their survivors are entitled and even the processing and adjudication of claims.

The VA has already sustained disproportionate cuts in personnel and real dollars under the prior Administration and, in my opinion, should not be subjected to further reductions.

With best wishes and kindest personal regards, I am

Sincerely,

ARTHUR FELLWOCK,
National Commander-in-Chief.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. CHILES. I yield to the distinguished Senator from Arizona.

The PRESIDING OFFICER. The Chair recognizes the Senator from Arizona.

Mr. DECONCINI. Mr. President, I am pleased to cosponsor the amendment being offered by Senator CHILES and our distinguished colleagues, which will restore $300 million to the Veterans' Administration account. The $414 million reconciliation reduction instruction, as reported by the Senate Budget Committee, is a totally unacceptable figure. Although the Senate Veterans' Affairs Committee could achieve these savings in any manner it chooses, the assumption is that the savings will be taken from the medical care account. This could only result in a reduction of essential services and quality health care within the Veterans' Administration.

I am quite certain that most of my colleagues have heard candidate Reagan's statement of August 18 regarding veterans, but I think it bears repeating during this debate:

To me it is unconscionable that veterans in need are denied hospital and medical care because of inadequate funding which has closed hospital beds and cut health care personnel within the VA.

These statements are clearly at odds with the Office of Management and Budget's proposals and the actions taken by the Senate Budget Committee. These proposals are in direct contradiction to the President's preelection statements and represent an abrogation of his promises to the Nation's veterans. The proposed reductions are unwarranted, unfair and may be the first step toward the dismantling of an independent health care system within the Veterans' Administration. Lest you think that this may be an overreaction on my part, let me quote from an OMB document which has fallen into the hands of various veterans' organizations:

In addition, the existence of excess medical capacity in many areas of the United States makes questionable the need for a separate VA medical care system.

If this is the ultimate objective of OMB, then we must be on our guard here today to prevent such an eventuality. It is imperative that we restore this $300,000 for medical care in order to insure the integrity of the VA health care system.

I know there are those who will argue that if this $414 million reconciliation reduction instruction is adopted, the health care budget will still be 10.5 percent higher than it was last year. However, with health care costs rising at an annual rate of more than 14 percent, this represents no increase in real dollars. If this negative approach to funding continues, it will surely lead to the ultimate dissolution of an independent VA health care system.

To underscore my concern, I would like to share with you some rather alarming statistics. The VA has lost over 20,000 operating beds over the last decade. Bed losses over the past 4 years equal the closing of 30 500-bed medical centers. And the President is proposing the closing of 1,800 additional beds in 1982. He is proposing a reduction of 5,181 in health care personnel. He is proposing the cancellation and deferral of badly needed construction projects. He is proposing a reduction of 1.7 million outpatient visits. Finally, he is proposing a ceiling on physicians' and nurses' bonuses—legislation which was just enacted in the 96th Congress in an effort to recruit and retain highly qualified health care professionals. There is just no way that we can continue to provide quality health care to the Nation's veterans if we accept reductions of this magnitude.

The VA medical system is cost efficient. It delivers services at rates approximately 15 percent lower than those provided in the private sector. In addition, it is one of the prime educators of health care personnel. Fully one-third of all physicians educated in this country receive a portion of their training in VA hospitals. VA hospitals are also renowned for their research and rehabilitation efforts and have made outstanding contributions to improved medical care in these areas. Finally, the VA hospitals provide critical backup support for our military installations in times of conflict.

While I shall continue to support efforts to balance the budget, I believe that veterans are a very special category of citizens. They served their country with every expectation that promised benefits and services would be honored. This is a national obligation. There are no State or private organizations to take up the slack if the Federal Government reneges on its commitments. And how will we be able to attract future generations of Americans into the service of their country if we do not abide by our promises? What good will it do to vastly increase defense expenditure if we will have no one to man the bombers?

For all of these reasons, I strongly support the amendment being offered here today by Senator CHILES and urge my colleagues to adopt it.

Mr. CHILES. Mr. President, I yield to the distinguished Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I commend the capable Senator from Florida for offering the amendment, which has been joined by many Members of this body.

I think the Congress does reflect, at least in part, the priority which the Senator has expressed in the beginning of his statement, that we are against those ill-advised efforts to have what I believe to be unrealistic spending in the United States of America at this crucial time in our history.

But I say it is important for us to remember that the veterans of our country are not reluctant but they are willing to join in such an effort. They do know that it is ill-advised, and the Members of this body know that it is ill-advised, to make the cuts which are proposed.

We must never forget our commitment, all of us, to those men and women who have served in the Armed Forces of the United States. They are not asking for something. They are not asking in return, as it were, for us to support them. But they know that their effort to defend this Nation from aggression is something that they have done and we who are here must not forget that fact.

Mr. President, the 30 million veterans of our country, including 235,000 West Virginia veterans, have earned the benefits and the services that our Veterans' Administration provides.

This is not in any sense a partisan matter. It should never be considered as such. We have not had that in the Committee on Veterans' Affairs.

We must maintain an acceptable level of quality care to the veterans in our Veterans' Administration health care system. Unreasonable cuts in the veterans' health care must be prevented.

By agreeing to the amendment which is pending, pending through the efforts of many Members, including the knowledgeable Senator who first spoke (Mr. CHILES), we will be able to continue that level of spending which is deserved by the veterans of the United States of America.

This amendment is meritorious and I hope it will receive—hopefully—and I use the words hope and hopefully—the votes of all Members of this body.

Mr. SARBANES. Will the Senator yield?

Mr. CHILES. I yield to the distinguished Senator from Maryland.

Mr. SARBANES. Mr. President, I join with my distinguished colleague in supporting and sponsoring this amendment that would restore cuts in direct health care services for America's veterans. I cannot imagine any obligation undertaken by the Nation on which we should deliver than the one we have undertaken to provide medical care to our veterans. What is at issue here is whether those men and women who have served the Nation and who are now experiencing medical problems are going to be able to obtain proper medical treatment. Have we forgotten the sacrifice these brave men and women have made for our Nation.

As the Senator from Florida outlined earlier, what is at stake here is assuring that our veterans receive proper treatment for the illnesses from which they suffer. In many instances, the services which this amendment will restore will be more effective, more efficient, and save costs in providing care for our veterans. If we fail to restore the cuts for these medical services, the veterans' health will only worsen, requiring higher care cost at a later time.

The VA medical system has worked well. It has achieved good medical care below the cost in the private sector. It is a system with which our veterans have generally been satisfied and where they feel that their needs are looked after.

We must meet our obligation to them to provide health care, a solemn under-

taking which the Nation made. To deny the VA health care system the resources that are necessary to provide proper medical care to our veterans is to turn our backs on those who sacrificed for the Nation and to abandon a national commitment. Therefore, I very strongly support this amendment and urge its adoption.

Mr. CHILES. Mr. President, I yield to the Senator from Texas.

Mr. BENTSEN. Mr. President, I am pleased to join my distinguished colleague from Florida, Senator CHILES, in cosponsoring an amendment which would enable the Veterans' Administration to provide adequate medical and health care for our Nation's veterans. Over the years, we have called for and received great sacrifices from our men and women in uniform. Now at a time when an increasing number of our veterans are in need of medical care, we are denying adequate resources to staff the Veterans' Administration hospitals, clinics, and nursing homes.

Mr. President, I know that like all Americans, veterans are hurt by inflation and will join in the national effort to bring a halt to inflation and correct our other economic ills. However, we should not now shift our national obligations and responsibilities to our veterans by reducing their medical care. We cannot afford to renege on our commitment to our Nation's veterans now and expect a new generation of Americans to answer the call for defense of this country in the future.

The administration's proposal would cut some 5,181 staffing positions from the medical care accounts in the Veterans' Administration. To maintain these cuts in the reconcilation resolution that we are considering today can only lead to reduced care for our veterans.

Mr. President, there are currently about 30 million veterans in the United States. Nearly 3 million of them are currently over age 65. This is roughly 10 percent of our veterans. By 1985, 17 percent of the veterans will be age 65 or older and in 1990, 25 percent will be over age 65. In 1980, there were 18 million medical and dental VA outpatient visits, and over 1.3 million veterans and their families were treated in VA hospitals. These numbers can only increase as the overall age of our veterans increases. With these statistics, Mr. President, I have a very hard time understanding how the administration can return the staffing levels of the medical care units to the 1979 level.

Mr. President, I would urge all my colleagues who are concerned about our national defense to join with me and vote for the Chiles amendment. Failure to do so will lead to a reduced confidence by our young people in our ability to maintain our commitments and responsibilities to future veterans, not to mention the hardships that it will inflict on those that have already paid an enormous price for our freedom.

I commend Senator CHILES for offering this amendment and trying to keep some justice in our system.

Mr. CHILES. I thank the Senator.

I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I, too, welcome the opportunity to join with the Senator from Florida in urging that the Senate accept this amendment to restore $300 million to the Budget Committee's mark for hospital and medical care for veterans. The case has been outlined well by my colleagues.

I think the amendment reflects a very basic principle. We owe a debt to those men and women who made a sacrifice for this country in a time of conflict. We depended upon them then, at a time of war. Now they should be able to depend upon us at a time of peace, during their more senior years, when their wounds from wartime and their other medical needs demand medical attention.

The Senator from Florida has outlined several very important aspects of this particular amendment. Not only will there be the restoration of some important health care personnel but there will also be a preservation of the hospital-based home care program.

This, in effect, is an extremely cost-effective program. We have seen the value of hospital-based home care, time in, time out, in the fine veterans hospitals in my own State of Massachusetts. It gives greater flexibility to the veteran who prefers to remain at home. It is less costly because it does not take up more expensive high-cost facility space in an expensive hospital setting.

The other point which this amendment addresses is the community nursing home care program, which helps our increasingly elderly veteran population. This program is also extremely cost effective and provides a wise allocation of health care resources.

So, Mr. President, I join my colleagues in urging support for this program. We in my own State of Massachusetts have some of the best veterans facilities and hospitals in this country. I have visited most of them; I am familiar with the kind of excellent programs that this amendment would be able to provide. There is a need for excellent health care for our veterans, and I hope the amendment will be adopted.

I thank the Senator from Florida.

Mr. CHILES. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Florida reserves the remainder of his time.

The Chair recognizes the Senator from New Mexico.

Mr. DOMENICI. Mr. President, I yield at the outset to the distinguished chairman of the Committee on Veterans' Affairs, Senator SIMPSON of Wyoming. I ask the Senator, not by way of limitation, how much time he thinks he would like.

Mr. SIMPSON. Mr. President, I believe that perhaps 15 minutes would be totally adequate.

Mr. DOMENICI. I yield 15 minutes.

The PRESIDING OFFICER. The Chair recognizes the Senator from Wyoming.

Mr. SIMPSON. Mr. President, this is a rather tough place to be a chairman of the standing committee of the Senate on veterans' affairs, a lifetime member of the VFW, because I am speaking against this amendment. I probably shall note the sound of muffled drums somewhere off on the parade grounds as they prepare a ceremony to strip the chevrons from me after I finish these remarks. Nevertheless, I feel very compelled to speak.

It has been a stirring relation of facts as to America's commitment to its veterans. It really needs no relation at all, because, if there is one thing that we have done successfully in this Chamber and in this Congress, it has been to take care of the veterans of the United States of America. That is a historical commitment that we have never shirked at any time in our history.

Mr. President, it is the statutory duty of the Congress and the Veterans' Administration to take care of the service-connected disabled. That is the mission.

Mr. DOMENICI. Mr. President, may we have order, please?

The PRESIDING OFFICER. Will the Senator from Wyoming suspend? The point of the Senator from New Mexico is well taken. The Senate is not in order. Will those Senators desiring or finding it necessary to speak and converse depart to the cloakroom?

The Chair recognizes the Senator from Wyoming.

Mr. SIMPSON. Mr. President, as I say, that is the mission of the Veterans' Administration and the mission of this Congress, to take care of the service-connected disabled. This amendment of my good colleague (Mr. CHILES), the Senator from Florida, I can certainly sympathize with. I can appreciate the legitimate concerns that motivate many in this instance, motivate all of those who have spoken in behalf of this amendment.

During the consideration by the Committee on Veterans' Affairs of the recommendations by the Budget Committee, the committee accepted a restoration of $110 million in medical accounts to insure that the VA health care system suffers no loss whatsoever in health care personnel. Restoration of the additional $220 million in savings was not undertaken, since such savings involve only the postponement and cancellation of capital equipment investments, approximately $100 million, and other miscellaneous savings of primarily an administrative nature. Consequently, the Chiles amendment is fundamentally unnecessary as far as real medical care is concerned.

I share the concern of every one of us that the VA health care system be preserved. I am firmly on record on that. I also believe it should be separated from the general health care system in America, preserved as an entity in itself.

I have always been strongly in favor of guaranteeing that all service-connected disabled veterans get the benefits to which they are entitled. We have never failed to do that, ever. But for this time in our history, I believe that we need to look at all aspects of the VA

programs. We can proceed with the national economic recovery, while retaining the essential services for our service-connected and truly needy veterans, by turning our attention, perhaps, to eligibility requirements for various programs. That is what this committee will be looking at in the near future, rather than simply cutting dollars for worthwhile direct health care services.

As I have stated, the Veteran's Committee had agreed to meet the reductions that were requested by the President. We did that. As set forth in our recommendations to the Budget Committee, we have noted some important exceptions to the medical care account. The committee has recommended a total of $6.8 billion to fund medical care in fiscal year 1982, a pretty good chunk. Two-thirds of that budget of $24 billion is built in and driven by the engines of the entitlement program, and we cannot touch that. We are going to find that out on this vote, why we do not touch that.

This is the fourth largest agency budget in the United States of America, and boy, do I know. I am one of us, I sit right here, and it is tough to cast that vote. But we are in a moment of truth on this one. The $6.8 billion in medical care account for fiscal year 1982 is a staggering figure. It includes the funds necessary to maintain staffing of the VA's health care positions as well as to fund the continued operation of the VA's readjustment counseling centers, the storefront centers we have heard so much about.

Mr. President, I am confident that the committee's recommendations are very responsive to the President's goal of budget restraint, as well as the appropriate reaffirmation of our continuing debt to this Nation's most deserving veterans. We have reached that moment of truth in our Nation's history that was so well expressed by the President in his remarks in January. He stated that we can no longer afford things simply because we think of them.

I trust that the full Senate might support the goals and the ideals of the recommendations of the committee. Let me share with you an interesting set of figures, Mr. President. Not once in our discussion or our debate did we lose sight of the debt that this country owes to its 30 million veterans, 58 million family members, and 4 million survivors of deceased veterans. With respect to those most deserving veterans, any cut in vital benefits or services would clearly be unconscionable. I am the first to admit that.

So we avoided that result. We have taken exceeding steps to preserve and protect the compensation benefits of all the veterans with service-connected disabilities as well as the pension benefits of truly needy wartime veterans who suffered nonservice-connected permanent and total disabilities or those who are over 65. We have done that.

There will be no cut of any kind in patient care within the Veterans' Administration. I hope that will remain clear to my colleagues.

All veteran entitlement programs, in fact, will enjoy a full cost of living increase, currently estimated to be 11.2 percent by the Office of Management and Budget and 12.3 percent by the CBO. Nor will we diminish, as I have said previously, one bit of service offered by the internal VA health care system for service-connected disabled.

Obviously, we could not do otherwise, since those health care services are crucial to the protection and maintenance of our most deserving veterans.

I have heard in the course of the debate a suggestion of many unacceptable figures. This entire reconciliation process will consist of unacceptable figures from some source.

To be quite specific—and I believe this is the very key—I hope Senators will take a quick look at this chart. If they turn their attention to it, they will see where we have been with the Veterans' Administration budget in the past 5 years: $19 billion, $19.9 billion, $21.1 billion, $21.3 billion, and this year, $23.6 billion. Right now, with President Reagan's cuts, we are still increasing the VA's budget by $1.3 billion.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. SIMPSON. I will yield in a moment. Let me finish my remarks.

President Carter's recommendation was to go up $2 billion plus. President Reagan's recommendation was to bring that down $830 million, to a recommended increase of $1.3 billion.

I yield to the Senator from Florida for a question.

Mr. CHILES. I want to ask the Senator if that chart portrayed just current dollars, or whether there was any adjustment for inflation.

Mr. SIMPSON. There was no adjustment.

Mr. CHILES. So, in fact, if we looked and saw what happened after an adjustment for inflation, not just this year but over the past years, that total spending for veterans actually has been going down. Is that not correct?

Mr. SIMPSON. That is not entirely correct, because the termination of eligibility of many Vietnam-era veterans for GI bill benefits occurred in this 5-year period.

Mr. CHILES. Perhaps my figures are different. I am looking at the Congressional Budget Office figures; and looking at constant dollars, they show that in real terms, in 1977 we had a minus 7.7 percent in total funding; in 1978, it was minus 1.8 percent; in 1979, a minus 3.3 percent; in 1980, a minus 2.1 percent; and in 1981, a minus 3.6 percent. That adds up to almost a 19-percent decline in veterans funding over the last 5 years.

That shows me that every year we have a minus percent, so far that is a decline in the real value of spending for the total veterans' function.

Mr. SIMPSON. Mr. President, I submit that the decrease in constant dollars must be considered in light of the declining expenditures for Vietnam-era GI bill benefits. Factoring in this decrease in expenditure will most probably result in a real increase in all other veterans programs.

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. SIMPSON. I yield.

Mr. DOMENICI. I say to my good friend from Florida that while those growth figures he has given us are true and while he might have a concern as to inflation, at the same time that has grown, the money we spend for veterans education programs, not because we cut them but because there are fewer people participating—this is not only directed at the Senator from Florida; the Senate should know this—went from $5.5 billion in 1976 to $1.6 billion in 1981.

If we subtract that, all that difference was not taken away because there were not that many people using education. That was left in. That has to be going somewhere. No one can say that we are giving the veterans less when, as a matter of fact, we have added $4 billion that was previously going to education. We have now put it in the total veterans function to be used for these other things.

Mr. CHILES. Mr. President, if I have the floor, I say hooray for that. But in spite of that, the figures still show that in the veterans total programs it has been a minus figure from 1976 until the present. So you reduce those moneys because the GI bill ended, and you can show we had some increase in actual dollars. If you start dealing with constant dollars, there has been a 19-percent decline in the money that went into the total veterans program.

Mr. SIMPSON. Mr. President, I request that the remarks of the Senator from Florida be allocated to his time, not to mine.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. I yield to the distinguished Senator from Tennessee.

Mr. SIMPSON. Mr. President, I still have the floor.

The PRESIDING OFFICER. The Senator from Wyoming has the floor.

Mr. SIMPSON. I was just requesting that my colleague's statements go toward his time, not mine, and I will stay within my 15 minutes.

Quite naturally and historically, when we get into a debate like this the national veterans organizations may feel compelled to speak out. That is as it should be. But I am confident that individual veterans, in their capacity not just as veterans, as I am, but as citizens of this proud country in a time of national economic distress, will recognize that the greatest possible good for all veterans and for all Americans can only be achieved with the restoration of a vigorous economy; that they and their national organizations will be willing to accept limitations upon the growth of certain less essential programs. Truly, Mr. President, we are in this one together—soldiers in the fray, so to speak.

The PRESIDING OFFICER (Mr. WARNER). The Senator's 15 minutes have expired.

Mr. SIMPSON. Mr. President, will the Senator yield me an additional 3 minutes?

Mr. DOMENICI. I yield 3 additional minutes to the Senator from Wyoming.

Mr. SIMPSON. So I hope we will consider these substantial increases that have come to the Veterans' Administration over the past years and the fact that

this budget is $1.3 billion above last year's budget.

I hope we will proceed with an equal concern for the ever-compelling interests of our Nation's veterans and get the lasting recovery for which this Nation cries out, knowing also that everyone in this Chamber and in this land must recognize that economic recovery is indeed a goal of the very highest national priority.

Mr. DOMENICI. Mr. President, I yield 5 minutes to the new Senator from the State of Washington, a very hardworking member of this committee. He has just come on the committee. I believe that all members of the Budget Committee, on both sides, would compliment him not only on his real participation but also his quick understanding of this process and the invaluable role he has played in helping us bring this reconciliation instruction to the floor.

I yield him 5 minutes at this point.

The PRESIDING OFFICER. The Chair wishes to advise the Senator from New Mexico that he has less than 2 minutes remaining of his own time and he may yield time if he desires off the resolution.

Mr. DOMENICI. I yield myself whatever additional time I need for these 5 minutes off the resolution.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I thank the Senator from New Mexico for his kind compliments and I should simply like to say that it seems to me that both in his initial statement and in some of his colloquy with the Senator from Wyoming, the Senator from Florida has hit the central point which is involved in this process in which we are engaged here today.

He has made the key point. The goal of this process of reconciliation is not to cut from the budget and is not to cut from all of the various social programs and other programs which are the subject of this resolution for their own sake. The goal of this process is to bring under control a double-digit inflation which has infected this country for more than the last 2 years.

The Senator from Florida has questioned the projections not only of this committee but of the Office of Management and Budget as to how quickly we will be able to bring that inflation under control.

But it is clear that if we accept his amendment and if we accept many of the other amendments proposing to restore hundreds of millions of dollars from these cuts, we will not only slow down that recovery from inflation beyond what is projected by the President, we will slow it down bevond the projection which the Congressional Budget Office has offered to us. That projection is based on the President's program having passed. Are we more likely to meet this goal of ending inflation by spending more of the money of the people of the United States by this Government?

Does not each program which is the subject of this resolution have its own justification for increased spending taken alone and taken in isolation?

It is clear that this entire program and almost every one of its parts are necessary unless we are effectively to abandon the war against inflation and the war for increased growth in productivity in our society.

The veterans of the United States are citizens. They are particularly concerned, patriotic, and generous citizens. They recognize that if we are to meet the very difficult problems which face us, all are going to have to sacrifice and all are going to have to play a part.

There is no proposal here to cut the funding of the Veterans' Administration of its various programs. There will be an increase in that spending in excess of 10 percent. Approximately 3 percent of the entire appropriation for the Veterans' Administration is affected by this resolution, approximately 3 percent, a much smaller sacrifice than is asked of many other beneficiaries of many other programs of the Federal Government.

The Senator from Wyoming has already clearly pointed out that no significant, no important, no vital medical or hospital service is going to be denied any veteran who is eligible for that service, that the 3 percent which is cut from the proposed Carter budget can clearly be met while meeting all of our statutory and moral obligations to the veteran population of this Nation.

Everyone must join in this fight. It is inappropriate to say that one class of people need not contribute when all others are asked to do so.

Mr. BRADLEY. Mr. President, will the Senator yield for a question?

Mr. GORTON. I yield.

The PRESIDING OFFICER. The Senator's time has expired.

There remains 6 minutes on the time of the Senator from Florida.

Mr. HOLLINGS. Mr. President, I yield as much time as is necessary to the distinguished Senator from New Jersey.

The PRESIDING OFFICER. And it is the Chair's understanding that this will be chargeable to the resolution.

Mr. HOLLINGS. That is right.

Mr. BRADLEY. I thank the Senator from South Carolina.

Mr. President, the Senator from Washington has stated that the budget was thought through very carefully and that there were certain assumptions made about the economy that he concurs with. The Senator from Florida has pointed out that if inflation is slightly higher, it will cost more, it will be a greater deficit. He has pointed out that if unemployment is 1 percent higher, there will be a $30-billion addition to the deficit. He has pointed out that economic growth would have to respond at an unprecedented level. I pose the question to the Senator from Washington: Does he really believe that the assumptions of this budget are correct and that it is impossible to change one item in this budget without pushing the country to an economic disaster?

Mr. GORTON. The question from the Senator from New Jersey is a good and valid one. The Budget Committee did not accept all of the economic projections which the President submitted to us. It was somewhat more cautious in making its own projections. The Congressional Budget Office was more cautious still in making its projections as to the effect of this program on a recovery from inflation, and on a recovery from unemployment, and the like.

We all must recognize the fact that no one has ever predicted these trends with exactitude.

I personally believe that the assumptions which the President has made are more likely than not to be accurate than those of the Congressional Budget Office, but I confess that I do not know. What I do know, however, is that we will not reach the goal that we seek, the goal of a series of budget cuts, the goal of a series of tax cuts, if we back away from them. The proposals which are being made here today will make the situation worse, not better. Whatever the level of the deficit, it will be greater if these proposals are adopted, not less. The rate of inflation will be higher, not lower.

Mr. BRADLEY. My point in asking the Senator the question was that indeed we have been told by the administration, by the Budget Committee in its action that if there is a substantial or even a slight change in the program, either in the cuts or the tax, somehow or another we will be thrown off the economic track. I point out to my colleagues that that sounds a little bit like the person who goes to the doctor or shall I say the specialist to consult about loss of hair, and the person is told to do the following 14 things, using these powders and those lotions and this massage and that, and if he does those 14 things his hair will grow, but if he only does 13 or if he combines them in a different order the hair will not grow.

It seems to me that that is what the administration is telling us in their budget, that unless we do exactly what they have prescribed, the economy will not respond, and I as one Senator feel that there is clearly no evidence for that. Rarely has anything passed through the body of Congress without a single change, and I fully expect that this package will not pass that voyage in a way that others have failed to as well.

Mr. CHILES. Mr. President, I yield to the distinguished Senator from Tennessee (Mr. SASSER).

Mr. SASSER. I thank the distinguished Senator from Florida for yielding.

Mr. President, I am pleased to cosponsor this vital amendment to restore $300 million to the Veterans' Administration's direct health care services.

This is an amendment which deserves the Senate's approval. The health and welfare of literally thousands of veterans hang here in the balance.

Like the Senator from Florida, I favor cutting Federal spending. I supported the Senate budget resolution, I voted for it, which cuts below President Reagan's proposed budget.

Last year in the Senate Appropriations Committee I voted to cut over $9 billion from the Federal budget. But I think we must use care and some discretion as to where these cuts should come.

Now, the administration proposes to cut 9,200 staff members from the Veterans' Administration and about 5,000 of these will come in the field of medical care.

At this point, Mr. President, I ask unanimous consent to have printed in the RECORD a letter received from Mr. Arthur Fellwock, National Commander-in-Chief of the Veterans of Foreign Wars, and also a statement by Mr. Fellwock indicating the cut in medical personnel that would come if the Reagan administration's proposal were adopted.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Washington, D.C., March 26, 1981.

Hon. LAWTON CHILES,
Ranking Minority Member, Special Committee on Aging, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR CHILES: On behalf of the 2.5 million men and women of the Veterans of Foreign Wars of the United States and our Ladies Auxiliary I assure you you have our full support in the amendment to S. Con. Res. 9 to be submitted by you and the Honorable Jim Sasser to reduce cuts in the Veterans Administration budget by $300 million.

Reductions in the Veterans Administration budget proposed by the Administration, if sustained, will have devastating effects upon the VA hospital and medical care system, benefits to which veterans and their survivors are entitled and even the processing adjudication of claims.

The VA has already sustained disproportionate cuts in personnel and real dollars under the prior Administration and, in my opinion, should not be subjected to further reductions.

With best wishes and kindest personal regards, I am

Sincerely,

ARTHUR FELLWOCK,
National Commander-in-Chief, Veterans of Foreign Wars of the United States.

REAGAN SLASHES VA BUDGET

WASHINGTON, D.C.—"President Reagan is balancing the VA budget on the breaking backs of veterans, his widow and orphan," said Art Fellwock, National Commander-in-Chief of the V.F.W.

"President Reagan, just a few short months after telling the delegates to the V.F.W. National Convention, 'to me it is unconscionable that veterans in need are denied hospital and medical care because of inadequate funding,' now is doing just that," he said. Budget figures show an elimination of over 7,000 doctors and nurses from the underfunded Carter 1981 and 1982 budget proposals. The V.F.W. estimates that 1.7 million outpatient visits will be cut, 60 wards will be closed and the daily patient census will be drastically reduced, turning away eligible veterans.

"Travel paid to non-service connected disabled veterans who go to a VA facility is being cut and a $5 deductible amount will be subtracted from all claims from those poor and disabled veterans seeking medical care.

"Physician's pay incentives are being capped which will deter new doctors from joining the VA medical system. Construction of replacement hospitals is being deferred which will increase the cost of later building and two hospitals which have been approved by several other presidents have been cut from the construction list.

"The V.F.W. stands ready to back cuts which will cut fat, fraud, waste and abuse, but slashing medical care for eligible veterans, their widows and orphans is no way to save money," said Fellwock.

"We believe that the Congress will not stand for such abuse, nor will the American people," he said.

Mr. SASSER. Mr. President, outpatient medical treatment would be adversely affected if the President's proposal is accepted. This treatment includes medical examinations, rehabilitation, consultation, professional counseling, training, and mental health services for veterans on an outpatient basis. Elimination of such treatment will make the VA health care delivery system wholly unresponsive to the needs of America's veterans.

Let me speak for a moment about the impact of the VA outpatient care program in Tennessee. The VA hospitals provide outpatient care in four cities: Memphis, Nashville, Murfreesboro, and Johnson City. Outpatient clinics are located in Chattanooga and Knoxville. In one case alone, that of the Mountain Home VA in Johnson City, 47,000 veterans utilized outpatient services in fiscal year 1979. That is 47,000 men out of more than 190,000 living in the Mountain Home vicinity, or almost 25 percent of those in the service area.

Mr. President, the Veterans' Administration is charged with the responsibility of providing medical care to the Nation's 30 million veterans. As such, VA programs represent, to quote my friend, Senator CRANSTON, the distinguished ranking minority member of the Senate Veterans' Affairs Committee, an inseparable cost of past wars.

Veteran health care is more than a cost of past wars, though. Medical treatment provided by the Veterans' Administration is an indicator of the cost of future wars. The VA is in a position to support the Armed Forces medical capability, in the event of armed hostilities. To jeopardize this capability, at this time in our history, is shortsighted, wrong, and breaks faith with veterans of this country.

Moreover, VA benefits have traditionally acted to draw many fine young men and women to military service. If we serve notice to our younger generations that we are prepared to renege on our obligations, we inevitably send more than a few good men looking elsewhere for employment.

The President's proposal is disturbing from another viewpoint as well. Should his suggested funding level be approved, approximately 60 hospital wards would be closed, victims of "fiscal necessity." I am particularly concerned that this action may lead to entire hospitals being closed, in addition to the construction deferrals and cancellations already announced.

Our country has a national obligation—a national responsibility—to provide the best medical treatment possible to its veterans. There can only be one result from budget reductions which so drastically affect the veterans population. Fewer and fewer veterans will receive treatment, even more will be refused care. Reducing nonclinical medical staff, and direct health care services does not make sense when we consider the cost effectiveness of Veterans' Administration health services compared to private sector treatment.

I urge the Senate's approval of the Chiles-Sasser-DeConcini amendment. This is an opportunity to reaffirm our commitment to those who have served our Nation so gallantly, who willingly sacrificed years of their lives so that we might remain free and strong.

Mr. CHILES. Mr. President, I yield to the distinguished Senator from Michigan.

Mr. RIEGLE. Mr. President, I thank the Senator from Florida for yielding.

I rise as a cosponsor of this amendment. If we are going to adequately meet the medical and health needs of our veterans, we have got to pass this amendment. We offered this in committee, and we lost by a vote of 6 to 12.

We have heard a lot of talk about maintaining a safety net for American citizens. But, unless we pass this amendment, we are tearing away a part of the safety net that has been created for the veterans of this country.

It is easy to say that everyone must sacrifice. Well, it seems to me that the veterans are the ones who have already sacrificed. That is why we have these programs in place.

As a matter of fact, the President of the United States made a commitment on this issue. He made a commitment that he would oppose cuts in programs for the veterans, and that they would not be hacked away. But now, a few months later, he has backed away from that commitment. That is why we have the support of the Veterans of Foreign Wars and other veterans organizations.

We are not simply changing abstract budget numbers here. If we do not revise the Budget Committee's recommendation, the Veterans' Affairs Committee would be required to go back and cut readjustment counseling, cut outpatient services, and cut support staff that is important to medical care. Those reductions would come in veterans health facilities whose staffing is already stretched near the breaking point.

I suspect that every Member of this Senate has learned that veterans facilities in their States are struggling to provide health care with limited resources. I know that I have. And I receive frequent contact from Michigan veterans describing the problems that face the VA medical centers throughout my State of Michigan—in Allen Park, in Ann Arbor, in Saginaw, in Battle Creek, and in Iron Mountain. These facilities are vital to Michigan veterans, as are the outpatient clinics in Grand Rapids and the rap centers and other support facilities throughout my State.

I am convinced that the resources available are already insufficient to meet the needs of our veterans. There are 1.2 million veterans in Michigan alone. In 1980 alone some 406,000 received treatment on an outpatient basis, while another 37,600 were served as inpatients.

I have visited many of these facilities and know they provide vital services and would face severe new problems if these cuts are made.

The letter just referred to by Senator

SASSER from Arthur Fellwock, who is the National Commander in Chief of the VFW, makes it clear that in their opinion failure to pass this amendment, and I quote him,

Will have a devastating effect upon the VA hospital and medical care system.

Is there any Senator in this room who feels he understands this problem better than the VFW does? If so, we ought to debate this at great length.

I think this letter is powerful testimony of the fact that the Budget Committee's recommendation would do great damage.

Mr. President. I ask unanimous consent that several letters and statements that I received from constituents relating to the proposed cuts in veterans' services be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, I think the President ought to keep his word on this program, and we ought to see that he does. I think it is essential that these moneys be restored, and I hope the Senate will muster the votes to do it.

The material ordered to be printed in the RECORD follows:

PARALYZED VETERANS OF AMERICA,
Garden City, Mich., March 11, 1981.

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: As you know, President Reagan is proposing an approximate $800,000,000 cut in FY 82 from the Veterans Administration Budget. While we share in the belief that all programs must share in reducing the total deficit, we feel it is important to point out:

First, the veterans of this country have for 5 years contributed to the over all reduction in Federal Program expense by foregoing many benefits which were needed to maintain themselves.

In 1976 the VA budget was $19 billion and the 1982 proposed budget is only $23 billion. While this is a 20.7 percent increase, it is only an average increase of less than 3 percent a year.

During this same period of time the veteran population increased by over 500,000 persons.

It should be obvious that an overall reduction of services to the veterans has occurred Inflation alone has more than absorbed all dollar increases in the VA budget and at the same time more veterans are in need of the services.

Second, the proposed budget cuts occur in program areas which have enormous impacts. For example:

Eliminating 1,100 positions in the Department of Medicine & Surgery.

This at a time when 12 million World War II veterans are just reaching an age when they place the greatest demand on the VA Hospital System. Most of their medical needs require longer and more complicated care.

Delaying of construction projects.

Again, 12 million WW II veterans in need of hospitals and nursing home care units. Thousands of severely disabled veterans are now housed in run down, overused, antiquated facilities.

Abolishment of the Counciling Program for Vietnam Veterans.

There are 9,115,000 Vietnam Era Veterans, conservative estimates indicate as many as 25 percent of these persons are in need of Readjustment Counciling.

Third, we are experiencing a renewed interest in preserving a strong national defense. While it's extremely important that the front line defenses be adequately equipped and supplied, it must also be remembered that a great deal of support effort is needed as a backup and reserve.

The Veterans Administration provides part of that reserve In time of war, the VA is not only a supplement to the military hospital system, but also acts to provide qualified, ready trained military personnel.

For these many reasons, we call upon you to support a strong national defense in the future and those who have sacrificed for a strong national defense in the past. Maintain the VA budget at the current level as a minimum and as a major part of your commitment to a strong national defense.

Sincerely,

LEE DOSER,
Executive Director.

DISABLED AMERICAN VETERANS,
Detroit, Mich., March 18, 1981.

Hon. DONALD W. RIEGLE,
Patrick V. McNamara Federal Building,
Detroit, Mich.

DEAR SENATOR RIEGLE: It has come to the attention of the writer that the Veterans Administration budget cut does not seem to be of value to the services of the Office of Management and Budget in that it is attacking our state in a very unscrupulous manner.

Based on available information, they are proposing to close the Veterans Administration Medical Centers in Saginaw, Michigan, and Iron Mountain, Michigan. If this is allowed to happen, what will happen to the thousands of veterans who are forced to utilize these facilities in times of emergency and for normal medical treatment?

Please find attached an analysis which should tend to prove my argument.

Sincerely,

FRANK O. GARDNER,
National Service Officer.

ANALYSIS OF VETERANS' ADMINISTRATION (VA) REVISED FISCAL YEARS 1981–82 BUDGETS

The Office of Management and Budget (OMB) has imposed severe reductions ($219 million in FY '81 and $744 million in FY '82) in VA budgets. These cuts, made without input from the Agency, Congressional Committees or veterans' service organizations, will result in:

Establishment of a centralized nationwide Claims Processing and Loan Guaranty Center requiring 12,000 of the Department of Veterans Benefits (DVB) personnel (14,521 in FY '82) to relocate to the Center. DVB, having suffered a reduction of 2,022 average employment, would have 2,521 personnel to man 58 regional offices (at least one in every state) and services to veterans, their dependents and survivors would be minimal and almost totally ineffective.

Elimination of the Office of Manpower (ten employees working on improvement in management procedures that are cost-effective).

Closing the Data Processing Center at St. Paul, Minnesota.

Reduction of 933 nurses, 297 doctors and more than 4,000 medical support personnel.

Closing 1,800 beds and 60 hospital wards, equivalent to four hospitals.

A decrease of 1,583,000 outpatient visits, and 3,628 nursing care patients.

Termination of the Readjustment Counseling Program for Vietnam Era combat veterans.

Decrease in planned expansion of Geriatric Research, Education, and Clinical Centers (GRECCS).

Reduction of VA doctors' bonus pay.

Decrease in rehabilitative and medical research.

Reduction of vocational rehabilitation counseling for service-connected disabled veterans.

Cancellation (Baltimore, MD and Camden, NJ) and deferral (Brooklyn, NY; Chillicothe, OH; Denver, CO; East Orange, NJ; Gainesville, FL; Long Beach, CA; New Orleans, LA; Palo Alto, CA; Washington, D.C.) of major construction projects, including nursing home care beds.

Reduction of beneficiary travel.

Elimination of scholarship programs designed to enhance recruitment and retention of nurses and doctors.

Acting VA Administrator Rufus Wilson, in testimony March 10, 1981 before the House Subcommittee on Appropriations for HUD-Independent Agencies, said the VA "will consider closing hospitals" in the spring review with OMB.

Based on available information, hospitals slated for the axe likely would be Marlin and Big Spring, TX; Fort Lyon, CO; Iron Mountain and Saginaw, MI; Miles City and Ft. Harrison, MT; Grand Island, NB; Muskogee, OK; Livermore, CA; Newington, CT; Ft. Wayne, IN; Sioux Falls, SD; Fargo, ND and Boise, ID. Also, VA hospitals in urban areas where there are two or more may be closed for economic reasons. Areas involved are Boston, MA; New York, NY; Chicago, IL; and Los Angeles, CA.

FERNDALE, MICH.,
March 9, 1981.

Hon. DONALD RIEGLE,
U.S. Senator
Senate Office Building
Washington, D.C.

DEAR SIR: I am very concerned regarding over the drastic cuts in the Veterans Administration budget. The V.A. problems are constantly and rapidly increasing as well as the number of veterans which now are 30,000,000.

Many of these men and women are permanently and totally disabled as well as many to a lesser degree. The proposed decrease of 800 million in dollars as well as the 20,000 decrease in personnel in the medical department will work a definite hardship upon these veterans due to circumstances bevond their control.

I urge you to consider this very carefully and use your efforts to keep the medical problems in a free and independent department and well away from any possible assimilation into the Welfare Department.

Trusting that you will give this problem your deepest consideration, I am

Very sincerely yours,

JESSIE L. DANUK.

THE BAMBOO RAP,
Detroit, Mich.

DEAR SENATOR RIEGLE: Recent proposed budget cuts concerning the VA Medical Center generally and Operation Outreach specifically is being met with public outcries within the Veteran community here in your home state of Michigan.

We have been deluged with calls concerning the cuts since their announcement. Those outraged callers have ranged from representatives of VFW, DAV, American Legion, Am Vets, NACV, and Vietnam Veterans of America, to mothers who lost their sons in Vietnam.

We ask you, sincerely, as our elected representative in Washington to bring these words to those who have the power to save these severely needed, and well earned programs.

Sincerely,

FRANK MONTOUR,
Outreach Specialist.

MICHIGAN VIETNAM VETERANS TASK FORCE,
To Senator Riegle:

The Michigan Vietnam Veteran's Task Force is a coalition of organizations representing the diverse Vietnam Veteran Population in the State of Michigan. Throughout the entire Vietnam conflict over 347,000

Michigan citizens served in the armed forces of the United States; the sixth largest veteran population of the 8.5 million Vietnam Era Veterans. The current recommendations by the Office of Management and Budget (OMB) on expenditures affecting Vietnam Veterans is, to say the least, appalling and disheartening.

Essentially, we are outraged by the nonfulfillment of a contract we all entered into with our government and country. To say, or imply, that the Disabled Veterans Outreach Program, the Targeted Technical Assistance Program, the Operation Outreach Vet Centers, and Veterans Cost of Instruction Payments Program are not vital segments of that contract cannot be farther from the truth. The seventy million dollars that would be cut by the Reagan Administration represents 1/100 of 1 percent of the total federal budget. While this is not a figure that can make or break our nation, it is an amount that affects literally hundreds of thousands of veterans and their families. Keep in mind that these recommendations are being made in conjunction with increases in expenditures for the Department of Defense to establish a new veterans population. Yet, it appears as though the last major group of veterans is in the process of being ignored and/or forgotten.

Therefore, the Michigan Vietnam Veterans Task Force calls upon all citizens and those officials in government to strongly oppose any cuts in program funding that will adversely affect support and services inherent in the execution of the nation's commitment to Vietnam Veterans.

THOMAS L. SHAVALIA, M.S.
Chairperson.

ANN ARBOR, MICH.,
March 14, 1981.

Hon. DONALD W. RIEGLE, Jr.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR RIEGLE: We heard your contribution to the important conference on the challenge of the Japanese car imports here at the University of Michigan. Thank you for your concerns and insights on this important subject.

As a disabled veteran of World War II I am disturbed at reports that funding for Veterans Administration hospitals are slated for drastic reduction in the Reagan budget.

My service related problem requires that I visit the VA Hospital here in Ann Arbor weekly. It is always overcrowded and often I am forced to wait more than two hours to see a doctor. Cuts in the budget there would only exacerbate this situation.

I am also concerned about funds for "Operation Outreach"—a program for Vietnam veterans. This too seems destined for the ax, as outlined in Mary McGrory's column in the Detroit Free Press (see enclosed).

Your investigation of the above matters, and hopefully, your support of full funding, would be very much appreciated.

Respectfully yours,
REV. CRAIG S. WILDER,

CASS COUNTY VETERANS COUNSELOR,
March 7, 1981.

DONALD RIEGLE, Jr.,
Washington, D.C.

Hon. DONALD RIEGLE: I think that the proposed cuts in the "V.A. Budget" are reprehensible, President Reagan, when he addressed the V.F.W. convention stated that, if he was elected the V.A. would not be harmed. Again on Feb. 18, 1981 he again stated the V.A. would not be touched.

The advanced age of W.W. II veterans along with the various afflictions of the vets of subsequent conflicts cause an increased load for the V.A.

I know, because I have been a V.F.W. Post service officer for 32 years.

Sincerely,
GERALD E. ANGLE, V.F.W.

PARALYZED VETERANS OF AMERICA,
March 25, 1981.

Hon. DONALD W. RIEGLE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR RIEGLE: On behalf of the members of Paralyzed Veterans of America, I request your efforts to provide adequate funding for the Veterans Administration in the Fiscal Year 1982 budget. The Carter Administration recommended a VA budget which would have funded most existing VA programs and services, with little room for growth. The Reagan Administration proposes reducing from the Carter proposal $744 million. The VA's Department of Veterans Benefits, for example, will have 3,200 employee positions eliminated, despite the growing length of time it now takes for them to process their work load. However, the reduced budget will have even more drastic consequences on the availability of healthcare services for eligible veterans. Despite the intent of the 96th Congress to improve the VA's recruitment and retention of VA health-care professionals, the Reagan Administration would eliminate 1,100 healthcare personnel positions this calendar year and 20,000 positions would be abolished by 1986. There would be no funding for the Vietnam Veterans' Outreach Program in FY 1982, nor would there be funding for the improvements Congress made in the VA's vocational rehabilitation program, just last year. In other words, health-care services will be unavailable for many veterans who have been injured in defense of the nation.

Many of these cuts are counterproductive if the Administration truly seeks to reduce federal spending. For example, the rehabilitation program helps disabled veterans return to the work force, as does the Vietnam Veteran Outreach Program. The Administration would also delay all VA construction projects, even though many of these projects are already underway and have had considerable funds spent on them.

Thank you for your time and consideration, and I trust that you will work to lead Congress in an effort to increase the Administration's budget proposal for the VA at least to the level proposed by the last Administration.

Sincerely yours,
MICHAEL F. DELANEY,
National President.

Mr. CHILES. Mr. President, I yield to the distinguished Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, how much time does the Senator have remaining?

Mr. CHILES. I yield such time as the minority leader may desire within my time.

The PRESIDING OFFICER. The Chair advises the Senator from Florida that he has a minute and a half.

Mr. ROBERT C. BYRD. Mr. President, I ask the minority manager of the resolution to yield me time.

Mr. HOLLINGS. I yield such time to the minority leader as he may desire.

Mr. ROBERT C. BYRD. Mr. President, I am proud to join with the distinguished Senator from Florida (Mr. CHILES) and other Senators in sponsoring this amendment.

Mr. President, last year the Veterans' Administration celebrated its first half century of operation as an independent agency created for the sole purpose of serving America's veterans and their dependents and survivors. We can all take pride in those years of service and in our national commitment "to care for him who shall have borne the battle."

Today, we have more than 30 million veterans in the United States—the largest veteran population in our Nation's history. The Veterans' Administration has grown to meet this sixfold increase in veterans during the last 51 years.

The Veterans' Administration hospital system has grown from 54 hospitals in 1930 to more than 170 today, caring for more than 1,300,000 inpatients annually. VA nursing homes and domiciliaries care for nearly 80,000 veterans each year, and outpatient clinics record about 18 million annual visits.

The Veterans' Administration hospital network is the largest organized medical system in the United States. It is a system which we should all value, but if we allow the Budget Committee's personnel mandate to stand, a great number of veterans are going to be turned away from hospitals or they will wait lengthy periods for adequate care.

If outcare health services are reduced, health care will grow more expensive as more veterans will be hospitalized. And, no health care clinic can be run by doctors alone. Without adequate support staff, waiting periods for medical treatment will grow unduly long and the sick will grow sicker, medical records will likely be lost or misplaced, and the quality of health care will deteriorate.

Veterans in need cannot be denied adequate medical attention. I am proud to cosponsor the Chiles amendments to restore $300 million in funding for VA health care. If we cut VA health care personnel to 1979 levels when our veterans population has grown, we will do a disservice to our Nation's veterans and we will, ultimately, spend more on medical care.

I urge my colleagues to vote in support of the amendment by Mr. CHILES.

Mr. CHILES. Mr. President, I yield a minute and a half to the distinguished Senator from Hawaii.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, will the Senator from South Carolina, the manager of the bill on this side, yield me 2 minutes?

Mr. HOLLINGS. I am glad to yield to the distinguished Senator from Hawaii 2 minutes on the bill.

Mr. MATSUNAGA. Mr. President, as a member of the Committee on Veterans' Affairs, and as a cosponsor of the pending amendment, I rise in its support.

At the very outset, Mr. President, let me emphasize, as others in support of this amendment have done, that I recognize that our Nation is in a serious economic crisis that must be addressed immediately and effectively if we are to avoid economic disaster. Indeed, I believe everyone on this floor recognizes that in order to accomplish this there

must be sacrifices made by Americans across the entire spectrum of our society, including the Nation's 30 million veterans.

The fact of the matter is, however, Mr. President, that the Veterans' Administration and its program must be a part of the overall spending reduction strategy. The VA must be prepared to make its contribution to the effort which will, if successful, help all Americans, including veterans, by bringing inflation under control.

However, as far as this Senator from Hawaii is concerned, reductions in veterans' programs that would, in effect, break our Nation's long standing commitment to the care of our veterans, are dangerous and totally unacceptable. Surely, the veterans' budget must be fiscally responsible but, at the same time, it must continue to provide sufficient funding to insure—I repeat, to insure—the continuation of all essential services for our Nation's veterans.

It must be made clear, Mr. President, that veterans' programs should be considered part of our defense program. While the administration, on the one hand, is proposing to increase the defense program, we are, in effect and in fact, reducing spending for veterans' programs which should be considered integral parts of our defense program.

Mr. President, in reviewing the Reagan administration's budget proposal for veterans, the Committee on Veterans' Affairs attempted to reach a balance between making significant cuts and cost savings and insuring that the quality and the integrity of veterans programs and services were preserved.

A majority of the committee members believe that a restoration of some cuts had to be made, as well as a realinement of certain reductions proposed by the administration.

For the most part, these restorations were in the health care area. By this amendment, we do intend to restore sufficient amounts so that adequate health care for veterans will be continued.

It must be made very clear, Mr. President, that the adequate health care of veterans is not the only thing at stake here, although it is of primary importance. We must also realize that if we break faith with the brave Americans who served their country faithfully in wars past, we will be doing great and, perhaps, irreparable harm to our efforts to recruit and retain the men and women needed to fill the ranks of our All-Volunteer Armed Forces.

Accordingly, I strongly believe that the President's budget proposals and the Budget Committee's reconciliation instructions, which cut deeply into essential veterans programs, are inconsistent with our efforts to strengthen our military defense posture. The Veterans' Administration and its essential programs must be considered and treated as integral parts of our military system, for the manner in which we provide for our veterans will largely determine the quality of our national defense. Why then is the Reagan administration proposing to boost defense spending on the one hand and proposing to cut veterans' programs?

Mr. President, in reviewing the Reagan administration's budget proposals for veterans, the Committee on Veterans' Affairs attempted to reach a balance between making significant cuts and cost savings and insuring that the quality and the integrity of veterans' programs and services were preserved. A majority of the committee believed that a restoration of some cuts had to be made as well as a realinement of certain reductions proposed by the administration. For the most part, these restorations were in the health care area.

The so-called Cranston-Thurmond compromise, which was approved by the committee, provided for the continuation of the Vietnam veterans readjustment counseling program; restored funds for all but 330 of the over 5,000 medical care personnel which would be eliminated under the Reagan budget; restored funds for three important programs for catastrophically disabled veterans; and provided funds for the enactment of legislation to improve care for ex-prisoners of war, among other things.

Overall, Mr. President, total reductions made in veterans' programs under the Cranston-Thurmond compromise would be $530.1 million, nearly three-quarters of the goal set in the President's budget. The spending reductions contained therein, which differ from those made in the President's budget, represent, I believe, realistic and achievable savings which can be made without having an adverse effect on the quality of the care and services now provided to veterans.

Unfortunately, after revising and realining the President's budget recommendations, the committee accepted an amendment which added an additional $205 million in unspecified legislative savings. This action was taken simply to meet the President's savings recommendations for the VA, a figure which has been shown to be arbitrary and flawed in its assumptions.

Mr. President, with respect to this reconciliation resolution, let me first say that I am pleased to note that the Budget Committee accepted the Veterans' Affairs Committee's recommendation to continue funding of the Vietnam veterans readjustment counseling program. It was our committee's judgment that this program is an essential part of our efforts to heal the lingering psychological problems of our Vietnam veterans and must be extended for at least another year. Ending this vital program, as proposed by the administration, would be a further injustice perpetrated by our Government upon the veterans of our Nation's most unpopular war.

Unfortunately, the Budget Committee failed to follow the recommendations of our committee in the vital medical care area.

In the Veterans' Affairs Committee markup on March 12, 1981, we made a statement of policy that the budget must not make drastic cuts in VA health care staffing. The committee voted to restore funds for many of the personnel slated for elimination in the Reagan budget.

We took this action, Mr. President, because many of us believe that adequate VA health care personnel levels have a positive effect on the quality of health care provided to veterans. We find it preposterous to think, as the administration apparently does, that making selective cuts in VA health care staffing will have little or no effect on the delivery of care.

The administration will, of course, argue that the cuts recommended in the staffing area are in indirect health care personnel and, as a consequence, will have a minimal effect on the operation of the VA health care system and resulting care for veterans.

Mr. President, I do not accept this argument and I do not believe the Senate should accept it.

In my view, there is a direct correlation between the levels of VA health care staffing, be it in direct or indirect care personnel, and the overall quality of care provided. This has been documented over the past 2 years by the Veterans' Affairs Committee in letters to the President expressing deep concern about the effect of proposed health care staffing freezes and cuts. The fact of the matter is that the VA health care system has been running at dangerously low personnel levels in recent years that are already threatening the physical and mental well-being of hospitalized veterans.

It is the view of the minority members of the Veterans' Affairs Committee that the administration's plan to cut indirect health care staffing will cause a decrease in the productivity of the direct care staff at VA facilities. As indicated in our minority views submitted to the Budget Committee, we believe that VA doctors and nurses become less efficient when support personnel are taken away. These professionals are forced to do more paperwork and other routine chores that are usually done by nonprofessionals. They have to wait longer for lab tests and reports and, as a consequence, provide care at a slower pace and in a less efficient manner. Furthermore, backlogs in discharge planning and processing, which support personnel handle, result in longer, inefficient lengths of stay for patients. And, by extension, we can assume that with beds filled for longer periods of time, some heavily utilized VA facilities will be forced to turn away greater numbers of needy veterans or keep them waiting for care.

Mr. President, Senators must understand precisely what budget cuts in VA health care staffing of the magnitude proposed by the administration and the Budget Committee really mean. They mean greatly reduced indirect health care personnel. They mean reduced productivity among remaining support staff and professional health care staff. They mean slower, less efficient care and services to veterans in VA facilities. They mean fewer available beds for veterans in need of health care.

In the final analysis, these cuts translate into lower quality of health care provided by the VA medical system.

Mr. President, the Senate must go on record here and now that the health and well-being of veterans who depend on the VA health care system must not be placed in jeopardy by indiscriminate and unjustified budget cutting.

At the very least, we must vote to restore adequate funding for VA health care personnel.

I fully realize that the proposed Chiles amendment goes much further than just adding back the amount necessary to bring the reconciliation resolution in line with the staffing recommendations made by the Veterans' Affairs Committee. I am concerned that this effort not be perceived as one which is intended to gut the administration's attempt to make cuts in all Federal programs. I believe that the Veterans' Affairs Committee is ready and willing to make significant cuts in VA programs, but we reserve the right to make them in areas which are not crucial to the health and welfare of veterans. Mr. President, the Chiles amendment would restore these crucial programs and should be adopted.

The PRESIDING OFFICER. All time having expired, the question is on the amendment.

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, I thought I had 1½ minutes remaining and that time was being charged to the bill itself.

The PRESIDING OFFICER. The Chair's understanding was that the Senator yielded to the Senator from Hawaii, together with such time granted by the distinguished Senator from South Carolina.

Mr. CHILES. Mr. President, I started to yield and then I asked for time on the bill. Time was granted on the bill. I only need about 30 seconds.

The PRESIDING OFFICER. Time having expired, the question is on the amendment.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr President, I ask for the yeas and nays

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Mr. President, I yield 5 minutes off of the resolution to Senator THURMOND.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, in an effort to determine the areas within the Veterans' Administration that would be impacted by the Veterans' Administration budget reductions, I have contacted the Budget Committee and the President's Office of Management and Budget. I was told this morning that it is the position of OMB that these reductions will occur in two areas.

First, there will be a reduction in educational benefits as they relate to flight training and correspondence schooling. This proposal has been before Congress during the past four Congresses, and I believe additional modifications in these programs would be in order.

Second, and more importantly, a reduction in personnel within the Department of Medicine and Surgery is proposed by OMB and the Budget Committee. Currently there are approximately 183,000 FTEE's within the Department of Medicine and Surgery. Of this number 107,000 FTEE's are considered involved with direct patient care; and 76,388 are involved with indirect care. For fiscal year 1982, OMB proposes to reduce 3,683 indirect care personnel but make no reduction in those involved in direct care. OMB also related to me that in addition to no reductions in direct care personnel they are not recommending the closing of any VA health-care facility. OMB stated that these reductions will come from personnel invloved with indirect care; not doctors, not nurses, and not technicians.

I am pleased to hear the statement that these reductions will come from personnel involved with indirect care—not doctors, not nurses, and not technicians. I am pleased to have this assurance and the commitment of OMB on this matter.

OMB also informs me that their proposal will reduce certain other items which are not considered as essential as medical care.

Mr. President, I will take but just a few minutes.

This is probably the toughest vote I have ever cast in the Senate. I have stood by the veterans on just about everything that has come before the Senate since I have been here—27 years, but we ha·e to realize that this country is in a critical fiscal emergency at this time.

Our President is trying to balance our national budget. He is asking everybody to sacrifice. As much as I regret to see veterans programs cut even $1, I believe that they are willing to share their part in this time of crisis and emergency; and serve their country in peacetime just as they so bravely did in wartime.

Mr. President, I wish to say that veterans programs and the VA may be considered a pet project of mine—I guess helping the veteran is my pet project. Everybody here has some pet project; but, if we all hold out, and do not support the budget package that the President has brought, and everyone goes for their pet projects, we will never achieve fiscal responsibility.

It is my hope that the Senate can put through this budget recommendation of the President of the United States which will reduce spending in this country; and help to balance this budget; and stop deficit spending from year to year.

Our public debt now is almost $1 trillion. The interest is about $75 billion a year. The budget has not been balanced but once in 20 years.

I cannot believe that our citizens of this country will not back the President in this proposal to cut the budget, to reduce expenses, and balance the Nation's budget.

Mr. President, we have got to increase our national defense posture. But we cannot increase defense spending and also increase domestic spending.

I hope with the circumstances that exist now, the veterans of this country will understand—and I believe they will—that it is my sincere desire that they not be adversely affected with these budget reductions.

I am glad I have the assurance that there will be no doctors cut, no nurses cut, and no technicians cut, but these reductions will come from indirect health care personnel.

In view of that, I am going to oppose this amendment of my colleague (Mr. CHILES) and back the President, with the hope that we can advance the President's package.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I cannot let the event which just occurred pass without comment.

I want to say to Senator THURMOND, as floor manager of this bill, that I greatly appreciate what he has just done.

There are those now who are going to try to make this vote, in the event we decide to give the veterans just a little bit less, just a pinch less—and I will tell you what it is in percents in a minute—that all those who vote that way are against the veterans of this country.

Well, what Senator THURMOND has done for us as he stood up is assure each and every one of us that that is not going to be the case, because there is not anyone in this institution or anywhere in America that is going to be able to say that those who want fiscal sanity in this country are against the veterans when STROM THURMOND stood up and said we have to take a little bit even from the veterans.

Let me tell you what it amounts to, Mr. President—1.6 percent reduction for veterans programs versus 8 percent reduction for the rest of the domestic programs; 1.6 percent versus 25 percent for education—25 percent, not 2.5 percent; 20 percent out of a block grant for social programs.

Looked at another way, the reduction in veterans programs is about eight-tenths of 1 percent of the total reductions this resolution will require in Federal spending over the next 2½ years.

Across the board, everyone is being asked to sacrifice.

I stand with STROM THURMOND. When the veterans understand that they are asked to sacrifice 8/10ths of 1 percent of the total—I cannot even draw comparisons, it is so little. Eight-tenths of 1 percent is what they are being cut. I do not know how to state that to the Senate.

You can draw the conclusion yourself. I submit that the veterans are not going to go to the polls and throw anyone out of office over this vote. I submit that their leaders who are circulating all these letters around ought to look at this President's budget and they ought to thank him. Their programs have almost been held intact.

Twenty-five percent is proposed to be cut out of education because we think the States can do it better. But this is a little tiny pinch out of veterans. There was no cut in their cost-of-living index.

Do you know what else we did? We are not going to let them take aviation training through one of our educational programs. I am sure that is an enormous thing to do to the veterans; they cannot study aviation and get it paid for as an educational benefit.

No one has to be fearful that there will be political repercussions. Quite to the

contrary, this is the first opportunity to decide whether we are serious. I submit we are going to be serious this afternoon and the veterans are going to understand it when we are finished explaining it to them.

The Senate committees, working with the President are going to make sure that this small contribution to fiscal restraint does not hurt them. Even with that little bit, we will have adjustments in the authorizing committees and appropriations to even minimize that if there is some fear.

Senator DOLE asked me to yield when I finished. Is he here?

Mr. HOLLINGS. I would like to say a word, if I may.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. I yield myself as much time as is necessary on the resolution and then I will yield to our ranking member of the Veterans' Committee, the distinguished Senator from California.

Mr. President, the Senator from Wyoming, for whom we all have the greatest respect, brought in a chart.

Mr. RIEGLE. Can we have order in the Chamber, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HOLLINGS. That chart shows the increase——

The PRESIDING OFFICER. Will the Senator suspend until there is order in the Chamber?

The Senate will be in order.

The Senator may proceed.

Mr. HOLLINGS. I thank the distinguished Presiding Officer.

The distinguished Senator from Wyoming brought in a chart indicating the increase in veterans health spending. Obviously, it can be caused by one of two things: It is either an increase in the number of veterans or an increase in the cost of their care. And in this case, costs are rising for both reasons.

There has been a movement on foot throughout the past several years, in the past administration and in the health care industry, to try to reduce the inflationary costs of hospital care. We have been doing our dead level best, but we find that hospital costs continue to escalate. Health costs continue to rise faster than inflation.

We must also face the fact that my group from World War II are now growing older and are now trying to get into the veterans hospitals. They do not want to get in, but they have to because they have some particular medical need.

So the chart really is not what you might call accurate because it does not explain why costs have gone up so much. But so often we have found the Director of OMB watching such increases and then simply saying, "That is too much. Let us cut it."

He is not asking about the need and he is not asking for the reason. But we have to mention the need and we have to mention the reason.

So, I have to differ with my distinguished colleague from South Carolina who has worked so long and hard for the veterans.

Also, let me point out that when we asked the VA to back up their cuts, they submitted a listing. Based on this listing, we attempted to restore the cuts in the Budget Committee but lost in a vote of 6 to 12. So this miniscule amount of one-eighth of 1 percent that the majority calls this cut, was voted out in a voice vote. But now they are the ones who are trying to say that the world will end. And, yes, it could end for those who can no longer be treated in VA medical facilities.

Let me go over some of the list of cuts submitted by the administration and the VA.

The first item is a reduction in non-service-connected outpatient visits, saving $75 million, and cutting 1,774 personnel.

Mr. President, we have gone along with cutting low priority veterans programs such as flight training and correspondence courses. We have tried and have succeeded in making economies. But this cut is hitting the elderly veterans, the sick veterans, the ones in need of hospital care.

As a group on the Budget Committee, we did not feel we ought to sacrifice them, particularly in light of the fact that we are $2.3 billion above President Reagan's recommended cuts. We could accept the amendment of the Senator from Florida and still be $2 billion above what the President has requested in Federal budget reductions.

We are above the President's cut. We are not decimating his program. We are not bringing about double-digit inflation. We are simply making a judicious judgment and approaching this particular problem based on the information we were given by the VA—not on some listings suddenly shown by the senior Senator from South Carolina a moment ago.

These are other areas to be cut by the administration: To provide for increased World War I outpatient medical visits within available resources, a cut of $21 million; combine hospital wards with low census and occupancy rates, a cut of $27 million, with a reduction in personnel of 1,116; a reduction in the community nursing home census for a cut of $18,735,000; increase in employee productivity, for a cut of $25 million with a reduction of 1,104 personnel; revised schedules for facility activation, for a cut of $18,548,000, with 203 personnel cuts.

Now, Mr. President, let me also mention that when we got to indexing in the Budget Committee, I was not able to prevail. But we all know where the real budget savings can be made and the real spending cuts can be had, and that is in the overcompensation of federally indexed programs and special pay raises. It is a financial problem and we all know it. We have not yet faced up to it. But it seems they have faced up to it in OMB on this cut in the VA physician special pay bonus. They intend to cap this increase even though Congress passed it just last year.

Yet we are having great difficulty in maintaining doctors and medical personnel in the VA facilities because of low salaries. But they could not reduce the raises for retired Senators. They could not reduce the increases for retired civil service employees. But OMB got to the veterans physicians and they found a way to cap their increase.

Do not tell me about that new list that was read a moment ago. That was not the list they gave us and on which the Budget Committee voted. Our list showed the elimination of a planned rate increase for consultants and attendings, saving $10 million; a reduction in the equipment increase, saving $41 million; and all other travel reductions, specialized medical activities, education and training for the veterans in the hospitals, saving another $18 million, and cutting 432 personnel.

So the cut actually then was $298,679,000, with a cut in medical personnel of 4,629.

I yield to the distinguished Senator from California, our ranking member, sufficient time on the resolution.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, I thank the distinguished Senator from South Carolina.

Mr. President, I rise in strong support of the amendment of my distinguished colleague from Florida (Mr. CHILES). As the ranking minority member of the Committee on Veterans' Affairs and its past chairman, I have carefully scrutinized the President's proposed cuts for the VA health-care system. Clearly, unless we revise them, they are bad news for sick and disabled veterans—bad news particularly because they are based on ill-conceived assumptions of how economies might be made in the large, complex system of 172 VA hospitals.

Mr. President, for 4 years I was chairman of the Committee on Veterans' Affairs, and I worked very hard to insure that eligible veterans would be provided the quality health-care services to which they are entitled in the most cost-effective manner possible. All of my colleagues know that part of our national commitment to the men and women who have served—or are serving today—in our Armed Forces includes providing health-care services for the disabilities or diseases they incur while on active duty and to the extent resources are available, for the non-service-connected disabilities of very needy veterans and veterans who are 65 years of age and older.

The VA hospital and medical program exists to meet that commitment and the adoption of the Chiles amendment will send a strong signal that we will not fail by falling into the trap of accepting essentially arbitrary cuts in this program of very high national priority.

The costs of meeting these obligations to veterans are a cost of war. If we do not meet these obligations, we shall have a tough time with the Volunteer Army that so many of us would like to see thrive, and we shall have a tough time, if we have to resort to the draft or whatever else, if we do not keep commitments that have been made to those who enlist or who otherwise serve in the Armed Forces.

The Senator from Florida, despite challenges, was very, very correct when

he stated that, according to the budget document submitted by the VA, there would be a reduction, if the figures are accepted, of 297 physicians, 933 nurses, and 104 psychologists. That was planned by the VA as part of a way to meet a reduction of 4,300 VA health care personnel. Now, because of the questions raised about these cuts, we find the administration somehow giving assurances to Senators and saying, "Oh, no, we won't cut doctors or nurses or other clinical health care personnel."

Now, they claim what will be cut will be the support personnel. The effect of such reductions will be, however, to cut back severely on the productivity of doctors and psychologists and nurses, because they will be otherwise occupied. They will not be free to do the work they trained so long and hard to do, because they will lack the support services to give the direct help only they are professionally qualified and trained to give.

This will be a great waste of taxpayers' money, and it will have very adverse consequences for the health care of veterans. I submit that it is just impossible in an orderly, economical, efficient way to make these staffing cuts from the ranks of nonclinical personnel, not from doctors and nurses, without greatly diminishing the capacity of the VA health system to give adequate medical care.

Mr. President, I am at a loss to understand how cutting out great numbers of critical support personnel would not adversely affect the balance of direct health care and support personnel that is necessary for any hospital to operate efficiently. Major cuts in support personnel—in a system as thinly staffed in those support areas as is the VA—inevitably will decrease the productivity of the doctors and nurses who depend on support personnel to do lab tests; to maintain, store, and retrieve patient records; to maintain pharmacies; to do housekeeping chores; to do the paperwork in connection with admitting and discharging patients; and to perform the hundreds of other functions that are absolutely essential to providing care to patients.

What we are going to find is doctors, nurses—highly skilled health-care professionals—keeping records, retrieving records, maintaining the pharmacy, doing housekeeping chores—all an atrocious waste of these highly trained personnel.

Lack of adequate support personnel to carry out these responsibilities will inevitably lead to delays in providing decent, adequate care and will result in longer, inefficient lengths of stay and worse, in some instances, create a threat to the health and safety of veteran-patients.

This is not just my own analysis, Mr. President. The GAO, the body we depend upon for information on this sort of matter, has indicated that the VA was already suffering, before these cuts, from inadequate levels of support staffing. If the proposed reductions occur, this bad situation will be made much worse.

Clearly, Mr. President, our obligation to veterans is a fundamentally national obligation and national responsibility—just as are national defense and foreign policies. Indeed, I have always maintained that veterans programs are an inseparable cost of past wars.

So, for many VA programs—especially those that are designed to help Vietnam veterans—if the Federal Government does not do what needs to be done, no one will.

Thus, in assessing the President's proposals for veterans programs, I have sought to reach a balance between achieving savings wherever possible while insuring that our commitments to the Nation's veterans are kept and the quality and integrity of VA services are protected.

In my view, veterans who, like other Americans, are hurt by inflation, are willing to join in the effort to bring the economy into control by participating in Government-wide efforts to reduce Federal spending. That is not the issue here, and I would stress at this point that the Budget Committee's mark and the Chiles amendment do not represent positions of all or nothing in terms of veterans joining in these belt-tightening efforts. If this amendment carries, VA programs will still be subject to intense scrutiny and cuts will be made in areas not covered by this amendment. It is my understanding that not all of the possible options with respect to making savings in VA programs were even considered by the Budget Committee, which decided to focus on a VA health care system that my colleagues know we have worked very, very hard to make improvements in during the past several years. There is still much to be done in that regard. Thus, the issue is whether we will accept the substantial cuts proposed by the President, which will greatly and adversely affect the provision of health care services to our Nation's veterans; or restore the funding that would be provided in the Chiles amendment—$300 million in budget authority and outlays in fiscal year 1982—thereby rejecting drastic staffing cuts in VA health care facilities and assuring that veterans in need of outpatient care will receive that care and not be inappropriately hospitalized.

Mr. President, for reasons I will describe below, I believe we must reject the contentions of the President, OMB, and the Budget Committee that economies can actually be made in the manner that they assume. We should stand firm in support of the promises the President himself made to veterans during his campaign when he said:

> To me it is unconscionable that veterans in need are denied hospital and medical care because of inadequate funding which has closed hospital beds and cut health-care personnel within the VA.

In fact, closing hospital beds—maybe even entire hospitals—and cutting health care personnel in the VA health care system is exactly what the President and OMB are now proposing, and I agree that it is unconscionable. We should reject their plan here and now.

The Budget Committee evidently acted during its markup to support staffing and outpatient cuts on the assumption that the demand for VA medical services will not be as great because the veteran population is declining. There is no basis that I am aware of for such an assumption. The veteran population has not declined in recent memory. In fact, VA budget documents submitted by the Reagan administration itself show that the total number of veterans is expected to be 30,184,000 in fiscal year 1982—up 340,000 in the 5 years since fiscal year 1977. To premise reductions in VA health care staffing and funding for outpatient care on such a fiction is a great disservice to our Nation's sick and disabled veterans. We should reject that notion and set the record straight. The Chiles amendment will allow those ill-advised reductions to be avoided.

The assumptions accepted by the Budget Committee with respect to VA medical programs also include the assumption that even with the reduction proposed here the budget will still provide an increase of 10½ percent in VA health care programs over last year. However health care costs in general are rising at a rate of approximately 15 percent per year. Thus, my colleagues should be aware that there will be a reduction in terms of real dollars in funding for VA medical programs which, of course, will result in a reduction from the current level of health care services provided by the VA.

HEALTH CARE STAFFING

Mr. President, I submit that no economies can actually be achieved or should be claimed based on the Reagan plan to cut drastically VA health care personnel that the Chiles amendment would restore. The President has indicated that these staffing cuts would be taken from the ranks of nonclinical personnel—not doctors and nurses—and thus the administration contends that the overall effect of the cut on the VA medical system will be minimal.

Mr. President, I have already addressed this fiction at length. We are talking about creating a situation in which highly trained professionals will be directed from direct patient care duties in order to push papers and, very simply, keep the hospitals running. There should be no question that lack of adequate support personnel to carry out such routine responsibilities will inevitably lead to the unacceptable results I described earlier.

Mr. President, President Reagan's claim that staffing can be reduced through the consolidation of certain wards, with no reduction in either the numbers of patients treated or the rate of turnover, is also unsupported and unsupportable. The VA in-patient turnover rate will inevitably decline as staffing resources are withdrawn. It takes no genius to understand that. If we adopt the Chiles amendment, there will be no need for such consolidations to take place.

OUTPATIENT VISITS

Mr. President, the logic behind not funding 2.1 million outpatient visits is no better. As I stated before, I do not expect demand for such care to decline nor does the VA. Therefore, this reduction would force the VA to stretch its resources dangerously thin—which means providing

poor quality, if not inadequate, care—or to turn eligible veterans away. I do not believe such a result is what our Nation's veterans deserve, nor do I believe that making the cut will achieve any real savings at all.

NURSING HOME CARE

The Chiles amendment also would restore funding for a proposed reduction in the VA's census for community nursing home care, a totally arbitrary proposal based only on the need to find a savings in the VA medical care account. The demand for contract nursing home care is not decreasing. If the VA cannot provide care to veterans who need long-term care in its own nursing homes and it does not have sufficient funds to place such veterans in community nursing homes under contract with the VA, the inevitable result is either that veterans who require nursing home care will be inappropriately retained in acute-care beds or they will not receive the care they need at all. Neither outcome makes sense in terms of representing real savings and, thus, should be rejected.

PROGRAMS FOR SEVERELY DISABLED VETERANS

The Chiles amendment also would restore funding for three programs of great importance to catastrophically disabled veterans that the Veterans' Affairs Committee, on my motion, on March 12 unanimously recommended be restored.

The programs involved are the hospital-based home care program, a program consisting of three special projects to provide evaluation and treatment to spinal-cord injured veterans and other veterans to train them to be catheter-free, thereby preserving their life-sustaining kidney functions, and certain long-planned enhancement in medical rehabilitation—enhancements that would have upgraded certain services to veterans who are spinal-cord injured, blind, psychiatrically impaired, and brain injured, and those who are amputees, stroke victims, and cardiopulmonary patients.

Mr. President, the hospital-based home care program is a very cost-effective program that helps seriously disabled veterans with chronic conditions live at home and, thus, frees hospital beds for use by acutely-ill veterans. If this program is eliminated, many of the veterans who now receive home care will probably need to be readmitted to a hospital or nursing home.

However, the additional cost of providing such care in VA facilities or community nursing homes is not figured into the proposed reduction. Thus, much of the alleged savings is illusory.

The second program for catastrophically disabled veterans we would allow for under the Chiles amendment would be the establishment of the three special projects that would provide bladder training, that I described before.

The third allowance that would be provided would be for a long-overdue program enhancement in medical rehabilitation—including comprehensive services in medical, physiological, social, educational, and vocational assistance geared to help these veterans achieve maximum independence.

Thus, the reduction proposed for these three special medical programs for very seriously disabled veterans, is I believe, unsupportable in terms of either budgetary considerations or VA priorities.

Mr. President, considering the unique responsibilities of the VA health care mission to meet the rehabilitation needs of those who became disabled in the service of our country and the unique characteristics of the VA health care system, the VA clearly should be one of the Nation's leaders in total rehabilitation and independent-living programs. We have a heavy responsibility to make sure that it is, and this reduction very clearly would retard much needed actvities in this area.

The bottom line here, I believe, is that traditional medical and surgical services have for too long ended before a disabled veteran is returned to a productive life outside a VA facility. The gap between those two points is rehabilitation. All three of the programs involved in this proposed reduction are vitally important and should be strongly supported—not cut—to allow the VA to provide the best quality services possible to seriously disabled veterans.

These are exactly the types of services the VA should be providing to this most deserving group of severely disabled veterans—services designed to increase independence, avoid unnecessary hospitalization, and make the VA a progressive leader in rehabilitation medicine.

In sum, Mr. President, the cuts I have described, which would be restored by the Chiles amendment are not the products of a careful, deliberative process and do not warrant our approval.

Thus, Mr. President, I urge my colleagues to consider carefully the situation and support the Chiles amendment to reduce by $300 million the cuts that the Veterans' Affairs Committees would be instructed to make.

Mr. HOLLINGS. I have the distinguished Senator from New York who wanted a couple of minutes. The Senator from Michigan wanted a couple of minutes and the Senator from Nebraska. Let me yield a couple of minutes to the Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding.

Mr. President, I hope we are not going to get into the pattern of having new sets of information suddenly arriving on the Senate floor from the OMB. We cannot make responsible decisions if we start relying on new documents brought in here that still have wet ink and that have not been delivered to all the Senators. I think we have to base our judgments on submissions that were made to the Budget Committee in due process. That is what this committee record is all about.

It is that kind of fast handwork that has made the veterans organizations in this country outraged. That is why they are supporting the amendment of the Senator from Florida. They know in fact that part of the safety net is being ripped away. Veterans have a right to be outraged about it. But let us not have last-minute documents brought in here where OMB is trying to back away from the very statements they made before the committee.

We are not talking about cutting out these services for other groups of people. Everybody in this Chamber knows we have health services available to us, and those in the executive branch do. I think the veterans deserve them. They have been told they could count on them through the years, through each administration, Republican and Democratic, until today. Now we have a new administration that wants to take a walk on the health needs of the veterans of this country. It is absolutely an outrage.

I hope there are enough Members in this body who think for themselves and who do not take their marching orders from OMB. OMB is an organization that told us one thing in the Budget Committee, as has just been outlined by the Senator from California, and now suddenly, at the last minute, we get a piece of paper, that was not even distributed, that tries to make us believe that the cuts will be painless.

We cannot make decisions in this fashion. You are being walked right toward a cliff. Do not take the veterans of this country with you. The veterans organizations have spoken out clearly. When they say the cuts will have a devastating effect, I think they know what they are talking about.

We shall find out today who is with the veterans and who is not.

Mr. HOLLINGS. Mr. President, I yield to the distinguished Senator from Nebraska.

Mr. EXON. I thank my friend from South Carolina.

Mr. President, I just want to add my voice in support of the amendment being offered by the Senator from Florida. I have stood on this floor on frequent occasions and voted against increases above and beyond what the Budget Committee has recommended. I have voted frequently against amendments offered by my friend from California, the most distinguished whip on this side.

In fact, Mr. President, within the last month I received a call from a group of Veterans of Foreign Wars from my State of Nebraska—and I might say that I am a lifetime member of the Veterans of Foreign Wars—who were quite critical of the scorecard that had been fashioned regarding the votes of this Senator from Nebraska on a series of veterans' matters. There was some mention of the fact that they hoped to support me for reelection but might not be able to do so because of some magic scorecard of mine that had been invented somewhere along the line.

At that time, I lectured my friends from Nebraska, my fellow members of the VFW, at some length. I told them that when I voted on the floor of the U.S. Senate, I voted for what I thought was right and appropriate on each vote.

The vote they were critical of was not a vote to cut veterans' benefits or veterans' hospital benefits but was merely to pare down the ever-escalating increase of those particular amounts.

We have a totally different situation here today, and I therefore am urging my colleagues on both sides of the aisle

to take their blinders off and recognize that in this case—maybe this is the only case; I think there are others—that in this case, at least, I think the administration's recommendations are going to cut at the heart of the veterans, those who served this Nation in the past, at the same time we are making a big deal of the fact that we are building up the defenses of the United States of America.

Are the young people today going to believe us when we ask them to make sacrifices, while they see us turning our back on the legitimate obligations of this Nation to those who defended our flag in times of need?

Of all the times to cut back hospital benefits for veterans, it is wrong, because at this time we have a large population of World War II veterans who are about to reach the age where they will be coming into our veterans' facilities in massive numbers. Indeed, this is a time when we must look forward to the months and years immediately ahead and begin to build up within reason our veterans hospital facilities, without making the drastic cuts that are being recommended in this instance by the Reagan administration.

I attended the VFW meeting here a couple of weeks ago, and I believe the VFW members were indicating very clearly at that time that they thought it was wrong to make cuts in these kinds of programs.

I hope that when we have this vote in a few moments, we will have people on both sides of the aisle who will not have people putting a ring in their nose and riding down the path of destroying something that I believe is very critical to the veterans of the United States, as we recognize the obligation we have to them for past services.

Mr. HOLLINGS. Mr. President, I yield to the distinguished Senator from New York.

Mr. MOYNIHAN. I thank the distinguished ranking minority member of the Budget Committee.

Mr. President, I wish to express a sentiment which I believe is shared strongly by those of us in this body, on both sides of the aisle, who served in the armed services in time of war.

There is an issue of trust involved in this decision, and it could not have been more bluntly stated than by the commander of the Veterans of Foreign Wars on March 18.

I read an Associated Press statement which appeared in the Washington Post:

The Veterans of Foreign Wars, which broke precedent to endorse Ronald Reagan's candidacy last year, accused the president yesterday of "balancing the Veterans Administration budget on the breaking backs of the veteran, his widow and orphan."

Art Fellwock, commander-in-chief of the VFW, said in a press release that the Reagan budget proposes to eliminate more than 7,000 medical personnel from the fiscal 1981 and 1982 budget submitted by President Carter.

"Reagan, just a few short months after telling the delegates to the VFW national convention, 'To me it is unconscionable that veterans in need are denied hospital and medical care because of inadequate funding,' is now doing just that," Fellwock said.

I have no desire to make this a matter of any personalities. These things get made in bureaucracies. But the Budget Committee had a clear opportunity to keep the commitment of their administration.

On the last day of our markup, in the 58th vote of the Budget Committee markup, I read this statement to the full committee; and I asked the full committee, in the name of a commitment made to men and women who have served in the armed services, to reverse these reductions, and the committee did something unusual. My motion was not voted on. It was moved to table, so that it would not be clear what decision had been made.

Mr. President, I ask unanimous consent to have printed in the RECORD vote No. 58 as in the report before us.

There being no objection, the vote was ordered to be printed in the RECORD, as follows:

VOTE No. 58

Armstrong motion to table the Moynihan motion to reconsider the vote on the instruction to the Committee on Veterans Affairs.

Motion agreed to by 11 yeas, 9 nays.

Yeas: Mr. Armstrong, Mrs. Kassebaum, Mr. Boschwitz, Mr. Hatch, Mr. Andrews, Mr. Symms, Mr. Grassley, Mr. Kasten, Mr. Quayle, Mr. Gorton, and Mr. Domenici.

Nays: Mr. Hollings, Mr. Chiles, Mr. Johnston, Mr. Sasser, Mr. Hart, Mr. Metzenbaum, Mr. Riegle, Mr. Moynihan, and Mr. Exon.

Mr. MOYNIHAN. Mr. President, I should like to note that there was a unanimous vote on that side of the aisle not to keep the commitment of the administration and a unanimous vote on this side of the aisle to do so.

Something to do with the standard of political commitment is involved here, and I hope the Members on the other side of the aisle—many of whom I believe share our views—will seize this opportunity to reverse the mistake made by their colleagues in the Budget Committee and keep the commitment of their party and of this country to these men and women.

Mr. President, I thank the Senator from South Carolina for giving me this opportunity to set the RECORD straight.

(By request of Mr. MOYNIHAN, the following statement was ordered to be printed in the RECORD:)

● Mr. LEAHY. Mr. President, I should like to express my support for the amendment today to restore $300 million for veterans funding. This action is necessary to offset proposed reductions in Veterans' Administration staffing and treatment for non-service-connected veterans, and to insure that cost-effective programs such as home health care and community nursing homes can be continued.

There is no doubt that the VA could technically achieve the required savings—but at what cost to the viability of the system? I would like to think that those who are proposing the cuts do not understand how the VA medical care operates, but I must wonder whether they understand only too well how it operates. If the proposed cuts are enacted, this could very well lead to the deterioration of the whole VA medical system and its eventual demise.

The justification given for the proposed cuts is the need to reduce Federal spending, but this rationale does not serve to explain the fatal cuts that have been proposed for the home health care and community nursing home programs. These programs were initiated because they were cost effective and prevented the need for costly hospitalization. It simply flies against reason to cut or eliminate programs that have been successful, and more importantly, save the VA money.

While the cuts in VA staffing by definition do not affect clinical and medical personnel, it is clearly false economics to reduce so drastically the support staff that is essential to the smooth, efficient operation of the overall system. How can we saddle the medical staff with more paperwork and administrative duties and not expect the quality of medical care to decline?

The proposed reductions will have a very real and immediate consequence on the operation of the VA system. However, I am equally concerned by the symbolic meaning these cuts would carry. There is only one way these actions could be interpreted, and that is that we are going back on our commitment to assist and provide for those veterans who sacrificed their time, health, and even their lives, for their country.

I am voting to restore these funds simply because I believe we must not forgo this commitment to our Nation's veterans.●

Mr. HOLLINGS. Mr. President, on behalf of the distinguished Senator from Arizona (Mr. DECONCINI), I ask unanimous consent to have printed in the RECORD a statement of Charles E. Joeckel, Jr., of the Disabled American Veterans.

There being no objection the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF CHARLES E. JOECKEL, JR., MARCH 12, 1981

Mr. Chairman and members of the task force: On behalf of the 2.3 million Americans who, during the course of their active military service, have incurred a wound, an injury or disease which is compensable in degree, particularly the more than 685,000 of these who comprise the membership of the Disabled American Veterans, may I say that we appreciate this opportunity to appear here today.

As I understand it, Mr. Chairman, our testimony should be restricted to the impact that the new Administration's adjustments to the Fiscal Year 1982 Budget—as submitted by the Carter Administration—would have upon the Veterans' Administration's mission to provide benefits and services to this nation's veterans, their dependents and survivors.

At the outset, Mr. Chairman, let me state quite clearly that the DAV is adamantly opposed to any reduction in funding which strikes at the very heart of the VA's hospital system—that is, the quality of medical care provided to veterans and the ongoing construction programs designed to improve and replace outmoded VA facilities. Further, Mr. Chairman, we are fundamentally opposed to any proposals designed to limit the level of benefit payments provided to this nation's service-connected disabled veterans, their dependents, widow(er)s and orphans.

As you know, some $509 million of the $744 million reduction in VA programs proposed by the new Administration for FY

1982, fall into a category for which there can be no compromise by the membership of our organization. These proposed reductions are, indeed, aimed at the very heart of the VA health care system and represent a rehash of old ideas that time and again have been rejected by the Congress. They are proposals that have surfaced at one time or another in every Administration since Lyndon Johnson's.

Why is the DAV so opposed to what may seem to some as minor adjustments in the VA hospital and medical care program? Many have pointed to the dramatic rise in VA health care expenditures and employment to justify arguments that the growth of this enormous system should be curtailed—and, that the system caters to nonservice-connected veterans whose disabilities are not related to their military service and, thus, the expenditures are unjustified.

No mention is made, however, of the tremendous demand on the VA health care system by the 13.5 million World War II veterans whose average is now 60 years and who suffer the impact of age on their impairments; or by the influx of Vietnam Era veterans into the mainstream of VA health care.

No mention is made of the fact that, for all of its ills, the health and medical services of the Veterans Administration are 15% more cost-effective than similar care provided in the private sector.

No mention is made that these nonservice-connected veterans who receive care in VA facilities are often uninsured indigents and that closing VA hospital doors to them only transfers government expenditures from VA on to other federal agency programs—where expenditures are already astronomical because of higher costs for health care provided in the private sector.

No mention is made of the fact that within the last decade the Veterans Administration has lost some 20,000 hospital beds system-wide.

No mention is made, Mr. Chairman, that for the last three fiscal years expenditures for VA health care have experienced negative growth in terms of inflation in medical costs—though VA health expenditures have risen an average of 9.1% per year since Fiscal Year 1978, health care costs have escalated on an average of 14.1 percent over the same period. (American Hospital Association Index for Inpatient and Outpatient Care.)

Mr. Chairman, you simply cannot provide the same quality of care to more and more veterans each year when medical costs outstrip available funds. Continued negative growth in funding for VA health care programs will insure the system's slow demise. Similarly, without a commitment to continue ongoing modernization and replacement programs, VA's already antiquated facilities will necessarily be shut down one-by-one.

In the past, our organization has been characterized as "alarmists" who would oppose the most minute reduction in VA funding. It goes without saying, Mr. Chairman, that we do not welcome with open arms cuts in VA spending. However, "alarmists" we are not.

We do believe that there are those in the Office of Management and Budget and in the private health care sector who would like nothing better than to close every VA medical facility. The plans to do so are not quite as obvious today as they were several years ago when attempts were made to close VA hospitals outright.

Today's OMB efforts include the following:

1. Continue to reduce the number of beds in the system (bed losses over the past four years equal the closing of thirty 500-bed medical centers).

2. Deny the system vital funds by misusing and circumventing Congressionally approved VA appropriations.

3. Impose personnel reductions (1,280 in FY 1981 and 5,180 in FY 1982), hiring freezes and ceilings on Department of Medicine and Surgery employment; and, now

4. Require cancellation and deferment of VA replacement and modernization construction plans.

Recently, Mr. Chairman, we obtained a copy of an Office of Management and Budget document, which I will submit separately to you, outlining the Administration's plans to reduce VA expenditures in Fiscal Year 1982. The document contains the following statement:

". . . In addition, the existence of excess medical care capacity in many areas of the United States makes questionable the need for a separate VA medical system . . ."

"Alarmists," Mr. Chairman? We think not.

These plans totally ignore the VA's past contributions to and vital role played in, the practice of medicine in America today. Let me point out to those not familiar with the system the beneficial aspect of present VA/medical school affiliation; that fully one-third of the physicians educated in this country received all or a portion of their residency training in VA hospitals; that VA represents the sole major effort in this country for comprehensive blindness and spinal cord injury rehabilitation and prosthetic research efforts.

Let me emphasize also the fact that the VA is the only federal medical care provider now possessing the potential to handle battlefield or civilian casualties in the event of a future major combatant episode or national emergency.

Frankly, Mr. Chairman, we wonder just who is setting the policy of the current Administration. Is it the Office of Management and Budget or is it the President and the Party Platform on which he ran? Who pulled veterans' programs out from under the "Social Safety Net"?

Surely, we and our membership would not be caught so unsuspectingly had we not received the assurances that "veterans deserve better" as quoted in the President's Party Platform and in speeches to veterans' groups. How do the President's preelection promises square with current policies of the Office of Management and Budget?

On August 18, 1980, candidate Reagan said:

"To me it is unconscionable that veterans in need are denied hospital and medical care because of inadequate funding which has closed hospital beds and cut health care personnel within the VA."

Further, the Republican Party Platform goes on to state: ". . . we feel it is of vital importance to continue and expand the health programs provided to veterans through the Veterans Administration hospitals. Here we see the need for increased access to care especially for older veterans.

"We further advocate continued and expanded health care for our Vietnam veterans and consider it vital for the Veterans Administration to continue its programs for the rehabilitation of the disabled as well as its job training efforts."

Needless to say, Mr. Chairman, we are dismayed that the preelection statements made in order to court veterans' votes are at great variance with the recent actions of the Office of Management and Budget.

I note in your invitation to me to appear here today, Mr. Chairman, your request for our assessment of where equitable and reasonable budget cuts could be made in the Veterans Administration. As you may know, today's hearing marks the first time the DAV has appeared before this Committee since it was established in 1975.

We have not been given the opportunity to provide meaningful input to the Budget Committee in the past. This, we believe, has resulted in floor amendments in years past to restore funds to what, we considered, inadequate VA budgets. Perhaps today's hearing marks the beginning in a mutual effort to avoid such confrontations in the future. We look forward to working with you and your staff in shaping the future of veterans' programs.

However, Mr. Chairman, because of the recent position taken by the Administration to ignore its promises and commitments made to veterans, the Disabled American Veterans cannot make the job of the Administration—to cut the heart out of VA programs—any easier. The Administration and the Office of Management and Budget have broken faith with America's veterans; we will not join with them.

For these reasons, we will offer no recommendations for budget reductions in the Veterans Administration. For that matter, we will actively oppose any reduction in VA health care funding or any proposals designed to limit the level of benefits provided to service-connected disabled veterans, their dependents and survivors.

Finally, Mr. Chairman, noting the existence of sentiment for increasing expenditures to provide and maintain adequate munitions and equipment for a strong national defense, may I say that we view the maintenance and improvement of veterans' programs as an integral part of this same concept. Providing adequately for those who served, were wounded and for those who became widowed or orphaned as a result of war, is as much a part of the costs of war as the purchase of a tank, a plane, or a rifle. How we treat our veterans today, I suspect, will have a great bearing on the future decisions of those whom we will ask to serve this country in the event of a future war. While it is likely that the Congress will take up measures to make military service more attractive, may I remind you and the members of the Committee, Mr. Chairman, that the very sons and daughters you ask to serve tomorrow are the sons and daughters of those who have already served in this nation's active duty military. Veterans and their families are watching closely in hopes that the Administration and the Congress will act cautiously on their mandate to cut federal expenditures and responsibly in carrying out pre-election commitments to improve veterans' benefits and services.

Again, Mr. Chairman, we sincerely appreciate this opportunity to express our views on this important subject.

Mr. DOMENICI. Mr. President, how much time does the Senator from Kansas desire?

Mr. DOLE. Five minutes.

Mr. DOMENICI. I yield 5 minutes on the resolution to the Senator from Kansas.

Mr. DOLE. Mr. President, the Senator from Kansas has been here for all the debate, because I, as did many others, receive 70 to 100 phone calls in my office yesterday saying that we were wrecking the veterans program. I wanted to come here and see just exactly what was going to happen if the Chiles amendment were not adopted. But the more I have listened the more I have become convinced that we are not really affecting the program very much here.

We are now talking about a total budget of $24 billion; the Senator from Florida, Mr. CHILES, is proposing to restore $330 million of the $719 million to be cut from the VA's total funding. This

$330 million represents a minuscule one-half percent of the total funding.

I suppose we can all stand up and prove who is the biggest veteran or the biggest friend of the veterans or who is the most outranged by this drastic act taken by the Reagan administration.

But in talking with the chairman of the Veterans Committee, I understand that we are not impacting service-connected disability benefits; we are not impacting anybody 65 years of age or over; we are not impacting at all anybody whose disability is nonservice connected and is in the needy category. I fail to see what all the outrage is about.

There are veterans who are milk producers, so maybe we should not have supported cuts in milk price supports yesterday because some of the veterans are going to be affected. Some veterans have children in the school lunch program, and they will be impacted in that vote. There are going to be veterans associated with other programs who will be impacted in other votes. If we base the entire budget on whether or not a veteran will be affected, we will not cut anything in this budget.

I have talked to some of the veterans in my State, and I know that the VA professionals have to send out telegrams and make phone calls. They are pretty much like those of us in Congress. They have constituencies, and they have to react, just as some of us are reacting on the Senate floor.

As the Senator from Washington (Mr. GORTON) said earlier, I believe that veterans are concerned about inflation.

If you took a poll among veterans—not only those who run the various veteran organizations, but the many who are represented by the veteran organizations—those who are paying for the inflationary policies of the past, paying high-interest rates and fighting the uphill battle against the tide of Federal regulations—and you asked them to cut their share of the Federal pie by this little amount, I believe that you would find an overwhelming and resounding "aye" vote. They are concerned about inflation. They are concerned about their futures. They are concerned about their children. But perhaps the cruelest thing this Congress could do would be to bring on our commitment to cut the budget, get inflation under control, and put this country to work again. It would be very easy and indeed politically wise to vote for the Chiles amendment. The right vote on this amendment, however, is unfortunately the tough vote—to say no to a group of Americans that have given of themselves and made great sacrifices for the sake of their country.

We are not asking anyone to make a sacrifice. We are talking about a few facilities and some nonprovider care. That is all.

It seems to this Senator, who served as a service officer for the VFW, a service officer for the American Legion, and a service officer for the Disabled American Veterans, that we are not asking much of a sacrifice of our country's veterans. We are giving the veterans who have already made a great contribution to this country another opportunity to make another contribution, a very small contribution, and I hope all Senators support the Budget Committee recommendation.

I have some reservations about one or two items in the overall resolution, and I may speak to those areas in the next day or so, but not this one. This is clearly a case of, I think, an effort by some to play politics with veterans.

The best politics for the American veteran is to stop inflation, bring down the interest rates, put him back to work, and lift some of the regulations, and he will survive a little $330 million cut in a budget that is almost $24 billion.

Who is going to make the sacrifice? Who better understands the need to make sacrifices than the American veteran? But let us face it. Surely we do not have an obligation to protect everyone who served in the Armed Forces. So let us do not make it appear that by taking this very small step somehow we are doing a disservice to all veterans, that is not the case. This resolution, called for by Senate Concurrent Resolution 9 is miniscule when compared to other junctions in the budget and we must not let some blow it out of proportion.

We can all stand here and recite our veteran record or our service record, but that is not the issue. What is at issue is whether or not this Congress is going to work with the administration to bring solvency and commonsense back to our economy.

The right vote for the American veteran in this instance is to uphold the Budget Committee.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, Senator SIMPSON wished about 2 or 3 minutes.

Mr. SIMPSON. Three minutes.

Mr. DOMENICI. That is all I know about, and then we are prepared to vote on our side.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. SIMPSON. Mr. President, the time is fleeting, and I just wish to say that as chairman of the Veteran's Affairs Committee I am awed by my responsibility of being chairman of such great men as Senator ALAN CRANSTON, my chairman when I was the ranking minority member, JENNINGS RANDOLPH, SPARK MATSUNAGA, and most especially STROM THURMOND and BOB STAFFORD, who far outrank me in this Chamber and yet refer to me in a most extraordinary way as their chairman as they are mine on other committees.

We heard the remarks of STROM THURMOND. He said this is the toughest vote of his career. I do not doubt that at all because I know what he does for veterans. I know what he did as a veteran. He is the dean of this body, our President pro tempore. And then to hear BOB DOLE speak, one who has been through the fires. Both of these Senators have received the highest award that the VFW can confer.

So the whole job of the Veterans' Committee is to look at the issue of need. We have no other function. That is what our committee does. That is what it is for.

We restored all of the funds that were necessary to assure that VA could maintain the present levels of staffing for health care. We did that. We kept the commitment. Not one essential benefit—I urge Senators' attention to this fact—not one essential benefit, not one pension, and especially not health care for veterans was cut back in this budget request. Not for a service-connected disability, not for needy non-service-connected disability, not for any veteran over 65 years of age, not one penny.

That was the commitment that Ronald Reagan made to the VFW in August in Chicago. I was there. I heard what he said. We will not cut essential benefits to the veterans of America, and we have not.

We restored the positions in the committee action of all health care personnel. There is no question about that.

And I think, in conclusion, we should remember one thing: When a sick veteran goes into a Veterans' Administration hospital, whether he walks in there or is chauffeur driven, he is admitted to that hospital regardless of whether he fought and won the highest valor awards that our country can confer, or whether he baked bread at Camp Beetle Bailey. That is the way the system works.

We are now going to have to review various cost savings proposals, and that is what I pledge to do as chairman of the committee. We have a commitment to the veterans. That commitment has never failed to have been met.

I have been fascinated at the debates. It is good-spirited stuff. We have a good name for some of it in Wyoming, but it has been good stuff.

I pledge to all that we will find the savings to do this job once we get an Administrator, once we get a Deputy Administrator, once we get an Inspector General, once we get a General Counsel of the Veterans' Administration. I pledge we will find those savings in a $24 billion budget.

I thank the Chair.

Mr. COHEN. Mr. President, veterans probably have no stronger supporters in the U.S. Senate than my distinguished colleagues STROM THURMOND, BOB DOLE, and AL SIMPSON. Thus, their eloquent statements on behalf of the Budget Committee's recommendations concerning funding for veterans programs are ones which should bear special significance for all of us.

Reaching a decision on whether or not to support Senator CHILES' amendment to add $300 million to the budget for veterans' medical programs is not an easy thing to do. But, in reaching that decision, it is instructive to listen to the statements of these gentlemen, each of them veterans themselves and each with a long, distinguished record of support for those who have served.

As one who has consistently voted for programs to benefit veterans—and as

one who is keenly aware of the special sacrifices made by those who have dedicated years of their lives in service to their country—I believe we owe a great debt to our veterans. That debt, however, carries with it the additional responsibility that we act judiciously and with special care as we vote on questions which bear directly on the ability of veterans and others in our society to meet daily needs.

It is with that consideration in mind that I conclude that I must support Budget Chairman DOMENICI and Veterans' Affairs Chairman SIMPSON in opposing the Chiles amendment. We have been assured that the Budget Committee's figures will not cause the massive reduction in veterans' health professionals which some suggest. And we have been reminded that veterans will see a smaller reduction in their programs than will those in other segments of society.

Veterans from my State of Maine were down here a couple of weeks ago to meet with my colleagues and me in the State's congressional delegation. In our meeting, they emphasized that veterans are willing to accept their fair share of reductions—as long as it is clear that the reductions are distributed fairly. This is the kind of commitment to the best welfare of the Nation which these individuals have displayed in their earlier service in the Armed Forces and which they continue to demonstrate daily as leaders of their communities.

Chairman SIMPSON has said that the reductions will not come in manpower slots, but will rather come from funds for capital equipment investment which will not affect the quality of health care for veterans.

My distinguished colleague from Wyoming has said another thing with which I would like to associate myself. He has indicated his strong commitment to preserving the Veterans' Administration's hospital system, and he has emphasized that the reductions will not affect veterans with service-connected disabilities.

I would like to quote from the statement which Chairman SIMPSON made on March 23:

Of course, Mr. President, we do not lose sight of the tremendous debt that this country owes to its 30 million veterans, their 58 million family members, and the 4 million survivors of deceased veterans. With respect to the most deserving of our veterans, any cut in vital benefits or services would clearly be unconsionable. We have avoided that result. We have taken care to preserve and protect the compensation and pension benefits of all of those veterans with service-connected disabilities, as well as those of truly needy wartime veterans who suffer non-service-connected permanent and total disabilities or those who are over age 65. These described programs, in fact, will enjoy full cost-of-living increases, currently estimated to be 11.2 per cent by the Office of Management and Budget and 12.3 per cent by the Congressional Budget Office.

Nor will we diminish the level of services offered by the VA health care system. To indicate otherwise is certainly an erroneous assumption, since those health care services are crucial to the continued protection and maintenance of our most deserving veterans.

I cannot make the case for the budget for veterans programs any more eloquently or effectively than that. The fact is that the Veterans' Administration budget will be $1.3 billion more than it was last year. And, as Senator SIMPSON stated, basic programs for veterans are not being reduced. Those in greatest need are protected.

I will not now or in the future accept any proposals to undercut the programs we have provided in recognition of the dedicated service of those who are veterans of the Nation's military. If a piece of legislation is considered which is counter to the best interests of veterans, I will not hesitate to oppose it. In this instance, however, I share the conclusion of Chairman SIMPSON and Senators THURMOND and DOLE that the correct vote is one in favor of the recommendations made by the Budget Committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Florida. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The PRESIDING OFFICER. Is there any Senator in the Chamber who has not voted, who wishes to vote?

The result was announced—yeas 44, nays 56, as follows:

[Rollcall Vote No. 43 Leg.]

YEAS—44

Baucus	Evon	Metzenbaum
Bentsen	Ford	Mitchell
Biden	Glenn	Moynihan
Boren	Hart	Pell
Bradley	Heflin	Pryor
Bumpers	Hollings	Randolph
Burdick	Huddleston	Riegle
Byrd, Robert C.	Inouye	Sarbanes
Cannon	Jackson	Sasser
Chiles	Kennedy	Stennis
Cranston	Leahy	Tsongas
DeConcini	Levin	Weicker
Dixon	Long	Williams
Dodd	Matsunaga	Zorinsky
Eagleton	Melcher	

NAYS—56

Abdnor	Gorton	Nickles
Andrews	Grassley	Nunn
Armstrong	Hatch	Packwood
Baker	Hatfield	Percy
Boschwitz	Hawkins	Pressler
Byrd, Harry F., Jr.	Hayakawa	Proxmire
	Helms	Quayle
Chafee	Heinz	Roth
Cochran	Humphrey	Rudman
Cohen	Jepsen	Schmitt
D'Amato	Johnston	Simpson
Danforth	Kassebaum	Specter
Denton	Kasten	Stafford
Dole	Laxalt	Stevens
Domenici	Lugar	Symms
Durenberger	Mathias	Thurmond
East	Mattingly	Tower
Garn	McClure	Wallop
Goldwater	Murkowski	Warner

So Mr. CHILES' amendment (UP No. 20) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 21

(Purpose: To reduce the appropriations reductions required as a result of changes in veterans programs)

Mr. CRANSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes an unprinted amendment numbered 21.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator from New York is absolutely correct. Will the Senators please cease conversations so that we may continue?

Mr. CRANSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 11, line 12, beginning with "$414,000,000", strike out all through line 15, and insert in lieu thereof "$310,000,000 in budget authority and $271,000,000 in outlays for fiscal year 1982 and $286,000,000 in budget authority and $293,000,000 in outlays for fiscal year 1983.".

On page 20, line 11, beginning with "$414,000,000", strike out all through line 14, and insert in lieu thereof "$310,000,000 in budget authority and $271,000,000 in outlays for fiscal year 1982 and $286,000,000 in budget authority and $293,000,000 in outlays for fiscal year 1983.".

Mr. CRANSTON. Let me say at the outset that I strongly supported the Chiles amendment. However, frankly, I am more comfortable with the amendment that I am now offering, which, in effect, proposes to retain exactly the health-care staffing level unanimously approved by the Veterans' Affairs Committee. Both sides of the table, Democrats and Republicans alike, in the Veterans' Affairs Committee approved the substance of what I am now proposing.

It is clear that some reduction in the Budget Committee's cuts in veterans' programs is warranted. I believe there is no doubt about that fact. It is plain also that it is the will of the Senate to make reductions in veterans' programs.

The amendment I am offering would reduce to a lesser degree—by $104 million in budget authority and outlays for fiscal year 1982 and by $111 million in budget authority and outlays for fiscal year 1983—the amount of cuts that the Veterans' Affairs Committees would be instructed to report.

Adoption of my amendment, which really amounts to just trying to hold or restore one-third of the amount that the Chiles amendment would have restored, would assure that VA congressionally mandated health-care staffing levels, slashed drastically in the Reagan budget, could be maintained. This restoration is targeted on a cut proposed by the President and approved by the Budget Committee that was based on ill conceived, unsupportable approaches to making economies in the VA health-care system.

Mr. FORD. Mr. President, may we have order in the Senate? We cannot hear the distinguished Senator from California. He is entitled to that privilege

The PRESIDING OFFICER. The Senator from Kentucky is correct.

Will the Senate be in order?

The Senator from California.

Mr. CRANSTON. Let me explain what the Budget Committee did. It evidently

acted during its markup to recommend staffing cuts on the assumption that the demand for VA medical services will not be as great because the veteran population is declining.

But, as I stated earlier regarding the Chiles amendment, there is no basis that I am aware of for any such assumption that the veteran population is declining. The veteran population has not declined in recent memory.

In fact, VA budget documents submitted by the Reagan administration showed that the total number of veterans is expected to be 30,184,000 in fiscal 1982, up 340,000 in the 5 years since fiscal 1977.

To premise reductions in VA health-care staffing on such a fiction is a great disservice to our Nation's sick and disabled veterans. We should reject that notion and set the record straight.

My amendment will allow those ill-advised reductions to be avoided.

I submit that no economies can actually be achieved or should be claimed based on the Reagan plan to cut the 4,300 VA health-care personnel that my amendment would restore.

That is all my amendment would do. It does not touch any other aspect. It just zeroes in on the most sensitive, the most important, aspect of our aid to veterans affected by the figures that we are working upon, the funding for health-care personnel.

The administration has indicated that these staffing cuts would be taken from the ranks of nonclinical personnel. No doctors and no nurses would be cut, according to the administration. Thus, the administration contends that the overall effect of the cut on the VA medical system would be minimal.

Of course, this contrasts to what the VA itself submitted in documents supporting President Reagan's budget, where they proposed, as I previously made clear, cutting 1,234 doctors, nurses, and psychologists.

I am at a loss to understand how cutting out great numbers of critical support personnel would not adversely affect the balance of direct health-care and support personnel that is necessary for any hospital to operate efficiently.

Major cuts in support personnel, in a health-care system as thinly staffed in support areas as the VA's inevitably will decrease the productivity of the doctors and nurses who depend on support personnel.

Do we want doctors, phychologists, and nurses doing laboratory tests, maintaining, storing, and retrieving patient records, maintaining pharmacies, doing household chores, doing the paperwork in connection with admitting and discharging patients, and performing the hundreds of other support functions that are absolutely essential to providing care to patients?

That is the work now being done by the backup personnel, the support personnel, who could be lost if we do not adopt this amendment.

If you do not have those people doing that work, somebody has to do it. So we will take highly paid and highly trained doctors, waste the great investment we are making in them, and have them keeping records and doing other sorts of backup work. That is clearly folly and very wasteful. It is obviously not economical or efficient.

Lack of adequate support personnel to carry out these responsibilities also will inevitably lead to delays in providing care. It will result in longer, inefficient stays in hospitals. That is no saving. That is a way to increase expenses; and worse, in some instances, without any question it will create a threat to the health and safety of veteran patients who will not get care when they need it because doctors will be pushing pencils instead of treating patients.

This is not just my own analysis; it is the analysis of the General Accounting Office. It is based upon their analysis which stated that the VA is already suffering from inadequate levels of support staffing. If the President's proposed reductions occur, this bad situation will be made worse.

The GAO has found inadequate support now. If we make that problem worse by cutting out funding for 4,300 health care workers, we would create what could be a crisis situation in veterans' medical care.

For the past 4 years we in the Congress have worked very hard to assure that staffing levels in the VA's Department of Medicine and Surgery would be sufficient to provide quality health care services responsive to the needs of eligible veterans. Just last December, in the HUD-Independent Agencies Appropriations Act for fiscal year 1981, we added 1,176 badly needed direct patient care employees, and the Comptroller General has ruled that—under a provision of Public Law 96-151 that we specially enacted to prevent OMB from withholding from the VA the authority and funding to hire personnel for which appropriations are made—OMB has acted unlawfully in applying the hiring freeze to positions in the VA health care system.

I believe that OMB acted unlawfully again on March 18 when it reduced the VA's 1981 ceiling for health care personnel below the level for which appropriations were provided in December.

I want to stress that the Veterans' Affairs Committee in its March 12 markup strongly endorsed the need to retain these very badly needed staffing resources. It did so unanimously and with a bipartisan approach. This amendment would help assure that we stick to that bipartisan decision of the Veterans' Affairs Committee.

We have been attempting to solve the VA's medical care staffing problem for several years. The improvements we have provided over the last decade have been based on the facts that have existed with respect to the needs of eligible veterans and their utilization of VA health care facilities. Nothing about those facts has changed since December to warrant VA health care staffing reductions. The result of reversing the improvements we have achieved will simply be a decline in the quality of care for sick and disabled veterans.

Mr. President, let me again stress a further point with respect to the bases of the Reagan-proposed cuts that the Budget Committee has accepted. Those cuts are not the products of a careful, deliberative process in which appropriate areas of savings were identified by the VA and appropriate reductions fashioned with the health and well-being of our Nation's veterans in mind. Quite the contrary, the cuts were made by the Office of Management and Budget in gross dollar amounts for fiscal reasons alone, and then those cuts were hastily distributed by the VA in a forced effort to portray some sort of superficial justification.

Unlike any other major agency in the Federal Government, the VA, with no Reagan-appointed agency head, had no real way of countering or challenging the cuts initiated by the Office of Management and Budget. Leaderless, they could not effectively argue their case within the new administration. So these matters were not carefully thought out before being presented in the Reagan budget.

By and large, the VA did not even participate in this process. I believe that these factors should be given great weight in evaluating the Reagan proposals for cuts in VA programs.

Thus, Mr. President, I urge my colleagues to consider carefully the situation I have described and to support this amendment to reduce the cuts—in a very targeted way—that the Veterans' Affairs Committees would be instructed to make.

I state again, we accept in this amendment some very significant cuts other than in health care personnel—which I believe should be the highest priority spending area in VA medical care.

Most of my colleagues are well aware of how very hard Congress has worked during the past several years to staff the VA health care system adequately and to assure its ability to provide quality care to eligible veterans. The amount I am now asking my colleagues to support would allow the VA to hold the line and thus avoid being set back by several years. If we make this personnel cut, it will be several years before we can undo the damage, undoing the progress that we have made with respect to the health care system.

By adopting this amendment we can forestall the OMB strategy, so clearly documented in debate earlier today, to weaken the VA health care system.

Mr. President, for these reasons and many more that I shall not take time to reiterate, I strongly urge the adoption of this amendment.

Mr. President, I ask unanimous consent that the Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATSUNAGA. Will the Senator from California yield?

Mr. CRANSTON. Yes.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that I may be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATSUNAGA. Mr. President, I rise in strong support of the Cranston amendment. I think there is some misunderstanding by my colleagues here

that this amendment and the amendment previously defeated would add on to the budget. Briefly, what we are doing here is merely restoring cuts. That Reagan administration proposed a cut of $800 million from the Veterans' Administration budget. The Budget Committee, in this reconciliation resolution, has instructed the Veterans' Affairs Committee to achieve savings of over $400 million. What we propose to do here is restore $100 million of that. Thus, in effect, even by adoption of this amendment, the Veterans' Affairs Committee is still accepting reconciliation instructions to cut $200 million from the Veterans' Administration budget.

We must remember, Mr. President, as I stated earlier, that the veterans' program is part and parcel of our defense program. While, on the one hand, the administration is saying we have to boost our defense and proposes substantial increases in the defense expenditures, they are, on the other hand, proposing an $800 million reduction for the Veterans' Administration program. I say let us treat the veterans as part of our military service, because they, in fact, are retired as well as having paid their dues already. So let us support this one amendment, which was supported unanimously by each and every Veterans' Affairs Committee member from both sides of the aisle.

Mr. President, I wish that those on the opposite side of the aisle, of the majority party, would now take the advice. take the guidance of the members of the Republican Party and the Democratic Party on the Veterans' Affairs Committee and vote to support the Cranston amendment.

Mr. CRANSTON. Mr. President, I ask unanimous consent that Senator EXON be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Washington.

Mr. GORTON. Mr. President, on behalf of the Senator from New Mexico, I yield time to the Senator from Wyoming on the amendment. How much time remains?

The PRESIDING OFFICER. One-half hour for each side

Mr. SIMPSON. Mr. President, I shall not consume that, I assure the Chair.

Mr. GORTON. Mr. President, I yield 15 minutes.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 15 minutes.

Mr. SIMPSON. Mr. President, mother never told me about all the perils of being the chairman of the Committee on Veterans' Affairs, but in my brief tenure of 2 months, I have found out—delightfully—from experience at first hand.

Let me say this, Mr. President: Anyone who knows, as I have come to know, the proponent, the sponsor of that amendment, knows the commitment that the Senator from California has made to the veterans of America for many, many years. He is "Mr. Veteran" to millions, including millions in his own State, 3,300,000 veterans in the State of California who have come to know this man and his compassion and his interest. He has been an extraordinary advocate of every position they have ever embraced or one that they will ever think of embracing. I just want to get that in perspective.

Mr. President, I remind my colleagues that the committee did unanimously accept some restorations to the medical account and apparently, that is what my colleague was referring to. We did accept restorations to the medical account of approximately $88 million and by vote, then, an additional $20 million. I believe sincerely that my colleague misstates the case when he says that his amendment merely carries out the will of the committee. I can assure my colleagues that it does not. It was regrettable, but, obviously, necessary to carry six proxies on my hip, like a pistol, when we had that particular meeting. Out of it, on a vote of 7 to 5, we determined to make the complete restoration of patient care personnel in keeping with President Reagan's recommendation to the Committee on the Budget.

To my colleague from Hawaii, who is one of the most serious and sincere members of the Veterans' Affairs Committee, I can only say again, if there is anyone out there to hear, that President Carter presented a budget for the VA which was up $2.3 billion. The President of the United States, Ronald Reagan, cut $830 million out of that and left an increase for the Veterans' Administration in this budget that we are accepting today—hopefully—of $1.3 billion in additional funds. I think we are, somewhere, losing that particular aspect of where we are in this budget process.

When all the shot and shell has died, the Veterans' Administration has received $1.3 billion in funds additional over the past fiscal year, a pretty good chunk, I think we would all agree. With this administration, the fourth largest agency in the U.S. Government has suffered less cut than any other agency of Government except Defense.

That is it—book, page, hymn number. There is not much more I can say about it.

As I say, there is a "misspeak" in this case when we are told that this amendment carries out the will of the committee. Its effect would be to add an additional $104 million to the budget and reduce the unspecified savings that the committee committed itself to undertake. We knew what we were doing. We still have some questions about where it is best to do it and, by amendment, committed ourselves to do it before the next legislative budget period.

There was a reason for that, Mr. President.

I have already addressed the reason for it. The reason for it was that we do not have an Administrator in the Veterans' Administration. That will be remedied next week. We do not have a Deputy Administrator of the Veterans' Administration. We do not have an Inspector General. We do not have a General Counsel.

One of the things I have observed in my brief time on the Committee on Veterans' Affairs is this, and I share it with Senators: There has been a most extraordinary relationship among the Veterans' Administration, the Congressional Budget Office, the OMB, and the Senate Veterans' Affairs Committee. I suppose we could use the word "rapport" for a better word.

In that type of situation, I have seen budget figures changed with little rationale other than the figures were reestimated. Then something happened to all that on November 4, something rather devastating, that bruised and ruptured the network that was there.

I can fully understand the poignancy and the pain, especially by the sponsor of the amendment, who has performed admirably for the veterans of America. I hope to do the same. But we are going to start a new kind of realism with regard to dealing with America's veterans. That will be clearly evident to those who observe the committee in its coming deliberations.

Nonclinical personnel are being reduced, and we are not injuring the health care system of the veterans of the United States. We have not cut one essential benefit of any veteran, not one veteran who might be service connected, not one veteran who is needy and nonservice connected, and not one veteran over 65.

This amendment would effectively destroy our ability to allocate the unspecified savings that we know are going to obtain before the next budget period. I want Senators to understand that clearly when we get into the voting on this one.

We are going to be cutting an amount. The amount is not unspecified but the programs and where they will come from are unspecified, and I will tell Senators why—because of the present status of the Veterans' Administration.

Let me share with Senators one of the things we have in mind, perhaps, as a possible saving, so that Senators will see that we are not just off in the vapors with a budget.

Try this one: We are going to pursue the savings of perhaps more than $100 million if we authorize the VA to recover health insurance benefits for care provided to non-service-connected veterans. That is an interesting concept. We are going to pursue that. We are going to pursue a lot of things. We are going to pursue eligibility. We are going to pursue whether a person who is a veteran and who has received an injury from something totally unconnected with his service for the United States as a veteran is receiving lifetime care for some permanent and grievous injury in a Veterans' Administration hospital. Is that the proper role of a VA hospital? We are going to find out.

We are going to find out the difference between eligibility requirements for nonservice-connected care. We may even come to the issue of financial worth and the availability of health and insurance. We will be discussing all of these things.

Those are the issues we will consider as we deal with the unspecified amount of savings we have expressed in the Budget Committee. There are many options before us. They will be weighed

carefully by the committee. They will be weighed carefully by the Veterans' Administration, by the Office of Management and Budget, by the CBO.

I have a hunch, and I pledge and I say it again, that we just possibly and assuredly will find the exact amount of unspecified amounts of savings we want to find when we are dealing with a budget of $23.6 billion.

This amendment would not serve any purpose except to destroy the concept of the unspecified savings and further remove us from what the President's recommendation was. It is that simple.

I reserve the remainder of my time.

Mr. CRANSTON. Mr. President, I am reluctant ever to differ with the distinguished chairman of the Veterans' Affairs Committee. We are good friends. We have worked very well together in the committee in the past, and we will continue to do so in the future. We do have some differences of opinion at this moment over some of the details of the matter before us and over an interpretation of the current situation.

The chairman implies that we are here today approving a $1.5 billion increase in VA programs, most of which would be accounted for by a cost-of-living increase in VA compensation and pension benefits. Actually, we are not considering that matter at this time. We are not approving those increases. What we are considering is a resolution now before us which, if unamended, will cut—will not fund but will cut—VA programs.

I believe the cut is too deep, although I recognize the need for some saving in veterans' programs. As a matter of fact, despite the suggestion that I am for cutting everything except veterans' programs, that is not the case. I support increases in defense spending, and I support cuts in veterans' programs and elsewhere where justified. I made a motion in the Veterans' Affairs Committee on March 12 that suggested that we should accept 72 percent of the reduction proposed by President Reagan in his budget for the VA. That amendment accepted a cut of $531 million in veterans' programs. So I have gone along with very significant cuts where the priorities have been right.

The Veterans' Affairs Committee, of course, did not support this particular amendment; I did not mean to suggest that it did and I did not say that it did. However, the Veterans' Affairs Committee did unanimously vote in favor of maintaining the present appropriated level of FTEE's, full-time equivalent employees, in health services in the VA system. They voted to maintain the 4,300 that my amendment would provide for.

I know of no other way to carry out that position taken unanimously by the Veterans' Affairs Committee—Democrats and Republicans together voting for that position—except to offer an amendment that would make funding available for that purpose, and that is all my amendment does. It sends out a clear message that these 4,300 medical personnel are to be retained in the VA system.

If they are not maintained, we are going to have highly paid, highly trained doctors pushing pencils and doing other support work, at great waste and inefficiency and at a cost of declining medical care for sick and disabled veterans.

Mr. President, I stress that if we do not win this time around, we will keep fighting for this set of priorities in the legislative budget, and appropriations processes until we do prevail, as I believe we ultimately will.

I am prepared to yield back the remainder of my time on this amendment.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. CRANSTON. Mr. President, I ask unanimous consent that the name of the Senator from West Virginia (Mr. ROBERT C. BYRD) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. I yield to the distinguished Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I must say that the chairman of the Veterans' Affairs Committee, the Senator from Wyoming, is a dedicated personality, indeed. I believe he is sincere in his efforts to reduce Federal spending in such a way as not to harm our Nation's veterans. However, while we were able to work in harmony with him so long as we were in the majority, it appears now that when the shoe is on the other foot—that is, when they are wearing the majority shoes—things become a little different.

Somehow, the marching orders come from the White House, and those boots lead them to march to the tune of the White House. I regret this very much, because the Senator from Wyoming has been very compassionate in his role as a member of the Veterans' Affairs Committee.

Mr. President, as I indicated earlier in this debate, the administration and the Budget Committee are arguing that the proposed cuts in the staffing area are in indirect health care personnel and, as a consequence, will have a minimal effect on the operation of the Veterans' Administration health care system and resulting care for veterans.

Mr. President, I do not accept this argument and do not believe the Senate should accept it. In my view, there is a direct correlation between the levels of VA health care staffing, be it direct or indirect care personnel, and the overall quality of care provided. This has been documented over the past 2 years by the Veterans' Affairs Committee in letters to the President expressing deep concern about the effect of proposed health care staffing freezes and cuts.

It is a fact, Mr. President, that the Veterans' Administration health care system has been in recent years running at dangerously low levels, levels which are already threatening the physical and mental well-being of hospitalized veterans.

It is the view of the minority members of the Veterans' Affairs Committee that the administration's plan to cut indirect health care staffing will cause a decrease in the productivity of the direct care staff at VA facilities. As indicated in our minority views submitted to the Budget Committee, we believe that the VA doctors and nurses become less efficient when support personnel are taken away. These professionals are forced to do more paperwork and other routine chores that are usually done by nonprofessionals, and they have to wait longer for lab tests and reports and, as a consequence, provide care at a slower pace and in a less efficient manner.

Furthermore, backlogs in discharge planning and processing, which support personnel handle, result in longer, inefficient lengths of stay for patients, and by extension we can assume that with beds filled for longer periods of time some heavily utilized VA facilities will be forced to turn away greater numbers of needy veterans or keep them on waiting lists for care.

Mr. President, let us here join in the effort of the Senator from California in restoring what is absolutely necessary for the health care of our deserving veterans.

Mr. CRANSTON. Mr. President, I yield 3 minutes to the distinguished Senator from Nebraska.

Mr. EXON. Mr. President, I support with enthusiasm the amendment being offered by the Senator from California.

I also compliment my good friend and colleague from Wyoming. My colleague from Wyoming knows that I hold him in the highest regard, and I just thought it would be appropriate if we went to some figures to give the other side of the picture when we are talking about the comparable expenditure of dollars for veterans health care expenditures.

I also wish to thank my friend from Wyoming for the sincere presentation that he made with regard to the efforts by the Senator from California with regard to his active support for veterans programs.

I certainly agree that my friend from California has been Mr. Veterans' Affairs as far as the Senate is concerned. I thought it was most appropriate, and I know the words were spoken with great sincerity by the distinguished Senator from Wyoming. I thought it was interesting, because I wish to advise the Senate that the Veterans of Foreign Wars, that I referred to in my previous remarks on the previous amendment, gave the Senator from California even a lower mark than they gave this Senator from Nebraska on their magic scoreboard.

It just might be appropriate to say that maybe even the Veterans of Foreign Wars do not know what is going on from time to time on the floor of the Senate, although as a Member of that body I say that the members of the Veterans of Foreign Wars are very efficient in fighting and dying on the battlefields for the United States of America.

The reason that I rose, Mr. President, was to try to put in perspective some of the numbers that have been used today. I do not think it is appropriate to be talking about a $1.2 or $3 billion increase. What we are discussing here today and what this amendment goes to the heart of is the veterans' health expenditure.

In that particular area, the present budget on which the veterans' health

79-059 O - 1984 - 82 - (Vol. 127 Pt.4)

expenditures are operated amounts to $6.585 billion. The Carter or base line budget for 1982, which we are addressing now, recommended $7.678 billion. That represents approximately a 16-percent increase for 1982 fiscal year over 1981.

If I understand the figures correctly, and I will stand to be corrected if I am wrong, the Reagan administration is recommending a $400 million reduction from that base line figure of $7,678,000,000. That represents a 10.5-percent increase over the expenditure for veterans' health expenditures for 1982 over 1981.

I submit, Mr. President, that we are only going to increase by 10.5 percent in an area where everyone knows that the basic inflation rate of the United States of America is going to run more than 10.5 percent just as an inflation figure. In addition, we recognize that when we are into health care areas this is where veterans' health expenditures are. We know that hospital inflation rates usually run 2 to 3 percent over the regular inflation rate.

Therefore, I think it is wrong indeed for anyone to stand on the floor of the Senate and especially in a time, as I said earlier, when we are having more and more World War II veterans going into these facilities for legitimate treatment, to imply that the cut being made by the President of the United States and his administration is not a cut in veterans' hospital facilities. Certainly this is in the veterans' health expenditure area.

I yield back to my friend from California.

The PRESIDING OFFICER. Who yields time?

Mr. CRANSTON. I am prepared to yield back time.

The PRESIDING OFFICER. The Senator yields back his time.

Mr. DOMENICI. Mr. President, did Senator THURMOND want to take a few moments?

Mr. THURMOND. Mr. President, on the previous amendment I have already expressed myself that I feel that it is important that we stand by President Reagan in balancing this budget. He has come up with a package and I feel that we must not deviate from that package because once we begin to deviate then all could be lost.

I urge my colleagues in the Senate to vote against this amendment and stand for the principle of reducing the budget as advocated by the President of the United States.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. How much time do we have in opposition to the amendment?

The PRESIDING OFFICER. Eighteen minutes and forty seconds.

Mr. DOMENICI. Did the Senator need some time?

Mr. EXON. I wish some time if there is time remaining on this side of the aisle. How much time is remaining on this side of the aisle?

The PRESIDING OFFICER. Two minutes and seven seconds for those in the affirmative of the amendment.

Mr. EXON I yield myself as an additional minute and a half.

I would like to respond briefly.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. I would like to respond briefly to what has just been said by my friend, the distinguished Senator from South Carolina. We have stood on this floor, the Senator from South Carolina and I, on numerous occasions shoulder to shoulder on what we have both agreed upon. I just cannot let the statement of the distinguished Senator from South Carolina go by without making a comment.

I think it is ridiculous for anyone to get up on the Senate floor and say to this Senate what the President has sent down to the Senate has been ordained, to dictate what the Senate should spend on each and every program.

If we are going to follow the recommendation of the Senator from South Carolina then we should have people just pushing a button up here, not doing any thinking.

I certainly hope those on that side of the aisle are not going to take the position that they must dot every "i" or cross every "t" exactly as has been dictated by the President sitting downtown. If they are doing that, I suggest to the Senate as a whole, and especially to my friends on the other side of this aisle, they are abdicating their responsibilities as thinking Members of the Senate, because however correct the President and his budget makers might be, I do not think they are infallible.

I reserve the remainder of the time on this side of the aisle.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield to the Senator.

Mr. THURMOND. In response to the distinguished Senator from Nebraska, my good friend, I want to say that we do not have to go along with the President on everything. The President now offers the best hope we have had in the 27 years I have been here to balance his budget. He has come up with a definite program. There may be several things that will come out which I would prefer a little differently, but if we are going to get this program through, we cannot run off here and there and elsewhere, otherwise we will lose the opportunity to put through a program to reduce Federal spending, which I think is essential to the preservation of fiscal sanity and responsibility in this country.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I yield myself as much time as remains.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. I want to compliment the distinguished Senator from Wyoming not only on the way he has reasoned with the Senate this afternoon, but he is absolutely correct. The third party payments for non-service-connected illnesses have been recommended on the floor of this Senate time and time again, only to find that everyone finds reasons to say it cannot be done. I am pleased that the Senator said he was going to look into it carefully.

There is not any reason—maybe some transition time is not necessary, but there is not any reason—why the private insurance carriers of this country cannot end up, when people buy health care insurance, including costs in veterans' hospitals as they would in any other hospital.

What we are doing is taking all the health policies in this country and bringing them a slight pittance of a reduction, if they are doing their figuring right, because otherwise we are offering a nice profit to the insurance carriers because they do not have to pay if a veteran goes to a veterans' hospital. That would save a substantial amount of money. Certainly that was not the way the Senator indicated to make ends meet, but I want to compliment the Senator on that.

I want to say another thing to the Senate. There has been much said about staffing in the VA hospitals. I am informed the following is the factual situation: Staffing ratios in the VA hospitals are slated to go from 219 staff per 100 patients in 1981 to 221 staff per 100 patients in 1982, under the Reagan program. That is not cutting anyone. That is increasing care, if increasing staff in the hospitals per 100 patients is in any way related, and I think it is.

I would also tell the Senate that in 1980 the ratio was 211, so it is going from 211 to 222, which is a 10-staff-per-100-patient increase under this proposal that the President sent us, which has been bandied about here as being so damaging to the veteran.

Having said that, I certainly hope that those Senators who have stood behind this process today have sent a very loud message, which I agree with Senator DOLE that the average veteran is going to accept on the basis that veterans want to do their share to bring this economy back into a productive status and bring inflation under control, and I personally think while everyone can do his own analysis, we have already sent that message, and we certainly ought not to undo it now by voting other than in favor of the Budget Committee number and against the Cranston amendment.

Having said that, I yield 5 additional minutes to the Senator from Wyoming.

The PRESIDING OFFICER (Mr. MURKOWSKI). The Senator from Wyoming is recognized.

Mr. SIMPSON. Mr. President, I think it is most fascinating and gratifying that we all, several of us at least, have stuck around to engage in the debate process today. I think that would make it a better functioning body if we pursued such activity more often, especially where we can get into the trenches, eyeball to eyeball, and really debate. It is a good thing. It is spirited and it is something which gets your juices going.

I want to say that, as my colleague from California well knows, it is not the intent of this committee to undertake any reduction that directly affects patient care. Let us disabuse ourselves about that. Indeed, any of the minimum staffing cuts that would affect administrative personnel can, if we do our jobs right in this committee—and that is what we are going to be doing—be restored as we explore ways in which to

reduce costs without reducing our ability to appropriately care for and benefit our Nation's veterans. I said that several times in this afternoon's deliberation.

To my good friend from Nebraska back there, whom I have come to know and with whom I share a very fine mutual friend in Gov. Ed Herschler. Yes, it is true, we are all involved in a new experience on this floor. It is called the shift of power, and there is a new majority and a new minority.

I remember so distinctly that old phrase I used to remember when I was a member of both the minority and the majority: Oh, how a minority, upon obtaining a majority, hates a minority, or vice versa. You can work that back and forth, you can work it either way. So I can only say no one has ever directed these size 15 shoes of mine in any course, and I have never had that occur.

Knowing we both purchase our shoes from the same shop, where they have to slay one cow per shoe, you will understand what I am saying, I know.

[Laughter.]

Mr. EXON. Mr. President, will the Senator yield?

Mr. SIMPSON. Yes.

Mr. EXON. I just want to say, since the Senator brought up shoes, I wear a size 13.

[Laughter.]

Mr. SIMPSON. I thank my colleague.

We are involved in a reconciliation process. It is a new experience. You heard both of these remarkable men, the one who chairs the Budget Committee and the ranking minority member, tell you what we are doing. It is tough, it is new, it is an experience, it is novel. But nothing else has worked, and so we might just as well try this, and that is why I am sticking on board.

In this reconciliation process we are not going to destroy the authorizing committees or their functions or their duties or certainly any of the functioning ability of this Veterans' Affairs Committee. That will not happen.

The issue is not health care in this debate, the issue is cost savings. We in the committee are on record that we will preserve the VA's medical system and that we will not take any particular marching orders from any agency of government. If you will just take a list of the Veterans' Affairs Committee and go through that cast, I think you will know what I mean. Indeed, the committee made numerous changes in the President's recommendations, but in the interests of this country at this time we will follow the President's leadership to bring under control the gross spending levels of the Federal Government that fuel a most crippling inflation. That is the national priority that we can and will achieve without injury to any essential veterans' program.

In conclusion, Mr. President, I wish to acknowledge the remarkable attitude and the remarkable depth of passion that the Senator from California has. I just hope that you will keep it in perspective as you realize that on November 4 things did change. That is what it is about. It is tough; it is a hard thing to swallow sometimes. But that is what we are up to.

We are not talking about anything that would impair the response of this Congress to the veterans of America. They will find that out from me, as chairman of the Veterans' Affairs Committee, and they will find that out from the committee, both parties serving for their benefit and for the country.

Mr. DOMENICI. Mr. President, have the yeas and nays been requested?

The PRESIDING OFFICER. No; they have not.

Mr. DOMENICI. Mr. President, does the Senator wish the yeas and nays to be requested?

Mr. CRANSTON. Yes.

Mr. DOMENICI. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Mr. President, if the Senator from California is prepared to yield back his time, I will yield back the remainder of my time.

Mr. CRANSTON. Mr. President, the Senator from Michigan wanted some time, so I yield to him.

Mr. President, may I ask the Senator from South Carolina if we could yield some time on the bill?

Mr. HOLLINGS. Yes; I yield to the distinguished Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding.

Mr. President, we are back to the same issue that we were struggling with an hour ago. I think that anybody who studies this situation has to be deeply troubled about the fact that President Reagan's proposal, which is now before us, will make substantial cuts in the safety net that has been carefully erected for the veterans of this country.

There is a good reason that all of the veterans organizations—the Disabled Veterans, the VFW, the American Legion—supported our previous amendment and are supporting this amendment. This amendment is essential for adequate health care of our veterans in this country. Unless we restore these funds, we are walking away from a commitment that we have had in this country for decades under Presidents of both parties.

When we asked people to enter the armed services in the past, they entered with the knowledge that they would have these health services available to them in later years as they were needed. To backtrack now on that commitment not only fails to keep faith with current veterans, it also delivers exactly the wrong message to others who we are trying to persuade to join the armed services at this time.

Millions of veterans in this country depend on the VA to meet health needs and medical needs those VA facilities will be put in jeopardy by these reductions. It is not surprising to see what the national commander in chief of the VFW, Arthur Fellwock, says in a letter that is dated today, the 26th of March. Let my quote from his letter:

> Reductions in the Veterans' Administration budget proposed by the administration, if sustained, will have devastating effects upon the V.A. hospital and medical care system, benefits to which veterans and their survivors are entitled and even the processing and adjudication of claims.

He goes on to say:

> The V.A. has already sustained disproportionate cuts in personnel and real dollars under the prior administration and, in my opinion, should not be subjected to further reductions.

I must say I just do not understand how the President's party can walk away from clear commitments that he made in the course of the recent campaign. I do not understand how they can overlook statements that have since been made about maintaining the integrity of the safety net in our society, yet, some come in here with proposals to reduce vital medical services for American veterans. I just do not understand that kind of contradiction.

When OMB came before the Budget Committee with their submission, they described the impact of these proposed cuts very clearly, as has been outlined by my colleague from South Carolina and my colleague from Florida. Now, today, late in the afternoon, OMB has apparently sent over new information, which is obviously not available to the rest of us, that tries to portray these cuts in a different light.

Make no mistake about it: the veterans of this country will understand exactly what this contradiction is about. They understand the promises that were made in the campaign and have been made since. And they will understand that this administration's budget proposals do not keep those commitments.

That is why it is essential that this second amendment by the Senator from California be adopted. We must see to it that these medical services are provided.

We will shortly have the opportunity to vote on this matter—all of us who will be voting have access to medical services—the people in the executive branch who proposed these cuts also have access to medical services. Let us not walk away from the veterans of this country, not at this time, with inflation and the other problems that they are facing. Let us keep this pledge that we have made in the past and that have been maintained over the years by Republicans and Democrats alike in the White House. Now is not the time and this is not the group to hurt in that fashion.

I thank the Senator for yielding me time.

Mr. CRANSTON. I am prepared to yield back the remainder of my time.

Mr. DOMENICI. Mr. President, I just want to say in closing that I am sure the American people and the American veteran understands that no one is walking away from our commitment to them or their problems. I think they totally understand what is going on in this country and what is going on with excessive Federal spending. I think they should be reassured by the likes of Senator THUR-

MOND, Senator DOLE, and the distinguished chairman of the committee, the Senator from Wyoming, Senator SIMPSON, who has clearly indicated that, within the budget that the veterans have, they will start hearings quickly. He is not concerned that we are going to seriously impair the health delivery system. I think they are going to have confidence in that.

This is not a matter of walking away from anything. It is a matter of facing up to reality, facing up to the reality that the time has finally come when we are going to make eevry effort to bring this budget under control and require that everyone sacrifice a little bit; that that is what it is about. It is not walking away from the veterans whom we are all committed to. I think they know that. If this process works, we will not have walked away from anything. We will have walked into less inflation and walked into some prosperity and growth again.

Mr. BAKER. Mr. President, will the Senator yield me 30 seconds?

Mr. DOMENICI. Mr. President, I am pleased to yield to the majority leader.

(The VICE PRESIDENT assumed the chair.)

Mr. BAKER. Mr. President, I wish to announce that after this vote there will be no more votes tonight. It is mv intention to seek an order to convene the Senate in the morning at 9:30 and to go on this resolution at 10 o'clock.

The VICE PRESIDENT. Does the Senator from New Mexico yield back his time?

Mr. DOMENICI. Mr. President, I yield back the remainder of mv time.

The VICE PRESIDENT. All time has been yielded back. The question is on agreeing to the amendment.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll to ascertain the presence of a quorum.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. BAKER. Mr. President, before the Chair puts the question, might I correct a statement I made just a moment ago?

I announced a moment ago that there would be no more votes after this vote. What I meant to say was there would be no more votes after we dispose of this amendment. I do not expect more than one vote, but I would like to correct that for the record.

Mr. ROBERT C. BYRD. Mr. President, is the distinguished majoritv leader concerned that we might win this one?

Mr. BAKER. No, Mr. President, in an abundance of caution. I know the great prowess and ability of the minority leader, and I always stand in awe of that prowess and ability.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from California. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. PRYOR) is necessarily absent.

The result was announced—yeas 44, nays 55, as follows:

[Rollcall Vote No. 44 Leg.]

YEAS—44

Baucus	Exon	Melcher
Bentsen	Ford	Metzenbaum
Biden	Glenn	Mitchell
Boren	Hart	Moynihan
Bradley	Heflin	Pell
Bumpers	Hollings	Randolph
Burdick	Huddleston	Riegle
Byrd, Robert C.	Inouye	Sarbanes
Cannon	Jackson	Sasser
Chiles	Kennedy	Stennis
Cranston	Leahy	Tsongas
DeConcini	Levin	Weicker
Divon	Long	Williams
Dodd	Mathias	Zorinsky
Eagleton	Matsunaga	

NAYS—55

Abdnor	Gorton	Nunn
Andrews	Grassley	Packwood
Armstrong	Hatch	Percy
Baker	Hatfield	Pressler
Boschwitz	Hawkins	Proxmire
Byrd, Harry F., Jr.	Hayakawa	Quayle
	Heinz	Roth
Chafee	Helms	Rudman
Cochran	Humphrey	Schmitt
Cohen	Jepsen	Simpson
D'Amato	Johnston	Specter
Danforth	Kassebaum	Stafford
Denton	Kasten	Stevens
Dole	Laxalt	Symms
Domenici	Lugar	Thurmond
Durenberger	Mattingly	Tower
East	McClure	Wallop
Garn	Murkowski	Warner
Goldwater	Nickles	

NOT VOTING—1

Pryor

So Mr. CRANSTON'S amendment (UP No. 21) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, there will be no more votes tonight.

The VICE PRESIDENT. Who yields time?

Mr. BAKER. Mr. President, I am prepared to yield to my colleague from Tennessee, but since that is the last vote tonight and since, under the arrangement we have, it will be the turn on this side to offer the next amendment, I plan to provide now for the transaction of routine morning business. If the Senator from Tennessee has something else on this resolution that he wishes to deal with, I will forgo that request for the time being.

Mr. SASSER. I simply wanted to call up an amendment; but if it is the turn of the other side of the aisle, I will withhold that.

Mr. BAKER. I thank the Senator. The arrangement was made today that, to the maximum extent, we would alternate between the two sides. This side is next and has indicated that it will have an amendment to call up tomorrow.

● Mr. ROTH. Mr. President, I would like to join my colleagues in commending Senator DOMENICI and the members of the Budget Committee for their efforts in drafting this budget reconciliation resolution. The Budget Committee has devoted many long hours in past weeks on this measure and I believe they richly deserve our thanks for efficiently completing a very difficult task.

The reconciliation process is of course an important component of the congressional budget process. This process was created about 6 years ago after considerable study and debate.

Although the budget process was put into place several years ago, all the various components of the broad structure were not fully used right away. The reconciliation process for example, was fully utilized for the first time only last year. In the years since we passed the Budget Act, as we see the budget process put fully into effect, we can begin to evaluate the structure, the strong points, and the possible problems of the budget process.

I believe it is time for us to take a careful look at the congressional budget process. I think it is critical, if we are to have a strong economy, that we insure our process here in the Congress for promoting such a policy facilitates fiscal discipline. The Governmental Affairs Committee, as successor to the Government Operations Committee which authored the Congressional Budget and Impoundment Act of 1974 will conduct comprehensive thorough oversight of the act during this Congress.●

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend more than 30 minutes, in which Senators may speak.

Mr. President, I withdraw the request for a moment. I am aware that the Senator from Oregon has certain inquiries he may wish to propound or statements he may wish to make, and they relate to this measure. I would be perfectly happy to remain on this resolution or to have that colloquy in morning business, as he prefers.

Mr. HATFIELD. I defer to the majority leader.

Mr. BAKER. So that we can tie up loose ends, I renew my request and that there be no limitation on the length of time the Senator may speak in the transaction of routine morning business.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

Mr. BAKER. Mr. President, before the Senator from Oregon proceeds, I inquire of the distinguished minority leader if there are any items on the Executive Calendar today, or that may come to the Executive Calendar today, which he would be in a position to deal with at this time.

I inquire of the Chair: Is there an executive nomination at the desk?

The PRESIDING OFFICER. There are several.

Mr. BAKER. Mr. President, I believe there is a nomination of Colonel Chambers to the rank of brigadier general. That was reported today, and I believe it has been cleared on both sides of the aisle.

Mr. ROBERT C. BYRD. Mr. President, that nomination has been cleared on this side of the aisle.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, in view of the statement of the minority leader, I ask unanimous consent that the Senate go into executive session to consider the nomination of Col. Wess P. Chambers, Air National Guard, for appointment in the Reserve of the Air Force to the grade of brigadier general, which was reported earlier today.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

AIR FORCE RESERVE

The legislative clerk read the nomination of Col. Wess P. Chambers of the Air National Guard for appointment in the Reserve of the Air Force to be brigadier general.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I understand that the distinguished Senator from Texas wishes to introduce a resolution and that the Senator from Ohio has certain questions he wishes to put. I am prepared to stay and deal in a colloquy with the Senator from Oregon; but for the convenience of Senators, I wonder if we can forbear and recognize the other Senators in advance.

DEATH OF ADM. JOHN S. McCAIN—SENATE RESOLUTION 102

Mr. TOWER. Mr. President, on last Sunday, March 22, 1981, our Nation and the free world lost a man whose entire life was totally devoted to the struggle for peace and freedom. He became known as Mr. Seapower as he carried his message that America is an island nation depending on superior maritime power for its economic and political survival to the many receptive audiences all over the world who marveled at his articulate and straightforward speech and who enjoyed, as I did, the way he accented each point with the thrust of his long cigar. Some say, with great justification, that Admiral McCain was the modern Mahan as a naval strategist armed with the facts and experience to convert even the most critical strategic thinkers of our time.

Adm. John S. McCain, Jr., was a student of history, a diplomat and a sailor. He commanded our largest military command—the Pacific Command—as Commander in Chief during the difficult Vietnam conflict. His record as a naval officer was unparalleled. In World War II he served in submarines and once spent 72 hours on the ocean floor, riding out a depth charge attack. He said later, "It gives you a new outlook on life." If that type of personal experience was not enough for even the strongest of men, he experienced the pain of a father whose son, Capt. John S. McCain III, was shot down and became a prisoner of war in Vietnam. At the same time his son sat in a cell in North Vietnam, Admiral McCain commanded the Pacific Forces devoted to ending that war in 1968–72.

Admiral McCain maintained that superior maritime power was a necessity for the United States; naval commitments in the future would be focused on the Indian Ocean with its oil lifelines rather than off the coast of NATO Europe or the western Pacific; and he advocated the recall of the Iowa class battleships to active service after modernizing them to carry marines and vertical assult helicopters. Bear in mind these were his messages in the 1960's and early 1970's. It is clear today that Admiral McCain was a man ahead of his time, a dynamic and dramatic leader whose voice will be missed.

I would be remiss if I did not also mention that Admiral McCain also commanded U.S. Naval Forces Europe and was the senior military adviser to the United Nations in New York. He served on battleships, destroyers, submarines, and amphibious ships as well as in diplomatic assignments. It was this wide range of human and professional experience which made Admiral McCain the credible and persuasive naval spokesman that he was. His sense of humor was evident when in the anti-Vietnam era he told midshipmen at the U.S. Naval Academy not to worry about those antiwar protesters who urged them to "make love, not war." Admiral McCain said, they were members of the naval fraternity "whose members are men enough to do both."

Admiral McCain was born in Council Bluffs, Iowa, but as the son of a naval officer, he grew up at various naval stations all over the world. His father was also a four-star Navy admiral who was in command of the Fast Carrier Task Force in the 3d Fleet under Adm. William F. "Bull" Halsey during World War II. His dad was the oldest man in naval history to go through flight training at the age of 50. This type of McCain family heritage showed through in the blunt and outspoken style of Adm. John S. McCain, Jr. From the time of the Revolutionary War the McCain family had sons in the Nation's military service.

Many of my colleagues in Congress have called on the sage advice of Admiral McCain when he served as Navy Chief of Legislative Affairs, Chief of Information, and finally as CINCPAC. His son, Capt. John S. McCain III, presently serves this Congress as Director of the Navy's Senate Liaison Office, again reflecting the high standards of professionalism and friendship which were his father's hallmark.

We will miss this American whose crowning personal decoration was not the chest full of military medals which he had, but rather the admiration and respect of his fellow Americans and other leaders of the free world.

I might note that Admiral McCain is the only four-star admiral who was the son of a four-star admiral, and I might note with a bit of nostalgia that I served in the western Pacific with his father.

Mr. President, I yield first to the Senator from Mississippi and then to the Senator from Arizona.

Mr. STENNIS. Mr. President, I thank the Senator from Texas. I shall be brief.

Mr. President, I join wholeheartedly with the sentiments of the remarks by our colleague from Texas.

McCain is a fine family of military officers, particularly in the Navy.

The father of the gentleman who just passed away was known by many as the father of naval aviation. We have a naval air training unit in Mississippi that is named for the father of this gentleman.

This is a great family. I regret his passing. His record was outstanding and it speaks for itself.

I have great pride in what he did and what the Navy thought of him.

I thank the Senator for yielding.

Mr. TOWER. Mr. President, I yield to the Senator from Arizona.

Mr. GOLDWATER. I thank my friend from Texas.

Mr. President, I wish to join with my colleague from Texas in what he has said about Admiral McCain.

It was my extreme privilege, pleasure, and honor to have known this man in his active service, to have worked with him when he was Commander in Chief of the Pacific and to have known him as a close friend since his retirement.

I think he, without a doubt, epitomized everything that was good about the U.S. Navy. He was a little man but he was about the toughest man I ever ran into in my life, and I am convinced if they left him alone Vietnam would have been over in 1 week.

So I just wanted to put my word in, a word of admiration for the great contribution that Admiral McCain and his whole family have made to our country.

I thank my friend from Texas.

Mr. TOWER. Mr. President, I yield to the Senator from Delaware.

Mr. BIDEN. I thank my colleague from Texas.

Mr. President, I shall be brief. Although it was never my pleasure to have personally known Admiral McCain, I do know of the family and everything that I have known of the family leads me to have a feeling of nothing other than admiration. But I have had the pleasure of knowing his son, Capt. John

McCain, and have gotten to know him fairly well. The admiral must have been quite a man to have been able to produce a son like Capt. John McCain. Captain McCain apparently has inherited all that was outstanding in his father and clearly the McCain family is one of the outstanding families that has served this country.

I join with the Senator from Texas, and others, in expressing my deep sympathy to the family and my high regard for Admiral McCain, although I did not, unlike many of my colleagues, have an an opportunity to personally know him.

I thank the Chair.

Mr. TOWER. Mr. President, on behalf of myself, Mr. WILLIAMS, and Mr. STENNIS, I send to the desk a resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 102) expressing the sense of the Senate that the United States has suffered a great loss with the death on Sunday, March 22, 1981, of Admiral John S. McCain, United States Navy, Retired.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. TOWER. Mr. President, this is a resolution expressing the sense of the Senate that we suffered a great sense of loss with the death of Admiral McCain. It has been cleared on both sides of the aisle, and Senator STENNIS joins me as a cosponsor of this resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 102) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

SENATE RESOLUTION 102

Whereas Admiral John S. McCain, in the true spirit of patriotism and public responsibility and despite many personal sacrifices, served his country for forty-one years in the very highest traditions of the United States Naval service; and

Whereas Admiral McCain who was one of the truly exceptional military leaders of our time, and whose creativity, courage and dynamic leadership were an inspiration to all who served with him and to all of us who knew him; and

Whereas Admiral McCain served this Congress admirably in its effort to provide for our national defense by his candid and persuasive testimony before the Committees on Armed Services of the Senate and the House of Representatives and who in large part is responsible for making this Congress aware of the vital role which the United States Navy plays in preserving our national security, be it

Resolved, That it is the sense of the Senate that the United States deeply regrets the loss of Admiral John S. McCain and will not soon forget the exceptional dedication and service which this outstanding military leader gave to his country.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I apologize to the Senator from Oregon. I asked him to forbear a colloquy that he had previously announced he wished to undertake in order to accommodate other Senators. He had done that with great patience, and I extend my apology to him.

Mr. TOWER. Mr. President, if the Senator will yield, I express my apologies also. I was not aware that this would take quite so long, and I apologize to the Senator from Oregon.

Mr. HATFIELD. Mr. President, apologies are not in order. It was a rather extended period of time beyond the normal that one would have yielded for that purpose but because of the extraordinary character of the man who was being eulogized, it was perfectly appropriate.

I say that is one who served under his command in World War II in the Pacific, he was noted for all those characteristics and virtues that have been so eloquently recited by the Senator from Texas, and I know that the amphibious landing craft part of the Navy was sort of an innovation in World War II, and we were down at the bottom of the totem pole of the naval pecking order.

Even us at the amphibious landing craft level knew very well the kind of dynamic leadership that Admiral McCain represented for all of us, and we were all very proud to serve under his command.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The Senate continued with the consideration of Senate Concurrent Resolution 9.

Mr. HATFIELD. Mr. President, I wish to make some parliamentary inquiries concerning this resolution.

I ask the Chair, to begin with, the question that I propound relating to the statement of the managers of the Budget Act and that statement which very clearly stated certain constrictions that were placed upon the Budget Committee both as to its power in matters relating to authorization and its impact upon authorizing committees; second, as to its power as a restraint of the appropriations process other than in the current fiscal year.

I think the Chair is probably familiar with the wording of that statement of the managers.

I would now like to make the record as to where that applies in relationship to the first concurrent resolution and any subsequent resolutions such as the second or the third or the reconciliation resolution we are on. Do those constrictions apply to one resolution as against any of the other resolutions?

The PRESIDING OFFICER. The Senator is referring to the language in the conference report on page 58 which says:

It is intended that the authority to prescribe "any other procedure which is considered appropriate to carry out the purposes of this Act" applies only to the specific procedures for the enactment of budget authority and spending authority legislation for the coming fiscal year and not to the jurisdiction of committees, the authorization of budget authority, or to permanent changes in congressional procedure.

Mr. HATFIELD. That is correct, that is the language to which I refer.

The PRESIDING OFFICER. The Chair has not quite finished. That restriction applies only to first concurrent resolutions on the budget.

Mr. HATFIELD. That is my understanding. In other words, those restrictions that are enumerated in the statement of the managers of the bill apply only to the first concurrent resolution.

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. Now, Mr. President, in the present resolution pending before the body is it the equivalent of what resolution?

The PRESIDING OFFICER. A third concurrent resolution.

Mr. HATFIELD. A third concurrent resolution. Therefore, I would assume those restrictions do not apply to the third concurrent resolution?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. Therefore, under the third concurrent resolution, or if it were the second in a hypothetical situation, the Budget Committee does have the power to require program reductions to authorization levels as well as set the target figures not only for the current fiscal year but for subsequent fiscal years 1982, 1983, as in the case of the present resolution; is that correct?

The PRESIDING OFFICER. Under the Budget Act in regard to the second budget resolution and reconciliation process the provisions are as follows:

(1) specify the total amount by which—

(A) new budget authority for such fiscal year;

(B) budget authority initially provided for prior fiscal years; and

(C) new spending authority described in section 401(c)(2)

(C) which is to become effective during such fiscal year, contained in laws, bills, and resolutions within the jurisdiction of a committee, is to be changed and direct that committee to determine and recommend changes to accomplish a change of such total amount;

Mr. HATFIELD. Now, Mr. President, that is——

The PRESIDING OFFICER. That is usually referred to as the appropriations, prior appropriations, contract and borrowing authority, and entitlements.

Mr. HATFIELD. So the Chair is saying that is the reconciliation process, it does not exist in the first concurrent resolution.

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. And a further distinction is that in the first concurrent resolution the power is advisory only whereas in any subsequent resolutions it is binding, is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. Now, Mr. President, if that is the opinion of the Chair, then may I ask the Chair why it was necessary to choose or why was it required to change three words as they related to the initial language of this present resolution pending before the body in order to not have a point of order made against the resolution?

The PRESIDING OFFICER. It was not the initiative of the Chair which changed the resolution.

Mr. HATFIELD. If those three words

had remained in the resolution, would there have been a legitimate point of order against the resolution?

The PRESIDING OFFICER. In the opinion of the Chair it would have, yes.

Mr. HATFIELD. So the elimination of those three words then removes the possible point of order?

The PRESIDING OFFICER. That is the opinion of the Chair.

Mr. HATFIELD. Would the Chair explain that, as to the rationale or the reasons? First, before that, would the Chair also comment or observe that the changing of the three words in no way changes the results of the resolution?

The PRESIDING OFFICER. The Chair cannot look to the results of the resolution, only to the language.

Mr. HATFIELD. Will the Chair speak louder?

The PRESIDING OFFICER. The Chair could not look to the results of the resolution only to the language. When the language conforms to the Budget Act then no point of order lies to the language.

Mr. HATFIELD. The Chair, in effect, then was commenting on form rather than substance, is that correct?

The PRESIDING OFFICER. That is the function of the Chair.

Mr. HATFIELD. Mr. President, if this present Budget Committee had desired to apply program reductions beyond the year 1983, and set target figures on those subsequent fiscal years—and let me cite a hypothetical situation, that they would want to set, say, program reductions, target figures, for 1984, 1985, 1986, 1987, 1988, 1989, 1990, up to the year 2000, would that have been within the power of the Budget Committee as interpreted by the Chair under the Budget Act?

The PRESIDING OFFICER. The issue is outyear reconciliations, and on that issue the Budget Act itself is silent. The Senate chose to permit outyear budget reconciliation in a previous year. Therefore, the Chair would not be advised that a point of order would lie against outyear reconciliation instructions.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Chair had not quite finished—no matter what the year was.

The Senator from Oregon has the floor.

Mr. HATFIELD. Do I understand that the Chair—I would be glad to yield to the minority leader, but I have to get this clear in my own mind. I think I am in frequency with the Chair, I am not sure, but do I understand the Chair states there are no outyear limitations that would apply to a resolution of this kind, which is a subsequent resolution to the first concurrent resolution?

The PRESIDING OFFICER. Not in the Budget Act.

Mr. HATFIELD. I would be happy to yield at this point momentarily to the minority leader.

Mr. ROBERT C. BYRD. I was simply going to ask the Chair what was meant by the phrase "previous year" that the Chair used just now.

The PRESIDING OFFICER. In the third concurrent budget resolution fiscal year 1980, reconciliation instructions for fiscal year 1981, an outyear, were included.

Mr. ROBERT C. BYRD. Will the Senator yield further?

Mr. HATFIELD. Yes.

Mr. ROBERT C. BYRD. I thank the Senator from Oregon. Is the Chair saying that that constituted a precedent?

The PRESIDING OFFICER. The Chair is not saying that that constituted a precedent. A precedent is only a response to a parliamentary inquiry or ruling on a point of order.

Mr. ROBERT C. BYRD. There was no point of order raised in that instance, am I correct?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. So that does not, indeed, constitute a precedent. It was an event which was allowed to occur with no point of order being made at that time.

The PRESIDING OFFICER. That is not a precedent under the definitions of the Senate.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. HATFIELD. Mr. President, I want to clarify to my good friend, the chairman of the Budget Committee, and the majority leader and the minority leader both, that I had raised certain questions concerning the matter of limiting the authorizing committees through program reduction requirements and of setting outyear target figures in the Republican Caucus yesterday. And I did so in all sincerity, based upon my understanding of these restrictions as enunciated in the statement of the managers.

In further consultation with the Parliamentarian this afternoon, I felt that clarification was very important to place in the RECORD, so to make certain that any colleagues who care to read the RECORD would know, as I have now found, that there is this particular interpretation.

I raise this in no way to lay a foundation for a point of order or anything else. I merely wanted to make a record on clarifying what to some of us seems to be a rather strange ruling from the Chair.

I am not saying that I am in full agreement with the interpretation of the Chair at this point, but this is certainly the role of the Parliamentarian to advise in form only and not in substance. But I think it is very worthy to take note that changing those three words in no way changed the substance of the resolution.

The three words seem to satisfy the Parliamentarian as it related to a point of order based upon form, not on substance; if I am incorrect I want to be made correct.

And so I think that it is interesting to note that this kind of authority does lie with the Budget Committee and it will certainly be respected by this Senator to work within that framework until there is any change in precedent or change in the Budget Act.

But I think it is very important to recognize that we have, in effect, in this kind of action, fused two very fundamental roles of Senate committees into one committee action. And some of us perhaps were not aware that this was the kind of power that could be exercised by one committee, and especially when you consider that this act is binding.

Let me illustrate what that means, too. We can come along in 2 weeks with the first concurrent resolution of 1982 and it can change the figures that are in this resolution relating to 1982 and that action will be absolutely without any kind of enforcement or importance, because it is advisory only in the first concurrent resolution and the binding character of this resolution, the third resolution on 1982, will prevail. So we have put ourselves in that kind of a situation.

Now we can obviously have a second concurrent resolution at some point in fiscal 1982 and change the binding character that now exists in this third concurrent resolution as it relates to the 1982 budget.

But I think that is worthy of notice, that what we are doing here binds us, in spite of a change of opinion or change of events that might occur, in the activity of bringing forth the first concurrent resolution of fiscal year 1982 and any change of those figures that would contradict the binding character of these figures would be purely advisory.

Now if I am in error, I want to find that out now, too, because, as chairman of the Appropriations Committee, Senator DOMENICI and I pledged a filial bond of cooperation that we both pledged to our leader and we are going to strive in every way to live up to that. But I have to have a clear understanding of what framework we are operating in and what kind of rules we have and how to interpret them.

My last analysis or statement, and I put it in the form of a question to the Chair. My last question: If the fiscal year 1982 first concurrent resolution should have a revision of figures which would contradict the figures for fiscal year 1982 in this present pending third concurrent resolution, which of the two would prevail?

The PRESIDING OFFICER. The first concurrent resolution is an advisory resolution. It does not control.

Mr. HATFIELD. Therefore, the controlling figure would be the figure in this, the third concurrent resolution pending before the body as it relates to fiscal year 1982, provided this passes and is enacted. Is that correct?

The PRESIDING OFFICER. To the extent there are controlling figures in this resolution.

Mr. HATFIELD. Well, Mr. President, are these playthings? These figures that are cited in this present resolution, are they not binding? Are they not controlling until contradicted by some subsequent resolution to the next first concurrent resolution?

The PRESIDING OFFICER. The figures cited in the resolution are indeed binding.

Mr. HATFIELD. They are indeed binding. So they are controlling as well as binding, is that correct, until a subsequent action is taken?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. And no subsequent action can take place to change these figures, short of a second concurrent resolution for fiscal year 1982. Is that correct?

The PRESIDING OFFICER. That is not correct.

Mr. HATFIELD. What can change these controlling figures? The first concurrent resolution which is only advisory?

The PRESIDING OFFICER. The further concurrent resolution for fiscal year 1981.

Mr. HATFIELD. The fourth concurrent resolution?

The PRESIDING OFFICER. That is correct.

Mr. DOMENICI. The further concurrent resolution.

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. Now let me put it this way: If there is no further concurrent resolution and in a few weeks we pass the fiscal year 1982 resolution, the first concurrent fiscal year 1982—let me understand clearly—and those figures have been changed, they are advisory only and, therefore, the controlling figures would still be the ones in this third concurrent resolution now pending before us, is that correct?

The PRESIDING OFFICER. The figures in Senate Concurrent Resolution 9 adopted in identical form by both Houses are binding.

Mr. HATFIELD. So they would prevail. I thank the Chair.

Mr. ROBERT C. BYRD. What about the second concurrent resolution?

Mr. HATFIELD. As I understand the Chair, taking the hypothetical situation—I know this is very difficult to get into but it has to be used in order to get to the point. Let us assume that we have adopted this third concurrent resolution in both Chambers, which has set the target figures for fiscal year 1982 and the fiscal year 1982 first concurrent arrives on the floor with the same figures as in this one as it relates to fiscal year 1982. There is no issue. But then the second concurrent resolution that may be brought to the floor for fiscal year 1982 changes the figures as compared to these figures or contrasted to these figures, then that second concurrent or subsequent to the first concurrent resolution of fiscal year 1982 would be the controlling resolution figures.

The PRESIDING OFFICER. The Senator is correct.

Mr. SCHMITT. Will the Senator yield for a further clarification?

Mr. HATFIELD. Yes.

Mr. SCHMITT. The figures in Senate Concurrent Resolution 9 relate to savings, is that not correct, not to aggregate total? This is a question addressed to the Chair.

The PRESIDING OFFICER. The Chair is not in a position to interpret the resolution.

Mr. SCHMITT. The wording of the resolution, then—I am not asking for an interpretation—the wording of the resolution is an instruction to committees to enact certain savings over some base, which this Senator, for one, does not know what that base is. Is that correct?

They are instructions.

Maybe I better direct the question to the distinguished Senator from New Mexico, the chairman of the Budget Committee.

Is my understanding correct that the instructions in this concurrent resolution, Senate Concurrent Resolution 9, are instructions to committees to enact certain savings over the figures that are inherent in the second concurrent budget resolution for 1981 as passed by the Congress?

Mr. DOMENICI. I think it is best just to read what it says. It directs authorizing committees—then we just read the words for any one of them—

Shall also report changes in the law within the jurisdiction of the committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows:

I think the words I have just read are as well as I can do. They are artfully chosen, with the exception of a House resolution perhaps having one or two words different. They are just about identical to what we did last year and what we did in the Senate two times before.

Mr. SCHMITT. But my only point is that the wording of a second concurrent budget resolution for 1982 would be, in absence of reconciliation, to enact the total for 1982.

Mr. DOMENICI. A second concurrent resolution, absent reconciliation as to the functions of the Government, would have a functional total and an aggregate total, the aggregate being the sum of the functions.

Mr. SCHMITT. So any reductions relative to 1982 that are mandated and binding under Senate Concurrent Resolution 9 would be different in form from any budgetary figures contained in a binding second concurrent budget resolution for 1982?

Mr. DOMENICI. I do not understand the point.

Mr. SCHMITT. There are apples and oranges.

Mr. DOMENICI. Yes.

Mr. SCHMITT. The Senator is talking about reductions in Senate Concurrent Resolution 9, and we will be talking about aggregate totals in the second concurrent budget resolution.

Mr. DOMENICI. The Senator is correct.

Mr. SCHMITT. I do not think it clarifies the issue a great deal, but it does give some latitude for interpretation as we move into a second concurrent budget resolution for 1982.

Mr. DOMENICI. These instructions are by committee. The aggregate totals or the parts of the aggregate total are functional. Consequently, the savings effected find themselves in the functional totals at some point and therein become part of the functional total.

Mr. SCHMITT. It may even be muddier than that because the binding number within the second concurrent budget resolution is the aggregate budget outlay figure for the entire budget and the functional totals themselves are advisory.

Mr. DOMENICI. That might be. How that turns out and what second concurrent resolutions in the future look like or say in them or have in them, or what the instructions are or how binding they are, is not static. I hope the Senator knows that.

Mr. SCHMITT. But based on past precedents of second concurrent budget resolutions we would be dealing with an aggregate total for budget authority, an aggregate total for outlays for 1982, and functional totals would be advisory in how the Budget Committee feels that that aggregate total should be reached.

Mr. DOMENICI. If the Senator wants an expression that we have done it that way sometimes, the answer is yes. Most of the time, the answer is yes. But I do not want to say what it will always be. I cannot do that.

Mr. SCHMITT. I am not trying to put the Senator on the spot. I want to be sure that the Senator from Oregon and I clearly understand that Senate Concurrent Resolution 9 in dealing with something you might call oranges are reductions. The fiscal 1982 second concurrent budget resolution will be dealing, if it follows the traditional pattern, with aggregate totals. How we work between those two in terms of what is binding and what is controlling is something this Senator has not figured out yet.

Mr. DOMENICI. Right. I agree.

BUDGETARY IMPACT ON RAIL TRANSPORTATION

Mr. CANNON. Mr. President, as ranking minority member and former chairman of the Commerce Committee, I want to be very sure that Members understand the impact of the Budget Committee action on the funding of several transportation programs under the jurisdiction of the Commerce Committee.

Senate Concurrent Resolution 9 instructs the Commerce Committee to achieve savings in budget authority of $1.708 billion and outlays of $1.034 billion in fiscal year 1982, plus $1.898 billion in budget authority and $1.628 billion in outlays in fiscal year 1983.

I strongly support the objectives of the Budget Committee and believe there is an urgent need to control Federal expenditures, reduce inflation and revitalize our Nation's economy. However, one essential part of any program to turn our Nation's economy around and achieve real growth is a strong transportation system. Although I acknowledge that the transportation sector will have to do its share of belt tightening, I am afraid some of the areas the Senate Budget Committee and the Reagan administration have chosen to cut could well precipitate a transportation and budgetary crises with potential costs to the economy and the Federal Treasury far in excess of the savings the cuts are projected to achieve.

My concern is directed specifically to the Budget Committee's support of the administration's request to terminate all

funding for Conrail, beyond that authorized to date.

CONRAIL DILEMMA

Mr. President, I should like to discuss briefly the Conrail dilemma, the impact of the proposed cuts on the local rail assistance programs, and Amtrak, in light of the 3 days of hearings the Commerce Committee recently held to review these matters. I understand the Commerce Committee has some flexibility to recommend savings in areas other than that recommended by the Budget Committee, and I will urge our committee to review other programs where the reductions will not be as counterproductive as these cuts appear to be.

A matter of extremely serious concern is the effect the proposed funding level will have on the future of Conrail. The administration recommendation, adopted by the Budget Committee, essentially contemplates no additional funding for Conrail bevond a fiscal year 1981 supplemental appropriation.

Presumably, the funding level is based on the administration proposal to transfer Conrail's properties to other railroads. However, the Commerce Committee has just completed 2 days of hearings on Conrail's future, and I did not hear any testimony (other than that of FRA) indicating that this alternative was either desirable or feasible. On the contrary, there was a consensus that further Federal funding for fiscal year 1982 and fiscal year 1983, which would provide an opportunity for Conrail to become self-sustaining, in fact presents the best available alternative at the least cost to the Federal treasury. We are not talking about maintaining the status quo. Our hearings developed a number of operational and structural changes which must be made; these will be considered as the Commerce Committee develops legislation.

The point I want to make is that there should be additional funding in the budget so that there is flexibility as we proceed. How can the Senate tie itself down to one particular Conrail alternative when the reports mandated by the Rail Act have not yet been filed? That due date is April 1, 1981. USRA's testimony, which I shall ask to have printed in the RECORD, indicates that its April 1 report will not recommend transfer of Conrail lines.

In addition, it appears that the same changes (participation by labor and others) everyone agrees are needed to enable Conrail to become self-sustaining, will also be needed before there will be any purchasers of Conrail lines. So, it seems to me that limited additional funding is absolutely essential, whatever alternative the Congress ultimately adopts with regard to Conrail's future.

The issues we are talking about affect the entire country, not just the Northeast. More than 70 percent of Conrail's freight traffic is interchanged with other railroads, and cessation of service could impair the financial health of the rail industry. Last year, Conrail handled over 237 million tons of freight in an area which accounts for 40 percent of the Nation's total manufacturing. Take just one shipper who testified—Bethlehem Steel. This company receives about 200 carloads of raw material every day and ships outbound by Conrail almost 100 cars of product. To unload iron ore from just one ship and move it to Bethlehem by truck would require 3,000 truckloads. Bethlehem indicates a truck would have to move down the highway every 2 minutes, 24 hours a day, to fill its iron ore requirements.

A large part of Conrail's rail service is clearly essential, and I suggest that the issue is sufficiently important that funding be added to the budget to insure that we have the opportunity to reach the right solution to the Conrail dilemma.

There is another facet of the Conrail issue that poses a problem. The administration budget does not include any funds for labor protection. Yet, there is general agreement that any alternative which may be adopted will involve employee protection costs—either under existing law or in connection with modification of present title V protection. While the cost of labor protection cannot be precisely quantified at this time, various estimates received by the committee range from $200–$400 million a year for a smaller Conrail system to as much as $3 to $10 billion if most Conrail lines are transferred to other railroads or the carrier is liquidated.

In response to a question I asked, Mr. Blanchette of FRA stated that the administration is drafting a legislative package that will deal with this matter, and that the financing necessary to implement the proposal will be recommended. Unfortunately, considering budgetary deadlines, I do not believe we can afford to wait. This is another reason that the proposed funding for Conrail needs to be increased.

We have to face the fact that a solution of the Conrail dilemma will cost more money. My concern is that we make every effort to assure that the future investments in Conrail, from all sectors, are cost effective and aimed at solving the Conrail problem—and not short-term decisions which could precipitate a crisis while attempting to solve one. I shall ask that the testimony of the USRA and Stanley Crane of Conrail be printed in the RECORD.

LOCAL RAIL ASSISTANCE PROGRAM

There is another program I should like to touch on briefly. That is the local rail assistance program. The program was established in 1973 to provide assistance in the very type of situation facing the States now as Conrail proceeds to cut back its system. We have heard testimony that the program is working well. Certainly it has been important to States affected by the bankruptcies of the Milwaukee and Rock Island Railroad.

How can we reconcile these two distinct estimates—each of which has an entirely different impact on the rail passenger service in this country? I submit as a further example of this discrepancy the fact that the administration has quoted a figure of $10 million for labor protection costs if the Amtrak system is reduced while Amtrak has cited a figure of $200 million. It concerns me, and it should concern all of us, that a substantial reduction is being recommended without full agreement or understanding as to its impact.

Amtrak has raised important questions about the soundness of reducing its present system to the level called for by $613 million, and particularly the impact of such a reduction on the Federal investment in Amtrak. Amtrak anticipates that under the reduced system which it envisions, the revenue-to-cost ratio would slide to 37 percent, slipping further and further away from the statutory goal of 50 percent. Furthermore, the passenger miles served by the reduced system would decrease from 5 billion to 1.2 billion, providing less than one-third of the current return on the Federal dollar investment per passenger mile. Finally, the $300 million investment which Amtrak has made in new superliner equipment for use on the western routes would not be usable on the Northeast Corridor.

I suggest very strongly that these issues be analyzed more carefully. As we continue to scrutinize and reevaluate all Federal spending programs, we at the same time must be fully cognizant of the impact which any funding reductions would have: We must insure that the investment of the Federal dollar is a sound one and on a firm footing. I am sure the Commerce Committee will address these important questions before making a final recommendation to the Senate on the future of Amtrak.

Cutback of funding for the program may be called for in view of budgetary constraints, but I fear that elimination of the local rail assistance program and concept at this time is shortsighted. Printouts showing how these funds were allocated for fiscal year 1980 and the allocation of funds available for fiscal year 1981 are attached to my statement. I shall ask that it be printed in the RECORD.

AMTRAK

We will be considering a budget proposal which includes a substantial reduction in the Amtrak budget of $435 million from the CBO current services level for fiscal year 1982. The figure of $613 million which remains to cover Amtrak's operating and capital expenses raises serious questions about the level of service which could be maintained by Amtrak at this reduced level of funding. The critical issue appears to be how much could be provided outside the Northeast corridor.

The Department of Transportation has stated in testimony before the Commerce Committee that between $150 and $250 million worth of service could be provided outside the Northeast corridor with a funding level of $613 million. I might point out in this regard that in response to questions from Commerce Committee members, the Federal Railroad Administrator was reluctant to clarify what criteria should be used to determine the level of service outside the corridor, or where it anticipated such service would be provided. Furthermore, I have not seen a detailed breakdown by the Department of Transportation of the costs which it expected would be covered by the figure of $613 million.

On the other hand, Alan Boyd, president of Amtrak, has stated in two separate letters to Congress that Amtrak would be able to operate only in the Northeast corridor. These letters break out the costs which would be associated with such an operation. I shall ask that the letters from Alan Boyd, president of Amtrak, to which I have referred, be printed in full in the RECORD.

Mr. President, I ask unanimous consent to have printed in the RECORD the material to which I have referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF STEPHEN BERGER, CHAIRMAN, U.S. RAILWAY ASSOCIATION

Mr. Chairman and members of the committee, I appreciate the opportunity to appear before you today to discuss the United States Railway Association's analysis of options for Conrail, under Section 703 of the Staggers Rail Act of 1980. I will touch briefly on a number of areas described in greater detail in our forthcoming April 1 report.

In USRA's December report, it was stated that the Staggers Rail Act provides Conrail with ample opportunity to realize adequate revenues, but that Conrail's costs in relation to its revenues far exceed the industry average. We believe that as long as profitability remains a goal, a convincing case can be made for further Federal funding only after Conrail's cost/revenue relationship is fundamentally altered.

USRA's analysis reveals that there may be an opportunity for Conrail to become self-sufficient by 1985 if four basic achievements are realized: (1) aggressive use of its new economic flexibility; (2) tight management of its cost structure; (3) significant concessions by labor to increase productivity and reduce costs; and (4) legislation to relieve Conrail of the unrealistic cost burdens of passenger and commuter operations and of long-term labor protection placed on the railroad at its beginning.

In the December report, USRA stated that Conrail could achieve substantial additional revenues if it made aggressive use of its pricing opportunities under the Staggers Act. However, if Conrail were to surcharge all of its business to the statutory threshold, a considerable portion of current traffic could be diverted. Therefore, to offset revenue lost from any diverted traffic, Conrail's rate increases must be very selective so that profitable business is not diverted and the problem of its noncompensatory traffic is addressed. Innovative, aggressive pricing could result in significant revenue increases and help improve Conrail's profit margin.

With respect to nonlabor-related cost reductions, USRA has identified areas of potential economy including transportation costs, car utilization, overhead expenses, elimination of duplicate facilities, and the removal of through-freight trains from the Northeast Corridor.

The third issue—work rule changes—has the potential for realizing the greatest cost savings for Conrail. Modifications in rules pertaining to train crew size, arbitraries, deadheading, mileage basis of pay, and other practices can provide savings for Conrail as high as $325 million per year. If the collective bargaining process yields total savings of at least $225 million per year, Conrail should be well on the way to financial self-sufficiency. Because it would take some time to negotiate such changes, however, an interim cost-saving step that could be taken is a series of wage freezes and/or deferrals until work rules changes are implemented. Wages then could be unfrozen and deferrals made up in increments as procedures were implemented to increase employee productivity. But, it should be emphasized that Conrail *must* save the $225 million-per-year in labor costs by no later than early 1982 in order to survive.

Conrail has been unable to achieve significant savings to date from its Crew Consist Agreement and the National Manning Agreement because of the attrition provisions each contains. In order to speed the necessary attrition of employees as well as positions, the $200 million authorized in the Staggers Act for this purpose should be used.

If all of these cost efficiencies are realized, the result could be a Conrail of approximately 13,000 route-miles with projected gross revenues of $7.5 billion and net income of $500 million in 1985. This is a stark difference from the present 18,000 route-mile system which lost $380 million in 1980.

One of the impediments to a self-sustaining Conrail is the enormous cost of labor protection obligations that would result from any restructuring. The 13,000 mile configuration could result in a reduction of approximately 4,000 Conrail employees because of modifications to the plant size. Additional reductions in the employment roster could be obtained through modifications of existing work rules. Under the present labor protection provisions of Title V of the 3R Act, approximately 55 percent of all present employees in freight service are entitled to full protection to age 65, while an additional 17 percent are entitled to partial protection. In addition, employees not currently protected by Title V could be expected to receive protection for six years under labor protection conditions normally imposed by the ICC for line abandonments ("New York Dock Conditions").

The Association estimates that labor protection costs under Title V could amount to as much as $2 billion in achieving a self-sustaining Conrail. But if protection were limited by legislation to that granted in the Milwaukee Railroad Restructuring Act or in a 1972 Central of New Jersey abandonment proceeding, the costs would be reduced, ranging up to $580 million and $53 million, respectively. One of our assumptions regarding the future viability of Conrail is that labor protection would not be the railroad's responsibility—a condition which varies from existing law. I must emphasize that USRA believes that Conrail cannot become financially self-sustaining, despite all the productivity improvements I have outlined, unless it is relieved of this enormous labor protection burden.

Another major obstacle to viability is Conrail's passenger service operations. No other railroad in the country, including AMTRAK, is responsible for as varied and complex commuter services as is Conrail. Conrail is the largest commuter carrier in the country. Not only do commuter operations drain working capital, they also divert a great deal of management attention from Conrail's principal task of providing freight service.

The challenge to Conrail in the next two years to turn itself into a successful freight railroad can only be hindered by continuing to burden it with passenger operations. We believe Conrail's commuter responsibilities should be terminated not later than July 1982. However a transfer within this relatively short period is feasible only if the commuter authorities are not burdened with the labor protection obligations associated with the assumption of Conrail's 11,000 commuter employees after their separation from Conrail.

Conrail may be able to achieve viability by 1985 with limited Federal funding of operating losses through fiscal 1982 and of capital expenditures through fiscal 1983. But, as a condition to this further funding, Conrail should be required to achieve very substantial, visible progress through a two-year transition period. USRA believes that performance mileposts should be established to measure progress over the two-year period. If Conrail fails to achieve these goals, the railroad should be dissolved. To prepare for this possibility, detailed plans for replacing Conrail by transferring its facilities and equipment to other railroads should be developed. In USRA's view, this two-year transition period would make the most effective use of the resources necessary either to ensure Conrail's success or to provide the solid planning and improvements to Conrail that are prerequisites for a potentially successful "controlled transfer".

In considering a controlled transfer, it is important to understand that the process itself is lengthy and complex and cannot be implemented in a brief few months. The process depends on the number of acquiring railroads, their degree of interest in various Conrail routes and markets, the degree of Federal involvement in the transfer operation, and other factors. In such a situation, it is not possible either to gauge costs beforehand or to compute the Federal Government's share.

USRA has recently met with a number of Conrail's logical potential acquirers and they have said that unless they know the costs and can be assured that some of the changes we recommend in our April report will be made, they would not and could not be parties to a controlled transfer.

Despite the inability to gauge the precise costs of a transfer, we believe that it would be cheaper in the long run to provide the two-year transition period USRA recommends. With progress mileposts and a close scrutiny of Conrail as it proceeds toward 1985, there are benefits which accrue. They include the solution of many of the difficult issues, such as labor protection, work rule changes, and plant reduction that effectively hamper Conrail in its current configuration and prohibit a successful transfer. At the end of the transition, there will have been two years of additional progress in solving the crisis. At that point, we will either have a successful Conrail or the solid foundation for a potentially workable transfer. If a transfer were initiated within the next few months, this potential progress in planning would be lost and the opportunity to reinvigorate the economy of the Northeast and Midwest would also have been missed.

The future of Conrail depends on the active cooperation of all interested parties—management, labor, shippers and states. Management must achieve efficiencies of operation or witness the liquidation of the railroad. Labor must allow productivity improvement or risk the loss of thousands of jobs. Shippers must pay compensatory rates or risk losing rail service. States and communities must mitigate the economic impact of line abandonments with financial assistance or face a greater loss of rail service. I believe the Federal Government must be prepared to assume the cost of interim financing for Conrail as well as the responsibility for solving the labor protection issue if it is to realize its original goal of a revitalized, profitable railroad serving the Nation's largest industrial area.

Mr. Chairman, I am also here today to testify in support of an appropriation authorization of $19 million for administrative expenses of the United States Railway Association for fiscal year 1982.

The Committee has been supplied with budget details supporting this authorization. Briefly, USRA requests:

$12.5 million to support litigation now pending before the Special Court (66 percent of the total);

$6.5 million for expenses in connection with Conrail planning (34 percent of the total).

Last November the Federal Government

and the Penn Central Corporation agreed to settle the case being litigated between them concerning the value of the properties conveyed by Penn Central to Conrail on April 1, 1976. The settlement amounted to $1.46 billion, valued as of the date of conveyance. The Government and the Penn Central had previously valued the properties at approximately $500 million and $6 billion, respectively. Because the Certificates of Value bore interest at the statutory rate of 8 percent compounded annually, the Penn Central's Certificate was redeemed for slightly more than $2.1 billion at the settlement closing on January 15, 1981.

Settlement of the Penn Central claim did not end the litigation. The claims of six additional major bankrupt railroads are still being litigated before the Special Court. The Federal Government is still faced with nearly $1 billion in claims by these remaining estates. Further, while the Penn Central assets represented a major portion of the property transferred to Conrail, elimination of the Penn Central from the case did not proportionately reduce the complexity of the litigation. The Government still must deal with the same legal and economic issues presented when the Penn Central was in the case.

We are presently negotiating with the remaining transferors in an effort to arrive at settlements favorable to the Government's interests. Because it is impossible to predict whether a settlement will be reached with any of those estates, it is imperative that USRA continue to litigate the case vigorously.

Work on the two major evidentiary phases of the valuation case proceeds simultaneously as well:

The Parties are completing the rail-use phase of the case in which the transferors are seeking to establish values for those portions of their rail systems which they contend could have been sold for continued rail use to purchasers other than Conrail. Initial rail-use briefs were filed by the Government Parties and the remaining transferors on January 12, 1981. Final rail-use briefs are scheduled to be filed on April 20, 1981.

In the nonrail use, or "scrap", phase of the litigation, the Parties will present evidence about the values of property which would not have been continued in rail use. At the direction of the Court, the Parties filed on March 19, 1981, preliminary proposals for trial of scrap value issues. We anticipate that the Court will specify a schedule for trial of this phase of the case sometime this spring. It is expected that the case will be tried throughout the 1982 fiscal year.

Litigation costs are declining rather sharply, both because of the Penn Central settlement and because of completion of the rail-use case. Last year we spent $21.2 million, this year we expect to spend about $17 million, and next year we are proposing $12.5 million for litigation.

During the past year, USRA has devoted most of its nonlitigation resources to developing the April 1 report to Congress concerning the future of Conrail. It is, of course, our hope that Congress can resolve the issues involved in Conrail's future during the current calendar year. To assist Congress in this effort, we anticipate performing additional work that draws on our seven years of experience with the Northeast rail situation.

We consider fiscal 1982 as a critical year for the Federal Government in its relations with Conrail. Aggressive monitoring must be accompanied by contingency planning for actions to be taken if Conrail fails to make significant progress toward self-sufficiency. The Association's capacity for both monitoring and planning is in place and, in our judgment, should be maintained.

For these reasons, we are requesting an authorization of $19 million. This represents an approximate $10 million (30 percent) reduction from the fiscal 1981 appropriation level and results from the curtailment of litigation following the Penn Central settlement, as well as a reduced need for contractual services for evaluating Conrail.

The Administration has recommended a $14 million appropriation for USRA's administrative expenses in 1982. This lower figure assumes that USRA's Conrail monitoring functions will be completed in the first half of the fiscal year. At the same time, the Office of Management and Budget is recommending an additional $4.5 million and 25 employees for the Federal Railroad Administration to offset this reduction in USRA's capacity to monitor Conrail.

However, we are seeking a $19 million authorization because we believe that USRA should have a continuing role in developing and implementing whatever option is adopted by the Congress to solve the Conrail dilemma. As long as a substantial planning and monitoring function is necessary, it would seem to be counterproductive to dismantle the highly experienced team at USRA and then assemble and train a new team to do the same job at another agency. Rather, it would seem preferable to terminate all planning and monitoring functions when a solution to the Northeast rail problem is attained. A transfer of such functions to a permanent agency could make their termination more difficult despite that objective having been achieved. In addition, the appropriate timing of a transfer, if any, is impossible to predict now. Under the Association's proposed authorization such a prediction is not necessary since a transfer of funds could be accomplished if and when a transfer is deemed desirable.

STATEMENT OF L. STANLEY CRANE, CHAIRMAN AND CHIEF EXECUTIVE OFFICER, CONSOLIDATED RAIL CORPORATION

Mr. Chairman, I appreciate the opportunity to appear here today to discuss Conrail. I look to this hearing as a forum to address the resolution of the issues that must be addressed if the Northeast/Midwest is to continue to have adequate rail service.

At the outset it might be useful to give you some brief comments on my perceptions about Conrail after having been on the property for two and a half months.

First, Conrail's mainline or core system is in excellent shape. It is the equal of most railroads in this country. The problem, which I will discuss later, is that there is too much railroad for the traffic that is available.

Second, Conrail has a group of dedicated and competent employees—management and labor. The expertise exists on Conrail to bring the railroad into profitability, but only if it is relieved of the constraints presently imposed upon it.

Third, Conrail's service is more than just adequate, it is excellent. We have the physical plant, the locomotives and freight cars we need for our traffic volume. Those resources are being managed to produce a high quality of rail freight service.

Nevertheless, there are two other basics that one cannot ignore; in fact, they are the most important.

One. Conrail does not have enough business to support the physical plant and equipment it has today. To illustrate, Conrail's car loadings have dropped twenty-five (25) percent from 1977 to 1980; yet few adjustments have been made in the size of the plant.

Two. Conrail's costs are too high. Apply any comparative yardstick you want and the answer is the same. Conrail must reduce its costs.

It is within the context of these two basic facts—too little business and too high costs—that Conrail has been attempting to re-evaluate its role in providing rail service and to develop the plans required by the Staggers Rail Act of 1980.

What I would like to emphasize, however, is that Conrail is not waiting for the end of a planning exercise to react to the realities we face. We have begun and we will continue to take the actions within our control and ability to respond to the economic realities confronting Conrail. The key in that statement, however, is "within our control and ability", for as our report to Congress on April 1 will spell out, Conrail will not make it without the help of others. Simply put, there are not enough self-help opportunities available to Conrail to allow it to become profitable on its own.

The Staggers Act required that Conrail, USRA and the U.S. Department of Transportation all submit reports on April 1 that evaluate the Northeast rail system under three different scenarios. Let me list them for you:

Case A—no Federal funding after the $329 million authorized in the Staggers Act.

Case B—continued Federal funding with no fundamental changes in the Conrail system or its operation.

Case C—limited Federal funding for Conrail, as necessary to preserve rail service that will be self-sustaining.

Conrail is also preparing a full discussion of another alternative that the Government must consider—liquidation of the Conrail system and the transfer of part of its operations to other railroads.

I must say that while Conrail is preparing Case B—continued Conrail funding with no basic changes, it is an option that we feel no one believes is relevant. It does serve as a benchmark, in that it identifies the cost to the taxpayer of merely keeping things running as they are, but it is not really, at least in our view, an option that will be seriously considered.

So the basics that I would like to lay out for you now are those that must occur under any of the remaining options—Case A, Case C, or the transfer of Conrail properties to others.

First, contributions, concessions, participation—however you want to describe them—must be made by a number of groups if Conrail is to have even an opportunity to become profitable. I will return to these more specifically, but let me say now that this includes shippers, labor, suppliers, state and local communities, as well as Conrail management. This is true whether the decision is to continue with Conrail or to seek another answer.

Second, Conrail must be relieved of the cost of statutorily-mandated labor protection, including Title V, and New York Dock and all other job guarantee programs. While there are a number of changes that must occur to reach the goal of a private sector rail system in the Northeast, this is one of those "proverbial" bottom lines. For I can tell you unequivocally that Conrail can never make it if it must bear the costs of any labor protection. I will also tell you, based on my experience, that Conrail's properties will go unsold if purchasers are required to assume the labor protection costs required by Title V of the 3R Act.

Third, Conrail cannot be abandoned into prosperity. The analysis and review in this area is not finished, but based on the work done so far it appears that about 2,500 route miles of Conrail can economically be severed from the system. These lines represent about 14 percent of Conrail's route miles but account for only 1.6 percent of Conrail's revenue. Ultimately, we believe this will save nearly $22 million a year. Conrail's April 1 report will identify some of these lines and when the analysis is completed we will identify the remaining lines found to be uneconomic.

Mr. Chairman, you can readily see that while the savings are not insignificant, they are not of a magnitude that will make Conrail profitable. Conrail's problem is that its business is too well distributed over too large a system and abandonments alone won't cure the problem. Let me say that we are also moving on a rationalization program of the core mainline routes that will eliminate about 2000 miles of second and third track railroad.

Fourth, commuter service in the Northeast must be provided by someone other than Conrail. This is a topic I have already addressed before this subcommittee. Let me point out that it would be difficult to transfer Conrail's properties to another railroad if those railroads were required to assume the commuter obligations.

Mr. Chairman, what I am compelled to say today is that even if all of these things occur Conrail still requires $342 million of Federal funding beginning in 1982 and ending in 1984. In 1985, Conrail would for the first time generate a profit of $3 million, that is cash in excess of all operating and capital investment needs. In 1986, the profit becomes $154 million.

The forecasts used for this plan are conservative, both in the volume and cost reduction areas. They are conservative because we felt an obligation to present a plan that has a high degree of achievability. We have, for instance, included in this plan a contingency provision of $50 million per year, or $250 million over five years. I believe there is a chance that Conrail can do better, particularly on the operating cost side where we have more control than we have over volume levels.

Therefore, the government must decide whether the investment of $342 million beginning in 1982 is worth it or whether there are other solutions such as the transfer of Conrail's rail properties that would be more economic.

Before going into more detail I would like to make one point. When I talk about profit, I am speaking about cash in excess of Conrail's total operating and capital requirements. As you know, Conrail has been using GAAP accounting to portray its financial results, but that method of accounting does not take into account all of Conrail's capital needs. So you can be showing a handsome profit under GAAP accounting, but still be woefully short of the total cash requirements of the company. This is an important distinction. It is possible, Mr. Chairman, that this year under GAAP accounting that Conrail will break even and show a "slight profit." Yet, Conrail will require a $340 million Federal investment this year. I just want to make clear what I mean by profit—that is Conrail being in a position where it no longer requires any Federal investment. I want to be clear that this definition of profit does not include the servicing and retirement of the Federal investment in Conrail.

Now for more specifics. Let me deal with Case B first. If you continued Conrail as is with only a few adjustments, the Federal funding requirement would be nearly $2.5 billion by 1986. You can see why we believe it is unlikely to be considered.

Looking more closely at Case A—no more Federal funding, the answer is a bit more complex. Let me say that I cannot construct a scenario that would permit Conrail to continue to operate without more Federal funding. And I cannot tell you with precision how long I can keep the railroad operating with no more Federal funds. If I was told today that I had to keep it going through the end of 1981 with the funds requested in the President's Budget, I would say, we can do it. If, on the other hand, I was told today that the funds in the Administration's Budget had to sustain operations through 1982, I must tell you it would be difficult to do. Even if all capital programs were stopped completely and we did absolutely no track work, repaired no freight cars and locomotives and furloughed thousands of workers, it would appear by the end of 1982 the railroad would be unable to meet its payroll. The results of these actions would certainly be more than just unpleasant. The railroad would deteriorate, both physically and from a service point of view. Parenthetically, I should tell you that even under this scenario I am assuming that the government pays Title V liability. For if Conrail has to pay Title V protection to all of these people furloughed there is no net benefit to the cash position of the railroad. You can see how Title V restricts the use of lay offs as a short term and drastic self-help measure.

There is one way that Conrail could make it under Case A, but I am doubtful that it could be implemented—that is, to seek all of the actions I described earlier and obtain about a 10 percent wage reduction or rollback from Conrail's work force by the end of 1981.

Clearly, if there is to be no more federal investment in Conrail the government must begin now to take the actions required to split it up or liquidate it and it doesn't have very long to do it before there is a threat to continued operations. Conrail management needs to know how long it will be required to operate the property. Otherwise, continuing rail service could be jeopardized. Even with a prompt decision, it is my judgment some additional funding will be needed to preserve the railroad until another solution is implemented.

Regarding Case C or improved Conrail. As I said earlier, even after all of the improvements, contributions and other changes we are suggesting Conrail would need $342 million of Federal funding from 1982 through 1984 before turning a modest profit of $3 million in 1985 and $154 million in 1986. We do not foresee the ability to repay the Federal investment.

Let me review the major elements of this plan.

At the outset. I do want to make clear that the traffic projections are conservative. They are based on a GNP growth rate that is below historical trend lines and, I believe, lower than many current economic projections for the nation as a whole. Indeed, the revenue projections are the single biggest swing factor from previous Conrail plans. We are projecting traffic trends that are virtually "flat." And that is a big difference from past plans which usually projected significant traffic growth. This is also the place to make the point that if traffic is significantly higher than projections, the requirement for Federal funds will be reduced. Conversely, if these forecasts turn out to be optimistic, the need for Federal investment will be even higher. Finally, I hope by now everyone recognizes the speculative nature of any five year forecast. One only has to recall that in 1975 USRA projected Conrail would be hauling 399 million tons of freight for the year 1980 compared to the 237 million tons we actually moved. Therefore, this is our best estimate, but no one should consider it carved in stone.

As Conrail stated in its March 15 "Report on Labor" Case C requires at least a $200 million annual savings from our upcoming labor agreement settlements. In the years, 1982 through 1986, Conrail requires aggregate labor savings in this area of $1.1 billion. In addition, we project that freight employment on Conrail will be reduced by 11,000 during this time. A considerable amount of this reduction would occur even faster, if Conrail was able to spend $125 million on a severance program.

Our labor costs could be reduced by up to $310 million over the next five years if the 4,600 excess firemen and brakemen currently on the payroll would accept severance. A favorable resolution of the Amtrak/Northeast Corridor dispute over freight charges would provide another $132 million over five years. A contribution of $50 million per year by states and local communities adds to $250 million over the same five years. If Conrail acquired the traffic currently moving over the D&H (except Montreal-Albany) the benefit to Conrail over the next five years is $250 million. More equitable divisions of revenue with the Long Island Railroad would yield $40 million in five years. But let me re-emphasize that even if all of these events occur, if all of these contributions are made, Conrail still needs $342 million in additional Federal funding by 1984 before showing a $3 million profit in 1985 and $154 million profit in 1986. Without all of those contributions, Conrail would need more than $2.1 billion by 1986.

You can understand now why I said earlier that the government will want to carefully evaluate the alternatives. Anticipating that this would occur, Conrail reviewed alternatives in this area. As you might imagine, this work is highly speculative, but it does represent an effort to project what might happen under the transfer of Conrail's rail properties to others. I do want to emphasize that this work has been done by Conrail only.

For analytical purposes, a hypothetical model, dividing Conrail into North and South "units" was evaluated. Under this scenario, if other railroads took both of these North and South "units", about 95 percent of Conrail's traffic would continue to move, anywhere from 2,500 to 3,700 route miles would disappear, and about 20,000 of our present force of 65,000 freight employees would lose their jobs, This is about double the number of employees displaced under Case C. We have no way to know whether the sale of Conrail properties in this manner is achieveable.

Should the sale of Conrail properties in the manner suggested under the North and South split be impossible, we examined another alternative, liquidation. Conrail estimates that liquidation or the sale of Conrail lines to other railroads based on what we believe they would buy would result in the abandonment of about one half of Conrail's route miles, about 60 percent of Conrail's traffic would continue to move and the displacement of about 40,000 of our freight employees. Furthermore, we estimate that their controlled transfer or liquidation would take up to two years to implement if serious dislocation problems were to be avoided. I must remind you that the funds requested in the present Budget are not sufficient to keep Conrail operating for those two years.

I must add that we believe that for the sale of Conrail's rail properties to work, most of the contributions, concessions and changes outlined earlier would have to be present. You will see in our April 1 report that we have made the same assumptions for the sale of our rail properties that were made for Case C.

In short, Mr. Chairman, these are rough approximations of the alternatives faced by the government. I am sure they will be carefully studied and evaluated. I fully expect the most economic plan will be the ultimate choice.

I do want to make sure, however, that as the government considers the overall economics of each of these alternatives, it keep in mind the total cost of the Northeast/Midwest rail problem.

Let me illustrate. I stated that Conrail would need $342 million in additional Federal funding by 1984. I also said that Conrail had to be relieved of the Title V liability. Our estimate of that Title V liability, based on the existing statutory level of protection could be as high as $432 million (uninflated) for the years from 1982 to 1986. This assumes

that Conrail is able to successfully implement the severance program for 4,600 excess firemen and brakemen discussed earlier. The Title V costs associated with the North/South controlled transfer we constructed could be as high as $1.6 billion for the five year period and for liquidation that number becomes $3.2 billion for the same five year period. These costs could also be reduced somewhat if the severance program for Conrail was implemented for these alternatives.

If the existing level of protection is retained, we estimate that the total labor protection costs—that is the payments required until there are no protected employees—could be as high as $1.5 billion for Case C; $4.8 billion for controlled transfer and $9.7 billion for liquidation. I mention these figures to illustrate the potential problem in this area.

Obviously, changing the statutory level of protection would have a dramatic impact on the total cost to the government for resolving the Northeast/Midwest rail issues. But, the costs of labor protection must be considered as the overall solution is debated, discussed and finally resolved.

Before closing, I do want to emphasize again the need for a timely resolution of these issues. I have laid out for you the problems associated with a "no more" Federal funding scenario. Delay and/or indecision can have disastrous consequences. Shippers seek alternatives, suppliers could seek payment in advance, lack of funding results in the deterioration of the physical plant and private sector financing for equipment will not be available. Delays breed uncertainty and could irreparably harm the Region's economy.

We at Conrail are prepared to cooperate. All of us are prepared to help make the hard choices. We will share our experience and what expertise we have. I do want this committee and the rest of the government to know that, once a decision is made, we will do our best to implement it.

I wish I could sit here today and tell you that without any doubt Conrail can make it. I simply cannot do that. I can tell you that under the conditions we have set forth, and with the additional funds we have said are needed, it has the opportunity to become profitable. There are many objectives in the proposed plan, all of which must be achieved for Conrail to make it. But I will not overpromise. There are many imponderables—too many uncertainties. This is a public policy decision—it is a decision involving the allocation of limited resources and one for the government to make.

Thank you.

DEPARTMENT OF TRANSPORTATION,
FEDERAL RAILROAD ADMINISTRATION,
Washington, D.C., January 19, 1981.

Subject: Eligible Mileage and Available Funds as of October 1, 1980.

To: All States Participating in the Section 5 Program.

Attached is a chart indicating the eligible mileage as of October 1, 1980, and the October 1, 1980 allocation of funds. This allocation is being made pursuant to Public Law 96-400, the fiscal year 1981 Department of Transportation Appropriations Act which contained $80 million for the Section 5 Program. The formula has been computed in accordance with Section 5(h)(2) of the Department of Transportation Act.

ELIGIBLE MILEAGE

The eligible mileage has been ascertained by the Interstate Commerce Commission's Office of Policy and Analysis working with the Federal Railroad Administration's Office of State Assistance Programs. As a result of the bankruptcies of the Rock Island and the Milwaukee, the mileage of these systems will be categorized as follows:

1. The entire Rock Island system is in Category 3 (Pending Abandonment) because the June 2, 1980 ruling (Court Order No. 248) of the bankruptcy court authorizing abandonment of the entire system was appealed. Approximately 35 miles of track in Arkansas will drop out of the formula since it has been sold and a new certificate of Public Convenience and Necessity was issued before September 30, 1980.

2. All Milwaukee lines which, as of September 30, 1980, had not already been authorized for abandonment are, as reflected on the latest system diagram filed with the ICC on June 30, 1979, in Category 1 (To Be Abandoned in 3 years). All other lines are in Category 4 (Abandoned).

The attached chart indicates the eligible mileage by state (Column 1) and its percentage in relation to the total mileage of all states (Column 2), including the one percent minimum entitlement. A listing of the lines comprising the eligible mileage will be forwarded under separate cover.

AVAILABLE FUNDS

Column 3 of the chart shows the total funds being made available to the states. The total, $87,436,684, represents the sum of the FY 1981 appropriation and $7,436,684 which was not obligated in fiscal year 1980. The portion of the total available funds which may be used for state rail planning purposes is shown in Column 4. This has been determined on the basis that each state may use up to five percent or $100,000, whichever is greater, of its annual entitlement for planning purposes.

OBLIGATION OF FISCAL YEAR 1981 ALLOCATION

The fiscal year 1981 Department of Transportation Appropriations Act establishes a limit on the amount of funds which may be obligated during the last quarter of fiscal year 1981. It provides that the amount of obligations may not exceed 30 percent during the last quarter of fiscal year 1981 or 15 percent for any month during this quarter. In light of this limitation, it is essential that FRA and the states work together to ensure an orderly and timely commitment of Section 5 funds. To aid us in this effort, attached is a schedule for submitting applications for fiscal year 1981 funds. The schedule also reflects target dates for FRA approval of fully complete applications submitted in accordance with the schedule. This schedule supersedes the proposed schedule submitted to each state for review in August 1980. It has been revised to reflect the requirements of the Appropriations Act and the actual timing of the distribution of this memorandum. It is essential that the states and FRA use the attached schedule, since failure to do so will jeopardize the funding of applications during the last quarter of fiscal year 1981.

JOHN M. SULLIVAN,
Administrator.

FISCAL YEAR 1981 ENTITLEMENTS

State	Eligible mileage	Percent miles	Total entitlement	Portion of total entitlement available for plan
Alabama	262.23	1.00	$874,367	$100,000

AMTRAK,
Washington, D.C., March 10, 1981.

Hon. JAMES J. FLORIO,
Chairman, Subcommittee on Commerce, Transportation, and Tourism, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Because of the complicated nature of the issue, I wish to respond in writing to your question seeking Amtrak's contingency plans for route-by-route rail passenger service at the $613 million funding level.

As I said in my testimony, the strength of a modern rail system—be it freight or passenger—is that it can handle growth and expansion far more cost effectively than can highways, waterways or airways. If anything, Amtrak's basic system is vastly underutilized, especially considering the fixed capital costs we must incur to provide the basic service Congress has directed. Increased use of this system will produce exponentially higher revenue-to-cost ratios.

Unfortunately, the converse is not true. Therefore, it is unnecessary to detail route-by-route impact because the proposed budget leaves little flexibility for Amtrak operation.

To be specific:

At the $313 million level, we calculate that Amtrak would be able to provide service only in the Northeast Corridor, between Washington and Boston, beginning in October of 1981, at the start of the new fiscal year.

Amtrak has an irreducible capital commitment for FY 1982 of $130 million. This sum comprises legal obligations for contracts outstanding, and NEC purchase, $130 million.

Operating the Northeast Corridor takes $250 million in infrastructure costs. This figure is net of infrastructure revenues. It does not include $82 million in interest, a burden which we are assuming would be lifted, $250 million.

NEC operations require an additional $188 million in variable costs, largely offset by $178 million in revenues, for a net cost of $10 million.

Labor protection if Amtrak runs only the NEC would likely amount to upwards of $200 million. This is a fixed cost, $200 million.

Costs of shutting down the rest of the system could amount to something over $25 million. This is a fixed cost, $25 million.

Total, $615 million.

Some of these items such as labor protection would, of course, diminish in out-years, but so would the proposed federal grant. It is fair, therefore, to say that the Administration is in effect proposing a system shutdown outside of the NEC.

At this level of operation, fixed costs, comprising infrastructure labor protection, and shut-down costs are $475 million, or 72 percent of our total costs. At the level of operation we propose fixed costs are $486 million, or only 34 percent of our total costs.

The difference in service provided is also dramatic.

At the $613 million level (in effect an operating budget of $483 million), Amtrak could provide about 1.2 billion passenger miles. At the $716 million operating level we could provide 5 billion passenger miles. In other words, for a 48 percent difference in operating payments we offer a 300 percent increase in passenger miles.

At the $613 million level, each Federal dollar buys 2.5 passenger miles. Under Amtrak's proposal, each Federal dollar buys 7 passenger miles. In this sense, Amtrak's proposal is 2.8 times more cost effective than the Administration's budget.

I have often testified that Amtrak is a corporate business, not a government program and that Amtrak's budget cannot be radically contracted without disproportionate reductions in service. Amtrak is part of the transportation solution, not a part of the problem.

After viewing these figures, I'm sure you will agree that a sharply reduced investment in Amtrak is not a more efficient investment in Amtrak.

Sincerely,

ALAN S. BOYD.

AMTRAK,
Washington, D.C., March 16, 1981.

Hon. JAMES J. FLORIO,
Chairman, Subcommittee on Commerce, Transportation, and Tourism, Washington, D.C.

DEAR JIM: Last week when I testified before your committee regarding Amtrak's Fiscal Year 1982 Authorization, I supplied you with a letter analyzing the impact of the President's proposed Fiscal Year 1982 Amtrak budget level of $613 million on Amtrak's operations. Our essential conclusion, reflected in that letter, was that at the President's budget level Amtrak would be able to offer little if any train service outside the Northeast Corridor (NEC). With extremely limited funding we would presumably operate on those routes which covered the highest percentage of operating costs from revenues. The Northeast Corridor is where this occurs.

It was clear from the general flow of the hearings throughout the week, and from separate conversations between ourselves and the Federal Railroad Administration, that FRA felt we could offer significantly more service at the $613 million level. I am sure you understand that we, as the management of Amtrak, above all others, would want to find the way to run as much train service as possible at any given budget level. I am writing to set out the reasons for our conclusions that the level of $613 million will support little or no service outside the Corridor.

Our conclusions about the service implications of the $613 million figure were stated in my earlier letter to you. Let me summarize them again:

$136 million, irreducible commitments for Fiscal Year 1982, reflecting prior Administration or Congressional approval and assuming "buy-outs" of existing contracts with suppliers wherever possible. Our letter of 3-10-81 estimated this cost to be about $130 million. (A legal memorandum describing the nature and extent of these obligations is Attachment A).

$250 million, cost of owning and operating the Northeast Corridor infrastructure, both for Amtrak's own service and assuming current cost allocation arrangements among Amtrak, Conrail, and the commuter agencies. The revenues expected from freight and commuter operations have been deducted to produce a net cost. This $250 million cost figure compares with over $400 million in infrastructure cost were we to operate a national system. It therefore does reflect significant reductions in infrastructure costs as the system shrinks. Unfortunately, as I noted in the hearings, these costs do not shrink as quickly as do revenues and operating costs as train service is eliminated. (A memorandum describing these costs is Attachment B.)

$10 million, Northeast Corridor operations produce an additional $188 million in operating costs, directly related to train operation such as labor costs, fuel etc. These costs would be largely offset by $178 million in revenues.

$200 million, statutory and contractual obligations for labor protection payments in Fiscal Year 1982 if the system is reduced to essentially an NEC operation. Some have asked why Amtrak would not choose to spend some or all of the money running additional trains, thereby keeping people employed, and avoiding labor protection expenses. The simple fact is that, it is somewhat more costly to operate a service than to pay the protective costs occasioned by its discontinuance. Because labor protection obligations are equivalent to the salary and fringe payments Amtrak would have to make to keep additional trains operating, and because many costs in addition to these for labor are associated with running a train, there is no less expensive way to deal with this problem. In his testimony before your committee last Monday, then Acting FRA

Administrator Robert Gallamore estimated our labor protection obligation from the Administration's proposal at $10 million. We can find no rationale to support the estimate Mr. Gallamore offered, indeed some experts estimate that these obligations may result in much higher outlays. (A legal memorandum detailing the basis for these labor protection obligations explaining the way in which we arrived at the $200 million approximate figure for Fiscal Year 1982 is Attachment C.)

$25 million, based on the assumptions noted above, Amtrak would be closing down all service except its NEC operations. Our best estimate of the costs of such a close-out activity is $25 million.

These costs total $621 million. Inevitably they represent estimates but we feel they are close approximations. We have reviewed them with the General Accounting Office staff and are meeting with FRA staff today to provide them with a detailed critique of the bases for our conclusions regarding the impact of the Administration's proposed budget level on Amtrak's service. The Administration engaged in no consultation with Amtrak regarding the implications of the $613 million budget proposal previously. It is worth noting that in developing our estimates of the impact of a $613 million budget we assumed that the Congress would grant us relief from the $87 million in interest payments and taxes we would otherwise incur in Fiscal Year 1982. The Administration has not expressed support for granting such relief. If we must make such a payment, that would mean an additional $87 million would have to be factored into the $613 million program level.

It may be helpful to compare the impact of the $613 million budget proposal with those proposed by Amtrak. As you know, Amtrak submitted a Fiscal Year budget justification at the $970 million level for operating and capital support. We made this recommendation based on some important assumptions. We assumed that relief from certain state and local taxes would be provided by the Congress saving Amtrak up to $6.5 million in Fiscal Year 1982. We also assumed that Congress would grant us the authority to issue a new category of preferred stock to the Federal Financing Bank (FFB) in exchange for the notes held by the FFB on which we must pay interest each year. Such a transaction would save Amtrak $82 million in interest payments in Fiscal Year 1982 and a similar amount in every succeeding year.

Our obligation under the notes stems from a now-abandoned method of providing federal funding for Amtrak capital. During its first several years, Amtrak did not receive a direct capital appropriation. Instead, Amtrak was permitted to borrow from the FFB to finance its capital expenditures. There are two ways the principal on that debt can be retired: Amtrak can use any profit it earns to pay down the debt, or the Congress can appropriate money to Amtrak to pay it down. Neither of these options seems workable. Every knowledgeable person in Congress understood from the beginning that, notwithstanding some rhetoric to the contrary, Amtrak would never be profitable. No national railroad in the world even approaches profitability. Neither does it seem practical for the Congress to appropriate funds to be passed through the Amtrak budget and returned to the Treasury. Even though no money actually changes hands, such a paper transaction would appear in the federal budget as an outlay at the time when every effort is being made to reduce budget outlays.

Amtrak's $970 million budget proposal also assumed Amtrak would cut selected train service. Acting in accord with the 1979 Amtrak Reorganization Act, we proposed to drop or modify all the routes which are subject to specified Congressional performance criteria and fail to meet them as required in Fiscal Year 1982. This means dropping the Cardinal and the Shenandoah and rerouting the Broadway Limited for a Fiscal Year 1982 savings of $11 million. It means a restructuring of the Inter-American for a Fiscal Year 1982 savings of $12 million. All of the other trains to which the criteria apply will exceed the Congressional criteria set out in the 1979 Act. We also intend to eliminate three frequencies in the Northeast Corridor in order to save $9 million in Fiscal Year 1982, and we assume that no commuter service will be financed out of Amtrak's budget, saving an additional $10 million. This represents $42 million in route-related savings in FY 1982. The $970 million budget proposal is also based on a projected revenue growth of 22 percent resulting from sustained ridership and fare increases in Fiscal Year 1982. These fare increases come on top of Amtrak's 46 percent compounded fare increases between the first quarter of 1978 and the present. By way of comparison, Amtrak increased its yield by 34.7 percent during that period while the major airlines yield rose by 29 percent.

In my conversation with you Friday evening in which you requested that I supply you with this additional detail on the implications of the $613 million budget proposal, I told you that by taking some further, increasingly difficult actions we could further reduce our Fiscal Year 1982 operating and capital appropriations request by $117 million. In the process we could take steps which would result in the achievement of a 50 percent system-wide revenue-to-cost ratio in Fiscal Year 1982 and the preservation of the national route system contemplated in the Amtrak $970 million budget. All of the route reductions we had planned at the $970 million level would still be required, as would be Congressional action to retire the debt and give us relief from certain state and local taxes. In addition, in order to live within a $853 million Fiscal Year 1982 appropriation ($117 million less than the $970 million in our budget justification submitted to you), several additional cost cutting or revenue generating actions would be required.

Specifically, we can project $75 million in reduced federal payments resulting from charging higher food and beverage prices, reducing some manning levels, selected fare hikes on high-demand services in peak periods, alterations in operating and equipment utilization practices, and from the private financing of the NEC communications system. In addition we can see potential savings in Fiscal Year 1982 of $42 million from certain efforts to reduce labor costs which we intend to actively pursue. A first step toward those savings can be taken if the Congress acts to grant us relief from Section 504(f) of the 3–R Act, which effectively bars Amtrak from bargaining on an even footing with the train and engine crew brotherhoods in the NEC. We are willing to take the risk of recommending the deletion of the $42 million from our Fiscal Year 1982 budget now with the proviso that if by next Spring our diligent efforts to negotiate train and engine crew costs reductions have not produced a net savings of that amount, in Fiscal Year 1982 we could, with Congressional support, seek a supplemental for the different between the amount actually saving and $42 million. By taking these actions, both in the labor and operating and capital areas, Amtrak is absolutely straining the limits of what can be achieved within a budget which is already very tight.

I would like to make a few observations about the impact of the $613 million budget level as compared with the $853 million level we now propose. The Administration's objective of achieving a 50 percent revenue-to-cost ratio in Fiscal Year 1982, three years ahead of the schedule in current law, would be very adversely affected by the $613 million program level. Whereas our revenue to cost ratio in 1981 will be about 42 percent, that number would slide to 37 percent with the $613 million budget. In contrast, because our $853 million operating and capital appropriation proposal preserves the national system and therefore the revenue base, while reducing the costs which have to be spread over that base, Amtrak would achieve the 50 percent revenue-to-cost ratio in Fiscal Year 1982 as the Administration desires. This makes the additional increment of federal support a very good investment.

Several other factors confirm this view. At the $613 million level, Amtrak would provide 1.2 billion passenger miles. At the $853 million level, Amtrak would provide 5 billion passenger miles. This means that at the $613 million level each federal dollar would result in 1.9 passenger miles. At the $853 million level each federal dollar would result in 5.9 passenger miles, over three times the return of each dollar of federal investment. At the $613 million level, the system would be reduced to the Northeast Corridor alone, resulting in the loss of approximately 14,400 jobs for either Amtrak employees or those working for the railroads in jobs directly resulting from the existence of Amtrak service. At the $853 million level, Amtrak would be able to continue to provide a national passenger rail service, thereby preserving an irreplaceable national resource and protecting most of the jobs of our workforce.

At the $613 million level several billion dollars in past federal investment in Amtrak and the passenger rail system of the United States would be lost. Most obviously, the 284 new double-decked Superliner cars built by Pullman Standard for Amtrak would be useless since they are too high to fit the clearances of bridges and tunnels in the Northeast routes to which Amtrak service would be reduced. (The Superliners were purchased for use on western routes where clearance is no problem and where the added capacity of a bilevel car makes it a very cost effective way to accommodate passengers.) At the $853 million level, the newly acquired or renovated equipment and the other federally financed capital investments in Amtrak could be fully utilized, generating revenue throughout their useful life. The full use of these kinds of existing capital assets is the most fundamental premise on which any corporation would make investments and acquire assets. It makes no sense, at the very time when Amtrak has finally worked its way out of the antiquated, unreliable, expensive equipment we inherited ten years ago, to fail to take advantage of the earning potential of the improved fleet.

A final advantage of the $853 million level is that it would preserve to a significantly greater degree the vital national resources of passenger-speed rail corridors connecting city centers.

Under Amtrak's operating agreements with the freight railroads, the railroads are obligated to maintain their rail lines at the same level of utility which existed when Amtrak commenced operations over their properties. Any break in the continuity of Amtrak service would end the railroads' contractual obligations to maintain their rail lines to a level suitable for passenger service. Tracks could deteriorate to a level where passenger speeds could not be achieved, necessary sidings and signal systems could be removed, and costs of returning to today's standards would be prohibitive. (Attachment D is a summary sheet comparing the implications of the two budget levels.)

Throughout the hearings this past week, Federal Railroad Administrator Robert Blanchette made quite a point of saying

that it was up to the Administration and the Congress, acting like a Board of Directors, to set the policy and determine the overall budget level for Amtrak. He said that it would be up to Amtrak management to determine how the available dollars could be used pursuant to the policy guidance. Although we are quite comfortable with this concept of management flexibility, we believe we should offer to the Administration, as we will to our own statutorily created Board of Directors, management's candid assessment of the impact of the proposed budget reduction. It is that candid assessment I have offered this past week and which I am supplying in more detail here. To continue the corporate analogy, in the absence of any credible alternative theory of what the impact of a proposed budget level would be, it would be up to a board of directors to decide whether the proposed budget level is acceptable or whether some changes in either program or budget are required. That is what we are asking the Congress to decide. The worst outcome would be for the Congress or the Administration to act under the false impression that $613 million could support any significant train operations outside the NEC.

I hope that through this letter and the accompanying supporting documents you will have the information you asked me to supply. If there is any additional information we can supply please let me know.

Sincerely,

ALAN S. BOYD,
President.

INTEROFFICE MEMO, MARCH 16, 1981

To: A. S. Boyd.
From: P. F. Mickey, Jr.
Subject: Fiscal year 1982 Capital Commitments.

We have analyzed Amtrak's existing legal commitments for the acquisition of capital equipment in fiscal year 1982. We have estimated that Amtrak will have to pay approximately $136 million in that year to meet contractual obligations for capital acquisitions not previously funded through appropriations. The incompletely funded capital programs include purchase agreements for 150 new passenger cars and 17 electric locomotives and an over-commitment of guaranteed loan authority for the acquisition of the Northeast Corridor.

Details of these commitments are discussed below:

150 PASSENGER CARS: $89 MILLION

In the Conference Report for the Department of Transportation Appropriations Act for FY 1980, the conferees expressed their agreement that Amtrak should have the flexibility to enter into a contract to acquire up to 200 new low-level passenger cars—despite the deletion from the Appropriations Act of a proposed advance appropriation for FY 1982 to complete the financing of this acquisition. H.R. Rep. No. 96–610, 96th Cong., 1st Sess. 11 (1979).

In March 1980, Amtrak contracted with the Budd Company to manufacture 150 new "Amfleet II" cars, including 125 coaches and 25 food service cars, for a total price of approximately $150 million. Delivery of these cars is to start in August 1981 and be completed by June 1982. The Budd Company's progress is on target, and substantial material for the cars has already been ordered.

Cancellation of this contract would produce only small dollar savings and would waste most of the funds already committed. There is no termination clause in this contract, and if Amtrak were to cancel, Amtrak would be liable for costs incurred by Budd up to the date of cancellation, as well as for Budd's lost profits. Amtrak estimates that Budd would claim as lost profit at least 10% of the $115 million base price, or $11.5 million. Material and engineering costs already incurred probably total at least $60 million. If Amtrak were to cancel in September 1981—after approximately 25 cars are delivered—Amtrak might save $20 to $30 million out of the total $150 million committed. However, Amtrak would have to forgo completion of the balance of the order—approximately 125 cars. Cancellation at that stage of the contract would not be commercially prudent.

Amtrak has already used $50 million in FY 1980 and 1981 appropriations to fund this program. An additional $89 million will be required in FY 1982 to complete this order.

17 ELECTRIC LOCOMOTIVES: $17 MILLION

Amtrak contracted with General Motors in February 1980 to add 17 more units to the 30 AEM–7 electric locomotives already on order for operation in the Northeast Corridor. Funding for the $51 million base price of the 17 additional units was provided in FY 1980 appropriations. Amtrak estimates that an additional $17 million will be required in FY 1982 to fund the acquisition of necessary spare parts and escalation which is payable upon delivery of the units.

If Amtrak were to cancel in September 1981—after approximately 32 locomotives are delivered—Amtrak might save approximately $10 million in labor costs but would have to forego delivery of approximately 15 locomotives. General Motors might claim up to $37 million consisting of costs of material, engineering, and labor on the last 15 units and lost profit on those units. Completion of this order appears to be the more prudent course.

ACQUISITION OF THE NORTHEAST CORRIDOR: $30 MILLION

In 1976 the Secretary of Transportation approved a $25 million temporary over-commitment of guaranteed loan authority to finance the purchase of the Northeast Corridor. To date no sum has been appropriated to cover this amount, and Amtrak has used loan authority made available for other purposes to finance the amount of this over-commitment. With interest at current high rates, this amount will reach $30 million in FY 1982.

The over-commitment will become critical in FY 1982 since completion of already approved capital programs will cause Amtrak's outstanding guaranteed loan balance to reach its authorized level of $850 million, and Amtrak will need an additional $30 million in appropriated funds to meet its total obligations for capital programs.

[Attachment B]

Infrastructure Costs

Infrastructure costs for an NEC only system include the following major items:

Maintenance of track and roadbed, electric power system, buildings and the signal system on the NEC;

NEC dispatching and train control;

Security and facility overheads at NEC equipment maintenance locations;

NEC stations and terminals;

Commissary and crew base staffing and supervision;

NEC regional operating management;

Taxes, General and Administrative, Marketing and sales, computer services, accounting, training, and procurement in support of the Corridor.

The amount of infrastructure costs required to support an NEC stand alone operation are $280 million. These costs would be offset by $30 million in revenues not directly related to routes such as real estate and miscellaneous revenues.

The descriptions above indicate that a significant portion of these infrastructure costs are for activities in direct support of the NEC. Nonetheless, the $250 net reflects a proposed reduction in fixed infrastructure costs of $126 million or over 30 percent.

INTEROFFICE MEMO, MARCH 16, 1981

To: Alan S. Boyd.
From: Paul F. Mickey, Jr.
Subject: Fiscal year 1982 Labor Protection Costs.

I. AMTRAK'S LABOR PROTECTION OBLIGATIONS

Section 405(a) of the Rail Passenger Service Act of 1970, 45 U.S.C. § 565(a), required that railroads "provide fair and equitable arrangements to protect the interests of employees . . . affected by a discontinuance of intercity rail passenger service. . . ." Subsection (b) set out the minimum requirements for the prescribed protective arrangements, and specified that no railroad could contract with Amtrak for the transfer of its responsibility to provide passenger service until the Secretary of Labor determined that the proposed arrangements were acceptable. Subsection (c) imposed on Amtrak the same substantive requirements for the protection of its own employees. The Secretary certified two appendices to the NRPC Basic Agreement as satisfying these statutory requirements: Appendix C–1 for railroad employees, and a nearly identical Appendix C–2 for Amtrak employees.

Appendix C–2 protects employees of Amtrak affected by the "discontinuance" of passenger train service. Although Amtrak has taken the view that only traditional "train-offs" and consolidations are comprehended by the term "discontinuance", representatives of labor have argued that a far greater range of actions affecting employees gives rise to the protection obligation, and the controversy has not yet been resolved. Protected employees who have suffered a reduction or loss of compensation are entitled to three types of allowances, two of which are paid for the duration of the "protective period"—the length of time an employee has worked for Amtrak, to a maximum of six years.

A. Displacement Allowance—Any employee who is displaced and who obtains employment in another position at a lesser salary is paid the difference between his monthly compensation for the current position and his average monthly compensation for the prior year, with the addition of general wage increases applicable to the craft in which he previously was employed.

B. Dismissal Allowance—Any employee who is dismissed from employment because his own position has been abolished, or because it has been assumed by another employee with greater seniority who has been displaced because of a discontinuance, is entitled to monthly payments equal to the average monthly compensation of the previous year, adjusted for general wage increases and reduced by the amount of earnings from other employment or unemployment insurance. The entitlement ceases upon reemployment, death, retirement, or refusal of an offer of comparable employment. All fringe benefits, including free transportation, hospitalization, and pensions, continue at the same level as if the person were still employed.

C. Separation Allowance—An employee entitled to a dismissal allowance may, within 30 days after dismissal, resign and accept a lump sum settlement in lieu of all other benefits. The amount of the lump sum settlement is computed with a formula which provides for a maximum of sixteen months' pay for employees with over five years' service.

Appendix C–1 generally entitles employees of freight railroads who work in Amtrak service to the same protective benefits as are available under Appendix C–2. Under Appendix C–1 the freight railroads bear the responsibility for protective payments to

those employees who hold positions which were required for the operation of passenger services as of May 1, 1971. Pursuant to Section 7.3(c) of the NRPC Agreement, Amtrak is responsible for protection costs for railroad employees in Amtrak passenger service who occupy positions which were added after May 1, 1971.

Approximately 3,500 Amtrak employees enjoy the protective benefits provided by Title V of the Regional Rail Reorganization Act of 1973, as amended. 45 U.S.C. §§ 771 et seq. (1976). A "protected employee" within the meaning of Title V is entitled to benefits substantially the same as those provided by Appendix C–2, with the major exception that the duration of the protective allowance may be much greater. A protected employee is entitled to protection for a period equal to the length of his railroad service as of January 2, 1974, the effective date of that Act. Employees with at least five years of service on that date are protected until they reach 65 years of age. Benefits paid by Amtrak pursuant to Title V are to be reimbursed from a special appropriation administered by the Railroad Retirement Board; however, amounts appropriated for that purpose have been depleted much faster than anticipated, and at present Amtrak is paying for the benefits required by Title V from its operating funds.

II. CALCULATING THE FINANCIAL IMPACT OF ELIMINATING ALL OPERATIONS OUTSIDE THE NEC

Our calculation of the cost of labor protection in the event Amtrak's basic system were reduced to the Northeast Corridor depends upon several assumptions. We estimate that:

1. 40 percent of Amtrak's non-NECIP positions would be retained: the remaining 60 percent would be abolished.

2. A proportionate number of man-years of employment in Amtrak's operating budget would be affected by the discontinuance of train service: 14,700.

3. The average annual labor cost for each position in FY 1982 will be $27,000 (including salary and fringe benefits).

To arrive at a final figure, we must make a fourth assumption concerning the number of affected employees who will claim protection and the amount they will claim. We assume:

4. 50 percent of our maximum possible obligation will be paid to protected employees. This assumption is based on the following variable factors.

(a) Longevity—Some employees would have less than a full year's service, and thus would be paid a reduced amount in the first year. Normally approximately 15 percent of Amtrak's employees have less than one year of service. However, the current freeze on hiring has reduced the number of new or short-term employees.

(b) Reemployment—Employment with Amtrak would not be available, but some employees would obtain outside employment, which would eliminate or reduce labor protection costs. However, the employment market for railroad employees is limited, particularly in today's job market. Moreover, in view of the wage and benefit guarantee there is no financial incentive for an employee to accept alternative employment, and it is assumed that only a few will do so.

(c) Retirements and Deaths—Few retirements should be anticipated where employees have labor protection available; they would either wait until the benefits are exhausted or accept a lump sum severance payment. The number of employee deaths is likely to be negligible.

(d) Labor Protection Costs Paid from Another Source—Some affected employees are covered by Title V; assuming additional money is appropriated for Title V, these costs would not be borne directly by Amtrak. Of the railroad employees covered by C–1, protection for some must be paid by the railroads. On the assumption that Amtrak will not have to bear these costs our labor protection exposure is reduced by that amount.

(e) Severance Pay—Employees who expect reemployment or retirement in the first year would elect the lump-sum settlement, which normally would increase cost in the first year for each such employee.

We believe this 50 percent assumption is reasonable and possibly conservative. This assumption yields a total cost to Amtrak in FY 1982 of $199 million. If we assume that the total percentage claimed is 80 percent, the figure rises to $317 million.

It should be noted that these calculations are for the first year's costs only; subsequent years would be reduced by termination of protective periods, new employment, or deaths, and increased by general and COLA increases.[1]

[1] A COLA increase of $.32/hr. was implemented effective January 1, 1981. The unions are now seeking additional increases, effective April 1, 1981. On that same date the cost of fringe benefits will increase by 4 percent for agreement-covered employees and 7 percent for non-agreement employees.

COMPARISON OF ALTERNATIVE BUDGETS

Implications of budget proposal	Administration proposal operating and capital, $613 million	AMTRAK proposal operating and capital, $853 million
Revenue cost, 1982	37 percent	50 percent.
Percent of total operating costs absorbed by fixed costs	72 percent	28 percent.
Number of passenger miles provided	1.2 billion	5 billion.
Number of passenger miles per Federal operating dollars	1.9	5.9 (3 times better).
Implications	System reduced to NEC; 14,400 AMTRAK railroad jobs lost; 284 superliners unusable; continues obligation to make annual $82+ million annual interest payment on capital, much of it no longer usable.	Assumes all route cuts proposed in AMTRAK fiscal year 1982 budget justification (e.g., drop Shenandoah, Cardinal, 3 NEC frequencies; assume no commuter trains; restructure Inter-American). Requires operating and capital savings of $117 million from fiscal year 1982 justification level of $970 (savings result from higher food and beverage prices, reduced manning, selected fare hike, labor savings, operational and equipment utilization changes, private finance of NEC communications system, among others).
Requirements for implementation of budget plan	New authorization to permit elimination of all trains outside NEC quickly and without legal challenge.	Retire debt through stock transfer, lien for Federal Government; relief from selected State and local taxes; repeal of 504(f): Prior commitment to provide supplemental for portion of train and engine crew costs to extend full net savings not achieved in fiscal year 1982.

COMMITTEE ON SMALL BUSINESS

Mr. HAYAKAWA. Mr. President, I am pleased to cosponsor the Senate resolution introduced on March 25 to change the status of the Senate Committee on Small Business to that of a standing committee.

As the committee chairman has stated, it is a misnomer to classify this committee as "select" when it is a permanent committee with all of the authority of a standing committee of the Senate. Since its creation in 1950, the committee has had a continuing, permanent character and has been treated as a standing committee. In 1977, Senate Resolution 104 granted the committee legislative authority and its legislative responsibility is that of a standing committee: To consider all proposed legislation and other matters relating to the Small Business Administration.

Mr. President, the national attention and emphasis on the economic problems of small business have never been greater, and the small- and medium-size, independent business men and women face a serious challenge just to survive in this inflationary period. As a result of the publicity spotlight that has been put on small business in recent months, I believe that most of us realize that while small business needs certain assistance and tax relief from the Government, the Nation needs small business and its contributions to the economic revival of our country.

The Senate Small Business Committee has pioneered in developing and assembling small business vital statistics, and I would like to include several of the more essential ones to be part of the record:

More than 15 million enterprises file tax returns, and 97 percent of them are "small businesses."

These firms sustain about 55 percent of existing nonfarm jobs.

They account for 48 percent of business output and 43 percent of the GNP.

Ninety-six percent of new jobs (1967–76) were generated by other than Fortune 1,000 companies.

Fifty-two percent of jobs came from under-20-employee independent firms.

Small businesses created one-half of all industrial innovations which, in turn, brought about striking advances in jobs, exports, and taxes.

The committee has conducted numerous hearings to bring out the contributions small business makes to our country and its members have developed meaningful legislation that will help small business survive. I am sure that the members plan to continue this program and, in addition, to work with the Small Business Administration to make sure that its programs and services to small business are utilized in the most cost effective and useful manner. This is an important responsibility which we

undertake willingly, and I agree with my colleagues who cosponsored this resolution that the committee should be a full standing committee of the U.S. Senate.

Thank you, Mr. President.

MRS. SOUTH CAROLINA, CINDY L. GOSSETT

Mr. THURMOND. Mr. President, it is cause for concern to many Americans that the family unit has been under tremendous assault and pressure in recent years. It is refreshing, therefore, to take note of a devoted housewife who represents all that is good with regard to the family.

Mrs. Cindy Lawless Gossett of Aiken, S.C., was recently named Mrs. South Carolina after statewide competition and will represent the Palmetto State in the Mrs. America pageant at Las Vegas on April 3.

The 24-year-old bride of 2 years, who is married to Michael Gossett, is active in career, civic, and educational pursuits.

Mr. President, in order for others to reflect on Mrs. Gossett's refreshing views on the home, family, and a woman's role in society, I would like to share with my colleagues a March 22 profile done on her in the Columbia, S.C., State magazine by respected journalist Wallace C. Hitchcock.

I ask unanimous consent that this article appear in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the State magazine, Columbia, S.C., Mar. 22, 1981]

"MRS. SOUTH CAROLINA"

(By Wallace C. Hitchcock)

AIKEN.—Cindy Gossett likes to refer to herself as a contemporary married woman who successfully combines career and marriage.

Others apparently agree, because last month she was named Mrs. South Carolina 1981 in statewide competition at Myrtle Beach and will represent the Palmetto State in the Mrs. America pageant at Las Vegas on April 3.

Mrs. Gossett, 24, a blue-eyed slender blonde, said she was encouraged to enter the Mrs. South Carolina pageant by her husband, Mike, a magistrate's constable and owner of Mike's Gym in Aiken.

"Mike has always been behind me and if he hadn't wanted me to enter the pageant I wouldn't have done it," explained Mrs. Gossett, a bride of two years.

Mike Gossett, 27, is probably his wife's biggest booster. He tutors her in weight training at the gym to keep her body toned and shaped and provides her with encouragement as she prepares for the trip to Las Vegas.

"When Cindy won the Mrs. South Carolina title I was probably the happiest person alive, maybe more happy than she was," said Gossett.

"And if she happens to win the Mrs. America pageant I know she'd be able to represent the married women of America and America would be proud of her," he added.

Mrs. Gossett, the daughter of Mr. and Mrs. John Lawless, has lived in Aiken since 1973, when her father retired here after a 22-year career in the U.S. Air Force.

She was a senior at Aiken High School that year and the following year entered the University of South Carolina-Aiken where she was voted Miss USC-A, Student of the Year, head cheerleader and an officer in the Student Government Association. She was also named Youth of the Year in 1978 by the Aiken Chamber of Commerce.

Mrs. Gossett was awarded an associate degree in criminal justice in 1976 and continued her studies at USC-A to earn a bachelor's degree in sociology with a minor in psychology in 1978.

Right after graduation she went to work as a probation counselor with the S.C. Department of Juvenile Placement and Aftercare, and is in her third year of counseling juvenile criminal offenders. She is presently responsible for from 40 to 60 juveniles.

"It sounds corny, but I've always felt that I have been blessed with super parents with high ideals and I saw so many people who didn't have this and I wanted to be able to help others," she said, explaining why she chose a career as a juvenile probation counselor.

"I have always felt that kids who got in trouble had more strikes against them than most and I felt a need to work with them," she added.

Mrs. Gossett said she believes the increasing juvenile problems are caused by a breakdown of the family unit, that many children are not getting the guidance they need from their parents.

"Kids need the love and security of a home. They need to be able to talk to their parents, not as they would talk to brothers and sisters, but as parents," she explained.

"It's frustrating and makes no sense to see kids with such potential throw away what they don't realize they have. You can't pound change into these kids, they've got to change," she added.

Mrs. Gossett said she is a Christian, but does not force her religious beliefs on the juveniles she counsels. "I would hope that I wouldn't have to tell someone that I'm a Christian, that they would see it in my life," she explained.

Mrs. Gossett teaches Sunday School at Memorial Baptist Church, belongs to the Baptist Young Women's Club, helps with church youth programs, and also takes part in as many civic functions as her time permits.

What is Mrs. Gossett's idea of the ideal Mrs. America?

"She's someone who can or cannot, depending on her desires, have a career and a family at the same time, she is involved in the community, church and civic activities, is aware of what is going on around her and in the world, and at the same time provides love and security for her family," she answered.

What about the critics who say a woman's place is in the home?

"First of all, I don't think there's anything wrong with a woman staying home and not working. It's a matter of choice, but if a woman does have a job, the time she spends with her family should be characterized by quality, not quantity," she explained.

And what is a home?

"It's a place where someone can find love, security and caring, caring enough to discipline a child when he needs it, caring enough to forgive a husband's faults," she said.

"A home is a love commitment, and it's sharing 100 to 200 percent, not just 50–50," she added.

Mrs. Gossett will carry these philosophies to Las Vegas and share them with the judges of the Mrs. America pageant, who will also observe her in swimsuit and evening gown.

She plans to leave South Carolina on Friday for a week of rehearsals and preliminary judging prior to the pageant on April 3, at which Bert Parks will be master of ceremonies and singer Vickie Carr will be the guest host.

Sponsors of the Mrs. South Carolina pageant will pay Mrs. Gossett's transportation to Las Vegas and pick up the tab for motel and meals, but the rest of the cost, more than $1,000, will have to come out of her paycheck (and her husband's).

"I don't know how we'll manage, but somehow we'll do it," she said.

Some people are helping already, she said, including Sen. Strom Thurmond, R-S.C., who is supplying a South Carolina flag as a gift for the mayor of Las Vegas; and Rep. Sterling Anderson, D-Spartanburg, (Mike's cousin) is seeing what he can do to round up a state gift contestants are asked to bring to the pageant.

Also, she said, Sussy Brodie, who owns a woman's apparel and gift shop, is a "tremendous help" in getting together the large wardrobe the contestants are required to wear.

Mrs. Gossett has designed the state costume she will wear in the national pageant. She'll appear on stage as a yellow jasmine, the state flower, with silk flowers adorning an outfit similar is the ones worn by Las Vegas showgirls.

And she plans to tell the people in Las Vegas about her adopted state of South Carolina.

"After having been an Air Force brat and traveling all over the world, I find that the people in South Carolina are very warm and considerate, there's not a lot of hustle and bustle that you find in other places, and people have time to say hello on the street," she said.

Her most pressing problem, she said, is finding a way for husband Mike to make the trip to Las Vegas.

"They (the sponsors) won't pay Mike's way there, but we're going to work real hard to get him there at least for the preliminary and the final night," she said.

THE FTC COMES TO BREAKFAST

Mr. RIEGLE. Mr. President, in 1972 the Federal Trade Commission initiated a suit to break up the three major manufacturers of ready-to-eat breakfast cereals: Kellogg, General Mills, and General Foods.

In their complaint the FTC espoused a new "shared monopoly" theory of antitrust law. This new theory, as fashioned by the FTC, holds that Kellogg, General Mills, and General Foods did not have to conspire to fix prices, engage in collusion, or otherwise directly act to reduce competition in order to violate the antitrust laws. Instead, the theory asserts that a small number of firms may violate the law simply by virtue of possessing substantial market shares.

On March 10, 1981, I introduced legislation "to place a moratorium on decisions by the Federal Trade Commission in shared monopoly proceedings until Congress establishes the existence of the violation and defines its elements."

At issue is whether industry restructuring is an appropriate exercise for an independent administrative agency that combines prosecutorial and adjudicative functions and, more specifically, whether that authority is granted to the FTC, under section 5 of the Federal Trade Commission Act, based solely on a shared monopoly theory.

President Reagan stated during the campaign that "it was never intended that the FTC would have the authority

to order a company to divest its assets and thereby restructure an entire industry under section 5 of the Federal Trade Commission Act."

Similarly, former Attorney General Griffin Bell has testified before the Senate Subcommittee on Antitrust and Monopoly that—

[T]he subject of concentration is, perhaps, too important to be left to litigants and judges who are neither directly responsible to the people nor able to step back and view the subject on a broad public policy basis. It may well be that if significant action is to be taken, it most appropriately should come from the Congress and thus ultimately from the American people themselves.

I believe that before an American corporation is broken up by an independent administrative agency, Congress should have the opportunity to delineate the substantive scope of the violation and remedy.

The resolution the FTC is seeking in this case is the creation of five new cereal companies, three being taken from Kellogg and one each from General Mills and General Foods.

The cereal suit is the only case currently being brought under this "shared monopoly" theory, and the legislation I have introduced—S. 682—would affect no other existing litigation.

At this time cosponsors of S. 682 include Senators ABDNOR, ANDREWS, ARMSTRONG, BENTSEN, BURDICK, CRANSTON, D'AMATO, DECONCINI, DIXON, EXON, GRASSLEY, HAWKINS, HAYAKAWA, INOUYE, JOHNSTON, LAXALT, LEVIN, PRESSLER, PRYOR, SASSER, SYMMS, TOWER, WILLIAMS, and ZORINSKY.

On March 24 the Washington Star contained the following article by Tom Bethell entitled "The FTC Comes to Breakfast." I commend it to the attention of my colleagues and I ask unanimous consent to have the article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE FTC COMES TO BREAKFAST

On April 26, 1976, the Federal Trade Commission filed a complaint against the Kellogg Company, General Mills, General Foods, and Quaker Oats, charging them with having a "highly concentrated, noncompetitive market structure in the production and sale of ready-to-eat-cereal." In effect, the FTC claimed, although no one company has a monopoly on the $740 million-a-year industry, these four companies had managed to achieve a shared monopoly over it.

To correct the alleged monopoly, the FTC has proposed a draconian remedy. If nothing else, it demonstrates how much is at stake in the case. This was in any event made perfectly clear in 1976 by a former FTC staffer named Charles Mueller, who had helped launch the cereal case in 1969. "Should the courts side with the FTC," he said in Newsweek, "they would be declaring about one-third of the U.S. economy to be illegal."

If the courts do side with the FTC in this case, Kellogg will have to sever limbs from its own corporate body, splitting off three new companies; General Mills and General Foods will likewise have to dismember themselves. The five new companies must each have enough capacity to supply approximately six percent of the ready-to-eat-cereal market; and each would be assigned exclusive rights to manufacture and sell one or more brands already established in the marketplace.

A NAIVE REMEDY

Even if the companies involved have been engaged in a tacit conspiracy, this proposed "remedy" would strike many people as being both naive and arrogant. It makes the fundamental mistake of assuming that viable new companies can simply be ordered into existence; that we will all necessarily be better off when they do exist; and that the necessary efficiencies of scale, management, and productivity can be created by fiat. We see here the uncomfortably close resemblance between the bureaucratic and the totalitarian mind.

But let us look more closely at the FTC's charge of "shared monopoly." Edward F. Howrey, a counsel for General Mills, has said that "the FTC has created an entirely new offense that they call 'shared monopoly.'" Similarly, a Kellogg memo on the case claims that "the FTC's case is without legal precedent. . . . The idea of a 'shared monopoly,' aside from being self-contradictory, is completely unprecedented in the law."

The charge of "shared monopoly" is indeed not found in any statute. The history of antitrust strongly suggests that the charge of sharing a monopoly reflects the endless frustration that academics, officials, and lawyers have encountered in their search for a real monopoly. By 1968 a White House Task Force on Antitrust Policy was recommending the adoption of a Concentrated Industries Act, designed to fragment an industry in which "any four or fewer firms had an aggregate market share of 70 percent or more. . . ." No such act has been passed, but the FTC investigation of the cereal companies, whose combined market share satisfied this test, began the following year.

In bringing the complaint against the cereal companies, the FTC advanced the shared monopoly doctrine into the final stage—without any supporting statute. But, curiously enough, someone or some faction within the FTC seems to have "blinked" at the last minute. And so there was added to the complaint the FTC's charge that the cereal companies not merely had a certain combined market share, but had achieved it and maintained it by engaging in collusive, anticompetitive practices of a type that have been declared illegal in earlier antitrust cases.

WIDE RANGE OF CHOICES

A charge of monopolization really only makes sense with respect to a product which cannot be satisfactorily substituted for something else like it. A moment's thought shows that ready-to-eat breakfast cereal does not fall in this category. There are numerous other breakfast products available on the supermarket shelves; cereal that must be cooked, or to which hot water must be added; bacon and eggs; grits; liquid instant breakfast; instant breakfast bars; frozen waffles; muffins, pastries, etc. What was being "monopolized"? Not food, of course; not breakfast food either. No cereal, even. But ready-to-eat cereal; a small subset of the domain of breakfasts!

It is clear, too, that the public has not been switching away from ready-to-eat cereal in response to unconscionably high-priced Product 19 or Rice Krispies. In 1970, the year the FTC investigation began, 25 per cent of the country's 73 billion "potential breakfasts" involved the consumption of allegedly monopoly-priced ready-to-eat cereals. By 1975, this share would grow to 35 per cent. In short, the public has not been protecting itself against the alleged monopolists by the simple expedient of switching to non-monopolized alternatives. Oligopolistic corn flakes have remained more enticing than competitive muffins.

Of course, this argument is not likely to be persuasive to FTC lawyers. The FTC charges that the companies "were able to establish a procedure for changing list prices that enabled them to raise their prices regularly without fear that they would lose sales and market shares to one another." This procedure is termed by economists "collusive price leadership." The FTC makes no charge of an actual conspiracy to achieve this result. Moreover, the FTC did not even claim that there has been collusive price increases between individual, competing cereal brands. Only groups of products, arbitrarily selected from the competing companies, were said to be collusively priced. By analogy, one could say that all trees in the forest grow at different rates, but if an observer is allowed to make his own selection of individual trees, he could find one group that was growing, on average, at the same rate as another group, and then claim that there was "collusion" between the two.

ODD INTERPRETATIONS

Thus the charge of price leadership fails completely. But it is interesting to note that one of the rocks on which it founders is the discovery by the FTC that the proliferating brand names, box sizes, and packaging techniques made it extremely difficult for each company to figure out what its rivals were doing. Nevertheless, the FTC charges that "product proliferation" is an anti-competitive activity, constituting a "barrier to entry."

If companies want to enter into a tacit price conspiracy, they could best do this by homogenizing their product as much as possible. The cereal companies have instead done their best to differentiate them. It would be hard to imagine a more difficult way to maintain a tacit conspiracy. It is the restraint of trade that violates the Sherman anti-trust act. But the proliferation of it has now specifically been attacked by the FTC.

"If the FTC is not standing anti-trust law on its head I simply do not understand what the law says," University of Chicago professor Yale Brozen has written.

MESSAGE FROM THE PRESIDENT

A message from the President of the United States was communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session, the Presiding Officer laid before the Senate a message from the President of the United States submitting a sundry nomination.

Mr. BAKER. Mr. President, I ask unanimous consent that the nomination of Robert L. Brown, of Virginia, to be Inspector General of the Department of State and the Foreign Service be sequentially referred to the Committee on Foreign Relations and if and when reported from Foreign Relations it then be referred to the Committee on Governmental Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nomination received today is printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 5:56 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 509. An act to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk will be adjusted semiannually.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S.J. Res. 20. Joint resolution to designate the month of April 1981 as "Gospel Music Month".

By Mr THURMOND, from the Committee on the Judiciary, with amendments to the preamble:

S.J. Res. 40. Joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era".

By Mr. PERCY, from the Committee on Foreign Relations:

Special Report entitled "Legislative Activities Report of the Committee on Foreign Relations, United States Senate, Ninety-sixth Congress" (Rept. No. 97-29).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GOLDWATER, from the Committee on Armed Services:

Mr. GOLDWATER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Lt. Gen. Charles Robert Myer (age 56), Army of the United States (major general, USA), to be placed on the retired list in the grade of lieutenant general; Maj. Gen. William Ivan Rolya, Army of the United States, to be lieutenant general; Rear Adm. Raymond N. Winkel, U.S. Navy, for permanent promotion to the grade of rear admiral; Brig. Gen. John B. Hirt, Marine Corps Reserve, for temporary appointment to the grade of major general; in the Marine Corps Reserve, there are two appointments to the grade of brigadier general (Constantine Sangalis and William H. Gossell); Lt. Gen. Evan W. Rosencrans, U.S. Air Force (age 54), for appointment to the grade of lieutenant general on the retired list; and Col. Wess P. Chambers, Air National Guard, for appointment in the Reserve of the Air Force to the grade of brigadier general. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. In addition, in the Regular Army and Army of the United States, there are 596 appointments/reappointments to the grade of lieutenant colonel and below (list beginning with Howard R. Bixby); in the Regular Army, there are 1,282 appointments to the grade of second lieutenant (list beginning with Steven B. Acenbrak); in the Army of the United States and Reserve of the Army, there are 1,036 appointments/promotions to the grade of colonel and lieutenant colonel (list beginning with Phillip G. Abbott); in the U.S. Navy, there are 2,843 temporary/permanent promotions to the grade of lieutenant (list beginning with Phillip J. Aarons), 482 temporary/permanent promotions to the grade of lieutenant (list beginning with Keith T. Adams), and, 16 temporary/permanent appointments/promotions to the grade of lieutenant commander and below (list beginning with James E. Halwachs); in the Navy and Reserve of the Navy, there are 208 temporary/permanent appointments to the grade of captain and below (list beginning with Thomas E. Digan); in the Reserve of the Navy, there are 371 temporary/permanent promotions to the grade of captain and below (list beginning with Rudolph Abel, Jr.); Bonnie H. Bass, Marine Corps, for temporary appointment to the grade of major; in the Air Force and Reserve of the Air Force, there are 176 appointments/reappointments/promotions to the grade of colonel and below (list beginning with Tommie G. Church); and, in the Reserve of the Air Force, there are 30 Air National Guard officers for promotion to the grade of lieutenant colonel (list beginning with John W. Baxter). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of February 24, March 3, and March 17, 1981 at the end of the Senate proceedings.)

By Mr. PERCY, from the Committee on Foreign Relations:

Charles M. Lichenstein, of the District of Columbia, to be the Alternate Representative of the United States of America for Special Political Affairs in the United Nations, with the rank of Ambassador.

(The above nomination, reported from the Committee on Foreign Relations with the recommendation that it be confirmed subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Charles M. Lichenstein.

Post: Alternate Representative for Special Political Affairs (U.S. Mission to the U.N.). Rank of Ambassador.

Nominated: February 19, 1981.

Contributions, amount, date, donee.

1. Self, 2 $100 donations (1978), 1 at $100 (1980) Tom Pauken for Congress (Dallas, Tex.).

2. Spouse, none.

3. Children and spouses names, none.

4. Parents names, deceased.

5. Grandparents names, deceased.

6. Brothers and spouses names, Mr. Sherman E. Novak and wife, Mary M. Novak, none.

7. Sisters and spouses names: Miss Jean Novak, none. Mrs. Maurice A. Natanson and husband, none (Lois J.).

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Vice Admiral James S. Gracy, U.S. Coast Guard, to be the commander, U.S. Coast Guard Atlantic area with the grade of vice admiral while so serving.

Rear Admiral James P. Stewart, U.S. Coast Guard, to be the commander, U.S. Coast Guard Pacific area with the grade of vice admiral while so serving.

The following officers of the U.S. Coast Guard for promotion to the grade of rear admiral:

Capt. Robert S. Lucas.
Capt. Kenneth G. Wiman.
Capt. Edwin H. Daniels.
Capt. Clyde T. Lusk.

(The above nominations reported from the Committee on Commerce, Science, and Transportation with the recommendation that they be approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of tne Senate.)

Mr. PACKWOOD. Mr. President, from the Committee on Commerce, Science, and Transportation, I also report favorably sundry lists of nominations in the Coast Guard which have previously appeared in the CONGRESSIONAL RECORD and, to save the expense of reprinting them, ask unanimous consent that they may lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of January 5, January 19, February 24, March 5, and March 17, 1981, at the end of the Senate proceedings.)

By Mr. TOWER, from the Committee on Armed Services:

Fred Charles Ikle, of Maryland, to be Under Secretary of Defense for Policy.

William H. Taft IV, of Virginia, to be General Counsel of the Department of Defense.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. DURENBERGER (for himself and Mr. MITCHELL):

S. 805. A bill to amend the Internal Revenue Code of 1954 relating to certain dividends received by life insurance companies; to the Committee on Finance.

By Mr. PROXMIRE:

S. 806. A bill for the relief of Elmer L. Bridson; to the Committee on Armed Services.

By Mr. ROTH (for himself, Mr. DANFORTH, Mr. DURENBERGER, Mr. COHEN, and Mr. CHILES):

S. 807. A bill to reform the laws relating to the provision of Federal assistance in order to simplify and coordinate the management of Federal assistance programs and requirements, provide assistance recipients with greater flexibility, and minimize the administrative burden and adverse economic impact of such programs and requirements; to the Committee on Governmental Affairs.

By Mr. MATHIAS (by request):

S. 808. A bill to amend title 5, United States Code, to promote public safety by encouraging the employment of highly qual-

ified air traffic controllers by establishing a salary classification system providing compensation commensurate with responsibility, by establishing a reasonable maximum number of weekly work hours, and by establishing a special retirement plan, and for other purposes; to the Committee on Governmental Affairs.

By Mr. STAFFORD (for himself and Mr. ABDNOR) (by request):

S. 809. A bill to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction on specified circumstances; to the Committee on Environment and Public Works.

S. 810. A bill to provide for the recovery of capital and operation and maintenance costs assignable to commercial waterway transportation for certain U.S. Army Corps of Engineers inland waterway projects; to the Committee on Environment and Public Works.

By Mr. DOLE (for himself, Mr. NICKLES, Mr. JOHNSTON, and Mr. BENTSEN):

S. 811. A bill to amend the Powerplant and Industrial Fuel Use Act of 1978 to permit local distribution companies to continue natural gas service to residential customers for outdoor lighting fixtures for which natural gas was provided on the date of enactment of such act, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BUMPERS:

S. 812. A bill for the relief of Raul Arriaza, his wife, Maria Marguart Schubert Arriaza, and their children, Andres Arriaza and Daniel Aivouich Arriaza; to the Committee on the Judiciary.

By Mr. METZENBAUM:

S. 813. A bill to modify the project for Ashtabula Harbor, Ohio, to authorize the enlargement of a turning basin; to the Committee on Environment and Public Works.

By Mr. NUNN (for himself, Mr. CHILES, Mr. RUDMAN, and Mr. BOREN):

S. 814. A bill to improve the administration of criminal justice with respect to organized crime and the use of violence; to the Committee on the Judiciary.

By Mr. TOWER (for himself and Mr. STENNIS) (by request):

S. 815. A bill to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, for research, development, test, and evaluation, and for operation and maintenance for the Armed Forces, to prescribe the authorized personnel strength for each active duty component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

By Mr. THURMOND (for himself, Mr. DECONCINI, Mr. DENTON, Mr. DODD, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GRASSLEY, Mr. HATCH, Mr. HEFLIN, Mr. HELMS, Mr. INOUYE, Mr. LAXALT, Mr. LUGAR, Mr. MATHIAS, Mr. MOYNIHAN, Mr. NUNN, Mr. SIMPSON, Mr. TSONGAS, Mr. DANFORTH, Mr. SPECTER, and Mr. MELCHER):

S. 816. A bill to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws, and for other purposes; to the Committee on the Judiciary.

By Mr. HATCH (for himself and Mr. DECONCINI):

S. 817. A bill to provide procedures for calling Federal constitutional conventions under article V for the purpose of proposing amendments to the U.S. Constitution; to the Committee on the Judiciary.

By Mr. HATCH:

S. 818. A bill to amend title 18 to limit the insanity defense; to the Committee on the Judiciary.

By Mr. DURENBERGER:

S.J. Res. 56. Joint resolution to rename the Big Stone National Wildlife Refuge to be known as the Lem Kaercher National Wildlife Refuge; to the Committee on Environment and Public Works.

By Mr. SYMMS:

S.J. Res. 57. Joint resolution to provide for the designation of February 7 through 13, 198 , as "National Scleroderma Week"; to the Committee on the Judiciary.

STATEMENTS OF INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DURENBERGER (for himself and Mr. MITCHELL):

S. 805. A bill to amend the Internal Revenue Code of 1954 relating to certain dividends received by life insurance companies; to the Committee on Finance.

LEGISLATION RELATING TO CERTAIN DIVISIONS RECEIVED BY LIFE INSURANCE COMPANIES

Mr. DURENBERGER. Mr. President, today I am introducing a bill on behalf of myself and Senator MITCHELL that will permit life insurance companies to treat dividends paid by controlled subsidiaries in the same manner as such dividends are treated by other types of business corporations. Under a long-standing rule of tax law, dividends paid to corporations by controlled subsidiaries are received tax free because the money has already been taxed in the subsidiary, and money held in corporate hands is subject to only one level of tax. If this were not the rule, affiliated businesses within a single corporate structure would pay only one level of tax while affiliated businesses operating as subsidiaries would pay tax when income was earned as well as when dividends were paid to their parent corporations. This would be contrary to established principles of tax neutrality between the two types of corporate structures.

Because of a peculiarity in the rules for taxation of life insurance companies, these companies are taxed on a portion of dividends paid by controlled subsidiaries. This is an unintended result of a rule that was put into the law in an era when life insurance companies did not typically have subsidiaries. Certain life insurance companies can avoid the impact of the rule by structuring their ownership such that they themselves are subsidiaries of holding companies which also own their affiliated nonlife insurance businesses. Thus, dividends from these businesses pass directly to the holding companies and are not taxed in the life insurance companies. This approach is not available, however, for mutual companies, which because of their nature cannot be owned by holding companies. Nor is it available without great cost for stock companies for their existing subsidiaries.

These mutual companies are unfairly penalized with respect to income earned by their affiliated businesses. They have no choice but to operate their businesses as subsidiaries because they cannot avail themselves of the holding company format and State regulatory laws do not permit their affiliated businesses to be operated as part of the life insurance companies themselves. The bill that Senator MITCHELL and I are introducing today would correct this inequity and restore the neutrality that Congress intended for the taxation of earnings of businesses affiliated with life insurance companies whether held directly, as subsidiaries, or through holding companies.

I hope that my colleagues will act quickly on this important piece of legislation. The revenue effect is minimal but the equity is important.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 805

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the second sentence of paragraph (1) of subsection (a) of section 804 of the Internal Revenue Code of 1954 (relating to exclusion of policyholders' share of investment yield) is amended to read as follows: "For purposes of the preceding sentence, the policyholders' share of any item shall be that percentage obtained by dividing the policy and other contract liability requirements by the sum of the investment yield and any dividends excluded from gross investment income under subsection (b); except that if the policy and other contract liability requirements exceed the sum of the investment yield and any dividends excluded from gross income under subsection (b), then the policyholders' share of any item shall be 100 percent."

(b) Subsection (b) of section 804 of the Internal Revenue Code of 1954 (relating to gross investment income) is amended by adding at the end thereof the following new sentence: "For purposes of this subsection, dividends shall not include qualifying dividends (as defined in section 243(b)) received by an includible corporation within the meaning of section 504(a), as modified by section 243(b)(5)."

(c) Subparagraph (a) of paragraph (2) of subsection (b) of section 805 of the Internal Revenue Code of 1954 (relating to current earnings rate) is amended to read as follows:

"(A) the sum of the taxpayer's investment yield and any dividends excluded from gross investment income under section 804(b) for the taxable year, by".

(d) The second sentence of paragraph (1) of subsection (a) of section 809 of the Internal Revenue Code of 1954 (relating to amount) is amended to read as follows: "For purposes of the preceding sentence, the share of any item set aside for policyholders shall be that percentage obtained by dividing the required interest by the sum of the investment yield and any dividends excluded from gross investment income under section 804(b), except that if the required interest exceeds the sum of the investment yield and any dividends excluded from gross investment income under section 804(b), then the share of any item set aside for policyholders shall be 100 percent."

(e) The amendments made by this Act shall apply with respect to dividends received in taxable years beginning after December 31, 1980.

● Mr. MITCHELL. Mr. President, I am pleased to sponsor legislation to eliminate an unintended inequity which has

developed in our tax laws because of changing economic conditions.

The Congress has long recognized the principle, in corporate taxation, that the income of a controlled subsidiary company—of which at least 80 percent is owned by the parent corporation—should, for tax purposes, be treated as the income of the parent company. That is, the parent corporation excludes from its taxable income dividends received from an 80-percent owned subsidiary, which has already paid taxes on its earnings. This principle guides the tax treatment of all corporations and their subsidiaries with one exception: That of the mutual life insurance companies.

The 1959 Life Insurance Company Income Tax Act requires that investment income, including dividends from wholly owned subsidiaries, must be prorated between the income attributable to a life company for tax purposes and the income attributable to the policyholders. Thus, life companies are denied the full benefit of the dividends-received deduction. This has the effect of taxing dividends earned by the subsidiaries of life insurance companies twice.

When Congress enacted the 1959 Tax Act, its intent was to observe strict neutrality between mutual life insurers—those owned by their policyholders. and stock companies—owned by stockholders. Under the conditions that existed in 1959, the act accomplished that neutrality.

At that time, this sector was predominantly involved in life insurance activities only, and had not diversified to any significant degree. Consequently, dividends from subsidiaries were not an important source of income for life companies. In the last 30 years, however, most life companies have diversified into other forms of insurance coverage, increasing consumers' choice of insurers, and maintaining a healthy competition in the insurance sector.

But the diversification that has occurred in the industry over the past 30 years has had the unintended result of imposing a heavier tax burden on mutual life companies than on stock life companies or, indeed, any other kind of corporation. This is because State regulations have generally required nonlife operations to be separate from life insurance operations. Mutual companies have no alternative to setting up subsidiaries. Dividend payments from thees subsidiaries are subject to double taxation at the corporate level. Stock companies can avoid this situation by setting up holding companies to handle their nonlife operations.

This double taxation of dividends has had the result that dividend earnings are now substantially retained by subsidiaries, because payment to the parent company entails such a heavy tax penalty. The net result of this outcome is that the policyholders suffer, because insurance protection costs more than it need cost; and the desirable public policy goal of directly owned subsidiaries is in danger of being subverted by the preponderance of holding-company incorporations, whose formation is largely dictated by tax consequences.

This bill would correct these problems by excluding from the proration rule dividends received by life insurance companies from their 80-percent-owned subsidiaries. The bill is consistent with the principles of the 1959 act and is in the public interest. It will have a negligible effect on revenues.●

By Mr. ROTH (for himself, Mr. DANFORTH, Mr. DURENBERGER, Mr. COHEN, and Mr. CHILES):

S. 807. A bill to facilitate the consolidation of Federal assistance programs; to extend the law relating to intergovernmental cooperation to permit greater flexibility in the use of certain Federal assistance funds; to improve the audit process for Federal assistance programs, to simplify and standardize policy requirements generally applied to Federal assistance programs; to expedite the processing of applications for Federal assistance involving more than one grant; to amend the law relating to intergovernment cooperation; and for other purposes; to the Committee on Governmental Affairs.

FEDERAL ASSISTANCE IMPROVEMENT ACT

Mr. ROTH. Mr. President, I am introducing legislation today with Senators DANFORTH, DURENBERGER, COHEN, and CHILES to enhance the strength of State and local governments in our Federal system by improving the structure and process of our excessively complex Federal assistance system.

The Federal Assistance Improvement Act (FAIA) was drafted in cooperation with the major public interest groups and representatives from the Federal Government. The proposal has been the subject of hearings in Congress since 1978, and in December of last year it passed the Senate. Because of the lateness in the 96th Congress when this occurred, however, the proposal did not achieve passage in the House of Representatives. I have every hope and confidence, however, that the bill will be passed again by the Senate quickly, and that it will receive prompt and favorable consideration in the House as well.

The concepts contained in FAIA are not new, for the most part. They embrace a range of widely accepted, commonsense steps designed to enhance the efficiency of Federal assistance administration, and to improve the quality of the services delivered through these programs. The need for these reforms in the grant system has been apparent for some years and, as you know, I have stressed these issues since I came to Washington in 1968. The importance of these improvements is underscored now, however, by the impending budget cutbacks. These funding reductions, though necessary from an economic standpoint, may impose real hardships on some communities. The reforms encompassed by FAIA will do much to cut the onerous strings that bind Federal assistance programs, and in so doing cushion the impact of these necessary budget reductions.

In this statement today I would like to explain why these changes are so badly needed and describe briefly the approach taken to grant reform in this legislation.

Mr. President, in the last 20 years we have witnessed massive growth in the Federal aid system. More dollars go to more States and local communities than ever before in our history. These funds grew tenfold from nearly $8 billion to over $80 billion in the period 1960 to 1978. The process for distributing these funds is unnecessarily complicated by the growing number of aid programs. Today Federal assistance is distributed through a complex webb of over 500 categorical grant programs, each with its own application, management, and monitoring component. The inefficiency created by this system is a great source of frustration for grant administrators and even more importantly, its costly administrative overhead robs program dollars from the intended recipients. While these figures are difficult to pin down many experts believe that about 20 percent of program dollars must be spent on administration, and in some instances the cost of doing business attributable to excessive policy and paperwork requirements is even greater.

Poor governmental performance is linked to a second, even more detrimental effect of this Federal aid system growth. Every penny of Federal assistance that flows to State and local governments carries with it rules, requirements, and regulations. These Federal aid strings have led to the usurpation of State and local policy, allocational, and administrative authority by the Federal Government. As the recent work of the Advisory Commission on Intergovernmental Relations has pointed out, the Federal Government today is heavily involved in many activities which traditionally have been the responsibility of State and local governments. Such overlap has brought intrusion and policy dictation to these subnational governments on the part of the Federal Government. Additionally, because all governments supposedly share responsibility for many programs, in the end no one is responsible. The sharing of authority leads to endless buckpassing and finally to the erosion of accountability.

The private citizen feels powerless in this situation because he or she is unable to pin down authority and make Government more responsive. Instead, Government continues to expand and, curiously, with more Government we have less and less self-government.

The bill contains six titles designed to realize several reform goals. First it encourages and expedites the process for consolidating narrowly focused categorical grants. This authority, if exercised, will provide the flexibility for recipients needed to target assistance funds to their specific needs. The harshness of the budget reductions as well as burdensome administrative requirements can be reduced through the use of this mechanism.

The second major aim of the bill is to make better sense of the complex and costly system for auditing Federal assistance programs. This title encourages use of the single Federal audit concept which entails the unified audit of a recipient jurisdiction, rather than the fragmented audit of each program that flows through that jurisdiction. The title also calls for

greater acceptance by Federal agencies of State and local audits which meet certain professional standards.

Third, the bill calls for the simplification and standardization of national policy requirements that are generally applied to assistance programs. The more than 60 such requirements including citizen participation, environmental quality, and planning standards, are presently administered in a fragmented and sometimes conflicting manner. This title would eliminate much of this confusion through the standardized approach. Additionally, provisions for the revision, or temporary waiver of requirements under certain circumstances and for certification of recipient compliance when a certain level of performance is attained would reduce the costs of these requirements.

Fourth, FAIA seeks to improve the joint funding simplification process which administratively groups programs when they are used for the same project purpose. The title requires greater Federal agency participation in the process and simplifies the procedure for drawing down funds for the jointly funded project.

Fifth, the bill will permit State and local governments to shift a percentage of their Federal assistance funds among programs in the same functional area. This may occur upon acceptance by the administrator of the Federal agency involved of the plan explaining the use of the Federal funds. This flexibility in the use of Federal assistance within the single funding area will enhance recipient discretion and provide an important buffer for the impact of Federal aid cuts.

Last, the bill amends the Intergovernmental Cooperation Act of 1968 to provide a standard maintenance of effort provision, to preclude Federal level inhibition of State appropriation of Federal assistance, and to strengthen the act's single State agency provisions.

As can readily be seen this bill addresses very directly the fundamental problems in our contemporary aid system. It provides several new management tools for those who must deal with a system which is increasingly unmanageable. Beyond this, particularly through the consolidation title, the bill will encourage the structural changes which will reassert some control over the grant system.

Mr. President, this bill will not cure all of the ills of our current aid system nor will it completely correct the existing imbalance in our Federal system. But this does contain a parcel of highly significant steps that must be taken promptly. These are logical, rational reforms that are urgently needed to meet short-term needs, and to address the longer range problems of a system that has gone askew. I ask unanimous consent that the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 807

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Assistance Improvement Act of 1981."

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act—

(1) to encourage the consolidation of Federal programs, when such consolidation is consistent with applicable statutes and would further the goals and objectives of the grant programs consolidated;

(2) to provide for the more efficient use of Federal, State and local government audit resources;

(3) to streamline and simplify generally applicable national policy requirements attached to Federal assistance programs;

(4) to enable State and local governments and nonprofit organizations to adapt programs for Federal assistance to the particular needs of beneficiaries and the operating practices of recipients by drawing upon appropriations available from more than one Federal program;

(5) to enable recipients to more effectively target resources toward areas of significant local need by shifting a portion of assistance funds among programs in the same functional areas; and

(6) to implement several other improvements in the administration of Federal assistance.

TITLE I—CONSOLIDATION OF FEDERAL ASSISTANCE PROGRAMS

SEC. 101. (a) Title 5, United States Code, is amended by inserting after chapter 9 the following new chapter:

Chapter 10—FEDERAL ASSISTANCE PROGRAM CONSOLIDATION

Sec.

"1001. Definitions.
"1002. Examination of Federal assistance programs required.
"1003. Federal assistance program consolidation plans.
"1004. Limitation on powers.
"1005. Method of taking effect.
"1006. Effect on other laws and regulations.

"1001. Definitions.

"For purposes of this chapter—

"(1) the term 'agency' means an executive agency as defined in section 105 of title 5, United States Code;

"(2) the term 'consolidation plan' means a Federal assistance program consolidation plan proposed under section 1003 of this title;

"(3) the term 'Federal assistance' means any assistance provided by an agency in the form of grants, loans, loan guarantees, property, cooperative agreements or technical assistance to State or local governments or other recipients, except that such term does not include cash assistance to individuals, contracts for the procurement of goods and services for the United States, subsidies, or insurances;

"(4) the term 'functionally related programs' refers to those programs which fall under a single functional category as set forth in the Budget of the United States Government transmitted pursuant to Section 201(1) of the Budget and Accounting Act of 1921; and

"(5) the term 'resolution' means a joint resolution of the Senate and the House of Representatives, the matter after the resolving clause of which is as follows:

That the Congress of the United States approves the consolidation plan numbered ——, transmitted by the President on ——, 19——, including such changes as may have been subsequently proposed by the President in accordance with section 1003(e) of title 5, United States Code: the first blank space therein being filled with the number of the plan and the second blank space therein being filled with the date on which the plan was transmitted to the Congress.

"1002. Examination of Federal assistance programs required

"Prior to the beginning of each regular session of Congress, the President shall examine the various Federal assistance programs established by law in order to determine if consolidation of any such programs is necessary or desirable to accomplish one or more of the following purposes:

"(1) facilitate the adaptation of Federal assistance programs to the particular needs of beneficiaries and the operating practices of recipients in a manner consistent with congressional purposes;

"(2) promote better administration, coordination, and planning of such programs;

"(3) eliminate program overlap and duplication;

"(4) minimize administrative burdens and eliminate adverse economic impacts;

"(5) promote economy and efficiency to the fullest extent consistent with the achievement of programs goals; and

"(6) maximize effectiveness.

"1003. Federal assistance program consolidation plans

"(a) If the President, after making the examination required by section 1002 of this title, finds that consolidation of Federal assistance programs is necessary or desirable to accomplish the purposes specified in paragraphs (1) through (6) of such section, he shall prepare one or more Federal assistance consolidation plans. Each such consolidation plan shall include a declaration that the consolidation included in the plan is necessary or desirable to accomplish the purposes specified in such paragraphs and an explanation of how each program included in the plan is functionally related to the other programs included in the plan.

"(b) In each consolidation plan transmitted to the Congress under this section, the President shall—

"(1) place responsibility for administration of the consolidation plan and all of Federal assistance programs included in such plan in a single Federal agency;

"(2) specify in detail the terms and conditions under which the Federal assistance programs included in the plan will be administered, including a specification of requirement such as State and local matching for Federal funds, allotment and apportionment, financial management, planning, and eligibility to be used in the plan; and

"(3) specify the date of expiration of the consolidation plan, except that in selecting an expiration date under this paragraph the President shall specify a date which—

"(A) except as provided in subparagraph (B) of this paragraph, is not earlier than the earliest date and not later than the date on which the authorizations of appropriations for any of the Federal assistance programs consolidated under the plan expire; and

"(B) is not later than four years after the effective date of the plan.

"(C) The President shall include with each consolidation plan transmitted to the Congress under this section a message which describes (1) the differences between the terms and conditions of the individual Federal assistance programs to be consolidated under the plan and the terms and conditions that will be applicable to such programs after the consolidation plan becomes effective, and (2) the reasons for selecting the terms and conditions used in the consolidation plan.

"(d) The President shall transmit each consolidation plan to both Houses of Congress on the same day and to each House while it is in session, except that—

"(1) the President may not transmit a consolidation plan to the Congress within thirty days of continuous session of Congress after the transmission of a previous consolidation plan concerning one or more

programs which fall under the same subfunctional category as set forth in the Budget of the United States transmitted pursuant to Section 201(1) of the Budget and Accounting Act of 1921; and

"(2) not more than three consolidation plans may be pending at one time before a committee of the Congress designated pursuant to Section 1005(d)(1).

"(e) Before a resolution with respect to a consolidation plan has been ordered reported by a committee designated pursuant to section 1005(d)(1), in either the Senate or the House of Representatives, the President may make modifications or revisions of the plan, which shall thereafter be treated as part of the consolidation plan originally transmitted and shall not affect in any way the time limits otherwise provided for in this chapter.

"(f) Within sixty days of continuous session of Congress after the beginning of each Congress, the President shall prepare and transmit to the Congress a report concerning the administration of this chapter.

"1004. Limitations on powers.

"(a) A consolidation plan may not provide for, and may not have the effect of, (1) consolidating any Federal assistance programs which are not functionally related, or (2) transferring responsibility for the administration of any program contained in such plan to an agency which was not responsible for the administration of any program contained in such plan to an agency which was not responsible for the administration of any Federal assistance program included in the consolidation plan prior to the date on which the consolidation plan takes effect or, (3) providing that a group or person becomes eligible for assistance under the plan that is not eligible under one or more of the programs being consolidated or (4) excluding any purposes and goals established under the programs being consolidated from the range of activities authorized by such plan.

"(b) The authority under this title will expire five years from the date it becomes effective.

"1005. Method of taking effect.

"(a) A consolidation plan shall be effective upon approval by the President of a resolution which has been adopted within ninety days of continuous session of Congress after the date of transmittal of the plan to the Congress.

"(b) A consolidation plan may provide that any provision of the plan may be effective at a time later than the date on which the plan becomes effective.

"(c) On the day on which a consolidation plan is transmitted to the Senate and the House of Representatives, a resolution shall be introduced (by request) in the Senate by the Chairman of the Committee on Governmental Affairs of the Senate, or by a Member or Members of the Senate designated by such chairman; and shall be introduced (by request) in the House by the chairman of the Committee on Government Operations of the House, or by a Member or Members of the House designated by such chairman.

"(d)(1) A resolution with respect to a consolidation plan shall be referred to the committee of the Senate and the House of Representatives having primary jurisdiction over such resolution under the rules of the Senate and the House of Representatives.

"(2) Each committee of primary jurisdiction to which the resolution is referred shall consider the consolidation plan and shall make its recommendations to the Senate or the House of Representatives, as the case may be, within sixty calendar days of continuous session following the date of its transmittal to Congress.

"(3) Any resolution with respect to a consolidation plan affirmatively reported by the committee with primary jurisdiction which contains any matter within the jurisdiction of any other committee shall be referred to such other committee for a period of fifteen days of continuous session of Congress if the chairman of such other committee requests such referral no later than the day following the day on which the resolution is reported by the committee with primary jurisdiction. In any case in which such other committee fails to report the resolution within the period herein prescribed, such committee shall be automatically discharged from further consideration of such resolution on the sixteenth day of continuous session of Congress following the day on which such resolution is referred to such committee.

"(4) If the committee having primary jurisdiction over a resolution with respect to which a consolidation plan has been referred has not reported it at the end of sixty days of continuous session of Congress after its transmittal, such committee shall be deemed to be discharged from further consideration of such resolution and such resolution shall be placed on the appropriate calendar of the House involved.

"(e) When the last committee to which the resolution has been referred has reported, or has been discharged from further consideration of a resolution with respect to a consolidation plan, pursuant to (d)(3)(4), it is in order at any time thereafter (even though a previous motion to the same effect has been disagreed to) for any Member of the respective House to move to proceed to the consideration of the resolution. The motion is privileged in the Senate and highly privileged in the House of Representatives and is not debatable. The motion shall not be subject to amendment, or to a motion to postpone, or a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the resolution is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the resolution is agreed to, the resolution shall remain the unfinished business of the respective House until disposed of.

"(f) For purposes of this section and section 1003 of this title—

"(1) continuity of session is broken only by an adjournment of Congress sine die; and

"(2) the days in which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the ninety-day period.

"(g) The provisions of subsections (c) through (k) of this section and of paragraph (4) of section 1001 of this title are enacted by the Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that subsection and paragraph; and they supersede other rules to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

"1006. Effect on other laws and regulations.

"(a) To the extent that any provision of a consolidation plan which becomes effective under this chapter is inconsistent with any provision of law enacted prior to the effective date of the plan, the provision of the consolidation plan shall control to the extent that such plan specifies the provision of law to be superseded, consistent with section 1003(b)(2).

"(b) Within a reasonable time after the consolidation plan becomes effective, modifications shall be made in any regulation, rule, order, policy, determination, directive, authorization, permit, privilege, requirement, or other action made, prescribed, issued, granted, or performed with respect to any matter affected by a consolidated plan to reconcile any inconsistency as thereof with the consolidation plan, as set forth in that plan, but otherwise shall continue in effect.

"(c) A consolidation plan shall provide for the transfer of appropriations or other budget authority in such manner that the aggregate amount of appropriations and other budget authority available for carrying out the Federal assistance programs involved in such plan may be available for any or all such programs, and the aggregate amount of authorizations of appropriations or other budget authority for such programs shall be deemed an authorization of appropriations and other budget authority for any or all of such programs. The appropriations or portions of appropriations unexpended by reason of operation of this chapter may not be used for any purpose, but shall revert to the Treasury Department. The Office of Management and Budget shall report to the Appropriations Committees, as part of their annual budget submission, on the saving effected under the consolidation plan."

(d) The table of chapters for part I of title 5 United States Code, immediately proceeding chapter 1, is amended by adding at the end thereof the following new item:

"10 Federal Assistance Programs Consolidation ----------1001."

TITLE II—FINANCIAL MANAGEMENT AND AUDIT OF FEDERAL ASSISTANCE PROGRAMS

PURPOSE

SEC. 201. It is the purpose of this title—

(1) to improve the financial management of Federal assistance programs;

(2) to promote the efficient use of audit resources;

(3) to relieve State and local governments and non-profit organizations of the costs and paperwork burdens due to conflicting and redundant requirements of Federal assistance programs; and

(4) to provide for the establishment of consistent requirements for the financial management and audit of Federal assistance provided to or administered by State and local governments and nonprofit organizations.

DEFINITIONS

SEC. 202. As used in this title—

(1) the term "financial and compliance audit" means a systematic review or appraisal of a recipient of Federal assistance to determine and report whether the financial operations of the recipient are properly conducted and financial reports are presented fairly and whether the entity has complied with significant compliance requirements contained in laws and regulations that can materially affect the entities financial operations, conditions and reports.

(2) The term "public accountants" means certified public accountants, or licensed public accountants licensed on or before December 31, 1970, who are certified or licensed by a regulatory authority of a State.

(3) The term "independent auditors" means properly constituted State and local government audit agencies or public accountants, who have no direct relationship with the functions or activities being audited or with the business conducted by any of the officials of the government agency or unit being audited.

(4) The term "generally accepted auditing standards" means the auditing standards set forth in the financial and compliance element of the "Standards for Audit of Governmental Organizations, Programs, Activities, and Functions", issued by the Comptroller General of the United States and incorporating the audit standards of the American Institute of Certified Public Accountants.

(6) The term "Federal assistance" means any assistance provided by an agency in the form of grants, loans, loan guarantees, property, cooperative agreements or technical assistance to State or local governments or other recipients, except that such term does not include direct Federal cash assistance to individuals, contracts for the procurement of goods and services for the United States, or insurance.

(7) The term "local government" means any unit of government within a State, a county, borough, municipality, city, town, township, parish, local public authority, special district, intrastate district, council of governments, other interstate government entity or any other instrumentality of local government.

(8) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the North Mariana Islands.

(9) The term "entity" means a first level organizational unit of a State or local government or non-profits providing services to such unit.

(10) The term "non-profit organization" means an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 which is exempt from taxation under section 501(a) of such Code or any non-profit scientific or educational organization qualified under a State non-profit organization statute.

(11) The term "federally recognized Indian tribe" means an organization the Bureau of Indian Affairs as defined in P.L. 93-262, 82, April 12, 1974, 88 Stat. 77.

GENERAL FINANCIAL MANAGEMENT AND AUDIT

SEC. 203. (a) In order to insure that Federal accountability systems do not impose unnecessary, conflicting, and duplicative accounting, auditing, and reporting requirements upon State and local governments, non-profit organizations, and federally recognized Indian tribes who are recipients of Federal assistance and in order to reduce the costs, paperwork, and regulatory burdens associated with Federal assistance programs, the Director of the Office of Management and Budget, in consultation with the Comptroller General of the United States, shall, consistent with applicable law, develop, establish, and maintain for use by all Federal agencies standard accounting, auditing, and financial management policies, procedures, and requirements for the administration, accounting, and financial auditing of grants, contracts, cooperative agreements, and other forms of Federal assistance to State and local governments, nonprofit organizations and federally recognized Indian tribes. Any such policy procedure, or requirement shall not conflict with any applicable audit standard developed by the Comptroller General of the United States. Standard policies, procedures, and requirements developed by the Director of the Office of Management and Budget pursuant to this section shall include—

(1) terms, definitions, and conditions used in conjunction with grants, contracts, cooperative agreements, and other forms of Federal assistance to State and local governments;

(2) generally accepted accounting principles and standards as required for financial accounting and reporting;

(3) uniform requirements for assistance application forms;

(4) uniform principles and standards for sound financial management and auditing; and

(5) uniform payment policies for grants, contracts cooperative agreements, and other forms of Federal assistance.

(b) The Director of the Office of Management and Budget shall prescribe regulations to carry out the standard policies, procedures, and requirements established pursuant to subsection (a). Any such regulations shall be binding on all Federal departments and agencies, and assistance recipients. Such directives shall prescribe effective means to coordinate Federal, State, and local audits of assistance programs.

ACCOUNTING AND AUDITING PROCEDURES AND REQUIREMENTS

SEC. 204. (a) At least once every two years, there shall be a single independent financial and compliance audit of—

(1) State and local governments, or State and local governmental entities and the subgrantees of such State and local governments or governmental entities; and

(2) nonprofit organizations or entities of nonprofit organizations and the subgrantees of such nonprofit organizations or entities, which receive Federal assistance. Any such audit shall include an evaluation of the accounting and control systems of the recipient of Federal assistance and of the activities by the recipient to comply with the financial and performance requirements of grants received by the recipient from the Federal Government. Audits carried out pursuant to this section shall be audits of the recipient, rather than audits of individual grants or programs. In the case of any recipient of Federal assistance which receives less than $100,000 per year, the audit required by this section shall be conducted at least once every five years, but not more frequently than once every three years, unless there is evidence of fraud or other violation of Federal law in connection with such assistance.

(b) A State government shall have the responsibility for financial and compliance audits of the State government or State governmental entities receiving Federal assistance, and the subgrantees of such government or entities. A local government shall have the responsibility for financial and compliance audits of the local government, local governmental entities receiving Federal assistance, and the subgrantees of such government or entities. A nonprofit organization shall have responsibility for financial and compliance audits of the nonprofit organization or entities of the nonprofit organization receiving Federal assistance and the subgrantees of such nonprofit organizations or entities unless by law, the State or local government has such responsibility, in which event the State or local government, as appropriate, shall have the responsibility for such audits. The audits shall be made by independent auditors in accordance with generally accepted auditing standards and shall include as opinion as to whether the recipient's accounting policies and financial statements follow generally accepted accounting principles and standards.

(c)(1) The Federal Government shall be responsible, through the quality review process established pursuant to subsection (d), for assuring that financial and compliance audits conducted by independent auditors meet generally accepted auditing standards. Nothing in this title limits the authority of Federal agencies to make audits of Federal assistance to State and local governments, State and local governmental entities and the subgrantees of such State and local government or governmental entities: *Provided, however,* That if independent audits arranged for by State or local governments meet generally accepted auditing standards and other requirements established pursuant to subsection (d) Federal agencies shall rely on those audits and any additional audit work shall build upon the work already done.

(2) The Federal Government is responsible for conducting, or contracting (to such extent or in such amounts as are provided in appropriations Acts) for the conduct of, audits which are not financial and compliance audits.

(3) Nothing in this title limits the Federal Government's responsibility or authority to enforce Federal law or regulations, procedures or reporting requirements arising pursuant thereto.

(d) The Director of the Office of Management and Budget, in consultation with the Comptroller General of the United States, shall establish and approve a quality review process that will assure the proper performance of audits. Audits performed by Federal, State, or local government audit agencies which have been approved pursuant to such review process shall be accepted by all Federal agencies making and administering grants.

(e) The Director of the Office of Management and Budget shall prescribe appropriate means for the reimbursement of independent auditors for actual expenses incurred for such parts of audits as are performed as a requirement of a Federal assistance program, including provisions for—

(1) reimbursement for such expenses, either directly or through the recipient jurisdiction; and

(2) equitable financial settlements when such audits fail to meet the standard policies, procedures, and requirements developed pursuant to section 203.

TITLE III—ADMINISTRATION OF GENERALLY APPLICABLE FEDERAL ASSISTANCE REQUIREMENTS

SEC. 301. The Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4201 et seq.) is amended by adding at the end thereof the following new title:

"TITLE VII—ADMINISTRATION OF GENERALLY APPLICABLE FEDERAL ASSISTANCE REQUIREMENTS

"STATEMENT OF PURPOSE

"SEC. 701. It is the purpose of this title—

"(1) to encourage simplification, standardization, and coordination to the maximum extent feasible in the administration of all national policy requirements which are generally applicable to Federal assistance consistent with the goals and purposes of such requirements;

"(2) to improve the procedures by which such requirements are developed, implemented, and evaluated;

"(3) to reduce the overall administrative and cost burdens of such requirements on assistance recipients, and

"(4) to eliminate those requirements that are found to be unnecessary, infeasible, or inappropriate.

"DEFINITIONS

"SEC. 702. As used in this title—

"(1) the term 'generally applicable requirement' means any requirement—

"(A) with which an assistance recipient is required to comply under Federal law or administrative rule or regulation in order to achieve national policy objectives; and

"(B) which applies to programs administered by two or more assistance agencies, regardless of whether such requirement is contained in one or more of such laws, rules, or regulations;

"(2) the term 'designated agency' means a Federal agency designated by the President pursuant to this title, or a Federal agency which has been designated by law, to coordinate the preparation and implementation of national policy assistance standards for specified generally applicable requirements and report on the implementation of such requirements.

"(3) the term 'assistance recipient' means a State or local government or other organization that receives Federal assistance;

"(4) the term 'national policy assistance standards' means a set of guidelines, statements of objectives, standards or other documents issued to achieve the objectives of

certain generally applicable requirements in a manner which is, to the greatest extent feasible, substantially uniform among affected assistance programs and is designed to take into account characteristics of classes of recipients or types of assistance;

"(5) the term 'assistance agency' means a Federal agency that administers a Federal assistance program; and

"(6) the term 'Federal assistance' means any assistance provided by an agency in the form of grants, loans, loan guarantees, property, cooperative agreements or technical assistance to State or local governments or other recipients, except that such term does not include direct cash assistance to individuals, contracts for the procurement of goods and services for the United States, or insurance.

"ASSIGNMENT OF DESIGNATED AGENCIES

"SEC. 703. (a) Within one hundred twenty days after the date of enactment of this title and from time to time thereafter as he deems appropriate, the President shall designate, consistent with any applicable law, including reorganization plans, a single Federal agency to coordinate the preparation of national policy assistance standards for one or more generally applicable requirements for Federal assistance and to report on the implementation of such requirements. As determined by the President, designated agencies shall be responsible for generally applicable requirements in various subject areas such as—

"(1) labor practices requirements;
"(2) public employee standards;
"(3) equal services requirements;
"(4) equal employment requirements;
"(5) access to Government information;
"(6) procurement standards;
"(7) planning requirements;
"(8) financial and administrative requirements;
"(9) citizen participation requirements; and
"(10) environmental protection requirements.

"(b) In evaluating Federal agencies for designation under subsection (a), the President shall consider—

"(1) the relationship of the generally applicable requirement to the functions and program responsibilities of the agency.

"(2) the capacity of the agency to effectively carry out the responsibilities of a designated agency; and

"(3) the smallest number of designated agencies which is practicable for the promulgation of national policy assistance standards for implementing related generally applicable requirements.

"(c) If any generally applicable requirement is established pursuant to a statute or administrative rule or regulation enacted or adopted after the date of enactment of this title, the President shall, in accordance with subsections (a) and (b), designate a single Federal agency to coordinate preparation of national policy standards for such requirement and report on the implementation of such requirement.

"ISSUANCE OF NATIONAL POLICY ASSISTANCE STANDARDS

"SEC. 704. (a) Within one year of the date of designation by the President, each designated agency shall develop national policy assistance standards in its field of designated responsibility in consultation and cooperation with affected Federal agencies, assistance recipients, and other interested parties. If any generally applicable requirement is affected or established by a statute or administrative rule or regulation enacted or adopted after the date of enactment of this title, the President shall set a specific date for the preparation of national policy assistance standards under this section which shall be not later than one year after the date of enactment of such law.

"(b) The designated agency shall consult, in accordance with any procedures established under section 707(b) of this title, with affected assistance recipients, beneficiaries, and other interested parties at the earliest possible time after the date on which such agency is designated by the President under section 703.

"(c) National policy assistance standards for generally applicable requirements shall be consistent with applicable law and, to the maximum extent possible—

"(1) be simple and clear;

"(2) minimize the reporting required of assistance recipients consistent with the requirements of the Paperwork Reduction Act (P.L. 96-511) and the Regulatory Flexibility Act (P.L. 96-354);

"(3) minimize compliance costs and burdens such standards placed upon assistance recipients;

"(4) include standard compliance procedures, provisions for technical assistance, and other facilitative procedures; and

"(5) be accompanied by a list, based on existing relevant statutory provisions, of the Federal assistance programs to which such standards apply.

"(d) Within one hundred and twenty days after a designated agency publishes national policy assistance standards prepared under this section, each assistance agency administering a Federal assistance program to which such standards apply shall implement and conform to such standards unless the President establishes, after review, a longer period for implementation of such standards in order to lessen the impact of such standards on affected assistance recipients. Each assistance agency shall be responsible for insuring that affected assistance recipients comply with such standards.

"(e) Each designated agency shall coordinate the implementation of relevant national assistance policy standards in accordance with the procedures established under section 707(b) and shall ensure that revisions or additions to such standards become effective only on the first day of each fiscal year.

"IMPLEMENTATION AND ENFORCEMENT ROLES OF FEDERAL AGENCIES

"SEC. 705. (a) The head of each assistance agency responsible for the formulation of policy relating to the administration of Federal assistance to—

"(1) coordinate compliance activities under generally applicable standards throughout the agency;

"(2) ensure the complete and active participation of the agency in the development and implementation of national policy assistance standards; and

"(3) represent the position of the agency on questions relating to generally applicable requirements and associated national policy assistance standards.

"(b) One year following the date of enactment of this title, and except as otherwise provided by law, the head of an assistance agency is authorized, in his discretion, to certify and accept State or local government laws, regulations, directives, standards, reporting requirements, and compliance monitoring and enforcement procedures if the agency head determines that such State or local government requirements are at least equal to national policy assistance standards and that such State or local government requirements are fully complied with and enforced. Nothing in this subsection limits the assistance agency's responsibility or authority to enforce Federal law or its regulations, procedures or reporting requirements arising thereunder. For good cause an assistance agency may rescind any certification issued under this subsection, but shall provide the State or local government with due notice prior to taking any such action and provide such government with an opportunity to demonstrate why the agency action should not be taken.

"(c) Federal agencies administering Federal assistance programs shall take appropriate action, including the provision of technical assistance, to assist affected assistance recipients in their efforts to comply with applicable national policy assistance standards.

"LEGISLATION TO REMOVE IMPEDIMENTS TO IMPLEMENTATION

"SEC. 706. (a) If a designated agency is unable to publish national policy assistance standards pursuant to section 704 due to conflicting or inconsistent provisions of law, or due to other factors which have prevented the development of such standards in accordance with the provisions of this title, the agency shall report its inability to develop such standards to the President. After receipt of such report, the President may direct the agency to prepare a proposed bill to remove any such impediments to the development of such national policy assistance standards and to submit such bill to the President for transmission to the Congress.

"(b) If the President determines, after study, that certain Federal assistance programs should be exempted from any generally applicable requirement established by statute or that basic components of any such requirement are inappropriate, inefficient or poorly suited to effective management, he may prepare a proposed bill to repeal, restrict, or revise the scope or structure of such requirement and shall submit to the Congress his determination under this subsection and such proposed bill.

"GENERAL OVERSIGHT

"SEC. 707. (a) The President may delegate to the Director of the Office of Management and Budget or to the head of any other Federal agency responsibility for monitoring the overall implementation of this title, except that the President may not delegate the authority to name designated agencies under section 703.

"(b) In carrying out the provisions of this title, the President, or in carrying out any responsibility delegated under subsection (a), the Director of the Office of Management and Budget or the head of a Federal agency, shall—

"(1) establish a uniform procedure for the development, implementation, and evaluation of national policy assistance standards or other guidance and instructions to recipients required by this title, including provisions to insure the active participation of assistance agencies, program beneficiaries, and assistance recipients to the maximum extent possible.

"(2) review the administration of generally applicable requirements to improve the effectiveness of such requirements, including working with the designated agencies to ensure effective application of national policy assistance standards to the requirements of particular assistance programs or to the recipients of such programs.

"(3) establish a procedure for resolving disputes and conflicts between designated agencies, assistance agencies, and assistance recipients over the preparation and implementation of national policy assistance standards.

"(4) test and evaluate techniques for certification by a state or local government that its laws, regulations, directives, standards, reporting requirements, and compliance monitoring and enforcement procedures are at least equal to national policy assistance standards. The Director shall establish policies for government-wide use of those techniques found to be most effective and for resolution of disputes and conflicts that may arise from certification.

"(5) prepare, publish, and annually update a catalog of all generally applicable requirements and the applicable national policy assistance standards for generally applicable requirements currently in effect.

"(c) Should it become evident that implementation of a national policy assistance

standard will lead to serious unanticipated consequences or disruption of assistance programs, the President, or the Director of the Office of Management and Budget, or head of any other Federal agency delegated responsibility for monitoring the overall implementation of this title pursuant to subsection (a), is authorized to suspend the implementation of such standard for a period not to exceed one hundred and eighty days. If the suspended national policy assistance standard is mandated by statute, the President, or the Director or the head of a Federal agency shall directly notify the appropriate committees of the Senate and the House of Representatives of the suspension and the reasons for it and, if warranted, make recommendations for legislative action.

"(d) In carrying out any responsibility delegated under this section, the President, or the Director of the Office of Management and Budget or the head of a Federal agency shall keep Congress fully informed of his actions and related agency activities."

SEC. 402. Nothing in this title limits in any way any existing authority of the President, the Office of Management and Budget or the Director thereof may otherwise have under the laws of the United States, with respect to the administration of Federal assistance requirements.

TITLE IV—JOINT FUNDING SIMPLIFICATION ACT AMENDMENTS

SEC. 401. (a) Section 3 of the Joint Funding Simplification Act of 1974 (88 Stat. 1604; 42 U.S.C. 4252) is amended—

(1) by striking out "may" after the word agreement in subsection (b) and inserting in lieu thereof "shall";

(2) by striking out subsection (b)(1);

(3) by renumbering subsection (b)(2) as subsection (b)(1), subsection (b)(3) as subsection (b)(2), subsection (b)(4) as subsection (b)(3), and subsection (b)(5) as subsection (b)(4).

(b) Section 5 of such Act is amended—

(1) by striking "joint management funds" in the first sentence and inserting in lieu thereof "integrated funding process";

(c) Section 6 of such Act is amended—

(1) by striking "may" in the first sentence of subsection (6)(a) and inserting in lieu thereof "shall";

(2) by striking "may" in the first sentence of subsection (6)(c) and inserting in lieu thereof "shall";

(3) by striking "may" in the second sentence of subsection (6)(c) and inserting in lieu thereof "shall";

(d) Section 8 of such Act is amended—

(1) by amending subsection (a) to read as follows:

"SEC. 8. (a) In order to provide for the more effective administration of funds drawn from more than one Federal program or appropriation in support of projects under this Act, there may be established an integrated funding process with respect to such project through which a proportionate share of the funds from each affected program or appropriation needed for payments to the recipients may be made available."

(2) by amending subsection (b) to read as follows:

"(b) Any funds made available through an integrated funding process shall be subject to such arrangements, not inconsistent with this section and other applicable law, as may be entered into by the Federal agencies concerned and shall assure the availability of necessary information to those agencies and to the Congress. These agreements also shall provide that the agency administering the funds shall be responsible and accountable by program and appropriation for the amounts provided from each contributing program or appropriation and shall include procedures for determining, from time to time, whether amounts available are in excess of the amounts required, and for advising the participating agencies concerning the appropriate disposition of that excess according to the applicable appropriations, subject to fiscal year limitations. Excess amounts applicable to expired appropriations will be lapsed."

(3) by striking out "account in a joint management fund" in the first sentence of subsection (c) and inserting in lieu thereof "integrated funding process";

(4) by striking out "from the fund" in the first sentence of subsection (c);

(5) by striking out "fund" after the words "for administering the" in subsection (c), and inserting in lieu thereof the word "process";

(6) by striking out "joint management fund" in subsection (d) and inserting in lieu thereof "integrated funds";

(7) by striking out "from such fund" in subsection (d);

(8) by striking out "a joint management fund" in subsection (e) and inserting in lieu thereof "an integrated funding process";

(9) by striking out "to" after the word "transferred" in subsection (e) and inserting in lieu thereof "for";

(10) by striking out "account" in subsection (e);

SEC. 12. (e) of such Act is amended by adding the following new subsection (7)—

(7) the term "integrated funding process" means the administration of the aggregate amount of funds authorized by interagency agreement for disbursement to a single recipient through a single federal disbursement method. The integrated funding process is administered on behalf of two or more federal agencies in support of a joint funding process.

TITLE V—INTEGRATED ASSISTANCE

SEC. 501. The Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4201 et seq.) is amended by adding at the end thereof the following new title:

"TITLE VIII—INTEGRATED ASSISTANCE

"STATEMENT OF PURPOSE"

SEC. 801. It is the purpose of this title to increase the substantive effectiveness and management efficiency of Federal assistance programs by:

(1) permitting recipients to exercise greater discretion and flexibility in the use of Federal assistance;

(2) encouraging the use of simplified administrative processes and reporting requirements; and

(3) fostering recipient initiative and innovative approaches to priorities and problems that cross existing statutory assistance categories.

DEFINITIONS

SEC. 802. As used in this Act—

(1) The term "Administrator" means the head of a federal agency responsible for one or more federal assistance programs.

(2) The term "assistance" or "assistance program" means a grant or cooperative agreement as determined by the Administrator under the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.) for which state or local governments are the sole qualified recipients.

(3) The term "covered program" means any assistance program for which an Administrator has responsibility which falls under a single functional category as set forth in the Budget of the United States Government transmitted pursuant to Section 201(1) of the Budget and Accounting Act of 1921 and which is included in an integrated program plan.

(4) The term "base fiscal year" means, for each covered program, the fiscal year prior to the year in which the covered program is included under an approved integrated program plan.

(5) The term "integrated program plan" means a document, submitted under section 803 of this title as part of an assistance application, which sets forth a plan of activities and related expenditures to carry out the objectives of this title and the covered programs which are included.

INTEGRATED PROGRAM PLAN

SEC. 803. (a) Each applicant for federal assistance under this title may:

(1) Submit an integrated program plan which represents an integrated approach to planning, development, and implementation of the covered programs.

(2) Provide for the coordination and administration of each integrated program plan by a single agency designated by the applicant's chief executive officer.

SEC. 804. (a)(1) The Administrator shall establish requirements governing approval of an integrated program plan. These requirements shall be designed—

(A) to increase the substantive effectiveness and management efficiency of covered programs;

(B) to encourage and permit State and local governments to redirect a portion of the resources in the covered programs to problems and priorities of such governments that may cross existing statutory assistance categories; and

(C) to improve the effectiveness and productivity of assistance programs by reducing rigidity, duplication of effort, and unnecessary expenditures.

(2) In developing its integrated program plan, an applicant may propose to transfer funds among the various covered programs included in such plan, except that the applicant may in no event propose to transfer from any covered program an amount in excess of 20 per centum of the amount of assistance it was allocated for such program in the base fiscal year.

(3) In reviewing applications under this Title, the Administrator shall also consider the degree to which the applicant (i) has considered the effects of each program on the other(s) included in the integrated program plan and (ii) has, or is developing supporting data bases, planning and evaluation processes to assist in implementing the proposed plan.

(b) The Administrator shall complete review of the applicant's proposed plan in a timely fashion and may approve it in whole or in part. In the event of disapproval, the Administrator shall notify immediately the applicant in writing but in no instance shall such notification occur more than thirty days after the date of such disapproval. If notice from the Administrator concerning an applicant's proposed plan is not received within ninety days of its submission, the plan shall stand approved as submitted. Disapproval of an integrated assistance plan shall not in any way affect a recipient's application through the established award process for assistance covered by the integrated assistance plan.

(c) The Administrator shall not approve an integrated program plan unless he determines—

(1) that the objectives of this title and of the covered programs are adequately addressed therein;

(2) that the requirements promulgated pursuant to section 804(a)(1) of this title have been met; and

(3) that the proposed plan adequately considers cross-program consequences.

(d) The Administrator shall not award integrated assistance to a State or local government unless the duly authorized official has signed the assistance application containing the integrated program plan.

AUTHORITY; LIMITATIONS

SEC. 805. (a) From sums appropriated under the covered programs, the Administrator shall award integrated assistance in accordance with the integrated program plan

approved under section 804 to States and local governments to enable them to carry out the objectives of this title and of the covered programs.

(b) An approved integrated program plan shall remain in effect for only the fiscal year in which application was made. The Administrator shall not renew an integrated program plan unless he determines, based on evaluation of the recipient's performance and its current proposed plan, that the recipient's program has and will effectively serve the purposes of this title and the covered programs included in its integrated program plan.

SEC. 806. In developing its integrated program plan, the State shall provide for adequate consultation with the affected local governments.

ACCOUNTABILITY

SEC. 807. (a) The Director of the Office of Management and Budget shall within thirty days following enactment of this title, establish guidelines which shall guide the Administrator of each agency in reviewing the integrated program plans submitted by state and local applicants. Such guidelines shall establish procedures which ensure that recipient accountability for expenditures under an approved integrated program plan is provided for by the plan as a whole in lieu of accounting for expenditures by program.

(b) Within sixty days following the date upon which the Director issues guidelines pursuant to subsection (a), the Administrator shall provide for the receipt of integrated program plans from the State and local applicants.

SUNSET PROVISION; REPORT TO CONGRESS

SEC. 809. This title shall be applicable to assistance awarded for fiscal year 1982 and shall expire on September 30, 1986. The Director of the Office of Management and Budget shall submit to the Congress no later than September 30, 1985, a report describing the extent to which State and local governments have established and implemented integrated program plans, evaluating the effectiveness of covered programs, and recommendations with respect to continuing integrated assistance.

TITLE VI—MISCELLANEOUS

"SINGLE STATE OR LOCAL AGENCY OR ORGANIZATION UNIT PROVISIONS

SEC. 701. Title II of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4214) amended to read as follows:

"SEC. 204. Notwithstanding any other Federal law which provides that (1) a single or specific State or local governmental agency or other organizational unit be utilized or designated to receive, supervise, or otherwise administer any Federal assistance program, or (2) a single or specific pattern of internal organization or procedure be utilized or designated to administer any Federal assistance program, upon certification by the appropriate executive or legislative authority of the State or local government responsible for determining or revising the organizational structure of such government that such provisions prevent the establishment of the most effective and efficient organizational arrangements within the State or local government, the head of the Federal department or agency administering the program shall waive such provisions and approve other State and or local administrative structure or arrangements unless he determines that the objectives of the Federal statute authorizing the program will be significantly endangered. The head of the Federal agency or department shall set forth in writing the reasons for such determination and shall give the appropriate State or local government authority sufficient opportunity to respond.

"STANDARD MAINTENANCE OF EFFORT REQUIREMENT

"SEC. 205. (a) Notwithstanding any other provisions of law, all requirements of federal assistance programs intended to insure that the granting of federal assistance to State and local governments will not result in a reduction in relevant State or local governmental expenditures or the substitution of Federal funds for State and local funds previously made available for the activities aided are hereby repealed.

(b) When the Congress hereafter desires to insure that the granting of federal assistance to State and local governments will not result in a reduction in relevant State or local governmental expenditures or the substitution of Federal funds for State or local funds previously made available for the activities aided, the Congress shall incorporate in the legislation authorizing such a maintenance of effort provision providing that—

"(1) the amount available for expenditures by such State or local government or by its subgrantees for the activities aided for the fiscal year for which the assistance is sought shall not be less than the average expended based on recurring expenses for such activities during the preceding two fiscal years; otherwise, the Federal amount will be reduced proportionate to the State or local reductions below such an average; and

"(2) on the request of an assistance recipient, the Federal agency head may waive the requirement established by paragraph (1) if he determines, in accordance with regulations and criteria established by the Office of Management and Budget, that application of the requirement would result in extraordinary fiscal hardship.

"(b) For the purpose of standardization, the Congress shall limit itself to the elements specified in subsection (a) in the prescription of maintenance of effort requirements, and shall declare that such elements apply to subgranted funds."

"STATE OVERSIGHT OF FEDERAL FUNDS

"SEC. 206. Notwithstanding any other provision of law, nothing in any Federal statute or implementing regulation shall diminish or negate, nor shall be construed as superceding, procedures established by State law or practice for appropriating and expending Federal assistance funds, for designating, consistent with Section 203 of this Act, the State agency to administer or implement any grant program, or for reviewing State plans and applications for Federal assistance."

FEDERAL ASSISTANCE IMPROVEMENT ACT OF 1981—SECTION-BY-SECTION ANALYSIS

Section 2. Statement of Purpose. The Act is intended to encourage grant consolidation, to provide more efficient use of Federal, state and local audit resources, to encourage the use of joint funding procedures, to enable recipients to target resources more effectively, to revise other grant procedures or policies to provide more effective use of grants by recipients and to simplify the cross-cutting national policy requirements.

TITLE I—FEDERAL ASSISTANCE PROGRAM CONSOLIDATION

Section 101. Amends Title 5, United States Code, by inserting a new Chapter 10 comprised of Sections 1001 through 1006.

Section 1001. Definitions. Defines the terms "agency," "consolidation plan," "Federal Assistance," "functionally related programs," and the term "resolution," for the purposes of the chapter.

Section 1002. Examination of Federal Assistance Programs Required. Requires the President to review federal assistance prior to the beginning of each session of Congress to determine if consolidations of any programs are desirable. Establishes six goals against which the President should measure the need for consolidation.

Section 1003. Federal Assistance Program Consolidation Plan. Provides the President with the authority to prepare Federal assistance consolidation plans to submit to Congress when the consolidation would accomplish any of the purposes enumerated in Section 1002. The consolidation plan prepared by the President must name a single Federal agency to administer the program and issue the rules and regulations guiding its management. The President must report how the provisions of the consolidation compare with the terms and conditions of the separate programs. In the consolidation plan, the President must include any program conditions designed to ensure that the intended beneficiaries of the programs are served. No consolidation plan is to remain in effect for more than four years. The President must deliver the consolidation plan to both Houses of Congress on the same day during the session. No more than three consolidation plans can be considered by Congress at any one time. Modifications and revisions in the plan can be made by the President at any time before the Committee with primary jurisdiction in either House has reported it. The President is required to report to Congress, within sixty days after the beginning of each Congress, on the content of proposed consolidation plans, the implementation of plans already enacted and, when no plans are submitted during a Congress, the reasons why no consolidations are needed.

Section 1004. Limitations on Powers. Prohibits the consolidation of programs which are not functionally related and the assignment of the administrative responsibility to any agency which did not administer any federal assistance program included in the consolidation plan prior to the consolidation. A single consolidation plan may provide for only one consolidation of two or more Federal assistance programs. The President's authority to suggest consolidations under the provisions of the Title will expire five years after it becomes effective. Beneficiaries of any of the programs consolidated may not be excluded from benefits under the consolidation plan, nor may new beneficiaries be added.

Section 1005. Method of Taking Effect. Provides that a consolidation plan will take effect upon Presidential approval of a plan passed by Congress within 90 days of continuous session after submission of the plan. Consolidation plans are to be referred to committees with primary jurisdiction under the rules of the House and Senate.

After a plan is affirmatively reported by a committee of primary jurisdiction, it may be referred to any other committee with jurisdiction over any matter within it. The chairman of a committee with secondary jurisdiction must request the bill as soon as the committee with primary jurisdiction reports it. If a committee to which the plan has been referred has not reported the plan within sixty days, it is discharged from further consideration and the plan is placed on the appropriate calendar of the House involved. On the floor, the motion to consider the consolidation plan is privileged, nondebatable and non-amendable. No motions to reconsider or postpone the vote or proceed to other business are in order. The rules for enactment are specified as part of the rules of each House. The constitutional right of either House to change the rules is recognized in the section.

Section 1006. Effect on Other Laws and Regulations. Provides that when a consolidation plan is in conflict with a previously enacted statute, the consolidation plan shall prevail, as long as its terms and conditions were specified in the consolidation plan.

Regulations for programs consolidated will remain in effect until necessary modifications are made to reconcile inconsistencies with the plan. These inconsistencies must be set forth in the consolidation plan.

Legal actions against agency heads administering any of the programs consolidated may be continued against the head of the agency administering the consolidation.

The appropriations for the programs consolidated may be aggregated under the consolidation plan. Unexpended funds revert to the Treasury Department. The savings effected by the consolidation of grant programs must be reported to the Appropriations Committees by the Office of Management and Budget.

TITLE II—FINANCIAL MANAGEMENT AND AUDIT OF FEDERAL ASSISTANCE PROGRAMS

Section 201. Purpose. Establishes consistent audit requirements to promote more efficient use of Federal, State and local audit resources and to improve the financial management of Federal assistance.

Section 202. Definitions. Defines the terms "financial and compliance audit," "public accountants," "independent auditors," "independent audit," "generally accepted auditing standards," "entity," "non-profit organization," "Federal assistance," and "local governments," "State," "entity," "non-profit organization," "federally recognized Indian tribe."

Section 203. General Financial Management and Audit. Provides for the development of consistent accounting, auditing and financial management requirements by the Director of the Office of Management and Budget, in consultation with the Comptroller General of the United States, for use by all Federal agencies as criteria to assist state and local government and non-profit organization federal assistance program audits. The requirements must comply with standards set by the Comptroller General of the United States. Directives for implementation of the standard procedures shall be issued by the Office of Management and Budget and shall be binding upon all Federal agencies.

Section 204. Accounting and Auditing, Procedures and Requirements. Requires a single, independent, biennial audit of government or non-profit organizations to evaluate their administration of federal grants-in-aid. Less frequent audits are required for recipients of $100,000 or less a year in federal assistance.

Establishes the responsibility of States and local governments and non-profit organizations for conducting financial and compliance audits of Federal grant programs within their jurisdiction. The Federal Government retains responsibility for audits of federal grants-in-aid and must ensure that such audits meet generally accepted auditing standards. Audits other than financial and compliance audits are the responsibility of the Federal Government. Any Federal agency responsible for a grant program may conduct an audit at any time, building upon the state or local or non-profit audit.

Directs OMB to establish a quality review process, in consultation with the GAO, to be used by the Federal agencies in evaluating state and local government audits of their grant programs. Audits which meet the criteria set by OMB must be accepted by the administering Federal agencies.

TITLE III—ADMINISTRATION OF GENERALLY APPLICABLE FEDERAL ASSISTANCE REQUIREMENTS

Section 401. The Intergovernmental Cooperation Act is amended by adding a new Title VII "Administration of Generally Applicable Federal Assistance Requirements."

Section 701. Statement of Purpose. Indicates the intention of the Title to encourage the simplification, standardization, and coordination of national policy assistance requirements generally applicable to Federal assistance programs so that assistance recipients will have greater flexibility in administration and reduced paperwork burdens.

Section 702. Definitions. Defines "generally applicable requirement," "designated agency," "assistance recipient," "national policy assistance standards," "assistance agency," and "Federal assistance."

Section 703. Assignment of Designated Agencies. Directs the President to designate a single assistance agency to coordinate the preparation of national policy assistance requirements to implement various generally applicable requirements. In selecting designated agencies, the President is directed to consider whether the policy area covered relates to the agency's other responsibilities, the capacity of the agency to undertake the duties of a designated agency and the desirability of having the smallest possible number of designated agencies for all national policy areas. Ten policy areas are suggested for review by the designated agencies assigned by the President. The President may not reassign an agency which is given responsibility by law for a policy or statute.

Section 704. Issuance of National Policy Assistance Standards. Establishes procedures and timing for the issuance of national policy assistance standards by the designated agencies. Directs the President to set a time limit, within a one-year period, for publishing of national policy assistance standards developed by the designated agencies. Standards for laws enacted or administrative requirements adopted after the effective date of this Title must be published by a specific time set by the President, but not more than one year from the date of enactment. Requires consultation by the designated agency with affected parties in developing standards for the administration of national policy requirements attached to assistance programs. Directs that the standards developed must reduce compliance burdens for assistance recipients while ensuring continued achievement of national policy objectives. Provides that national policy assistance standards will be binding on Federal agencies administering grant programs and mandates conformance by the administering agencies with such national policy assistance standards within 120 days of their publication, unless the time limit is extended by the President. Designated agencies may amend their standards when necessary but changes should not be made more than once a year. A simplified national policy assistance standard must continue to enforce all legal requirements contained in the generally applicable requirements, particularly those prohibiting discrimination.

Section 705. Implementation and Compliance Enforcement Roles of Federal Agencies. Directs the selection of a policy level official in each assistance agency to be responsible for ensuring agency compliance with generally applicable requirements and agency participation in the development and implementation of national policy assistance standards. Allows administering agencies to certify that State or local governments are in compliance with State or local requirements that are equivalent to the Federally established national policy assistance standards. Such certification may be withdrawn, after notice, by the administering agency if there is a finding of non-compliance. Administering agencies must provide technical assistance to recipients in their efforts to comply with national policy assistance standards.

Section 706. Legislation to Remove Impediments to Implementation. Provides procedures for the development of legislation to remove impediments to the formulation of national policy assistance standards by the designated agencies. If standards cannot be developed by a designated agency because of conflicts in the law, or because of other unresolvable issues, the agency may prepare a bill dealing with the problem for approval and submission by the President to Congress. Directs the President to study federal assistance programs and generally applicable requirements to determine whether certain assistance programs should be excluded from coverage or whether certain generally applicable requirements are inappropriate or unmanageable. When the President determines, based on study, that repeal, revision or restriction of requirements is necessary, legislation may be submitted to Congress for that purpose.

Section 707. General Oversight. Provides that the President may delegate to the Director of the Office of Management and Budget or other agency head, the responsibility for overseeing the implementation of this Title, other than the authority to designate agencies provided in Section 703(a). In carrying out these responsibilities, the agency head is authorized to prescribe a uniform procedure for promulgating national policy assistance standards, to resolve conflicts, and to review the administration of generally applicable requirements. The agency head must keep Congress informed of agency activities undertaken pursuant to this Title. Provides authority for the President, or his designee, to suspend the implementation of a new generally applicable requirement if serious or unanticipated consequences for recipients might result. The President, or his designee, must publish an annually updated catalog of all national policy assistance standards.

TITLE IV—JOINT FUNDING SIMPLIFICATION ACT AMENDMENTS

Section 401. Amends Section 3 of the Joint Funding Simplification Act of 1974 as amended. Encourages the use of jointly funded projects by mandating increased agency compliance with the requirements of the Act. Amends Section 8 of the Act by eliminating the use of joint management funds and substituting more a flexible integrated funding process. Eliminates reference to joint management funds to ensure consistency.

TITLE V—INTEGRATED ASSISTANCE

Section 501. Amends the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4201 et seq.) by appending a new Title VIII, Integrated Assistance, Consisting of Sections 801 through 809.

Section 801. Purposes. States that it is the purpose of the new Title to increase the flexibility of assistance funds to recipients, encourage the use of simplified administrative processes and provide recipients with greater authority to better respond to local problems and priorities.

Section 802. Definitions. Defines "administrator," "assistance program," "covered program," "base fiscal year," and "integrated program plan."

Section 803. Integrated Program Plan. Provides that applicants for federal assistance may submit integrated program plans to assistance agencies which describe the means by which the applicants will manage the programs included in the plans. Such plans must represent an integrated approach to administering the programs covered by the plans.

Section 804. Establishment of Agency Rules. Requires each agency to establish requirements governing approvals of integrated program plans. The requirements must be designed to permit states and localities to target resources to needs more effectively, increase the effectiveness and manageability of programs covered under submitted plans, reduce program rigidity and limit unnecessary program expenditures. Such requirements must allow recipients to transfer up to

twenty percent of the funds available for each program included in an integrated program plan among other programs within the plan. The Administrator for each assistance agency must complete his review of a submitted plan within ninety days of its submission. Failure to do so would constitute automatic approval of the plan. The Administrator must ensure that all approved integrated program plans meet the objectives of this Title and of the programs covered under the plan.

Section 805. Authority/Limitations. Requires that assistance awarded pursuant to this Title be in accordance with an approved integrated program plan. Provides that approved plans shall remain valid only for the fiscal year in which application for funding was made. Requires that integrated program plans must be reviewed and reapproved each fiscal year.

Section 806. Consultation. Provides that states must consult with their local governments in drafting integrated program plans.

Section 807. Accountability. Requires the Director of the Office of Management and Budget to issue guidelines for assistance agencies within thirty days of the enactment of this Title. The guidelines required by this section must ensure that recipients are held accountable for the funds under an approved plan. All agency regulations implementing this Title must be issued no later than sixty days following the publishing of guidelines from OMB.

Section 809. Sunset Provision/Report to Congress. Provides for expiration of Title on September 30, 1986. Requires Director of OMB to submit to Congress one year before Title lapses a report on its implementation.

TITLE VI—MISCELLANEOUS

Section 701. Amends the Intergovernmental Cooperation Act (42 U.S.C. 4214) by creating a new Section 204. Provides that a Federal agency head must waive federal requirements attached to assistance programs which mandate that a specific or single state or local government agency be appointed to administer an assistance program(s). Waivers under this section can be granted upon certification by the state or local government that its organizational structure is the most efficient and effective management structure for that particular state or local entity. Federal agencies may refuse to waive single state or local agency requirements only if the head of the agency finds that a waiver would significantly endanger the achievement of federal objectives.

Section 205. Standard Maintenance of Effort Requirements. Repeals all existing maintenance of effort requirements upon enactment. Provides that when Congress wishes to adopt such requirements it must use a standard formula which is based on the amount available for expenditure by the state or local recipient during the two fiscal years previous to the fiscal year for which funds are sought. Allows for a waiver of the standard maintenance of effort requirement in cases of extreme fiscal hardship.

Section 206. State oversight of Federal Funds. Expresses Congressional neutrality with respect to the practices of state governments in overseeing the use of federal funds.

Mr. DANFORTH. Mr. President, I am pleased today to join Senator ROTH, Senator DURENBERGER, and others in sponsoring the Federal Assistance Improvement Act of 1981. We have been at this for some time, but I believe this legislation promises to be the toughest assault yet on the regulations and redtape that bind Federal aid.

Mr. President, the need for this legislation is clear. The pending cuts in Federal aid make it essential that the Federal Government cutback on the regulations that drive up the administrative cost of aid programs. By promoting the consolidation of grant programs, standardizing crosscutting requirements, and streamlining audits, we propose to do just that. In addition, we recognize—as Federal aid dries up—that grant recipients may very well need the flexibility to transfer funds from one program to another program to meet local priorities, and that agency heads may find it more efficient to work together in jointly funding projects.

We propose to give them that flexibility. Finally, we recognize that all wisdom may not lie in Washington, that on occasion State and local governments may very well have a better idea on how aid can best be used. So, we give clear authority to agency heads to certify compliance with Federal mandates where State and local requirements accomplish the same ends.

Everyone should benefit from the reforms promised by this bill: The Federal Government, the grant recipients, and (most important) the people who are supposed to be served by these programs. Cutting back on the regulation of Federal aid means more than getting the Federal Government off the backs of State and local governments and nonprofit organizations. It means getting aid where it is needed when it is needed.

Recently I met with Governors from across the country to discuss the impact of the proposed budget cuts. Their message was clear: Cuts in Federal regulation must accompany cuts in Federal aid. Subsequent hearings which I chaired on the Federal paperwork burden and which Senator DURENBERGER chaired on grant reform only served to emphasize the importance of acting quickly to achieve meaningful reform in the grant system. I am pleased, therefore, that Senator ROTH has promised to report this legislation by the end of April. We must act with all deliberate speed.

By Mr. MATHIAS (by request):

S. 808. A bill to amend title 5, United States Code, to promote public safety by encouraging the employment of highly qualified air traffic controllers by establishing a salary classification system providing compensation commensurate with responsibility, by establishing a reasonable maximum number of weekly work hours, and by establishing a special retirement plan, and for other purposes; to the Committee on Governmental Affairs.

AIR TRAFFIC CONTROLLER ACT OF 1981

● Mr. MATHIAS. Mr. President, those who travel in comfort and ease on a commercial airline may not know that there is a tremendous amount of behind-the-scenes work that goes into the safe departure and arrival of each airplane. This work is the essential element by which our national air industry, both commercial and private, has been rendered successful and safe over the years.

I have long been concerned about the safety threat posed at airports, such as Washington National, by the high density of commercial scheduled flights, as well as commuter and private flights. An aircraft "operation" occurs at National Airport once every minute from 7 a.m. to 10:30 p.m. daily. Continued concentration and split-second timing by all those involved in this process is required to handle safely the current 17 million annual passenger volume at National.

The essential element in the process of safely shuttling planes in and out of our Nation's airports, including Washington National, is the work performed by the air traffic controller, one of the unseen, unsung, and unheard heros of modern society.

Air traffic controllers have been called "the guardians of the airways." They are responsible for tracking airplanes, instructing pilots on how to travel safely through an assigned airspace, while minimizing delays and regulating airport traffic. In the February 1977 volume of Psychology Today, writer David Martindale succinctly portrays the work of an air traffic controller in what he envisions an appropriate help wanted ad:

Help Wanted: World's busiest airport seeks radar jockeys for unusually stimulating, high-intensity environment. Must be able to direct at least 12 aircraft at one time and make instant decisions affecting the safety of thousands. No degree required, but prior experience as traffic cop, seeing-eye dog, or God helpful. Severe stress will jeopardize sanity and result in early termination from job, but employer will absorb cost of medical and psychiatric care.

Unfortunately, Mr. Martindale is not joking. Air traffic controllers labor under incredible conditions, constantly confronted by stress situations.

Air traffic controllers are Federal employees. Their terms and conditions of employment are set by statute. They cannot bargain over the wages they receive, the hours they work, the pension rights they are entitled to. Only Congress can make changes in these areas.

Years have passed, however, since Congress undertook a comprehensive review of the conditions of employment for these unique civil servants. At the same time, current relations between air traffic controllers and their employer, the Federal Aviation Administration, have been very strained, to say the least. This situation is serious.

As a result, the Professional Air Traffic Controllers Organization, representing air traffic controllers, has identified these areas of greatest concern to its members. This has been translated into legislation, which I am introducing today, at the request of PATCO.

I could not personally support all of the provisions of this bill that I am introducing but some of them or a combination of them are clearly justified. I strongly believe that a public debate on, and the ultimate resolution of, these issues should be attempted before it is too late—before the safety and convenience of the flying public is placed in jeopardy because of the unsuitable working conditions of those who are among the most responsible for flying safety. That will only occur in earnest, in connection with a piece of legislation, and therefore I introduce this bill at the request of the

controllers in order to provide a vehicle for debate.

Air traffic controllers perform their vital services under very difficult conditions. This bill attempts to remedy some of these conditions. It would, among other things, alter pay schedules, provide compensation for unusual or strenuous hours of work, change the air traffic controller workweek to assure optimum performance, efficiency and safety, and put in place a retirement system for air traffic controllers which recognizes their unique situation.

The present circumstances under which air traffic controllers work demand that we in the Congress hear their requests, and then act responsibly to fulfill those that we can. This is necessary not only in their interest, but in the interest of the safety of every air traveler in the Nation. I urge my colleagues to review the legislation with an eye toward how the Congress can best respond to the needs of air traffic controllers.

Mr. President, I ask unanimous consent that the text of the legislation which I am introducing be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 808

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Air Traffic Controller Act of 1981".

DEFINITION OF AIR TRAFFIC CONTROLLER

SEC. 2. Section 2109 of title 5, United States Code, is amended to read as follows:

"§ 2109. Air traffic controller

"For the purpose of this title, the terms 'air traffic controller' and 'controller' mean any air traffic control specialist, GS–2152 Series, including flow controllers, area specialists, data systems specialists, and military liaison and security specialists employed at air traffic control towers, air traffic control centers, and combined station-towers. The terms 'air traffic controller' and 'controller' do not include GS–2152 Series personnel employed at flight service stations or international flight service stations, teletype operators, clericals, electronic technicians, evaluation and proficiency development specialists (either temporary or permanent), flight data aides, cartographers, GS–2152 Series air traffic control specialists serving as instructors at the Federal Aviation Administration Aeronautical Center, GS–2152 Series air traffic control specialists employed at the Federal Aviation Administration Technical Center in Atlantic City, New Jersey, evaluation and proficiency development officers, facility chiefs, deputy chiefs, assistant chiefs, team supervisors, area officers, military liaison and security officers, data system officers, operations officers, planning officers, employees engaged in Federal personnel work in a purely clerical capacity, or any other supervisor or management official within the meaning of paragraph (10) or (11) of subsection (a) of section 7103 of this title."

ESTABLISHMENT OF WAGE CLASSIFICATION SCHEDULE

SEC. 3. (a) Section 5102(c) of title 5, United States Code, is amended (1) by striking out "or" in paragraph (26), (2) by striking out the period at the end of paragraph (27) and inserting in lieu thereof a semicolon followed by the word "or", and (3) by adding at the end thereof the following new paragraph:

"(28) air traffic controllers whose pay is determined under section 5376 of this title.".

(b) Chapter 53 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5376. Air traffic controllers

"(a) Air traffic controllers, as defined in section 2109 of this title, shall be paid the following annual salaries according to their step within the appropriate grade:

Grade	1	2	3	4	5	6	7	8	9	10
ATC–1	$22,266	$22,675	$23,084	$23,493	$23,902	$24,311	$24,720	$25,129	$25,538	$25,947
ATC–2	23,672	24,128	24,584	25,040	25,496	25,952	26,408	26,864	27,320	27,776
ATC–3	25,193	25,699	26,205	26,711	27,217	27,723	28,229	28,735	29,241	29,747
ATC–4	26,826	27,387	27,948	28,509	29,070	29,631	30,192	30,753	31,314	31,875
ATC–5	28,585	29,205	29,825	30,445	31,065	31,685	32,305	32,925	33,545	34,165
ATC–6	30,467	31,149	31,831	32,513	33,195	33,877	34,559	35,241	35,923	36,605
ATC–7	32,486	33,236	33,986	34,736	35,486	36,236	36,986	37,736	38,486	39,236
ATC–8	36,951	37,849	38,747	39,645	40,543	41,441	42,339	43,237	44,135	45,033
ATC–9	42,048	43,116	44,184	45,252	46,320	47,388	48,456	49,524	50,592	51,660
ATC–10	47,871	49,133	50,395	51,657	52,919	54,181	55,443	56,705	57,967	59,229
ATC–11	54,547	56,032	57,517	59,002	60,487	61,972	63,457	64,942	66,427	67,912
ATC–12	59,198	60,838	62,478	64,118	65,758	67,398	68,500	70,140	71,780	73,420

"(b) The salary schedule set forth in subsection (a) of this section shall take effect on the effective date of the Air Traffic Controller Act of 1981. It shall be revised by the Office of Personnel Management thereafter in accordance with the provisions of this section and any relevant collective bargaining agreement.

"(c) The benefits associated with and the classification criteria governing an employee's assignment to grades ATC-1 through ATC-12 shall be the same as those benefits and criteria related to General Schedule grades GS-5 through GS-16, respectively, unless otherwise expressly provided in this title.

"(d)(1) If the Consumer Price Index for Urban Wage Earners and Clerical Workers, published by the Bureau of Labor Statistics, United States Department of Labor, increases by 0.5 percent or more between April 1, 1981, and October 1, 1981, a cost-of-living adjustment of 1.5 percent for each full one-percent increase in such index shall be made to the basic annual salary of air traffic controllers at each step of each pay grade (as set forth under subsection (a)) beginning November 1, 1981. Any remaining fraction of a percent increase in such index during the six-month period shall be carried over to the next six-month period and used in computing the percentage increase in the index for such period.

"(2) Further increases to the rates of pay for controllers shall be made at subsequent six-month intervals based upon cost-of-living increases for six-month periods beginning on or after October 1, 1981, in the same manner as specified under paragraph (1) for the period beginning April 1, 1981, and ending October 1, 1981.

"(e) At the beginning of each fiscal year after the effective date of this section, the rate of pay for each step of each pay grade set forth in the salary schedule under subsection (a) shall be increased by 10 percent in addition to any increase under subsection (d).

"(f) Each air traffic controller shall be awarded a step increase on each anniversary of the controller's promotion to the current grade held by the controller until the controller reaches step 10, at which time the controller shall be promoted to the next grade. A controller promoted to the next higher grade as set forth in this paragraph will be paid at the step in the next higher grade which allows for a minimum 2 percent raise in salary as defined in Subsection (a).

"(g) In addition to a controller's basic salary and any other entitled differentials, an air traffic controller shall be paid a night shift differential of twenty percent of the controller's basic salary for each hour the controller is in an official duty, excused absence or administrative leave status between the hours of 4:00 p.m. and midnight. Such night shift differential shall be paid for each hour during which such employee is absent due to a holiday or other nonwork day or when travel is performed between 4:00 p.m. and midnight. Such employees who take leave between 4:00 p.m. and midnight shall be paid the night shift differential which they would have earned, if they had served in an official duty status.

"(h) In addition to a controller's basic salary and any other entitled differentials, a controller shall be paid a midnight shift differential of thirty percent of the controller's basic salary for each hour the controller is in an official duty, excused absence, or administrative leave status between midnight and 8:00 a.m. Such midnight shift differential shall be paid for each hour during which such an employee is absent due to a holiday or other nonwork day or when travel is performed between midnight and 8:00 a.m.

"(i) In addition to the controller's basic salary and any other entitled differentials, an air traffic controller shall be paid a weekend differential of twenty-five percent of the controller's basic salary for each hour the controller is in an official duty, excused absence, or administrative leave status between midnight Friday and midnight of the Sunday immediately following. Weekend differential shall be paid for each hour during which such an employee is absent due to a holiday or other nonwork day or when travel is performed between midnight Friday and midnight Sunday.

"(j) In addition to the controller's basic salary and any other entitled differentials, an air traffic controller shall be paid a differential of thirty percent of the controller's basic salary for the duration of the controller's assignments as an on-the-job training instructor.

"(k) The salary of an air traffic controller shall not be subject to the limitations of section 5308 or 5547 of this title.".

HOURS OF WORK

SEC. 4. Chapter 61 of title 5, United States Code, is amended by adding the following new section:

"§ 6102. Workweek for air traffic controllers

"(a) Notwithstanding the provisions of section 6101 of this title, full-time air traffic controllers, whose pay is fixed and adjusted

from time-to-time under section 5376 of this title, are subject to a basic workweek of 32 hours, and to the following additional requirements of employment:

"(1) Assignments to tours of duty must be scheduled in advance over periods of not less than one week.

"(2) The basic 32-hour workweek must be scheduled on four consecutive days, during the weekday period Monday through Friday when possible, and the three days outside the basic workweek must be consecutive.

"(3) The working hours in each day in the basic workweek must be the same.

"(4) The basic nonovertime workday must not exceed eight hours.

"(5) The occurrence of holidays must not affect the designation of the basic workweek.".

RIGHT TO BARGAIN COLLECTIVELY

SEC. 5. (a) Subchapter IV of chapter 71 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 7136. Air traffic controller bargaining

(a) Notwithstanding any other provision of law, air traffic controllers, as defined in section 2109 of this title, shall have the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection.

(b) For the purpose of this section, collective bargaining is the performance of the mutual obligation of the employer and the representative of the employee air traffic controllers to meet at reasonable times and confer in good faith with respect to wages, hours, and other terms and conditions of employment, or the negotiation of an arrangement, or any question arising thereunder, and the execution of a written contract incorporating any agreement reached if requested by either party, but such obligation does not compel either party, but such obligation does not compel either party to agree to a proposal or require the making of a concession.".

(b) The analysis of subchapter IV of chapter 71 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"§ 7136. Air traffic controller bargaining.".

SEC. 6. Subsection (e) of section 8336 of title 5, United States Code, is amended to read as follows:

"(e)(1) The Office of Personnel Management, within 30 days after the effective date of the Air Traffic Controller Act of 1981, shall issue regulations to provide for the following, notwithstanding any provision of this subchapter to the contrary:

"(A) An air traffic controller, as defined in section 2109 of this title, shall be eligible for retirement after 15 years of service as such an air traffic controller.

"(B) Full retirement shall be considered to be 20 years of service as an air traffic controller, regardless of the age of the controller. The retirement income of an air traffic controller for 20 years of service shall be 75 percent of the controller's highest annual gross salary.

"(C) An air traffic controller electing to retire before 20 years of service shall receive an annuity of 75 percent of the controller's highest annual gross salary minus three percent for each year of service less than 20 years.

"(D) An air traffic controller electing to retire after attaining more than 20 years of service shall receive an annuity of 75 percent of the controller's highest annual gross salary plus two percent for each year of service beyond 20 years.

"(E) When an air traffic controller has become eligible for retirement under this subsection, the controller shall receive full credit for all previous service as an employee of the Federal Government, whether civilian, military, or both, in determining the controller's retirement annuity.

"(F) Payment of an air traffic controller's retirement annuity shall commence within 30 days after the effective date of the controller's retirement, with monthly payments in an amount equal to the projected retirement annuity, until regular retirement annuity payments begin.

"(G) Semi-annually, retired air traffic controllers shall receive a cost-of-living adjustment increase equal to any percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers, published by the Bureau of Labor Statistics, United States Department of Labor, or an increase of seven percent, whichever is larger.

"(H) An air traffic controller shall qualify for vested rights in the retirement program described in this subsection after five years of service.

"(2) The Federal Aviation Administration shall immediately provide for the full funding of the retirement program described in this subsection.

"(3) Nothing in this subsection shall prevent payment of retirement benefits under any other retirement program or the application of survivor annuities pursuant to section 8341 of this title or any other law.".

ANNUAL AND SICK LEAVE

SEC. 7. Section 6302 of title 5, United States Code, is amended by adding the following new subsection:

"(g) The labor organization certified as the exclusive representative for any unit which includes employees who are air traffic controllers, as defined by section 2109 of this title, may bargain with the representatives of the agency employing such employees over the rate of accrual and accumulation of annual and sick leave by such employees. However, the rates of accrual and accumulation determined through bargaining under this subsection shall not be less than the rates otherwise applicable to employees under chapter 63 of this title.".

EFFECTIVE DATE

SEC. 8. The provisions of this Act shall take effect 90 days after the date of its enactment.●

By Mr. STAFFORD (for himself and Mr. ABDNOR) (by request):

S. 809. A bill to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction on specified circumstances; the Committee on Environment and Public Works.

RECOVERY OF CERTAIN COSTS ASSOCIATED WITH CONSTRUCTION OF DEEP DRAFT CHANNELS AND CERTAIN PORTS

● Mr. STAFFORD. Mr. President, I am today introducing legislation, on behalf of the administration, "to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances."

I comment the administration on this initiative, and ask unanimous consent that a copy of the bill, as well as the transmittal letter, be printed at this point in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 809

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That as a condition for operation and maintenance by the U.S. Army Corps of Engineers (hereinafter referred to as the Corps) of deep draft channels or ocean or Great Lakes ports of the United States and for the construction or rehabilitation of navigation projects by the Corps to improve deep draft channels and ports that are commenced on or after October 1, 1982, an appropriate non-Federal public body shall agree with the Secretary of the Army (hereinafter referred to as the Secretary) to reimburse the Federal government for Federal expenditures by the Corps for such operation, maintenance, and construction of rehabilitation activities, as provided in this Act, and shall agree to hold and save the United States harmless from liability for damage arising out of such activities, except to the extent that such damage is caused by the fault or negligence of the United States or of its contractors. Reimbursement will be on a port-by-port basis with appropriate share of entrance and connecting channel costs allocated to each port.

SEC. 2. For purposes of this Act, "deep draft channels or Ocean or Great Lakes port of the United States" shall mean waterway channels or ocean or Great Lakes ports of the United States of a federally authorized depth of more than fourteen feet other than those administered by the Saint Lawrence Seaway Development Corporation.

SEC. 3. The requirement in this Act for non-Federal reimbursement to the Federal government for Federal operation and maintenance expenditures by the Corps for deep draft channels or ocean or Great Lakes ports of the United States is effective commencing October 1, 1982. Such payments will be made to the Secretary, on behalf of the United States, no later than September 30, 1983, and annually thereafter, and as approved by the Secretary, may be scheduled and periodically adjusted to result in the repayment of actual operation and maintenance costs. Payments may be scheduled to reflect five year projections deemed reasonable by the Secretary, with subsequent corrections for actual expenditures.

SEC. 4. (a) The requirement in this Act for non-Federal reimbursement to the Federal government for Federal construction or rehabilitation expenditures by the Corps for improvements of deep draft channels or ocean or Great Lakes ports applies to any project for which initial construction funds are provided to the Corps on or after October 1, 1982.

(b) The entire amount of the Federal construction or rehabilitation expenditures to be reimbursed pursuant to the requirements of this Act, including interest during construction, shall be reimbursed within the life of the project but in no event to exceed fifty years after the date the project becomes available for use, as determined by the Chief of Engineers. The interest rate used for purposes if computing interest during construction and interest on the unpaid balance of each construction advance shall be determined by the Secretary of the Treasury, taking into consideration the average market yields during the month preceding the fiscal year in which each advance is made on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the project.

(c) This Act shall not be construed to prohibit non-Federal public bodies from securing financing through means other than provided for in this Act.

SEC. 5. Agreements with non-Federal public bodies to carry out obligations required by this Act may relate the timing and extent of such obligations to projects or to separable units, features, or segments of such projects

as the Chief of Engineers determines to be reasonable and otherwise within the requirements of this Act and the authorizations for the improvements concerned. Such agreements may reflect that they do not obligate future State legislative appropriations for their performance or payment when obligating future appropriations or other funds would be inconsistent with State constitutional limitations.

SEC. 6. (a) On or after October 1, 1982, and in accordance with the provisions of this section and any regulations promulgated by the Secretary pursuant to this section, an affected non-Federal public body may provide for the recovery of its reimbursement obligations pursuant to this Act (including its administrative expenditures incurred therefor) by the collection of fees for the use by vessels in commercial waterway transportation in deep draft channels or ocean or Great Lakes ports of the United States (or appropriate segments thereof) whose Federal operation, maintenance, or improvement occasions the reimbursements required by the affected non-Federal public body.

(b) for purposes of this section—

(1) The term "commercial waterway transportation" means any use of a vessel in any deep draft channel or ocean or Great Lakes port of the United States as defined in this Act—

(A) In the business of transporting persons or property for compensation or hire, or

(B) In transporting property in the business of the owner, lessee, or operator of the vessel.

(2) Fees are not authorized for collection for—

(A) Vessels owned and operated by the United States or any other Nation or political subdivision thereof and not engaged in commercial service; or

(B) Vessels used by a State or political subdivision thereof in transporting persons or property in the business of the State or political subdivision.

(C) The Secretary, in consultation with the Secretaries of State, Commerce, Transportation, Treasury, Energy, and Agriculture, the Attorney General of the United States, and the Director of the Office of Management and Budget, may promulgate, and may from time to time revise, regulations and guidelines to govern the programs of non-Federal fee collection that may be undertaken pursuant to the authority of this section.

SEC. 7. This Act shall not be construed to prohibit or otherwise interfere with any Department of the Army or other Federal authority to operate, maintain, or improve any deep draft channel or ocean or Great Lakes port of the United States for purposes of Coast Guard navigation requirements, Department of Navy transportation requirements or any other national defense transportation requirements. Moreover, this Act shall not be construed ot require any non-Federal contribution for navigation costs allocable to vessels owned and operated by the United States or any other Nation and not engaged in commercial service. The Secretary, in consultation with other concerned agencies, shall establish guidelines and determine any cost apportionments that are necessary to carry out this section.

SEC. 8. Monies paid to the Secretary, pursuant to this Act, shall be deposited in the general fund of the Treasury. The Secretary shall report to the Congress on or before September 30, 1982, and annually, before the start of each fiscal year thereafter, on the actual and anticipated receipts of the United States pursuant to this Act and the condition and operation of the cost recovery program required by this Act.

SEC. 9. Provided that an appropriate non-Federal public body agrees, without benefit of the financing available under section 4(b) of this Act, to reimburse the Federal government for all of its construction costs of a project on an annual basis during construction and to begin such reimbursements not later than one year after construction is initiated, the Secretary, acting through the Chief of Engineers, is authorized to study, design, construct, and rehabilitate such a project to improve deep draft channels and ocean and Great Lakes ports of the United States, as defined in section 2 of this Act, and to operate and maintain such channels and ports, at such depths and dimensions and with such dredged material disposal and other related facilities, as the Secretary determines to be justified to insure the safe and efficient conduct of national defense and commercial waterway transportation. Such improvements may be provided and maintained as a Federal project pursuant to laws and policies then in existence and without a requirement for any further congressional authorization.

SEC. 10. There are authorized to be appropriated to the Secretary of the Army such sums as are necessary to carry out this Act.

DEPARTMENT OF THE ARMY,
Washington, D.C., March 25, 1981.

Hon. GEORGE M. BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft of legislation "To require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances."

This proposal is a part of the Department of the Army's Civil Works legislative program for the 97th Congress. The Office of Management and Budget advises that enactment of this proposed legislation would be in accord with the program of the President. The Department of the Army recommends that the proposal be enacted by the Congress.

PURPOSE OF LEGISLATION

The purpose of the proposed legislation is to provide for the full recovery of certain operations, maintenance and construction costs of the U.S. Army Corps of Engineers for deep draft ports and their connecting channels with an authorized depth of more than 14 feet. The legislation would also authorize construction in such waterways in specified circumstances.

For operation and maintenance work commenced on or after October 1, 1982, and for construction work for which initial funds are provided on or after that date, an appropriate non-Federal public body must agree to reimburse the Federal Government the full cost not apportioned to the Navy or other Government-owned vessels. Costs which can be apportioned to the use of such channels and ports by such vessels will not be recovered from non-Federal interests. The proposal provides that the non-Federal interest may recover its costs by the collection of fees for the use of the channels for which reimbursement of costs are required. The collection of such fees would be limited to vessels transporting persons or property for compensation or transporting property in the business of the owner, lessee or operator.

In connection with the authority of local public bodies to collect fees from users, the Secretary of the Army would promulgate regulations governing such collections, if needed. These regulations would be designed to foster equity among users and economically efficient use of deep draft ports and channels.

Repayment of construction costs must be within the life of the project, but in no event to exceed 50 years after the date the project becomes available for use. Interest during construction and on the unpaid balance will be based on the yield of U.S. securities during construction. The interest rate applicable to each year's construction expenditures will be used to amortize those expenditures.

In order to encourage and expedite needed port improvements where non-Federal funds are secured through financing independent of this legislation, section 9 would provide authority for the Secretary of the Army, acting through the Chief of Engineers, to study, design, construct, and rehabilitate deep draft channels and port improvements that the Secretary determines to be justified, provided that an appropriate non-Federal public body agrees to reimburse the Federal Government for all of its construction costs for the project on an annual basis during construction. Such improvements could be provided and maintained as a Federal project pursuant to laws and policies then in existence and without a requirement for any further congressional authorization.

The requirements of Section 221 of the Flood Control Act of 1970 will be applied to obtain enforceable agreements. The proposed legislation provides, however, that agreements may reflect State constitutional limitations on obligating future legislatures. This would permit States with such constitutional limitations to participate in harbor and channel improvement projects.

Section 7 would provide that, should non-Federal port interests decline to participate in operations, maintenance or construction activities which are also essential to defense transportation requirements, their lack of participation would not prohibit such work as is required to maintain the defense capability. Channel depths and widths in these instances will be constructed and maintained only to the minimum dimensions required for Navy and other defense transportation requirements.

We recognize that there will be many questions about this proposal that will require careful analysis. However, recovery of Federal costs for deep draft navigation is an important step in balancing the budget. The Department of the Army and other representatives of the Administration will be receptive to proposals to improve the legislation, as it progresses through Congress, to insure the enactment of equitable and workable cost recovery requirements; for example, consultations with Canada are being initiated to further assess Canadian interest in this legislation. We will be in touch with you further once these consultations are completed.

COST AND BUDGET DATA

Enactment of the enclosed legislation would require reimbursement to the Federal Government for navigation expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction or rehabilitation activities on the deep draft channels and ocean and Great Lakes ports of the United States which are not related to defense or to non-commercial governmental use. This would result in significant savings to the Federal Government.

ENVIRONMENTAL AND CIVIL RIGHTS IMPACT CONSIDERATIONS

Enactment of enclosed legislation will have no significant environmental or civil rights impacts. Individual Federal activities that occasion the reimbursements required by this Act will only be undertaken pursuant to laws and policies then in existence and after any necessary assessment and review of their impacts.

Sincerely,

EDWARD LEE ROGERS,
Acting Assistant Secretary of the Army (Civil Works).●

By Mr. STAFFORD (for himself and Mr. ABDNOR) (by request):

S. 810. A bill to provide for the recovery of capital and operation and mainte-

nance costs assignable to commercial waterway transportation for certain U.S. Army Corps of Engineers inland waterway projects; to the Committee on Environment and Public Works.

INLAND WATERWAY USER FEE ACT OF 1981

● Mr. STAFFORD. Mr. President, I am today introducing legislation, on behalf of the administration, "to provide for the recovery of capital and operation and maintenance costs assignable to commercial waterway transportation for certain U.S. Army Corps of Engineers inland waterway projects."

I commend the administration on this initiative, and ask unanimous consent that a copy of the bill, as well as the transmittal letter, be printed at this point in the RECORD.

There being no objection, the bill and letter was ordered to be printed in the RECORD, as follows:

S. 810

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Inland Waterway User Fee Act of 1981."

SEC. 2. (a) The Secretary of the Army, in consultation with the Secretary of Transportation, shall prescribe a system of user fees to be levied on commercial waterway transportation on the inland waterway system pursuant to this Act.

(b) The schedule of user fees authorized under this section shall be established yearly on the basis of (1) the anticipated Federal expenditures on behalf of the inland waterway system and various segments thereof; (2) the expected volume of commercial traffic; (3) seasonal and other repetitive peak demands for use of the inland waterways; (4) congestion at various points; and (5) any other factors that the Secretary of the Army finds reasonable and equitable.

(c) The Secretary of the Army, in prescribing a system of user fees under this section, is authorized to utilize, but is not limited to, one or more of the following mechanisms as a way to recover Federal costs from the users of the system: (1) license fees; (2) charges based on ton-miles over a given segment; (3) lockage fees; (4) congestion fees; and (5) charges based on capacity of cargo vessels over various segments of the inland waterway system.

(d) Interim user fees starting October 1, 1981, with final user fees in effect January 1, 1982, shall be adequate to recover 100 percent of anticipated Federal operation and maintenance expenditures assigned to commercial waterway transportation, plus an amount necessary to amortize the capital expenditures for rehabilitation or replacement of existing structures completed after October 1, 1981, over a period of no more than 15 years for rehabilitation or 50 years for replacement, less any amounts collected by the tax on fuel used for commercial transportation on inland waterways.

(e) User fees on new or modified waterways completed for through traffic after October 1, 1981, shall be phased to provide for the full recovery of operation and maintenance and construction costs, with interest, over a period of no more than 50 years from the date of initial movement of through traffic.

(f) User fees collected under this section shall be credited to the Inland Waterways Trust Fund established by Section 203 of the "Inland Waterways Revenue Act of 1978" (P.L. 95–502).

SEC. 3. Failure to pay any user fees prescribed under this Act shall subject the violator to a fine of not more than $10,000 for each day the waterway is used in violation of this Act and prohibit the violator from operating on any portion of the inland waterway system or using any lock on the inland waterways that is operated and maintained by the United States during the period of time the violator has failed to pay the fees prescribed by this Act. Such fine shall be collected and credited to the Inland Waterways Trust Fund.

SEC. 4. For purposes of this Act, Federal expenditures for operation and maintenance and for construction and rehabilitation of inland waterways projects shall be assigned to commercial waterway transportation as follows: (1) for projects authorized only for navigation, 90 percent of all costs less any specific costs for recreation are to be assigned to commercial waterway transportation; (2) for multiple-purpose projects for which costs have been aassigned to navigation, costs assigned to commercial waterway transportation will be in accord with that assignment; (3) for all other multiple purpose projects providing navigation benefits but for which there have been no cost assignments, costs assigned to commercial waterway transportation will consist of all specific navigation costs, plus 10 percent of joint costs except that costs assigned to commercial waterway transportation for the Mississippi River and Tributaries Project will be 25 percent of total project costs. Expenditures on channel improvements for the Mississippi River and Tributaries Project will be considered maintenance.

SEC. 5. The interest rate used pursuant to this Act shall be determined by the Secretary of the Treasury, taking into consideration the average market yields during the construction period on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the project.

SEC. 6. Section 204(a) of the Inland Waterways Revenue Act of 1978 is amended by deleting its existing provisions and substituting in lieu thereof the following: "(a) In General—Amounts in the Trust Fund shall be available as provided by appropriations Acts for making operation and maintenance expenditures for navigation on all of the inland and intracoastal waterways of the United States with an authorized depth of 14 feet or less used for commercial transportation, excluding privately constructed and maintained channels and including all waterways described in Section 206 of this Act, and for making capital expenditures for projects that are initiated on those waterways after the date of enactment of this Act."

SEC. 7. As used in this Act, the term—

(a) "Inland waterways" includes all inland and intracoastal waterways of the United States with an authorized depth of 14 feet or less, used for commercial transportation, excluding privately constructed and maintained channels and including all waterways described in Section 206 of the Inland Waterways Revenue Act of 1978 (P.L. 95–502).

(b) "Commercial Waterway Transportation" means any use of a vessel on any inland or intracoastal waterway of the United States—

"(1) in the business of transporting persons or property for compensation or hire, or

"(2) in transporting property in the business of the owner, lessee, or operator of the vessel."

SEC. 8. There are authorized to be appropriated such sums as are necessary to carry out the purposes of this Act.

DEPARTMENT OF THE ARMY,
Washington, D.C., March 25, 1981.

Hon. GEORGE M. BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft of legislation "To provide for the recovery of capital and operation and maintenance costs assignable to commercial waterway transportation for certain United States Army Corps of Engineers inland waterway projects."

This proposal is a part of the Department of the Army's Civil Works legislative program for the 97th Congress. The Office of Management and Budget advises that enactment of this proposed legislation would be in accord with the program of the President. The Department of the Army recommends that the proposal be enacted by the Congress.

PURPOSE OF LEGISLATION

The purpose of the proposed legislation is to provide for the full recovery of certain capital and operation and maintenance costs of the U.S. Army Corps of Engineers for inland waterways with an authorized depth of 14 feet or less. This requirement will eliminate the traditional subsidy by the Federal Government for inland and intracoastal navigation projects. The initial step in this direction was enactment of the "Inland Waterway Revenue Act of 1978" which imposed a fuel tax phased in over five years to recover a small portion of the costs for a significant part of the inland and intracoastal system.

The proposed legislation would expand Federal cost recovery to all channels and harbors with authorized depths of 14 feet or less and used for commercial transportation. It would employ a system of fees and charges, rather than further increases in the fuel tax rate, effective on October 1, 1981, to recover the full amount of Federal operation and maintenance costs assigned to commercial waterway transportation not recovered by the fuel tax. An interim system of fees and charges to be initiated in October, 1981, would be based on the best cost and traffic information available at that time and would be modified, if necessary, to adjust for inaccuracies found prior to January 1982. Periodic readjustments would be required after that date to reflect actual cost and traffic experience.

Federal costs assigned to commercial waterway transportation for structural rehabilitation and replacement work completed after October 1, 1981, also will be included in the system of fees and charges, with a 15-year recovery period for rehabilitation work and a 50-year recovery period for replacement work. For new or modified waterways completed for through traffic after October 1, 1981, the Secretary of the Army, in consultation with the Secretary of Transportation, would schedule fees to provide for full recovery, over a period of 50 years or less, of Federal construction and operation and maintenance costs assigned to commercial waterway transportation. The schedule for recovery of costs for new waterways will recognize that an initial growth period is required and that some of the early costs may have to be deferred, with interest, to a later time after waterway traffic has developed sufficiently to bear the full cost.

Recovery of full Federal costs will be assured by recovery of actual expenditures with interest, including interest during construction. Interest rates will more closely reflect the actual interest costs to the Federal Government by using rates established by taking into consideration average market yields during the construction period, on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the project or work.

In establishing the user fee system, a wide variety of collection mechanisms would be available, including license fees, waterway segment charges based on vessel capacity or tonnage carried, lockage fees and congestion fees. The choice of fee system would consider the Federal expenditure to be recovered, the timing and expected volume of commercial waterway traffic, and the potential congestion at various points plus other pertinent factors. The objective would be to

develop a user charge schedule and collection system which would minimize disruption to existing and future waterway commercial traffic and promote efficient use of the system while recovering all specified Federal costs except those sunk in projects operational before October 1, 1981. This may result in reduced operations on some marginal segments or in closure of segment which support little commercial traffic now and have no prospect for increases sufficient to permit future cost recovery.

Charges and fees collected under the proposed program would be credited to the Inland Waterway Trust Fund established by the 1978 Act. The 1978 Act would be amended to permit the Fund to be used for operation and maintenance, as well as for construction and rehabilitation expenditures for all authorized inland and intracoastal navigation projects whether or not the project authorization specifically authorizes use of the Fund. There is also a provision prohibiting use of the inland water systems unless fees prescribed by the Act have been paid and for collection of fines in the amount of $10,000 for each day the waterway is used in violation of the Act. Fines would also be credited to the Fund and would be available for appropriation, as would user fees.

Federal expenditures to be recovered under this Act would be those assigned to commercial waterway transportation. The procedures for assigning costs as specified in the proposed legislation would, where there has been no previous cost assignment, assign only a portion of the total costs to commercial waterway transportation in recognition of the benefits incident to other purposes which are not readily identified. Judgments will be required in certain cases where the authorizing documents are not specific as to the extent other purposes receive benefits or are authorized. In these cases, we will consider projects to be authorized only for navigation.

We recognize that there will be many questions about this proposal that will require careful analysis. However, recovery of Federal costs for the inland and intracoastal waterway system is an important step in balancing the budget. The Department of the Army and other representatives of the Administration will be receptive to proposals to improve the legislation as it passes through Congress, to ensure the enactment of equitable and workable cost recovery requirements.

COST AND BUDGET DATA

Enactment of the enclosed legislation would require reimbursement to the Federal Government for navigation expenditures by the U.S. Army Corps of Engineers for commercial waterway transportation on the inland and intracoastal waterways of the United States. This would result in significant savings to the Federal Government.

ENVIRONMENTAL AND CIVIL RIGHTS IMPACT CONSIDERATIONS

Enactment of the enclosed legislation will have no significant environmental or civil rights impacts. Individual Federal activities that occasion the reimbursements required by this Act will only be undertaken pursuant to existing or future congressional authorizations, and after any necessary assessment and review of their impacts.

Sincerely,

EDWARD LEE ROGERS,
Acting Assistant Secretary of the Army (Civil Works).●

Mr. DOLE (for himself, Mr. NICKLES, Mr. JOHNSTON, and Mr. BENTSEN):

S. 811. A bill to amend the Powerplant and Industrial Fuel Use Act of 1978 to permit local distribution companies to continue natural gas service to residential customers for outdoor lighting fixtures for which natural gas was provided on the date of enactment of such act, and for other purposes; to the Committee on Energy and Natural Resources.

LEGISLATION RELATING TO OUTDOOR GAS LIGHT FIXTURES

● Mr. DOLE. Mr. President, I am pleased to have Senator NICKLES, Senator JOHNSTON, and Senator BENTSEN join me in introducing a bill that will have the effect of amending section 402 of the powerplant and industrial gaslights to retain service to their lights. According to present provisions, residential gaslight owners will have their service terminated on January 1, 1982.

This bill is identical to the legislation which was cosponsored by 134 Members of the House during the 96th Congress and which passed the House by unanimous consent on December 13, 1980. It amends section 402 by removing the requirement that existing residential gaslights be extinguished by January 1, 1982.

My reasons for offering this bill are twofold. First, section 402 was included in the Fuel Use Act at a time of an apparent shortage of natural gas. Recent statistics show a continued improvement on the natural gas supply side. Furthermore, we have recently witnessed record levels of gas well drilling—an indicator of further supply side improvements. Since extensive supplies of natural gas are currently available, I believe that we should seriously consider the problems which have arisen as a consequence of section 402(b).

Second, the natural gas savings realized by section 402 are minimal—14 hundredths of 1 percent of gas usage—but an elaborate administrative apparatus would nevertheless be required to administer its enforcement. This bill will continue to encourage conservation but it will allow the consumer the opportunity to make a decision by informing him or her of the cost of retaining gas lighting rather than forcing the consumer to make a costly conversion to electrical lighting. But, then the gaslight prohibition is costly to everyone—the Federal Government, the States, municipal governments, gas companies, and the consumer.

Whether or not they own gaslights, taxpayers will, of course, have to foot the bill; just as they have paid for development and promulgation of Federal regulations by the Government. And, they will pay for the States and in some cases the municipalities to enforce the regulations—not to mention having to respond to the thousands of requests for exemptions that will undoubtedly be generated by enactment of the law.

This bill will not change the prohibition contained in section 402 against installing new gaslights. The bill simply attempts to remedy an inequity that results from forcing persons who have installed these lights in the past to convert to electricity when the necessity for doing so is nonexistent. In order to discourage the use of natural gas for outdoor lighting, the measure still requires local distribution companies to periodically inform customers about the amount and annual cost of natural gas consumed in an average outdoor light. I believe that current gas supply data, combined with logic, mandate the amendment of section 402 of the Powerplant and Industrial Fuel Use Act.●

BY Mr. METZENBAUM:

S. 813. A bill to modify the project for Ashtabula Harbor, Ohio, to authorize the enlargement of a turning basin; to the Committee on Environment and Public Works.

EXPANSION OF ASHTABULA HARBOR

Mr. METZENBAUM. Mr. President, today I am introducing legislation to authorize expansion of Ohio's Ashtabula Harbor in order to enable large shipping vessels to trade at this historically important port. Expansion is urgently needed to permit the harbor's turning basin to accommodate the newer "1,000 footer" cargo vessels that are in use today. Without such a project, this harbor's future as an important trading port will be jeopardized. And without these trading activities, the economies of the surrounding communities will also suffer.

Mr. President, Ashtabula has a long history as one of the largest iron ore and coal handling ports on the Great Lakes. The steelmaking industries of the Mahoning Valley area of Ohio and the Pittsburgh area of Pennsylvania depend heavily upon the iron ore shipped into the Ashtabula Harbor. In addition, Ashtabula has served as a key point of departure for coal exports. And in recent years, the quantity of coal shipped out of Ashtabula to Canada and other foreign markets has increased substantially.

But unless the harbor's turning basin is expanded—and expanded soon—the port will soon become obsolete. That is because almost all of the orders for vessels being constructed today are of the 1,000-foot variety. Enlargement is urgently needed to avoid damage to these vessels' propellers, rudders, and hulls.

The Port of Ashtabula curently handles an estimated 12 million tons of cargo a year and shipping companies in the area envision a growing trade—but only if larger ships can use the harbor. Last year, the Corps of Engineers, recognizing the restrictive size of the harbor for the larger vessels, removed 250 feet of the breakwater from the entrance of the Minnesota slip to give the larger vessels access to this part of the harbor. The outer harbor is still too restrictive for larger vessels.

My bill would correct this problem. It is simple and straightforward. The bill provides for extending that section of the harbor known as area E eastward for up to 500 feet and northward to within 150 feet of the east breakwater.

This expansion will help to insure that Ashtabula Harbor will remain a viable and vital port on the Great Lakes. I ask unanimous consent that the text of this bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 813

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the project for Ashtabula Harbor, Ohio, author-

ized by the Rivers and Harbors Act of 1965 (Public Law 89-298) is hereby modified to authorize the enlargement of the turning basin known as area E by extending it eastward for up to five hundred feet and northward to within one hundred and fifty feet of the United States east breakwater.

By Mr. NUNN (for himself, Mr. CHILES, Mr. RUDMAN, and Mr. BOREN):

S. 814. A bill to improve the administration of criminal justice with respect to organized crime and the use of violence; to the Committee on the Judiciary.

ORGANIZED CRIME ACT OF 1981

● Mr. NUNN. Mr. President, on behalf of myself and Senators CHILES, RUDMAN, and BOREN, I am today introducing the Organized Crime Act of 1981.

This bill is the outgrowth of extensive hearings I chaired last year in the Permanent Subcommittee on Investigations on organized crime and the use of violence.

Its specific purpose is to assist the Federal Government to combat the violent aspects of organized criminal activity. Since it would be generally applicable, however, it also would serve to bolster the Government's efforts to fight all violent crime which has become one of our most serious and alarming domestic problems.

A number of our specific provisions were advocated during our hearings last April and May by FBI Director William Webster and the then Assistant Attorney General for the Criminal Division, Philip B. Heymann. Their recommendations were amplified by the testimony of other law enforcement officials and the evidence we received.

Our hearings painted an alarming picture of organized crime and its use of violence. As Judge Webster testified, organized crime consists of "various groups engaged in an enormous, structured and deadly serious illegal business that rely on violence to maintain themselves."

Even though organized crime has become richer and somewhat more sophisticated, the testimony we received indicated that it still relies on intimidation and violence to achieve its ends, just as it did in the days of Al Capone, Lucky Luciano, and the prohibition wars of the 1920's.

Perhaps the most alarming display of this legacy of violence today is organized crime's use of force and threats to take over otherwise legitimate businesses.

We heard dramatic testimony from a former Kansas City, Mo., businessman who was "muscled" by the Mafia outfit in that city. His father and some of his best friends were murdered when he refused to cooperate with the mob, and eventually his entire business literally was bombed out of existence.

That businessman was forced to join the Federal witness security program, tear up his roots and secretly move to another location where he now lives under a new identity.

The outfit threatened the lives of the businessman's relatives the very night he testified before our subcommittee. He has paid a very high price. He now lives under the constant threat of mob violence, yet he has not yielded to these [illegible].

Mobsters today know no ethnic bounds, especially when narcotics trafficking rings are considered within the broad category of organized criminal activity. As Peter B. Bensinger, Administrator of the Drug Enforcement Administration, testified—

> There is no one specific ethnic stereotype that is synonymous with "organized crime." The composition of organized crime syndicates varies from place to place, from year to year.

The subcommittee received other testimony which illustrated the variety of criminal groups operating today. We learned of the Mafia—or la Cosa Nostra, as it is called by its members. We heard about narcotics rings made up primarily of Colombians or Cubans, of prison gangs built around a nucleus of Mexican Americans, of a loose confederation of thugs known as the Dixie Mafia.

As diverse as the groups may be, however, they share one thing in common: the use of violence to enforce discipline within their organizations and to work their will on others, such as rival gangs or legitimate businessmen.

Gang warfare still exists, especially among rival narcotics organizations. We heard testimony that in Dade County, Fla., police investigated 189 murders in 1979 alone—an increase of 81 percent since 1976. Of those 189 murders, 42 were determined to have been drug related. Many of these murders remain unsolved. Most of them apparently resulted from shootouts between rival gangs. This type of open warfare reaches beyond gang members, however, for they have been known to open fire in parking lots and on the freeways of south Florida—thereby endangering innocent bystanders.

This growth of violence in the drug trade was particularly disturbing to Capt. Marshall Frank of the Dade County Public Safety Department, who testified—

> What is particularly frightening both to law enforcement agencies and the community in general is the rampant and savage nature of these crimes. Some have drawn an analogy between the "Cocaine Cowboys" and the Mafioso killing of the roaring twenties. . . . I would venture to say that the Mafia might well have taken lessons from this more contemporary band of criminals.

Quite often gang wars are carried out through contract killings or murder for hire in which someone is paid to carry out a "hit" on a rival mobster or even a member of the same gang. There have been numerous cases, especially within the fraternity of drug traffickers, in which contracts have been placed on the lives of judges, prosecutors, and investigators—and especially on witnesses who testify against members of the ring.

Our subcommittee has established that thousands of murders over the past decade were mob related. The brutal slaying of Federal District Judge Wood in Texas was evidence that mob violence is not the stuff of fiction. It is very, very real.

The role of the Federal Government in combatting violent crime is limited by the Constitution, which reserves the general police power and responsibility to the States. The Federal establishment does have an important role, however, when crimes of an interstate nature are involved. Traditional organized crime families and other groups, such as narcotics rings and prison gangs, commonly operate across State lines. Many of their activities fall squarely within the Federal jurisdiction, and the Government has been active in this type of law enforcement for years.

The bill we introduce today would extend Federal jurisdiction in the area of contract murders in cases in which the Attorney General deems it necessary to assist State and local law enforcement authorities. Prime responsibility in murder-for-hire cases would continue to rest at the local level, but the FBI would be able to exercise jurisdiction in certain investigations.

Otherwise, our bill is designed to strengthen the hand of Federal agencies in dealing with the violent aspects of organized criminal activity. Most of its provisions extend the protections afforded Federal law enforcement personnel and their families and potential as well as actual Government witnesses and informants.

The bill contains the following 10 provisions:

First, we would grant limited Federal jurisdiction over cases involving contract killings or murder for hire.

Second, we would amend the Federal assault statute to cover all Government personnel who investigate and prosecute Federal criminal offenses and who gather national security intelligence.

Third, we would make it a Federal crime to harm or threaten the families of Federal law enforcement officials.

Fourth, we would amend the obstruction of justice statute to cover informants and potential witnesses as well as witnesses who actually are under subpena to testify.

Fifth, we would amend the Freedom of Information Act to increase protection of information which would tend to identify confidential informants as well as information which would positively identify such individuals.

Sixth, we would allow the Government to apply for a reduction in the sentence of a defendant who cooperates with the Government.

Seventh, we would increase the penalties a Federal judge may impose when a Federal crime is committed through the use of violence.

Eighth, we would permit Federal judges to seal those portions of wiretap documents which could reveal ongoing criminal investigations or wire intercepts.

Ninth, we would allow State and local law enforcement officials limited access to Federal grand jury information when they are assisting in the investigation or prosecution of a Federal offense.

Tenth, we would permit Federal judges to consider the danger a defendant poses to the community when setting release on bail.

I was pleased to note in a recent dispatch in the New York Times that the

Justice Department has been giving serious consideration to supporting our proposals.

Mr. President, I ask unanimous consent that the text of the bill and a section-by-section analysis of it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 814

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as "The Organized Crime Act of 1981".

SEC. 2. Title 18, United States Code, is amended by adding a new section 1118, as follows:

"Section 1118.—Contract Murder.

"Section 1118.—(a) Definitions.

"(b) Commissioning, or committing a contract murder, attempted contract murder, or contract assault.

"(c) Attorney General guidelines.

"(d) Effect on existing Federal cooperation with State authorities.

"(e) Effect on State law."

"(a) DEFINITIONS.—As used in this Chapter:

"(1) 'Contract Murder' means a murder, attempted murder or assault which violates the laws of the State where the prohibited acts were committed or commissioned, and which was commissioned, committed or attempted to be commissioned or committed by any person offering, providing, agreeing to provide, threatening to cease providing or soliciting, receiving or agreeing to receive anything of value.

"(2) 'Commission or commissioned' means offering, planning, instructing, ordering, coercing, or otherwise initiating or being instrumental in a contract murder or attempted contract murder.

"(3) 'Anything of value' means anything tangible or intangible the offering party agrees to provide or the receiving party agrees to receive in exchange for committing or attempting to commit a contract murder as defined in this Chapter, and may include, but is not limited to, tangible items such as money, land or position, or intangible items such as gaining favor, anticipation of rewards for services performed or other similar items.

"(4) 'Superior' means any person exerting direct or indirect responsibility, authority, control or influence over another person.

"(5) 'Subordinate' means any person who is directly or indirectly responsible to or under the authority, control, or influence of another person.

"(b) COMMISSIONING OR COMMITTING A CONTRACT MURDER, ATTEMPTED CONTRACT MURDER OR CONTRACT ASSAULT.—

"(1) Any person who offers, provides, agrees to provide, threatens to cease providing, solicits, receives or agrees to receive anything of value as consideration for the commission of a murder, attempted murder, or assault which violates the laws of the State in which the prohibited acts were committed or commissioned shall be fined not more than $10,000 or imprisoned for not more than ten years, or both; and if personal injury results, shall be fined not more than $50,000 or imprisoned for not more than 20 years, or both; and if death results, shall be fined not more than $100,000 or be imprisoned for any term of years or for life, or both.

"(2) In any prosecution under this section, if it is shown that there was present—

"(A) a direct or indirect contact or communication between two or more persons involving an offer, agreement or solicitation to commit a contract murder, or

"(B) a direct or indirect contact or communication between a superior and a subordinate involving an offer, agreement, or solicitation to commit a contract murder,

then there is prima facie evidence that the prohibited acts described in subsection 1118(b)(1) were committed and commissioned for anything of value.

"(3) Any person who uses actual or threatened force, violence or fear, or any person who uses his reputation for being a person who uses force and violence, to coerce or attempt to coerce another person to commit a murder, attempted murder, or assault in violation of the law of the State in which the prohibited acts were committed or commissioned shall be in violation of this section and shall be subject to the penalties set forth in subsection 1118(b)(1).

"(c) ATTORNEY GENERAL GUIDELINES.—The Attorney General shall, by regulation, designate criteria for federal participation in the investigation and prosecution of contract murders as defined in this section; provided, however, that these criteria are to be used solely for the purpose of providing comity with State and local authorities and to preserve and coordinate the limited resources of the Federal government, and in no way shall limit the authority of the Federal government to investigate and prosecute violations of this section.

"(d) EFFECT ON EXISTING FEDERAL COOPERATION WITH STATE AND LOCAL AUTHORITIES.—Nothing in this section shall compromise or otherwise affect the ability of federal officials to assist State and local officials upon request.

"(e) EFFECT ON STATE LAWS.—This chapter shall not preempt any field of law with respect to State legislation which would be permissible in the absence of this section. No law of any State which would be valid in the absence of section 1118 and no officer, agency, or instrumentality of any State may be deprived by virtue of section 1118 of any jurisdiction over any offense over which it would have jurisdiction in the absence of section 1118."

SEC. 3. Section 1114 of title 18, United States Code, is amended by adding after "Department of Justice," the following: "any attorney, agent, or employee of the United States Government employed to investigate or prosecute violations of federal criminal statutes, or any officer or employee of any department or agency within the Intelligence Community (as defined in section 4–207 of Executive Order 12036 of January 24, 1978, or successor orders),".

SEC. 4. (a) Chapter 7 of title 18, United States Code, is amended by adding at the end thereof a new section 115, as follows:

"§ 115. Protection of families of Federal officers.

"Any person who assaults, maims, kidnaps, murders or threatens to assault, maim, kidnap or murder the spouse, parent, brother, sister, child, ward, or other relative by blood or marriage, of any person designated in section 1114 of this title, with intent to impede, intimidate, interfere with, or retaliate against, the designated person while engaged in or on account of the performance of his official duties, shall be fined not more than $10,000 or imprisoned not more than ten years, or both. If a dangerous weapon is used in the commission of the offense, he shall be fined not more than $20,000 or imprisoned not more than fifteen years, or both. If personal injury results, he shall be fined not more than $50,000 or imprisoned for not more than twenty years, or both. If death results, he shall be imprisoned for any term of years or for life."

(b) The analysis of Chapter 7 of title 18, United States Code, is amended by adding at the end thereof the following:

"115. PROTECTION OF FAMILIES OF FEDERAL OFFICERS."

SEC. 5. Section 1503 of title 18, United States Code, is amended to read as follows:

"§ 1503. Influencing or injury officer, juror, witness, potential witness, or informant.

"Any person who corruptly, or by threats or force, or by any threatening letter or communication, endeavors to influence, intimidate or impede any witness, potential witness, or informant in any court, Grand Jury or other proceeding of the United States or before any United States commissioner or other committing magistrate, or any grand or petit juror, or officer in or of any court of the United States, or officer who may be serving at any examination or other proceeding before any United States commissioner or other committing magistrate, in the discharge of his duty; or who injures any party, witness, potential witness, or informant in his person or property on account of his attending, having attended, or his potential participation in such court, grand jury, or other proceeding or examination before such officer, commissioner, or other committing magistrate, or on account of his testifying, having testified, being a potential witness to, or providing information on any matter pending therein; or who injures any such grand or petit juror in his person or property on account of any verdict or indictment assented to by him, or on account of his being or having been such juror; or who injures any such officer, commissioner or other committing magistrate in his person or property on account of the performance of his official duties; or who corruptly or by threats or force, or by any threatening letter or communication, influences, obstructs, or impedes, or endeavors to influence, obstruct or impede the due administration of justice, or who corruptly or by threats or force or by any threatening letter or communication endeavors to influence, intimidate or impede any witness, potential witness or informant with intent to hinder, delay or prevent the communication to a law enforcement officer of information relating to an offense or possible offense, shall be fined not more than $10,000 or imprisoned not more than ten years, or both."

SEC. 6. Section 552(b)(7)(D) of title 5, United States Code, is amended by inserting the term, ", or tend to disclose," after the word "disclose".

SEC. 7. Rule 35 of the Federal Rules of Criminal Procedure is amended by adding a new paragraph to subsection (b) to read as follows:

"The court may also reduce a sentence at any time upon the application of the Attorney General, or any Department of Justice attorney specially designated by the Attorney General, when a convicted defendant provides substantial assistance in the identification, investigation, indictment, arrest, or conviction of any of the defendant's accomplices, accessories, co-conspirators, principals, or other persons engaged in criminal conduct. Any such motion may be filed and heard on an ex parte motion in camera. The judge hearing such motion may reduce the sentence of the defendant if he finds that the defendant rendered such substantial assistance."

SEC. 8(a) Chapter 227 of title 18, United States Code, is amended by adding at the end thereof a new section 3579, as follows:

"§ 3579. Increased penalties for violent offenders.

"(a) Notwithstanding any penalties in any other Act of Congress prescribing penalties for offenses against the United States, and in addition to those penalties, where a crime is carried out through the use, or threatened use, of violence, or with the use of a dangerous weapon or destructive device, the court may also sentence the defendant to pay a fine of not more than $25,000 or to imprisonment for not more than five years, or both; and if a dangerous weapon or destructive

device is used, to pay a fine of not more than $50,000 or to imprisonment for not more than ten years, or both; and if serious bodily injury or death results, to pay a fine of not more than $100,000 or to imprisonment for any term of years or to life imprisonment, or both.

"(b) As used in this section—

"(1) 'dangerous weapon' means (a) a firearm; (b) a destructive device; or (c) any other weapon, device, instrument, material, or substance, whether animate or inanimate, that is used or is intended to be used and is capable of producing death or serious bodily injury;

"(2) 'destructive device' means an explosive, an incendiary material, a poisonous or infectious material in a form that can readily be used to cause serious bodily injury, or a material that can be used to cause a nuclear incident as defined in section 11 of the Atomic Energy Act of 1954 (42 U.S.C. 2014 (q)); and includes a bomb, grenade, mine, rocket, missile, or similar device containing an explosive, an incendiary material, or a material that can be used as a chemical, biological, or radiological weapon;

"(3) 'serious bodily injury' means bodily injury which involves (a) a substantial risk of death; (b) unconsciousness; (c) extreme physical pain; (d) protracted and obvious disfigurement; or (e) protracted loss or impairment of the function of a bodily member, organ, or mental faculty."

(b) The analysis at the beginning of Chapter 227 of title 18, United States Code, is amended by adding at the end thereof:

"3579. Increased penalties for violent offenders."

SEC. 9. Section 2518(1)(e) of title 18, United States Code, is amended by adding", provided that any information as to previous applications which might compromise a current or pending case or investigation shall be reviewed by the judge in camera" after "each such application".

SEC. 10. Title 18, United States Code, is amended by adding a new section 2521, as follows:

"§ 2521.—Limitations on Disclosures to Protect On-going Criminal Investigations.

"(a) If the disclosure of any information contained in the affidavits, application, orders or accompanying documents required by this chapter would tend to disclose the existence of other pending investigations or wire interceptions, a federal district court judge may seal, use in camera proceedings, or other procedures to insure that the portion or portions of such documents which may disclose an on-going criminal investigation or wire intercept are not disclosed. In making his decision, the judge shall consider the legal rights of any party receiving or requesting access to such documents and whether or not the portion or portions concerning on-going criminal investigations or wire intercepts are essential to protect any statutory or constitutional right claimed by such party.

"(b) The Attorney General or any attorney specially designated by him may make application to a federal district court judge to seal, hold in camera proceedings or use other appropriate procedures to protect the confidentiality of information relating to on-going criminal investigations or wire intercepts as described in subsection 2521(a) of this title."

SEC. 11. (a) Rule 6(e)(3)(A) of the Federal Rules of Criminal Procedure is amended by adding at the end thereof the following:

"(iii) a state or local law enforcement official duly authorized as an agent of the grand jury, where such an official is assisting an attorney for the government in the enforcement of federal criminal law."

(b) Rule 6(e)(3)(B) of the Federal Rules of Criminal Procedure is amended by substituting the words "subparagraphs (A)(ii) and (A)(iii)" for "subparagraph (A)(ii)".

SEC. 12. (a) Subsection (a) of section 3146 of title 18, United States Code, is amended by adding the words: ", or pose a danger to any other person or to the community." to the first sentence in subsection (a) which presently ends with the word "required".

(b) Section 3146 of title 18, United States Code, is amended by adding a new subsection (c) to read as follows:

"(c) In determining whether or not the accused will pose a danger to any other person or to the community the judicial officer shall take into account the same considerations required in section 3148 of title 18, United States Code."

(c) Section 3146 of title 18, United States Code, is amended by renumbering the present subsections (c), (d), (e), (f), and (g) as subsections (d), (e), (f), (g), and (h).

ORGANIZED CRIME ACT OF 1981—SECTION-BY-SECTION ANALYSIS

Section 1 permits the legislation to be referred to as the "Organized Crime Act of 1981."

Section 2. Murder-for-hire:

Section 2 would make it a federal offense to commission or commit a "contract murder," which is defined as a murder, attempted murder or assault which violates state law and which was commissioned or committed in a situation where anything of value was used as consideration for the prohibited acts.

Subsection (a) defines the terms (1) contract murder, (2) commission or commissioned, (3) anything of value, (4) superior, and (5) subordinate.

Subsection (b)(1) contains the prohibited acts and penalties.

Subsection (b)(2) anticipates many situations where the Government will not have hard or conclusive proof that "anything of value" was exchanged. This section creates "prima facie" evidence that "anything of value" was exchanged when the Government can prove that, for instance, a superior in a criminal organization ordered his subordinate to commit the prohibited acts. This section follows the language of the federal loan-sharking statute (18 USC 892) and it is clearly permissible constitutionally to create a statutory prima facie showing in an evidentiary area that is difficult to prove.

Subsection (b)(3) subjects a person who uses force or violence to coerce another to commit a murder, attempted murder or assault to the penalties of subsection (b)(1).

Subsection (c) gives the Attorney General the authority to prescribe guidelines which would be used to initiate federal involvement in contract killings [up to now a state matter]. This section would ensure that the federal government coordinated its efforts with the state government and, more importantly, would ensure that the limited resources of the federal Government were not swamped with requests to handle local murders.

Subsection (d) merely continues the present practice of allowing federal agencies to assist local law enforcement in particularly difficult criminal investigations.

Subsection (e) makes it clear that the federal Government is not taking any authority away from the States or pre-empting the States in any way from pursuing investigations under state laws.

Section 3. Assault on Federal Officers:

The federal assault statute (18 U.S.C. 1114), which provides penalties for persons who assault federal officers in an attempt to intimidate or retaliate against federal officials who investigate or prosecute them, is unclear in some respects as to which officials it covers and, in some instances, specifically does not cover certain federal investigators and prosecutors. There is a real question, for example, as to whether ATF agents are covered. Moreover, nowhere is mention made of Strike Force attorneys, other special units of Justice Department attorneys, or Inspector General personnel.

To solve this dilemma without any need to specifically identify each position covered (since government reorganization can easily change the description or duties of federal law enforcement officers), section 3 would cover "any attorney, agent or employee of the United States employed to investigate or prosecute violations of federal statutes." This language will cover any loopholes that now exist.

In addition, intelligence officers are not now covered under the federal assault statutes. Therefore, the proposed amendment would include "any officer or employee of any department or agency within the Intelligence Community (as defined in section 4-207 of Executive Order 12036, January 24, 1978, or successor orders)."

Section 4. Protection of families of federal law enforcement officials:

Similar to the extension of the federal assault statute, the indiscriminate use of violence stands a good chance of affecting the families of federal law enforcement officials who may be subject to intimidation or retaliation. Section 4, therefore, makes it a crime for any person to assault, murder, threaten, etc., the spouse, parent, brother, sister, child, ward, etc. of any law enforcement official with an intent to intimidate, interfere with or retaliate against that federal officer in the performance of his duties.

Section 5. Protection of potential witnesses and informants:

Section 5 amends the obstruction of justice statute (18 U.S.C. 1503) to expand the class of persons protected from coercion, intimidation or injury because of their cooperation with the government. The act as it now stands covers only actual witnesses. This not only necessitates the government having to offer proof of the victim's status as a witness, such as the *prior* service of a subpoena, but it neglects the protection of two classes of individuals that need protection even more than a subpoenaed witness. Those are:

(1) The potential witness who has vital information but has not gone through the formality of being served with a grand jury or trial subpoena or of whom the government is not aware at that point in time; and

(2) The informant who deals with dangerous criminals on a close personal basis and is immediately suspect if law enforcement intervention is even suspected.

Section 6. Freedom of Information Act Amendment:

This amendment to 5 U.S.C. 552(b)(7)(D) is designed solely to increase the protection afforded to informants and persons who cooperate with the government anonymously by expanding slightly the current exemption in the Freedom of Information Act to include not only information which would, if released, positively identify an informant but also any information that "may *tend* to disclose the identity of an informant."

Section 7. Reduction of sentence for cooperating defendant:

Section 7 permits the Government to apply to Court to reduce the sentence of a cooperating defendant under Rule 35 of the Federal Rules of Criminal Procedure.

Such applications are not permitted under the present Rule. Consequently, there is little incentive for a prisoner to cooperate with the government after he has been sentenced.

Furthermore, cooperating prisoners usually are in fact treated much more harshly than those who do not cooperate. The facilities they are housed in cause them to do "harder time" than the average prisoner by not being able to use the facilities, training, education and family visits that a regular

prisoner has. Sometimes the only way these cooperating prisoners can protect themselves is to go into solitary confinement and refuse to eat for fear of contaminated or adulterated food.

Section 7 creates a mechanism whereby the federal Government could apply to a federal judge to reduce a prisoner's sentence if that prisoner provides substantial assistance in the identification, indictment, investigation, arrest or conviction of any person engaged in criminal conduct. This procedure will be heard in camera to protect the prisoner and the investigation.

Section 8. Increased penalties for violent offenders:

Section 8 allows a federal judge to impose an increased sentence on a person convicted of a federal crime which was carried out through the use or threatened use of violence. Such a sentence could be imposed in addition to the penalties provided by other criminal statutes.

Section 9. Amendment to Federal Wire Interception Act to protect on-going investigations:

The current federal wiretap statute (18 U.S.C. 2510, et seq.) requires that when a federal official applies to a federal court for a wiretap order, he must reveal in documents filed the facts surrounding all other applications for electronic surveillance involving any of the same persons, facilities or places.

Because many wiretap cases cause collateral investigations or "spin-offs," and because for a myriad of reasons different federal investigations move at varying speeds, a wire intercept identified in a court document may be and often is relevant to a yet unrevealed on-going criminal investigation or wire intercept. Thus, when defense attorneys in one matter are provided access to court wiretap documents—as they have a statutory right to have—this may inadvertently disclose and jeopardize the existence of pending criminal investigations.

Section 9 allows the Department of Justice to apply to a federal judge for an order to seal, to hold in camera proceedings, or to conduct some other procedure which would ensure that the portion or portions of court documents that might disclose on-going investigations or wire intercepts would be kept secret. It instructs the judge to weigh the legal rights, if any, of any party requesting or receiving such wiretap documents and whether or not the portions sought to be protected concerning on-going investigations are essential to protect any statutory or constitutional right of the party seeking the wiretap documents.

Section 10. State and local law enforcement access to federal Grand Jury information:

Local, state and federal officials must work together closely to investigate and prosecute organized crime. Yet when the forum moves to the federal Grand Jury, present law excludes local and state officials, who cannot be told anything about the Grand Jury investigation. Often local and state officials develop witnesses and evidence to prove a federal crime. They actively participate and assist the federal investigators and prosecutors, yet when the matter is put before a federal Grand Jury, they are excluded and their valuable assistance is lost. Moreover, Grand Jury information cannot even be passed on to them in an effort to have these state and local officials follow up on leads developed in the Grand Jury.

Existing law allows the government attorney in the Grand Jury to disclose Grand Jury information to such government personnel as he deems necessary to assist him in enforcing the federal law. However, the words "government personnel" have been given a narrow interpretation to mean federal government personnel. Thus, while a federal prosecutor in the Grand Jury may disclose Grand Jury information to an S.E.C. official, for instance, who is an expert in stock manipulation, he cannot share that information with the state and local authorities who investigated the case.

Section 10 provides for limited access of federal Grand Jury information to State and local enforcement officials under the aegis of the federal prosecutor. The disclosure of this information to State and local personnel will still be governed by a section of Rule 6, which prohibits any person who gains access to Grand Jury information from using it in any manner other than to assist the federal prosecutor in developing a federal case. In addition, yet another section of Rule 6 mandates that the government attorney provide a federal judge with the names of all persons to whom Grand Jury material has been disclosed. These provisions will provide adequate penalties and an effective mechanism to determine responsibility in the event of unlawful disclosure by State or local personnel.

Section 11. Bail Reform:

Section 11 allows a federal judge to consider whether or not the accused is a danger to any other person or to the community in setting pre-trial bail. This would allow the judge to consider, for instance, whether or not the accused is likely to continue selling narcotics, extorting victims, robbing banks or whether he is likely to be a danger to the witnesses or the community by his continuing criminal behavior.

The accused would be permitted a due process hearing and a federal judge would have to make a finding that the person is a "danger to the community."

The federal bail statute (18 USC 3146) presently allows the judge to consider only whether or not the accused is likely to appear in court. It allows for no other consideration in releasing the accused at the pretrial stage. On the other hand, under present law concerning post-conviction bail consideration, the judge is allowed to consider whether or not the accused will "pose a danger to any other person or to the community."

Section 11 will bring the two federal bail statutes into conformity●

● Mr. CHILES. Mr. President, I am pleased to join with Senator NUNN in introducing this important piece of legislation. Its passage would be of invaluable assistance in our efforts to bring violent crime under control.

Violent crime is on the rise across the Nation, and it has become a critical problem in Florida, where the violent crime rate has jumped by 38 percent in the last 9 months alone. Moreover, Florida has become the port of entry for a multibillion dollar international drug smuggling enterprise, which has mushroomed into a $7 billion a year criminal activity. One major characteristic of this activity has been its use of violence. In Dade County, murders have increased by 61 percent in the last year, and Drug Enforcement Agency officials estimate that fully half of the murders committed were drug related. When you add together violence and large-scale drug smuggling, you get organized crime.

It is unrealistic to expect local law enforcement agencies to be able to cope with this situation by themselves. The drug smugglers are well organized, well financed, and operate across State or even national boundaries. Only through coordinated activity, spearheaded by the Federal Government, can the people who control these activities be brought to justice. This nearly always means sophisticated investigations and lengthy grand jury proceedings. Unless we have the laws in place which will facilitate these coordinated law enforcement activities, we will be hard pressed to turn the tide against organized crime.

The Permanent Subcommittee on Investigations, through its hearings on narcotics smuggling, underscored the need to modify statutes which inadvertently make it difficult to trace the financial dealings of drug dealers. Senator NUNN and I have already introduced legislation which would enable the Internal Revenue Service to play a more active role in catching the top-level narcotics dealers. The hearings also revealed that the military is unable to pass along information concerning the whereabouts of the boats and planes of smugglers which the military detects on its radar. To remedy that problem, we introduced a bill which would make it easier for the military to cooperate with local law enforcement officials in catching drug smugglers.

Organized crime is deeply involved in drug trafficking, but it is involved in many other ventures as well. Just last month, the Permanent Subcommittee on Investigations held a series of hearings on the influence of organized crime on the waterfront industry. The information brought forward in those hearings suggests that organized crime has become deeply entrenched in the dock workers unions, and consequently has obtained a measure of control over the Nation's shipping industry.

As I mentioned earlier, sophisticated investigations are essential if we are to crack open the nerve center of organized criminal activities. The bill we are introducing today will enhance the efficiency of those investigations. Moreover, we need to strengthen the deterrents against the use of violence and contract killings, especially when they are used by organized crime as a tool to carry out its objectives. This bill does that, too.

First, the bill increases protection for Federal law enforcement officials by clarifying the Federal Assault Statute to make sure that it covers assaults against all Government officials involved in investigating or prosecuting Federal crimes. It would also make it a crime to harm or threaten to harm the families of Federal law enforcement officials. These provisions take from the mob one of its favorite tactics: the use of physical intimidation to thwart law enforcement efforts.

The bill recognizes the importance of protecting grand jury witnesses, and people who decide to give information about the mob's activities. It is difficult to overestimate the value information these people provide in bringing mob leaders to justice. Consequently, the bill would make it easier to protect the identity of such informants, thereby protecting them from possible retribution.

It would also enable Federal courts to reduce the sentence of a defendant who cooperates with the Government, thereby giving them an incentive to cooperate. These and other provisions,

taken together, would serve to encourage defendants and grand jury witnesses to cooperate with law enforcement officials, and to insure their safety in return for such cooperation.

Third, the bill would directly attack the use of violence as a method of intimidation and control. It increases the penalties a judge may impose when a Federal crime is committed through the use of violence. It would also enable Federal law enforcement officials to become involved in contract murder cases. This latter initiative is especially important, given the fact that organized crime operates across State lines, and uses such killings as a way to enforce discipline and to intimidate people. Federal involvement will help State and local law enforcement authorities in dealing with this situation.

Fourth, the bill would help make sure that criminals who are arrested will in fact come to trial. Large-scale drug dealers operate immensely profitable operations. They think nothing of posting a large bond and then never showing up in court, when the alternative they face is a long jail sentence. For example, one Alfredo Gutierrez, an alien, was indicted in connection with a $9 million downpayment in a cocaine deal estimated to be valued at $200 million. Bail was set originally at $3 million, but then was lowered to $1 million. Gutierrez made the million dollar bail, walked out on the street, and has not been seen since. Chief Justice Burger, in his recent address to the American Bar Association, pointed out another shortcoming in our current bail statutes. He cited a District of Columbia study which showed that 70 percent of the persons who were arrested for serious crimes were awaiting trial on other charges at the time of their arrest. Our current bail statutes provide that assuring the appearance of the defendant at subsequent proceedings is to be the only consideration in setting the level of bail. This bill would enable Federal judges to assess the danger that release of a person poses to the community as another consideration in setting bail.

Mr. President, we all recognize that law enforcement is primarily the responsibility of State and local government. But it is unfair and unrealistic to expect local law enforcement officials to fight large-scale, organized crime by themselves. We must recognize that it is our duty to help in this fight, and we must meet that duty. I believe that this bill will enable us to help. It provides greater assistance to Federal law enforcement officials, and to their State and local counterparts. I hope that we can move forward with the entire package as quickly as possible. Barring that, we ought to enact those parts of the package on which we can obtain a consensus. In any case, we need to move quickly.●

By Mr. TOWER (for himself and Mr. STENNIS) (by request):

S. 815. A bill to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, for research, development, test, and evaluation, and for operation and maintenance for the Armed Forces, to prescribe the authorized personnel strength for each active duty component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1982

● Mr. TOWER. Mr. President, by request, for myself and the senior Senator from Mississippi (Mr. STENNIS), I introduce for appropriate reference, a bill to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, for research, development, test, and evaluation, and for operation and maintenance for the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, and for other purposes.

I ask unanimous consent that a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD immediately following the bill.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 815

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Defense Authorization Act, 1982".

TITLE I—PROCUREMENT

AUTHORIZATION OF APPROPRIATIONS

SEC. 101. Funds are hereby authorized to be appropriated for fiscal year 1982 for the use of the Armed Forces of the United States for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, as authorized by law in amounts as follows:

Aircraft

For aircraft: for the Army, $1,797,400,000; for the Navy and the Marine Corps, $9,352,500,000; for the Air Force, $14,751,898,000.

Missiles

For missiles: for the Army, $2,842,500,000; for the Navy, $2,555,000,000; for the Marine Corps, $223,024,000; for the Air Force, $4,658,246,000.

Naval Vessels

For naval vessels: for the Navy, $10,290,100,000.

Tracked Combat Vehicles

For tracked combat vehicles: for the Army, $3,487,300,000; for the Marine Corps, $281,739,000.

Torpedoes

For torpedoes and related support equipment: for the Navy, $516,600,000.

Other Weapons

For other weapons: for the Army, $655,400,000; for the Navy, $200,200,000; for the Marine Corps, $136,344,000; for the Air Force, $3,047,000.

AUTHORIZATION OF APPROPRIATIONS FOR CONTRIBUTION TO AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) FOR NATO

SEC. 102. There is authorized to be appropriated for fiscal year 1982 the sum of $358,200,000 to be available only for contribution by the United States of its share of the cost for such fiscal year of acquisition by the North Atlantic Treaty Organization of the Airborne Early Warning and Control System.

CERTAIN AUTHORITY PROVIDED SECRETARY OF DEFENSE IN CONNECTION WITH THE NATO AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) PROGRAM

SEC. 103. (a) During fiscal year 1982, the Secretary of Defense, in carrying out the Multilateral Memorandum of Understanding Between the North Atlantic Treaty Organization (NATO) Ministers of Defense on the NATO E–3A Cooperative Programme, signed by the Secretary of Defense on December 6, 1978, may—

(1) waive reimbursement for the cost of the following functions performed by personnel other than personnel employed in the United States Air Force Airborne Warning and Control Systems (AWACS) program office:

(A) auditing;
(B) quality assurance;
(C) codification;
(D) inspection;
(E) contract administration;
(F) acceptance testing;
(G) certification services; and
(H) planning, programing, and management services;

(2) waive any surcharge for administrative services otherwise chargeable; and

(3) in connection with the NATO E–3A Cooperative Programme for fiscal year 1982, assume contingent liability for—

(A) program losses resulting from the gross negligence of any contracting officer of the United States;

(B) identifiable taxes, customs duties, and other charges levied within the United States on the program; and

(C) the United States share of the unfunded termination liability.

(b) Authority under this section to enter into contracts shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Funds are hereby authorized to be appropriated for fiscal year 1982 for the use of the Armed Forces of the United States for research, development, test, and evaluation, as authorized by law, in amounts as follows:

For the Army, $3,905,200,000; for the Navy (including the Marine Corps), $6,086,371,000; for the Air Force, $9,398,100,000; for the Defense Agencies, $1,934,400,000, of which $53,000,000 is authorized for the activities of the Director of Test and Evaluation, Defense.

(b) In addition to the funds authorized to be appropriated in subsection (a), there are authorized to be appropriated for fiscal year 1982, such additional sums as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in this title.

REPEAL OF REQUIREMENT FOR ANNUAL REPORT ON INDEPENDENT RESEARCH AND DEVELOPMENT AND BID AND PROPOSAL COSTS

SEC. 202. (a) Section 203 of Public Law 91–441, October 7, 1970, (10 U.S.C. 2358 note), the Department of Defense Authorization Act for 1971, is amended by repealing subsection (c).

(b) Section 203 of such Law is further amended by redesignating subsections (d) and (e) as subsections (c) and (d).

TITLE III—OPERATION AND MAINTENANCE

AUTHORIZATION OF APPROPRIATIONS

SEC. 301. (a) Funds are hereby authorized to be appropriated for fiscal year 1982 for

the use of the Armed Forces of the United States (other than the Coast Guard) and for other activities and agencies of the Department of Defense, as authorized by law, in the amount of $63,283,040,000.

(b) In addition to the funds authorized to be appropriated in subsection (a), there are authorized to be appropriated for fiscal year 1982 such additional sums as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in this title.

REPEAL OF REQUIREMENT FOR ANNUAL OPERATION AND MAINTENANCE REPORTS

SEC. 302. (a) Section 138 of title 10, United States Code, relating to annual authorization of appropriations, is amended by repealing subsection (e).

(b) Section 138 of such title is further amended—

(1) by striking out "subsection (f)" in subsection (a)(6) and inserting in lieu thereof "subsection (e)"; and

(2) by redesignating subsection (f) as subsection (e).

(c) Subsection (e) of such section, as redesignated by subsection (b)(2) is amended—

(1) by striking out "(1)"; and

(2) by striking out paragraph (2).

(d)(1) The heading of such section is amended to read as follows:

"§ 138. Annual authorization of appropriations and personnel strengths for the armed forces; annual manpower requirements reports".

(2) The item relating to such section in the table of sections at the beginning of chapter 4 of such title is amended to read as follows:

"138. Annual authorization of appropriations and personnel strengths for the armed forces; annual manpower requirements report.".

TITLE IV—ACTIVE FORCES

AUTHORIZATION OF END STRENGTHS

SEC. 401. The Armed Forces are authorized strengths for active duty personnel as of September 30, 1982, as follows:

(1) The Army, 786,300.
(2) The Navy, 554,700.
(3) The Marine Corps, 192,100.
(4) The Air Force, 586,800.

TITLE V—RESERVE FORCES

AUTHORIZATION OF AVERAGE STRENGTHS

SEC. 501. (a) For fiscal year 1982, the Selected Reserve of the Reserve components of the Armed Forces shall be programmed to attain average strengths of not less than the following:

(1) The Army National Guard of the United States, 392,800.
(2) The Army Reserve, 235,300.
(3) The Naval Reserve, 87,600.
(4) The Marine Corps Reserve, 37,600.
(5) The Air National Guard of the United States, 98,600.
(6) The Air Force Reserve, 62,800.
(7) The Coast Guard Reserve, 11,700.

(b) Within the average strengths prescribed in subsection (a), the reserve components of the Armed Forces are authorized as of September 30, 1982, the following number of Reserves to be serving on full-time active duty for the purpose of organizing, administering, recruiting, instructing, or training the Reserve components:

(1) The Army National Guard of the United States, 11,439.
(2) The Army Reserve, 6,285.
(3) The Naval Reserve, 208.
(4) The Marine Corps Reserve, 447.
(5) The Air National Guard of the United States, 3,312.
(6) The Air Force Reserve, 701.

(c) The average strength prescribed by subsection (a) for the Selected Reserve of any Reserve component shall be proportionately reduced by (1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at any time during the fiscal year, and (2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at any time during the fiscal year. Whenever such units or such individual members are released from active duty during any fiscal year, the average strength prescribed for such fiscal year for the Selected Reserve of such Reserve component shall be proportionately increased by the total authorized strength of such units and by the total number of such individual members.

(d) Upon a determination by the Secretary of Defense that such action is in the national interest, the authorizations prescribed in subsection (b) may be increased by not more than five percent.

INCREASE IN NUMBERS OF CERTAIN PERSONNEL ON ACTIVE DUTY IN SUPPORT OF THE RESERVE COMPONENTS

SEC. 502. (a) During the period October 1, 1981 through September 30, 1982 the table in section 517(b) of title 10, United States Code, (relating to the number of enlisted personnel in grades E–8 and E–9 who may be on active duty in support of the reserve components) is suspended. For such period such table shall read as follows:

"Grade	Army	Navy	Air Force	Marine Corps
E–9	222	146	76	4
E–8	908	319	307	12"

(b) During the period October 1, 1981 through September 30, 1982 the columns under the headings "Army" and "Air Force" contained in the table in section 524(a) of title 10, United States Code, (relating to the number of reserve officers in certain grades who may be on active duty in support of the reserve components) are suspended. For such period such columns shall read as follows:

"Army	Air Force
1,105	189
551	194
171	147"

TITLE VI—CIVILIAN PERSONNEL

AUTHORIZATION OF END STRENGTHS

SEC. 601. (a) The Department of Defense is authorized a strength in civilian personnel, as of September 30, 1982, of 1,024,900.

(b) The strength for civilian personnel prescribed in subsection (a) shall be apportioned among the Department of the Army, the Department of the Navy (including the Marine Corps), the Department of the Air Force, and the agencies of the Department of Defense (other than the military departments) in such numbers as the Secretary of Defense shall prescribe. The Secretary of Defense shall report to the Congress within sixty days after the day of the enactment of this Act on the manner in which the initial allocation of civilian personnel is made among the military departments and the agencies of the Department of Defense (other than the military departments) and shall include the rationale for each allocation.

(c) In computing the strength for civilian personnel, there shall be included all direct-hire and indirect-hire civilian personnel employed to perform military functions administered by the Department of Defense (other than those performed by the National Security Agency) whether employed on a full-time, part-time, or intermittent basis, but excluding special employment categories for students and disadvantaged youth such as the stay-in-school campaign, the temporary summer aid program and the Federal junior fellowship program and personnel participating in the worker-trainee opportunity program. Personnel employed under a part-time career employment program established by section 3402 of title 5, United States Code, shall be counted as prescribed by section 3404 of that title. Whenever a function, power, or duty, or activity is transferred or assigned to a department or agency of the Department of Defense from a department or agency outside of the Department of Defense, or from another department or agency within the Department of Defense, the civilian personnel end strength authorized for such departments or agencies of the Department of Defense affected shall be adjusted to reflect any increases or decreases in civilian personnel required as a result of such transfer or assignment.

(d) When the Secretary of Defense determines that such action is necessary in the national interest or if any conversion of commercial and industrial type functions from performance by Department of Defense personnel to performance by private contractors which was anticipated to be made during fiscal year 1982 in the Budget of the President submitted for such fiscal year is not determined to be appropriate for such conversion under established administrative criteria, the Secretary of Defense may authorize the employment of civilian personnel in excess of the number authorized by subsection (a), but such additional number may not exceed 2 percent of the total number of civilian personnel authorized for the Department of Defense by subsection (a). The Secretary of Defense shall promptly notify the Congress of any authorization to increase civilian personnel strength under this subsection.

TITLE VII—MILITARY TRAINING STUDENT LOADS

AUTHORIZATION OF TRAINING STUDENT LOADS

SEC. 701. (a) For fiscal year 1982, the components of the Armed Forces are authorized average military training student loads as follows:

(1) The Army, 75,728.
(2) The Navy, 65,133.
(3) The Marine Corps, 18,311.
(4) The Air Force, 46,389.
(5) The Army National Guard of the United States, 14,537.
(6) The Army Reserve, 10,830.
(7) The Naval Reserve, 1,041.
(8) The Marine Corps, 2,835.
(9) The Air National Guard of the United States, 2,157.
(10) The Air Force Reserve, 1,405.

(b) The average military student loads for the Army, the Navy, the Marine Corps, and the Air Force and the Reserve components authorized in subsection (a) for fiscal year 1982 shall be adjusted consistent with the manpower strengths authorized in titles IV, V, and VI of this Act. Such adjustment shall be apportioned among the Army, the Navy, the Marine Corps, and the Air Force and the Reserve components in such manner as the Secretary of Defense shall prescribe.

TITLE VIII—GENERAL PROVISIONS

REPEAL OF $5,000,000 CANCELLATION CHARGE CEILING ON MULTIYEAR PROCUREMENT CONTRACTS

SEC. 801. Section 810 of the Department of Defense Appropriation Authorization Act, 1976, is repealed.

REPEAL OF REQUIREMENT FOR REDUCTION IN NUMBER OF SENIOR-GRADE CIVILIAN EMPLOYEES OF THE DEPARTMENT OF DEFENSE

SEC. 802. Section 811 of the Department of Defense Appropriation Authorization Act,

1978 (10 U.S.C 131 note), is amended by repealing subsection (a).

RESEARCH GRANTS

SEC. 803. Section 2358 of title 10, United States Code, relating to research projects, is amended by inserting "or by grant" after "contract" in clause (1).

REPEAL OF LIMITATION ON ENLISTMENT AND INDUCTION OF PERSONS INTO THE ARMED FORCES WHOSE SCORE ON THE ARMED FORCES QUALIFICATION TEST IS BELOW A CERTAIN LEVEL

SEC. 804. Chapter 31 of title 10, United States Code, relating to enlistments in the Armed Forces, is amended—

(a) by repealing section 520.

(b) The table of sections at the beginning of such chapter is amended by striking out:

"520. Limitation on enlistment and induction of persons whose score on the Armed Forces Qualification Test is below a prescribed level.".

REPEAL OF PROFIT LIMITATIONS ON CONTRACTS FOR AIRCRAFT AND NAVAL VESSELS

SEC. 805. (a) Chapter 141 of title 10, United States Code, relating to miscellaneous procurement, is amended—

(1) by repealing section 2382.

(2) The table of sections at the beginning of such chapter is amended by striking out:

"2382. Aircraft: contract requirements.".

(b) Chapter 633 of title 10, United States Code, relating to naval vessels, is amended—

(1) by repealing section 7300.

(2) The table of sections at the beginning of such chapter is amended by striking out:

"7300. Contracts for construction: profit limitation.".

GENERAL COUNSEL OF THE DEPARTMENT OF DEFENSE,
Washington, D.C., March 25, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is forwarded herewith legislation, "To authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, for research, development, test, and evaluation, and for operation and maintenance for the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, and for other purposes."

This proposal is part of the Department of Defense legislative program for the 97th Congress and the Office of Management and Budget has advised that enactment of the proposal would be in accordance with the program of the President. This proposal is being sent to the Speaker of the House of Representatives.

Title I provides procurement authorization for the military departments and the Defense agencies and for the United States share of the cost of the acquisition of the Airborne Early Warning and Control System by the North Atlantic Treaty Organization in amounts equal to the budget authority included in the President's budget for fiscal year 1982. It also contains a provision that permits the waiver of certain costs and assumption of certain liability during fiscal year 1982 in connection with the NATO AWACS program.

Title II provides for the authorization of each of the research, development, test, and evaluation appropriations for the military departments and the Defense Agencies in amounts equal to the budget authority included in the President's Budget for fiscal year 1982.

The authorization contains a provision that authorizes the appropriation of funds that are necessary to cover increased pay costs and other employee benefits to preclude the necessity of submitting a request for a supplemental authorization for such nondiscretionary personnel costs. Section 202 would repeal the requirement for an annual report concerning independent research and development or bid and proposal costs that is contained in section 203(c) of Public Law 91-441, October 7, 1970, the Department of Defense Authorization Act for 1971.

Title III provides for a lump-sum authorization for the operation and maintenance of the Army, Navy, Marine Corps and Air Force, including their reserve components, and for the Defense Agencies as required by the amendments made to section 138(a) of title 10, United States Code in section 1001 of the Department of Defense Authorization Act, 1981.

Included within this lump-sum is authorization for appropriations for the National Board for the Promotion of Rifle Practice, Army; Claims, Defense; and Court of Military Appeals, Defense. It also contains a provision that repeals the reporting requirement contained in subsection (e) of section 138 of title 10 that was added to that section by section 1001 of the Department of Defense Auhorization Act, 1981.

The authorization contains a provision that authorizes the appropriation of funds that are necessary to cover increased pay costs and other employee benefits to preclude the necessity of submitting a request for a supplemental authorization for such nondiscretionary personnel costs.

Title IV prescribes the end strengths for active duty personnel in each component of the Armed Forces as required by section 138 (c) (1) of title 10, United States Code, in the numbers provided for by the budget authority and appropriations requested for these components in the President's Budget for fiscal year 1982.

Title V provides for average strengths of the Selected Reserve of each Reserve component of the Armed Forces as required by section 138(b) of title 10, United States Code, in the numbers provided for by the budget authority in appropriations requested for the Department of Defense in the President's Budget for fiscal year 1982. Within the average strengths of the Selected Reserve, Title IV also prescribes the end strengths for Reserve component members on full-time active dity for the purpose of administering the Reserve forces.

Language has been added that would permit an increase of not more than five percent of such members upon a determination by the Secretary of Defense that such action is in the national interest. Title V also contains a provision that suspends the limitation contained in section 517(b) of title 10, United States Code, on the number of enlisted personnel in pay grades E-8 and E-9 who support the reserve components and the limitation contained in section 524(a) of title 10, United States Code, on the number of Majors, Lieutenant Colonels and Colonels in the Army and Air Force who support the reserve components.

New limitations, which increase the number of personnel in those grades who may be serving on active duty, are provided so that proposed expansion of the programs in support of the reserve components for fiscal year 1982 may be accommodated.

Title VI provides for civilian personnel end strengths for each component of the Department of Defense as required by section 138 (c) (2) of title 10, United States Code, in the numbers provided for by the budget authority in appropriations requested for the Department of Defense in the President's Budget for fiscal year 1982.

Title VII provides for the average military training student loads as required by section 138(d)(1), of title 10, United States Code, in the numbers provided for this purpose in the President's Budget for fiscal year 1982.

Title VIII consists of five General Provisions. Section 801 would amend the Department of Defense Appropriation Authorization Act, 1976, by repealing the $5,000,000 cancellation charge ceiling on multi-year procurement contracts that is contained in section 810 of that Act. Section 802 would amend section 811 of the Department of Defense Appropriation Authorization Act, 1978, by repealing the requirement for a reduction in the number of generals, admirals and senior-grade civilian employees of the Department.

Section 803 would amend section 8358 of title 10, United States Code, relating to basic and applied scientific research, to make it clear that such research may be conducted by grant as well as by contract. Section 804 would repeal the limitation on the enlistment and induction of persons whose score on the Armed Forces Qualification Test is below a certain level.

Section 805 would repeal sections 2382 and 7300 of title 10, United States Code, commonly referred to as the profit limitation provisions of the Vinson-Trammell Act of 1934. These provisions were suspended by section 1005 of the Department of Defense Authorization Act, 1981 to eliminate the contingent liabilities arising under the Vinson-Trammell Act while alternative profit limitation systems were considered.

The profit limitation provisions of the Vinson-Trammell Act are inequitable and outmoded and there is no reason to continue them in effect when the suspense expires on October 1, 1981.

Sincerely,

L. NIEDERLEHNER,
Acting.●

By Mr. THURMOND (for himself, Mr. DECONCINI, Mr. DENTON, Mr. DODD, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GRASSLEY, Mr. HATCH, Mr. HEFLIN, Mr. HELMS, Mr. INOUYE, Mr. LAXALT, Mr. LUGAR, Mr. MATHIAS, Mr. MOYNIHAN, Mr. NUNN, Mr. SIMPSON, Mr. TSONGAS, Mr. DANFORTH, Mr. SPECTER, and Mr. MELCHER):

S. 816. A bill to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws, and for other purposes; to the Committee on the Judiciary.

LEGISLATION RELATING TO THE ABILITY OF FOREIGN GOVERNMENTS TO SUE FOR DAMAGES AND LIMITATIONS ON THE AMOUNT OF DAMAGES RECOVERABLE

Mr. THURMOND. Mr. President, I am today introducing a bill which, if enacted, would place certain conditions on the ability of foreign governments to sue for damages for antitrust violations in U.S. courts. The bill also seeks to limit the amount of antitrust damages recoverable by a foreign government to that amount which our own Government would be entitled to recover.

In 1978, the U.S. Supreme Court held, in the case of Pfizer against India, that a foreign nation is a person under section 4 of the Clayton Act. Thus, foreign nations are currently entitled to seek treble damages in antitrust suits in U.S. courts.

This right of foreign nations to recover treble antitrust damages in our courts is unfair in two major respects. First, the U.S. Government can sue to recover only single damages for the same antitrust violation in which a foreign government

can recover treble damages. Second, American companies, in particular, often find themselves the victims of anticompetitive conduct in foreign countries which either do not have, or do not enforce, antitrust laws similar to ours. These foreign countries, nevertheless, have full access to our courts to pursue damages for antitrust violations.

The bill I am introducing serves to correct these inequities our country faces, both in U.S. courts and in the courts of other nations as well. If enacted, the bill would deny a foreign government access to our courts to pursue an antitrust damage claim for a particular type of conduct unless the laws of that foreign government prohibited similar conduct and provided the right to sue for actual damages. A further condition would be that the foreign nation's antitrust laws which prohibit the similar conduct must be actively enforced.

The principle behind this requirement is simple: Those equally situated should be afforded equal treatment. The United States should deny no foreign government the right to sue for antitrust damages in its courts so long as that right is similarly available in that foreign nation.

The bill also places our Government and foreign governments on equal footing in U.S. courts. Pursuant to section 4A of the Clayton Act, the U.S. Government may recover only single, or actual, damages for any antitrust violation. It does not make sense that foreign governments are currently authorized to collect treble damages for the same violation. Therefore, the bill would limit any foreign government's recovery to single damages.

Mr. President, in my opinion this bill is well balanced and fair to all concerned. It simply makes sense to provide access to our courts by a foreign government contingent upon the access we find in the courts of that country. Further, I can find no support for the proposition that our courts should favor foreign governments over our own when awarding antitrust damages.

If we fail to enact this legislation, American companies will continue to be subject to unjust discrimination in their dealings with foreign governments, while those governments offer sanctuary to their own companies. Indeed, I am hopeful that the reciprocity requirements this bill seeks to create will inspire some foreign nations to enact their own antitrust laws. The day may come when they seek to qualify as plaintiffs in our courts.

Mr. President, I urge the support of this worthwhile legislation.

By Mr. HATCH (for himself and Mr. DECONCINI):

S. 817. A bill to provide procedures for calling Federal constitutional conventions under article V for the purpose of proposing amendments to the United States Constitution; to the Committee on the Judiciary.

CONSTITUTIONAL CONVENTION IMPLEMENTATION ACT OF 1981

● Mr. HATCH. Mr. President, article V of the U.S. Constitution provides that constitutional amendments may be proposed in either of two ways. The first—the means by which every successful amendment to the Constitution has been proposed—requires the agreement of two-thirds of each House of Congress. The second requires the agreement of a convention called by Congress in response to the applications of two-thirds of the State legislatures. Ratification of amendments proposed through either method is to be done either by the legislatures, or by conventions, in three-fourths of the States, depending upon the decision of Congress.

Largely as a result of the fact that the convention method of constitutional revision has never been successfully employed there are substantial questions that relate to it:

What exactly constitutes a valid application to the Congress?

What procedures must a State follow in submitting an application?

Must the precise language of the proposed amendment be included within the application?

How similar must the language be in the applications of various States in order to allow them to be aggregated?

How long does an application remain valid? May such applications be rescinded by the States?

What is the extent of congressional power to review applications? What is the extent of congressional power to restrict the deliberations of the convention?

What is the extent of State power to restrict the deliberations of the convention?

How is the convention to be organized? How are the States to be represented at the convention?

May Congress refuse to submit the product of a convention to the States for ratification?

How are constitutional convention-proposed amendments to be ratified by the States?

With respect to most of these questions, there is very little constitutional guidance. The relevant language of article V states simply:

> The Congress—on the application of the legislatures of two-thirds of the several states, shall call a convention for proposing amendments.

Nor are there useful precedents in view of the fact that there has never been a constitutional convention under article V. Each of the questions involved in this, the alternative means of amending the Constitution, is therefore a threshold question.

OBJECTIVES OF ACT

Article I, section 8, clause 18 of the Constitution invests authority in Congress to—

> Make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this constitution in the government of the United States.

This provision clearly authorizes the Congress to pass legislation that would give effect to the convention method of constitutional alteration. This would be a direct function of its article V authority to call a convention pursuant to applications by two-thirds of the States.

I am introducing legislation, the Constitutional Convention Implementation Act, which would fill in the interstices of article V. It is particularly important that this body act on this, or similar legislation, in view of the fact that at least 30 State legislatures have already purported to submit applications to Congress for the convening of a constitution convention on the subject of a balanced budget amendment. In addition, within the past month, an additional four State legislative bodies have applied for a convention on this subject. I would hope that this act, however, could be considered separately from the merits of this specific amendment effort.

The Constitutional Convention Implementation Act is designed to establish what are basically neutral procedures to guide the conduct of constitutional conventions generally. While the imminence of a convention on the matter of a balanced budget has clearly created the urgency for this legislation, the act is designed neither to facilitate nor obstruct the eventual achievement of a balanced budget amendment, or any other constitutional amendment. The purpose of this legislation is primarily to insure that Congress has clear standards and criteria by which to judge convention applications before it, and that any convention that takes place under article V is conducted in an orderly and nonchaotic manner.

One must look to the policy underlying the establishment of the convention form of amendment in order to construct an appropriate procedures bill. Even a cursory analysis of the original Constitutional Convention (convened under the auspices of the Articles of Confederation) would suggest that the final provision of article V resulted from a compromise between those delegates who sought to invest proposal authority solely in Congress and those who sought to invest it solely in the State legislatures. The two modes of initiating amendments were viewed as essentially equivalent alternatives, each of which was to serve as a check upon the intransigence of either the National Legislature or the State legislature in the matter of proposing constitutional revision.

In view of this fundamental purpose, I believe that legislation giving effect to the convention method of amendment should be such that resort to its use will not render the Constitution too mutable (the Federalist No. 43) while at the same time insuring that it will not be rendered null and void because it remains too cumbersome a method. The amendment process should never be one that can be successfully employed with great ease, yet neither should it be a process totally incapable of being used to alter the Constitution of the same general subject or subjects standard to insure the existence of some real consensus among the States with respect to the need for constitutional revision in some relatively circumscribed area.

PROVISIONS OF ACT

I would like to briefly discuss the provisions of this act and explain their justification. I should add at the outset my debt to the efforts of our former colleague, Senator Sam Ervin. While my bill differs in a number of respects from

legislation that Senator Ervin successfully shepherded through the Senate in 1971 and 1973, its basic structure is closely related to that legislation. That legislation was approved unanimously on one occasion by this body, and by a voice vote on the other occasion.

Section 1 of my bill states that its short title is the "Constitutional Convention Implementation Act of 1981."

CONVENTION APPLICATIONS

Section 2 states the manner in which States are to make applications for a constitutional convention. It states simply that the legislature shall specify within its application for a convention, the general subject of the amendment or amendments to be proposed. The objective of this standard is to insure that two-thirds of the States have a sufficiently similar purpose that their applications ought to be aggregated.

The purpose of the initiating process is to determine that there exists some form of consensus among the States on the matter of a relatively well-defined area of amendment. This consensus cannot fairly be said to be in evidence if aggregation is to be permitted of applications that are, at best, only incidentally related.

On the other hand, it cannot be reasonably expected that identical, or even nearly identical, language be employed in petitions that ought to be aggregated. Such a requirement is highly unrealistic with respect to 50 diverse State legislative bodies; the imposition of such a rigid rule would effectively render the alternative method of amendment provided in article V useless. Further, to the extent that a petition was required to be precise, either with respect to the specific amendment sought, or the specific language sought, there would be little use for the convention itself. To limit the convention to the consideration of a single, meticulously worded amendment is to make the convention a farce. In order for the convention to be a meaningful part of the article V process, it must have some leeway within which to exercise its legitimate discretion.

LIMITED CONVENTIONS

That this discretion, however, is not without its limits is the subject of section 2(b), and, indeed, is the basic theme of the Constitutional Convention Implementation Act. This section states that the procedures provided in the act are to be followed in the case of applications for what are commonly referred to as limited conventions. Such conventions are defined for the purposes of this act as conventions for the purpose of proposing one or more specific amendments to the Constitution of the United States. Implicit in this section is the recognition that the States may call for the convening of either limited or general conventions; it is, however, simply with respect to the former that the terms of this act apply.

A general convention would be one in which the States petitioned for a convention, not with any specific or limited purposes in mind, but for the purpose of making whatever revisions were deemed necessary or desirable by the convention itself. It is this sort of convention that poses such great concerns to most observers, including myself. I am far from confident that a contemporary general convention could do much to improve upon the work of Madison, Hamilton, and Mason. While there is no way that Congress, through passage of a simple statute, could preclude the States from requesting a general convention—this is their right under article V—neither is Congress precluded from clarifying that the States are fully within their rights in seeking a limited convention.

There is some academic dispute as to the possibilities of a limited constitutional convention. Prof. Charles Black of the Yale Law School, for example, believes that the constitutional convention is a free agent, sovereign and without limitations. According to this theory, the convention represents the premier assembly of the people, and is therefore supreme to all other Government branches and agencies. It cannot be limited in the scope of its deliberations, whatever the limited nature of the grievances that brought the convention into being.

I would disagree with this interpretation. The constitutional convention, while clearly a unique and separate element of the Government—a new branch of the Government, so to speak—is subject to the same limitations and checks and balances as the other, permanent branches of the Government. A constitutional convention, as its name clearly implies, is a constitutional entity; it is appointed under the terms of the Constitution and subject to all of the express and implied limitations imposed by that document. As observed by Professor Jameson in his classic work on constitutional conventions:

> The convention's principal features is that it is subaltern—it is evoked by the side and at the call of a government preexisting and intended to survive it, for the purpose of administering to its special needs. It never supplants the existing organization. It never governs. Though called to look into and recommend improvement in the fundamental laws, it enacts neither them nor the statute law; and it performs no act of administration.

The Federal constitutional convention is an instrument of the Government, and acts properly only when it acts in conformity to its authorized powers.

There is nothing in the language of article V to suggest that the convention method of amendment cannot be limited to a single area of amendment; although the article states that the convention is to be convened for the purpose of proposing amendments, resort to the plural is made also in describing the scope of Congress' proposing authority. The symmetry between the competing processes of constitutional amendment is emphasized by Madison in the Federalist No. 43 in discussing the objectives of article V:

> That useful alterations will be suggested by experience, could not be foreseen. It was requisite therefore that a mode for introducing them should be provided. The mode preferred by the convention seems to be stamped with every mark of propriety. It guards equally against that extreme facility which would render the Constitution too mutable; and that extreme difficulty which might perpetuate its discovered faults. It moreover equally enables the general and the State governments to originate the amendment of errors as they may be pointed out by the experience on one side or on the other.

It was clearly contemplated that the convention anticipated specific amendment or amendments, rather than general revisions, and that no distinction was to be drawn between the competing methods of amendment in this respect.

To enable Congress to propose specific constitutional amendments while allowing the States only to propose general constitutional revision is to confer markedly unequal powers of amendment upon these governments, an intention contradicted by the unanimous weight of documentary evidence. If the States are to have no ability to control the actions of a convention in the form of their convention applications, then there will be strong disincentives for them to seek such conventions. In the absence of broad-based dissatisfaction with the existing constitutional system, why should they want to risk the possibility of a convention acting beyond the scope of their application? Why, in seeking to originate the amendment of errors described by Madison, should the States have to risk total revision of the constitutional system?

It is anomalous that in seeking to correct what might be a narrow defect in the system that the States should have to place the entire system in jeopardy. What better means could there be to perpetuate the discovered faults of the system? What better means could there be to place the convention system of amendment in an unequivalent position to the congressional system of amendment? What better means could there be to completely discourage any and all resort to the convention means of constitutional amendment?

As Prof. William Van Alstyne has remarked—

> I find it perfectly remarkable that some have argued for a construction of Article V which not only limits the power of State legislatures to have a convention—but would limit that power to its least expected, least appropriate, most difficult (and yet most dangerous) use.

It is the States, not Congress, that ought to properly have the ability to limit the scope of the convention, through their convention applications. While Congress, under section 6 of the Constitutional Convention Implementation Act, is empowered to specify in its call for the convention the scope of permissible deliberations, it is performing basically an administrative, nondiscretionary function in doing so; it is simply translating the State applications into a formal convention call.

APPLICATION PROCEDURES

Section 3(a) of the act specifies that the procedures to be followed in making a convention application are those adopted by the States themselves. Although a State is free to adopt procedures uniquely applicable to the conven-

tion application process (as the State of Illinois, for example, has done with respect to the amendment ratification process), it is anticipated that most States will follow procedures that govern the adoption of simple statutes or resolutions.

Section 3(b) provides further that questions concerning the extent to which States have acted in compliance with their own rules of procedure are also to be determined by the State legislatures themselves. While recognizing that, in pursuit of their authority under article V, the States are acting in a quasi-Federal capacity rather than in a purely State role, *Leser* v. *Garnett*, 258 U.S. 130, 137 (1922), it would nevertheless be incongruous for any body to determine whether or not there has been procedural regularity in a State legislative action other than the legislature itself.

In *Field* v. *Clark*, 143 U.S. 649 (1982), the Supreme Court held that the procedural requirements of the legislative process were presumed to have been satisfied when legislation was formally certified by the appropriate legislative officers. Rather than intruding Congress or the courts into these matters, there is no reason why this traditional rule ought not continue to apply with respect to convention application actions. There is no compelling reason why article V should require sacrifice by State legislatures of their inherent right to regulate their own proceedings.

Whatever the procedures in the State legislatures, such actions are to be considered valid without the assent of the Governor of the State. Thus, the term legislatures in article V is treated in the same manner for the purposes of convention applications as it has traditionally been treated for the purposes of amendment ratification, *Hollingworth* v. *Virginia*, 3 Dall. 376 (1798); *Hawke* v. *Smith*, 253 U.S. 221 (1920).

TRANSMISSION OF APPLICATIONS

Section 4 of the act specifies the means by which the States are to transmit their applications for a convention to Congress. Section 4(a) states that, within 30 days of the adoption by a State of an application, the appropriate official is to transmit copies to the President of the Senate and the Speaker of the House of Representatives.

Section 4(b) directs the States to include within their applications: The title of the resolution, the date of adoption, and an official certification. In addition, States are encouraged, but not required, to list in the application other pending State applications which are felt to relate to substantially the same subject. While such a listing is not to be considered conclusive with respect to Congress, it is nevertheless considered that such a listing will be useful to Congress in carrying out its responsibilities in aggregating applications.

Section 4(c) requires each House to establish a public record of each State application, and to notify each State legislature of the fact of each application. Through internal procedures to be determined by each House of Congress, Congress would be charged with making an initial decision on whether or not to aggregate applications within the 10-day period following each new application. The criteria would be whether or not the applications referenced the same general subject or subjects.

These initial decisions, however, would not be binding. Under article V, Congress would not be compelled to make its final decision on aggregation of applications until that point at which it was required to make a decision with respect to an actual convention call. The requirement of an ongoing effort at determining the aggregation question is designed primarily to limit opportunities for political manipulation at this point of the application process, as well as to allow States which are not aggregated in what they consider the proper manner to amend their convention applications.

As observed earlier, it is the objective of the same general subject or subjects standard to insure the existence of some real consensus among the States with respect to the need for constitutional revision in some relatively circumscribed area. At the same time, in order not to interfere with the legitimate freedom of action of a convention, there ought not to be the requirement of extreme precision, either in the text or in the subject-matter. The language contained in the bill is designed to draw some rough balance between these requirements.

In order to insure that the consensus for a constitutional amendment remains a relatively contemporaneous one, *Dillon* v. *Gloss*, 256 U.S. 368 (1921), section 5(a) states that an application shall be effective for no longer than a 7-year period, with shorter effective periods contained within the body of an application to be respected. The court in Dillon stated that:

> Proposal and ratification are not treated as unrelated acts but as succeeding steps in a single endeavour, the natural inference being that they are not to be widely separated in time . . . must reflect the will of the people in all sections at relatively the same period which of course ratification scattered through a long series of years would not do . . . We do not find anything in article V which suggests that an amendment once proposed is to be open for ratification for all time, or that ratification in some of the states may be separated from that in others by many years and yet be effective.

Similarly, State convention applications and the calling of a constitutional convention are not unrelated acts, but necessary, succeeding steps in a single endeavor. There should be a reasonable relationship in time, between these actions, *Coleman* v. *Miller*, 307 U.S. 433 (1938). There is the same need to avoid staleness of applications to Congress as there is to avoid staleness of amendment proposals to the States.

In view of the fact that every amendment proposed by Congress, except one, since the 18th amendment has contained a 7-year time limitation, either in the body or in the enacting clause, it has been decided to use the same period for determining effectiveness of applications.

Section 5(b) authorizes States to withdraw their applications at any time prior to the time that there are a sufficient number of valid applications before Congress to enable it to call a convention. There would seem to be no valid policy reason for denying them this right. Indeed, in order to insure that the amendment process reflects the notion of contemporaneous consensus, it is vital that the States have the right to reconsider and reverse their application decisions. States should not be dragooned unwillingly into artificial consensuses because of an inability to rethink earlier application decisions.

CALLING OF THE CONVENTION

Section 6 of the Constitutional Convention Implementation Act relates to the actual calling by Congress of the convention. It provides that, upon receipt in each House of that application putting two-thirds of the States in agreement on the need for some particular amendment or amendments, it is the duty of that House to call for the convening of a Federal constitution convention on that general subject or subjects. Congress is to designate the time and place of the meeting of the convention, and set forth the general subject of the amendment or amendments for consideration. The convention is to be convened not later than 4 months following the adoption by Congress of its resolution.

Despite some popular misconceptions on this point, it is obligatory that Congress call a convention upon the receipt of valid applications by two-thirds of the States. Alexander Hamilton observed in the Federalist No. 85 that—

> The national rulers, whenever nine states concur, will have no option upon the subject. By the fifth article of the plan, the Congress will be obliged "on the application of the legislatures of two-thirds of the states to call a convention for proposing amendments" . . . the words of this article are peremptory. The Congress "shall call a convention". Nothing in this particular is left to the discretion of that body.

James Madison, in a 1789 letter, remarked further—

> It is to be observed however that the question concerning a general convention will not belong to the Federal legislature. If two-thirds of the States apply for one, Congress cannot refuse to call it.

CONVENTION DELEGATES

Section 7 relates to the selection of delegates to the constitutional convention. The language is taken nearly verbatim from article II, section 1, paragraph 2 of the Constitution concerning the selection of Presidential electors. The Great Compromise between the larger and the smaller States is carried over into the selection of convention delegates with each State being entitled to that number of delegates equal to the combined number of its Senators and Representatives in Congress. The States are given a free hand in selecting their delegates in whatever (constitutional) manner they deem appropriate.

If the experience of the electoral college is at all relevant—and I believe that it is—each of the States will undoubtedly introduce some means of popular election for the delegate positions. I would be personally opposed to any other manner of selection, although I do not be-

lieve that it is the business of this body to specify particular procedures for the States.

While there are those who would prefer to see a delegate selection system more precisely based upon population, I see no reason not to extend smaller States that slight disproportionate influence in the proposal of amendments through the convention system that they currently enjoy in the proposal of amendments through the congressional system. The apportionment procedure in section 7 is the method of delegate selection that most closely conforms to the basis for congressional representation, and which would most closely aline the alternative systems of proposing amendments.

Section 7 also excludes Members of Congress, the very embodiment of the national influence, from serving as convention delegates lists with the House and Senate, and confers the same immunity from arrest upon convention delegates, for the duration of the convention, that article I, section 6 of the Constitution confers upon Members of Congress.

CONVENING OF CONVENTION

Section 8 directs each delegate to the convention to subscribe to an oath by which he commits himself, during the conduct of the convention to comply with the Constitution of the United States and the provisions of this act. As I discussed earlier, I do not believe that the concept of a limited convention is precluded in any manner by article V. The purpose of this purposely broad oath is simply to give effect to any limitations that may have been placed upon a convention by Congress acting on behalf of the States. Since the provisions of the Constitutional Convention Implementation Act purport to represent congressional interpretation of the provisions of article V, it is perhaps unnecessary to specify compliance with these as part of the delegate oath. I felt, however, that specificity was desirable in order to clarify that Congress is acting wholly within its appropriate authority in filling in the gaps of article V, and that the delegates to the convention themselves are not empowered to alter this interpretation.

Administering the oath of office to the delegates would be the senior chief judge of the highest courts of the States. Rather than having the Vice President, or the Chief Justice of the United States fill this function, it is my belief that what is basically a State convention should remain that and not run any unnecessary risks, however remote, of being influenced by national officials. I emphasize again the basic purpose for including the convention method of amendment in article V—the need for the States to be able to amend the Constitution in the face of an intransigent national Government.

CONVENTION PROCEDURES

Section 8 also states clearly that the convention itself is to have responsibility for drawing up its own rules of procedures, rather than Congress. No Federal funds may be appropriated specifically for the payment of the expenses of the convention, except that the Administrator of the General Services Administration is authorized to provide facilities for the convention, and incur whatever incidental expenses are necessarily related to this provision of facilities. At the request of the convention, the Federal Government is also permitted to provide sundry information and assistance to the convention. There is to be no unit-rule voting procedure.

The section also provides that the convention is to maintain a daily verbatim record of proceedings, analogous to the CONGRESSIONAL RECORD. All records of official proceedings are to be transmitted by the convention to the National Archives within 30 days following termination of the proceedings of the convention.

Section 10 again underscores the premise of this act that a imited convention to amend the Constitution may properly be called. It restates what is already implicit in the act that a convention called under its terms may not propose amendments of a general subject different from that stated in the convention's charter—the resolution approved by Congress. The convention exercises no legitimate governmental authority beyond that granted by the States through Congress. The convention is morally obliged to limit its considerations to the subjects set forth in the State applications; I believe further that it is appropriate for Congress to establish a legal obligation to this same effect.

SUBMISSION OF AMENDMENTS TO STATES

Section 11 concerns the procedures through which the convention product is submitted to the States for ratification. Within 30 days after the completion of the convention, its presiding officer is to transmit the exact text of any proposed amendments to Congress. The officers of each House, within 30 more days of continuous session, are to transmit the amendments to the General Services Administrator who, in turn, is to submit the amendments to the States. The amendments are to be accompanied by a congressional resolution specifying pursuant to article V, the mode of ratification—whether it is to be ratified by the State legislatures or by special ratifying conventions within each of the States.

Congress may refuse to transmit an amendment and resolution to the States, only if it makes the determination that the amendment relates to or includes a general subject which differs from, or was not included as, one of the general subjects within the scope of the convention's authority. The objective is to provide some remedy to a failure by the convention to honor the limitations on its authority to propose amendments to the Constitution. Congress has no power whatsoever to refuse to submit an amendment because of disagreement with its substantive merits. Nor is it empowered to refuse to submit an amendment because of what it perceives as procedural irregu'arities in the proceedings of the convention. Convention procedure is not within the ambit of congressional concern; checks upon procedural abuse must come from the States themselves in the form of the ratification process. Because this check also exists with respect to conventions acting in an ultra vires manner, it is hoped that Congress will resolve any doubts as to whether or not the convention acting within the scope of its authority in favor of an affirmative finding.

RATIFICATION OF AMENDMENTS

Section 12 of the act, borrowing language directly from article V, states simply that amendments proposed by "limited" constitutional conventions are to become part of the Constitution when ratified in accordance with the terms of article V—by three-fourths of the States in a timely and proper manner. Certified copies of the ratification documents are to be forwarded by the States to the General Services Administration, although the ratification itself becomes effective once action is completed within the State legislature, *Dillon* v. *Gloss*, 256 U.S. 368, 376 (1921).

Section 13 expressly holds that the States are free to reconsider and reverse their ratification decisions, at least until that point at which an amendment has been ratified by three-fourths of the States. Thus, any State may ratify a proposed amendment after having previously rejected it, or may rescind an earlier ratification of a proposed amendment. It is again my view that the most reliable determination of the existence (or lack thereof) of a contemporaneous consensus can be made if the States are free to reconsider and rethink their ratification decisions until that point at which three-fourths of the States are in agreement in support of amendment, or until that point that a reasonable period of time has passed for ratification. My views on the matter of rescission of ratifications are discussed at far greater length in the CONGRESSIONAL RECORD of October 4, 1978, at pages 33434–33436.

Section 14 imposes upon the General Services Administrator the duty to proclaim the final ratification of an amendment once it is in receipt of certifications of ratification from three-fourths of the States. As section 16 clarifies, however, this is an administrative duty of a symbolic nature, not one with an impact upon the actual effectiveness of an amendment. Under article V (and section 16), the amendment becomes part of the Constitution at the moment the final State has ratified, or on any date specified on the body of the amendment itself.

JUDICIAL REVIEW

Finally, section 15 discusses the role of the judicial branch in the constitutional convention process. It establishes two express situations in which an aggrieved State may bring a direct action in the Supreme Court, pursuant to article III, section 2 of the Constitution. The first involves cases in which a State disputes any determination or finding by Congress, or the failure of Congress to make a determination or finding, with respect to its section 6 reponsibilities. Section 6 requires Congress to "call" a convention upon determining the existence of valid

applications for such a convention from two-thirds of the States.

The second situation involves cases in which Congress actions with respect to its section 11 responsibilities are questioned. Section 11 requires Congress to submit amendments proposed by the convention to the States unless it determines that the convention acted on subject matter outside the purview of its authority.

Section 15(c) expressly states that these two actions may not be inclusive concerning the right to a Supreme Court hearing, and that nothing in the act is intended to preclude such review as is otherwise provided by the Constitution or any other law of the United States. Section 15 further requires suit to be brought within 60 days of a claim, either against the Secretary of the Senate and the Clerk of the House, the General Services Administrator, or such other parties as may be necessary to afford the relief sought.

Thus, I would reject that version of the so-called political questions doctrine that suggests that all interpretative matters deriving from article V are to be resolved by Congress solely at its discretion. I find it ironic that so many individuals who have been so sympathetic to the advance of judicial activism in recent years are also those who would deny the Federal courts, particularly the Supreme Court, their constitutional obligation to interpret the plain language of that document. My views on the political questions doctrine are explained more thoroughly in the CONGRESSIONAL RECORD of October 4, 1978, at pages 33434–33436.

CONCLUSION

Mr. President, the convention method of constitutional amendment has been defended and described as an essential component of our Constitution by such Statesmen as James Madison, Alexander Hamilton, George Washington, Benjamin Franklin, and Abraham Lincoln. While no amendment has ever been ratified that has been proposed through this method, it has nevertheless exerted its influence in indirect ways. The 17th amendment to the Constitution, for example—providing for the direct election of U.S. Senators—was proposed by Congress in 1912 in response to an effort in the States to call a convention on this subject. Other convention efforts on such matters as Federal tax limitation and State legislative apportionment have also evoked a significant congressional response. It is clear, too, that the present balanced budget movement is having an impact upon national public policy.

It is necessary in order to insure some measure of symmetry in the alternative amendment processes under article V to establish some clear-cut procedures for resort to the convention method. While the absence of legislation such as the Constitutional Convention Implementation Act will not preclude the States from exercising their right to call a convention, it will insure that the amendment process will not become bogged down in constant litigation, partisan political decisions, and uncertainty. The primary effect of this can only be to undermine the integrity of our constitutional system. In the process, also, we will be eroding one of the basic elements for preserving some semblance of balance between the national and the State governments. As observed by Alexander Hamilton,

> The most powerful obstacle to the Members of Congress betraying the interest of their constituents is the State legislatures themselves, who will be standing bodies of observation, possessing the confidence of the people, jealous of Federal encroachments and armed with every power to check the first essays at treachery.

While there is no one who respects more than I do the achievement of the Founding Fathers, nor anyone who would place a greater burden of proof upon those who propose to alter the Constitution, I would nevertheless agree with Malcolm Eiselen who stated:

> To assume, as many apparently do, that a second convention could alter the Constitution only for the worse . . . is an unwarrantable libel upon the creative statesmanship and political sagacity of the American people.

A more contemporary observer has noted: To those who fear a runaway convention, it need only be observed that the only group threatening to run away with it so far is Congress itself.

The purpose of the Constitutional Convention Implementation Act is to prevent both Congress and the constitutional convention from acting outside the scope of each of their proper authority. It is designed to insure that the States, in the event that Congress remains intransigent with respect to some circumvent Congress and act on their own to remedy such a situation. It is designed also to insure that the States—and Congress—are not forced to surrender totally their sovereignty to the convention. It is designed to insure that the same matrix of constitutional checks and balances is applicable to the constitutional convention as to the other permanent institutions within our governmental system.

There can be no runaway convention unless, ultimately, the dissatisfaction of the people are so broad and pervasive that it is a runaway convention that they expressly desire. The best way that Congress can work to insure that this never becomes the case is to allow the people and the States to work their will under established procedures when their grievances are more narrow and more limited, rather than allowing them to fester as a result of contrived procedural irregularities. It is occasionally sobering to some of my colleagues, yet it is true, that ultimately it is the citizenry, not Congress, that is the responsible party in our political system.

Mr. President, I ask unanimous consent that the text of the bill and several articles be printed in the RECORD.

There being no objection, the bill and articles were ordered to be printed in the RECORD, as follows:

S. 817

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Constitutional Convention Implementation Act of 1981".

APPLICATIONS FOR CONSTITUTIONAL CONVENTION

SEC. 2. (a) The legislature of a State, in making application to the Congress for a constitutional convention under article V of the Constitution of the United States, for the purpose of proposing one or more specific amendments shall adopt a resolution pursuant to this Act stating, in substance, that the legislature requests the calling of a convention for the purpose of proposing one or more specific amendments to the Constitution of the United States and stating the general subject of the amendment or amendments to be proposed.

(b) The procedures provided by this Act are required to be used whenever application is made to the Congress, under article V of the Constitution of the United States, for the calling of any convention for the purposes of proposing one or more specific amendments to the Constitution of the United States, each applying State stating in the terms of its application the general subject of the amendment or amendments to be proposed.

APPLICATION PROCEDURE

SEC. 3. (a) The rules of procedure governing the adoption or withdrawal of a resolution pursuant to section 2 and section 5 of this Act are determinable by the State legislature except that the assent of the Governor shall be unnecessary.

(b) Questions concerning compliance with the rules governing the adoption or withdrawal of a State resolution cognizable under this Act are determinable by the State legislature.

TRANSMITTAL OF APPLICATIONS

SEC. 4. (a) Within thirty days after the adoption by the legislature of a State of a resolution to apply for the calling of a constitutional convention, the secretary of state of the State, or, if there be no such officer, the person who is charged by the State law with such function, shall transmit to the Congress of the United States two copies of the application, one addressed to the President of the Senate and one to the Speaker of the House of Representatives.

(b) Each copy of the application so made by any State shall contain—

(1) the title of the resolution, the exact text of the resolution signed by the presiding officer of each house of the State legislature, the date on which the legislature adopted the resolution, and a certificate of the secretary of state of the State, or such other person as is charged by the State law with such function, certifying that the application accurately sets forth the text of the resolution; and

(2) to the extent practicable, and if desired, a list of all State applications in effect on the date of adoption whose subject or subjects are substantially the same as the subject or subjects set forth in the application.

(c) Within ten days after receipt of a copy of any such application, the President of the Senate and Speaker of the House of Representatives shall report to the House of which he is presiding officer, identifying the State making application, the general subject of the application, and the number of States then having made application on such subject. The President of the Senate and Speaker of the House of Representatives shall jointly cause copies of such application to be sent to the presiding officer of each house of the legislature of every other State and to each Member of the Senate and House of Representatives of the Congress of the United States.

EFFECTIVE PERIOD OF APPLICATION

SEC. 5. (a) An application submitted to the Congress by a State, unless sooner withdrawn by the State legislature, shall remain effective for the lesser of the period specified in such application by the State legislature or for a

period of seven calendar years after the date it is received by the Congress, except that whenever within a period of seven calendar years two-thirds or more of the several States have each submitted an application calling for a constitutional convention on the same general subject all such applications shall remain in effect until the Congress has taken action on a concurrent resolution, pursuant to section 6 of this Act, calling for a constitutional convention.

(b) A State may withdraw its application calling for a constitutional convention by adopting and transmitting to the Congress a resolution of withdrawal in conformity with the procedures specified in sections 3 and 4 of this Act, except that no such withdrawal shall be effective as to any valid application made for a constitutional convention upon any subject after the date on which two-thirds or more of the State legislatures have valid applications pending before the Congress seeking amendments on the same general subjects.

CALLING OF A CONSTITUTIONAL CONVENTION

SEC. 6. (a) It shall be the duty of the Secretary of the Senate and the Clerk of the House of Representatives to maintain a record of all applications received by the President of the Senate and Speaker of the House of Representatives from States for the calling of a constitutional convention upon each general subject. Whenever applications made by two-thirds or more of the States with respect to the same general subject have been received, the Secretary and the Clerk shall so report within five days, in writing to the officer to whom those applications were transmitted, and such officer within five days thereupon shall announce on the floor of the House of which he is an officer the substance of such report. It shall then be the duty of such House to determine that there are in effect valid applications made by two-thirds of the States with respect to the same general subject. If either House of the Congress determines, upon a consideration of any such report or of a concurrent resolution agreed to by the other House of the Congress, that there are in effect valid applications made by two-thirds or more of the States for the calling of a constitutional convention upon the same general subject, it shall be the duty of that House to agree to a concurrent resolution calling for the convening of a Federal constitutional convention upon that general subject. Each such concurrent resolution shall (1) designate the place and time of meeting of the convention, and (2) set forth the general subject of the amendment or amendments for the consideration of which the convention is called. A copy of each such concurrent resolution agreed to by both Houses of the Congress shall be transmitted forthwith to the Governor and to the presiding officer of each house of the legislature of each State.

(b) The convention shall be convened not later than four months after adoption of the resolution.

DELEGATES

SEC. 7. (a) Each State shall appoint, in such manner as the legislature thereof may direct, a number of delegates, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress. No Senator or Representative or person holding an office of trust or profit under the United States, shall be appointed as delegate. Any vacancy occurring in a State delegation shall be filled by appointment of the legislature of that State.

(b) The secretary of state of each State, or, if there be no such officer, the person charged by State law to perform such function shall certify to the President of the Senate and the Speaker of the House of Representatives the name of each delegate elected or appointed by the legislature of the State pursuant to this section.

(c) Delegates shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at a session of the convention, and in going to and returning from the same; and for any speech or debate in the convention they shall not be questioned in any other place.

CONVENING THE CONVENTION

SEC. 8. (a) Of those persons serving as chief justices of the highest courts of the States, the person who is senior in years of service as such a chief justice shall convene the constitutional convention. He shall administer the oath of office of the delegates to the convention and shall preside until the delegates elect a presiding officer who shall preside thereafter. Before taking his seat each delegate shall subscribe to an oath by which he shall be committed during the conduct of the convention to comply with the Constitution of the United States and the provisions of this Act. Further proceedings of the convention shall be conducted in accordance with such rules, not inconsistent with this Act as the convention may adopt.

(b) No Federal funds may be appropriated specifically for the purposes of payment of the expenses of the convention. The convention shall be responsible for apportioning its costs among the States.

(c) The Administrator of the General Services shall provide such facilities, and the Congress and each executive department, agency, or authority of the United States, including the legislative branch and the judicial branch, except that no declaratory judgment may be required, shall provide such information and assistance as the convention may require, upon written request made by the elected presiding officer of the convention.

PROCEDURES OF THE CONVENTION

SEC. 9. (a) In voting on any question before the convention, including the proposal of amendments, each delegate shall have one vote.

(b) The convention shall keep a daily verbatim record of its proceedings and publish the same. The vote of the delegates on any question shall be entered on the record.

(c) Within thirty days after the termination of the proceedings of the convention, the presiding officer shall transmit to the Archivist of the United States all records of official proceedings of the convention.

PROPOSAL OF AMENDMENTS

SEC. 10. No convention called under this Act may propose any amendment or amendments of a general subject different from that stated in the concurrent resolution calling the convention.

APPROVAL BY CONGRESS AND TRANSMITTAL TO THE STATES FOR RATIFICATION

SEC. 11. (a) The presiding officer of the convention shall, within thirty days after the termination of its proceedings, submit to the Congress the exact text of any amendment or amendments agreed upon by the convention.

(b) Whenever a constitutional convention called under this Act has transmitted to the Congress a proposed amendment to the Constitution, the President of the Senate and the Speaker of the House of Representatives, acting jointly, shall transmit such amendment to the Administrator of General Services upon the expiration of the first period of thirty days of continuous session of the Congress following the date of receipt of such amendment unless within that period both Houses of the Congress have agreed to a concurrent resolution stating that the Congress disapproves the submission of such proposed amendment to the States because such proposed amendment relates to or includes a general subject which differs from or was not included as one of the general subjects named or described in the concurrent resolution of the Congress by which the convention was called. Such resolution shall be transmitted to the legislatures of the States and the Administrator of General Services. The adoption by the Congress of such resolution shall not relieve the President of the Senate and the Speaker of the House of Representatives of the obligation imposed upon them by the first sentence of this paragraph.

(c) For the purposes of subsection 11(b), (i) the continuity of a session of the Congress shall be broken only by an adjournment of the Congress sine die, and (ii) the days on which either House is not in session because of an adjournment of more than three days to a day certain shall be excluded in the computation of the period of thirty days.

(d) Upon receipt of any such proposed amendment to the Constitution, the Administrator shall transmit forthwith to each of the several States a duly certified copy thereof, and a copy of any concurrent resolution agreed to by both Houses of the Congress which prescribes the mode in which such amendment shall be ratified unless the Administrator has also received a concurrent resolution of disapproval pursuant to subsection 11(b). Such concurrent resolution may also prescribe the time within which such amendment shall be ratified in the event that the amendment itself contains no such provision. In no case shall such a resolution prescribe a period for ratification of less than four years.

RATIFICATION OF PROPOSED AMENDMENTS

SEC. 12. (a) Any amendment proposed by the convention and submitted to the States in accordance with the provisions of this Act shall be valid for all intents and purposes as part of the Constitution of the United States when duly ratified by three-fourths of the States in the manner and within the time specified consistent with the provisions of article V of the Constitution of the United States.

(b) The secretary of state of the State, or if there be no such officer, the person who is charged by State law with such function, shall transmit a certified copy of the State action ratifying any proposed amendment to the Administrator of General Services.

RESCISSION OF RATIFICATIONS

SEC. 13. (a) Any State may rescind its ratification of a proposed amendment by the same processes by which it ratified the proposed amendment, except that no State may rescind when there are existing valid ratifications of such amendment by three-fourths of the States.

(b) Any State may ratify a proposed amendment even though it previously may have rejected the same proposal.

PROCLAMATION OF CONSTITUTIONAL AMENDMENTS

SEC. 14. The Administrator of General Services, when three-fourths of the several States have ratified a proposed amendment to the Constitution of the United States, shall issue a proclamation that the amendment is a part of the Constitution of the United States.

JUDICIAL REVIEW

SEC. 15. (a) Any State aggrieved by any determination or finding, or by any failure of Congress to make a determination or finding within the periods provided, under section 6 or section 11 of this Act may bring an action in the Supreme Court of the United States against the Secretary of the Senate and the Clerk of the House of Representatives or, where appropriate, the Administrator of General Services, and such other parties as may be necessary to afford the relief sought. Such an action shall be given priority on the Court's docket.

(b) Every claim arising under this Act shall be barred unless suit is filed thereon

within sixty days after such claim first arises.

(c) The right to review by the Supreme Court provided under subsection (a) does not limit or restrict the right to judicial review of any other determination or decision made under this Act of such review as is otherwise provided by the Constitution or any other law of the United States.

EFFECTIVE DATE OF AMENDMENTS

SEC. 16. An amendment proposed to the Constitution of the United States shall be effective from the date specified therein or, if no date is specified, then on the date on which the last State necessary to constitute three-fourths of the States of the United States, as provided for in article V, has ratified the same.

[From the New York Times, Mar. 11, 1981]

CONSTITUTION, LOOK OUT

The legislatures of Missouri and Washington are close to petitioning Congress for a national convention for the purpose of amending the Constitution to require a balanced Federal budget. They would be the 31st and 32d states to join the call, only two short of the required two-thirds of the state legislatures before Congress would have to respond. That number 32, like every other aspect of this method of constitutional change, is disputed. But one thing is clear: a constitutional crisis may be imminent.

An exaggeration? If Congress deflected the call and proposed its own amendment instead, the greatest danger might pass. But if the drive for a convention persists, it would open a path to wholesale, even reckless revision.

The familiar way to amend the Constitution is for Congress to propose a change, by two-thirds vote, and for three-fourths of the states to ratify. But the Constitution allows a second method, by convention, on call of two-thirds of the states. That route has never been traveled to the end, though a convention drive did spur Congress to offer at least one amendment—the 17th, providing for direct election of senators. Even now, some of the state resolutions express a preference for Congressional action.

Once begun, there's no telling where the convention process might lead. Scholars differ about every aspect of it. Could Congress ignore petitions for a convention that are not identically worded or confined to precisely the same subject? Could Congress dictate the method of delegate selection and limit the convention agenda? The National Taxpayers Union, which leads this campaign, contends that a runaway can be prevented. But the leaders of other causes—against abortion, for the death penalty, for prayer in public schools—will be tempted to enlarge the convention's business.

Congress should long ago have written rules for this process. But even that task requires passing through a constitutional minefield. How can Congress prevent a convention that runs away, votes to repeal sacred constitutional rights and invites the states to ratify? It's often said that many uninformed votes nowadays would reject even the Bill of Rights. Does anyone want to test that proposition?

There's mischief enough in the idea that propels this convention call. A mandated balance of the Federal budget could tie the Government into fiscal knots or, at best, clutter the Constitution with easily evaded fiscal pieties. No one prizes a balanced budget more than President Reagan, but even he could not now run the country in such a straitjacket. The Administration's current budget slashing, for all its pain, is a minor annoyance compared to the dislocations that such an amendment could provoke. If foolish fiscal goals cannot be kept out of the Constitution, they should at least be carefully devised, over time, with prudent escape clauses.

The convention method is so fraught with uncertainty and controversy, it should be used only in the direst and most unlikely emergency—one that the nation recognizes but Congress and the President do not. There is no justification for it now. Today's tax revolt could not ask for a better friend in the White House, and budget amendments stand to receive all the attention they deserve, and more, from Senator Thurmond's Judiciary Committee.

Citizens and legislators in 18 states, mostly in the Northeast and Middle West, should recognize this sudden threat to orderly constitutional processes. West Virginia and Ohio are tomorrow's battlegrounds. Fresh attempts are expected in Wisconsin and Vermont. They should hold the line.

A REVIVAL, JUST IN CASE

(By James J. Kilpatrick)

The Congress has a piece of unfinished business left over from 1971. When the two houses have nothing better to do, which is most of the time, they ought to get at it. This is an act to provide for the holding of a constitutional convention.

Once again the states are applying pressure. At the last count, no fewer than 22 states had filed petitions with Congress, asking that a convention be called in accordance with Article V of the Constitution. The petitioning states want an amendment to require a balanced federal budget. They are going at it the hard way.

Not many persons are acquainted with the "state application" provision of Article V, and this is not surprising; the provision never has been successfully invoked. Every amendment to the Constitution thus far, has come into being through the familiar procedure by which two thirds of each house of Congress approves a proposal and sends it out to the states.

The founding fathers, fearful of an intransigent national legislature, wisely provided an alternative course. "The Congress on the application of the legislatures of two thirds of the several states shall call a convention for proposing amendments." Note that the provision is not discretionary; it is mandatory: The Congress "shall" call.

Over the past 19 years, every state in the union at one time or another has petitioned Congress in this fashion. Amendments have been sought embracing everything from polygamy to prohibition. Early in the century, so many states petitioned for the direct election of senators that Congress itself put in motion the resolution that resulted in the 17th Amendment. At the time of a study by the American Bar Association in 1971, more than 300 such petitions had been filed.

The ABA report stemmed from a sudden onrush of state applications having to do with the issue of reapportionment. Many of the state legislatures were infuriated by the Supreme Court's one-man, one-vote, decree in Baker vs. Carr. They set about passing resolutions, many of them identically phrased, demanding that Congress call a constitutional convention to undo what the high court had done.

Then as now, 34 states (representing two thirds of all the states) would have triggered the call. Amazingly, by mid-1967 the count actually got to 32. Sen. Everett Dirksen of Illinois, grand marshal of this remarkable parade, was ecstatic. His colleague, Paul Douglas, was aghast. Douglas suggested that if a 34th application should materialize, Congress ought to refuse the call anyhow. That set Dirksen into flights of oratory scarcely equaled since Cicero took off on the Carthaginians. Such senators as Javits of New York, Proxmire of Wisconsin and Robert Kennedy of New York denounced the very idea of the constitutional convention.

One thing led to another, and in October of 1967 the Senate Judiciary Committee conducted hearings on the whole business. The hearings led to a bill sponsored by Sam Ervin of North Carolina that passed the Senate 84-0 in October of 1971: Then interest waned, and nothing much had been heard of the matter until the latest campaign began to gather momentum.

Prudence suggests that Congress send for the Ervin bill and trot it around the track once more. It seems to be doubtful that 12 more states will make application under Article V, but you never know. It would be far better to provide the machinery now than to hustle up a bill, as the ABA study observed, in a time of "divisive controversy and confusion." An act should provide for validating the applications, for electing and paying delegates to a convention, and for other housekeeping matters.

For the record, even a faint prospect of a constitutional convention gives me the willies. Scholars disagree, but there is good reason to believe a convention could not be limited to proposing a single amendment on tax limitation. A convention could conceivably propose a complete rewriting of our fundamental law. The wisest course would be for Congress voluntarily to restrain its profligate impulses, and meanwhile, to revive the Ervin bill—just in case.

[From the Washington Star, Mar. 19, 1981]

CONSTITUTIONAL CONVENTION IS 4 VOTES AWAY

(By Germond and Witcover)

Don't look now, but that specter so feared by members of Congress and many political scientists alike—a constitutional convention to write a federal balanced-budget amendment—is rising again.

While hardly anybody has been watching, 30 state legislatures have passed resolutions petitioning Congress to call such a convention—just four states short of the two-thirds requirement for mandatory congressional action.

What's more, one legislative body in four additional states has approved such a resolution, meaning that the advocates of a constitutional convention are within striking distance of their objective. Unlike Equal Rights Amendment proponents, who are three states short of the three-fourths required for ratification with only a few states still to act, the backers of the balanced-budget convention have plenty of uncommitted states from which to draw.

The upshot of all this is that intense pressure is suddenly on Congress itself to pass an amendment requiring a federal balanced budget. Such action could be the only means of averting a constitutional convention that many politicians and academics say could risk a wholesale and destructive rewriting of the prime law of the land.

So far this year, the state senates in Missouri, Ohio and West Virginia and the House in Washington have all approved resolutions asking Congress to call such a convention. In other states, too, such as California, Montana and Alaska, the matter is under active legislative consideration.

And on top of all this is the fact that a strong and highly visible proponent of the balanced federal budget is in the White House. The wide public support for Ronald Reagan's drive to get a rein on federal spending has created a climate that can only be supportive of the drive. The amendment would require the federal government to balance its budget every year, except in times of defined national emergency.

An explicit ramification of the effort's success to date is the fact that hearings now are being held in both houses of Congress to short-circuit the constitutional convention approach by passing a balance-the-budget constitutional amendment by more conventional means.

In the Senate, the Republican takeover has put a proponent, Sen. Orrin Hatch, in the

chairmanship of the Constitution Subcommittee of the Judiciary Committee, replacing former Sen. Birch Bayh, an avid foe, and a proponent, Sen. Strom Thurmond, as chairman of the full committee, replacing another staunch opponent, Sen. Edward M. Kennedy.

In the last session, the Judiciary Committee failed by one vote to approve the amendment and send it to the floor for a vote. Already, the legislation has a majority of the Senate as co-sponsors, indicating passage by summer. In the House, the effort will be harder, but already 53 members have sponsored the amendment and hearings there also are under way.

Time definitely is a critical factor, because once 34 states have legally called on Congress to summon a constitutional convention, it will have to be done. Proponents also have bills pending to establish precise procedures for Congress to judge the validity of state petitions and to set up a convention machinery—legislation that could blunt expected court challenges to the call.

Most states that have passed resolutions, however, have specified their action will be withdrawn if Congress itself places an amendment requiring a balanced budget before the states for ratification. So the action by the state legislatures clearly is intended as a prod to Congress.

The campaign for a constitutional convention has been a sleeper. It moved along with hardly any notice at all until the passage in 1978 of Proposition 13, the mandatory 50 percent cut in local property taxes in California, which fueled a nationwide "taxpayers' revolt." That phenomenon threw a largely unwanted spotlight on the drive for a convention call, with which proponents had hoped to sneak up on Congress without any serious organized opposition.

Indeed, when Gov. Jerry Brown of California, who joined Prop 13 when he couldn't beat it, conspicuously joined the constitutional convention forces, many in the movement groaned. They felt Brown's glamor would only draw attention to their legislative guerrilla campaign. But even Jerry Brown has not seemed to hurt the drive, directed by a group called the National Taxpayers' Union that spent $1.8 million last year.

The question now is whether Congress will be stampeded into passing the amendment, and the battleground clearly will be the House Judiciary Committee under Rep. Peter Rodino. He has frowned on the amendment approach in the past, but a new climate exists in the country, so anything can happen.

[From the Michigan Law Review, March 1968]

THE CONVENTION METHOD OF AMENDING THE CONSTITUTION

(By Sam J. Ervin, Jr.)

Article V of the Constitution of the United States [1] provides that constitutional amendments may be proposed in either of two ways—by two-thirds of both houses of the Congress or by a convention called by the Congress in response to the applications of two-thirds of the state legislatures. Although the framers of the Constitution evidently contemplated that the two methods of initiating amendments would operate as parallel procedures, neither superior to the other, this has not been the case historically. Each of the twenty-five constitutional amendments ratified to date was proposed by the Congress under the first alternative. As a result, although the mechanics and limitations of congressional power under the first alternative are generally understood, very little exists in the way of precedent or learning relating to the unused alternative method in article V.

Footnotes at end of article.

This became distressingly clear recently, following the disclosure that thirty-two state legislatures had, in one form or another petitioned the Congress to call a convention to propose a constitutional amendment permitting states to apportion their legislatures on the basis of some standard other than the Supreme Court's "one man-one vote" requirement.

The scant information and considerable misinformation and even outright ignorance displayed on the subject of constitutional amendment, both within the Congress and outside of it—and particularly the dangerous precedents threatened by acceptance of some of the constitutional misconceptions put forth—prompted me to introduce in the Senate a legislative proposal designed to implement the convention amendment provision in article V.

This article will discuss that provision of the Constitution, the major questions involved in its implementation, and the answers to those questions supplied by the provisions of the bill, Senate Bill No. 2307.[2]

II. BACKGROUND

On March 26, 1962, the United States Supreme Court, in the landmark case of *Baker* v. *Carr*,[3] held that state legislative apportionment is subject to judicial review in federal courts, thus overruling a long line of earlier decisions to the contrary. Two years later, on June 15, 1964, in *Reynolds* v. *Sims*,[4] the controversial "one man-one vote" decision, the Court held that the equal protection clause of the Fourteenth Amendment requires that both houses of bicameral state legislatures be apportioned on a population basis.

The two decisions evoked a storm of controversy. In the Congress, dissatisfaction with the Court's intrusion into the hitherto nonjusticiable political thicket resulted in attempts in both Houses to reverse the rulings by legislation or constitutional amendment. On August 19, 1964, the House of Representatives passed a bill introduced by Representative Tuck of Virginia which would have stripped federal district courts of jurisdiction over state apportionment cases and denied the Supreme Court appellate jurisdiction over such cases. The Senate declined to invoke that extreme remedy, passing instead a "'sense of Congress" resolution that the state legislatures should be given time to reapportion before the federal judiciary intervened further. In both 1965 and 1966, however, a majority of the Senate voted to propose the so-called "Dirksen amendment" to the Constitution, which would permit a state to apportion one house of its bicameral legislature on some standard other than population. But the amendment failed both times to get the required two-thirds vote, failing fifty-seven to thirty-nine in 1965 and fifty-five to thirty-eight in 1966.

A more extraordinary effect of the rulings in *Baker* v. *Carr* and *Reynolds* v. *Sims* was the activity generated in the state legislatures designed to reverse the Court's rulings by means of a constitutional amendment proposed by a convention convened under the second clause of article V. In December 1962, following *Baker* v. *Carr*, the Council of State Governments, at its Sixteenth Biennial General Assembly of the States, recommended that the state legislatures petition the Congress for a constitutional convention to propose three amendments, including an amendment to accomplish essentially the same purpose as the Tuck bill, that is, the denial to federal courts of original and appellate jurisdiction over state legislative apportionment cases. In response to this call, twelve state petitions were sent to the Congress during 1963 requesting a constitutional convention to propose such an amendment.[5] Although this was the largest number of petitions on the same subject ever received by the Congress in any one year, the total was far below the required thirty-four, and their receipt caused no excitement in the Congress and attracted no public attention.

In December 1964, following the decision in Reynolds v. Sims, the Seventeenth Biennial General Assembly of the States recommended that the state legislatures petition the Congress to convene a constiutional convention to propose an amendment along the lines of the Dirksen amendment, permitting the states to apportion one house of a bicameral legislature on some standard other than population. The response to this call was even greater than in 1963. Twenty-two states submitted constitutional convention petitions to Congress during the Eighty-ninth Congress (1965 and 1966) and four more during the first session of the Ninetieth Congress (1967). If one counted the petitions adopted by four other states, questionable in regard to their proper receipt by Congress,[6] this brought the total number of state petitions on the subject of state legislative apportionment to thirty-two.

At this point, March 1967, the situation attracted the first attention in the press. A New York Times story on March 18, 1967,[7] reported that only two more petitions were necessary to invoke the convention amendment procedure. The immediate reaction was a rash of newspaper editorials and articles, almost uniformly critical of the effort to obtain a convention, and a flurry of speeches on the subject in the Congress. Whether favorable or unfavorable to the efforts by all the states, all of these press items and all of the congressional speeches had one common denominator.

They all bore the obvious imprint of the author's feelings about the merits of state legislative apportionment. Those newspapers that had editorially supported the Supreme Court's decisions now decried and states' "back-door assault on the Constitution." [8] Those newspapers that had criticized "one man-one vote" now applauded the effort by the state legislators to overrule the new principle by constitutional amendment.

Much more disturbing to me was the fact that many of my colleagues in the Senate seemed to be influenced more by their views on the reapportionment issue than by concern for the need to answer objectively some of the perplexing constitutional questions raised by the states' action. Those Senators who had been critical of the "one man-one vote" decision and were eager to undo it now expressed the conviction that the Congress was obligated to call a convention when thirty-four petitions were on hand and that it had little power to judge the validity of state petitions.

Those Senators who agreed with the Supreme Court's ruling were now contending that some or all of the petitions were invalid for a variety of reasons and should be discounted, and that, in any case, Congress did not have to call a convention if it did not wish to. Most distressing of all was the apparent readiness of everyone to concede that any convention, once convened, would be unlimited in the scope of its authority and empowered to run rampant over the Constitution, proposing any amendment or amendments that happened to strike its fancy. That interpretation, supported neither by logic nor constitutional history, served the convenience of both sides in the apportionment controversy. Those who did not want to call a convention that might propose a reapportionment amendment pointed out that an open convention would surely be a constitutional nightmare. Opponents of "one man-one vote" cited the horrors of an open convention as an additional reason for proposal of a reapportionment amendment by the Congress.

My conviction was that the constitutional questions involved were far more important than the reapportionment issue that had

brought them to light, and that they should receive more orderly and objective consideration than they had so far been accorded. Certainly it would be grossly unfortunate if the partisanship over state legislative apportionment—and I am admittedly a partisan on that issue—should be allowed to distort an attempt at clarification of the amendment process, which in the long run must command a higher obligation and duty than any single issue that might be the subject of that process. Any congressional action on this subject would be a precedent for the future, and the unseemly squabble that had already erupted was to me a certain indication that only bad precedents could result from an effort to settle questions of procedure under article V simultaneously with the presentation of a substantive issue by two-thirds of the states. Although it is not easy to anticipate all of the problems that may develop in the convention amendment process, nor to deal with those problems wisely in the abstract, I nevertheless felt that the wisest course would be to consider and enact permanent legislation to implement the convention amendment provision in article V.

I introduced S. 2307 on August 17, 1967. In my statement accompanying introduction, I stressed that I was not committed to the provisions of the bill as then drafted. I was convinced only of the necessity for action on the subject, action that might forestall a congressional choice between chaos on the one hand and refusal to abide the commands of article V on the other. Open hearings on the bill were held on October 30 and 31, 1967, before the Senate Subcommittee on Separation of Powers. The testimony revealed deficiencies in the bill and suggested modifications and additions. As a result, I have subsequently amended the bill in several respects.

In discussing specific questions raised by the bill, I shall describe the relevant provision of the original draft and note the amendments made since the hearings.

III. QUESTIONS RAISED BY THE BILL

Before going to specific issues and matters of detail, it seems appropriate to discuss briefly two threshold problems posed by the bill: whether the Congress has the power to enact such legislation, and, if it does, what policy considerations should guide it in exercising such power.

I have no doubt that the Congress has the power to legislate about the process of amendment by convention. The Congress is made the agency for calling the convention, and it is hard to see why the Congress should have been involved in this alternative method of proposal at all unless it was expected to determine such questions as when sufficient appropriate applications had been received and to provide for the membership and procedures of the convention and for review and ratification of its proposals.

Obviously the fifty state legislatures cannot themselves legislate on this subject. The constitutional convention cannot do so for it must first be brought into being.

All that is left, therefore, is the Congress, which, in respect to this and other issues not specifically settled by the Constitution, has the residual power to legislate on matters that require uniform settlement. Add to this the weight of such decisions as Coleman *v.* Miller,[9] to the effect that questions arising in the amending process are nonjusticiable political questions exclusively in the congressional domain, and the conclusion seems inescapable that the Congress has plenary power to legislate on the subject by amendment by convention and to settle every point not actually settled by article V of the Constitution itself.

With respect to the second problem, within what general policy limitations that power should be exercised, I think the Congress should be extremely careful to close as few doors as possible. Any legislation on this subject will be what might be called "quasi-organic" legislation; in England it would be recognized as a constitutional statute. When dealing with such a measure, it is wise to bear in mind Marshall's well-worn aphorism that it is a Constitution we are expounding and not get involved in "an unwise attempt to provide, by immutable rules, for exigencies which, if foreseen at all, must [be] seen dimly, and which can best be provided for as they occur."[10] This approach is reflected at several points in the bill, notably in its failure to try to anticipate and enumerate the various grounds on which Congress might justifiably rule a state petition invalid, and its failure to prescribe rigid rules of procedure for the convention.

In addition, I think the Congress, in exercising its power under article V, should bear in mind that the Framers meant the convention method of amendment to be an attainable means of constitutional change. This legislation can be drawn so as to place as many hurdles as possible in the way of effective use of the process; or it can be drawn in a manner that will make such a process a possible, however improbable, method of amendment. The first alternative would be a flagrant disavowal of the clear language and intended function of article V. I have assumed that the Congress will wish to take the second road, and the bill is drawn with that principle in mind.

Open or limited convention?

Perhaps the most important issue raised by the bill is the question of the power of the Congress to limit the scope and authority of a convention convened under article V in accordance with the desires of the states as set forth in their applications. This was, as I have noted, one of the issues that most troubled me when I first heard of the efforts by the states to call a convention.

It has been argued that the subject matter of a convention convened under article V cannot be limited, since a constitutional convention is a premier assembly of the people, exercising all the power that the people themselves possess, and therefore supreme to all other governmental branches or agencies. Certainly, according to this argument, the states may not themselves, in their applications, dictate limitations on the convention's deliberations. They may not require the Congress to submit to the convention a given text of an amendment, nor even a single subject or idea. For the convention must be free to "propose" amendments, which suggests the freedom to canvass matters afresh and to weigh all possibilities and alternatives rather than ratify a single text or idea.

The states may in their applications specify the amendment or amendments they would hope the convention would propose. But once the Congress calls the convention, those specifications would not control its deliberations. The convention could not be restricted to the consideration of certain topics and forbidden to consider certain other topics, nor could it be forbidden to write a new constitution if it should choose to do so.

I will concede that such an interpretation can be wrenched from article V—but only through a mechanical and literal reading of the words of the article, totally removed from the context of their promulgation and history. My reading of the debates on article V at the Philadelphia Convention and the other historical materials bearing on the intended function of the amendment process[11] leads me to the opposite conclusion. As I understand the debates, the Founders were concerned, first, that they not place the new government in the same straitjacket that inhibited the Confederation, unable to change fundamental law without the consent of every state.

The amendment process, rather a novelty for the time, was therefore included in the Constitution itself. Second, the final form of article V was dictated by a major compromise between those delegates who would utilize the state legislatures as the sole means of initiating amendments and those who would lodge that power exclusively in the national legislature.

The forces at the convention that sought to limit the power of originating amendments to the states were at first dominant. The original Virginia Plan, first approved by the convention, excluded the national legislature from participation in the amendment process. On reconsideration, the forces that would limit the power of origination of amendments to the national legislature became prevalent.

The arguments on both sides were persuasive: the improprieties or excess of power in the national government would not likely be corrected except by state initiative, while improprieties by the state governments or deficiencies in national power would not likely be corrected except by national initiative. In the spirit that typified the 1787 Convention, the result was acceptance of a Madison compromise proposal which read, as the final article was to read, in terms of alternative methods.

It is clear that neither of the two methods of amendment was expected by the Framers to be superior to the other or easier of accomplishment. There is certainly no indication that the national legislature was intended to promote individual amendments while the state legislatures were to be concerned with more extensive revisions. On the contrary, there is strong evidence that what the members of the convention were concerned with in both cases was the power to make specific amendments. They did not appear to anticipate a need for a general revision of the Constitution. And certainly this was understandable, in light of the difficulties that they had in finding the compromises to satisfy the divergent interests needed for ratification of their efforts. Provision in article V for two exceptions to the amendment power[12] underlines the notion that the convention anticipated specific amendment or amendments rather than general revision. For it is doubtful that these exceptions could have been expected to control a later general revision.

This construction is supported by references to the amendment process in the Federalist Papers. In Federalist No. 43, James Madison explained the need and function of article V as follows:

"That useful alterations will be suggested by experience, could not but be foreseen. It was requisite therefore that a mode for introducing them should be provided. The mode preferred by the Convention seems to be stamped with every mark of propriety. It guards equally against that extreme facility which would render the Constitution too mutable; and that extreme difficulty which might perpetuate its discovered faults, if moreover equally enables the general and the state governments to originate the amendment of errors as they may be pointed out by the experience on one side or on the other."

Hamilton, in Federalist No. 85, was even more emphatic in pointing out the possibility of specific as well as general amendment of the Constitution on the initiative of the state legislatures:

"But every amendment to the constitution, if once established, would be a single proposition, and might be brought forward singly. There would then be no necessity for management or compromise, in relation to any other point, no giving nor taking. The will of the requisite number would at once bring the matter to a decisive issue. And

Footnotes at end of article.

consequently whenever nine or rather ten states, were united in the desire of a particular amendment, that amendment must infallibly take place."

Apart from being inconsistent with the language and history of article V, the contention that any constitutional convention must be a wide open one is neither a practicable nor a desirable one. If the subject matter of amendments were to be left entirely to the convention, it would be hard to expect the states to call for a convention in the absence of a general discontent with the existing constitutional system.

This construction would effectively destroy the power of the states to originate the amendment of errors pointed out by experience, as Madison expected them to do. Alternatively, under that construction, applications for a limited convention deriving in some states from a dissatisfaction with the school desegregation cases, in others because of the school prayer cases, and in still others by reason of obection to the *Miranda* rule, could all be combined to make up the requisite two-thirds of the states needed to meet the requirement of article V.

I find it hard to believe that this is the type of consensus that was thought to be appropriate to calling for a convention.

For if such disparate demands were sufficient, all the applications to date—and there are a large number of them—should be added up to see whether, in what is considered an appropriate span of time, two-thirds of the states have made demands for a constitutional convention to propose amendments, no matter the cause for applications or the specifications contained in them. Moreover, once such a convention were convened, it could refuse to consider any of the problems or subjects specified in the states' applications, and instead propose amendments on other subjects or rewrite the Constitution in a manner unacceptable to any of the applicant states.

My construction of article V, with reference to the initiation of the amendment procedure by the state legislatures, is consistent with the literal language of the article as well as its history, and is more desirable and practicable than the alternative construction. As I see it, the intention of article V was to place the power of initiation of amendments in the state legislatures. The function of the convention was to provide a mechanism for effectuating this initiative. The role of the states in filing their applications would be to identify the problem or problems that they believed to call for resolution by way of amendment. The role of the convention that would be called by reason of such action by the states would then be to decide whether the problem called for correction by constitutional amendment and, if so, to frame the amendment itself and propose it for ratification as provided in article V. The bill carries out this intention in keeping not only with the letter but also with the spirit of article V.

The bill provides that state petitions to the Congress which request the calling of a convention under article V shall state the nature of the amendment or amendments to be proposed by such convention. Upon receipt of valid applications from two-thirds or more of the states requesting a convention on the same subject or subjects, the Congress is required to call a convention by concurrent resolution, specifying in the resolution the nature of the amendment or amendments for the consideration of which the convention is being called. The convention may not propose amendments on other subjects and, if it does, the Congress may refuse to submit them to the states for ratification.

Under the provisions, the states could not require the Congress to submit to a convention a given text of an amendment, demanding an up or down vote on it alone. But they could require the Congress to submit a single subject or problem, demanding action on it alone.

They could not, however, define the subject so narrowly as a deprive the convention of all deliberate freedom. To use the reapportionment issue as an example, the states could not require the Congress to call a convention to accept or reject the exact text of the reapportionment amendment recommended by the Council of State Governments, for then the convention would be merely a ratifying body. But they could properly petition for a convention to consider the propriety of proposing a constitutional amendment to deal with the reapportionment problems raised by the Supreme Court decision, defining those problems in specific terms.

The convention would then be confined to that subject, but it would be free to consider the propriety of proposing any amendment and the form the amendment should take—that of the Dirksen proposal, the Tuck proposal, or some other form. To take another example, those states which might desire a convention to deal with the Escobedo-Miranda issue could phrase their petitions generally in terms of the problem of federal control over the criminal processes of the states.

The convention would then be confined to that subject, but would nevertheless have great deliberative freedom to canvass all possible solutions and propose whatever amendment or amendments it deemed appropriate to respond to the problems identified by the states.

I am convinced that these provisions of the bill fully accord with the mandate of article V, its history, and intended function.

May Congress refuse to call a convention?

Perhaps the next most important question raised by the bill is whether the Congress has any discretion to refuse to call a convention in the face of appropriate applications from a sufficient number of states.

Article V states that Congress "shall" call a convention upon the applications of the legislatures of two-thirds of the states. I have absolutely no doubt that the article is peremptory and that the duty is mandatory, leaving no discretion to the Congress to review the wisdom of the state applications. Certainly this is the more desirable construction, consonant with the intended arrangement of article V as described in the preceding section of this article. The founders included the convention alternative in the amending article to enable the states to initiate constitutional reform in the event the national legislature refused to do so. To concede to the Congress any discretion to consider the wisdom and necessity of a particular convention call would in effect destroy the role of the states.

The comments of both Madison and Hamilton, subsequent to the 1787 Convention, sustain this construction. In a letter on the subject, Madison observed that the question concerning the calling of a convention "will not belong to the Federal Legislature. If two-thirds of the states apply for one, Congress cannot refuse to call it: if not, the other mode of amendments must be pursued." [12] Hamilton, in the Federalist No. 85, stated:

"By the fifth article of the plan the congress will be obliged, 'on the application of the legislatures of two-thirds of the states, (which at present amounts to nine) to call a convention for proposing amendments, which shall be valid to all intents and purposes, as part of the constitution, when ratified by the legislatures of three-fourths of the states, or by conventions in three-fourths thereof.' The words of this article are peremptory. The congress shall call; a convention.' Nothing in this particular is left to the discretion."

It has been argued forcefully that, notwithstanding the language of article V, the Congress need not call a convention if it does not wish to do so, and that, in any event no legislation such as this can commit a future Congress to call a convention against its judgment. This argument is based on the premise that although article V provides that Congress "shall" call a convention if enough states apply, this word may be interpreted to mean "may" for all practical purposes, since the courts are not apt to try to enforce the obligation if Congress wishes to evade it. I cannot accept such a flagrant disregard of clear language and purpose.

Although it may be true that no legislation by one Congress can bind a subsequent Congress to vote for a convention, and that the courts will not intervene, it is my strong feeling that the bill should recognize the fact that the Congress has a strict constitutional duty to call a convention if a sufficient number of proper applications are received. The bill does this by providing that it shall be the duty of both houses to agree to a concurrent resolution calling a convention whenever it shall be determined that two-thirds of the state legislatures have properly petitioned for a convention to propose an amendment or amendments on the same subject. Concededly, the Congress cannot be forced by the courts or by the provisions of this bill to vote for a particular convention. However, every member has taken an oath to support the Constitution, and I cannot believe a majority of the Congress will choose to ignore its clear obligation, I would hope, moreover, that this bill will facilitate the path to congressional action by underlining the obligation of the Congress to act.

Sufficiency of State applications

Assuming the Congress may not weigh the wisdom and necessity of state applications requesting the calling of a constitutional convention, does it have the power to judge the validity of state applications and state legislative procedures adopting such applications? Clearly the Congress has some such power. The fact alone that Congress is made the agency for convening the convention upon the receipt of the requisite number of state applications suggests that it must exercise some power to judge the validity of those applications. The impotence or withdrawal of the courts underlines the necessity for lodging some such power in the Congress. The relevant question, then, concerns the extent of that power.

It has been contended that Congress must have broad powers to judge the validity of state applications and that such power must include the authority to look beyond the content of an application, and its formal compliance with article V, to the legislative procedures followed in adopting the application. The counterargument is that to grant Congress the power to reject applications, particularly if that power is not carefully circumscribed, would be to supply it with a means of avoiding altogether the obligation to call a convention. The result would be that the Congress could arbitrarily reject all applications on subjects it did not consider appropriate for amendment, leaving us in effect with only one amendment process.

In drafting the bill I was mainly concerned with limiting the power of the Congress to frustrate the initiative of the states, particularly since the debate on the Senate floor at the time indicated that some Senators were inclined to seize on any slight irregularity in a petition as a basis for not counting it.

My bill, as introduced, therefore set forth

Footnotes at end of article.

only requirements as to the content of state applications, leaving questions of legislative procedure for determination solely by the individual states, with their decisions made binding on the Congress and the courts. However, I think the hearing amply demonstrated the danger of disabling the Congress from reviewing the procedural validity of state petitions.

In general, state legislatures ought to be masters of their own procedures. But this is a federal function that they would be performing, and the Congress should retain some power uniformly to settle the questions of irregularity that might arise. The bill has therefore been amended to remove the disability of the Congress to review legislative procedures. Under the amended bill, Congress would retain broad powers in this respect, indeterminate and unforeseeable in nature, but to be exercised, I would hope, rarely and with restraint.

It might be well to say something at this point on a question that is much debated: whether a legislature that has been held to be malapportioned, or that is under a decree requiring it to reapportion and perhaps qualifying its powers in some measure before reapportionment, can validly pass a resolution for a constitutional convention.

I should think in general that it could, unless an outstanding decree forbids it to do so, either specifically or by mention of some analogous forbidden function. To open to congressional review the question of propriety of state legislative composition would be to open a Pandora's box of constitutional doubts about the validity even of the Fourteenth Amendment.

However, the bill does not expressly answer this question. This is one of the many questions of irregularity on which the Congress will have to work its will should the question be squarely presented in the form of thirty-four state applications including some passed by malapportioned legislatures.

One further important point should be mentioned. Most of the states obviously do not now understand their role in designating subjects or problems for resolution by amendment, and many of them do not even know where to send their applications. By setting forth the formal requirements with respect to content of state applications and designating the congressional officers to whom they must be transmitted, the bill furnishes guidance to the states on these questions and promises to avert in the future some of the problems that have arisen in the current effort to convene a convention. The bill also requires that all applications received by the Congress be printed in the Congressional Record and that copies be sent to all members of Congress and to the legislature of each of the other states. In this way, the element of congressional surprise can be eliminated, and each state can be given prompt and full opportunity to join in any call for a convention in which it concurs.

The role of State Governors

The argument has been made that a state application for a constitutional convention must be approved by both the legislature and the governor of the state to be effective. This argument rests on the claim that article V intended state participation in the process to involve the whole legislative process of the state as defined in the state constitution. I do not agree with that argument. We do not have here any question about the exercise of the lawmaking process by a state legislature in combination with whatever executive participation might be called for by state law. We have rather a question of heeding the voice of the people of a state in expressing the possible need for a change in the fundamental document. It seems clear to me that the Founders properly viewed the state legislatures as the sole representative of the people on such a matter, since the executive veto, a carryover from the requirement of royal assent, was not regarded as the expression of popular opinion at the time of the 1787 Convention. And, to resort to the kind of literalism invoked by others as appropriate for construction of other provisions of article V, the language of the article definitely asserts that the appropriate applications are to come from "legislatures."

Closely analogous court decisions support this interpretation. The Supreme Court in Hawke v. Smith, No. 1 [14] interpreted the term "legislatures" in the ratification clause of article V to mean the representative lawmaking bodies of the states, since ratification of a constitutional amendment "is not an act of legislation within the proper sense of the word." [15] Certainly the term "legislature" should have the same meaning in both the application clause and the ratification clause of article V. Further support is found in the decision in Hollingsworth v. Virginia,[16] in which the Court held that a constitutional amendment approved for proposal to the states by a two-thirds vote of Congress need not be submitted to the President for his signature or veto.

The bill therefore provides specifically that a state application need not be approved by the state's governor in order to be effective.

May a State rescind its applications?

The question of whether a state should be allowed to rescind an application previously forwarded to the Congress is another of the political questions to which the courts have not supplied answers and presumably cannot. The Supreme Court has held that questions concerning the rescission of prior ratifications or rejections of amendments proposed by the Congress are determined solely by Congress.[17]

Presumably, then, the question of rescission of an application for a convention is also political and nonjustifiable. Although the Congress has previously taken the position that a state may not rescind its prior ratification of an amendment, it has taken no position concerning rescission of applications.

My strong conviction is that rescission should be permitted. Since a two-thirds consensus among the states at some point in time is necessary in order for the Congress to call a convention, the Congress should consider whether there has been a change of mind among some states that have earlier applied. Moreover, an application is not a final action, since it serves merely to initiate a convention, and does not commit even the applicant state to any substantive amendment that might eventually be proposed.

The bill therefore provides that a state may rescind at any time before its application is included among an accumulation of applications from two-thirds of the states, at which time the obligation of the Congress to call a convention becomes fixed. Incidentally, the bill also provides that a state may rescind its prior ratification of an amendment proposed by the convention up until the time there are existing valid ratifications by three-fourths of the states, and that a state may change its mind and ratify a proposed amendment that it previously has rejected.

Another much debated point concerning state applications for a constitutional convention is timing. In order to be effective to mandate the Congress to act, within how long a period must applications be received from two-thirds of the state legislatures? Article V is silent on this question, and neither the Congress nor the courts has supplied an answer.

The Congress and the courts have agreed that constitutional amendments proposed by the Congress and submitted to the states for ratification can properly remain valid for ratification for a period of seven years. It has been felt that there should be a "reasonably contemporaneous" expression by three-fourths of the states that an amendment is acceptable in order for the Congress to conclude that a consensus in favor of the amendment exists among the people, and that ratification within a seven-year period satisfies this requirement.[18]

Presumably, the same principle should govern the application stage of the constitutional amendment process. If so, the Congress would not be required, nor empowered, to call a convention unless it received "relatively contemporaneous" valid applications from the necessary number of states.

This rule seems sensible. The Constitution contemplates a concurrent desire for a convention on the part of the legislatures of a sufficient number of states, and such a concurrent desire can scarcely be said to exist, or to reflect in each state the will of the people, if too long a period of time has passed from the date of enactment of the first application to the date of enactment of the last. It is true that legislatures are free under the bill to change their minds and rescind their applications; but the passage of a repealer is a different and more difficult political act than the defeat, starting fresh, of an application calling for a constitutional convention.

The fact, therefore, that a legislature has not rescinded an application calling for a convention is an insufficient indication that the state in question, after the passage of a long period of time, still favors the calling of a convention.

What, then, is a proper period during which tendered applications are sufficiently contemporaneous to be counted together? Some Senators and scholars have suggested that two years, the lifetime of a Congress, would be a reasonable period. Others have suggested that petitions should remain valid for a generation. My feeling when I drafted the bill was that six years would be a reasonable compromise. However, the hearings revealed a general disposition among the witnesses to agree on a four-year period. Since this would be long enough to afford ample opportunity to all the state legislatures to join in the call for a convention—particularly in view of the requirement in the bill that all other states be given immediate notice of any application received by the Congress—I have concluded that a four-year period is preferable.

The bill has therefore been amended to provide that an application shall remain valid for four years after receipt by the Congress unless sooner rescinded. The bill also provides that rescission must be accomplished by means of the same legislative procedures followed in adopting the application in question, and that the Congress retains power to judge the validity of those proceedings.

Calling the convention

The bill provides that the Secretary of the Senate and the Clerk of the House of Representatives shall keep a record of the number of state applications received, according to subject matter. Whenever two-thirds of the states have submitted applications on the same subject or subjects, the presiding officer of each house shall be notified and shall announce the same on the floor.

Each house is left free to adopt its own rules for determining the validity of the applicants, presumably by reference to a committee followed by floor action.

Once a determination has been made that there are valid applications from two-thirds or more of the state legislatures on the same subject or subjects, each house must agree to a concurrent resolution providing for the convening of a constitutional convention on such subject or subjects.

Footnotes at end of article.

The concurrent resolution would designate the place and time of meeting of the convention, set forth the nature of the amendment or amendments the convention is empowered to consider and propose, and provide for such other things as the provision of funds to pay the expenses of the convention and to compensate the delegates. The convention would be required to be convened not later than one year after adoption of the resolution.

As introduced, the bill required the Congress to designate in the concurrent resolution convening a convention the manner in which any amendment proposed by the convention must be ratified by the states and the period within which they must be ratified or deemed inoperative. Testimony at the hearings suggested that these determinations might properly be influenced by the nature of the amendments proposed and that they should therefore not be required to be made at the time the convention is called. For example, certain proposed amendments might call for ratification by state conventions rather than state legislatures, and certain circumstances might indicate a shorter or longer period than usual during which ratification should take place. The Congress should be able to make those decisions after it has the convention's proposals. The bill therefore has been amended to so provide.

The bill as introduced provided that each state should have as many delegates as it is entitled to representatives in Congress, to be elected or appointed as provided by state law. However, the hearings revealed a general feeling that the national interest is too closely affected to permit each state to decide how its delegates to a national constitutional convention shall be elected, or, indeed, appointed. For this reason, the bill has been amended to require that delegates be elected—not appointed—and that they be elected by the same constituency that elects the states' representatives in Congress. Under the amended bill, each state will be entitled to as many delegates as it is entitled to Senators and Representatives in Congress. Two delegates in each state will be elected at large and one delegate will be elected from each congressional district in the manner provided by state law. Vacancies in a state's delegation will be filled by appointment of the governor.

Convention procedure and voting

The bill provides that the Vice President of the United States shall convene the constitutional convention, administer the oath of office of the delegates and preside until a presiding officer is elected. The presiding officer will then preside over the election of other officers and thereafter. Further proceedings of the convention will be in accordance with rules adopted by the convention. A daily record of all convention proceedings, including the votes of delegates, shall be kept, and shall be transmitted to the Archivist of the United States within thirty days after the convention terminates. The convention must terminate its proceedings within one year of its opening unless the period is extended by the Congress by concurrent resolution.

As introduced, the bill provided that each state should have one vote on all matters before the convention, including the proposal of amendments. This was decided upon in deference to the method followed in the 1787 Convention rather than from a conviction that this would be the necessarily proper procedure in conventions called under article V. On the basis of the testimony presented at the hearings, I have decided that unit voting would not be appropriate for such conventions. The reasons for unit voting in the 1787 Convention were peculiar to the background against which that convention worked and are not valid today. Moreover, the states, as units, will have equal say in the ratification process. It seems appropriate, therefore, to recognize the interests of majority rule in the method of proposing amendments. Hence, the bill has been amended to provide that each state delegate shall have one vote so that the voting strength of each state will be in proportion to its population.

Finally, the bill provides that amendments may be proposed by the convention by a vote of a majority of the total number of delegates to the convention. The alternative would be to impose a two-thirds voting requirement analogous to the requirement for congressional proposal of amendments. However, article V does not call for this, and I think that such a requirement would place an undue and unnecessary obstacle in the way of effective utilization of the convention amendment process.

Ratification of proposed amendments

The bill provides that any amendment proposed by the convention must be transmitted to the Congress within the thirty days after the convention terminates its proceedings. The Congress must then transmit the proposed amendment to the Administrator of General Services for submission to the states. However, the Congress may, by concurrent resolution, refuse to approve an amendment for submission to the states for ratification, on the grounds of procedural irregularities in the convention or failure of the amendment to conform to the limitations on subject matter imposed by the Congress in the concurrent resolution calling the convention. The intent is to provide a means of remedying a refusal by the convention to abide by the limitations on its authority to amend the Constitution. Of course, unlimited power in the Congress to refuse to submit proposed amendments for ratification would destroy the independence of the second alternative amending process. Therefore, the Congress is explicitly forbidden to refuse to submit a proposed amendment for ratification because of doubts about the merits of its substantive provisions. The power is reserved for use only with respect to amendments outside the scope of the convention's authority or in the case of serious procedural irregularities.

Ratification by the states must be by state legislative action or convention, as the Congress may direct, and within the time period specified by the Congress. The Congress retains the power to review the validity of ratification procedures. As noted earlier, any state may rescind its prior ratification of an amendment by the same processes by which it ratified it, except that no state may rescind after that amendment has been validly ratified by three-fourths of the states. When three-fourths of the states have ratified a proposed amendment, the Administrator of General Services shall issue a proclamation that the amendment is a part of the Constitution, effective from the date of the last necessary ratification.

IV. CONCLUSION

There is some evidence that the current effort to require the Congress to call a convention to propose a reapportionment amendment has failed and that the danger of a constitutional crisis has passed. The two additional applications needed to bring the total to thirty-four have not been received and there is a strong likelihood that some applicant states will rescind their applications. Even if this is the case, however, the need for legislation to implement article V remains. There may well be other attempts to utilize the convention amendment process and, in the absence of legislation, the same unanswered questions will return to plague us. The legislation therefore is still timely, and the Congress may now have the opportunity to deal with the sensitive constitutional issues objectively, uninfluenced by competing views on state apportionment or any other substantive issue.

Some have argued that the convention method of amendment is an anomaly in the law, out of step with modern notions of majority rule and the relationship between the states and the federal government. If so, that part of article V should be stricken from the Constitution by the appropriate amendment process. It should not, however, be undermined by erecting every possible barrier in the way of its effective use. Such a course would be a disavowal of the clear language and history of article V. The Constitution made the amendment process difficult, and properly so. It certainly was not the intention of the original Convention to make it impossible. Nor is it possible to conclude that the Founders intended that amendments originating in the states should have so much harder a time of it than those proposed by Congress. As I have pointed out, that issue was fought out in 1787 Convention and resolved in favor of two originating sources, both difficult of achievement, but neither impossible and neither more difficult than the other. My bill seeks to preserve the symmetry of article V by implementing the convention alternative so as to make it a practicable but not easy method of constitutional amendment.

FOOTNOTES

[1] The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as part of this Constitution, when ratified by the Legislatures of three fourths of the several States, or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress; Provided that no Amendment which may be made prior to the Year One thousand eight hundred and eight shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of its equal Suffrage in the Senate. *U.S. Const. Art. V.*

[Discussion of Recommendations]

AMERICAN BAR ASSOCIATION SPECIAL CONSTITUTIONAL CONVENTION STUDY COMMITTEE

Central to any discussion of the convention method of initiating amendments is whether a convention convened under Article V can be limited in its authority. There is the view, with which we disagree, that an Article V convention would be a sovereign assemblage and could not be restricted by either the state legislatures or the Congress in its authority or proposals. And there is the view, with which we agree, that Congress has the power to establish procedures which would limit a convention's authority to a specific subject matter where the legislatures of two-thirds of the states seek a convention limited to that subject.

The text of Article V demonstrates that a substantial national consensus must be present in order to adopt a constitutional amendment. The necessity for a consensus is underscored by the requirement of a two-thirds vote in each House of Congress or applications for a convention from two-thirds of the state legislatures to initiate an amendment, and by the requirement of ratification by three-fourths of the states. From the language of Article V we are led to the conclusion that there must be a consensus among the state legislatures as to the subject matter of a convention before Congress is required to call one. To read Article V as requiring such agreement helps assure "that an alteration of the Constitution proposed today has relation to the sentiment and felt needs of today . . ." [17]

The origins and history of Article V indicate that both general and limited conventions were within the contemplation of the Framers. The debates at the Constitutional Convention of 1787 make clear that the convention method of proposing amendments was intended to stand on an equal footing with the congressional method. As Madison observed: Article V "equally enables the general and the state governments to originate the amendment of errors as they may be pointed out by the experience on one side or on the other." [18] The "state" method, as it was labeled, was prompted largely by the belief that the national government might abuse its powers. It was felt that such abuses might go unremedied unless there was a vehicle of initiating amendments other than Congress.

The earliest proposal on amendments was contained in the Virginia Plan of government introduced in the Convention on May 29, 1787 by Edmund Randolph. It provided in resolution 13 "that provision ought to be made for the amendment of the Articles of Union whensoever it shall seem necessary, and that the assent of the National Legislature ought not to be required thereto." [19] A number of suggestions were advanced as to a specific article which eventuated in the following clause in the Convention's Committee of Detail report of August 6, 1787:

"On the application of the Legislatures of two thirds of the States in the Union, for an amendment of this Constitution, the Legislature of the United States shall call a Convention for that purpose." [20]

This proposal was adopted by the Convention on August 30. Gouverneur Morris's suggestion on that day that Congress be left at liberty to call a convention "whenever it pleased" was not accepted. There is reason to believe that the convention contemplated under this proposal "was the last step in the amending process, and its decisions did not require any ratification by anybody." [21]

On September 10, 1787 Elbridge Gerry of Massachusetts moved to reconsider the amending provision, stating that under it "two thirds of the States may obtain a Convention, a majority of which can bind the Union to innovations that may subvert the State Constitutions altogether." His motion was supported by Alexander Hamilton and other delegates. Hamilton pointed to the difficulty of introducing amendments under the Articles of Confederation and stated that "an easy mode should be established for supplying defects which will probably appear in the new System." [22] He felt that Congress would be "the first to perceive" and be "most sensible to the necessity of Amendments," and ought also to be authorized to call a convention whenever two-thirds of each branch concurred on the need for a convention. Madison also criticized the August 30 proposal, stating that the vagueness of the expression "call a convention for the purpose" was sufficient reason for reconsideration. He then asked: "How was a Convention to be formed? by what rule decide? what the force of its acts?" As a result of the debate, the clause adopted on August 30 was dropped in favor of the following provision proposed by Madison:

"The Legislature of the U.S. whenever two thirds of both Houses shall deem necessary, or on the application of two thirds of the Legislatures of the several States, shall propose amendments to this Constitution, which shall be valid to all intents and purposes as part thereof, when the same shall have been ratified by three fourths at least of the Legislatures of the several States, or by Conventions in three fourths thereof, as one or the other mode of ratification may be proposed by the Legislature of the U.S." [23]

On September 15, after the Committee of Style had returned its report, George Mason strongly objected to the amending article on the ground that both modes of initiating amendments depended on Congress so that "no amendments of the proper kind would ever be obtained by the people, the Government should become oppressive. . . ." *

Gerry and Gouverneur Morris then moved to amend the article "so as to require a convention on application of" two-thirds of the states.[24] In response Madison said that he "did not see why Congress would not be as much bound to propose amendments applied for by two thirds of the States as to call a Convention on the like application." He added that he had no objection against providing for a convention for the purpose of amendments "except only that difficulties might arise as to the form, the quorum &c. which in Constitutional regulations ought to be as much as possible avoided." [25]

Thereupon, the motion by Morris and Gerry was agreed to and the amending article was thereby modified so as to include the convention method as it now reads. Morris then successfully moved to include in Article V the proviso that "no state, without its consent shall be deprived of its equal suffrage in the Senate."

There was little discussion of Article V in the state ratifying conventions. In The Federalist Alexander Hamilton spoke of Article V as contemplating "a single proposition." Whenever two-thirds of the states concur, he declared, Congress would be obliged to call a convention. "The words of this article are peremptory. The Congress 'shall call a convention'. Nothing in this particular is left to the discretion of that body." [26] Madison, as noted earlier, stated in The Federalist that both the general and state governments are equally enabled to "originate the amendment of errors."

While the Constitutional Convention of 1787 may have exceeded the purpose of its call in framing the Constitution, * * * it does not follow that a convention convened under Article V and subject to the Constitution can lawfully assume such authority. In the first place, the Convention of 1787 took place during an extraordinary period and at a time when the states were independent and there was no effective national government. Thomas Cooley described it as "a revolutionary proceeding, and could be justified only by the circumstances which had brought the Union to the brink of dissolution." [27] Moreover, the Convention of 1787 did not ignore Congress. The draft Constitution was submitted to Congress, consented to by Congress, and transmitted by Congress to the states for ratification by popularly-elected conventions.

Both pre-1787 convention practices and the general tenor of the amending provisions of the first state constitutions lend support to the conclusions that a convention could be convened for a specific purpose and that, once convened, it would have no authority to exceed that purpose.

Of the first state constitutions, four provided for amendment by conventions and three by other methods.[28] Georgia's Constitution provided that

"no alteration shall be made in this constitution without petitions from a majority of the counties, . . . at which time the assembly shall order a convention to be called for that purpose,*** specifying the alterations to be made, according to the petitions referred to the assembly by a majority of the counties as aforesaid." [29]

Pennsylvania's Constitution of 1776 provided for the election of a Council of Censors with power to call a convention

"if there appear to them an absolute necessity of amending any article of the constitution which may be defective . . . . But the articles to be amended, and the amendment proposed, and such articles as are proposed to be added or abolished, shall be promulgated at least six months before the day appointed for the election of such convention, for the previous consideration of the people, that they may have an opportunity of instructing their delegates on the subject." [30]

The Massachusetts Constitution of 1780 directed the General Court to have the qualified voters of the respective towns and plantations convened in 1795 to collect their sentiments on the necessity or expediency of amendments. If two-thirds of the qualified voters throughout the state favored "revision or amendment," it was provided that a convention of delegates would meet "for the purpose aforesaid."

The report of the Annapolis Convention of 1786 also reflected an awareness of the binding effect of limitations on a convention. That Convention assembled to consider general trade matters and, because of the limited number of state representatives present, decided not to proceed, stating:

"That the express terms of the powers to your Commissioners supposing a deputation from all the States, and having for object the Trade and Commerce of the United States, Your Commissioners did not conceive it advisable to proceed on the business of their mission, under the Circumstances of so partial and defective a representation." [31]

In their report, the Commissioners expressed the opinion that there should be another convention, to consider not only trade matters but the amendment of the Articles of Confederation. The limited authority of the Annapolis Commissioners, however, was made clear:

"f in expressing this wish, or in intimating any other sentiment, your Commissioners should seem to exceed the strict bounds of their appointment, they entertain a full con-

---

Footnotes at end of article.

fidence, that a conduct, dictated by an anxiety for the welfare, of the United States, will not fail to receive an indulgent construction.

"Though your Commissioners could not with propriety address these observations and sentiments to any but the States they have the honor to Represent, they have nevertheless concluded from motives of respect, to transmit Copies of this Report to the United States in Congress assembled, and to the executives of the other States."

From this history of the origins of the amending provision, we are led to conclude that there is no justification for the view that Article V sanctions only general conventions. Such an interpretation would relegate the alternative method to an "unequal" method of initiating amendments. Even if the state legislatures overwhelmingly felt that there was a necessity for limited change in the Constitution, they would be discouraged from calling for a convention if that convention would automatically have the power to propose a complete revision of the Constitution.

Since Article V specifically and exclusively vests the state legislatures with the authority to apply for a convention, we can perceive no sound reason as to why they cannot invoke limitations in exercising that authority. At the state level, for example, it seems settled that the electorate may choose to delegate only a portion of its authority to a state constitutional convention and so limit it substantively.[32] The rationale is that the state convention derives its authority from the people when they so vote they adopt the people when they vote to hold a convention and that when they so vote they adopt the limitations on the convention contained in the enabling legislation drafted by the legislature and presented on a "take it or leave it" basis.[33] As one state court decision stated:

"When the people, acting under a proper resolution of the legislature, vote in favor of calling a constitutional convention, they are presumed to ratify the terms of the legislative call, which thereby becomes the basis of the authority delegated to the convention." [34]

And another:

"Certainly, the people, may, if they will, elect delegates for a particular purpose without conferring on them all their authority . . ." [35]

In summary, we believe that a substantively-limited Article V convention is consistent with the purpose of the alternative method since the states and people would have a complete vehicle other than the Congress for remedying specific abuses of power by the national government: consistent with the actual history of the amending article throughout which only amendments on single subjects have been proposed by Congress; consistent with state practice under which limited conventions have been held under constitutional provisions not expressly sanctioning a substantively-limited convention; [36] and consistent with democratic principles because convention delegates would be chosen by the people in an election in which the subject matter to be dealt with would be known and the issues identified, thereby enabling the electorate to exercise an informed judgment in the choice of delegates.

Article V explicitly gives Congress the power to call a convention upon receipt of applications from two-thirds of the state legislatures and to choose the mode of ratification of a proposed amendment. We believe that, as a necessary incident of the power to call, Congress has the power initially to determine whether the conditions which give rise to its duty have been satisfied. Once a determination is made that the conditions are present, Congress' duty is clear—it "shall" call a convention. The language of Article V, the debates at the Constitutional Convention of 1787, and statements made in The Federalist, in the debates in the state ratifying conventions, and in congressional debates during the early Congresses make clear the mandatory nature of this duty. * * *

While we believe that Congress has the power to establish standards for making available to the states a limited convention when they petition for that type of convention, we consider it essential that implementing legislation not preclude the states from applying for a general convention. Legislation which did so would be of questionable validity since neither the language nor history of Article V reveals an intention to prohibit another general convention.

In formulating standards for determining whether a convention call should issue, there is a need for great delicacy. The standards not only will determine the call but they also will have the effect of defining the convention's authority and determining whether Congress must submit a proposed amendment to the states for ratification. The standards chosen should be precise enough to permit a judgment that two-thirds of the state legislatures seek a convention on an agreed-upon matter. Our research of possible standards has not produced any alternatives which we feel are preferable to the "same subject" test embodied in S 1272. We do feel, however, that the language of Sections 4, 5, 6, 10 and 11 of S. 1272 is in need of improvement and harmonization so as to avoid the use of different expressions and concepts.

We believe that standards which in effect required applications to be identical in wording would be improper since they would tend to make resort to the convention process exceedingly difficult in view of the problems that would be encountered in obtaining identically worded applications from thirty-four states. Equally improper, we believe, would be standards which permitted Congress to exercise a policy-making role in determining whether or not to call a convention.* * *

In addition to the power to adopt standards for determining when a convention call should issue, we also believe it a fair inference from the text of Article V that Congress has the power to provide for such matters as the time and place of the convention, the composition and financing of the convention, and the manner of selecting delegates. Some of these items can only be fixed by Congress. Uniform federal legislation covering all is desirable in order to produce an effective convention.

Less clear is Congress' power over the internal rules and procedures of a convention.† The Supreme Court's decisions in Dillon v. Gloss [37] and Leser v. Garnett [38] can be viewed as supporting a broad view of Congress' power in the amending process. As the Court stated in Dillon v. Gloss: "As a rule the Constitution speaks in general terms, leaving Congress to deal with subsidiary matters of detail as the public interests and changing conditions may require; and Article V is no exception to the rule."

On the other hand, the legislative history of Article V reflects a purpose that the convention method be as free as possible from congressional domination, and the text of Article V grants Congress only two express powers pertaining to a convention, that is, the power (or duty) to call a convention and the power to choose the mode of ratification of any proposed amendment. In the absence of direct precedents, it perhaps can be said fairly that Congress may not by legislation interfere with matters of procedure because they are an intrinsic part of the deliberative characteristic of a convention.[39]

We view as unwise and of questionable validity any attempt by Congress to regulate the internal proceedings of a convention. In particular, we believe that Congress should not impose a vote requirement on an Article V convention. We are influenced in this regard by these factors:

First, it appears from our research that throughout our history conventions generally have decided for themselves the vote that should govern their proceedings. This includes the Constitutional Convention of 1787, the constitutional conventions that took place between 1776 and 1787, many of the approximately two hundred state constitutional conventions that have been held since 1789, and the various territorial conventions that have taken place under acts passed by Congress. [40] Second, the specific intent of the Framers with regard to the convention method of initiating amendments was to make available an alternative method of amending the Constitution—one that would be free from congressional domination.

Third, a reading of the 1787 debates suggests that the Framers contemplated that an Article V convention would have the power to determine its own voting and other internal procedures and that the requirement of ratification by three-fourths of the states was intended to protect minority interests.[41]

We have considered the suggestion that Congress should be able to require a two-thirds vote in order to maintain the symmetry between the convention and congressional methods of initiating amendments. We recognize that the convention can be viewed as paralleling Congress as the proposing body. Yet we think it is significant that the Constitution, while it specifies a two-thirds vote by Congress to propose an amendment, is completely silent as to the convention vote.

The Committee believes that judicial review of decisions made under Article V is desirable and feasible. We believe Congress should declare itself in favor of such review in any legislation implementing the convention process. We regard as very unwise the approach of S. 1272 which attempts to exclude the courts from any role. While the Supreme Court's decision in *Ex parte McCardle* [42] indicated that Congress has power under Article III to withdraw matters from the jurisdiction of the federal courts, this power is not unlimited. It is questionable whether the power reaches so far as to permit Congress to change results required by other provisions of the Constitution or to deny a remedy to enforce constitutional rights. Moreover, we are unaware of any authority upholding this power in cases of original jurisdiction.[43]

To be sure, Congress has discretion in interpreting Article V and in adopting implementing legislation. It cannot be gainsaid that Congress has the primary power of administering Article V. We do not believe, however, that Congress is, or ought to be, the final dispositive power in every situation. In this regard, it is to be noted that the courts have adjudicated on the merits a variety of questions arising under the amending article. These have included such questions as: whether Congress may choose the state legislative method of ratification for proposed amendments which expand federal power; whether a proposed amendment requires the approval of the President; whether Congress may fix a reasonable time for ratification of a proposed amendment by state legislatures; whether the states may restrict the power of the legislatures to ratify amendments or submit the decision to a popular referendum; and the meaning of the requirement of a two-thirds vote of both Houses.[44]

Baker v. *Carr* and *Powell* v. *McCormack* suggest considerable change in the Supreme

Footnotes at end of article.

Court's view since *Coleman* v. *Miller*[45] on questions involving the political process.

In Coleman, the Court held that a group of state legislators who had voted not to ratify the child labor amendment had standing to question the validity of their state's ratification. Four Justices dissented on this point. The Court held two questions nonjusticiable: the issue of undue time lapse for ratification and the power of a state legislature to ratify after having first rejected ratification. In reaching these conclusions, the Court pointed to the absence of criteria either in the Constitution or a statute relating to the ratification process. The four Justices who dissented on standing concurred on non-justiciability.

They felt, however, that the Court should have disapproved *Dillon* v. *Gloss* insofar as it decided judicially that seven years is a reasonable period of time for ratification, stating that Article V gave control of the amending process to Congress and that the process was "political in its entirety, from submission until an amendment becomes part of the Constitution, and is not subject to judicial guidance, control or interference at any point." Even though the calling of a convention is not precisely within these time limits and the holding in Coleman is not broad, it is not at all surprising that commentators read that case as bringing Article V issues generally within the rubric of "political questions."

In *Baker* v. *Carr*,[46] the Court held that a claim of legislative malapportionment raised a justiciable question. More generally, the Court laid down a number of criteria, at least one of which was likely to be involved in a true "political question," as follows:

"a textually demonstrable constitutional commitment of the issue to a coordinate political department; or a lack of judicially discoverable and mangeable standards for resolving it; or the impossibility of deciding without an initial policy determination of a kind clearly for non-judicial discretion; or the impossibility of a court's undertaking independent resolution without expressing lack of respect due coordinate branches of government; or an unusual need for unquestioning adherence to a political decision already made; or the potentiality of embarassment for multifarious pronouncements by various departments on one question."[47]

Along with these formulas, there was additional stress in *Baker* v. *Carr* on the fact that the Court there was not dealing with Congress, a coordinate branch, but with the states. In reviewing the precedents, the Court noted that it had held issues to be nonjusticiable when the matter demanded a single-voiced statement, or required prompt, unquestioning obedience, as in a national emergency, or contained the potential embarassment of sitting in judgment on the internal operations of a coordinate branch.

Perhaps the most striking feature of Baker and its progeny has been the Court's willingness to project itself into redistricting and reapportionment in giving relief. In addition, some of the criteria stressed by the Court as determinative of "political question" issues were as applicable to Congress as to the states.

In Powell,[48] the Court clearly marked out new ground. The question presented was the constitutionality of the House of Representatives' decision to deny a seat to Congressman-elect Powell, despite his having fulfilled the prerequisites specified in Article 1, Section 2 of the Constitution. Even though it was dealing with Congress, and indeed with a matter of internal legislative operation, still it held that the question was a justiciable one, involving as it did the traditional judicial function of interpreting the Constitution, and that a newly elected Representative could be judged as to qualifications only as to age, citizenship, and residence.

The Court limited itself to declaratory relief, saying that the question of whether coercive relief was available against employees of Congress was not being decided. But the more important aspect of the decision is the Court's willingness to decide. It stressed the interest of voters in having the person they elect take a seat in Congress. Thus, it looked into the clause on qualifications and found in the text and history that Congress was the judge of qualifications, but only of the three specified.

It is not easy to say just how these precedents apply to judicial review of questions involving a constitutional convention under Article V. It can be argued that they give three different doctrinal models, each leading to a different set of conclusions. We are inclined to a view which seeks to reconcile the three cases. Powell may be explained on the theory that specially protected constitutional interests are at stake, that the criteria for decisions were rather simple, and that an appropriate basis for relief could be found. Baker is more complex, but it did not involve Congress directly.

The state legislatures had forfeited a right to finality by persistent and flagrant malapportionments, and one person, one vote supplied a judicially workable standard (though the latter point emerged after Baker). Thus, Coleman may be understood as good law so far as it goes, on the theory that Congress is directly involved, that no specially protected interests are threatened, and that the issues are not easily dealt with by the Court.

Following this approach to the three cases, some tentative conclusions can be drawn for Article V and constitutional conventions. If two-thirds of the state legislatures apply, for example, for a convention to consider the apportionment of state legislatures, and Congress refuses to call the convention, it is arguable that a Powell situation exists, since the purpose of the convention method was to enable the states to bring about a change in the Constitution even against congressional opposition.

The question whether Congress is required to act, rather than having discretion to decide, is one very similar in quality to the question in Powell. The difficulty not confronted in Powell is that the relief given must probably be far-reaching, possibly involving the Court in approving a plan for a convention.

There are at least two answers. The Court might find a way to limit itself to a declaratory judgment, as it did in Powell, but if it must face far-reaching relief, the reapportionment cases afford a precedent. In some ways, a plan for a convention would present great difficulties for a court, but it could make clear that Congress could change its plan, simply by acting.[49]

If one concludes that the courts can require Congress to act, one is likely to see the courts as able to answer certain ancillary questions of "law," such as whether the state legislatures can bind a convention by the limitations in their applications, and whether the state legislatures can force the call of an unlimited convention. Here we believe Congress has a legislative power, within limits, to declare the effects of the states' applications on the scope of the convention. Courts should recognize that power and vary their review according to whether Congress has acted.

Consequently, this Committee strongly favors the introduction in any implementing legislation of a limited judicial review.‡ It would not only add substantial legitimacy to any use of the convention process but it would ease the question of justiciability. Moreover, since the process likely would be resorted to in order to effect a change opposed by vested interests, it seems highly appropriate that our independent judiciary be involved so that it can act, if necessary, as the arbiter.

In view of the nature of the controversies that might arise under Article V, the Committee believes that there should be several limits on judicial consideration. First, a Congressional determination should be overturned only if "clearly erroneous." This standard recognizes Congress' political role and at the same time insures that Congress cannot arbitrarily void the convention process.

Second, by limiting judicial remedies to declaratory relief, the possibility of actual conflict between the branches of government would be diminished. As Powell illustrated, courts are more willing to adjudicate questions with "political" overtones when not faced with the institutionally destructive need to enforce the result.

Third, the introduction of judicial review should not be allowed to delay the amending process unduly. Accordingly, any claim should be raised promptly so as to result in an early presentation and resolution of any dispute. We favor a short limitation period combined with expedited judicial procedures such as the selection of a three-judge district court. The possibility of providing original jurisdiction in the Supreme Court was rejected for several reasons. Initiation of suit in the Supreme Court necessarily escalates the level of the controversy without regard to the significance of the basic dispute. In addition, three-judge district court procedures are better suited to an expedited handling of factual issues.

We do not believe that our recommendation of a three-judge court is inconsistent with the American Bar Association's position that the jurisdiction of such courts should be sharply curtailed. It seems likely that the judicial review provided for will occur relatively rarely. In those instances when it does, the advantages of three-judge court jurisdiction outweigh the disadvantages which the Association has perceived in the existing three-judge court jurisdiction. In cases involving national constitutional convention issues, the presence of three judges (including a circuit judge) and the direct appeal to the Supreme Court are significant advantages over conventional district court procedure.

There is no indication from the text of Article V that the President is assigned a role in the amending process. Article V provides that "Congress" shall propose amendments, call a convention for proposing amendments and, in either case, choose the mode for ratification of amendments.

Article II, Section 7 of the Constitution, however, provides that "every Order, Resolution, or Vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of Adjournment) shall be presented to the President" for his approval and, if disapproved, may be repassed by a two-thirds vote of both Houses.

It has, we believe, been regarded as settled that amendments proposed by Congress need not be presented to the President for his approval. The practice originated with the first ten amendments, which were not submitted to President Washington for his approval, and has continued through the recently proposed amendment on equality of rights. The question of whether the President's approval is required was passed on by the Supreme Court in Hollingsworth v. Virginia.[50] There, the validity of the Eleventh Amendment was attacked on the ground that it had "not been proposed in the form prescribed by the Constitution" in that it had never been presented to the President.

Article I, Section 7 was relied upon in support of that position. The Attorney General argued that the proposing of amendments was "a substantive act, unconnected with the ordinary business of legislation, and

Footnotes at end of article.

not within the policy of terms of investing the President with a qualified negative on the Acts and Resolutions of Congress."

It was also urged that since a two-thirds vote was necessary for both proposing an amendment and overriding a presidential veto, no useful purpose would be served by a submission to the President in such case. It was argued in reply that this was no answer, since the reasons assigned by the President for his disapproval "might be so satisfactory as to reduce the majority below the constitutional proportion."

The Court held that the amendment had been properly adopted, Justice Chase stating that "the negative of the President applies only to the ordinary cases of legislation: he has nothing to do with the proposition or adoption of amendments to the Constitution." [51] What was not pointed out, but could have been, is that had the President's approval been found necessary, it would have created the anomaly that only amendments proposed by Congress would be subject to the requirements inasmuch as Article I, Section 7 by its terms could not apply to action taken by a national constitutional convention.

Subsequent to Hollingsworth, the question of the President's role in the amending process has been the subject of discussion in Congress. In 1803 a motion in the Senate to submit the Twelfth Amendment to the President was defeated.[52] In 1865 the proposed Thirteenth Amendment was submitted to President Lincoln and, apparently through an inadvertence, was signed by him.

An extensive discussion of his action took place in the Senate and a resolution was passed declaring that the President's signature was unnecessary, inconsistent with former practice, and should not constitute a precedent for the future.[53] The following year President Andrew Johnson, in a report to the Congress with respect to the Fourteenth Amendment, made clear that the steps taken by the Executive Branch in submitting the amendment to the state legislatures was "purely ministerial" and did not commit the Executive to "an approval or a recommendation of the amendment." [54]

Since that time, no proposed amendment has been submitted to the President for his approval and no serious question has arisen over the validity of amendments for that reason. Thus, the Supreme Court could state in 1920 in *Hawke* v. *Smith* that it was settled "that the submission of a constitutional amendment did not require the action of the President."

While the "call" of a convention is obviously a different step from that of proposing an amendment, we do not believe that the President's approval is required. Under Article V applications from two-thirds of the state legislatures must precede a call and, as previously noted, Congress' duty to issue a call once the conditions have been met clearly seems to be a mandatory one.

To require the President's approval of a convention call, therefore, would add a requirement not intended.

Not only would it be inconsistent with the mandatory nature of Congress' duty and the practice of non-presidential involvement in the congressional process of initiating amendments but it would make more difficult any resort to the convention method.

The approval of another branch of government would be necessary and, if not obtained, a two-thirds vote of each House would be required before a call could issue. Certainly, the parallelism between the two initiating methods would be altered, in a manner that could only thwart the intended purpose of the convention process as an "equal" method of initiating amendments.

Footnotes at end of article.

While the language of Article I, Section 7 expressly provides for only one exception (i.e., an adjournment vote), it has been interpreted as not requiring presidential approval of preliminary votes in Congress, or, as noted, the proposal of constitutional amendments by Congress, or concurrent resolutions passed by the Senate and the House of Representatives for a variety of purposes.†† As the Supreme Court held in *Hollingsworth*, Section 7 applies to "ordinary cases of legislation" and "has nothing to do with the proposition or adoption of amendments to the Constitution." Thus, the use of a concurrent resolution by Congress for the issuance of a convention call is in our opinion in harmony with the generally recognized exceptions to Article I, Section 7.

We believe that a state governor should have no part in the process by which a state legislature applies for a convention or ratifies a proposed amendment. In reaching this conclusion, we are influenced by the fact that Article V speaks of "state legislatures" applying for a convention and ratifying an amendment proposed by either Congress or a national convention. The Supreme Court had occasion to focus on this expression in *Hawke* v. *Smith* [55] (No. 1) in the context of a provision in the Ohio Constitution subjecting to a popular referendum any ratification of a federal amendment by its legislature.

The Court held that this requirement was invalid, reasoning that the term "legislatures" had a certain meaning. Said the Court: "What it meant when adopted it still means for the purpose of interpretation. A Legislature was then the representative body which made the laws of the people." [56]

The ratification of a proposed amendment, held the Court, was not "an act of legislation within the proper sense of the word" but simply an expression of assent in which "no legislative action is authorized or required."

The Court also noted that the power to ratify proposed amendments has its source in the Constitution and, as such, the state law-making procedures are inapplicable.

That the term "Legislature" does not always mean the representative body itself was made clear by *Smiley* v. *Holm*.[57] That case involved a bill passed by the Minnesota legislature dividing the state into congressional districts under Article I, Section 4. The bill was vetoed by the governor and not repassed over his veto. As for the argument that the bill was valid because Article I, Section 4 refers to the state "Legislatures," the Court stated:

"The use in the Federal Constitution of the same term in different relations does not always imply the same function. . . . Wherever the term 'legislator' is used in the Constitution it is necessary to consider the nature of the particular action in view. . . ." [58]

The Court found that the governor's participation was required because the function in question involved the making of state laws and the veto of the governor was an integral part of the state's legislative process. In finding that Article I, Section 4 contemplated the making of laws, the Court stated that it provided for "a complete code for congressional elections" whose requirements "would be nugatory if they did not have appropriate sanctions."

The Court contrasted this function with the "Legislature's" role as an electoral body, as when it chose Senators, and a ratifying body, as in the case of federal amendments.

It is hard to see how the act of applying for a convention invokes the law-making processes of the state any more than its act of ratifying a proposed amendment. If anything, the act of ratification is closer to legislation since it is the last step before an amendment becomes a fundamental part of our law.

A convention application, on the other hand, is several steps removed. Other states must concur, a convention then must be called by Congress, and an amendment must be proposed by that convention.

Moreover, a convention application, unlike legislation dividing congressional districts, does not have the force of law or operate directly and immediately upon the people of the state. From a legal point of view, it would seem to be contrary to *Hawke* v *Smith* and *Leser* v. *Garnett* to require the governor's participation in the application and ratification processes.[59]

The exclusion of the governor from the application and ratification processes also finds support in the overwhelming practice of the states,[60] in the views of text-writers,[61] and in the Supreme Court's decision in *Hollingsworth* v. *Virginia* holding that the President was excluded from any role in the process by which amendments are proposed by Congress.[62]

A reading of Article V makes that an application should contain a request to Congress to call a national convention that would have the authority to propose an amendment to the Constitution.

An application which simply expressed a state's opinion on a given problem or requested Congress itself to propose an amendment would not be sufficient for purposes of Article V. Nor would an application seem proper if it called for a convention with no more authority than to vote a specific amendment set forth therein up or down, since the convention would be effectively stripped of its deliberative function. †††* A convention should have latitude to amend, as Congress does, by evaluating and dealing with a problem.

On the other hand, an application which expressed the result sought by an amendment, such as providing for the direct election of the President, should be proper since the convention itself would be left free to decide on the terms of the specific amendment necessary to accomplish that objective. We agree with the suggestion that it should not be necessary that each application be identical or propose similar changes in the same subject matter.[63]

In order to determine whether the requisite agreement among the states is present, it would seem useful for congressional legislation to require a state legislature to list in its application all state applications in effect on the date of its adoption whose subject or subjects it considers to be substantially the same. By requiring a state legislature to express the purpose of its application in relation to those already received, Congress would have additional guidance in rendering its determination.

Any such requirement, we believe, should be written in a way that would permit an application to be counted even though the state involved might have inadvertently but in good faith failed to identify similar applications in effect.

In Dillon v. Gloss, the Court upheld the fixing by Congress of a period during which ratification of a proposed amendment must be accomplished. In reaching that conclusion the Court stated that "the fair inference or implication from Article V is that the ratification must be within some reasonable time after proposal, which Congress is free to fix." The Court observed that

"as ratification is but the expression of the approbation of the people and is to be effective when had in three-fourths of the States, there is a fair implication that it must be sufficiently contemporaneous in that number of States to reflect the will of the people in all sections at relatively the same period, which of course ratification scattered through a long series of years would not do." [64]

We believe the reasoning of Dillon v. Gloss to be equally applicable to state applications for a national constitutional convention.

The convening of a convention to deal with a certain matter certainly should reflect the "will of the people in all sections at relatively the same period. . . ." In the absence of a uniform rule, the timeliness or untimeliness of state applications would vary, it seems, from case to case. It would involve, as the Supreme Court suggested with respect to the ratification area in Coleman v. Miller, a consideration of "political, social and economic conditions which have prevailed during the period since the submission of the [applications]. . . ." [65]

A uniform rule, as in the case of ratification of proposed amendments since 1918 [66] would add certainty and avoid the type of confusion which surrounded the apportionment applications. Any rule adopted, however, must take into account the fact that some state legislatures do not meet every year and that in many states the legislative sessions end early in the year.

Although the suggestion of a seven year period is consistent with that prescribed for the ratification of recent proposed constitutional amendments, it can be argued that such a period is too long for the calling of a constitutional convention, since a long series of years would likely be involved before an amendment could be adopted. A shorter period of time might more accurately reflect the will of the people at a given point in time.

Moreover, at this time in our history when social, economic and political changes frequently occur, a long period of time might be undesirable. On the other hand, a period such as four years would give states which adopted an application in the third and fourth year little opportunity to withdraw it on the basis of further reflection.

This is emphasized when consideration is given to the fact that a number of state legislatures do not meet every year. Hence, a longer period does afford more opportunity for reflection on both the submission and withdrawal of an application. It also enables the people at the time of state legislative elections to express their views. Of course, whatever the period it may be extended by the filing of a new proposal.

The Committee feels that some limitation is necessary and desirable but takes no position on the exact time except it believes that either four or seven years would be reasonable and that a congressional determination as to either period should be accepted.

There is no law dealing squarely with the question of whether a state may withdraw an application seeking a constitutional convention, although some commentators have suggested that a withdrawal is of no effect.[67] The desirability of having a rule on the subject is underscored by the fact that state legislatures have attempted to withdraw applications, particularly during the two most recent cases where a large number of state legislatures sought a convention on a specific issue.[b] As a result, uncertainty and confusion have arisen as to the proper treatment of such applications.

During the Senate debates of October 1971 on S. 215, no one suggested any limitation on the power to withdraw up to the time that the legislatures of two-thirds of the states had submitted proposals. Since a convention should reflect a "contemporaneously-felt need" that it take place, we think there should be no such limitation. In view of the importance and comparatively permanent nature of an amendment, it seems desirable that state legislatures be able to set aside applications that may have been hastily submitted or that no longer reflect the social, economic and political factors in effect when the applications were originally adopted. We believe Congress has the power to so provide.

From a slightly different point of view, the power to withdraw implies the power to change and this relates directly to the question of determining whether two-thirds of the state legislature have applied for a convention to consider the same subject. A state may wish to say specifically through its legislature that it does or does not agree that its proposal covers the same subject as that of other state proposals. The Committee feels that this power is desirable.

Finally, we can see no problems with respect to a state changing a refusal to request a convention to a proposal for such a convention. All states, of course, have rules of one sort or another which restrict the time at which a once-defeated proposition can be again presented. If these rules were to apply to the call of a federal convention and operate in a burdensome manner, their validity would be questionable under Hawke v. Smith.

We believe it of fundamental importance that a constitutional convention be representative of the people of the country. This is especially so when it is borne in mind that the method was intended to make available to the "people" a means of remedying abuses by the national government. If the convention is to be "responsive" to the people, then the structure most appropriate to the convention is one representative of the people. This, we believe, can only mean an election of convention delegates by the people. An election would help assure public confidence in the convention process by generating a discussion of the constitutional change sought and affording the people the opportunity to express themselves to the future delegates.

Although there are no direct precedents in point, there is authority and substantial reason for concluding, as we do, that the one-person, one-vote rule is applicable to a national constitutional convention. In *Hadley* v. *Junior College District*, the Supreme Court held that the rule applied in the selection of people who carry on governmental functions.[68]

While a recent decision, affirmed without opinion by the Supreme Court, held that elections for the judiciary are exempt from the rule, the lower court stated that "judges do not represent people." [69] Convention delegates, however, would represent people as well as perform a fundamental governmental function.

As a West Virginia Supreme Court observed with respect to a state constitutional convention: "[E]ven though a constitutional convention may not precisely fit into one of the three branches of government, it is such an essential incident of government that every citizen should be entitled to equal representation therein." [70]

Other decisions involving conventions differ as to whether the apportionment of a state constitutional convention must meet constitutional standards.[71]

Of course, the state reapportionment decisions are grounded in the equal protection clause of the Fourteenth Amendment and the congressional decision in *Wesberry* v. *Sanders* [72] was founded on Article 1, Section 2. Federal legislation providing for a national constitutional convention would be subject to neither of these clauses but rather to the Fifth Amendment. Yet the concept of equal protection is obviously related to due process and has been so reflected in decisions under the Fifth Amendment.[73]

Assuming compliance with the one-person, one-vote rule is necessary, as we believe it is, what standards would apply? While the early cases spoke in terms of strict population equality, recent cases have accepted deviations from this standard. In *Mahan* v. *Howell*, the Supreme Court accepted deviations of up to 16.4% because the state apportionment plan was deliberately drawn to conform to existing political subdivisons which, the Court felt, formed a more natural basis for districting so as to represent the interests of the people involved.[74]

In *Abate* v. *Mundt*, the Court upheld a plan for a county board of supervisors which produced a total deviation of 11.9%.[75] It did so on the basis of the long history of dual personnel in county and town government and the lack of built-in bias tending to favor a particular political interest or geographic area.

Elaborating its views on one person, one vote, the Committee believes that a system of voting by states at a convention, while patterned after the original Constitutional Convention, would be unconstitutional as well as undemocratic and archaic.

While it was appropriate before the adoption of the Constitution, at a time when the states were essentially independent, there can be no justification for such a system today. Aside from the contingent election feature of our electoral college system, which has received nearly universal condemnation as being anachronistic, we are not aware of any precedent which would support such a system today.

A system of voting by states would make it possible for states representing one-sixth of the population to propose a constitutional amendment. Plainly, there should be a broad representation and popular participation at any convention.

While the representation provisions of S. 1272 allowing each state as many delegates as it has Senators and Representatives in Congress are preferable to a system of voting by states, it is seriously questionable whether that structure would be found constitutional because of the great voting weight it would give to people of one state over the people of another.‡[c] It can be argued that a representation system in a convention which parallels the structure in Congress does not violate due process, since Congress is the only other body authorized by the Constitution to propose constitutional amendments. On the other hand, representation in the Congress and the electoral college are explicit parts of the Constitution, arrived at as a result of compromises at the Constitutional Convention of 1787.

It does not necessarily follow that apportionment plans based on such models are therefore constitutional. On the contrary, the reapportionment decisions make clear that state plans which deviate from the principle of equal representation for equal numbers are unconstitutional. As the Supreme Court stated in *Kirkpatrick* v. *Preisler*:

"Equal representation for equal numbers of people is a principle designed to prevent debasement of voting power and diminution of access to elected representatives. Toleration of even small deviations detracts from these purposes." [76]

In our view, a system allotting to each state a number of delegates equal to its representation in the House of Representatives should be an acceptable compliance with one-person, one-vote standards.‡‡[d] We reach this conclusion recognizing that there would be population deviations of up to 50% arising from the fact that each state would be entitled to a delegate regardless of population. It would be possible to make the populations substantially equal by redistricting the entire country regardless of state boundaries or by giving Alaska one vote and having every other state elect at large a multiple of 300,000 representing its population or redistrict each state on the new population unit.[77]

None of these methods, however, seems feasible or realistic. The time and expense involved in the creation and utilization of entirely new district lines for one election, especially since state election machinery is readily available, is one factor to be weighed.

Another is the difficulty of creating districts crossing state lines which would ade-

Footnotes at end of article.

quately represent constituents from both states. There is also the natural interest of the voter in remaining within his state. Furthermore, the dual nature of our political system strongly supports the position that state boundaries be respected. *Abate* v. *Mundt*, although distinguishable regarding apportionment of a local legislative body, suggests an analogy on a federal level.

The rationale of the Court in upholding the legislative districts within counties drawn to preserve the integrity of the towns, with the minimum deviation possible, could be applicable to apportionment of a convention. The functional interdependence and the coordination of the federal and state governments and the fundamental nature of the dual system in our government parallel the relationship between the county and towns in *Abate*. Appropriate respect for the integrity of the states would seem to justify an exception to strict equality which would assure each state at least one delegate.

Thus, a system based on the allocation of Representatives in Congress would afford maximum representation within that structure.

We cannot discern any federal constitutional bar against a member of Congress serving as a delegate to a national constitutional convention. We do not believe that the provision of Article I, Section 6 prohibiting congressmen from holding offices under the United States would be held applicable to service as a convention delegate.

The available precedents suggest that an "office of the United States" must be created under the appointive provisions of Article II [78] or involve duties and functions in one of the three branches of government which, if accepted by a member of Congress, would constitute an encroachment on the principle of separation of powers underlying our governmental system.[79]

It is hard to see how a state-elected delegate to a national constitutional convention is within the contemplation of this provision. It is noteworthy in this regard that several delegates to the Constitutional Convention of 1787 were members of the Continental Congress and that the Articles of Confederation contained a clause similar to Article I, Section 6.

We express no position on the policy question presented, or on the applicability and validity of any state constitutional bars against members of Congress simultaneously serving in other positions.

As part of our study, the Committee has considered the advisability of including in any statute implementing the convention method a rule as to whether a state should be able to rescind its ratification of a proposed amendment or withdraw a rejection vote. In view of the confusion and uncertainty which exists with respect to these matters, we believe that a uniform rule would be highly desirable.

The difficult legal and policy question is whether a state can withdraw a ratification of a proposed amendment. There is a view that Article V envisions only affirmative acts and that once the act of ratification has taken place in a state, that state has exhausted its power with respect to the amendment in question.[80]

In support, it is pointed out that where the convention method of ratification is chosen, the state constitutional convention would not have the ability to withdraw its ratification after it had disbanded.

Consequently, it is suggested that a state legislature does not have the power to withdraw a ratification vote. This suggestion has found support in a few state court decisions [81] and in the action of Congress declaring the ratification of the Fourteenth Amendment valid despite ratification rejections in two of the states making up the three-fourths.

On the other hand, Article V gives Congress the power to select the method of ratification and the Supreme Court has made clear that this power carries with it the power to adopt reasonable regulations with respect to the ratification process.

We do not regard past precedent as controlling but rather feel that the principle of seeking an agreement of public support espoused in Dillon v. Gloss and the importance and comparatively permanent nature of an amendment more cogently argue in support of a rule permitting a state to change its position either way until three-fourths of the states have finally ratified.[82]

CONCLUSION

Much of the past discussion on the convention method of initiating amendments has taken place concurrently with a lively discussion of the particular issue sought to be brought before a convention. As a result, the method itself has become clouded by uncertainty and controversy and attempted utilization of it has been viewed by some as not only an assault on the congressional method of initiating amendments but as unleashing a dangerous and radical force in our system.

Our two-year study of the subject has led us to conclude that a national constitutional convention can be channeled so as not to be a force of that kind but rather an orderly mechanism of effecting constitutional change when circumstances require its use.

The charge of radicalism does a disservice to the ability of the states and people to act responsibly when dealing with the Constitution.

We do not mean to suggest in any way that the congressional method of initiating amendments has not been satisfactory or, for that matter, that it is not to be preferred. We do mean to suggest that so long as the convention method of proposing amendments is a part of our Constitution, it is proper to establish procedures for its implementation and improper to place unnecessary and unintended obstacles in the way of its use. As was stated by the Senate Judiciary Committee, with which we agree:

"The committee believes that the responsibility of Congress under the Constitution is to enact legislation which makes article V meaningful. This responsibility dictates that legislation implementing the article should not be formulated with the objective of making the Convention route a dead letter by placing insurmountable procedural obstacles in its way. Nor on the other hand should Congress, in the guise of implementing legislation, create procedures designed to facilitate the adoption of any particular constitutional change." [83]

The integrity of our system requires that when the convention method is properly resorted to, it be allowed to function as intended.

Respectfully submitted,

SPECIAL CONSTITUTIONAL CONVENTION STUDY COMMITTEE.

FOOTNOTES

*Mason's draft of the Constitution, as it stood at that point in the Convention, contained the following notations: "Article 5th—By this article Congress only have the power of proposing amendments at any future time to this constitution and should it prove ever so oppressive, the whole people of America can't make, or even propose alterations to it; a doctrine utterly subversive of the fundamental principles of the rights and liberties of the people." 2 The Records of the Federal Convention of 1787, at 629 n. 8 (Farrand ed. 1937).

**This is because it was called "for the sole and express purpose of revising the Articles of Confederation and reporting . . . such alterations and provisions therein as shall . . . render the federal constitution adequate to the exigencies of government and the preservation of the Union."

***Note the similarity between this language (emphasis ours) and the language contained in the earliest drafts of Article V (p. 12, *supra*).

****Upon receipt of the *first* state application for a convention, a debate took place in the House of Representatives on May 5, 1789, as to whether it would be proper to refer that application to committee. A number of Representatives, including Madison, felt it would be improper to do so, since it would imply that Congress had a right to deliberate upon the subject. Madison said that this "was not the case until two-thirds of the State Legislatures concurred in such application, and then it is out of the power of Congress to decline complying, the words of the Constitution being express and positive relative to the agency Congress may have in case of applications of this nature." The House thus decided not to refer the application to committee but rather to enter it upon the Journals of Congress and place the original in its files. 1 Annals of Congress, cols. 248-51 (1789). Further support for the proposition that Congress has no discretion on whether or not to call a constitutional convention, once two-thirds of the states have applied for one, may be found in IV Elliot, *The Debates in the Several State Conventions on the Adoption of the Federal Constitution* 178 (2d ed 1836) (remarks of delegate James Iredell of North Carolina); 1 Annals of Congress, col. 498 (1796) (remarks of Rep. William Smith of South Carolina during debate on a proposed treaty with Great Britain); Cong. Globe, 38th Cong., 2d Sess. 630-31 (1865) (remarks of Senator Johnson).

***** See our discussion at pages 30–31, *infra*.

† For a related discussion, see the debates which took place at the time the Twenty-First Amendment was being formulated concerning the extent of congressional power over state ratifying conventions. *See, e.g.*, 76 Cong. Rec. 124–34, 2419–21, 4152–55 (1933); 77 Cong. Rec. 481–32 (1933); 81 Cong. Rec. 3175–76 (1937). Former Attorney General A. Mitchell Palmer argued that Congress could legislate all the necessary provisions for the assembly and conduct of such conventions, a view that was controverted at the time by former Solicitor General James M. Beck.

‡ *Appendix A* sets forth suggestions as to how such review might be provided for in S. 1272.

‡‡ The concurrent resolution is used to express "the sense of Congress upon a given subject," Watkins, C. L., and Riddick, F. M., *Senate Procedure: Precedents and Practices* 208 (1964); to express "facts, principles, opinions, and purposes of the two Houses," Deschler, L., *Jefferson's Manual and Rules of the House of Representatives* 185–186 (1969); and to take a joint action embodying a matter within the limited scope of Congress, as, for instance, to count the electoral votes, terminate the effective date of some laws, and recall bills from the President, Evins, Joe L., *Understanding Congress* 114 (1963); Watkins and Riddick, *supra* at 208–9. A concurrent resolution was also used by Congress in declaring that the Fourteenth Amendment should be promulgated as part of the Constitution. 15 Stat. 709–10. Other uses include terminating powers delegated to the President, directing the expenditure of money appropriated to the use of Congress, and preventing reorganization plans taking effect under general powers granted the President

to reorganize executive agencies. For an excellent discussion of such resolutions, see S. Rep. No. 1335, 54th Cong., 2d Sess. (1897).

‡[a] In commenting on the ratification process, the Supreme Court stated in *Hawke* v. *Smith (No. 1)*. "Both methods of ratification, by legislatures of conventions, *call for action by deliberative assemblages* representative of the people, which it was assumed would voice the will of the people." 253 U.S. at 226–27 (emphasis added).

‡[b] That is, the reapportionment and tax limitation applications.

‡[c] Use of an electoral-college-type formula would mean that 15 states would be overrepresented by 50 percent or more, with the representation rising to close to 375 percent for Alaska, California, on the other hand, would be underrepresented by nearly 20 percent.

‡[d] We have not studied the District of Columbia question, although we note that the District does not have a role in the congressional method of initiating amendments or in the ratification process.

Co.*, 89 Tex. 356, 34 S.W. 738 (1896); *Staples* v. *Gilmer*, 183 Va. 613, 33 S.E. 2d 158, 156 A.L.R. 495 (1945). *See* Annot. "Power of state legislature to limit the power of a state constitutional convention," 158 A.L.R. 512 (1945).

[33] Roger Hoar has expressed it this way:

[T]here would be no convention unless people voted affirmatively, that an affirmative vote would result in holding exactly the sort of convention in every detail provided in the act, and that the people are presumed to know the terms of the act under which they vote. The conclusion drawn from this is that the convention act in its every detail is enacted by the people voting under it. R. Hoar, *supra* note 3, at 71.

[34] *State* v. *American Sugar Refining Company*, 137 La. 407, 415, 68 So. 742, 745 (1915).

[35] *State ex rel. McCready* v. *Hunt*, 20 S.C. (2 Hill's Law) 1,271 (1834).

[36] Nearly 15 percent of the total number of state constitutional conventions called have been substantively limited in one or more respects. The limited or restricted state constitutional convention has been used frequently since World War II. *See* A. Sturm, *supra* note 4, at 56–60, 113; A. Sturm, "State Constitutions and Constitutional Revision, 1970–1971," in Council of State Gov'ts, *The Book of the States, 1972–1973*, at 20 (1972).

[37] 256 U.S. 368 (1921).

[38] 258 U.S. 130 (1922), where the Court stated: "But the function of a state legislature in ratifying a proposed amendment to the Federal Constitution, like the function of Congress in proposing the amendment, is a federal function derived from the Federal Constitution; and it transcends any limitations sought to be imposed by the people of a State."

[39] As Justice Felix Frankfurter has observed: "The history of American freedom is, in no small measure, the history of procedure." *Malinski* v. *New York*, 324 U.S. 401, 414 (1945). It is not surprising, therefore, that procedural limitations on conventions have been invalidated. *See Carton* v. *Secretary of State*, 151 Mich. 337, 115 N.W. 429 (1908); *Goodrich* v. *Moore*, 2 Minn. 61 (1858). *See also* Jameson, *supra* note 17, at 364; Dodd, *supra note* 32, at 31, 33.

[40] A number of the Congressional Acts providing for territorial conventions did prescribe that the convention must determine by a majority of the whole number of delegates whether it was expedient for the territory to form a constitution and state government. No such requirement, however, was imposed on the conventions in their work of framing such constitutions and governments. *See, e.g.*, Act of April 30, 1802, ch. 40, 1 Stat. 173 (Ohio); Act of Feb. 20, 1811, ch. 21, 3 Stat. 641 (Louisiana); Act of July 16, 1894, ch. 138, 28 Stat. 107 (Utah); Act of June 16, 1906, ch. 3335, 34 Stat. 267 (Oklahoma).

Among those few state constitutional conventions, for which the vote needed to govern convention proceedings was established in enabling legislation were the 1967 Pennsylvania convention, and the New Jersey conventions of 1947 and 1966. *See* Law of March 16, 1967, ch. 2 [1967] Pa. Laws 2; Act of Feb. 17, 1947, ch. 8, [1947] N.J. Laws 24; Act of May 10, 1965, ch. 43, [1965] N.J. Laws 101.

When Congress required that the Twenty-First Amendment (ending Prohibition) be ratified by state conventions, rather than legislatures, forty-three states enacted legislation providing for such conventions. Thirty-two of those enabling acts established the vote required of convention delegates for ratification; either a majority of those delegates present and voting (e.g., New Mexico and North Carolina—such acts also established a minimum quorum) or a majority of the total number of delegates (e.g., California and Illinois). In no case was the requirement greater than a majority of the total number of delegates. *See* E. Brown, *Ratification of the Twenty-First Amendment to the Constitution of the United States: State Convention Records and Laws* 515–701 (1938).

[41] To be noted is Gerry's criticism of the August 30, 1787 proposal, specifically, his observation that a "majority" of the states might bind the country in the convention contemplated by that proposal. *See* pp. 12–13, *supra*. Gerry's criticism eventually led to the inclusion of ratification requirements. *See* Weinfeld, *supra* note 21, at 482–483.

[55] 253 U.S. 221 (1920).

[56] *Id.* 227.

[57] 285 U.S. 355 (1932).

[58] *Id.* 365, 366.

[59] *See Coleman* v. *Miller*, 146 Kan. 390, 71 P.2d 518 (1937), *aff'd.* 307 U.S. 433 (1939), upholding the right of a lieutenant governor to cast the tie-breaking vote in the state senate on the ratification of the proposed child labor amendment. In affirming, the United States Supreme Court expressed no opinion as to the propriety of the lieutenant governor's participation.

[60] The results of a questionnaire-type inquiry which we sent to the fifty states indicate that a substantial majority exclude the governor from participation and that in a number that include him it is not clear whether his inclusion is simply a matter of form. Historically, it appears that the governor generally has not played a role in their processes, although there are exceptions to this rule. *See* Myers "The Process of Constitutional Amendment," S. Doc. No. 314, 76th Cong., 3rd Sess. 18 n. 47 (1940), wherein it is stated that governors gave 44 approvals in the ratifications of 15 amendments. Whether the approvals were simply a matter of form or were required as a matter of state law is not clear. In several cases there were gubernatorial vetoes of ratifications, including the governor of New Hampshire's attempted veto of his state's ratification of the twelfth amendment.

[76] 394 U.S. 526, 531 (1968).

[77] The present 1970 census establishes the mean population of congressional districts as approximately 467,000. As Alaska has a population of approximately 302,000, the absolute differential is over 50%. There are similar disparities in some states with two representatives (*e.g.*, South Dakota's two Congressmen each represent 333,000 people), but they are not as great.

[78] *See United States* v. *Germaine*, 99 U.S. 508 (1878); *United States* v. *Mouat*, 124 U.S. 303 (1888); *United States* v. *Smith*, 124 U.S. 525 (1888). *See generally* 1 Hinds, *Precedents of the House of Representatives* § 493 (1907). In *Board of Supervisors of Elections* v. *Attorney General*, 246 Md. 417, 439, 229. A.2d 388, 395 (1967), the court held that a delegate to a state constitutional convention was not an "officer" so that a member of the legislature was not guilty of dual office-holding when he simultaneously served as a delegate; *accord, Livingston* v. *Ogilvie*, 43 Ill. 2d 9, 250 N.E. 2d 138 (1969). *But see Forty-Second Legislative Assembly* v. *Lennon*, 481 P.2d 330 (Mont. 1971); *State* v. *Gessner*, 129 Ohio St. 290, 195 N.E. 63 (1935).

[79] *See 1 Farrand* 376; *Reservists Comm. to Stop the War* v. *Laird* 323 F. Supp. 833 (D.D.C. 1971).

[81] *Wise* v. *Chandler*, 270 Ky. 1, 108 S.W.2d 1024 (1937) (also holding that state legislative *rejection* of a proposed constitutional amendment cannot be reconsidered); *Coleman* v. *Miller*, 146 Kan. 390, 71 P.2d 518 (1973) (dictal). The issue was discussed, though not passed on by the Court, in Chief Justice Hughes' opinion in *Coleman* v. *Miller*, 307 U.S. 433, 447–50 (1938).

[82] This rule would take precedent over the action of Congress in refusing to permit New Jersey and Ohio to rescind their ratifications of the fourteenth amendment. The right to ratify after a previous rejection would confirm precedents established in connection with the ratifications of the Thirteenth and Fourteenth Amendments. *See generally* Myers, *The Process of Constitutional Amendment*, S. Doc. No. 314, 76th Cong., 3rd Sess. (1940).

[83] S. Rep. No. 336, 92nd Cong. 1st Sess. 2 (1971).●

By Mr. HATCH:

S. 818. A bill to amend title 18 to limit the insanity defense; to the Committee on the Judiciary.

LIMITATION OF THE INSANITY DEFENSE

● Mr. HATCH. Mr. President, no branch of the criminal law has been the subject of as much ridicule and controversy as the use of the insanity defense. Generations of Federal judges have struggled to define the circumstances under which mentally abnormal offenders should be held responsible for their conduct, without notable success. As Dr. Abraham Halpern, the distinguished psychiatrist, has noted, "insanity has come to mean anything anybody wants it to mean."

The traditional insanity defense is both a legal anachronism and a concept ill-suited to modern psychological theory. It presents issues—important issues—that are not susceptible of intelligent resolution in the courtroom environment. Trials in which the insanity defense has been raised have often degenerated into swearing contests between opposing teams of expert witnesses, all of whom are forced to translate the language of the psychiatric profession into the quite alien language of the legal profession. This takes place within the context of convoluted, hypothetical questioning that yields responses that can only be confusing and misunderstood. They certainly contribute extremely little toward the pursuit of truth.

The insanity defense evolved principally as a means by which English jurists could avoid—in a legally rational manner—the discomfiture of condemning to death a felon who was so mentally deranged that his execution would affront ordinary moral sensibilities. As Lord Erskine stated in the earliest years of the 19th century, "delusion * * * is the true character of insanity." Individuals suffering in this manner could not truly be considered "responsible" in the legal sense.

Although the criminal law over the years substituted imprisonment and lesser penalties for capital punishment and substituted judicial discretion for mandatory penalties, the insanity defense, as an exception to the ordinary consequences of criminal conduct, survived the former legal requirements which it had been designed to avoid.

In the United States, the Congress has never enacted legislation on the insanity defense. Its development has largely been left to the courts, particularly the courts of appeals. The foundation of the present defense was laid down in M'Naghten's case (8 Eng. Rep. 718 (House of Lords, 1843)) in which it was stated—

> To establish a defense on the ground of insanity, it must be clearly proved that, at the time of the committing of the act, the party accused was laboring under such defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing or, if he did know it, he did not know he was doing what was wrong.

The so-called "right-wrong" test of insanity posited in M'Naghten has gradually, but steadily, been broadened over the years.

Most importantly, the M'Naghten test, a purely cognitive test was supplemented by a volitional test stating that an individual who could discern right from wrong, yet who, for reasons of mental disease, could not control his actions could avail himself of the insanity defense. As it came to be known, the "irresistible impulse" rider to the M'Naghten inquired into whether an offender was able to restrain his actions once having been shown to appreciate the wrongness of such actions. see *Davis* v. *United States*, 165 U.S. 373 (1897)

The next stage of evolution occurred in midcentury in the District of Columbia circuit's famous decision of *Durham* v. *United States*, 214 F. 2d. 862 (1954). In that case, the court held them—

> An accused is not criminally responsible if his unlawful act was the product of mental disease or defect.

After nearly two decades of interpreting the provisions of this rule, provisions whose meanings were by no means widely agreed upon, the District of Columbia court in 1972 adopted a formulation that had previously been adopted by the other circuits.

The American law institute's model penal code (section 4.01. Proposed official draft 1962) stated that—

(1) A person is not responsible for criminal conduct if at the time of such conduct as a result of mental disease or defect he lacks substantial capacity to appreciate the criminality of his conduct or to conform to the requirements of the law.

(2) The terms "mental disease or defect" do not include an abnormality manifested only by repeated criminal or otherwise antisocial conduct.

It is this language that serves today as direction for the insanity defense in the Federal courts.

This legislation would establish a statutory standard for the criminal insanity defense in Federal prosecutions. It is similar to one that was contained in one of the versions of the proposed Federal Criminal Code reform (S. 1, 94th Congress, section 522). The amendment would add a new section to title 18 of the United States Code that would read as follows:

It shall be a defense to a prosecution under any Federal statute, that the defendant, as a result of mental disease or defect, lacked the state of mind required as an element of the offense charged. Mental disease or defect does not otherwise constitute a defense.

The legislation that is being offered would not abolish the insanity defense. It would, however, abolish the separate insanity defense. Evidence of mental disease or defect diminishing the capacity of an offender would be relevant to the extent that it negated an element of the offense—the scienter element, or requisite state of mind. For purposes of the legal determination of guilt or innocence, however, it would not be relevant to the extent that it failed to nullify this mental element.

In the case of murder, for example, the threshold question that would be addressed under the amendment is whether or not the accused person "knowingly" intended to kill the victim, rather than whether or not the accused person was capable of conforming his conduct to the requirements of the law. An individual, suffering from delusions who believed that he was throwing darts at a board instead of stabbing a victim to death, would not be guilty of murder. But—and it is the key distinction—he would not be guilty because he did not "knowingly" kill another, not because he was covered by a separate insanity defense. Had he suffered from some form of severe schizophrenia, yet still appreciated the fact that he was killing another, he would be found guilty of murder under the new defense.

The amendment would hold all individuals liable for their criminal actions if done with the requisite criminal intent. Evidence of mental disease or defect would be considered only if it, in fact, negated the mens rea required for the commission of the offense.

Upon proof beyond a reasonable doubt that an individual committed the required conduct with the required state of mind, the individual would be found guilty of the offense. At the time of sentencing, however, the court would hear whatever further psychiatric testimony was available in assisting him in determining whether or not to commit the defendant to a prison, a mental hospital, or some other facility.

There are a number of arguments in my mind that mitigate in behalf of this amendment:

First, those individuals suffering the most serious forms of mental disabilities are unlikely to be criminally convicted under any circumstance. Such individuals will either be found incompetent to stand trial in the first place or continue to be acquitted under the proposed amendment's mens rea test. It is in the case of borderline sociopaths or antisocial personalities that this test differs from the American Law Institute and other tests. Whereas such tests speak of "irresistible impulses" or "substantial capacity to appreciate" or a criminal act being the "product" of a mental disease or defect, the proposed test focuses directly upon mental elements required by the criminal offense itself. The decision as to whether such a mental element existed is a determination that must routinely be made in the case of all accused individuals. It is a clearer and far better understood standard than the traditional insanity standards.

The result is that under current insanity formulations one is exculpated largely on the basis of whether a particular expert witness wishes to label an individual "mentally diseased" and if a particular jury is inclined to agree.

Second, it is difficult in the minds of some individuals to hold as less culpable those individuals who are classified as mentally ill but not those who are the product of so-called criminogenic social or economic conditions. As one psychiatrist has noted, " the basic problem has been to keep the insanity defense an exception in the face of determinist ideology which dominates the intellectual tradition of the 20th century." Even if this concept could be contained to "mental illness," the concept of such illness has expanded steadily in this century at the expense of the concept of moral responsibility.

Third, the present insanity defense is an imprecise way for determining whether individuals ought to be institutionalized and, if so, to what type of institution. The proposed defense would allow this question to be faced directly and explicitly by the court. Rather than focusing only upon some elusive and fluctuating concept of responsibility at the time of the offense, the focus would be upon insuring proper means of treatment of the underlying mental problem. Under the amendment, it is likely that the number of truly abnormal individuals assigned to traditional prisons would be reduced since the sentencing options of the sentencing judge would be increased.

Fourth, abolition of the separate offense would encourage more effective use of professional psychiatric resources, as well as legal resources. In one notorious case, *Wright* v. *United States*, 250 F.2d 4 (D.C. Cir. 1957), 11 psychiatrists examined the defendant and submitted testimony before the jury. The attentions of these highly trained psychiatrists could be far better utilized in mental institutions and prisons than in unseemly intradisciplinary courtroom disputes. A study conducted several years ago of the departments of mental health in the States found nearly two-thirds of them in favor of abolition of the separate insanity defense, with large numbers emphasizing the burdens placed upon them by litigations.

Fifth, the treatment of those labeled "mentally ill" as being responsible for their conduct is fully consistent with modern trends in psychiatry to treat such individuals, in most circumstances, as being responsible for their own actions rather than as helpless invalids, buffeted everywhere by circumstances outside of their control.

Sixth, the present insanity defense, it has been suggested, encourages juries to overlook the fundamental question of whether or not defendants may simply not be guilty by virtue of lacking in mens rea, Goldstein and Katz, "Abolish the Insanity Defense—Why Not?" (72 Yale Law J. 853 (1963)). Trials in which the defense is raised tend sometimes to focus disproportionately on the separate defense.

Finally, and in some respects the most important, the insanity tests, as they have become increasingly broad in application, have undermined significantly public respect for and confidence in the criminal justice system as they have resulted in the release of large numbers of individuals clearly dangerous to society.

I will not cite specific horror stories, but suffice it to say they are not difficult to identify. I am confident that each of us here is familiar with instances in which the present insanity defense has been abused. and, quite probably, in which acquitted individuals have wreaked further violence upon society. In the past several months alone, we have witnessed invocation of the defense in several highly celebrated trials, including those of former San Francisco city supervisor Dan White and John Wayne Gacy in Chicago.

There are, in my opinion, few legislative acts in the area of criminal justice that this body can take that will do more to restore public confidence in our system than by reforming the present antiquated insanity defense.

The proposed amendment would concentrate trial exploration of the defendant's mental state in the sole area in which it is legally meaningful—the evaluation of the necessary mens rea—while enabling the post-trial process to concentrate upon the question of disposition of the defendant, free from the artificial fetters of evidentiary rules.

It has also been suggested that the present insanity defense tends, far more than will the proposed defense, to discriminate against the poorer and the indigent defendants. Insanity has often

been termed a "rich man's defense" because it has been the wealthy who are best able to identfy those psychiatric expert witnesses who could produce the most favorable expert testimony. Less well-to-do defendants have generally been forced to resort to public mental hospital experts or court-appointed experts whose reports have freely been available to both sides in litigation.

Mr. President, this amendment would end the insanity charade that has demeaned the Federal courts for too long. It would establish an effective means by which offenders could appropriately be channeled into either the punitive-correctional system or the medical-legal system. Most importantly, it would insure that this determination took place in an environment that is suited for making it, rather than, as is presently the case, in an environment in which legal and psychiatric questions are confusingly and inappropriately intertwined.

In this latter respect, Dr. Gregory Zilborg has written—

To force a psychiatrist to talk in terms of the ability to distinguish between right and wrong and of legal responsibility is—let us admit it open and frankly—to force him to violate the hippocratic oath, even to violate the oath he takes as a witness to tell the truth and nothing but the truth, to force him to perjure himself for the sake of justice. For what else is it if not perjury if a clinician speaks of right and wrong and criminal responsibility, and the understanding of the nature and quality of the criminal act committed, when he, the psychiatrist really knows absolutely nothing about such things.

There is among psychiatrists simply nothing that even remotely approaches a consensus on what constitutes insanity or on how such a condition is to be medically determined, much less legally determined.

The proposed reform of the insanity defense is supported by a large number of responsible observers, including doctors Seymour Halleck and Karl Menninger, laws professors Norval Morris and Joseph Goldstein, the Justice Department under Edward Levy, 62 percent of the respondents of a survey conducted among the departments of mental health in the States by the Senate Judiciary Committee, a number of local and State bar associations, and a committee of the American Bar Association. In addition, a number of States and foreign countries have adopted formulations similar to the proposed language.

To emphasize once more, the proposed reform of the insanity defense would promote better than any present insanity defense two objectives that are critical to a sound system of criminal justice: First, it would promote the integrity of the system, and promote protection of the community, by insuring that individuals who are found guilty of an offense with the requisite mens rea are treated as blameworthy individuals. Second, it would promote genuine promise of rehabilitation to those in need of such rehabilitation by allowing the court to focus upon their medical condition separately from a determination of their legal guilt. Nebulous and extraneous issues would be removed from the consideration of each of these questions.

Mr. President, I ask unanimous consent that the text of my bill follow this statement as well as a number of relevant articles.

There being no objection, the bill and articles were ordered to be printed in the RECORD, as follows:

S. 818

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 1 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 16. Insanity defense

"(a) It shall be a defense to a prosecution under any Federal statute, that the defendant, as a result of mental disease or defect, lacked the state of mind required as an element of the offense charged. Mental disease or defect does not otherwise constitute a defense.

"(b) This section applies to prosecutions under any Act of Congress other than—

"(1) an Act of Congress applicable exclusively in the District of Columbia;

"(2) the Canal Zone Code; or

"(3) the Uniform Code of Military Justice (10 U.S.C. 801 et seq.).".

(b) The table of sections from chapter 1 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"16. Insanity defense.".

BEHIND GROWING OUTRAGE OVER INSANITY PLEAS

"How to beat a murder rap by insanity." That's how Thomas Vanda, a 26-year-old Chicago man, titled a letter of advice he slipped to a fellow inmate at Cook County Jail.

If anyone can tell how it is done, it is Vanda. He was locked up in 1975 for stabbing a 15-year-old girl to death. Then, just 15 months after his trial, he was freed, supposedly cured of the insanity that doctors testified had led him to kill.

Now Vanda is back in custody, again charged with murder. Again, it's a stabbing—this time of a female college student. Again, Vanda's plea is "not guilty by reason of insanity."

This case and others like it are stirring indignation across the country. The cry: People are using a plea of insanity to get away with murder.

"Insanity has come to mean anything anybody wants it to mean," complains Dr. Abraham L. Halpern, a New York psychiatrist. "Dangerous individuals who are not mentally ill are released only to commit serious crimes again."

Lawmakers are being pushed into action. Some states have already tightened their laws, and others are on the verge of doing so. In some capitals, a drive is on to end the insanity defense altogether.

The trend could gain impetus from the trials of two highly publicized murder cases that will revolve around the question of insanity—

In San Francisco, former City Supervisor Dan White went on trial April 23 for fatally shooting Mayor George Moscone and Supervisor Harvey Milk in the heat of a dispute last November.

In Chicago, John Wayne Gacy, a painting contractor, faces trial for allegedly murdering 33 young men. Many of them were buried in the crawl space under his house.

Criminal defendants plead insanity in only a small fraction of the cases around the country. But the number of such cases has been growing rapidly.

In New York state, for example, acquittals on the ground of insanity total more than 50 each year—seven times the number in the late 1960s. And the insanity defense—once invoked almost exclusively against murder charges—now is being used increasingly in less serious cases, too.

Critics say that today's laws make it all too easy for a clever defendant or his lawyer to seek refuge from criminal punishment behind a smoke screen of psychological jargon. Defenders challenge this. They insist that abuses of the law have been relatively few. But both sides agree that there have been far-reaching changes in the concept of legal insanity.

Right vs. wrong. Whether the accused was so mentally ill at the time of the crime that he should be excused from the blame is an age-old question. For centuries, British and American courts used a relatively simple test. It required a finding that when the crime occurred, the lawbreaker was not able to recognize that his actions were wrong.

In recent decades, however, as psychiatry developed new theories of human behavior, looser and vaguer definitions of legal insanity found their way into the statute books.

Today, these newer rules prevail in some form in all federal and most state courts. They allow acquittal if the accused was propelled by an "irresistible impulse" or was in some other mental state that prevented him from controlling his actions, even though he may have recognized them to be wrong.

This broadened concept of legal insanity has opened the floodgates to testimony by psychiatrists, and that—say the critics—is the rub.

Among psychiatrists, there is nothing remotely approaching a consensus on what constitutes insanity. Moreover, psychiatrists themselves concede that they lack reliable means for determining whether a person was insane in any sense at the time of a crime. All too often, they must rely heavily on the accused's behavior and on what he tells them—two types of data that a shrewd defendant can carefully orchestrate.

In his letter to a fellow inmate, Vanda, the Chicago man acquitted after stabbing a young girl, told how this can be done. To "beat the rap," he advised "acting crazy" in front of doctors, such as claiming to hear voices or openly performing indecent acts.

Another case cited is that of Edward Carter, Jr., a Washington, D.C., man charged with raping a 13-year-old girl and then found not guilty by reason of insanity on the strength of psychiatric testimony.

Carter had convinced psychiatrists of his insanity by telling them about some 300 rapes he said he had committed over several years. Later, the doctors concluded that the man invented the rape-spree story as an ingenious ploy. A federal judge agreed that Carter "bamboozled" the medical experts and the court. Still, since he had not been convicted of any crime and was no longer diagnosed as mentally ill, he had to be freed.

Memory trick. When a person is acquitted by reason of insanity, he usually is sent to a mental institution at least for a time. Under the law, he is to be kept there until doctors determine that he is no longer dangerous and the judge concurs. But the tests for determining that are just as untrustworthy as those used prior to trial, critics say.

They point to E. E. Kemper III, a California man who spent five years in a hospital for the insane after murdering his grandparents. He persuaded psychiatrists and a judge that he was cured by giving correct answers in a battery of psychological tests—answers he had earlier memorized. In the three years after his release, he killed

his mother and seven other women, dismembering their bodies.

To curtail abuse of the insanity plea, the District of Columbia and about half the states have made a key change in the law. A defendant who raises the insanity defense now bears the burden of proving that his claim is valid. Previously, it was up to the prosecutor to show that the claim was invalid.

Similarly, under these revised laws, when a person who escaped conviction on grounds of insanity seeks release from a mental institution, he bears the burden of proving that he's no longer a danger to the community.

Other states, including Michigan and Florida, tried to go further. They adopted laws replacing the insanity defense with a "guilty but insane" approach. The jury weighs only whether the accused committed the criminal act. Evidence of insanity is admissible only after the verdict, when the judge considers it at the time of sentencing.

INTENT VITAL

To date, however, all laws abolishing the insanity defense outright have been struck down by state courts. In most instances, the courts have ruled that a person's mental state must be weighed at trial to determine a key element of the crime—the intent to commit it.

A less drastic reform, now pending in the New York Legislature, is given a better chance of surviving the scrutiny of the courts. Under this proposal, a claim of insanity would not permit a person to escape blame for a crime. Evidence of mental disease would be allowed, but only to reduce the severity of punishment. For example, a person too ill to have the intent to murder could be found guilty of involuntary manslaughter instead.

Support for changes in the law is far from universal. Many lawyers and doctors admit that the current system has its abuses but oppose any tinkering. "You don't burn down the whole barn just to get a rat or two," cautions Chicago defense lawyer Sam F. Adam.

"Insanity comes up in sensational cases, but it is not used that often," says Joseph F. Vargyas, director of the American Bar Association's Commission on the Mentally Disabled. "Some estimates say it is an issue in less than 1 percent of all serious criminal cases."

Even so, with use of the insanity defense spreading fast, the tide favoring drastic new limits is flowing strongly.

WHEN PSYCHIATRIC WITNESSES SQUARE OFF IN THE COURTROOM

The growing popularity of the insanity defense in criminal trials is bringing high fees to a cadre of witnesses who pop up in one case after another.

Critics call them "hired guns." They are the psychiatrists and psychologists who testify time and again either to buttress a defendant's insanity claim or to challenge it on behalf of the prosecution.

Some specialists shuttle about the country testifying in a dozen trials or more each year, adding an estimated $20,000 to $30,000 or more to their annual incomes.

Among psychiatrists, fees range from $50 per hour to several times that amount; among psychologists, fees are $40 per hour and up. Pretrial examination of the accused usually costs $500 to $600, but when the hourly charges for testifying and for waiting around to do so are added to the total, outlays easily reach $3,000.

If a nationally recognized doctor skilled in courtroom techniques is brought in, the bill can be still higher, according to legal experts.

Do these payments make much psychiatric testimony suspect? Critics say yes. Dr. Lawrence C. Kolb, former president of the American Psychiatric Association, for one, says that in the eyes of the public a diagnosis may seem to be "perverted . . . through promise of a fee."

Psychiatrists are well aware that they will be hired to testify only if their diagnosis helps the defendant, critics say.

As for psychiatrists employed at government hospitals, they are described as being under pressure to please the prosecutors.

U.S. Appeals Court Judge David L. Bazelon tells of a government psychiatrist who changed his diagnosis of a defendant from "chronic undifferentiated schizophrenia" to "without mental disease" after a prosecutor told him the case was "one of major significance" to the government.

Psychiatrists who regularly make courtroom appearances concede that a few specialists tailor their findings to satisfy their clients or employers. But they insist that most won't put forward a diagnosis unless they sincerely believe it to be sound.

They say the conflicting psychiatric testimony that marks so many trials stems from differing schools of thought.

Saleem A. Shah, chief of the Center for Studies of Crime and Delinquency at the National Institute of Mental Health, agrees: "One doctor may have a hard-line position—that a person has to be pretty sick before it's mental illness. Another sees mental disability as broad—encompassing such personality disorders as alcoholism and drug addition."

Theorists on the stand. Despite the controversy, use of psychiatric experts is on the rise. Legions of doctors are appearing before American juries with new and conflicting theories of mental illness.

One example: The 1976 bank-robbery trial of Patricia Hearst. Arrayed on the side of Hearst were three well-known psychiatrists. Their diagnosis: She had been brainwashed and terrorized into committing robbery by the radicals who kidnapped her. On the government side were two other well-known psychiatrists. They completely rejected the defense theory.

It is this type of conflict that has made so many Americans cynical about the role of psychiatrists in the courtroom.

"You get the same thing in every case—one doctor testifies the defendant was sane, the other says he was crazy," observes one East Coast prosecutor. "In the end, it's just a show that to many people looks like a sham."

[From the New York Times, Feb. 25, 1979]

GUILTY IS GUILTY, INSANE OR NOT

(By John White)

CHESHIRE, CONN.—Is a person responsible for his behavior if he is insane or brainwashed?

Legislative and judicial proceedings answer no. To this I say that there is no substitute for personal accountability and nothing more dangerous for society than to allow a person, regardless of his state of mind, to escape the consequences of his actions.

Consider murder trials in which the accused have pleaded not guilty by reason of insanity. Admitted killers have literally gotten away with murder—legally. The insanity plea allowed judges to sentence them to mental hospitals for observation and treatment. There they were found sane and released because they can't be tried twice for the same cime.

It is legislative insanity that this should be allowed to happen!

In a free society, laws are made to control behavior, not states of mind. A defendant's mental state should have no bearing on whether he is found guilty of committing a crime. He may be insane, brainwashed, or even, as in Son of Sam-type cases, "possessed" by an evil demon (though "Son," David R. Berkowitz, now denies it) but that should only be taken into account after the finding. If a person is genuinely unbalanced, he can be given a prison sentence that includes appropriate treatment to restore mental health, whether the treatment be psychiatry, deprogramming or exorcism. Then, if treatment is successful, the person should serve the rest of his sentence unless the preponderance of expert opinion feels that pardon or commutation is in order. At that point compassion becomes proper—but not before. The legal system is intended to deliver justice, not compassion. Ignoring this crucial distinction has led to the shameful and dangerous situation in which admitted murderers are released into society without punishment and without even simple justice for the victim's survivors.

We can agree that Jim Jones was insane, but does that mean that if he had lived he should have been found not guilty by reason of insanity? Or Adolf Eichmann?

The Nuremberg trials, declared loud and clear that people must be responsible for their acts, even in time of war. Trials in America today, however, declare that people are not responsible for their acts because their state of mind excluded reason. Consequently, criminals have been handed legal means to get away with murder, and they, considering their lives are at stake, quite reasonably use it.

Legislators should correct this most gross miscarriage of justice—a miscarriage based on the foolish idea that your state of mind has a bearing on your innocence or guilt in criminal proceedings. If you did it, you're guilty—period. Whether you remember doing it or whether you could make a rational decision at the time doesn't matter at that point in the proceedings. Your state of mind and other possible mitigating circumstances should be taken into account only in passing sentence. Irresponsible behavior can never be condoned to the point of murder. The failure of legislators to recognize and correct this outrageous situation only contributes to the general deterioration of respect for law and social order.

[From the Washington Post, Dec. 17, 1980]

CRAZY? SO WHAT?

(By William Raspberry)

Here we go again. Washington's alleged master burglar and accused murderer of Dr. Michael Halberstam, who supposedly caught him in the act, has asked, through his lawyer, for a hearing to determine his mental competency.

The man charged with the murder of John Lennon was in a Bellevue mental ward almost before the gun smoke had blown away.

The clear implication is that Bernard Welch and Mark David Chapman will plead innocent by reason of insanity when they come to trial for murder. With luck, one or both may even manage to avoid trial altogether.

The very possibility is one of the things that drive me batty about our criminal justice system. I'm willing to suppose that Welch and Chapman—if they in fact did what they are accused of doing—are crazy. Welch's lawyer suggests that "there might be some pattern of compulsive behavior which might have its roots in mental illness."

Perhaps. The multimillion-dollar stash police found in his elegant home clearly suggests that the alleged burglary spree wasn't the product of economic desperation.

Chapman, who allegedly bought a gun, quit his job in Hawaii and flew to New York for the express purpose of killing a man against whom he had no rational beef, may be, as a New York cop called him, a "nutcake."

But if a non-lawyer may legitimately entertain such questions: so what? Shouldn't it be the first order of business to answer the fundamental question: did they do it?

And how can we do that unless they are brought to trial?

I'm jumping the gun, of course. There is no reason to suppose—yet—that they won't be tried. After all, the lawyer for David Berkowitz, accused in the "Son of Sam" killings, found a couple of psychiatrists willing to pronounce the suspect mentally incompetent and incapable of participating in his own defense. Berkowitz was tried and convicted anyway. Chapman already has been transferred from Bellevue to a jail cell.

But still, our unwillingness to separate the question of *whether* an accused committed the act he is charged with from the more problematical question of *why* he did it strikes me as wrongheaded. So does the notion that an otherwise criminal act is not a crime if it is the product of mental disorder.

You need look no further than last week's newspapers to see the mischief that can follow from this notion. I refer to the story, out of Chicago, that the man accused of beheading his girlfriend and mailing her toes to Gerald Ford and Alexei Kosygin has been recommended for release from the mental institution to which he was committed after the court found him innocent of murder by reason of insanity.

Psychiatrists say he is sane now, and, therefore, there is no further reason to keep him confined.

I'll grant that the acts of which he was accused were the product of a sick mind, if only because they were so singularly bizarre. But it wouldn't take much to convince me that nearly all of the most outrageous crimes are the products of sick minds. But again: so what? I'd be willing to let these crazies serve their statutory time in a mental lockup instead of the state pen, but that's about as far as I'd go .

My faith in psychiatry to cure these sickies is about on a par with my faith in the ability of prisons to rehabilitate the officially sane.

Sometimes the inmates of prisons and mental institutions get better; sometimes they don't. I count it a worthy thing to try to increase the number of inmates who do improve.

But why should that have any bearing on whether rapists and murderers and madmen serve out the time the law prescribes for their offenses? After all, we imprison people for what they have done, not for what they are, or what they fail to become.

[From the Washington Post]

MAN WHO BEHEADED WOMAN CALLED NO RISK NOW

CHICAGO, December 12.—Psychiatrists say a man who admitted beheading his girlfriend and mailing her toes to former president Gerald R. Ford and former Soviet premier Alexei Kosygin can be safely freed from a mental hospital.

Miguel Valdes, 41, of Melrose Park, was found innocent of the slaying by reason of insanity. He was diagnosed a paranoid schizophrenic and committed to a mental health center in June 1978.

"All the doctors who have contact with him say he should be released," said Richard Kling, Valdes' attorney.

However, Cook County prosecutors contend that Valdes who two weeks ago filed a motion asking for release, is still a potential danger to society.

"The doctors are nutty. When we committed him two years ago he had a list of 10 persons he wanted to kill and during a 1979 hearing he said he was glad he killed the two people," said Assistant State's Attorney Edward Ozog.

Valdes stabbed and killed Alicia Agsaoay, 37, of Elmwood Park, on April 3, 1977. The next day he fatally shot Dr. Jesus Lim, 42, of Elmwood Park.

Ozog said Valdes believed the two were involved romantically and killed them after learning that Lim lent Agsaoay money for a trip to the Philippines to visit her brother.

After killing Agsaoay, Valdes cut off her head and toes. He mailed the head to her brother. The package was recovered at a post office.

[From the Washington Post, Dec. 14, 1980]

RETURN TO SENDER

On the off chance you weren't paying attention to yesterday's paper, we reprint the lead paragraph of a UPI story pointing to a mighty breakthrough in the psychiatric art of prisoner-rehabilitaion. Here it is:

"CHICAGO, Dec. 12—Psychiatrists say a man who admitted beheading his girlfriend and mailing her toes to former president Gerald R. Ford and former Soviet premier Alexei Kosygin can be safely freed from a mental hospital."

How about that, rehabilitation fans? In order to appreciate the wonder of this cure, you need also to know that the poor unfortunate who committed these infractions (and which of us is perfect?) was himself committed to a mental health center only two years ago. Now someone is contending he is fit to get out, the "insanity," by reason of which he was found innocent of the murder in the first place, having evidently been dispelled or at least made tame.

The prosecutors in this case are apparently being perfectly terrible reactionaries about it, even to the extent of using the most inflammatory unclinical and unenlightened language to describe their feelings. "The doctors are nutty," one said to the UPI reporter. This prosecutor could conceivably have been hung up on the fact that in addition to mailing all those toes around the world, the inmate in question had also mailed the head of his formerly beloved to her brother—said head having been "recovered at a post office," which only goes to show you that not only our criminal justice system, but also our postal system is working.

So this is a real good news story. And for that reason we hate to mar it with a negative, doubting note. It's just that we ourselves have the tiniest little nagging apprehension about the release. What exactly, we find ourselves wondering, does a person *have to do* to get pronounced unfit to be out, and how many of these others, the relatively safe ones who just go on an innocent extremities-mailing binge, are already riding the bus and standing in the checkout line?

Assuming there are other nervous Nellies like ourselves, we sugest, to be constructive abut it, that a safe and fair solution would be for the particular doctors who have reached this compassionate decision to take legal, moral and financial responsibility for and custody of the released inmate themselves if their counsel is followed. That way he could just move in with one of them and provide an inspiring daily reminder of their curative powers. New policy: return to sender.

[From the ABC News, 20/20 Program, June 19, 1980]

TRANSCRIPT

HUGH DOWNS. When you hear that someone accused of murder, even multiple murder, pleads insanity, says he was out of his head when he killed, what do you think? Do you believe him? And if you do believe him, do you think a murderer should be hospitalized instead of sent to prison? Those are questions facing more and more lawmakers in more and more states across the country. A few spectacular murder cases have raised the question, and now several states are considering tightening up insanity pleas or wiping them out altogether.

Only last week a law was drafted in New York State limiting the rights of defendants to use the insanity plea. Tonight Geraldo Rivera, who is a lawyer as well as a reporter, examines this serious question. Geraldo?

GERALDO RIVERA. Thank you, Hugh. It's because of its uneven application and because it sometimes allows people to escape responsibility for their crimes that the defense of insanity is one of the most controversial and emotional issues now confronting judges, juries, lawyers and legislators.

It's rooted in legal history, and it's founded on the concept that a person should not be held legally responsible for a criminal act unless they knew what they were doing and knew it was wrong. It all sounds very fair and logical, until someone gets away with murder, by reason of insanity.

Cut To.

LAWYER. When it comes right to the moment that the gun is shot, is it your opinion that the defendant went from sane to insane and back to sane in a matter of . . . two or three seconds?

WITNESS. That is correct.

RIVIERA. It is the legal defense of last resort, something of a standing joke around the courthouse. When your client's been caught with a smoking gun in his hands, standing over a dead body, immediately call in the psychiatrist.

Ronny Zamora of Miami Beach, for instance, shot and killed his 82 year old neighbor. His attorneys argued that Zamora did not know right from wrong, that the fifteen year old was temporarily insane because he'd been watching . . . too many violent television programs.

LAWYER. . . . let Your Honor voir dire the psychiatrists and say, Has there ever been a case where too much television has caused insanity. And they will answer, Yes, and the victim is Ronny Zamora. And let the jury hear that.

RIVERA. The jury was unimpressed, however, with his unique claim; Zamora was found guilty on all counts.

JUDGE. It is the sentence of this court that you be confined in the State Department of Corrections for the remainder of your natural life.

RIVERA. John Wayne Gacy is another example where the plea of insanity was rejected. Gacy murdered thirty-three young men. The bodies were discovered in shallow graves under his house in the suburbs of Chicago. His lawyers, confronted by enough victims to fill a morgue, attempted to prove Gacy was not guilty by reason of insanity. They failed; he was convicted.

Kenneth Bianchi was arrested in connection with the Hillside Strangler murders in Los Angeles. Once in custody, Bianchi sought to convince authorities that it was really his alter-ego, a devil inside him named "Steve", who actually committed the murders.

He was interviewed for fifty-six hours by court-appointed psychiatrists. While under hypnosis Bianchi allegedy spoke with his other personality.

Cut to.

KENNETH BIANCHI. You . . . you've got to know that what happens to me happens to you.

. . . You should have known that it was against the law to kill somebody. . . . It is.

RIVERA. Of the six psychiatrists who conducted the interviews, two said Bianchi was faking, two said he was insane, while two others said they weren't sure. Bianchi finally pled guilty to five of the ten murders.

Cut to.

EDMUND KEMPER III. Contrary to popular belief or insistence, I don't like killing.

RIVERA. Edmund Kemper spent five years in the Atascadero State Hospital for the Criminally Insane, after murdering both his

grandparents. After hundreds of interviews with State-appointed psychiatrists, Kemper was released from the mental institution.

As he told reporter Ed Leslie of Station KGO, he had figured out what the psychiatrists wanted to hear.

KEMPER. People think that Atascadero just releases maniacs right and left. I don't think they've ever released another multiple murderer before me. And I had one hell of a . . . of a grilling. I mean they just didn't casually say, Well let's get rid of him, we need the bed. You know, they never do that with murderers.

RIVERA. Within three years of his release from the institution, Kemper had killed his mother and seven other women. He's now serving a life sentence in prison.

David Berkowitz, the Son of Sam killer, who terrorized New York City for a year with his random murders of six young women and unsuccessful attempts on the lives of seven others, at first claimed he was driven to murder by demons and by talking dogs. Earlier this year from his prison cell in Attica, Berkowitz told reporters that he had invented the story of the demons and that it was all an attempt to justify his crimes.

In 1971 Thomas Vanda of suburban Chicago was convicted of stabbing a teenage neighbor as she slept. Four years later while on probation, Vanda murdered another teenage girl, with a hunting knife. He successfully pled insanity and was sent to a mental institution. After just a year in the institution and over the objection of his parents and his own attorneys, a judge decided Vanda was no longer dangerous and ordered him released.

Two years ago in May, Vanda murdered again. This time the victim was Marguerite Bowers, a twenty-five year old college student. I spoke with her brother Tom.

Cut to.

RIVERA. We have a copy of the letter that Vanda wrote to another inmate entitled, "How to Beat a Murder Rap by Insanity," and he . . . he goes on to say, "When the doctors ask you what the voices were saying . . . to you, make it look convincing, do not give any indication that you're faking. Act crazy in front of the staff." When you heard this, . . . it must have made the whole experience so much more horrible for you.

TOM BOWERS, Victim's Brother: It convinced me; that was probably the single most convincing piece of evidence that, he knew what he was doing and he was . . . sure that he would get away with it . . . that society had labeled him as somebody who would never be held accountable. And he knew he could get away with it.

RIVERA. Twenty-five year old Roy Schlutzky of Long Island, New York had a history of anti-social paranoid tendencies. Because he was so obviously dangerous, his attending psychiatrist wanted him committed to a secure facility. But Schlutzky refused to go.

Two days after termination of psychiatric care, he killed sixteen year old Richard Lesser, a stranger, chosen at random. Schlutzky stabbed him twenty-seven times with a Bowie knife. He was later found not guilty by reason of insanity.

Seymore Lesser, the victim's father, talked about what might happen if Schlutzky is again released.

Cut to.

SEYMORE LESSER, Victim's Father: . . . He can go out and do what he wants again . . . he's got a license. He's got a license to do whatever he wants at this point.

RIVERA. Even to murder.

LESSER. Particularly to murder. The more horrendous, the more consistent with his . . . claim for . . . insanity. You see, if . . . if it's more brutal, as he did with Richard, twenty-seven times, he butchered him up . . . they had to put him in a bag. They couldn't . . . if we had . . . (choked up) . . . There was nothing to . . . to bury.

Cut to.

Senator PADAVAN, Rep. N.Y. The problem is, number one, people are literally getting away with murder, ending up going to state hospitals which they don't belong in, and the average stay that we've identified is about four years. And then they are deemed cured, magically, and they're back out in society. I think that's a travesty of justice. We've got to do something about that.

RIVERA. According to the New York State Department of Mental Hygiene, in the last ten years there's been an almost five hundred percent increase in the number of successful insanity pleas. Because of the growing controversy, nine states are attempting to modify, or even abolish, the defense of insanity.

SUPER. New York, California, Illinois, Florida, New Hampshire, Tennessee, Washington, Mississippi, Louisiana.

There is unfortunately an incredible lack of any comprehensive statistics to tell us just exactly how well or how badly the system is working for dealing with the criminally insane. But based on the available information, certain assumptions are possible.

First of all it would seem as if white people are a lot more likely to be successful in invoking the not guilty by reason of insanity defense than black people are, and women more successful than men. And then there seem to be certain categories of individuals that are more successful. One of those can be loosely defined as people the judge or jury can feel sorry for.

(Visual.)

Two recent California cases vividly illustrate this point. One involved Dan White, a former San Francisco supervisor who killed Mayor Masconey, and Supervisor Harvey Milk. The other case involved Richard Chase of Sacramento, a former mental patient who killed six people, mutilated them, and then drank their blood. In both cases psychiatric testimony was presented that, because of their mental condition at the time they committed the murders, neither man should be held responsible.

In Dan White's case the jury agreed. The once popular family man, this Mr. Nice Guy, was found to have 'diminished capacity' and his crime was reduced from double murder to manslaughter. In other words, the jury felt sorry for him.

Richard Chase on the other hand, the so-called Vampire Killer, was extremely unpopular. The jury was afraid that if he was found to be insane, eventually he would be released. His bloody murders were certainly insane acts, but the jury convicted Chase and sentenced him to death.

The second group of people who get special preference when it comes to being found not guilty by reason of insanity seems to be mothers who kill their own babies.

Jane is a twenty-five year old woman who killed her two month old daughter by drowning her. Last year she was acquitted by reason of insanity, and released on the condition that she become a patient here, at the Isaac Ray Outpatient Clinic in Chicago.

BONNIE GENE PRICE, Counselor. And the voices kept telling you to do this?

JANE. (over) . . . to do it, to kill my child.

PRICE. And you couldn't help but listen to them?

JANE. To the voices.

PRICE. Mmhmm, were they loud voices?

JANE. They was loud voices.

RIVERA. Jane now lives with her parents. She holds a job and has been given visitation rights to see her surviving child who was just a year old when Jane drowned her daughter.

Barbara Weiner runs the Isaac Ray Center . . .

BARBARA WEINER, Isaac Ray Outpatient Clinic. For over 3,000 years it has been recognized that there are certain people who are so insane that they can't form the intent, which is a crucial element of a crime, and therefore you should not hold them responsible. I don't think our society is ready to say that the patients that we have here, a woman who has murdered her child, you should instead go to jail for the rest of your life when you didn't know what you were doing.

RIVERA. According to the experts, the third category that gets special preference is police officers, and one of the nation's most glaring cases happened here, involving a New York City Policeman named Robert Toursney. It happened in 1976, on Thanksgiving:

Shortly before Midnight, Officer Toursney and his partner responded to a radio report that there was an armed man inside this building.

As they were leaving the building, fifteen year old Randolph Evans and several friends tried to talk with the officers. Patrolman Toursney responded by pulling his service revolver and killing the fifteen year old. Toursney was later found not guilty by reason of insanity, and today he's a free man.

The controversy over the misuse of the insanity defense has drawn considerable criticism to the profession of psychiatry. Dr. Alan Stone is past President of the American Psychiatric Association:

Cut to.

Dr. ALAN A. STONE. For most of history the insanity defense has been a cruel hoax because whether you were found not guilty by reason of insanity or not made no difference. You were simply locked up for the rest of your life. Recently, as a result of legal decisions that have nothing whatsoever to do with psychiatry, it now is the situation that if you're found not guilty by reason of insanity, there is a real burden on the State to keep you locked up. So now for the first time, the courts, the judges, the lawyers, the public . . . is facing the fact that somebody who's . . . committed some awful crime can be found not guilty by reason of insanity, and in a reasonably short time be back on the streets.

RIVERA. New York psychiatrist Abraham Halpern says we should consider abolishing the insanity defense:

Dr. ABRAHAM HALPERN. Look at the situation. An individual is acquitted by reason of insanity. He is told that he is not accountable; he is not blameworthy, he has committed no crime. He is acquitted; he is not guilty. He goes to a hospital and he feels a lot better and wants to leave.

It's very, very difficult now for somebody to prove, as Dr. Stone has indicated, that he is dangerous, that he ought to stay. This is an impossible burden to put on psychiatrists, or indeed to put on the criminal justice system. It ought not to be. The person who is dangerous ought not to be acquitted . . . by reason of insanity.

RIVERA. The insanity defense is not only used in murder cases. Garrett Brock Trapnell for instance never committed a violent crime, but he is an expert on the abuse of the insanity defense.

Time and time again Trapnell has escaped responsibility for . . . his various criminal acts. He's done it by being judged not guilty by reason of insanity. And in fact Trapnell is crazy . . . like a fox.

Convicted of sky-jacking and attempted escape, Trapnell is currently serving a life sentence here at the Federal Penitentiary in Marion, Illinois. In May of 1978 he convinced his girlfriend to hijack a helicopter to get him out of prison. She was killed in the attempt.

Until psychiatrists finally figured out that Trapnell was fooling them, he had managed to avoid criminal responsibility for seven bank robberies, a jewel heist, the theft of

four hundred thousand dollars worth of travelers checks and assorted other crimes. In his criminal career, he's been serviced by more than thirty lawyers and has been examined by over forty psychiatrists. His colorful life story has already been made into a book, and is soon to be a major motion picture.

Cut to.

RIVERA. . . . tell me you figured out the system?

GARRETT BROCK TRAPNELL. Well, I was . . . I was faced with a circumstance . . . I could either . . . be mentally ill, and do a year and a half in a mental institution, or I could do . . . twenty years in prison. Now I chose the year and a half in a mental institution. I think the choice showed that I was sane.

RIVERA. So, it was definitely a conscious act on your part to manipulate that system, to beat them at their own game, so to speak.

TRAPNELL. So to speak.

RIVERA. Do you think you're crazy?

TRAPNELL. Who am I to refute the word of professors of psychiatry?

RIVERA. If everyone who claimed insanity was as healthy as Gary Trapnell, the great debate would be over, and everyone would be sent to prison. But it's not that simple. Most of the criminally insane people we met are legitimately sick.

(Visual).

Do you think that you're still sick?

GLEN. (offense: strong arm robbery): . . . I'm getting sicker, by being here. I was well and ready to leave now, and had hopes and . . . plans and . . . now (chuckle), it's a joke.

RIVERA. Dennis, why did you try and kill the sheriff?

DENNIS (offense: assault): I was experiencing a complete physical and emotional breakdown. . . . I was naked and, and running . . . through the streets, you know so . . . a really severe psychotic episode, and . . .

RIVERA. Were you crazy, Dennis?

DENNIS. Yeah, I was completely out of my mind. I was mad.

RIVERA. And now?

DENNIS. Now it's, it's been two years and . . . I think I've fully recovered.

RIVERA. Atascadero does a good job of protecting society from the mentally ill. This maximum security facility has experienced only a handful of escapes. Critics maintain, however, that while society is protected, the rights of the insane to care and treatment are not as well protected. The hospital has been called a sanitary dungeon in which security, rather than treatment, is stressed.

Many of the patients found not guilty by reason of insanity claim that they've spent more time here than they would've spent in prison, if they had been convicted of their crimes.

(Visual).

Mental patients in an institution are usually stabilized with potent medication as well as their therapy. Once they're released, however, they often receive none of that critical medical care or treatment. As a result, we really have no clear picture of the percentage of criminally insane patients who actually go on to commit other criminal acts once they've been released from an institution.

But the cases we hear about are often so horrible, they lead at least to the impression that these totally avoidable crimes are happening all the time.

Ted Frank, for example, was another model patient at Atascadero. He'd been sent there in 1974 as a mentally disordered sex offender. Frank ultimately convinced his attending therapist that he was cured, and indeed, after his release the so-called model patient even returned to the institution to lecture other patients on the wonders of being well.

But the reality was far different. Within a month of his release Ted Frank had tortured, raped and then murdered a two year old baby named Amy Sue Sykes. A search of his home uncovered a diary in which Frank also admitted to sexually molesting almost 150 other children. A California court has recently sentenced Ted Frank to death.

Cut to.

RIVERA. How did Theodore Frank fool you?

DIANE SERBER, Therapist. You know, I think that when you talk about sex offenders, it's very, very difficult to assess when a, when they're ready to leave. On the other hand, like a mentally ill person, they're hallucinating, they're seeing things, they're hearing things. You look at 'em; you know there's a problem. With a sex offender it's much more difficult, because they look like . . . everyone else.

RIVERA. Because mental hospitals are not prisons, security is a continuing problem and here at the Creedmoor Psychiatric Center in New York City it's a continuing local scandal. Patients must by law be kept in the least restrictive surroundings possible, and sometimes, particularly here at Creedmoor, that's resulted in patients, sometimes dangerous patients, simply walking out of here.

A month ago the community around the psychiatric center was up in arms over the frequent escapes of patients labeled dangerous. And that security problem has existed for years. A few winters back, for example, WABC Investigative Newsman John Johnson found one civil patient going fishing.

Cut to.

JOHN JOHNSON. You're going fishing?

PATIENT. Yes.

JOHNSON. . . . Do they know that you're outside?

PATIENT. Huh?

JOHNSON. Does the administration here know you're outside?

PATIENT. (over) That's allright, I go out for a walk.

JOHNSON. You go out for a walk?

PATIENT. Yeah.

JOHNSON. And you're going . . . where're you going now?

PATIENT. . . . I, . . . I'm going for a walk around the grounds.

RIVERA. Many professionals in mental health feel that people who have committed violent crimes, even if they are insane, belong in prison, with psychiatric care provided for them there. The heart of the problem though is not the lack of sufficient walls, guards and gates to keep in the criminally insane; it is not that simple. The entire system is in disarray. It's torn by the fundamental conflict between the constitutional rights of the patients to care and treatment, and the rights of the rest of society to protection against their potentially insane acts.

EDMUND KEMPER III. You know if I ever did get out again, it would be a precedent that's never been set before: a two-time multiple murderer released, y'know, for a third chance. Y'know, and . . . how responsible is society, y'know, to my comforts and, and y'know my future . . . as opposed to the families of my victims?

RIVERA. It's outrageous when someone can manipulate judges or psychiatrists and escape criminal responsibility, by pretending to be insane. It's just as upsetting when a released mental patient goes on to commit some terrible crime. What most of us want is a system in which crimes are definitely punished. That does not mean the defense of insanity should be completely abolished; aside from being unjust, that would also be unconstitutional.

But the defense should be allowed only reluctantly, and only in that fraction of one percent of all criminal cases in which a defendant is truly mentally ill and had absolutely no idea of what he or she was doing. Even then the dangerously ill should be cared for in a secure facility, and then not released without a court hearing.

DOWNS. That way, Geraldo, perhaps both society and the rights of the mentally ill to care and treatment would be better protected.

[From the Yale Law Journal, April 1963]

ABOLISH THE "INSANITY DEFENSE"—WHY NOT?*

(By Joseph Goldstein† and Jay Katz‡)

PROLOGUE

The criminal law is one of many mechanisms for the control of human behavior. It defines conduct that is thought to undermine or destroy community values. It seeks to protect the life, liberty, dignity, and property of the community and its members by threatening to deprive those who contemplate such conduct and by inflicting sanctions upon those who engage in proscribed activity.

The sanctions authorized, whether intended to punish, restrain, reform, or deter, constitute a deprivation of life, liberty, dignity and property. Because of the inherent conflict between the values ultimately to be preferred and their deprivation by the sanctions authorized, the criminal law has sought to minimize the consequences of this paradox through rules of law which restrict the state's authority to sanction.

One of these rules, a fundamental restriction, is that before the state can inflict sanctions it must overcome the presumption of innocence which favors all of us—by establishing beyond a reasonable doubt each element of the offense charged. By defining crimes in terms of such traditionally material elements as a voluntary act purposely causing a specific result, the laws seeks to exclude from criminal liability those who are not "appropriate" subjects for a given sanction or indeed for any sanction.

Thus, if the state fails to produce evidence which establishes each element of the crime or, put another way, if the accused introduces evidence which leaves in doubt any material element, no sanction can be imposed for the crime charged. To illustrate, the state cannot hold a person criminally responsible for murder if there was no causal relationship between the shot fired and the death of the victim; or if the shot was fired without the intent (mens rea) to kill, even though death was caused by the shot; or if the victim did not die even though the shot was fired with intent to kill. Recognizing that the elements of a given offense may not be sufficiently precise to exclude all those who ought to be free of criminal liability, the state, in order to maximize preferred values, has formulated exceptions which are called defenses.

Thus, to prevent the state from actually encouraging criminal activity, the defense of police entrapment, for example, will relieve an offender of liability even if each element of the crime is established beyond doubt. The evaluation of any device for sorting out who is and who is not an appropriate subject for criminal sanction requires identifying the values in issue. No device haunts the criminal law and clouds the values it seeks to reenforce more than "insanity" as a basis for relieving persons of criminal responsibility.

WHY BEFORE WHAT

Criminal responsibility results when each element of a crime charged against an accused has been established beyond a reasonable doubt. Only then is the state authorized to exercise its power to impose certain specified sanctions against the offender.[1] "Insanity at the time of the offense," we are told, relieves the offending actor of criminal re-

---

Footnotes at end of article.

sponsibility.[2] This may mean either that "insanity" is to serve as *evidence* which precludes establishing a crime by leaving in doubt some material element of an offense, or that "insanity" is to serve as a *defense* to a crime, even though each of its elements can be established beyond doubt, in order to protect a preferred value threatened by the imposition of an authorized sanction.[3]

"Insanity," however formulated, has been considered a defense.[4] An evaluation of such a defense rests on first identifying a need for an exception to criminal liability. Unless a conflict can be discovered between some basic objective of the criminal law and its application to an "insane" person, there can be no purpose for "insanity" as a defense. Until a purpose is uncovered, debates about the appropriateness of any insanity-defense formula as well as efforts to evaluate various formulae with respect to the present state of psychiatric knowledge are destined to continue to be frustrating and fruitless.[5]

To demonstrate the kind of analysis we think essential to a meaningful examination of insanity as a defense, we first analyze the concept of the defense of self-defense.[6] If a person intentionally kills another human being, the criminal law, in support of a basic community objective—the protection of human life—defines such conduct as a crime and authorizes as the sanction life imprisonment of the offender.[7] Few would disagree about the ultimate objective of protecting life and about the elements of the crime,[8] but there may be little or no consensus about the sanction [9] or its purposes. The imposition of life imprisonment rests on a variety of oft-conflicting and mutually inclusive assumptions shared by legislature, court and community about deprivation of liberty and its psychological significance. As *punishment*, life imprisonment is assumed to satisfy and channel the community's need to express feelings of vengeance or desires to effect rehabilitation of the offender.[10] As *restraint*, it is assumed to remove from circulation a person who is believed likely to kill again, to provide a structure for satisfying community vengeance or to offer an institutional opportunity for care and rehabilitation. As *rehabilitation*, it is assumed to reduce the likelihood that he who has killed once will kill again, to increase the likelihood of returning a life to the community or to provide a basis for rationalizing community vengeance. As a *deterrent of others*, it is assumed to reinforce internal controls over the urge to kill through external threats of punishment, restraint, rehabilitation and the accompanying stigma.[11] Thus, via a variety of assumptions which may or may not be related to an actual impact on any one offender or on other members of the community, life imprisonment becomes the sanction for one who kills another intentionally.

Intentional killing in defense of self, however, is an exception which denies the state authority to impose the sanction authorized for intentional killings. This exception "rests upon the necessity of allowing a person to protect himself from . . . [lethal] harm in cases where there is no time to resort to the law for protection." [12] Thus under circumstances where, by definition, one of two must die, the law seeks a solution least incompatible with its overall objective of protecting life by preferring the life of the "law-abiding" citizen. He is the man whose inner controls reinforced by the threat of external sanction hold in check his urge to kill except when his own life is jeopardized by someone not so deterred. The law thereby recognizes that the sanction for intentional killings is drained of any deterrent strength when external reality's system for protecting life fails and in turn releases internal reality's instinct for self-preservation.[13] Conceptualized another way, authorizing the potential victim to kill his assailant constitutes a sanction which may be assumed to fulfill punitive, restraining, and deterrent functions in the service of the community's objective to safeguard human life.[14] To generalize, when a situation is identified in which the application of the authorized sanction would conflict with basic criminal law objectives, a rational system of law would seek first to articulate why such an application is inappropriate and then to formulate the exception to accord with those objectives.

Having articulated the reasons for an exception to liability for intentional killings in defense of self, it becomes possible to evaluate such competing formulations as for example, (a) the actor's "right to stand his ground" and meet force with force,[15] or (b) the actor's duty to "do everything reasonably possible to escape [without resorting] to the use of deadly force." [16] Formulation (a) subordinates the value of safeguarding human life whenever possible to the values of safeguarding a threatened man's right to protect his interest in property as well as his right to be free from the stigma or uneasiness associated with cowardice. Formulation (b) prefers the value of safeguarding human life whenever possible. Conceptually, and probably in practice, the second formulation would best serve to protect both lives. Its application would restrict to a minimum the number of instances where reality leaves no choice and forces favoring one life over another.[17] The sanction authorized for intentional killings, therefore, remains operative except in those situations where the choice is between one of two lives, not between, for example, life and an interest in property, pride or reputation.[18]

With this framework for identifying a need for an exception to criminal liability and for evaluating formulations to meet such a need, we turn to an examination of the "insanity defense."

Like self-defense, the insanity defense applies, theoretically at least, only to persons against whom each of the elements of the offense charged could be established.[19] Like defense of self, the defense of insanity, if successfully pleaded, results in "acquittal." [20] But unlike the acquittal of self-defense which means liberty, the acquittal of the insanity defense means deprivation of liberty for an indefinite term in a "mental institution." [21] And unlike the purpose of self-defense, the purpose of the insanity defense either has been assumed to be so obvious as not to require articulation or has been expressed in such vague generalizations as to afford no basis for evaluating the multitude of formulae.

Neither legislative report, nor judicial opinion, nor scholarly comment criticizing or proposing formulations of the insanity defense has faced the crucial questions: "What is the purpose of the defense in the criminal process?" or "What need for an exception to criminal liability is being met and what objectives of the criminal law are being reinforced by the defense?"

The Royal Commission on Capital Punishment (1953) disposed of this issue with apodictic assurance by asserting:

"We make one fundamental assumption, which we should hardly have thought it necessary to state explicitly. . . . It has for centuries been recognized that, if a person was, at the time of his unlawful act, mentally so disordered that it would be unreasonable to impute guilt to him, he ought not to be held liable to conviction and punishment under the criminal law. Views have changed and opinions have differed, as they differ now, about the standards to be applied in deciding whether an individual should be exempted from criminal responsibility for this reason; but the principle has been accepted without question . . ." [22]

Thus the Royal Commission reiterated the well-rounded proposition that "if a person was . . . mentally so disordered that it would be unreasonable to impute guilt to him, he ought not to be held [guilty, i.e.] liable to conviction and punishment." The Commission neither sought to identify the purposes of not imputing guilt to "individuals whose conduct would otherwise be criminal," [23] nor did it ask why and when does the imputation of guilt for being "mentally so disordered" become "unreasonable." The Commission had no basis for evaluating the changing views and opinions "about the standards to be applied," and the principle "accepted without question" remained without meaning.

A century earlier the pattern had been firmly set of accepting an insanity defense without asking: "Why an insanity defense?" or more appropriately, "What objective of the criminal law suggests the need for an exception to the law's general application—an exception which would require taking into account the mental health of the offender?" In M'Naghten's Case (1843), the House of Lords, acting in their judicial, not legislative capacity, asked only what is the law respecting alleged crimes committed by persons afflicted with "insane delusions." [24] And the innovating court in Durham (1954), after promulgating a new formulation gave no guide to evaluating its adequacy beyond noting:

"Our collective conscience does not allow punishment where it cannot impose blame. . . .

"The legal and moral traditions of the western world require that those who, of their own free will and with evil intent (sometimes called mens rea), commit acts which violate the law, shall be criminally responsible for those acts. Our traditions also require that where such acts stem from and are the product of a mental disease or defect . . . moral blame shall not attach, and hence there will not be criminal responsibility. . . ." [25]

The court leaves without definition and without identification of purpose such ambiguous words as "punishment," and "blame," [26] and thus in effect only says "he who is punishable is blameworthy and he who is blameworthy is punishable." Never established is the relevance of these words to a defense which would compel supposedly different dispositions of persons involved in activity labeled "criminal." Moreover, the court, though not blinded by precedent, left unasked and therefore unanswered: "What underlies the 'legal and moral traditions' in 'our collective conscience' which prevents us from inquiring why a rule is required?"

Likewise, the American Law Institute (1956–1962) provides no basis for evaluating its formula for a defense of insanity.[27] With focus on consequences, it "explains," echoing the Royal Commission and Durham, that the purpose of the insanity defense is "to discriminate between the cases where a punitive-correctional disposition is appropriate and those in which a medical-custodial disposition is the only kind that the law should allow." [28] Once "punitive" is substituted for "custodial" and "correctional" for "medical," or however the terms are juxtaposed in the ALI statement, the "distinctions" seem to disappear.[29] Moreover, criteria for evaluating what constitutes an "appropriate" disposition for either category remain unarticulate. Thus those characteristics which determine who is to fit into which category remain unidentified. This may be because the distinctions between alternative responses are never clarified. Finally, a Committee of distinguished doctors, lawyers and religious leaders, appointed by the Governor of New York (1958) to improve the defense of insanity, pronounced before formulating their rule:

"We are unanimously of the view that

Footnotes at end of article.

there are compelling practical ethical and religious reasons for maintaining the insanity defense; . . . We believe . . . that it is entirely feasible to cast a formulation which . . . will sufficiently improve the statute to meet working standards of good morals, good science, and good law." [30]

Never identified are the reasons labeled "practical," "ethical," and "religious," or the standards labeled "good morals," "good science" and "good law."

In enunciating yet another formula for insanity, the Court of Appeals for the Third Circuit in United States v. Currens (1961) contaminates its thinking by confusing and merging the inherently incompatible concepts of "insanity" as a defense to a crime with "insanity" as evidence to cast doubts on a material element of an offense. It suggests, as did the court in Durham, that some relationship exists between the insanity defense and mens rea, a material element of every major crime. In Currens, mens rea (guilty mind) is used to mean that criminal liability rests.

". . . on the assumption that a person has a capacity to control his behavior and to choose between alternative courses of conduct. . . . When a person possessing capacity for choice and control, nevertheless breaches a duty . . . he is subjected to . . . sanctions not because of the act alone, but because of his failure to exercise his capacity to control. . . . For example, an act of homicide will create no liability, only civil liability or varying criminal liability depending on the nature of the mental concomitant of the act. Generally the greater the defendant's capacity for control of his conduct and the more clearly it appears that he exercised his power of choice in acting, the more severe is the penalty imposed by society." [31]

And the court criticized the Durham and M'Naghten formulae because:

"They do not take account of the fact that an "insane" defendant commits the crime not because his mental illness causes him to do a certain prohibited act but because the totality of his personality is such, because of mental illness, that he has lost the capacity to control his acts in the way that the normal individual can and does control them. If this effect has taken place he must be found not to possess the guilty mind, the mens rea, necessary to constitute his prohibited act a crime." [32]

At this point the court by the force of its own reasoning should have been led to say:

"Without the essential element of mens rea, there is no crime from which to relieve the defendant of liability and consequently, since no crime has been committed, there is no need for formulating an insanity defense." [33]

But instead the court actually concludes:

"We are of the opinion that the following [insanity] formula most nearly fulfills the objectives just discussed. . . ." [34]

The court uses the word "crime" first to mean "dangerous conduct" and then, without alerting itself to the shift, to mean technically the establishment beyond doubt of each material element of an offense. With this sleight of thought the court shifts focus from "insanity" as a defense to conduct "otherwise criminal" to insanity as evidence to negate an element essential to categorizing the accused's conduct "criminal."

In announcing a new formula for the insanity defense, the court fails to recognize that there is no need for such a defense to remove criminal liability since it has concluded that no crime is established once mental illness (however defined) has cast doubt on mens rea (however defined). Conceptually, at least, outright acquittal would result and instructions to the jury would reflect a time, pre-M'Naghten, when evidence of mental condition, like any other relevant evidence, was used to cast doubt on a material element of the crime.[35]

In our efforts to understand the suggested relationship between "insanity" and *"mens rea"* there emerges a purpose of the "insanity defense" which, though there to be seen, has remained of extremely low visibility. That purpose seems to be obscured because thinking about such a relationship has generally been blocked by unquestioning and disarming references to our collective conscience and our religious and moral traditions. Assuming the existence of the suggested relationship between "insanity" and *"mens rea,"* the defense is not to absolve of criminal responsibility "sick" persons who would otherwise be subject to criminal sanction. Rather, its real function is to authorize the state to hold those "who must be found not to possess the guilty mind *mens rea,"* [36] even though the criminal law demands that no person be held criminally responsible if doubt is cast on any material element of the offense charged.[37] This, in some jurisdictions, is found directly reflected in evidentiary rules making inadmissible testimony on mental health to disprove a state of mind necessary to constitute the crime charged.[38] A more dramatic expression of abandoning the rule of proof of each element beyond a reasonable doubt has slipped into those instructions to the jury which advise the ordering of deliberations:

"If you find the defendant not guilty by reason of insanity, you will render a verdict of not guilty by reason of insanity.

"If you do not so find, then you will proceed to determine whether he is guilty or innocent of one or both of the offenses charged on the basis of the same act.

"[T]here are two principal issues for you to determine. The *first* is his mental condition and the *second* is whether he committed the offenses charged or whether he is innocent of them. . . .

"Now, on the issue of guilt or innocence of the offenses charged, the essential elements of the first count or the housebreaking count, *if you do not find the defendant not guilty by reason of insanity*, are as follows:

"First, that the defendant broke and entered or entered without breaking . . . the place described in the indictment;

"Second, that the place entered was occupied or belonged to the complaining witness; and,

"Third, that he *intended* to steal or commit the offense of larceny. . . ." [39]

Yet, since a verdict of not guilty results in outright release and a verdict of not guilty by reason of insanity results in incarceration, jury instructions must require *first* a determination of innocence or guilt and *second* a consideration of the insanity issue *only* after a determination that guilt can be established. [40]

What this discussion indicates, then, is that the insanity defense is not designed, as is the defense of self-defense, to define an exception to criminal liability, but rather to define for sanction an exception from among those who would be free of liability. It is as if the insanity defense were prompted by an affirmative answer to the silently posed question: "Does *mens rea* or any essential element of an offense exclude from liability a group of persons whom the community wishes to restrain?" If the suggested relationship between *mens rea* and "insanity" means that "insanity" precludes proof beyond doubt of *mens rea* then the "defense" is designed to authorize the holding of persons who have committed no crime. So conceived, the problem really facing the criminal process has been how to obtain authority to sanction the "insane" who would be excluded from liability by an overall application of the general principles of the criminal law.

Furthermore, even if the relationship between insanity and "mens rea" is rejected, this same purpose re-emerges when we try to understand why the consequence of this defense, unlike other defenses, is restraint, not release. Even though each of the elements of an offense may be established, release will follow acquittal or dismissal if, for example, entrapment,[41] self-defense,[42] or the statute of limitations [43] are successfully pleaded. Assuming, then, that all elements of an offense are to be established before the insanity defense becomes operative, the question remains: "Why restrain rather than release?" Restraint cannot be attributed to potential "dangerousness" associated with the crime charged, no matter how serious, for that kind of "dangerousness" is characteristic of defendants whose defenses prevail.[44] The crucial variable leading to restraint seems to be the "insanity at the time of the offense," i.e., a fear of danger seen in the combination of "mental sickness" and "crime." This fear of freedom for those acquitted by reason of insanity comes sharply into focus at the close of the Currens decision. The court, uncertain of the consequences of such an acquittal for federal offenses outside of the District of Columbia, warns, in reversing the judgment of conviction: "[W]e are concerned with the disposition of Currens should he be found not guilty by reason of insanity. . . . In any event [in the light of doubt about the appropriate federal procedures for commitment] should Currens be acquitted at his new trial, the federal authorities should bring him and his condition to the attention of State authorities to the end that he may not remain in a position in which he may be a danger to himself or to the public." [45] That mandatory commitment, not release, generally follows the insanity defense becomes then particularly striking since, to the extent "insanity at the time of the offense" is related to "mental health at the time of acquittal," the state is authorized to select from the mentally ill those who require civil restraint for custody and care. Thus the insanity defense is not a defense, it is a device for triggering indeterminate restraint.

The real problem which continues to face legislators, judges, jurors, and commentators is how to restrain persons who are somehow feared as both crazed and criminal. This oft-unconscious fear has precluded thinking about "insanity" in terms of traditional principles of law, whether that "insanity" is conceptualized as doubt-casting evidence or as an independent defense. Though unpleasant to acknowledge, the insanity defense is an expression of uneasiness, conscious or unconscious, either about the adequacy of such material elements of an offense as "mens rea" and "voluntariness" as bases for singling out those who ought to be held criminally responsible, or it is an expression of concern about the adequacy of civil commitment procedures to single out from among the "not guilty by reason of insanity" those who are mentally ill and in need of restraint.

The problem of "whether there should be an insantity defense" or "how to formulate it" must continue unresolved as long as largely unconscious feelings of apprehension, awe, and anger toward the "sick," particularly if associated with "criminality," are hidden by the more acceptable conscious desire to protect the "sick from criminal liability." What must be recognized is the enormous ambivalence toward the "sick" [46] reflected in conflicting wishes to exculpate and to blame; to sanction and not to sanction; to degrade and to elevate; to stigmatize and not to stigmatize; to care and to reject; to treat and to mistreat; to protect and to

Footnotes at end of article.

destroy.[47] Such ambivalence finds expression in legislative proposals that persons acquitted by reason of insanity be "committed to the custody of the commissioner of correction [not mental health] to be placed in an appropriate institution of the department of correction [not mental health] for custody, care, and treatment."[48] And such ambivalence has blinded[49] lawmakers to their tampering, via the insanity defense, with fundamental principles on which their authority to impose criminal liability presently rests. By obfuscating the function of the defense in terms of the ethical and religious values of Western civilization to care for the "sick," lawmakers have not only misled themselves but psychiatrists as well who, confused by their own ambivalence, have willingly, defiantly, unquestioningly, or with misgivings, joined in these deliberations. Psychiatrists have participted in the process without identifying the role they must play and without forcing the process to clarify that role.[50] The plea to care for the "sick" muffles the call to segregate the "dangerous" whom the criminal law can not hold. With the real problem so disguised, the fruitless and frequent searches for new formulas and the frustrating and fighting exchanges between law and psychiatry become somewhat understandable. Thus, another low visibility purpose of the insanity defense emerges. That purpose is to keep sufficiently ambiguous the consequences of the defense, whatever the formula, so as to prevent at least conscious recognition that the prerequisites of criminal liability have been abandoned.[51]

Lawmakers could decide to implement any or all of these now visible purposes. Provisions could be drafted to restrain: (1) persons charged with a crime who are feared to be dangerous and/or felt to need care and destigmatization because of a suspicion of criminality coupled with a findings of mental sickness; (2) persons acquitted outright of a crime who are feared to be dangerous and/or felt to need care and destigmatization because of criminality coupled with a finding of mental sickness; and (3) persons who have committed[52] a crime and are feared to be dangerous and/or felt to need care and destigmatization because of criminality coupled with a finding of mental sickness.

In promulgating such provisions, answers are required to a series of questions (set forth in the Epilogue) which must be consciously posed about restraint—restraint in what kind of an institution and for how long; restraint for what crimes and for what mental illnesses; and restraint at whose initiative and at what stage in the process.[53] In responding to these questions lawmakers will be pouring meaning into "the fear of dangerousness," "the need for care," and the "need for destigmatization." And if obfuscating developments are to be avoided, lawmakers not only must acknowledge wishes to neglect, stigmatize, punish and destroy, but they must also consider the extent to which these wishes are to be realized through restraint. Awareness that such wishes constantly press for satisfaction in conflict with preferred goals should stimulate the development of formulations and procedures designed to maximize consciously thought-through preferences and to deflect those conflicting and otherwise unconscious wishes which might gain satisfaction under cover of these preferences.[54] The operational significance of key phrases in any formulation will thus be shaped and joined by the values to be preferred.

But such efforts by lawmakers to formulate an exception to criminal liability would be premature and may prove unnecessary. More appropriately they should consider abolition of the insanity defense.[55] and examine "voluntariness" and "mens rea" as requisites of criminal liability. Enormous confusion about the meanings of these concepts in the definition of offenses and their construction by the courts suggests that there will be great difficulty in establishing the purposes of these material elements as devices for sorting out those to be or not to be subject to criminal sanction.[56] The need for such concepts must be examined in terms of the overall objectives of a law of crimes. Furthermore, abolition of the "insanity defense" should force focus on the why and the adequacy of criteria for civil commitment and discharge of the "mentally ill." The question underlying each of these examinations must be: "Who are to remain free of state intervention; who ought to be restrained, and for what purposes?" Ultimately this requires coming to terms with such emotionally-freighted concepts as "blame," "choice," "free will," "capacity-to-control," and "determinism," all of which, in the criminal law, have remained slogans of exhortation beyond the reach of definition. Will such explorations lead to an instanity defense? If they do, we must know why.

EPILOGUE

To illustrate the kinds of questions that the legislator or judge would have to pose and answer in promulgating and implementing any or all of the purposes identified, the third statement of purpose is analyzed. It calls for:

". . . the restraint of persons who have committed a crime and are feared to be dangerous and/or felt to need care and destigmatization because of criminality coupled with a finding of mental sickness."[57]

Any formulation and provision for its invocation and implementation would require answers to a series of questions which might be posed about restraint. In terms of the fear of dangerousness, of the need for care, and of the need for destigmatization, these questions focus on restraint in what kinds of institutions and for how long; restraint for what crimes and for what mental sicknesses; and restraint at whose initiative and at what stages in the process:

A. Restraint in what kinds of institutions?

1. If restraint is in response to the fear of dangerousness, are not institutions of the Department of Correction and of the Department of Mental Health equally satisfactory?

2. If restraint is in response to the need for care cannot correctional and mental health institutions be equally satisfactory if they are both oriented toward rehabilitation?[58] If the impact of the desire to neglect is to be minimized, should not restraint be conditioned on the availability of a therapeutic opportunity?[59]

3. If restraint is in response to the need for destigmatization are not correctional and mental health institutions equally unsatisfactory?[60]

4. If restraint in either the correctional or mental health systems are equally satisfactory, what values or policies should be weighed against the flexibility that might come with restraint in an easy transfer between both system?[61]

B. Restraint for what length of time?

1. If length of restraint is in response to the fear of dangerousness should restraint be authorized for an indeterminate period? If the impact of the need to neglect is to be minimized, should there be provision, in addition to habeas corpus, for the automatic review, annually or semi-annually, of each person restrained in terms of his present state of dangerousness?[62] If the impact of the urge to punish is to be minimized, should length of restraint be limited to the maximum sentence authorized for the crime committed?[63]

2. If length of restraint is in response to the need for care should restraint be authorized for an indeterminate period? If the impact of the need for neglect is to be minimized should provision, in addition to habeas corpus, be made for the automatic annual review and report to all interested parties (judge, defense attorney, etc.), of the continued availability and use of therapy? If the impact of the need for neglect is to be minimized should provision be made for establishing, reviewing and revising standards for therapeutic care?

3. If length of restraint is in response to the need for destigmatization should there be any restraint? If the impact of the need to stigmatize is to be minimized can procedures be developed to create an expectation in the community that release means a person is ready to participate in the life of the community?[64]

C. Restraint for what crimes?

1. If restraint is in response to the fear of dangerousness, should certain "less serious or less dangerous" offenses be excluded as a basis for such restraint?[65] If the impact of the urge to punish is to be minimized, should not all crimes be included as the basis for such restraint?

2. If restraint is in response to the need for care, should not all crimes be included as a basis for restraint? If the impact of the need to neglect is to be minimized, should not all crimes be included as a basis for restraint?

3. If restraint is in response to the need for destigmatization and if the label of criminality added to the label of mental sickness increases stigma, should not all crimes be excluded as a basis for restraint? If, on the other hand, stigma is decreased by such an association should not all crimes be a basis for such restraint?

D. Restraint for what mental sicknesses?

1. If restraint is in response to the fear of dangerousness should certain "less dangerous" mental sicknesses as well as mental sicknesses currently unaccompanied by overt symptomatology be excluded as a basis for restraint?[66] If the impact of the urge to punish is to be minimized should restraint be limited to only those whose mental sickness could subject them to civil commitment?

2. If restraint is in response to the need for care should not all mental sicknesses be a basis for restraint?[67] If the impact of the need to neglect or to punish is to be minimized should all non-treatable mental sicknesses[68] as well as mental sicknesses currently unaccompanied by overt symptomatology be excluded as a basis for restraint?[69]

3. If restraint is in response to the need for destigmatization and if the label of mental sickness added to the label of criminality increases stigma, should not all mental sicknesses be a basis for restraint? If, on the other hand, stigma is decreased by such an association should not all crimes be a basis for such restraint?

E. Restraint at whose initiative and at what stages in the criminal process?

1. If restraint is in response to the fear of dangerousness should not the issue be subject to resolution at the initiative of any participant at any stage of the process? If the impact of the urge to punish as well as of the need for neglect, including that evidenced by the inertia of system maintenance.[70] is to be minimized should not restraint be authorized at the initiative of any participant but not before at least a finding by judge or jury that each of the material elements of the offense charged have been established? If the impact of the urge to punish is to be minimized must not evidence of mental sickness be admissible to cast doubt on such material elements as voluntariness (however defined) and mens rea (however defined)? If the impact of the need for neglect is to be minimized, must procedures be designed to encourage or force the review of the bases for continuing restraint?

Footnotes at end of article.

2. If restraint is in response to the need for care should not the issue be raised on the initiative of any participant at any stage of the process? If the possibility of treatment is hindered by the absence of personal motivation, should invocation of the process for determining restraint be limited to the defendant? [71] If the impact of the need for neglect is to be minimized should procedures be designed to permit and encourage interested participants to review and challenge on a regular basis the continuation of restraint in terms of current mental status, and the availability of treatment?

3. If restraint is in response to the need for destigmatization does it make any difference who invokes the process for restraint as long as the issue of restraint is resolved only after each of the material elements of the offense has been established? If the impact of the urge to stigmatize is to be minimized must not evidence of mental sickness be admissible to cast doubt on such material elements as voluntariness (however defined) and mens rea (however defined). If the impact of the urge to stigmatize is to be minimized should not the issue be subject to resolution without formally entering a verdict of guilty for the crime committed and procedures be designed to attribute to individuals released from such restraint the capacity to participate adequately in the life of the community?

In responding to these questions lawmakers will be pouring meaning into the fear of dangerousness, the need for care, and the need for destigmatization. Though we would neither endorse nor propose them, some of the possible meanings which might be given these factors are found for example in such a formulation as:

"Defendant shall be restrained in a mental health institution, whether or not therapeutic opportunities exist, for a period not to exceed the maximum sentence that might be imposed for the crime committed upon a finding by judge or jury:

"a. that the defendant has committed, in the light of all relevant evidence including evidence of mental health, murder, robbery, rape, assault, forgery or the use of narcotics; and

"b. that he suffers from a mental sickness for which civil commitment is not available and which is manifested by current overt symptomatology.

"This procedure may be invoked by judge, prosecutor or defense counsel."

Other formulations as well as the conclusion that there is no need for such a procedure in the criminal process might result depending not only upon the answers to the questions posed, but more fundamentally upon the results of a detailed examination of the function, meaning and desirability of mens rea and voluntariness as requisites of criminal liability.

As in music so in law, to recover lost passages it may be appropriate to suggest da capo al fine.

FOOTNOTES

†Professor of Law, Yale Law School.

‡ Associate Professor of Law and Associate Clinical Professor of Psychiatry, Yale Law School.

[1] [T]he meaning of responsibility is liability to punishment; and if criminal law does not determine who are to be punished under given circumstances, it determines nothing.

2 STEPHEN, A HISTORY OF THE CRIMINAL LAW OF ENGLAND 183 (1883).

Misleadingly simplified, the material elements of an offense are a *voluntary act* performed with *purpose, knowledge, recklessness or negligence causing with purpose, knowledge, recklessness or negligence a result.*

On proof beyond a reasonable doubt and the material elements of an offense see MODEL PENAL CODE §§ 1.12, 1.13 (Proposed Official Draft 1962) and MODEL PENAL CODE Comments at 108–35 (Tent. Draft No. 4, 1955).

Sanctions are imposed by the state presumably against, or at least without regard to, the wishes of the individual being deprived. Implicit in the word "sanction" . . . is involuntariness. In this context involuntariness is not treated as a psychological concept. Thus, for example, imprisonment is a sanction even if imposed on a person who commits a crime in order to be punished or in order to escape cold and hunger in the "warmth" of a jail.

Goldstein, J., *Police Discretion Not to Invoke the Criminal Process: Low Visibility Decisions in the Administration of Justice*, 69 YALE L.J. 543, 544 n.4 (1960).

[3] Louisell & Hazard, *Insanity as a Defense: The Bifurcated Trial*, 49 CALIF. L. REV. 805 (1961).

[4] "Insanity is a defense to be asserted at the trial as any other defense; . . ." *People* v. *Heirens*, 4 Ill. 2d 131, 142, 122 N.E.2d 231, 238 (1954). *But see* note 20 *infra*. On sanity apparently perceived as a material element of each offense, possibly as *mens rea* itself, and on the burden of proving the defense of insanity, see *United States* v. *Currens*, 290 F.2d 751, 761 (3d Cir. 1961) and Tatum v. United States, 190 F.2d 612, 615 (D.C. Cir. 1951):

When lack of mental capacity is raised as a defense to a charge of crime, the law accepts the general experience of mankind and presumes that all people including the accused is sane. . . . [But] as soon as some evidence of mental disorder is introduced . . . sanity like any other fact, must be proved as part of the prosecution's case beyond a reasonable doubt.

On proving insanity rather than sanity beyond reasonable doubt, see *Leland* v. *State*, 343 U.S. 790 (1952), and see note 33 *infra*.

[5] The quantitative extent of such debate is suggested by the entries which appear under the heading "Insanity" in the INDEX TO LEGAL PERIODICALS. Since the *Durham* case (1954) over 150 articles have appeared whose titles indicate that they deal with some aspect of the insanity-defense controversy. The *Durham* case itself has provoked almost 50 law journal notes or extended discussions. As of Jan. 1963, according to SHEPARD'S FEDERAL REPORTER CITATIONS, *Durham* had been cited—both favorably and unfavorably—in approximately 140 cases.

[6] The threat to self can, of course, be treated as evidence casting doubt on voluntariness as a requisite element of the crime of murder.

[7] We exclude from our analysis of self-defense the death penalty which may accompany a finding of murder in the first degree, for feelings about that sanction are likely to distort the already complex issues to be unravelled. See SELLEN, THE DEATH PENALTY, A REPORT FOR THE MODEL PENAL CODE PROJECT OF THE AMERICAN LAW INSTITUTE (1959), and generally ROYAL COMMISSION ON CAPITAL PUNISHMENT 1949–1953, REPORT, CMD 8932 (1953), CRIMINAL LAW 304–48.

Moreover, we exclude consideration of certain lesser included or other offenses for which the defendant may be convicted if each of the elements of some other offense is established beyond doubt.

[8] As one of the great objectives of all law, and particularly criminal law, is the protection of life, it follows that homicide must, as a rule, be unlawful, so that it is necessary to consider only those cases in which it is lawful. 3 STEPHEN, *op. cit. supra* note 1, at 11.

[9] On the dispute about the death penalty as an appropriate sanction see SELLIN, and ROYAL COMMISSION ON CAPITAL PUNISHMENT, *op. cit. supra* note 7.

[10] Life imprisonment does not necessarily mean imprisonment for life. See, *e.g.*, CONN. GEN. STAT. ch. 961, § 54–125 (1958) making persons sentenced to life imprisonment eligible for parole on the expiration of a minimum of 20 years.

[11] Psycho-analysts have drawn attention to three main motives in our attitude towards law-breakers and criminals that operate in addition to the conscious reasons that are more readily recognized. . . . In the first place, the criminal provides an outlet for our (moralized) aggression. In this respect he plays the same role as do our enemies in war and our political scapegoats in time of peace. That some very real satisfaction is to be found in this way is shown by the vast crowds that attended public executions. . . . In the second place, the criminal by his flouting of law and moral rule constitutes a temptation to the id; it is as though we said to ourselves, "if he does it, why should not we?" This stirring of criminal impulses within ourselves calls for an answering effort on the part of the super-ego, which can best achieve its object by showing that "crime doesn't pay." This in turn can be done most conveniently and completely by a demonstration on the person of the criminal. By punishing him we are not only showing him that he can't "get away with it" but holding him up as a terrifying example to our own tempted and rebellious selves. Thirdly . . . is the danger with which our whole notion of justice is threatened when we observe that a criminal has gone unpunished. The primitive foundation of this notion . . . lies in an equilibrium of pleasures and pains, of indulgence and punishment. This equilibrium is disturbed, either if the moral rewards of good conduct are not forthcoming . . . or if the normal punishments of crime are absent or uncertain . . . . It is to prevent disturbance of the latter kind that we insist that those who have broken the law shall be duly punished. Through their punishment the equilibrium is re-established, without it (so we dimly feel) the whole psychological and social structure on which morality depends is imperilled.

FLUGEL, MAN, MORALS AND SOCIETY 169–70 (1945).

On the oft-conflicting purposes reflected in authorized sanctions see, Goldstein, J., *Police Discretion Not to Invoke the Criminal Process: Low Visibility Decisions in the Administration of Justice*, 69 YALE L.J. 543, 544–50 (1960).

[12] 5 WIS. LEGISLATIVE COUNCIL, JUDICIARY COMMITTEE REPORT ON THE CRIMINAL CODE 44 (1953).

[13] The law acknowledges that killings in defense of self are not motivated by aggressive instincts out of control but by the ego's self-preservative interest, *i.e.*, to keep itself alive and protect itself from external danger. The ego is moderator between id, superego and reality demands. Law and its implementation, as viewed by ego, is part of reality. Law is recognition that id out of control would destroy us as individuals and as a society. Law, then, as a social control device, rests on the assumption that man's ego and superego need assistance for the control of id.

[14] The assailant is thus assumed not to be deterred by the authorized sanction of deadly force in self-defense which for some might have a deterrent potential.

[15] People v. Tomlins, 213 N.Y. 240, 244, 107 N.E. 496, 498 (1914).

[16] 5 WIS. LEGISLATIVE COUNCIL, *op. cit. supra* note 12, at 45. See State v. Abbott, 36 N.J.

63, 174 A.2d 881 (1961), for discussion of duty to retreat.

[17] Application of such a formulation might contribute through time to a redefinition of courage—with running away rather than using deadly force being perceived as a courageous act. See HARTMANN, PSYCHOANALYSIS AND MORAL VALUES 31–32 (1960).

[18] MODEL PENAL CODE § 3.04 (Proposed Official Draft 1962) provides in pertinent part:

(b) The use of deadly force is not justifiable . . . unless the actor believes that such force is necessary to protect himself against death, serious bodily harm, kidnapping or sexual intercourse compelled by force or threat; nor is it justifiable if: . . .

(ii) the actor knows that he can avoid the necessity of using such force with complete safety by retreating or by surrendering possession of a thing to a person asserting a claim of right thereto or by complying with a demand that he abstain from any action which he has no duty to take, except that:

(1) the actor is not obliged to retreat from his dwelling or place of work, unless he was the initial aggressor or is assailed in his place of work by another person whose place of work the actor knows it to be; and . . .

(c) Except as required by paragraphs . . . (b), a person employing protective force may estimate the necessity thereof under the circumstances as he believes them to be when the force is used, without retreating, surrendering possession, doing any other act which he has no legal duty to do or abstaining from any lawful action. . . .

For another problem in evaluating the impact of a statute's self-defense formulation see, *e.g.*, WIS. STAT. ch. 940.05 (1955):

MANSLAUGHTER. Whoever causes the death of another human being under any of the following circumstances may be imprisoned not more than 10 years: . . .

(2) Unnecessarily, in the exercise of his privilege of self-defense. . . .

[19] See the proposed charge to the jury formulated in Durham v. United States, 214 F.2d 862, 875 (D.C. Cir. 1954); People v. Gorschen, 51 Cal. 2d 716, 726–34, 336 P.2d 492, 498–503 (1959); MODEL PENAL CODE § 4.01 (Proposed Official Draft 1962). *But see* note 39 *infra* and accompanying text.

[20] STEPHEN has observed that:

[I]n very ancient times proof of madness appears not to have entitled a man to be acquitted, at least in case of murder, but to a special verdict that he committed the offense when mad. This gave him a right to a pardon. The same course was taken when the defence was killing by misadventure or in self-defence.

2 STEPHEN, A HISTORY OF THE CRIMINAL LAW OF ENGLAND 151 (1883).

Francis Bacon observed that the Crown, in exercising its power to pardon, will spare those only whose case, could it be foreseen, the Law itself may be presumed willing to have excepted out of its general Rules which the Wisdom of Man cannot possibly make so perfect as to suit every particular Case.

3 BACON, A NEW ABRIDGEMENT OF THE LAW 802 (1736), reprinted in CRIMINAL LAW at 247.

[21] Before 1800 in England, and in most jurisdictions in this country, if an accused person was found to be irresponsible by reason of insanity he was forthwith acquitted and no special order looking to his safety or that of society was made. But by the Criminal Lunatics Act of 1800, the jury, in acquitting such a defendant, accused of a felony, was required to find specially whether such a person was insane at the time of the commission of the act, and whether he was acquitted upon that ground. Upon such a finding, the defendant was committed and detained "during His Majesty's pleasure."

GLUECK, MENTAL DISORDER AND THE CRIMINAL LAW 392–93 (1925).

Similar legislation was enacted by most of the American states soon afterward, although in some states not until a century later.

WEIHOFEN, INSANITY AS A DEFENSE IN CRIMINAL LAW 263. See also *id.* at 262–332 (1933).

For the current situation, see MODEL PENAL CODE § 4.08 (Proposed Official Draft 1962) and Comments to § 4.08 at 199–201 (Tent. Draft No. 4, 1956); Lynch v. Overholser, 369 U.S. 705, 714–20 (1962); D.C. CODE § 23–301 (1955); Durham v. United States, 214 F.2d 862, 876 n.57 (D.C. Cir. 1954); and Goldstein J. & Katz, *Dangerousness and Mental Illness—Some Observations On the Decision to Release Persons Acquitted By Reason of Insanity*, 70 YALE L.J. 225 (1960); and see notes 45 & 48 *infra*.

[22] ROYAL COMMISSION ON CAPITAL PUNISHMENT, 1949–1953 REPORT CMD. 8932, at 98 (1953).

[23] MODEL PENAL CODE § 4.01, Comment at 156–60 (Tent. Draft No. 4, 1956).

[24] [T]o establish a defence on the ground of insanity, it must be clearly proved that, at the time of the committing of the act, the party accused was labouring under such a defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing; or if he did know it, that he did not know he was doing what was wrong.

Daniel M'Naghten's Case, 4 St. Tr. N.S. 847, 931, 8 Eng. Rep. 718, 722 (H.L. 1843).

[25] Durham v. United States, 214 F.2d 862, 876 (D.C. Cir. 1954).

[A]n accused is not criminally responsible if his unlawful act was the product of mental disease or mental defect.

We use "disease" in the sense of a condition which is considered capable of either improving or deteriorating. We use "defect" in the sense of a condition which is not considered capable of either improving or deteriorating and which may be either congenital, or the result of injury or the residual effect of a physical or mental disease.

Id. at 874–75.

[26] In all civilized communities, ancient or modern, some forms of insanity have been regarded as exempting from the punishment of crime, and under some circumstances at least, as vitiating the civil acts of those who are affected with it. The only difficulty, or diversity of opinion consists in determining who are really insane, in the meaning of the law. . . .

RAY, A TREATISE ON THE MEDICAL JURISPRUDENCE OF INSANITY 2 (4th ed. 1860).

[27] MODEL PENAL CODE § 4.01 (Proposed Official Draft 1962) provides:

(1) A person is not responsible for criminal conduct if at the time of such conduct as a result of mental disease or defect he lacks substantial capacity either to appreciate the criminality [wrongfulness] of his conduct or to conform his conduct to the requirements of law.

(2) As used in this Article, the terms "mental disease or defect" do not include an abnormality manifested only by repeated criminal or otherwise anti-social conduct.

In conflict with the exclusion in (2), the chief reporter of the Model Penal Code has said:

[T]he category of the irresponsible must be defined in extreme terms. The problem is to differentiate between the wholly *non-deterrable* and persons who are more or less susceptible to influence by law. (Emphasis supplied.)

Wechsler *The Criteria of Criminal Responsibility*, 22 U. CHI. L. REV. 367, 374 (1955). How to select from the non-deterrables who have committed a crime those non-deterrables who are to be relieved of criminal responsibility is not clarified by the Model Penal Code's exclusion from the term "mental disease or defect . . . an abnormality manifested only by repeated criminal or otherwise anti-social conduct."

In criticizing this exclusion in the Model Penal Code, the California's SPECIAL COMMISSIONS ON INSANITY AND CRIMINAL OFFENDERS, FIRST REPORT (July 7, 1962) has warned that:

The law, whether judicial or statutory, must avoid accepting a psychiatric label or classification as determinative of the question of responsibility for all future cases. In every case whether or not a defendant has a mental disorder and the manner in which the mental disorder affected his ability to control his conduct is, and properly should be, a question of fact. Furthermore, we find it difficult to conceive of a case involving a mentally disordered defendant where the *"only"* evidence of that mental disorder is the defendant's repeated criminal conduct. Moreover, the fact that a defendant is a repeated offender is sometimes the best evidence that he is unable to conform his conduct to the law and it seems paradoxical to say that this evidence is insufficient to justify such a finding.

Id. at 27. See also Currens v. United States, 290 F.2d 751, 761–63 (3d Cir. 1961).

[28] MODEL PENAL CODE § 4.01, Comment at 156 (Tent. Draft No. 4, 1956).

[29] Similar confusion in judicial reasoning is reflected in the following statement: Two policies underly [sic] the distinction in treatment between the responsible and the non-responsible: (1) It is both wrong and foolish to *punish* where there is no blame and where *punishment* cannot correct. (2) The community's security may be better protected by hospitalization . . . than by imprisonment.

Williams v. United States, 250 F.2d 19, 25–26 (D.C. Cir. 1957). (Emphasis supplied.)

"Punish" and "punishment" are used in policy statment "(1)" to suggest different underlying meanings or concepts. The word is first used as a symbol of the vengeance or retribution function of the criminal law and then used as a symbol of the rehabilitation function. *Query:* if "punishment," however defined, were an effective rehabilitative device would the court find its use objectionable even if blameworthiness could not be established? Is involuntary confinement for an indefinite period in a mental hospital any less a deprivation, as the court seems to imply in policy statement "(2)," than involuntary confinement for a limited period in prison?

Goldstein, J., *Police Discretion Not to Invoke the Criminal Process: Low-Visibility Decisions in the Administration of Justice*, 69 YALE L.J. 543, 546 (1960).

[30] REPORT OF THE GOVERNORS COMMITTEE ON THE DEFENSE OF INSANITY, 140 N.Y.L.J. No. 88, p. 4 (Nov. 5, 1958), No. 89, p. 4 (Nov. 6, 1958) (emphasis supplied).

The Committee proposed:

(1) A person may not be convicted of a crime for which he is not responsible.

(2) A person is not responsible for criminal conduct if at the time of such conduct as a result of mental disease or defect he lacks substantial capacity:

(a) to know or appreciate the wrongfulness of his conduct; or

(b) to conform his conduct to the requirements of the law. . . .

(3) The terms "mental disease or defect" do not include an abnormality manifested only by repeated criminal or otherwise anti-social conduct.

Cf. note 27 *supra*.

[31] United States v. Currens, 290 F.2d 751, 773 (3d Cir. 1961).

[32] *Id.* at 774 (emphasis supplied).

[33] It is of the utmost importance for the protection of the liberty of the subject that a court should always bear in mind that, unless a statute, either clearly or by necessary implication, rules out *mens rea* as a constituent part of a crime the Court should not find a man guilty of an offense against the criminal law unless he has a guilty mind.

Lord Goddard, C.J. in Brend v. Wood. L 62 T.L.R. 462, 463 (1946), quoted with approval in Lim Chin Aik v. Reginam, 1 All. E.R. 223, 228 (1963).

[34] 290 F.2d at 774. For its test the court proposed:

The jury must be satisfied that at the time of committing the prohibited act the defendant, as a result of mental disease or defect, lacked substantial capacity to conform his conduct to the requirements of the law which he is alleged to have violated.

Ibid.

[35] As early as 1724, Justice Tracy, instructing the jury on "guilty mind" as a requisite element of murder in the Trial of Edward Arnold said:

[T]he shooting . . . for which prisoner is indicted, is proved beyond all manner of contradiction; but whether this shooting was malicious, that depends upon the sanity of the man. That he shot, and that willfully [is proved]; but whether maliciously, that is the thing; that is the question; whether this man hath the use of his reason and sense? . . . [G]uilt arises from the mind, and the wicked will and intention of the man. If a man be deprived of his reason, and consequently of his intention, he cannot be guilty; and if that be the case, though he had actually killed . . . he is exempted from punishment; punishment is intended for example, and to deter other persons from wicked designs; but the punishment of a madman, a person that hath no design, can have no example.

16 State Trials 596, 764 (1724). The paragraph goes on to construe narrowly the kind of evidence which might negative "guilty mind."

On the other side, we must be very cautious; it is not every frantic and idle humour of a man, that will exempt him from justice, and the punishment of the law. When a man is guilty of a great offense, it must be very plain and clear, before a man is allowed such an exemption; therefore it is not every kind of frantic humour or something unaccountable in a man's actions, that points him out to be such a madman as is to be exempted from punishment: it must be a man that is totally deprived of his understanding and memory, and doth not know what he is doing, no more than an infant, than a brute, or a wild beast, such a one is never the object of punishment; . . .

Id. at 764–65. See note 21 *supra* on such acquittals being accompanied by release not restraint and note 45 *infra* on the confusion over the consequences in the federal system.

[36] The court comes close to acknowledging this in United States v. Currens, 290 F.2d 751, 767 (1967). "The throwing of the mentally ill individual from the jail back into the community, untreated and uncured, presents a great and immediate danger."

[37] See the excellent article Silving, *Mental Incapacity in Criminal Law*, 2 CURRENT LAW AND SOCIAL PROBLEMS 1 (1961): "Were the assertion that insanity excludes intent taken seriously, no plea of insanity would be necessary. Yet it is required in our law." *Id.* at 13.

[38] For differing views of this issue see *Fisher* v. *United States*, 328 U.S. 463, 473, n.12 (1946); *State* v. *Fuller*, 229 So. C. 439, 444, 93 S.E.2d 463, 466 (1956); *State* v. *Di Paolo*, 34 N.J. 279, 168 A.2d 401, 409–10 (1961); and MODEL PENAL CODE § 4.02 (Proposed Official Draft 1962) providing:

(1) Evidence that the defendant suffered from a mental disease or defect is admissible wherever it is relevant to prove that the defendant did or did not have a state of mind which is an element of the offense.

[39] *Durham* v. *United States*, Record on Retrial under the new rule—reprinted in CRIMINAL LAW at 775–76 (emphasis supplied).

Reflecting the same confused view about insanity and its relationship to criminal intent is the concept of diminished responsibility which in capital cases provides:

[T]f the jury found (1) that the accused suffered from a mental disorder not amounting to insanity sufficient to excuse him from criminal responsibility . . . and (2) that such mental disorder deprived him of the requisite "sound memory and discretion" essential for conviction of first degree murder, it could convict him of the lesser crime of second degree murder.

In *Stewart* v. *United States*, 214 F.2d 879, 882 (D.C. Cir. 1954), the court rejected this concept.

If the mental elements of an offense must be proven beyond doubt there would be no need for a concept of diminished responsibility.

But see note 19 *supra* and accompanying text.

[40] Under a bifurcated trial system an accused must be found guilty before the insanity defense can be invoked and evidence of mental health is admissible to prove or disprove elements of the offense charged. *People* v. *Gorshen*, 51 Cal. 2d 716, 336 P.2d 492 (1959).

[41] See *Sherman* v. *United States*, 356 U.S. 369 (1958)

. . . If [the defendant] is to be relieved from the usual punitive consequences, it is on no account because he is innocent of the offense described. . . .

The courts refuse to convict an entrapped defendant not because his conduct falls outside the proscription of the statute, but because, even if his guilt be admitted, the methods employed on behalf of the Government to bring about conviction cannot be countenanced.

Id. at 380. (Mr. Justice Frankfurter concurring.) And see Donnelly, *Judicial Control of Informants, Spies, Stool Pigeons and Agent Provocateurs*, 60 YALE L.J. 1091, 1098–1115 (1951).

[42] See notes 7–18 *supra* and accompanying text.

[43] See Note, *The Statute of Limitations in Criminal Law: A Penetrable Barrier to Prosecution*, 102 U. PA. L. REV. 630 (1954).

[44] On the presumption of innocence and the maximum that it is better to let a guilty man escape than to condemn an innocent one see BENTHAM, A TREATISE ON JUDICIAL EVIDENCE 196–98 (1825). The other side of the presumption-of-innocence coin is proof beyond reasonable doubt as a requisite to criminal liability. See Curley v. United States, 160 F.2d 229 (D.C. Cir. 1947). On the duty of the police not to enforce the substantive law of crimes unless the criminal process can be invoked within bounds set by constitution, statute, and court decisions see Goldstein J., *Police Discretion Not to Invoke the Criminal Process: Low Visibility Decisions in the Administration of Justice*, 69 YALE L.J. 543, 554–62 (1962).

[45] United States v. Currens, 290 F.2d 757, 776 (3d Cir. 1961):

Court of appeals have different in their views as to available procedure in the event that a person is found not guilty of a federal criminal charge by reason of insanity. See *Pollard v. United States*, 6 Cir. 282, F.2d 450, 464, Order of Issuance of New Mandate, 6 Cir. 1960, 285 F.2d 81 . . . . but compare *Sauer v. United States*, 9 Cir. 1957, 241 F.2d 640, 651–52 n.32. . . .

Earlier in its opinion the court quotes with approval from BIGGS, THE GUILTY MIND 144–45 (1955):

[T]he mental competency of recedivists should be questioned by realistic means at the earliest possible stage. So long as courts judge criminal responsibility by the test of knowlege of right and wrong, psychotics who have served prison terms or are granted probation are released to commit increasingly serious crimes, repeating crime and incarceration and release until murder is committed. Instead of being treated as ordinary criminals, they should be confined to institutions for the insane at the first offense and not be released until or unless cured.

Id. at 767.

Similarly this fear coupled with the possibility of an ironic twist prompts Judge Hastie in his dissent in *Currens* to note:

If we should affirm the judgment below, as I think we conscientiously can, the result of appellant's conviction and the consequent invocation of the Youth Correction Act would be his confinement for an appropriate period in a psychiatric institution for such treatment and supervision as are best calculated, in the light of our present medical knowledge, to accomplish his rehabilitation and cure. On the record this result would be good for the appellant and good for society. On the other hand, as the majority opinion recognizes, it is doubtful whether the federal authorities could require the restraint and psychiatric treatment of the appellant if he should be retried and, by reason of his mental illness, found not guilty. I think we need not and, therefore, should not thus risk the release of one found to be a criminal psychopath when restraint and treatment seem desirable both medically and socially.

For these reasons I would affirm the conviction and confinement of the appellant . . . .

Also see dissent of Justice Clark in *Lynch* v. *Overholser*, 369 U.S. 705, 720, 735 (1961).

[A] person who has been shown to have committed an act resulting in serious harm to a member of the community, and who is also shown to be irresponsible by reason of mental disorder, ought to be the subject of an even more thorough-going inquiry as to his risk to society than the responsible offender. This is so, of course, because by definition such a person lacks the capacity for individual self-control that is ultimately society's most secure protection.

State of California, SPECIAL COMMISSIONS ON INSANITY AND CRIMINAL OFFENDERS, FIRST REPORT 31 (July 7, 1962).

This report comes close to verbalizing the fears and concerns of the community and attempts to resolve or gives the appearance of resolving the conflict between relieving a person of criminal liability and compusorily holding him for care and custody as a mentally ill person in a maximum security unit of the correctional system by separating, as if they were clearly separable, a finding of no criminal responsibility from its consequences, which is a special hearing for such acquittals, not all acquittals, to determine present dangerousness. It sugests that the defendant alleged to be mentally ill presents two questions: First, whether he ought to be condemned by a criminal conviction, and second, whether he is such a substantial risk to the public safety that he must be securely confined.

Id. at 20.

Since the question of criminal responsibility is a legal question, the ultimate decision in a particular case is properly to be made by the judicial system and not by the medical profession.

Id. at 21.

Upon finding that a defendant is not criminally responsible for the act with which he is charged, an inquiry immediately ought to be made whether he is a substantial present risk to the safety of the public. The inquiry should be squarely directed to the question of whether the defendant is dangerous. This is a different question than whether he is "insane" within the meaning of the rules defining his accountability under the criminal law. If he appears to be dangerous, he should be committed to secure custody. And he should be so committed without regard to whether he is "psychotic," whether he "knows right from wrong" or, indeed, whether he is effectively treatable by presently developed therapeutic techniques. The point is

that he is dangerous and should not be let loose on society.

Id. at 31.

Similarly,

The only proper verdict is one which ensures that the person who suffers from the disease is kept secure in a hospital so as not to be a danger to himself or others. That is, a verdict of guilty but insane.

Bratty v. *Att'y-Gen. for N. Ireland,* (1961) 3 All E.R. 523, 533 (H.L.).

For the purposes of the criminal law there are two categories of mental irresponsibility, one where the disorder is due to disease and the other where it is not. The distinction is not an arbitrary one. If disease is not the cause, if there is some temporary loss of consciousness arising accidentally, it is reasonable to hope that it will not be repeated and that it is safe to let an acquitted man go entirely free. But if disease is present the same thing may happen again, and therefore, since 1800, the law has provided that persons acquitted on this ground should be subject to restraint. The acquittal is now given in the illogical and disagreeable form of the verdict, "Guilty but insane" . . .

Hall v. *Baxter,* (1958) 1 Q.B. 277, 285–86 (1957) (CA). See note 48 *infra.*

[46] For an idealized sociological perception of the sick, see PARSONS, THE SOCIAL SYSTEM 436–37 (1951). On the confusion between "sick" and "criminal" in literature and law, see CRIMINAL LAW 253–83; see also Goldstein, J. & Katz, *Dangerousness and Mental Illness: Some Observations on the Decision to Release Persons Acquitted by Reason of Insanity,* 70 YALE L.J. 225 (1960).

The writer [in 1945] heard state hospital doctors frankly admit that the animals of near-by piggeries were better fed, housed and treated than many of the patients in their wards. He saw hundreds of sick people shackled, strapped, strait-jacketed and bound to their beds; he saw mental patients forced to eat meals with their hands because there were not enough spoons and other tableware to go around—not because they could not be trusted to eat like humans. He saw them crawl into beds jammed close together, in dormitories filled to twice or three times their normal capacity. He saw, in institution after institution, cold unappetizing food placed before patients at mealtime—food that patients either wolfed down to get the ordeal over quickly or else left untouched.

He saw black eyes and bruises which were reported to the writer to have been received at the hands of fellow patients or attendants. He saw court records and hospital accident lists indicating that brutality against patients, while not as common as occasional newspaper exposés might suggest, was of shocking frequency. Occasional accounts of fatal beatings of mental patients attested to the end-results of some of this treatment.

DEUTSCH, THE MENTALLY ILL IN AMERICA 449 (2d ed. 1949).

[47] [A]mbivalence: love and hatred directed toward the same person at the same time.

Ambivalence, which is due to the dual orientation of a man as an individual and as a member of society, is universal. In fact, the more one loves another, the more the narcissistic nucleus of the personality hates the loved object. Under normal conditions, however, one of these attitudes is deeply buried. This is intelligible, because there is perhaps no more perplexing situation than to hate whom you love or love whom you hate. . . . In ordinary life the repressed hatred of a person one loves may break through when one feels betrayed by him.

ALEXANDER, FUNDAMENTALS OF PSYCHOANALYSIS 107–08 (1948).

[48] *Report of the Governor's Committee on the Defense of Insanity,* 140 N.Y.L.J., 4 (Nov. 5, 6, 1958).

In extreme cases, such as that of the homicidal offender, the security required must exceed that required for even the most dangerous convict. . . . [W]e recommend that the dangerous offender who has been acquitted by reason of mental disorder should be placed in the custody of the Department of Corrections at one of its medical facilities.

State of California SPECIAL COMMISSION ON INSANITY AND CRIMINAL OFFENDERS, FIRST REPORT 34 (July 7, 1962). See also MODEL PENAL CODE § 4.08 (Tent. Draft No. 4) providing commitment of persons acquitted by reason of insanity "to the custody of the Commissioner of Correction" or alternatively to the Commissioner of Mental Hygiene or Public Health. The official draft eliminates commitment to the Commissioner of Correction. MODEL PENAL CODE § 4.08 (Proposed Official Draft 1962).

Label the judicial process as one will, no resort to subtlety can refute the fact that the power to imprison is a criminal sanction. To view otherwise is self-delusion.

Courts should not, ostrichlike, bury their heads in the sand.

City of Canon City v. Merris, 137 Colo. 169, 174, 323 P.2d 614, 617 (1958).

Report of Commissioners Appointed Under a Resolve of the Legislature of Massachusetts, to Superintend the Erection of a Lunatic Hospital at Worcester and to Report a System of Discipline and Government for the Same. SEN. Doc. No. 2, Jan. 4, 1832, pp. 22, 23:

[The insane] . . . should be treated, not with a sole regard to the security of others, but with special reference also to their own misfortunes, and in a manner to shorten their duration, or where that is impossible, at least to mitigate their severity.

In view of these facts and considerations, the Commissioners cannot hesitate to recommend, that as soon as the Hospital at Worcester shall be prepared for the reception of the insane . . . all orders, decrees and sentences for the confinement of any lunatic, made by any Court . . . shall be so far modified, that said lunatics shall be committed to the custody of the Superintendent of the Hospital at Worcester, instead of being committed to any Jail or House of Correction, as heretofore required; and, furthermore, that all lunatics, who at the time when such proclamation is made, shall be confirmed in any Jail or House of Correction, under any order, sentence or decree of any Court, or any judicial officers, shall as soon as convenient and practicable, be removed to said Hospital . . . .

Reprinted in CRIMINAL LAW at 266.

On the situation in Massachusetts 125 years later so far as it concerns special custodial facilities for the "criminally insane" or the "insane criminal" who have been found incompetent to stand trial or who have been relieved of criminal liability see COMMONWEALTH OF MASSACHUSETTS, GOVERNOR'S COMMITTEE TO STUDY THE MASSACHUSETTS CORRECTIONAL SYSTEM, SECOND REPORT 47 (1956):

The level of care is low . . . that one is forced to conclude that Massachusetts is willing to abandon almost 1,000 persons who would, if not criminal or difficult to handle, be receiving the best medical care the Commonwealth can provide.

[49] In psychoanalysis, this would be called denial.

"[D]enial" refers . . . to the blocking of certain sense impressions from the outside world. If they are not actually denied access to consciousness, they at least have as little attention paid to them as possible and the painful consequences of their presence are partly nullified.

BRENNER, AN ELEMENTARY TEXTBOOK OF PSYCHOANALYSIS 100–01 (1955).

[50] See Goldstein, J. & Katz, *Dangerousness and Mental Illness: Some Observations on the Decision to Release Persons Acquitted by Reason of Insanity,* 70 YALE L.J. 225, 230–31 (1960).

[51] People v. Nash, 52 Cal. App. 2d 36, 52, 53, 338 P.2d 416, 426–27 (1959).

. . . excepting only in cases where the death penalty may be imposed, it is relatively unimportant to society and to the accused whether the determination as to criminal responsibility *insofar as it may rest on the issue of sanity* is made at the time of initial trial or later. The immediately important question for both the state and the defendant is this: Did the defendant commit the act charged? If he committed it, sane or insane, he should be held under restraints adequate and appropriate to the circumstances. If the circumstances require actual confinement it is not at the moment important what name be applied to the institution. The character of the supervision and study to be given the accused is important.

Similarly in relation to so-called sex psychopath statutes:

. . . The main purpose of the Act [though civil in nature] is to protect society against the activities of sexual psychopaths. The secondary purpose is to rehabilitate the sexual psychopath. . . .

The emphasis that appellant places on the fact that he . . . now finds himself in San Quentin, possibly for life, is misplaced. This argument would be sound only were his confinement punishment. As we have already seen, the purpose of the confinement is to protect society and to try and cure the accused.

The arguments of appellant are without merit. The order appealed from is affirmed. People v. Levy, 151 Cal. App. 2d 460, 311 P.2d 897 (1957). *But see In re* Maddox, 351 Mich. 358, 88 N W 2d 470 (1957), and note 48 *supra.*

[52] The word "committed" is used rather than convicted so as to leave open for decision the question of the stage or stages of the process at which this issue may be raised. See Epilogue.

[53] In determining criteria for restraint, criteria for the release of persons so restrained would likewise have to be established. Any change of circumstance removing a crucial criterion of restraint would result in release. See Goldstein, J. & Katz, *supra* note 50.

[54] The world about us is much richer in meanings than we consciously see. These meanings are continually cutting across our ostensible criteria of judgment, and compulsively distorting the operations of the mind whose quest for an objective view of reality is consciously quite sincere. Good intentions are not enough to widen the sphere of self-mastery. There must be a special technique for the sake of exposing the hidden meanings which operate to bind and cripple the processes of logical thought. With practice one may wield the tool of free-fantasy with such ruthless honesty that relevant material comes very quickly to the focus of attention which we call "waking consciousness."

LASSWELL, PSYCHOPATHOLOGY AND POLITICS 36 (1960). See also FRANK, LAW AND THE MODERN MIND 22–31 (1949). Various defense mechanisms may interfere with awareness, for example, rationalization.

Rationalization means selecting the most acceptable from a complex of mixed motives to explain behavior. This permits the repression of other alien motives. Since the selected motives are suitable to the act, the unacceptable ones may be overlooked or denied. It is by no means correct to define rationalization as the invention of necessarily nonexistent motives; it is usually an arbitrary selection which passes speciously for the whole.

THE HONEST POLITICIAN'S GUIDE TO CRIME CONTROL

(By Norval Morris and Gordon Hawkins)

CRIME AND THE PSYCHIATRIST

The accused is, we are informed, "psychotic," and should therefore not be convicted of a crime. Further, though "acquitted" because of his mental illness, he is "dangerous" and should therefore be detained until he is both "cured" of his malady and no longer "dangerous." Lewis Carroll, in Through the Looking-Glass, offered a fine commentary on the superficialities involved in such a traditional response to the psychologically disturbed offender:

"What sort of insects do you rejoice in, where you come from?" the Gnat inquired.

"I don't rejoice in insects at all," Alice explained, "because I'm rather afraid of them—at least the large kinds. But I can tell you the names of some of them."

"Of course they answer to their names?" the Gnat remarked carelessly.

"I never knew them to do it."

"What's the use of their having names," the Gnat said, "if they won't anwer to them?"

"No use to them," said Alice; "but it's useful to the people that name them, I suppose. If not, why do things have names at all?"

Our program on crime and the psychiatrist is designed both to eliminate our present futile name-calling from the criminal justice system and to engage the psychiatrist in the treatment of certain dangerous criminals, a task he now eschews. We achieve these results by three ukases:

1. The defense of insanity shall be abolished. The accused's mental condition will be relevant to the question of whether he did or did not, at the time of the crime, have the *mens rea* of the crime of which he is charged. His mental condition will, of course, also be highly relevant to his sentence and his correctional treatment if he is convicted.

2. High priority shall be accorded to research aimed at the definition of social dangerousness and the development of prediction tables designed to deal with the "dangerous," psychologically disturbed offender.

3. Special institutions for the treatment of "dangerous" psychologically disturbed offenders, on the lines set out in this chapter, shall be established in all states.

The vast literature dealing with psychiatric or psychoanalytic criminology ranges from detailed studies of particular cases to attempts to explain all criminal behavior in terms of psychopathy. Yet apart from providing a profusion of new labels the practical contribution that psychiatry has made to the problems of defining and treating the offender is very limited. This is in part, but by no means entirely, the fault of psychiatrists themselves. There is no doubt, however, that the leaders in corrections and in criminal law policy accord the psychiatrist a slim role in treating the behavior disorders that come to the courts, the prisons, and other correctional agencies. The slight attention given to the role of the psychiatrist in the report of the President's Crime Commission, *The Challenge of Crime in a Free Society*, and in the same commission's task force report on corrections, is recent testament to this neglect. Let us be clear about this. We are not suggesting that the judges, academic and practicing lawyers, correctional administrators, and criminologists prominent in the criminal justice system are reactionary, or that they fail to keep up with the literature in the social sciences; their attitude to psychiatry is not usually one of ignorance, it is rather a thoughtful rejection. They see psychiatrists, as too frequently psychiatrists see themselves, merely as diagnosticians, classifiers, separating out from the bulk of criminal offenders those whose psychological disurbance is at the level of psychosis. Where, it is asked, are psychiatrists successfully treating criminal offenders? The psychiatrist is useful, it is agreed, in classification and in staff training, but he is not seen as a serious ally in the correctional process.

We do not share this view. We believe there has been gross failure both by leading forensic psychiatrists and by those responsible for the criminal justice system sufficiently to mobolize psychiatric resources for the prevention and treatment of crime. We believe part of the fault lies in our national monamania, our *folie à collective*, concerning criminal responsibility and the defense of insanity. This has distracted us from many important tasks, two of which we shall deal with in this chapter—first, the task of defining the dangerous offender for sentencing and treatment purposes, and second, the task of better mobilizing psychiatric and other clinical resources for the treatment of such criminals. We believe these three themes—the defense of insanity, the definition of dangerousness, and the mobilization of clinical resources for the treatment of criminals who are dangerous and psychologically disturbed—are closely interconnected. The importance of all three issues must be recognized if the psychiatrist is to assist appreciably in efforts to protect the community and to treat the criminal.

Abolition of the defense of insanity

Rivers of ink, mountains of printers' lead, and forests of paper have been expended on an issue that is surely marginal to the chaotic problems of the effective, rational, and humane prevention and treatment of crime. We determinedly insulate ourselves from the realities we are facing—the role of psychological disturbance in criminality and the measures we might effectively and fairly use to deal with psychologically disturbed and dangerous criminals. We do not propose here to contribute to the wastage or to pursue the traditional minutiae. Our view is that the defense of insanity itself is moribund and should be interred. We are not suggesting amendments to the rules concerning fitness to plead; that issue is relevant to our present topic, but it is not one we now wish to consider.

The suggestion that the defense of insanity should be abolished is not original. Many authorities including Lady Barbara Wootton, Professor H. L. A. Hart, and Chief Justice Joseph Weintraub of New Jersey among others have advocated its abolition, though for diverse reasons and with diverse substitutes for it. We do not propose to marshal and analyze their reasons and their suggestions. We have put forward a ukase on this topic and we shall here advance some of the reasons underlying it, a few of which are not to be found in the writings of the authorities on this subject.

"Why should there be a defense of insanity?"

The question strikes deep into the social function of the criminal law. Over the years, we have found the traditional answers less and less convincing—such as the uncritical acceptance of what is by the Royal Commission on Capital Punishment:

"It has for centuries been recognized that, if a person was, at the time of his unlawful act, mentally so disordered that it would be unreasonable to impute guilt to him, he ought not to be held liable to conviction and punishment under the criminal law. Views have changed and opinions have differed, as they differ now, about the standards to be applied in deciding whether an individual should be exempted from criminal responsibility for this reason; but the principle has been accepted without question."

Or the answer in the American Law Institute's Model Penal Code:

"What is involved specifically is the drawing of a line between the use of public agencies and public force to condemn the offender by conviction, with resultant sanctions in which there is inescapably a punitive ingredient (however constructive we may attempt to make the process of correction) and modes of disposition in which that ingredient is absent, even though restraint may be involved. To put the matter differently, the problem is to discriminate between the cases where a punitive-correctional disposition is appropriate and those in which a medical-custodial disposition is the only kind that the law should allow."

Or that offered by Sir Owen Dixon:

"Now it is perfectly useless for the law to attempt, by threatening punishment, to deter people from committing crimes if their mental condition is such that they cannot be in the least influenced by the possibility or probability of subsequent punishment; if they cannot understand what they are doing or cannot understand the ground upon which the law proceeds."

Or that in the *Durham* case:

"Our collective conscience does not allow punishment when it cannot impose blame."

Our position, putting aside the difficult and important issue of fitness to plead—competency to be tried—is very simple. The accused's mental condition should be relevant to the question of whether he did or did not, at the time of the crime, have the *mens rea* of the crime of which he is charged. There should be no special rules of the M'Naughten or Durham types. The defense of insanity being abrogated, evidence of mental illness would be admissible on the *mens rea* issue to the same limited extent that deafness, blindness, a heart condition, stomach cramps, illiteracy, stupidity, lack of education, "foreignness," drunkenness, and drug addiction are admissible. In practice, such cases are rare, and they would remain rare were mental illness added to the list. There would not merely be a shifting of psychiatric testimony to the *mens rea* issue with the same problems as beset the courts which hear it in the defense of insanity. A quite different issue would be raised, and one traditionally within the competence of the finder of fact. The convicted person's mental condition would, of course, be highly relevant to his sentence and to his correctional treatment if he were convicted.

Historically the defense of insanity made good sense. The executioner infused it with meaning. And in a larger sense, all criminal sanctions did so too, since they made no pretense of being rehabilitative. In the present context of the expressed purposes and developing realities of both the criminal justice system and the mental health system this defense is an anachronism. In the future, this defense would be not only anachronistic, it would be manifestly inefficient as well.

Let us offer a small statistical point before turning to the moral issue. In this country the defense of insanity is pleaded in about 2 percent of the criminal cases which come to jury trial. Overwhelmingly, of course, criminal matters are disposed of by pleas of guilty and trials by a judge sitting without a jury. Only the exceptional case goes to trial by jury. And of these exceptional cases, in only two of every hundred is this defense raised. In the United Kingdom, for the period on which the Royal Commission on Capital Punishment reported, the situation was very similar. The verdict of "guilty but insane" was returned, over a five-year period, in 19.8 percent of murder trials, whereas over the same period it was returned in only 0.1 percent of trials for other offenses. Does anyone believe that this measures the significance of gross psychopathology to crime? Let him visit the nearest criminal court or penitentiary if he does. Is not this defense clearly a sop to our conscience, a comfort for our failure to address the difficult arena of psychopathology and crime?

The practical difference between traditional tests of insanity and modern revisions was recently empirically tested. Various juries were given instructions based on the M'Naughten rules, the Durham test, and the following simple and uncluttered formula: "If you believe the defendant was insane at the time he committed the act of which he is accused, then you must find the defendant not guilty by reason of insanity." The juries failed to see any operative differences in the three instructions. Do we need to labor another century and a half to produce a mouse of such inconsequence?

Yet the moral issue remains central. Should we exculpate from criminal responsibility, or from "accountability" to use the preferable European concept, those whose freedom to choose between criminal and lawful behavior has been curtailed by mental illness? It is too often overlooked that the exculpation of one group of "criminal actors" confirms the inculpation of others. Why not a defense of "dwelling in a Negro ghetto"? This defense would not be morally indefensible. Such an adverse social and subcultural background is statistically more criminogenic than is psychosis, and it also severely circumscribes the freedom of choice which a nondeterministic criminal law (and that describes all present criminal law systems) attributes to accused persons.

True, a defense of social adversity would be politically intolerable; but that does not vitiate the analogy for our purposes. Insanity, it is said, destroys, undermines, or diminishes man's capacity to reject the wrong and adhere to the right. So does the ghetto—more so. But surely, you might ask, you would not have us punish the sick? Indeed we would, if you insist on punishing the grossly deprived. To the extent that criminal sanctions serve punitive purposes we fail to see the difference between these two defenses; to the extent that they serve rehabilitative treatment, and curative purposes, we fail to see the need for the difference. Some reply: it is not a question of freedom or morality, it is a question of stigmatization, and to this we shall return; but let us not brush aside the moral issue so lightly.

In Shavian terms: Vengeance is mine, saith the Lord—which means that it is not the Lord Chief Justice's. It seems to us clear that there are different degrees of moral turpitude in criminal conduct and that the mental health or illness of an actor is relevant to an assessment of that degree—as are many other factors in the social setting and historical antecedents of a crime. This does not mean, however, that society is obliged to measure any or all of these pressures for purposes of a moral assessment which will lead to conclusions concerning criminal responsibility.

In a few cases the question of moral irresponsibility is so clear that there is no purpose in invoking the criminal process. The example of accident, in its purest and least subconscious accident-prone form, is a situation where there is little utility in invoking the criminal process. The same is true of a person who did not know what he was doing at the time of the alleged crime. But to exculpate him there is no need for the M'Naughten or Durham rules for he falls clearly within general criminal law exculpatory rules. He simply lacks the *mens rea* of the crime. Thus, it seems to us that all we need to achieve within the area of criminal responsibility and psychological disturbance is already achieved by existing and long-established rules of mental intent and crime, and we would allow a sane or insane *mens rea* to suffice for guilt.

Perhaps an example of this principle may help. The *Hadfield* case will serve our purpose admirably. Hadfield had been severely wounded in the head in the Napoleonic wars and subsequently decided that it was necessary for the salvation of the world that he kill George III. He equipped himself with a blunderbuss and secreted himself in the Drury Lane Theatre in a position from which he hoped to shoot George III as he waddled into the royal box. Hadfield saw the flabby creature in the royal box and discharged his blunderbuss in the direction of the king, unfortunately missing him.

There was no doubt of Hadfield's brain damage or of his psychosis, his gross psychological disturbance. He did, however, clearly intend to kill the king. He had the insane mens rea of murder, and indeed of treason. We do not regard the phrase "insane mens rea" as a contradiction in terms. Had his psychological disturbance led him to think that he was discharging the blunderbuss to start the performance on the stage, or to burst a balloon, he would have lacked the mens rea of murder and of treason. But he saw himself as sacrificing himself for the good of the world—and he may not have been far wrong. We do not deplore the fact that Hadfield was held to be not guilty on the grounds of insanity. We do, however, maintain that there would be no greater injustice involved in convicting in such a case and applying the psychological diagnosis to the decision how to treat the offender than in convicting in any of the other thousands of cases that daily flow through our criminal courts.

Clearly the crucial question in this context is: what are the consequences of the defense of insanity? Is there an operative difference between peno-correctional and psychiatric-custodial processes which renders benefit to the accused who is found not guilty on the grounds of insanity? To this important inquiry we offer two replies. First, the differences if they exist are marginal; and second, the defense of insanity is an extraordinarily inefficient mechanism of deciding on the allocation of psychiatric treatment resources.

The American Law Institute's recommended modification of the M'Naughten rules in its Model Penal Code was accompanied by a recommendation requiring the indeterminate commitment of those found not guilty by reason of insanity. Likewise, within a month of the adoption of the Durham rules in the District of Columbia, Congress provided that being found not guilty on the grounds of insanity should be followed, mandatorily, not in the discretion of the court, by indeterminate commitment to Saint Elizabeth's Hospital until such time as the person so committed could meet the requirements that he prove, beyond reasonable doubt, his freedom from "any abnormal condition" and that he is not likely to repeat the act which resulted in his insanity acquittal. Dr. Winfred Overholser, the late superintendent of the mental hospital to which the recipients of this benevolence in the District of Columbia are sent, put the matter precisely: "The notion that a verdict of not guilty by reason of insanity means an easy way out is far from the truth. Indeed the odds favor such a person spending a longer period of confinement in the hospital than if the sentence was being served in jail."

Facilities and practice differ from country to country, and in this country from state to state. The point we wish to stress is that it is error to *assume* benevolence and to assume that there are more psychiatric treatment resources, better physical conditions, and earlier release practices pursuant to a finding of not guilty on the grounds of insanity than pursuant to a conviction. It all depends. We know of systems where there are more facilities per patient for psychiatric treatment in the penitentiary holding psychologically disturbed prisoners than in the

nearby state mental hospitals. Frequently the converse is true.

Let us offer a final point on the sometimes assumed benevolence of the defense of insanity. It is more than a straw in the wind, more than a suggestion that this is not a liberal, benevolent, humanely exculpating defense, when one finds the prosecution alleging at trial the insanity of the accused at the time of the crime while the defense urges his sanity; but this has occurred in both the United Kingdom and this country. Lady Barbara Wootton has discussed at least six cases in which "the witness called by the Crown to rebut evidence of diminished responsibility sought to establish that the accused was in fact insane." And in a judgment in the House of Lords, Lord Denning said: "The old notion that only the defense can raise a defense of insanity is now gone. The prosecution are entitled to raise it and it is their duty to do so rather than allow a dangerous person to be at large."

It might be suggested that our attack on the defense of insanity misconceives the problem. The task of the law, it might be suggested, is mainly to protect the community, and the defense of insanity will indeed permit better psychiatric treatment and, if necessary, longer custodial supervision of the disturbed and dangerous criminal. Later in this chapter we shall deal with the definition and prediction of social dangerousness; in the meantime, it suffices to note that the defense of insanity started on moral premises different from this, and that the defense is both unnecessary and inefficient to achieve this protective purpose.

A more sophisticated critic might suggest that we are missing the point in a different way. Criminal processes are, he might say, public morality plays. They have deterrent purposes, perhaps, but they certainly aim dramatically to affirm the minimum standards of conduct society will tolerate. By public ceremonial and defined liturgy, criminal trials stigmatize those who fail to conform to society's standards. In short, the criminal justice system is a name-calling, stigmatizing, community superego reinforcing system. And, it could be urged, we should not stigmatize the mentally ill. They are mad not bad, sick not wicked; it is important that we not misclassify them. Is there a rebuttal to this defense of the defense of insanity? We believe there is—the fact of "double stigmatization."

Consider the question, Are psychologically disturbed criminals seen by prison authorities only as "criminal," and are the mentally ill who have committed or have been charged with crime seen only as "mentally ill" by the hospital authorities? Or are the former seen as "mentally ill criminals" and the latter as "criminal and mentally ill"? Are the systems separate or confused in the minds of the staff and of the "patients"? It is clear that some belief in the separateness and purity of the two systems infects the position of those who advocate retention of the defense of insanity. Yet the fact is that the prison authorities regard their inmates in the facilities for the psychologically disturbed as both criminal and insane, bad and mad; and the mental hospital authorities regard their inmates who have been convicted of crime or even arrested and charged with crime as both insane and criminal, mad and bad.

In mental hospitals the fact that an inmate was arrested for a crime seriously influences the date of his likely discharge. Note, it is an arrest without a conviction that has this effect. Likewise the conditions of incarceration in the psychiatric divisions of correctional systems are frequently less desirable than elsewhere in the system and the chances of obtaining parole are substantially lower. The truth is that our present intellectually loose approach to this problem inflicts gratuitous extra suffering both on those who are categorized as criminal and mentally disturbed and those who are categorized as mentally disturbed and criminal. The police power of the state and the mental health power of the state are surely sufficient unto themselves, separately, to control questions of dangerousness and the upper limits of power over individual citizens. It is mutually corruptive and a potent source of injustice loosely and thoughtlessly to blend these two powers, and thus to gloss over in each the proper balance between state power and the freedom of the individual.

There is one concept common to both, the concept of social dangerousness. The problem for both the prison authorities and the mental health authorities is reasonably and effectively to make assessments of social dangerousness and to design a process by which that assessment can be fed into the releasing procedure. We do not facilitate this difficult task by making a porridge, a farrago, out of the two powers—the mental health power and the police power—and using this mess to avoid facing and trying to dispose of a genuinely difficult problem.

Thus, in terms neither of the morality of punishment nor of stigmatization is the defense of insanity now essential or operative. Similarly, it is neither a necessary nor effective principle around which to mobilize clinical resources for the rational treatment of the psychologically disturbed criminal actor. It is, however, in our view, a political issue of some difficulty and the politics are concerned with the stigmatizing role of the criminal law.

While the hangman, or in this country the fryman, and the capital punishment controversy lurk in the background, the issue of criminal irresponsibility in relation to homicide is intractable. Yet, in the five years 1964, 1965, 1966, 1967, and 1968, the number of executions in this country was, respectively, 15, 7, 1, 2, and 0. Our ukase on this matter does no more than hasten the inevitable. Moreover, when one looks at the pattern of capital punishment for murder in the world, it becomes clear that this is a rapidly declining sanction. We can reasonably exclude it from our consideration of the future. What remains then is the question of stigmatization of conduct as either wicked or the product of sickness, as either bad or mad. This difference in stigmatization may result in different treatments but the differences are neither essential to our system of criminal justice nor necessarily involved in either our correctional or mental health systems. The essential difference is the difference of nomenclature, of overt public stigmatization.

For our part, we look toward a future in which moral outrage and name-calling will not so significantly influence our reaction to the behavior of others. This is a generation that despoils our natural resources and prepares to terminate human life on this planet; but if the ruination of our environment and the eliminating of our species are avoided, if aggressions are controlled in favor of decency and creativity, we do not believe that systems of justice in which name-calling and vengeance figure so prominently can long survive. If this be so, then the issue becomes one of how we can, as rapidly as the traffic will allow, destigmatize our criminal law processes.

There is a choice. We could follow the pattern of a gradual extension of the exculpatory and allegedly destigmatizing processes of the defense of insanity, opening it more and more widely to cover larger and larger slices of criminal conduct until most criminal behavior is encompassed. Many of those working in this field, men whom we respect, favor that engulfing process. We do not oppose their purpose; but we think their political judgment wrong. It seems to us that we should not make an artificial and morally unjustifiable exception to a false general rule and allow the exception to swallow the rule. It seems to us better to support the advance that is now taking place, certainly in theory and rhetoric, in the treatment of all criminal conduct, and to a degree in correctional practice. In other words, to put it aggressively, we think society will move faster toward a rational system of criminal justice through honesty than by self-deception; and we think it dishonest to create an artificial, morally unjustifiable, practically ineffective exception to the general rules of criminal responsibility. We think the English judges went wrong in the nineteenth century and that it is time we got back to earlier and truer principles.

We find it impossible morally to distinguish the insane from others who may be convicted though suffering deficiencies of intelligence, adversities of social circumstances, indeed all the ills to which the flesh and life of man is prey. It seems to us that our approach better accords with the total role of the criminal law in society than does a system which makes a special exculpatory case out of one rare and unusual criminogenic process, while it determinedly denies exculpatory effects to other, more potent processes. In the long run we will better handle these problems, as well as the whole and more complex problem of criminality in the community, if we will recognize that within crime itself there lies the greatest disparity of human wickedness and the greatest range of human capacities for self-control.

Our perennial perseverations about the defense of insanity impede recognition of this diversity, since they push us to a false dichotomy between the responsible and the irresponsible. They should be abandoned. One occupation for the energies thus released might be suggested, a task in which the psychiatrist has an important role to play: the defining of those categories of psychologically disturbed criminals who are serious threats to the community and to whom special treatment measures should therefore be applied.

Getting Away With Murder

(By James Gleick)

They buried Shirley Ellington on a beautiful hot day last summer in Alexander City, Alabama, after a funeral that sticks in people's memories. Her uncle, Robert Lewis Burns, remembers it as the worst day of his life. He was sitting near the front of the funeral chapel with his two surviving nieces when Willie Maxwell walked in, right in the middle of the service. People knew there was going to be trouble.

Willie Maxwell was known in Alexander City for two things. One was the voodoo. Even then, in the funeral chapel, he carried a mysterious black pepper box. "He had some kind of commodity in that box, nobody knows what it was." Burns said months later. "They sent it off finally to a lab to be analyzed, but it was no use.

"And he also had a brown envelope there with some kind of stuff in it, and they could not find out what that was, either. And he would also hang white chickens upside-down in the pecan trees outside his house, and these were supposed to keep evil spirits away. He had blood painted on his doorstep, and that was supposed to keep people away.

"When they cleaned out his house after he died, they found some bottles that had some kind of funny-looking liquid. He had one labeled Sex and one labeled Love and all this kind of stuff. He used to drive around at night wearing clothespins on his ears.

"And if some next-door neighbor moved in

that he didn't like, he would take chicken heads and put them in their yard, and then a few days later they would move out. That's really true—that's not hearsay."

In some ways, it seemed like a shrewd sort of magic. A cynic might have said what has been said of similar cases: that Willie Maxwell was laying the groundwork for a plea of insanity, just in case. Because Maxwell was also known in Alexander City as the man who had murdered five people—including, most recently, Robert Burns' niece, Shirley Ellington.

Later, everyone would agree—the district attorney, the psychiatrists, even Maxwell's former lawyer, Tom Radney—that Maxwell had committed the string of murders over a period of six years to collect on insurance policies each victim had carried. Maxwell made the payments on all the policies himself.

The first victim was Willie Maxwell's wife, Mary, who was found strangled in a car. Maxwell was tried for murder and acquitted—there was little solid evidence, and he had a good alibi.

The woman who provided the alibi became his next wife, and she also became his next victim. Her body, too, was found in a car, but this time, the cause of death was unknown.

The third victim was Maxwell's brother, Columbus. His body was also found in a car, and his blood contained a high level of alcohol. Cause of death unknown.

The fourth was Maxwell's nephew, James Hicks. He was found in a car that had apparently run into a tree, but not hard enough to make much of a dent.

The fifth was Robert Burns' niece, Shirley Ellington. Maxwell had married the ex-wife of Burns' brother, which made the girl, in effect, his step-daughter. Her body was found under a car off the side of a road. A jack holding up the car's front end had sunk into the soft ground—the jack's foot was missing—and the left front wheel rested on Shirley's chest. But the coroner discovered that she had been strangled first.

Every one of the victims had been insured, with Maxwell as the beneficiary. In fact, although the string of deaths was common knowledge, the widespread, if hazardous, Pallapoosa County practice of being insured by Willie Maxwell continued until his own death.

When Maxwell showed up at Shirley Ellington's funeral, people were surprised. They were also surprised that he went up and sat right behind Robert Burns and his two remaining nieces, who were crying uncontrollably, as they had been all through the service. Burns was trying to console them, but they would not stop crying. When Maxwell sat down, one of the girls screamed, "You shot my sister." And then, as 400 mourners turned to look, Burns stood up, drew a pistol from a holster inside his belt, and shot Willie Maxwell three times in the face.

So it was Robert Burns who pleaded not guilty by reason of insanity. After deliberating for more than two hours—a long time by Pallapoosa County standards—the jury found Burns not guilty. He was sent to an Alabama mental institution, where he learned about insanity firsthand—once, he recalls, he saw a patient chew off the ear of another and swallow it. But he did not have to stay long. He was released after six weeks.

Burns went back to driving trucks, and not long ago, home between runs up North, he sat in the kitchen of his mobile home and tried to give an honest answer to the question of whether he had been insane when he killed Willie Maxwell. He told a few stories about Maxwell and voodoo, and finally, with a self-conscious chuckle, he said, "No, there's nothing wrong with me, I guess. Tell you the truth, there was nothing wrong with me that day either. I was just mad at him, I guess."

The psychologist who testified on his behalf at the two-day trial—the defense could not afford a full-fledged psychiatrist—was Frances Gunnels, an instructor at Alexander City Junior College. She agrees that Burns was not really insane, but she also believes that anyone who commits a sudden, violent crime like Burns' is, in a way, insane for that short moment. "I testified that he was not aware of what he was doing at the time," she says. "I don't really believe in temporary insanity, but I do think that anybody who just goes berserk and commits a real violent crime is temporarily insane—I mean, society teaches us right from the start you just don't do things like that. You don't cut the cat's tail off right behind the ear and you don't flush the puppy down the commode." She used a technical term at the trial to describe Burns' mental state, but does not remember what it was.

"In a way, though," she says, "killing Willie Maxwell was the sanest thing anybody did all summer." She says she doubted a jury could have been found that would have convicted Burns. "He was just doing what the law ought to have done sooner. Why, I probably would have killed that man myself."

Ten years ago, it is unlikely Robert Burns would have used the insanity defense. Last year, despite his trouble-free mental history, it was inevitable. "The insanity defense began as a simple, humane doctrine—that a person who commits a crime in madness, without malice and without an understanding of his own actions, ought not to be the object of society's revenge. It has grown into the most ungainly and pervasive paradox in our legal system. Its use has become automatic. It is the defense of last resort for violent criminals, the defense every lawyer must consider when his client has no alibi. And it is spurring a debate among lawyers and psychiatrists that threatens to rage without letup, in one state after another, until the defense is abolished altogether."

As the debate gets into full gear, it will have a deceptive tendency to fall into familiar ideological lines. Richard Nixon's 1973 crime bill, the notorious S. 1, proposed the abolition of the defense; and in many state legislatures, its most vociferous opponents are also the most ardent supporters of the death penalty and of harsher sentences for juvenile offenders. As a way for admitted criminals to escape punishment, the insanity defense arouses the wrath of those who identify more with the victims of crime than with the rights of the accused.

But the sharpest edge in the furor over the insanity defense comes from a liberal, Democratic administration in New York State, where the Department of Mental Hygiene recently issued a report recommending the defense's abolition. The report cites statistics that are representative of the nationwide surge in the sucessful use of the insanity defense. Over a five-year span, the report states, the number of acquittals by reason of insanity in New York State has more than quadrupled. In the eight years from 1958 to 1935, there were 11 successful pleas; in 1973 alone there were 69; and statistics for 1977 are expected to show another large rise. Even supporters of the insanity defense concede that much abuse lies behind these figures.

Dr. Abraham L. Halpern flew into New York recently with reams of notes on the insanity defense, collected over a period of years for an article he was writing for a professional journal. He left the whole bundle on the plane, and he was nearly apoplectic: "I could have done anything then, anything—and a sympathetic jury would have acquitted me by reason of insanity."

Halpern, chairman of the department of psychiatry at United Hospital in Port Chester, New York, and a leading opponent of the insanity defense, argues that one reason for the growing abuse of the defense is an increasingly broad—and increasingly vague—conception of mental illness. "We've reached a point," he says, "where individuals, by virtue of good legal counsel and highly paid psychiatric assistance, have been able to persuade a jury that drug addiction is a mental disease or defect. Alcoholism! Chronic criminality has been considered a mental disease. Unproven epilepsy—epilepsy with a normal electroencephalogram, where the individual doesn't have a neurological disorder—that is considered insanity."

Halpern rises from his chair and steps across his tiny office. "Insanity has come to mean any damn thing anybody wants it to mean," he shouts. "Dangerous individuals, who are not mentally ill from the clinical psychiatrist's viewpoint, are released only to commit serious crimes again."

The number of crimes actually committed by people previously acquitted by reason of insanity is small, but it is the nature of criminal insanity that such crimes are the most lurid and sensational. Further, the freeing of such defendants is a particularly unsettled area of the law, riddled with contradictions—especially for the psychiatrist recommending the release. Once a defendant has been acquitted by reason of insanity, keeping him confined raises constitutional questions that states have found difficult to deal with. In New Hampshire, for example, the Supreme Court recently ruled that psychiatrists must demonstrate every two years that a patient remains dangerous beyond a reasonable doubt, or they must order his release. A person's certain danger to society is nearly impossible to prove. In most states, psychiatrists must decide whether a patient is sane enough to release (subject to a judge's approval), a decision that may have nothing at all to do with whether he was insane enough to acquit.

In some cases, doctors have had no choice but to release defendants upon discovering that their insanity had been faked. One such case, cited by Halpern, involved a man acquitted of rape several years ago in Washington, D.C. He was sent to a mental hospital, but when psychiatrists there decided that he "simply had a tendency to rape," Judge Gerhard Gesell of the United States District Court ordered him freed.

"Obviously the appropriate thing to do would be to set aside the not guilty finding and prosecute for the underlying offense," the judge wrote. "It is apparent, however, that the finding of not guilty by reason of insanity cannot be reopened or re-examined."

Then there was the case of E. E. Kemper 3d, who murdered his grandparents and spent five years in a California hospital for the criminally insane. He went free in 1970, and three years later petitioned to have his psychiatric records sealed. A judge granted the request after psychiatrists had examined Kemper and found him sane and cured. They did not know that since his release he had murdered his mother and seven other women—one of them only three days before their decision—and had dismembered most of the bodies. Kemper, it was later reported, had memorized sets of responses to 28 standard psychological tests.

Not every murderer has Kemper's knack with psychiatrists, of course, but interviews with defendants are often routine and predictable. The questions tend to be surprisingly transparent. The key question in many trials turns out to have been something like, "Do you remember what you were thinking when you pulled the trigger?" or "How do you feel about it?" (The best answers are "No" and "I can't feel anything"—not "I was trying to kill him" and "I feel kind of guilty about it.")

As a science, psychology, like economics, is soft; it lacks the equipment to make reliable predictions about the events it studies. Within the field, there is considerable in-

consistency about some of the most important definitions. Psychiatrists do not agree on what constitutes psychosis the way physicists do on what constitutes velocity. And what a psychiatrist means by insanity may be very different from what a judge means.

The courtroom has become the focus of an extraordinary amount of confusion and professional self-contradiction from psychiatric expert witnesses. Last year in Los Angeles, the National Homicide Symposium raised the issue of such testimony and its growing decisiveness in the determination of guilt or innocence. Jay Ziskin, a psychologist from California State University, said psychiatric testimony was "worthless" in criminal proceedings. "It does not meet the requirements of law for expert testimony," he said. "A psychiatric diagnosis is more likely to be wrong than right. It is even more likely to be wrong when trying to assess the mental condition at some time previous to the examination."

It is a harsh view, and it is spreading. "I'm concerned for society," Abraham Halpern says, "but I must admit I am also concerned for my profession, with psychiatry becoming a literal laughing stock from one shore to the other."

The legal system relies on psychiatrists for more than courtroom testimony. Their role does not end with the jury's verdict. More and more, psychiatrists are responsible for deciding the fate of convicted criminals who are found to have psychological problems. Then, using a wholly different set of criteria, they determine the fate of defendants acquitted by reason of insanity. They help judge the type of confinement necessary and the type of treatment—whether a patient must be held, for example, in an institution or may be cared for on an out-patient basis. They help decide the right moment for release. And using yet another set of criteria, they evaluate the fitness of suspects to stand trial and the appropriate form of confinement in the meantime.

But the judicial framework is ill-designed to accommodate the psychiatrists it has come to rely on so heavily. The system is run through with contradictions, and the judgments that must be made at each stage often conflict. Dr. Lawrence C. Kolb wrote in New York State's recent report that psychiatrists testifying on whether a defendant is insane "are forced almost to the verge of unethical behavior—forced by the insistence of legal procedures derived from a 19th century conception of the psychology of man."

Opponents of the defense argue that the best solution is a cutting of the Gordian knot—abolish the defense, they say, and the related problems will disappear. The proposals gaining the most ground across the country would leave it to the jury to determine guilt or innocence, solely on the facts, without regard for the defendant's mental state, and would make the psychiatrist's role a simple one: to treat the mentally ill, after the state has imposed its sanction.

"All right," says Dr. Daniel W. Schwartz, a leading supporter of the insanity defense. "We have problems, abuses, what have you. But if you put an actual case to [opponents of the defense] they don't know what to do—because they know in their hearts that there is no crime, only sickness." Schwartz earns his living in the scabrous common ground between psychiatry and the law, and no one has a closer view of the day-to-day reality of criminal insanity. As director of forensic psychiatry at Kings County Hospital in Brooklyn, New York, he is routinely called upon by the state and city to examine prisoners with mental problems and to testify concerning their competency to stand trial. Unofficially, he is the king of freelance expert witnesses, in demand by prosecutors and defense attorneys alike. In the past 15 years, he has testified at more than 100 trials, including some of the most controversial in the country.

Schwartz's office, on the sixth floor of an enormous Gothic structure that houses the forensic psychiatry division, is in a ward cut off from the rest of the hospital by a set of iron bars with a 24-hour guard. "People are upset, there's no doubt about it," he said last April. "Some people are—literally—getting away with murder. Psychiatry is just part of the problem. People cop pleas, and in no time flat they're back on the street." Down the hall from his office sat his most celebrated patient of the moment, David Berkowitz, who would be convicted a few weeks later in the six "Son of Sam" murders. Berkowitz pleaded guilty, refusing the repeated suggestions of his lawyers that he use the insanity defense.

Several months earlier, in another notorious case, Schwartz provided what turned out to be the winning diagnosis at the murder trial of Robert Torsney, a white New York City police officer who shot and killed a 15-year-old black boy in 1976. On the strength of Schwartz's testimony, Torsney was acquitted by reason of insanity.

This summer Schwartz testified for the prosecution at the trial of Richard Herrin, who had killed his girlfriend, Bonnie Jean Garland, with a claw hammer in the bedroom of her suburban home. Herrin also pleaded not guilty by reason of insanity; he was convicted on a reduced charge of manslaughter, and jurors later said Schwartz's testimony had been the most convincing.

One reason Schwartz's services are so much in demand is that he knows how to present his testimony in terms a jury will find useful. He is a good interpreter of the languages of law and psychiatry, and the skillful use of language is often the key to the skillful handling of the insanity defense. At the same time, language—or jargon—has been responsible for some of the more curious absurdities that have arisen from the defense. Despite their shared central concern—the extremities of human behavior—psychiatry and the law have developed two very different ways of talking about the same events. When psychiatrists and lawyers get together, and especially when they have to pay attention to the precise meaning of their words, there is no limit to the confusion that can arise

At the Herrin trial, the war of words was as basic as could be. To a psychiatrist testifying on the defendant's behalf, Herrin's relationship with his girlfriend, which began when they were students at Yale, was a "symbiotic dependence." When Bonnie Garland tried to end the relationship, Herrin exhibited what the psychiatrist called "mood swings." His murder of her as she slept was characterized as "bizarre behavior, indicating a borderline personality" giving way to "depersonalization and disassociation."

The prosecutor's words were more old fashioned. Calling the psychiatrist's testimony a "smokescreen," he said Herrin had "just turned to possessiveness, then to revenge and vengeance."

Sometimes the attempts to find psychiatric explanations for crimes lead to a circus atmosphere. For example, opponents of the insanity defense cite the 1976 New Jersey trial of Joseph Kallinger for the murder of Maria Fasching. First came a long evidentiary dispute over the admissibility of testimony by Flora Rheta Schreiber, the author of the bestselling pulp novel *Sybil*, whom defense lawyers had hoped to question about split personality. Then the court heard testimony from Kallinger's coworkers, who had called him "Crazy Joe." Finally, after lengthy proceedings on various examples of erratic behavior by the defendant—much of it *after* the murder—a psychiatrist named Irwin N. Perr took the stand to say that although it was true Kallinger had faked much of his crazy behavior, that did not necessarily mean he was sane.

But it is the Torsney trial more than any other that is cited for the eloquence of psychiatric testimony—"sheer bravado," one lawyer called it. Officer Torsney shot the boy at close range in front of a dozen witnesses. There was no struggle, and the boy was unarmed. Torsney was the third white New York City police officer in as many years to be acquitted in the murder of a black youth, but he was the only one to plead insanity. Most police officers in his position plead self-defense, and indeed Torsney at first claimed the boy had been reaching for a gun. But Torsney's lawyer quickly discovered that the witnesses, including other police officers, would not even testify that the boy had moved his arm.

The lawyer, Edward M. Rappaport, entered a plea of not guilty by reason of insanity and had his client retain Daniel Schwartz. He remembers the day Schwartz called to tell him he had settled on a diagnosis—it was an exciting moment, Rappaport says.

"I've got it," he quotes Schwartz as saying. "Now I know what was wrong with him—he had epilepsy." That was a surprise to Rappaport, and it was a surprise at the trial, not only because Torsney had no previous record of epilepsy—or any other mental problem—but also because an electroencephalogram had been normal.

But Schwartz explained that Torsney suffered from a rare form of epilepsy called "automatism of Penfield," which occasionally does not appear in an electroencephalogram. As a result of the epilepsy, Schwartz testified the officer—already in a "dissociative psychotic state"—had a "psychomotor seizure."

"Dr. Schwartz said he was, like, in a trance—he did everything automatically," Rappaport says.

For Schwartz, the telling point was the complete absence of any motive for the killing, and the apparent absence of any emotion about it afterward. "No way does it make sense," Schwartz says. "Torsney acted in a way that was totally irrational." According to Schwartz, Torsney did not behave like a man who believed himself to be in danger. He simply shot the boy and reholstered his gun. He had no conscious awareness of his actions, Schwartz says, so afterward, to justify to himself what he had done, he involuntarily invented a "memory" of the boy's reaching for a gun. At the trial Schwartz used the term "involuntary retrospective falsification" to describe Torsney's first story.

After his acquittal, Torsney was sent to a hospital for the criminally insane; Rappaport is now awaiting a psychiatrist's report on his client's condition. Torsney is under suspension from the police department, and Rappaport has applied for a disability pension for him. (There is some question about whether or not the disability occurred in the line of duty.)

The law under which Torsney was acquitted, one of the strictest in the United States, holds that a defendant may be found to lack criminal responsibility if at the time of the crime he did not have "substantial capacity to know or appreciate either the nature and consequences of such conduct or that such conduct is wrong." In New York, as in every state, the insanity defense is built into the law in the form of the instructions a judge must give the jury at the close of a trial. It is up to state legislatures to choose the exact wording, and it would seem to be a simple enough matter for a legislature to abolish the defense. On a few occasions the United States Supreme Court has overturned legislative attempts to tamper with it, but the grounds in each case were narrow and unrelated to the defense itself, which does not appear to be writ in stone.

The New York rule is a variation of the most common formulation, the M'Naghten rule. M'Naghten, used in about thirty states, is the oldest and best known. It takes its name from a Scottish woodcutter, Daniel M'Naghten, who murdered the private secretary to the prime minister of England in 1843. He did so under a double misapprehension. He thought the man he was shooting was Prime Minister Robert Peel himself; and that Peel had been responsible for a series of private misfortunes.

At M'Naghten's trial, several doctors testified that the prisoner suffered from delusions of persecution. He was acquitted, which meant that instead of being executed, he was permitted to spend his remaining years in mental institutions.

The defense of insanity had been a part of English law since the thirteenth century, but many people were outraged by M'Naghten's acquittal. Among them was Queen Victoria, who had herself lately been the target for several would-be assassins. She complained to the House of Lords, which in turn demanded an explanation from England's Chief Justice. Choosing his words with great care, he gave the defense its most lasting form, delivering a set of guidelines that were quickly adopted as law across the Atlantic.

A prisoner must be acquitted, he wrote, if he suffers from "such a defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing; or if he did know it, that he did not know he was doing what was wrong."

The M'Naghten rule is relatively strict in two respects. First, the most severe delusions do not necessarily guarantee acquittal. M'Naghten's belief that the prime minister was causing his bad luck was not enough to justify acquittal, the Justice ruled, because even if he had been correct, it would not have entitled him to commit murder. Second, the rule only recognizes cognitive, as opposed to volitional, impairment. If a criminal recognizes that he is doing wrong, even if he cannot control his actions, he must be convicted. David Berkowitz, for example, might well have lost an insanity defense, despite a general agreement among psychiatrists that he was psychotic. Though he believed he was committing his murders at the direction of demons, he evidently knew what he was doing and had a sense that it was wrong.

A modification of M'Naghten called the "irresistible impulse rule" permits a defendant to be acquitted if his crime resulted from a mental defect he could not control. A modern version, the Durham rule, was first used in Washington, D.C., a cauldron for a great deal of insanity-related law, but it was abandoned in 1972 after an 18-year experiment. The courts found it was too broad and too vague.

The most recent rule, known as the A.L.I. rule (after the American Law Institute), may be the best formulation yet of what is inevitably an awkward combination of ill-defined concepts. The key words are vague enough to allow the jury some latitude, yet solid enough to provide some firm ground for the psychiatric witnesses. Under the A.L.I. rule, a defendant is not responsible if, "as a result of mental disease or defect, he lacks substantial capacity either to appreciate the criminality of his conduct or to conform his conduct to the requirements of law."

The vagueness in the various rules is often their best feature, in that it leaves juries with the final decision, rather than binding them to the views of psychiatric witnesses. Whatever its particular form, however, the insanity defense has been a victim of the processes of history. As every opponent of the defense complains, the evolution of psychiatry has brought a considerable widening of our conception of insanity. "Originally," Abraham Halpern says, "insanity was used to designate wild raving maniacs—idiots, imbeciles and lunatics. That kind of person never even gets to trial now: they're found incompetent. You just show me the poor, demented soul, the kind who cannot tell the difference between squeezing a trigger and squeezing a lemon, who's being thrown in a dark dungeon somewhere."

The most telling historical change, however, has been a steady divergence in the things psychiatry and the law take for granted. It is no longer true, as it was as recently as 60 years ago, when Freud's writings were first translated into English, that doctors and lawyers believe pretty much the same things about human nature, and that is the insanity defense's fatal paradox. Whether people behave well or badly was once believed to be a matter of choice, of free will. That is still the assumption on which the criminal justice system depends in enacting its controlled, institutionalized revenge. But psychiatrists do not believe in free will—or if, for reasons of sentiment, they believe in it, they have no professional use for it. The law cannot function unless it assumes people make free decisions about their actions, but psychiatrists cannot function unless they assume the opposite: that people's actions can be explained in terms of environmental influences, or emotional stages, or family histories, or putative mental states, depending on one's preference.

As a result, even the best psychiatric witness is out of place in a courtroom. In the words of Dr. Lawrence Kolb, "With the generally accepted agreement that preconscious and unconscious forces influence overt actions, he may not answer ethically the legal questions put to him . . ." Asked to explain a violent, criminal action, a psychiatrist has a professional obligation to seek an explanation in pathology—and the result may be a diagnosis that, while true to the lights of psychiatry, is not what the law is looking for. For a scientist, to say that one man killed another because he was "evil" is simply begging the question. But that may be what the law requires.

As long as psychiatrists continue to seek explanations within a framework of determinism and the law continues to treat people as responsible agents, the war between the two will continue to create turmoil in modern courtrooms. "The court doesn't need to hear the garbage of 'involuntary retrospective falsification,' for Christ's sake," Halpern says, "That kind of thing isn't of any value in the disposition of a case. It's a hoax, a legal fiction perpetrated on the public."

The New York Department of Mental Hygiene agrees. Its central reform—a reform California and Michigan are now drifting toward as well—would be the divorce of the finding of guilt from the question of sentencing. It would be a divorce of lawyers from psychiatrists, for it is in the post trial state that the New York report believes psychiatrists can be most helpful. Most important, abolishing the insanity defense would be a way to get psychiatrists out of the courtroom, or as the report puts it, "to avoid dysfunctional psychiatric involvement in adjudicative and dispositional processes."

The New York proposal would permit evidence of mental disease only as it affected a defendant's intent to commit—or knowledge that he was committing—a crime. A defendant found to have had no intent to murder could be found guilty of manslaughter instead, for example. But no defendant could be excused from criminal responsibility.

"Where is the justice," Abraham Halpern asks, "in selecting out one special group to be excused from responsibility for their acts? We're required to sweep aside other groups that might have an even greater claim to be held not responsible. What do you do about the individual who is brought up in a slum, deprived of an education, forced into a relationship with lawbreakers after whom he will pattern his behavior? Where's the justice in saying that person may be held responsible?"

Daniel Schwartz, pounding his desk, disagrees. "I can't go along with this poverty-made-me-do-it idea. Some people are just evil," he says. "There are people who don't hold your life or mine of more value than an ant's.

"But at the other extreme you have people who have hallucinations, people who have delusions—people who no decent society under God ever ever find responsible. People"—he lowers his voice to a whisper—"who are just too, too crazy."●

By Mr. DURENBERGER:

S.J. Res. 56. Joint resolution to rename the Big Stone National Wildlife Refuge to be known as the Lem Kaercher National Wildlife Refuge; to the Committee on Environment and Public Works.

RENAMING BIG STONE NATIONAL WILDLIFE REFUGE

Mr. DURENBERGER. Mr. President, I rise to introduce a joint resolution renaming the Big Stone Wildlife Refuge to be known as the Lem Kaercher National Wildlife Refuge.

It would be appropriate to grant the wishes of the thousands of people in the area of Big Stone County, Minn., who have expressed an interest and petitioned to have the Big Stone Wildlife Refuge changed to be known as Lem Kaercher National Wildlife Refuge. The facility which has come to be such a beloved part of the landscape of western Minnesota would not exist except for the initiative, commitment, perseverance, and persistence of Lemuel Kaercher.

The refuge is superimposed on the Big Stone-Whetstone project of the Corps of Engineers in western Minnesota, near Ortonville. This is a flood control project for which some 85 percent of the benefits and a similar share of the costs were allocated to improvement of habitat of wildlife, principally waterfowl.

When the corps completed its feasibility study of the Big Stone-Whetstone project in the early 1960's, it was judged to be a needed and desirable project—but it died. The Bureau of the Budget, to whom the feasibility report was sent for clearance, had zero intention of approving it for consideration by the Congress. The Bureau did not like the precedent which would be set of approving a flood control project with such a high and nonreimbursable cost allocation to wildlife.

Mr. President, that is when Lem Kaercher went to work.

In a diplomatic but powerfully persuasive matter, Lem kept after the Budget Bureau, especially the then Chief of its Natural Resources Division, until he accomplished what was regarded as a small miracle at the time. The Bureau cleared the project for favorable consideration by Congress.

But Lem Kaercher did not rest on those laurels. He bird-dogged the authorization bill through Congress. He still did not quit—he went through the whole difficult and agonizing process once again as the principal and almost sole pusher at the Budget Bureau and in the Congress to get the money appropri-

ated for the project. Once again, Mr. President, he overcame the odds and was successful.

In all my years of contact with State and Federal Government, I have never met a more effective plain citizen pleader of a cause then Lem Kaercher. No one had more perseverance; no one was more pleasant in advocating his cause with the executive and legislative branches; no one was less awed by officialdom; no one was more self-sacrificing.

As publisher of a small-town weekly newspaper, the Ortonville Independent, Lem was not a wealthy man. Yet he spent thousands of dollars of his own funds for dozens of trips to Washington to support his favorite project—and a project that was dear to the hearts of environmentalists, conservationists, and sports and recreation-minded individuals, in that beautiful part of our State and Nation. Without question, Lem Kaercher should have the national wildlife refuge named after him as his thousands of friends desire. The Federal Government should grant the people this wish—a memorial which is so richly deserved—to brighten the late years of this great citizen—Lem Kaercher.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 56

Whereas it was due to the initiative, commitment, perseverance, and persistence of Mr. Lemuel Kaercher of Ortonville, Minnesota, that the facility commonly known as the Big Stone National Wildlife Refuge was authorized, funded, and developed; and

Whereas thousands of residents of the area have respectfully expressed an urgent interest and petitioned to have the facility named after Lem Kaercher; and

Whereas Lem Kaercher has been cited by three Governors of the State of Minnesota and two Governors of South Dakota for his accomplishments, and was named and honored by Minnesota as "Water Conservationist of the Year": Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Department of the Interior is authorized and directed to rename the Big Stone National Wildlife Refuge in Minnesota to be henceforth known as the Lem Kaercher National Wildlife Refuge.

By Mr. SYMMS:

S.J. Res. 57. Joint resolution to provide for the designation of February 7 through 13, 1982, as "National Scleroderma Week"; to the Committee on the Judiciary.

NATIONAL SCLERODERMA WEEK

Mr. SYMMS. Mr. President, I am introducing a joint resolution in the Senate today to authorize the President to designate the week of February 7–13, 1982, as "National Scleroderma Week."

Scleroderma is a painful and debilitating disease which affects the skin and multiple organs of the body, and can in its most serious form result in the death of the scleroderma patient.

Approximately 300,000 people are affected by scleroderma, and yet it remains a little-known and often misdiagnosed illness. There is not any known cure for the disease, and due to the lack of public awareness there has been a severe shortage of funding for research into possible cures and treatments.

Since public funding at this time is being reduced for the research of various illnesses, it is vitally important to encourage private funding, and that is specifically why it is necessary to raise the awareness level of the public in recognizing the existence of scleroderma.

I believe that National Scleroderma Week will focus the necessary attention on this disease and I encourage my colleagues in the Senate to join me as a cosponsor on this joint resolution.

ADDITIONAL COSPONSORS

S. 25

At the request of Mr. D'AMATO, the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of S. 25, a bill to amend title 38, United States Code, to provide a new educational assistance program for persons who enlist, reenlist, or otherwise enter the Armed Forces after December 31, 1980, and a career service person's educational assistance program, and to amend title 10, United States Code, to authorize an educational leave of absence for members of the Armed Forces.

S. 195

At the request of Mr. GOLDWATER, the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 195, a bill to incorporate the United States Submarine Veterans of World War II.

S. 259

At the request of Mr. GOLDWATER, the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 259, a bill to repeal the earnings ceiling of the Social Security Act for all beneficiaries age 65 and older.

S. 265

At the request of Mr. PERCY, the Senator from Delaware (Mr. BIDEN) was added as a cosponsor of S. 265, a bill to amend the Congressional Budget Act of 1974 to establish procedures for setting targets and ceilings, in the congressional budget process, for loans and loan guarantees under Federal credit programs.

S. 270

At the request of Mr. SCHMITT, the Senator from Nebraska (Mr. ZORINSKY), the Senator from Wisconsin (Mr. KASTEN), the Senator from Michigan (Mr. RIEGLE), the Senator from Kentucky (Mr. FORD), and the Senator from Wisconsin (Mr. PROXMIRE) were added as cosponsors of S. 270, a bill to amend the Communications Act of 1934 in order to encourage and develop marketplace competition in the provision of certain radio services and to provide certain deregulation of such radio services, and for other purposes.

S. 396

At the request of Mr. DANFORTH, the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of S. 396, a bill to impose quotas on the importation of automobiles from Japan during 1981, 1982, and 1983.

S. 451

At the request of Mr. LEAHY, the Senator from Maryland (Mr. SARBANES), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of S. 451, a bill to require Federal agencies to take steps to mitigate losses of U.S. agricultural land caused by Federal programs or actions, and for other purposes.

S. 491

At the request of Mr. GLENN, the Senator from South Carolina (Mr. HOLLINGS), the Senator from Maryland (Mr. SARBANES), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of S. 491, a bill to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes.

S. 574

At the request of Mrs. KASSEBAUM, the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of S. 574, a bill to amend the Internal Revenue Code of 1954 to allow the estate of a decedent a deduction for certain bequests of interests in property used in farms or other trades or businesses, and for other purposes.

S. 622

At the request of Mr. INOUYE, the Senator from Montana (Mr. BAUCUS) and the Senator from Montana (Mr. MELCHER) were added as cosponsors of S. 622, a bill to control the export of hazardous wastes.

SENATE JOINT RESOLUTION 31

At the request of Mr. GOLDWATER, the Senator from Utah (Mr. GARN) was added as a cosponsor of Senate Joint Resolution 31, a joint resolution to establish procedures regarding the termination of, or withdrawal from, treaties of military alliance, defense, or national security by the United States, and for other purposes.

SENATE RESOLUTION 74

At the request of Mr. MOYNIHAN, the Senator from Nebraska (Mr. EXON), the Senator from Washington (Mr. GORTON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Indiana (Mr. LUGAR), the Senator from South Dakota (Mr. PRESSLER), the Senator from Maryland (Mr. SARBANES), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Virginia (Mr. HARRY F. BYRD, JR.) were added as cosponsors of Senate Resolution 74, a resolution relating to actions taken by the foreign ministers of the nonaligned movement at their recently concluded meeting in New Delhi.

AMENDMENTS SUBMITTED FOR PRINTING

AMENDMENT TO BUDGET RECONCILIATION RESOLUTION

AMENDMENT NO. 14

(Ordered to be printed and to lie on the table.)

Mr. PROXMIRE submitted an amendment intended to be proposed by him to the concurrent resolution (S. Con. Res. 9)

revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

Mr. PROXMIRE. Mr. President, I am submitting a proposed printed amendment to Senate Concurrent Resolution 9, which I intend to call up when the budget resolution is considered this week. The purpose of the amendment is to restore the full budget authority and outlay cuts to the Export-Import Bank recommended by President Reagan. The amendment restores cuts in the amount of $1.636 billion and $481 million respectively in the Ex-Im budget outlays and authority for fiscal years 1981, 1982, and 1983.

Mr. President, I have a series of other amendments that I am sending to the desk to be printed which also will reduce the amount in the budget resolution well below what President Reagan has recommended.

Mr. President, I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 5, line 2, strike out "$6,146,000,000" and insert in lieu thereof "$6,394,000,000".

On page 5, line 3, strike out "$133,000,000" and insert in lieu thereof "$147,000,000".

On page 5, line 4, strike out "$15,460,000,000" and insert in lieu thereof "$16,125,000,000".

On page 5, line 5, strike out "958,000,000" and insert in lieu thereof "$1,068,000,000".

On page 5, line 6, strike out "$18,412,000,000" and insert in lieu thereof "$19,135,000,000".

On page 5, line 7, strike out "$2,274,000,000" and insert in lieu thereof "$2,631,000,000".

AMENDMENT NOS. 15 THROUGH 18

(Ordered to be printed and to lie on the table.)

Mr. PROXMIRE submitted four amendments intended to be proposed by him to the concurrent resolution Senate Concurrent Resolution 9, supra.

AMENDMENT NO. 19

(Ordered to be printed and to lie on the table.)

Mr. BOREN submitted an amendment intended to be proposed by him to the concurrent resolution Senate Concurrent Resolution 9, supra.

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. COHEN. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Select Committee on Indian Affairs.

The hearing is scheduled for April 6, 1981, beginning at 9 a.m. in room 6226 of the Dirksen Senate Office Building. Testimony is invited regarding oil thefts on Indian lands.

For further information regarding the hearing you may wish to contact Virginia Boylan or Max Richtman of the committee staff on 224-2251. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Select Committee on Indian Affairs, U.S. Senate, Washington, D.C.

ADDITIONAL STATEMENTS

DO WE REALLY NEED BATTLESHIPS?

● Mr. HART. Mr. President, the Navy's requested shipbuilding budget for fiscal year 1982 includes funds for re-commissioning two battleships. Not surprisingly, a request for battleships has aroused some doubts, even among those who support a stronger Navy. Every navy in the world discarded battleships after World War II, on the grounds that they were obsolete in an era of high-performance naval aircraft, not to speak of antiship missiles.

The Colorado Springs Sun recently published a thoughtful editorial on the battleship question. The issues raised by this editorial deserve the Senate's attention. While there is no doubt we need a stronger Navy, we should not proceed to re-commission two battleships—ships one observer suggested be renamed the *Repulse* and *Prince of Wales*, after two British dreadnoughts sunk in World War II by land-based aircraft—until and unless we are certain they are useful in modern naval warfare.

Mr. President, I ask that the editorial, "Why Does the Navy Ask Battleships?" from the Colorado Springs Sun be printed in the RECORD at this point.

The editorial follows:

[From the Colorado Springs Sun, Mar. 3, 1981]

WHY DOES NAVY ASK BATTLESHIPS?

How much of the reported Reagan administration plan for a rapidly expanded U.S. Navy is the Pentagon serious about? That is the logical question raised by the proposal to reactivate at least two battleships built during a war that ended over 35 years ago.

The huge dreadnoughts are impressive. Each can fire nine 16-inch guns at targets 20 miles away. In terms of naval warfare, they were admittedly the biggest, best—and last—of their kind.

But today, lighter, faster, less vulnerable ships mounting batteries of sophisticated missiles can lay down a much more devastating barrage at much greater distances. Aircraft and submarines have made most surface-bound ships extremely vulnerable. The personnel losses when a battleship goes down are horrendous—5,400 men were lost when the Germans sank the *H.M.S. Hood* in World War II.

The battleship admirals have retired or died. Today's naval strategists talk about various types of surface-effect vessels that ride above the water at speeds of up to 100 knots. Missile-firing boats not much different from the old patrol-torpedo boats can disable major combat ships.

One of the oldest ploys in the federal budget game is to ask for more than you expect to get, and then concede those major items you didn't really want in the first place. That may be a part of the Navy's strategy in suggesting the battleship revival. The plan also may be intended to serve a psychological purpose. It will get the country—and Congress—talking about our present naval situation.

Our fleet has less than half the number of ships it operated a decade ago, while the Soviet fleet—more than 1,600 ships—is more than three times as large as ours. In a war, our navy's first task would be to make the sea lanes safe for our vital trade. We know how much we depend on the supertankers that bring us nearly half our oil. We are less aware of our near-total dependence on imports of other vital raw materials. If our supplies of key minerals from southern Africa alone were cut off our electronics industries would be crippled, our communications systems in trouble and our auto industry forced to redesign its products.

We do need to restore our naval strength to deter aggressors from any unwise adventures. It can be a great force for keeping the peace. Building new sea power to serve for the next 20 years will cost a lot of money. But that money should be invested in ships and weapons systems that will be effective. It's hard to see how that could mean battleships.●

THE ALL-VOLUNTEER ARMY, NATIONAL DEFENSE AND THE DEMOCRATIC PROCESS

○ Mr. ARMSTRONG. Mr. President, I would like to call the attention of my colleagues to an article on "The All-Volunteer Army, National Defense and the Democratic Process" by my friend, Prof. Dwight R. Lee.

Professor Lee is an exceptionally talented economist and his observations about the Nation's defense needs are well worth careful study and consideration.

I do not personally agree with Professor Lee's conclusions about the need to restore the military draft. But I do think his arguments are worthy of serious consideration, not only by those who favor the draft but also by those of us who oppose resumption of the draft. I commend it to my colleagues and ask to have the article printed in the RECORD.

The article follows:

THE ALL-VOLUNTEER ARMY, NATIONAL DEFENSE AND THE DEMOCRATIC PROCESS

(By Dwight R. Lee)

The experiment with the all-volunteer army does not appear to be working. At a time when the need for military preparedness is increasing, the caliber of those being attracted into the armed forces is distressingly low. Yet most economists continue to favor the all-volunteer army over a return to draft, and this support is quite independent of their views on the desirability of devoting more resources to the military. John K. Galbraith, who has argued that Federal spending on domestic problems should take precedence over military concerns, favors the all-volunteer army, as does Milton Friedman who believes that the Federal Government has overspent on domestic programs while neglecting our military strength. This broad support among economists for a policy that is increasingly being viewed as a failure is easily explained. The economic argument favoring the all-volunteer army is completely sound.

But as is often the case with policy recommendations based on sound economic analysis, there has been a failure among economists to consider realistically the political environment in which decisions crucial to the success of the policy will be made. Economists commonly proceed as if their policy suggestions were to be administered by a benevolent dictator concerned only with the efficient pursuit of broad social objectives. But the policy that would be ideal in this completely fictitious setting may fall totally in a democratic setting, where implementation is subject to the buffeting of competing special interests. A realistic understanding of the problems of the all-volunteer army requires that the all-volunteer approach be analyzed within the broader context of a

political economy. Before turning to this task, however, it will be useful to examine briefly the narrower economic argument supporting the all-volunteer army.

THE ECONOMIC ARGUMENT

Economic analysis strongly suggests, contrary to public opinion, that the all-volunteer army allows us to acquire competent military personnel at less cost than is the case when we rely on conscription. The major cost advantage of the all-volunteer approach arises from the fact that it leaves individuals free to join the military, or not, depending on their evaluation of the relevant alternatives. Those whose productivities, and therefore salaries, outside the military are high will more likely choose to remain in a civilian capacity, while others are more likely to be attracted into the military. This means lower enlistment rates of those whose contributions are higher in non-military activities, and thus military personnel are acquired at less cost; with less value being sacrificed. This is true regardless of the size and sophistication of the armed force being considered. It is possible to staff a military of any size and competency by offering sufficiently attractive salaries. Obviously more civilian production has to be sacrificed to obtain a larger and more qualified military. But this cost is still minimized by the volunteer approach since, of those who satisfy the more stringent requirements, only those whose civilian options are least valuable will be enticed into the military.

Additional savings are realized under the all-voluntary army since, without the uncertainties created by the draft, young men are able to make career plans more efficiently. When facing the threat of the draft, young men commonly incur considerable costs in restructuring their lives in an effort to reduce this threat. In 1970, three years before the draft was discarded, it was estimated that unproductive college attendance, less productive employment choices, and legal action, all motivated by the desire to avoid the draft, cost $2.50 for every $1.00 taxpayers saving by being able to conscript.[1]

An important observation here is that although the draft is more costly than the all-volunteer army, the draft shifts much of the cost from the general taxpayer to those who are subject to conscription. If, for example, an 18 year old making $800.00 a month in a civilian job is conscripted into the army and paid $400.00 a month, including benefits, a $400.00 a month tax is being imposed on him. As far as taxation is concerned there is no difference between this situation and letting the 18 year old continue with the civilian job, but with $400.00 a month being deducted from his paycheck to finance an all-volunteer army.

But politically there is a significant difference between these two situations. With conscription the tax is politically disguised. The conscription tax, no matter how large, will never appear anywhere in the budget and is therefore largely invisible. It is this invisibility that explains the fact that most people believe the draft is cheaper than the all-volunteer army. Of course the tax imposed by the draft is not invisible to everyone. But the 18 to 20 year olds who bear the brunt of this tax are typically apolitical nonvoters, who as a group lack political influence.

This situation changes rather dramatically once the draft is replaced with an all-volunteer force. The entire cost of personnel acquisition is internalized into the budgeting process with it no longer possible for the politicians to ignore it. The hope of economists favoring the all-volunteer approach is that, by internalizing this cost, political and military decision makers will be provided both the information and motivation necessary to make rational decisions on the acquisition and deployment of military personnel. As opposed to the draft, strong incentives will exist to match abilities and job requirements in personnel assignments,[2] and not to expand manpower demands beyond the point justified by considerations of social costs and benefits.

POLITICAL REALITIES

This would be a persuasive argument if, once the costs of military manpower were fully recognized, we could depend on the political process to perceive accurately the social benefits provided by this manpower. But we cannot depend on this being the case. In fact, there will be a systematic bias in the direction of politically undervaluing the contributions of military personnel. It is here that a realistic understanding of the incentive structure embedded in democratic institutions is crucial if the problems with the all-volunteer army are to be seen not as temporary or superficial aberrations, but as inextricably tied to the democratic process.

Democratic institutions were established with the intention of giving the public a large measure of control over the composition of those services provided collectively. Through their voting and lobbying activities citizens convey information to politicians on their relative preferences for different expenditure programs; information politicians are not free to disregard if they hope to maintain the advantages of political office. Unfortunately, there is a perversity in this process that results in political decisions systematically undervaluing some government services while overvaluing others.

Paradoxically, those government activities having the best claim to promoting the public welfare by providing generalized benefits to everyone in society will typically be politically undervalued relative to those activities appealing to relatively narrow interests. A program concentrating most of its benefits on a few, while spreading the costs over all taxpayers, will be a program strongly favored by a few. And it will often be profitable for those in the small benefiting group to organize for the purpose of exerting political influence in the program's favor. This influence is likely to meet with little political resistance since there is little for any one individual in the larger group of general taxpayers to gain through opposition.[3] On the other hand, programs that in fact promote the public interest will spread both benefits and costs over the general population, possibly providing net benefits to everyone, but concentrating large advantages on no one.

Therefore we would expect, and certainly observe, that when people do organize politically they generally do so, despite high minded statements to the contrary, for the purpose of promoting legislation that focuses benefits on their organization. Thus politicians find themselves under much more scrutiny when considering special interest legislation than when considering public interest legislation, and under real pressure to favor the former over the latter. This is not to imply that public interest programs will not be funded, just that they will be funded less than their benefits and costs warrant when compared to the funding received by special interest programs. Given the allocation of expenditures we can expect from the political process, the larger community would be better served if more resources were made available to public interest programs at the expense of special interest programs.[4]

Probably no government service provides a more generalized benefits than does national defense. Providing the military with increased capacity to deter aggression against one section of the country provides all sections with additional protection. The tax dollars from Maine that are allocated to the military do just as much to provide for the security of California as do tax dollars from California. The political response to this situation, given the legitimate incentives elected representatives have to promote the interests of their constituency, is to undervalue the advantage of a strong military. Each representative knows that his constituency values national security. But he also knows that well organized groups within that constituency feel much stronger about federal government programs that will channel funds and services directly into their district.

Being able to benefit from defense expenditures no matter what their source, little advantage will be seen in sacrificing these local programs in order to augment military spending. Thus a politician who is adept at diverting funds away from the military in order to increase support for local programs will typically be a successful politician.[5]

This bias in the democratic process reflects itself at the level of political discussion with such phrases as the peace dividend. As the Vietnam conflict was winding down much was heard about how the "peace dividend" was going to allow significant amounts of money to be taken out of military budget and spent on domestic programs. But never during periods of economic strength, when the rationale for social welfare expenditure winds down, do we hear of a "prosperity dividend" to allow increased military protection of the system that makes the prosperity possible. When the political rhetoric does turn hawkish, it remains general, with little discussion of the specific sacrifices in social programs that will be required if the rhetoric is to be translated into reality. Except during times of extreme national emergency, the reality is persistent pressure on political decision makers to sacrifice the general advantages secured by military appropriations for the constituent specific advantages realized by expanding domestic programs.

Though the generalized benefits from national security put the military at a significant disadvantage in the political competition for appropriations, this disadvantage is moderated by the fact that some narrowly motivated groups do benefit from military expenditures. As with all government expenditure programs, those whose incomes are tied to defense spending will find advantage in lobbying for continued and increased support for the military. Ideally it should be the evaluations of those receiving the service that is reflected in political judgments, not the evaluations of those supplying the service. But as praiseworthy as our democratic political process is, especially in comparison with the real world alternatives, it does not perform ideally and we can consider ourselves fortunate that military expenditures do serve to convey private gains to special interest groups. Indeed, without those special interest gains and the political support they mobilize, there would be little hope that the broadly based demand for national defense could be effectively transmitted through democratic institutions and the dynamics of international conflict would place all but totalitarian regimes at enormous risk. Surely the military lobby is underrated as a bulwark of a democratic political order.

Desirable though the supply-side political pressures for national defense are, within it is contained a bias that helps to undermine the political feasibility of an effective all-volunteer military force. There are two broad categories of military expenditures: expenditures for military hardware and expenditures for military personnel. From the perspective of the public the preferred distribution of expenditures over these two categories is the one that provides the most military protection per dollar spent. But from the perspective of the political process the preferred distribution is the one that generates the great-

Footnotes at end of article.

est political support per dollar spent. It is the latter perspective that is controlling, and politicians find the advantage in favoring the interests of those supplying military hardware over the interests of those supplying military manpower.

The politician who is instrumental in securing a defense contract for his state or congressional district will be viewed as a benefactor by his constituents. He will have focused a very visible gain on those who can be expected to return the favor; a defense contractor and its employees. The defense contractor, with its concentrated interest, will generally be able to exert the greater political pressure; its viability depending in no small measure on the ability to reward its political friends and thus influence political decisions crucial to its financial health.[6] But the employees can not be dismissed as a political force. They will generally be people who have some sense of identity with their community and the political representation it receives, and they can be expected to be at least modestly active politically in support of a helpful politician. The political influence of these employees will likely be enhanced by union membership which provides them with a vehicle for transforming their economic interest into effective political pressure.

There is less to be gained by the politician who supports increases in the salaries of military personnel; especially entry level personnel whose salaries are crucial to the success of the all-volunteer army. The politician whose constituency contains military personnel will receive some advantage from a military pay boost. But such a salary increase will be general and this will serve to advance the prospects of all politicians who have military in their districts. For reasons already discussed, benefits that are general to many constituencies are less likely to activate political concern than those benefits that are focused on but a few. Even the politician facing military voters will see more to be gained by devoting most of his scarce political capital to the securing of benefits largely specific to important groups within his constituency, while hoping military salary increases will be secured by the efforts of others.

This tendency of the political process to put relatively little emphasis on the economic interest of entry level military personnel is accentuated by the fact that these personnel have little political influence. They are generally young, not highly educated, and subject to frequent transfer with little stake in their current community; all characteristics associated with political apathy and nonvoting. These are people whose interest politicians can ignore with a large measure of impunity.

It is important to point out that nonmilitary government employees are better positioned with respect to salary structure. There are several reasons for this. First, for reasons already developed, non-military activities are more likely to focus benefits on politically organized interest groups and thus are favored over the military in the competition for appropriations. Given the appropriations that are made, non-military hardware "requirements" are less open ended than is the case with the military, so there is less potential for non-military funds to be diverted out of the personnel budget and into hardware expenditures. Also, civilian government employees, as a group, are more stable geographically, better educated, and more likely to belong to organized professional and employee groups. Because of these characteristics they are more active and influential politically than are military personnel, and are thus better able to protect their interest in the political arena.

Additionally, to a far greater extent than with the military the political demand for non-military programs will come from those who receive the service provided. These politically influential clients, because they commonly have direct contact with the government personnel providing the service, will receive continuous information as to the competency of these personnel. With the clients generally, though not always, being better by higher caliber personnel, one can expect political pressure to maintain capable employees. This means paying attractive salaries. This contrasts sharply with the military situation. Individual members of the general public benefiting from the security provided have little personal motivation to register their demand for this benefit through the political process. Furthermore, the public receives the national security provided without having to interact with military personnel in the performance of their duties. Thus the competency of military personnel can decline and it will not likely be noticed by the public, and will not motivate a significant political response even if it is.

AN INVITATION TO UNIONIZATION

As desirable as it would be to overcome the political impotency of enlisted military personnel in the competition for adequate salaries, the most obvious suggestion for doing so raises extremely serious problems. The unionization of the armed forces has been recommended by some as a means of obtaining increased compensation for the military. But in order to be effective a military union would have to be granted powers that are fundamentally inconsistent with the nature of the military mission.

The ability of any union to increase the wages of its members comes primarily from the ability to withhold labor services at times when these services are vitally needed. Granting a military union the power to strike is to grant it a power that will only be used responsibly if the union leaders ignore the opportunity to increase their members' incomes, as well as their own, by striking, or threatening to strike, during time of war. John L. Lewis and the United Mine Workers could not resist such an opportunity during World War II. No one responsible to the public interest would rest the security of our country on the hope that the leaders of a military union will do what John L. Lewis, and most others for that matter, have not been able to do; subordinate their private interests to the public interest.[7] But therein lies the explanation for why some are advocating a military union; there are private interests to be served by such a union that are more compelling at the personal level than are considerations of the public interest. Indeed, a major flaw in the all-volunteer concept is that it creates a situation that can be exploited by union organizers who would benefit from the unionization of the military.

The declining compensation that has accompanied the all-volunteer approach has made military personnel more responsive to the idea of unionization. A survey of 120 officers and enlisted men at Fort Benning, Georgia in 1977 showed 51 percent believing that a military union could prevent fringe benefit losses.[8] Robert Nolan, the National Executive Secretary of the Fleet Reserve, warned in 1976 that "the support for the concept of a military union amongst the junior personnel is absolutely astounding. Even many of the career designated personnel seemed resigned to the philosophy that a union would represent them more effectively and protect their earned benefits to a greater degree," than is now the case. The most consistent view Nolan reported hearing was that "the Department of Defense and the U.S. Congress are more concerned with military hardware than personnel."[9]

Another factor contributing to support for the union is the post-draft recruiting emphasis on the military as an occupation not unlike other occupations. In attempting to justify military unionism Leo Pellerzi, General Council for the American Federation of Government Employees (AFGE), argued, "It is a volunteer army and that means people are selecting a military career as a means of livelihood and not for patriotic reasons. Servicemen today aren't responding to an attack on the country. They want to be paid."[10]

In the spring of 1975 the executive council of the AFGE voted unanimously to form a committee to study the possibility of organizing military personnel. Leaders of the AFGE were enthusiastic about the possibility of significantly expanding membership, and its national convention voted on September 23, 1976 to change the union constitution to permit military personnel to join. However, in September 1977 the AFGE dropped plans to proceed with military unionization after locals of the AFGE voted against such an effort."[11]

Although nothing came of this early threat to unionize the military, other unions have made similar explorations and Congress has taken the threat seriously. In 1978 Congress passed a law barring military unions and it was signed into law by President Carter. But Kenneth Blaylock, president of the AFGE believes there is a good chance the military will eventually be unionized regardless of the laws that are passed. In an interview with Army Times he stated, "Look at the law back in the early part of the century. There were laws against anybody belonging to unions. And the people finally will stand, you know, law or no law . . . they could pass all the laws they want to saying you can't organize . . . But it's going to reach a point, they won't be able to dodge it."[12]

The issue of military unionization is currently in remission. But the all-volunteer army creates opportunities that union leaders are by no means ignoring. And when the timing appears right one can be sure that there will be further efforts to take advantage of these opportunities. But even without the problems of unionization we are still left with the consequences of an all-volunteer approach which is incapable of maintaining the caliber of military personnel.

THE CONSEQUENCES OF THE ALL-VOLUNTEER APPROACH

The logic of the democratic process leads to the conclusion that relative to other government activities the military will be underfunded and, that of the funds that are allocated to national security expenditures, outlays on military hardware will be favored over those for military personnel. From this one could have predicted that the switch to an all-volunteer army, by making the quality of our military personnel dependent on their worth being determined through the political process, would reduce the ability of our armed forces to provide for the national security. And this is what has happened.

Military pay was boosted in November 1971 in anticipation of the draft being eliminated. From that time there was not another significant increase in military pay until October 1980, during which time the military income in real terms (after adjusting for inflation) declined substantially. Even with the October 1980 increase the compensation received by the new recruit (including allowances for quarters, subsistence, and certain tax advantages) is 7 percent less in real terms than it was in November 1971.[13] Between 1972 and 1978 the real earnings of blue collar federal employees increased approximately 12 percent.[14] Because of the declining incentive for people to enlist in the military the only way to approach recruitment goals has been to lower personnel standards. From October 1979 through March 1980 (the first half of fiscal year 1980) only 38 percent of Army recruits were high school graduates. Forty six percent of Army recruits now fall into the lowest acceptable mental category (category 4) as opposed to only 21 percent during World War II. Many

Footnotes at end of article.

military training manuals have been rewritten to conform to a 7th grade reading level. Skill qualification scores required for promotion have been lowered from 80 to 60 percent. Yet data from 1977 and 1978 show that 90 percent of the nuclear weapons maintenance specialist and 98 percent of the tank turret and artillary repairmen failed their Skill Qualification tests. In 1979, 91 percent of the aviation maintenance personnel failed their Skill Qualification tests. A 1977–78 study found that 17 percent of the tank commanders in Europe and 21 percent of those in the United States quite literally did not know where to aim when employing battlefield gunnery.[15]

Some have argued that test scores and academic achievement are unrelated to the actual hands-on performance required to maintain an effective military. But there are studies which strongly indicate that the best indicator of combat performance is the schooling and intelligence levels of those in the force. Studies commissioned by the Army during the Korean War support the view that educational background and combat effectiveness are positively correlated.[16] "Project 100,000," a study conducted in the late 1960's to investigate the responsiveness of Category 4 recruits to training, uncovered a high correlation between intelligence, as measured by aptitude tests, and combat performance.[17]

Certainly the reduced competeny in military personnel comes at a time when growing demands are being placed on their skills by increasingly specialized, complex, and expensive military hardware. To cite but one example, the Army estimates that 13 percent of its enlisted force must now be trained in electronics to maintain military preparedness. This is double the percentage required as recently as 1974.[18] As was argued earlier, the political incentives to allocate funds for sophisticated hardware are more compelling than are those to appropriate the funds necessary to attract personnel competent enough to properly utilize it.

Even with the lower standards the military has been forced to accept in order to maintain sufficient numbers of personnel, recruitment has been frustrated. None of the four services were able to achieve their recruiting goals in 1979; overall enlistments coming to only 91 percent of the desired number. Only with the aid of increased unemployment during the recent recession, was 99 percent of the recruiting goal reached during the first half of fiscal 1980. And of those who do enlist, a high percentage never complete their first tour of duty. Of the Army's enlistees, 34 percent leave before their first 3 year term is up; being dismissed by the Army as being totally unacceptable.[19] Equally distressing is the impact the all-volunteer approach is having on the number of Individual Ready Reserves; those with military training and available for emergency duty in case of war. Without the threat of the draft and with little financial inducement, the number of reservists has declined significantly; from 759,000 in 1973 to 206,000 in the Fall of 1979.[20] This decline has clearly increased our vulnerability during the early stages of a war. And demographic considerations are going to aggrevate these recruiting problems in the years to come. In 1980 approximately 2.13 million males reached the age of 18. This number will drop to approximately 1.8 million in 1985 and 1.7 million in 1990.[21]

CONCLUSION

Given the tendency for the democratic process to undervalue the national benefits provided by competent military personnel, the all-volunteer army, by forcing political decision makers to face up to the full cost of manpower acquisition, systematically results in a less competent military than is desirable. The possibility of error is not eliminated, of course, with the military draft. But the draft, by making some of the personnel cost politically invisible, serves to offset the bias toward undervaluing this personnel. This can, though not inevitably, result in an excessively competent armed force; excessive in that the social cost of additional competency is greater than the benefits from increased national security. The debate over the all-volunteer army versus the draft then comes down to the question: Is it better to systematically err in the direction of too little military preparedness, or to structure the situation so that it is possible that error will lead to excessive capacity to provide for our national security? Putting wishful thinking to one side, it is surely recognized that the potential consequences of the former error are vastly more catastrophic than are those of the latter.

But a crucial consideration lying behind any discussion of our national security is that of maintaining a social order consistent with the maximum degree of individual liberty. It is the strongly held view of some that there is a fundamental inconsistency in the use of involuntary servitude to maintain a free society. In this view the military draft is a violation of basic freedoms which cannot be reconciled with a social structure based on economic freedom and political democracy.

Here we confront on the age old issue of how much restraint on individual liberties is justified in order to maintain the maximum degree of liberty consistent with a stable social order. All laws serve to restrain some freedom of individual action, but as John Locke wrote in the 17th Century, "The end of law is not to abolish or restrain but to preserve and enlarge freedom; for in all the states of created beings capable of laws, where there is no law there is no freedm." [22] In transmitting the text of the U.S. Constitution to the Continental Congress, George Washington emphasized Locke's point when he wrote, ". . . Individuals entering into society must give up a share of liberty to preserve the rest. The magnitude of the sacrifice must depend as well on situation and circumstances, as on the object to be obtained. It is at all times difficult to draw with precision the line between those rights which may be surrendered, and those which must be reserved; . . ." [23]

Washington recognized that even if there is no disagreement with the view that enlarging the scope of liberty requires that some freedoms be sacrificed, we are still left with the question as to which freedoms "must be reserved." More focused to the concerns of this paper is the specific questions of whether or not the draft is an unjustifiable infringement on our liberty. Obviously individual value judgments are important here and complete agreement is surely impossible. There can be agreement however, that the debate over a return to the draft should be informed with a realistic assessment as to the consequences of the relevant alternatives. If the alternative to the draft could be an all-volunteer armed force whose overall competency was adequate to insure our national security, then the argument for attenuating the freedoms of young men with the draft would lose much of its merit. But it, as suggested in this paper, an effective all-volunteer army is not consistent with the democratic institutions that are so important to our political freedoms, then the comp'exion of the debate changes significantly. The military draft may be more crucial to the maintenance of our freedom than is commonly recognized.

FOOTNOTES

[1] The Report of the President's Commission on the All-Volunteer Armed Force, Washington, D.C. 1970.

[2] This conclusion has been challenged by Roland McKean in his article, "Property Rights Within Government, and Devices to Increase Government Efficiency," *Southern Economic Journal*, October 1972: 177-86. McKean argues that since no one is in a position to appropriate the gains from increasing assignment efficiency, there will be little to motivate an improved match up between skills and tasks even with the all-volunteer army.

[3] This is an example of the general proposition that large groups are less able to accomplish a collective objective than are small groups. For the seminal discussion of this point, see Mancur Olson, *The Logic of Collective Action*, Harvard University Press, Cambridge, Mass. 1965; especially chapters 1 and 2.

[4] I am not addressing here the issue of the proper size of the public sector relative to the private sector. Conceivably both general interest and special interest programs could be too large relative to the private sector if, as seems increasingly apparent, the public sector in general is excessively large. Of course, there are academic arguments on both sides of the question as to whether government is too large or too small. For a nice review of this literature see Ryan Amacher, Robert Tollison, and Thomas Willett, "Risk Avoidance and Political Advertising: Neglected Issues in the Literature on Budget Size in a Democracy," in Amacher, Tollison and Willett (eds.) *The Economic Approach to Public Policy*, Cornell University Press, Ithaca and London, 1976. For a discussion of some attempts to address this question empirically see William Niskanen, "Bureaucrats and Politicians," *Journal of Law and Economics*, December, 1975: 617-43.

[5] The view that the military is underfunded is commonly challenged. More often than not these challenges are grounded on little more than wishful thinking about how the world ought to be. However, for an interesting economic argument that the defense budget will be excessive in a democracy because of the effectiveness of political advertising in the presense of unknown risks, see Amacher, Tollison, and Willet, op. cit. For a rigorous economic argument that supports the view that the military will be underfunded in a democracy see Gordon Tullock, "Problems with Majority Voting," *Journal of Political Economy*, December, 1959: 571–79.

[6] This political incentive to favor the interests of suppliers of military hardware is reinforced by a tendency on the part of the military to favor spending that generates visible outputs. Adding to the stock and sophistication of weaponry better accomplishes this purpose than does upgrading the caliber of entry level personnel. For a general discussion that provides both theoretical and empirical support for the view that government bureaus favor expenditions which increase the more visible attributes of the service provided see Cotton M. Linday, "A Theory of Government Enterprise," *Journal of Political Economy*, October 1976: 1061–77.

[7] In the words of Alan Sabrosky, ". . . any case for military unionization rests on the contentions that the unions would be nonpartisan, apolitical, quiescent during periods of national emergency, and totally unwilling to employ their most effective instrument—the strike—in order to lend weight to union demands. Such contentions, it seems to me, are unfounded. There is no sound reason to assume that military unions would exercise a degree of politically neutral self-restraint and self-denial unparalleled in the history of the labor movement. Such restraint is certainly not borne out by the performance to date of a number of American public-service unions." See pages 417–18 of Alan A. Sabrosky, "Unionization and the U.S. Military: A Conference Report," *Orbis: A Journal of World Affairs*, Summer 1977: 413–18.

[11] "Union Votes Not to Organize," *Air Force Times*, September 19, 1977.

[12] "AFGE Chief to 'Speak Out' for Military," *Army Times* October 17, 1977: p. 62.

[13] In November 1971 the annual compensation (includes basic pay, basic allowance for quarters, basic allowance for subsistence, and consideration of a tax advantage on the last two items) for recruits amounted to $3,943 in 1967 dollars. After the October 1980 pay increase this annual compensation was only $3,663 in 1967 dollars. The information on compensation in current dollars was obtained from Doug McCormick of the Office of Assistant Secretary of Defense, Directorate for Compensation, Pentagon.

[14] Reported in *Time Magazine*, June 9, 1980, p. 27. The discrepancy between the trends in military and non-military pay is greater than these figures indicate because the pay of civilian workers is increased over shorter intervals than has been true for the military.

[15] These figures come from Constance Holden, "Doubts Mounting About All-Volunteer Force," *Science*, September 5, 1980: 1095–99.

THE 125TH ANNIVERSARY OF HOREB LODGE, NEW HAVEN, CONN.

● Mr. WEICKER. Mr. President, I wish to heartily congratulate B'nai B'rith's Horeb Lodge in New Haven, Conn., on the occasion of its 125th anniversary.

B'nai B'rith is Connecticut's oldest fraternal organization, but one with an accent on youth. In 1925, B'nai B'rith began sponsoring Hillel Foundations which today serve some 400,000 college age Jewish students on more than 400 campuses nationwide. High school teenagers numbering nearly 25,000 take part in B'nai B'rith youth organizations and a broad spectrum of young people depends upon its career and counseling service to help sort out the bewildering array of schools to attend and career paths to follow.

Horeb Lodge has taken an active role in the funding and staffing of these service organizations. I wish to commend the lodge and B'nai B'rith as a whole for their dedication to the future generation of American leaders.●

MEXICO JAILS AMERICAN ON CHARGE HE IMPORTED U.S. CHEMICAL WASTES

● Mr. INOUYE. Mr. President, on March 5, I introduced S. 622, a bill to control the export of hazardous wastes. The goal of the legislation was to protect both our foreign policy interests and the health and environment of countries around the world. Upon introducing the bill, I stated that the major loophole in our efforts to control the disposal of hazardous wastes was that they could be shipped abroad. This traffic is currently unregulated, often undocumented, and occasionally illegal. A case in point, and one which highlights the urgency of the problem, was recently reported in the New York Times of Friday, March 20. It involves a U.S. citizen who was arrested by Mexican officials for illegally importing and dumping PCB's, mercury wastes, and activated carbon in Zacatecas.

While the case is still under investigation, the allegations are quite serious. They certainly warrant our attention.

I ask to have the article printed in the RECORD.

The article follows:

MEXICO JAILS AMERICAN ON CHARGE HE IMPORTED U.S. CHEMICAL WASTES

(By Ralph Blumenthal)

The Mexican authorities have jailed a 75-year-old American and seized a shipment of PCB's and other hazardous chemical wastes from the United States that they say he imported illegally for disposal in Mexico.

State Department officials confirmed that the American, Clarence W. Nugent, the operator of a mercury recovery business in Zacatecas in central Mexico, was arrested March 7 on charges of importing contraband and violating health laws. They said he was in jail in Mexico City and that in meetings with American Embassy representatives he had dismissed some of the allegations as "foolishness."

According to Sue Patterson of the State Department's Office of Environment and Health in Washington, Mexico has asked the American Government to take responsibility for the wastes and to arrange their cleanup and safe return to the United States. The American response is under consideration.

Spokesmen for some leading American corporations confirmed that they had sent chemical wastes—in one case PCB's, or polychlorinated biphenyls—to an agent of Mr. Nugent's in Houston for shipment to Mexico. But they maintained that they had properly reported the fact to American authorities and that Mr. Nugent had convinced them he was authorized by the Mexicans to handle hazardous wastes.

The case comes amid growing concern by some American environmental officials that overseas disposal may be emerging as a significant loophole in tougher new hazardous waste disposal regulations in the United States.

"Now that we're cracking down on disposal at home," said Hugh Kaufman of the Hazardous Waste Control Division of the Environmental Protection Administration. "we have to be sure not to spread the worst of America around the world. It could affect our foreign policy for years."

State Department officials described Mr. Nugent as a longtime resident of Mexico, married to a Mexican woman. They said he has operated a mercury mine and mercury recovery business for at least seven years in the town of Mazapil in Zacatecas. In addition to extracting mercury from the wastes of American companies and then selling the recovered mercury back to the companies, Mr. Nugent also operated an incinerator for disposal of chemical wastes, including apparently PCB's, a highly toxic insulation material used in transformers and other electrical equipment.

It was a Feb. 27, 1980, shipment of 260 drums of wastes that landed Mr. Nugent in jail. According to the Mexican inventory, there were 42 drums of PCB's, 40 drums of mercury cinders and 120 drums of activated carbon—chemical-contaminated filter material.

A spokesman for Diamond Shamrock Corporation in Dallas said yesterday that it had shipped 17 drums of the PCB's for what it believed would be proper disposal. Other wastes came from Monochem, since taken over by Borden Inc., and a B.F. Goodrich plant in Kentucky.

The Mexican Government has alleged that the PCB's had been misleadingly listed as "catalyzing agents" on the entry documents and that customs officers may have been bribed. The Mexicans also charged that Mr. Nugent had dumped up to 5,000 tons of mercury cinders in the area and provided empty waste containers to Mexicans for water storage.

However, Ivan Matula, a Houston chemical waste broker who worked with Mr. Nugent, said in a telephone interview that Mr. Nugent was blameless and was being victimized for refusing to pay off Mexican officials.●

THE JEFFERSON AWARDS

● Mr. LUGAR. Mr. President, last week the Indianapolis Star announced the recipients of this year's Jefferson Awards. The Jefferson Award is one of the highest honors given in Indiana. Each year 10 outstanding citizens receive the esteemed award in recognition of their outstanding public service. The winners typify the service of many Hoosiers who dedicate their time and energy freely to their communities without compensation and without expecting public recognition.

I would like to include short biographies of this year's 10 Jefferson Award winners in the CONGRESSIONAL RECORD to share with you their activities of service to Indiana.

The biographies follow:

10 JEFFERSON AWARD WINNERS NAMED

A 90-year-old former hospital volunteer, a man who was determined that "abandoned children are no longer abandoned" and a woman whose personal loss led her to leadership in raising funds for cancer research, are among 10 persons who will receive The Indianapolis Star's Indiana Jefferson Awards.

"It was no easy task selecting 10 winners from the several hundred nominations," commented Gordon St. Angelo, chairman of the panel of judges which studied the biographies and made the selections.

"In fairness to the many people who give so freely of themselves to help others, the judges feel that the 10 winners typify the many who do outstanding public service without compensation and without expecting public recognition," St. Angelo said.

The winners will attend a luncheon Wednesday in the Indianapolis Athletic Club to be honored by Gov. Robert D. Orr, Mayor William H. Hudnut, Michael Carroll, special assistant to Sen. Richard G. Lugar (R-Ind.), and representatives of The Star, including Eugene S. Pulliam, publisher, and Lawrence S. Connor, managing editor.

Winners of the fifth Indiana Jefferson Awards named for President Thomas Jefferson, are:

Carlton Chaney, 2418 Sheldon Street.

Francis R. (Dick) Elliott Jr., Russiaville.

Cheryl Ann Forslund, 3438 Clearview Drive.

James T. Gatlin, 1315 Lemans Drive.

Clayton Keller, Anderson.

Arthur D. Pratt, 2050 Alabama Street.

Willa M. Thomas, 3420 North Meridian Street.

Gracie Whitenack, 5600 East 16th Street.

Hortense G. Young, 5920 Lawrence Drive.

James W. Zimmerman, Rochester.

The winner will receive plaques from The Star and bronze medallions from the American Institute for Public Service, sponsors of the national Jefferson Awards program. Indiana recipients will be considered by the institute in the naming of five national winners.

Judges for the Indiana awards in addition to St. Angelo, senior program director for Lilly Endowment, were:

John V. Barrett, former president of the Indiana State Chamber of Commerce and trustee of Indiana Vocational Technical College (Ivy Tech).

Robert N. Brown, publisher of the Columbus Republic, Franklin Daily Journal and Greenfield Reporter.

Mrs. Howard J. Lacy, treasurer and board chairman of Lacy Diversified Industries.

Dr. Frank P. Lloyd, vice-president and director of medical research at Methodist Hospital.

James T. Neal, president and executive editor of Ledger Publications of Noblesville, Republican national committeeman for Indiana, and former chairman of the Indiana Republican State Central Committee.

Doris Parker, regional relations coordinator for Indiana Vocational Technical College.

Dallas Sells, director of Region 3, United Auto Workers.

CARLTON S. CHANEY

Carlton S. Chaney, 52, received his Jefferson Award in recognition of his many years of community service, including founding of the Edwin Carlton Chaney Singers, a musical group which provides financial assistance for a number of worthy causes.

He is a brother of Colion (Champ) Chaney, a Jefferson Award winner in 1977.

It was in October 1975 that Carlton Chaney organized a group of young gospel singers, now numbering 66, as a means of helping them help themselves, and through their efforts, helping many others. The singers range in age from 10 to 34.

Every Saturday morning, under Chaney's direction, the singers rehearse in half a double at 2416 Sheldon Street, which he bought and remodeled at his own expense to provide a home base for the musical group.

Two hours before the rehearsal starts, he takes the wheel of a big blue bus and travels across the city picking up the singers. He repeats the procedure every Sunday afternoon, preceding their weekly concert appearances at various churches where free will offerings provide the funds to finance the group's philanthropic projects.

Among its activities in the last five years, the gospel singers have given financial aid to college students and victims of fires, presented annual benefit concerts for the Blind Club of Indianapolis, provided food and clothing for needy families, made yearly contributions to the Guiding Light Club, and presented a special program at School 56, 2353 Columbia Avenue, to raise money for equipment and supplies. The gospel singers provide an outlet for only a part of Chaney's community service activities.

He has been active in the Martindale Area Citizen's Service (MACS), including the raising of funds to enable area residents to repair their homes and to provide low-income residents with financial assistance.

As an employee of the Chrysler Corp. 13 years, he has served as a training counselor, working with trainees who had criminal records or were uneducated.

For many years, he has assisted the elderly without charge, mowing lawns, shoveling snow, fixing broken down plumbing, repairing electrical breakdowns.

As one of his sponsors noted, Chaney's life may be summed up with the words from his favorite song: "If I Can Help Somebody . . . Then My Living Shall Not Be In Vain."

Chaney and his wife live at 2418 Sheldon Street with two of their seven children.

FRANCIS R. ELLIOTT

In April 1975, Francis Richard Elliott Jr. of Russiaville, then 29, underwent an eight-hour operation for removal of his large intestines and rectum. Fortunately, he survived and recovered and since then has devoted much of his time and effort counseling others who face similar operations.

Shortly after the operation, he joined the Kokomo Chapter of the United Ostomy Association, subsequently served as secretary and president, and spent a year as a state representative for the United Ostomy Association for Central and Northern Indiana.

But possibly his greatest service has been extending to other ostomy patients his support and knowledge, advising them how to care for their artificial organs and where to find the proper supplies.

He has spent hours at the bedsides of patients whose lives could not be saved by surgery, attempting to make the final days easier for them and their families.

Elliott is called upon frequently by doctors and nurses of hospitals in Howard County, Marion and Wabash to counsel with ostomy patients and help care for them when they are recovering from operations.

Carrying his health service one step further, he organized the Mayor's Advisory Council for Handicapped Individuals at Kokomo and was appointed chairman by Mayor Stephen J. Daily. Most of his free time last year and this year has been spent working with the handicapped.

Mainly as a result of Elliott's work, Kokomo was named a model city for the handicapped by the U.S. Council for the International Year of the Disabled Person. Last November Elliott went to Washington to receive the award.

He is a member of the board of Big Brothers and Big Sisters and a veteran of the Navy and the Indiana National Guard. He is employed as a line-feeder stockman at Delco Electronics at Kokomo. He and Mrs. Elliott are the parents of four sons and a daughter.

JAMES T. GATLIN

James T. Gatlin, 1315 Lemans Court, a reformed alcoholic, has devoted his time, energy and financial resources the last 14 months to rehabilitating youths 11 to 16 who have become addicted to alcohol.

Through his membership in Alcoholics Anonymous and working closely with juvenile authorities, he has established a court-approved rehabilitation program of his own that has restored 120 youthful problem drinkers to sobriety and decency.

Gatlin, retired at 59 because of emphysema, started his youth program after slowly recovering in the Fairbanks Hospital from a long bout with alcohol and deciding there must be a better way to live.

Childless, he determined to concentrate his efforts among the young, many from broken homes with an alcoholic parent.

Prior to Gatlin's efforts, the Juvenile Court had only two alternatives in dealing with the male teen-age alcoholic—send him to the Indiana Boys' School at Plainfield until he was 21, or set him free, probably to resume his drinking habits.

Now there is a third choice. Many of the offenders are released to Gatlin's custody and he transports them to a treatment center, often 300 miles away in Kentucky, using his own car and paying all the expenses.

If the judge decides to send a boy back home, Gatlin counsels with the youth and takes him to at least three A.A. meetings each week and helps in finding him a job if he needs one.

Gatlin was responsible for banishing the rule that Indiana alcoholic treatment centers would not accept anyone under 16. Many youthful problem drinkers, who have heard of Gatlin's program, voluntarily seek him out for help. Each week he counsels from four to a dozen young people.

He has missed only two days at the Juvenile Detention Center in the last 14 months and his telephone at home rings constantly. Often he drives several hundred miles a week taking young to treatment centers, hospitals and A.A. meetings.

One of Gatlin's sponsors for the Jefferson Award described him as a "one-man cause," saying he has given his young charges hope for a new and different way of life, one of freedom, not slavery to alcohol, one of love and compassion for his fellow man."

CHERYL ANN FORSLUND

Cheryl Ann Forslund, 3438 Clearview Drive, could have withdrawn from life after her first two children died of cancer.

Instead, she pledged her life to fighting the dread disease among the young and as founder and state president of Riley Cancer Research for Children Inc. (RCRC) has been primarily responsible for raising more than $250,000 in the last four years for research into the causes of cancer among children.

Her daughter, Ericka, was only 17 months old when doctors determined in 1975 that she suffered from neuroblastoma, a tumor-type cancer. The youngster died six months later, one week before her second birthday.

Mrs. Forslund's son, Michael, was born with Hallerman/Streif syndrome, rare form of cancer, just three weeks before Ericka's illness was diagnosed.

For half a year, Mrs. Forslund had to care for two critically ill children simultaneously.

While she was nursing Michael after Ericka's death she learned that Riley Hospital for Children was a major research center for childhood cancer and desperately needed funds to carry on the work.

Thus developed her dream of an organization to help in the fight.

She had little encouragement at first but proceeded doggedly with her plans, telephoning possible supporters and addressing various groups even though she never before had made a speech.

Finally, Riley Cancer for Children Inc. became a reality in September 1976.

But Mrs. Forslund's victory was clouded by tragedy a second time.

Michael died suddenly of unforeseen complications only 24 hours before RCRC's kick-off event at which its formation and purpose were announced.

She refused to allow grief to interfere with her determination to conquer the disease. Only three days after Michael's death, she chaired an RCRC state board meeting and two days later attended the Indianapolis RCRC chapter meeting.

In the first three months of its existence, RCRC raised $10,000 primarily as a result of Mrs. Forslund's speeches to service organizations. Four years later the total had risen to more than $250,000.

In addition to her fund raising efforts, Mrs. Forslund got in touch with parents of other young cancer victims, offering her aid and sympathy, as well as enlisting their support in the battle.

She has participated in many seminars and delivered more than 100 speeches on cancer in children, death and dying and the problems of living with a chronically ill child.

In the words of her sponsors at the Indiana University Medical Center, "Mrs. Forslund's personal courage, sensitivity and dedication have meant much to many citizens of Indiana, I know of no other individual more deserving than she for the Indiana Jefferson Award."

Since the deaths of their first daughter

and son, Mrs. Forslund and her husband, James F. Forslund, have become the parents of two more children, now 15 months and 3½ years of age.

HORTENSE G. YOUNG

The life of Hortense G. Young has been one of service and involvement—from her graduation from Wayne State University, through her teaching career at Grosse Pointe, Mich., to her many years in Indianapolis.

Experience as a teacher opened the door to her participation in educational groups such as the Education Committees of the Urban League and the Greater Indianapolis Progress Committee, the PTAs of Lawrence Township and Marion County, the Advisory Council of the Indianapolis Public Schools and the Education Committee for Exceptional Children in Lawrence Township.

She was instrumental in the formation of the Coalition for Quality Integrated Education, which she heads.

As a member of the Indiana State Library Committee, she was active in the organization of a countywide library system for Indianapolis.

She has done volunteer work for the Indiana International Fellowship Inc., which participates in a foreign student exchange program.

She also was a Girl Scout leader for eight years and has served as a volunteer for Women in Community Service, Southside Community Health Center, Bipartisan Committee for the Juvenile Court, Social Health Association, League of Women Voters, Marion County Medical Society Auxiliary, American Association of University Women, Community Service Council and United Way.

She has chaired the Indiana Inter-religious Commission on Human Equality and the Advisory Board of Indiana Repertory Theatre for a number of years and is chairman of the Indiana Region of the National Conference of Christians and Jews.

Also politically active, she was an unsuccessful Democratic candidate for the City-County Council in 1971.

She has been named Woman of the Year of B'nai B'rith and, in 1977, was cited by the Indianapolis Urban League for her "outstanding contributions" to the city.

ARTHUR D. PRATT

"Wherever you find the poor, the indigent, the alcoholics and the drug addicts in Marion County, you will find Arthur Pratt working among them, trying to help."

That's how one nomination aptly summarizes why Arthur D. Pratt is among this elite group.

The Indianapolis native and Shortridge High School graduate began his involvement with helping alcoholics in 1956 at Baltimore, Md., where he helped found the Flynn Christian Fellowship Houses Inc.—fraternal homes for alcoholics and the homeless.

Pratt, president of the National Association of Flynn Houses, which has established 32 homes in 25 cities, lived in the inner city at Baltimore and has lived in the Flynn House of Marion County since his return to Indianapolis in 1962.

He is a former director of the Marion County Municipal Court Alcoholic Rehabilitation program, which helps reform alcoholics and drug addicts under court supervision. He is also founder of Community Inter-Faith Housing Inc., which provides a proper living and basic services for the elderly and low-income families in the inner city.

Director of Biblical Studies at Christ Church Cathedral here, he is the author of three books—"The Party's Over," "Christ and America's Survival" and "How to Help and Understanding the Alcoholic or Drug Addict."

Before turning his interest to helping alcoholics, Pratt managed his family business, Pratt Printing Co. Inc. In 1952 he became director of the Foundation for the International Economic Development, Inc., but as president of Pratt Printing, he retains ties to the family business.

From other nominating letters came these tributes: "His life is a testament to the ability to combine faith and good works and to inspire others by precept and example to do much more in humane service."

And "I have known Arthur D. Pratt as the most tenacious, patient and effective worker in Central Indiana with disadvantaged citizens—particularly alcoholic and drug abusers."

GRACE WHITENACK

Grace Whitenack, who in 1932 became Methodist Hospital's first volunteer, was thrilled when Charles Curran, a fellow hospital volunteer, was named winner of a Jefferson Award in 1978.

The many friends she made in 48 years of volunteer service at the hospital can feel the same emotion for Ms. Whitenack, who at age 90 was forced to curtail her volunteer activities in February 1980 after suffering a stroke.

Nevertheless, the first "pink lady" of the hospital—the title given to Methodist's female inservice volunteers—is very alert. In fact, it wouldn't be surprising if she were as nimble as she was on the first day of volunteer work when she helped deliver a child for a frantic mother before they could get the woman to the delivery room.

"You name it, and I've done it," she said once in an interview. "I've been volunteering at Methodist Hospital so long that I feel like a peg in the wall. I love it here and I wish I could come every day."

A longtime member of Methodist's White Cross Guild, she attended Perry Township Guild meetings regularly and prepared patient care materials in the White Cross Service Center in addition to her weekly volunteer work for the central service department.

And what do you think she wanted for her 90th birthday present July 4, 1979?

A ride on a motorcycle.

"I've never ridden one before, and it's something I've always wanted to do," she said.

She got her wish when friends at the Eastview Baptist Church here arranged for the ride before a prayer meeting on her birthday.

Her idea of a birthday present is further testimony to the woman's spunk and zeal, which, along with her smile, are sorely missed by the friends she made at Methodist.

WILLA M. THOMAS

It would be hard to find an international guest or foreign student who has been to Indianapolis and not met Willa M. Thomas.

Oddly enough, the British are the ones to thank for the work of Miss Thomas, founder of the city's International Club and International Welcoming Committee.

After being treated to the warm hospitality of a British family, with whom she stayed during a Baptist World Conference in London in 1955, Miss Thomas returned to this country determined to show the same hospitality to anyone from a foreign land who set foot in Indianapolis.

"Global good will" is what The Indianapolis Star, in an editorial last December, called her work and that of the International Welcoming Committee.

Because she has no car, she must do most of her work at home. She uses the telephone, her tool of good will, to arrange and check on the guests' accommodations, meals and activities, pampering the visitors as if they were the most important people in the city.

And to her they are.

Thanks to her efforts during International Welcome Week, an eight-day observance during the Christmas season, many foreign visitors left the Circle City knowing what "Hoosier hospitality" is all about.

The welcome week program provides presents to the guests, enables them to visit American families and offers them the opportunity to attend an official welcoming ceremony and luncheon at which outstanding leaders and students are honored.

In Wishard Memorial Hospital for surgery to remove a tumor from her tongue last summer, Miss Thomas would not be denied her work. The moment she was wheeled out of the hospital's intensive-care unit, she began to write letters to visitors and prepare her weekly "Church Events" column for the Indianapolis Recorder.

Her biggest thrill at Christmas is to receive cards and letters from international guests who remember her favors.

Also a member of the leprosy committee of the Church Federation and Indiana Council of Churches, Miss Thomas has helped raise more than $50,000 to help those with leprosy around the world.

And proving that Hoosier hospitality starts at home, she established a Christmas card project in which greetings are dispatched to as many as 30,000 people in nursing homes and hospitals in the state.

Is it surprising that many of her international friends call her "Aunt Willa"?

JAMES ZIMMERMAN

When merchants and businessmen at Rochester, Ind., are asked to account for the business community's fine relationship with the city, they instantly credit one person in particular.

Jim Zimmerman.

And when disadvantaged residents or the elderly need transportation, companionship or just a shoulder to lean on, there is one person whose dependability is unimpeachable.

Jim Zimmerman.

James W. Zimmerman, co-owner of Zimmerman Brothers Funeral Home, has donated his time to such projects and agencies as the Fulton County Council of Aging, Civic Theater Board of Directors, Rochester Kiwanis Club, local Boy Scouts, Red Cross Blood Bank, Rochester School Holding Corp. and the city's first employment service.

He has been the unpaid executive-secretary of the Chamber of Commerce for 23 years, and in 1978 the chamber recognized his contributions by presenting him with a unique "Super Link Award."

He has spent 32 years spearheading the successful blood bank operation; more than 30 years helping the school holding corporation, which has brought four new schools to the community, and more than 20 years on the civic theater board.

He has headed the council on aging since its inception eight years ago and, about five years ago, helped launch the employment service.

A past president and 30-year member of the Rochester Kiwanis Club, Zimmerman also is willing to lend a hand for spontaneous projects.

He has been known to reach into his own pocket to help someone buy food, shoes or other necessities and has hired people to do work that he normally would do himself so that they could earn needed money.

For 22 years he has collected salvageable furniture and appliances that have been discarded and stored them in his garage until needed to help families left homeless by fires or some other disaster.

And his efforts to help in community projects—parks, streets, parking, business and individuals—are legend.

All this he has done tirelessly, unfailingly and in good humor.

CLAYTON KELLER

Clayton Keller, 2323 West Eighth Street, Anderson, is a meat packer whose community service achievements include saving the

Bronnenberg Children's Home at Anderson and personally raising $10,000 for uniforms for the Anderson High School band.

Keller was painting his house one day when he heard a radio report that the children's home might be shut down because of inability to meet state standards.

He hastened down the ladder and headed for a telephone to determine what was wrong and what could be done. He spearheaded a drive called "Don't Abandon the Abandoned," sponsoring rock concerts, dances, a basketball game and other events to raise funds to keep the home from being closed.

When the high school band needed $60,000 for new uniforms, Keller joined the campaign with enthusiasm, making countless telephone calls and buttonholing potential contributors to gain personal pledges exceeding $10,000.

Needless to say, the campaign was a success.

Said one of his sponsors, "He is not a politician, not a man of wealth or power, but a simple man with an average job who cares deeply about the citizens of Anderson, particularly our children. He is not willing to sit back and let someone else do the job . . .

"No title on the door, no country club membership, but a common man who has worked long hours, walked streets, dialed phones until he is exhausted, never for recognition but for love, for caring." ●

PROVIDENCE JOURNAL ON MIDDLE EAST

● Mr. PELL. Mr. President, the Providence Journal on March 15 carried a very interesting editorial analysis of the foreign policy challenges now facing us in the Middle East.

Noting that Secretary of State Haig will be in the region early next month, the Journal said:

As Mr. Haig digs into the complexities of the Middle East, he will want to appreciate that a prudent U.S. strategy must be broad-gauged, one that works on political problems even as efforts are marshaled to deter some future thrust into the region by the Soviet Union.

The Journal issued a very pertinent reminder that, "To view the Middle East through a narrow anti-Soviet lens would destroy reality and risk ignoring more fundamental issues." The editorial identified the central problem of concern as the question of Palestinian autonomy.

The Journal's assessment parallels my own thinking in this matter. As I told the World Affairs Council at an address in Providence on March 13, I am especially disturbed by the administration's effort to subordinate the search for Arab-Israeli peace in the Middle East to efforts to counter pursuant Soviet expansionism.

I told the Council:

Secretary Haig's reported determination to concentrate on what he regards as a major Soviet threat in the Middle East instead of pressing for an early resumption of Egyptian-Israeli negotiations on Palestinian autonomy ignores the fact that the principal threat to peace in the Middle East is another Arab-Israeli war and not Soviet encrouchment.

Mr. President, I ask that the full text of the Providence Journal's editorial be printed in the RECORD.

The editorial follows:

U.S. NEEDS "BROAD-GAUGED" POLICY

"In focusing its attention on the Middle East and Persian Gulf as an area of prime concern to the United States, the Reagan administration has shown a convincing understanding of priorities. The disarray in NATO and the ugly fight in El Salvador recede in importance when compared to the upheavals, real and potential, that dot the map from Beirut to Islamabad. Tailoring a coherent U.S. strategy for that region is emerging, appropriately, as the administration's central foreign-policy preoccupation.

"A military build-up on the Indian Ocean littoral is the immediate goal. The administration decided last week to expand on plans developed last year to seek a string of forward bases in ports of Oman, Somalia and Kenya. An additional $100 million will be sought to build up these bases, to which U.S. forces will have periodic access; and Washington hopes to persuade Egypt, as well, to grant basing rights at a more secure port on the Red Sea.

"This military stiffening, with the crucial goal of safeguarding Middle East oil and enhancing the region's stability, directly mirrors the administration's tough, anti-Soviet stance, Secretary of State Haig will visit the region early next month, and is expected to press Israel, Egypt, Saudi Arabia and Jordan for support of the Americans' planned Rapid Deployment Force. This is an important quest, for the United States cannot expect to gain influence in the region without some degree of enhanced military readiness, and it cannot develop this without cooperation from moderate Arab leaders.

"Military power, however, is not the only determinant of U.S. influence in the Middle East, and the U.S.-Soviet standoff cannot be held up as the sole pivot around which an American strategy is built. Other issues clamor for attention, issues having little or nothing to do with facing down the Kremlin, seeking to match Soviet power or protecting tanker access through the Strait of Hormuz. To view the Middle East through a narrow anti-Soviet lens would distort reality and risk ignoring more fundamental issues.

"Of these, the central matter remains a search for progress on the Arab-Israeli disputes, chiefly the question of Palestinian autonomy. Talks on this issue have stalled, with new moves unlikely until after Israel's elections on June 30. But the problem sits at the core of the Middle East cauldron. It won't go away, and pro-U.S. Arab states such as Jordan and Saudi Arabia are unlikely to bend on the matter of aiding American security goals until there is movement toward a Palestinian solution.

"And while this problem has obvious military angles, it is essentially a political and diplomatic matter, unaffected by U.S. task forces in the Indian Ocean or a Marine Corps supply dump somewhere along the Indian Ocean. As Mr. Haig digs into the complexities of the Middle East, he will want to appreciate that a prudent U.S. strategy must be broad-gauged, one that works on the political problems even as efforts are marshaled to deter some future thrust into the region by the Soviet Union."●

INTERVIEW WITH SENATOR PERCY

● Mr. LUGAR. Mr. President, on March 21, Senator CHARLES H. PERCY made an appearance on "Newsmaker—Sunday", a news interview program of the Cable News Network. In response to questions posed by Stuart Loory of Cable News Network, Philip Geyelin of the Washington Post, and Walter Mears of the Associated Press, Senator PERCY expressed his views on a wide variety of foreign affairs questions.

For the information of my colleagues, I wish to have the transcript of this interview printed in the RECORD at this point.

The material is as follows:

INTERVIEW WITH SENATOR PERCY

SEGMENT I

Mr. LOORY. Welcome to Newsmaker Sunday. Our guest today is Senator Charles Percy, Republican of Illinois. He is chairman of the Senate Foreign Relations Committee. With me to question him are Philip Geyelin, the syndicated columnist, and Walter Mears, chief of the Washington bureau of the Associated Press. I'm Stuart Loory. We'll be right back.

SEGMENT II

Mr. LOORY. There are at least four important centers of power involved in the foreign policy decision-making process in Washington. They are the White House, the State Department, the Defense Department, and last but certainly not least the offices of the Senate Foreign Relations Committee on Capitol Hill. The executive makes foreign policy, but the committee, acting for the Senate, examines it, advises on it, and exercises a modicum of approval over it. Our guest today is chairman of that committee, the first Republican chairman in almost 30 years. He is Senator Charles Percy of Illinois. Mr. Percy first assumed his seat in the Senate in 1966, after a distinguished career in business. While a student at the University of Chicago, he worked summers for the Bell & Howell Corporation. After graduation, he joined the company. By age 23 he was a director, by 26 he was corporate secretary, and by 29 he was chairman and chief executive officer. He resigned that job to run for the Senate. Senator, welcome to Newsmaker Sunday. Let's start with this week's developments before the committee, the testimony by Secretary of State Alexander Haig. I'm interested, in particular, in the hints that he gave that were subsequently followed-up by an administration request for repeal of the Clark Amendment, and for permission to aid Angolan rebels. How do you feel about that?

Mr. PERCY. Well, I voted for the Clark Amendment. I probably shouldn't have, because since then I really feel there is no country on earth that restricts their government that way, and when we singled out a country, and said we will not do something in that country, it tied the hands (of the administration). I think the administration ought to be open, particularly considering we now have such intimate safeguards over the use of intelligence in all countries, through the intelligence oversight committees.

Mr. LOORY. Well, but this is, as I understand it, more than just the use of intelligence. This would actually be giving aid to a group of rebels to overthrow a sitting government. You feel that this is something the administration should be allowed to do, without any advice and consent from the Senate?

Mr. PERCY. No, they should not, and that is making and executing a foreign policy that would be a departure from where we've seen. There is adequate oversight provision for it, but unfortunately this provision is on the books. It should not probably have been put on the books, but it's there, and at some point it should be removed. This is, I think, an unfortunate timing because it has concerned many of the front line states, and concerned a country like Nigeria.

Mr. LOORY. Will you be bringing any action within the committee to start in motion a repeal of the Clark Amendment?

Mr. PERCY. We will certainly be discussing it with the administration, and if there is a specific request, and legislation offered, there will be hearings on it. But the timing for doing this is not good now.

Mr. LOORY. You don't think it's propitious now?

Mr. PERCY. I do not. I think the timing . . . it's a poor time

Mr. MEARS. One of the controversies that characterized the committee during the Vietnam war period was over a similar question. What kind of advance approval should the Foreign Relations Committee, and the Senate, exercise over the use of American forces abroad? How do you see that in this case? Should there be oversight after the fact, or approval in advance?

Mr. PERCY. No, because of the Vietnam war the War Powers Act was enacted, and I was a cosponsor of that Act, and similar views by senators such as Stennis and Javits made possible putting that together. They were cosponsors of it. That really reviews and requires any time we engage in hostilities abroad an oversight by the Congress, and that is now the law of the land, and President Reagan, and Secretary Haig have said they will scrupulously observe the letter and the spirit of that Act.

Mr. MEARS. But that must tie their hands pretty tightly. It's a 30 day limitation. . . .

Mr. PERCY. It does, but it is subject to their interpretation of what is imminent hostility, and they have not interpreted El Salvador, sending advisors down there, as engaging in imminent hostility, and they have not invoked the Act.

Mr. GEYELIN. Senator, leaving aside the question of congressional oversight, Secretary Haig has said there is a matter of principle here of the President's freedom to do this sort of thing. Is there another principle involved? He is engaging now in a worldwide campaign, trying to get our allies to denounce Soviet activities attempting to overthrow governments. Is there any contradiction in the same administration claiming the right of the United States to go around overthrowing governments, and supporting insurgencies?

Mr. PERCY. There would seem to be a contradiction, but I think let's stay just right with the El Salvador situation, in our hemisphere, where it's in our vital security interests, and we think therefore the interests of our friends and allies. We wanted to adequately inform them that outside forces were bringing arms into El Salvador to overthrow the present government, and that we intended to interdict those, or discourage the shipment of those arms. We have successfully done so, and they've done so with, I think, the support of most of us in the Senate.

Mr. GEYELIN. But the point still is we're both playing, us and the Soviets, the same game. What Henry Kissinger wanted to do when the Clark Amendment was passed was put something like $25 million in covert activities designed to advance an insurgency against the government in Angola. It's ok for us to do, but not ok for them to do it. Is that the point?

Mr. PERCY. No, I think we have to be extraordinarily careful, to be consistent in our policies, and I think this is why this issue will be examined very carefully by the Senate Foreign Relations Committee.

Mr. MEARS. Do you think that we've been consistent in this El Salvador situation? The President had a news conference, and said it was our front yard, and the insurgency would spread into South and perhaps North America. Within a few days the State Department said it was being overplayed. Too much attention was being paid to it. Then the Secretary of State advanced what he said was not a dominoe theory, but said that successive nations in Central America would topple if we didn't stop this. I'm a little confused.

Mr. PERCY. Well, the confusion simply involved the use of the term the State Department. The State Department did not make any such statement. It was an individual in the State Department who had given a deep background briefing, and the position that he took was repudiated the next day by Secretary Haig. Only Secretary Haig can make State Department policy. This deep-backgrounder was erroneous, and it was quickly corrected on the record.

Mr. MEARS. My impression was the Secretary sent the spokesman to utter the deep background statement.

Mr. PERCY. Well, I know, but newsmen take a risk if they accept the deep-backgrounder as stating State Department policy.

Mr. GEYELIN. Senator, as a practical matter, I have never heard a case of an Assistant Secretary of State, or an Acting Assistant Secretary of State just winging it. They don't do that. Those deep-backgrounders are authorized. That was the line, until it was seen in print the next day, and somebody didn't like it. What was also impressive in and about that performance was that the cover of the Assistant Secretary, John Bushnell, was blown by the Secretary. This leads me to the question of how well do you think these people. . . .

Mr. PERCY. That's just an example of the candor of the administration.

Mr. GEYELIN. Well, you would call it the candor. Let's talk about it in terms of competence. Do you feel this crowd has really settled in? Do you know who you're talking to, who's making policy? When we've had as many changes as we've had, Caspar Weinberger coming out for the neutron bomb, and then being knocked down. We had Richard Pipes, who's the scholar-in-residence on Soviet affairs, saying that detente was dead, and getting knocked down. We've had a whole series of, just this week, there were two different aides, one before the House committee and one before your committee, one saying Nicaragua was lost forever, and the other saying actually not really. I mean, do you have a sense that they are doing precisely what they found most lacking in. . . . I mean that they are vacillating. That this is what Reagan said. . . .

Mr. PERCY. I don't see any vacillation. I don't think anyone accused Secretary Haig of vacillating. What you do have is a shakedown period, and it will take a little while. They will learn by these examples, but no team can ever take the field and run as an experienced team would later in the season. Certainly this team has shown great skill, great creativity, and a sense of cohesiveness, not only within itself, but in the Congress, that's unprecedented. Now the very fact that there are some differences, such as you've mentioned, Phil, I don't think should be looked upon as anything other than par for the course, maybe even better than par, for a new administration.

Mr. LOORY. Senator, if I can interrupt you right here, we have some messages, and then we'll be right back.

Mr. LOORY. Back on Newsmaker Sunday. Our guest is Senator Charles Percy, chairman of the Senate Foreign Relations Committee. At the beginning of the program, you said that the time was not propitious for a repeal of the Clark Amendment, and that because of objections of the front line states in Africa. One of the other things that we heard in the past week was the possibility of improved relations between this country and South Africa, and even the possibility of a visit by Prime Minister Botha to this country. How do you feel about that?

Mr. PERCY. Well, it would be inappropriate, and this was done possibly in discussion at lower levels in the State Department, but categorically denied by Secretary Haig, who sets the policy. Therefore, there is no such visit seriously now contemplated.

Mr. LOORY. You are assured that is the case by the Secretary. Have you talked to the President about it also?

Mr. PERCY. No, I have not talked to the President. I think it is unnecessary. Secretary Haig can, in this case, certainly speak for the President as a matter of policy. This isn't t say that you can rule that out sometime in the future, but at at this particular time I do not see such a visit imminent.

Mr. LOORY. What would have to change before a visit like that could be ruled in?

Mr. PERCY. Well, I would tend to think that if it appeared as though we could really work out a solution in Namibia, the old Southwest Africa, and it would take some give-and-take on the part of South Africa, then possibly we'd want to have direct contact on an issue like that, with the front line states—Nigeria—every African nation, every country on earth. This has been a 30 to 35-year festering problem, and I have urged the United States to take leadership, and the State Department to take leadership on this issue since I visited Namibia some years ago. But as of the moment, just a visit at this particular time, when there are 100 other heads of state waiting in line to talk with President Reagan, this would not be a propitious moment.

Mr. LOORY. The Carter administration's human rights oriented policy, I think you can make an argument that it had its greatest impact in Africa. Do you see any repudiation of that policy by some of the things that are happening now, like the repeal of the Clark Amendment, and the talk of improving relations with South Africa? Is that going to hurt us at all?

Mr. PERCY. In discussions with the Department and with the administration, I see no lesser emphasis on human rights, other than it is not going to be the centerpiece of the administration, and it should not be. Our own national security interests should be the centerpiece of that policy, and that should not be subordinate to any other. What the administration is, I think, wisely saying also is that because we were, in human rights areas, only able to punish friends, or people with whom we were working, by cutting off aid or something like that, or countries we were trying to help, and leaving totally untouched our adversaries because they were not involved in such programs, this is not an even-handed policy. The administration intends to point out the breach of human rights in totalitarian countries, communist countries, as well as all other countries, and I see probably more done multi-nationally, rather than just bilaterally, and I support that.

Mr. MEARS. A question about the press. You mentioned a couple of points on which, for example, the El Salvador background briefing, the reports of a South African visit, when things like that crop up, you see them in the paper, you hear them around the Hill, what do you do? Do you call up the State Department and say what's going on over there? Or do they call you? How do you work with them?

Mr. PERCY. I would say that we're on the phone back and forth at various levels a couple of times a day, not on every particular instance, but regularly, on world problems, and yes, I raise questions. They'll raise questions with me. Many times they'll call up and say, here is something coming. What we have is an agreement that we'll try to consult together as much as we possibly can, so that neither one of us is surprised.

Mr. GEYELIN. You talked earlier about the shake-down, speaking of the process, and you thought that they were really doing better than par. But you've been on the Foreign Relations Committee a long time. Has it ever taken this long to staff the State Department at the Assistant Secretary level?

Mr. PERCY. No, it has not, and I have filed a complaint, and discussed it face-to-face with representatives of the administration, beginning with George Bush, who I indulged to take a particular interest in. As a matter of fact, he came to the Hill, met with the chairmen, at Howard Baker's suggestion, of all of the committees, and I raised this issue of the

length of time it was taking to get our team in place.

Mr. GEYELIN. But Mr. Chairman, you must know that at least part of the problem is in your own committee, and not only in your own committee but on the Republican side of the committee. Have you filed a complaint with Jesse Helms?

Mr. PERCY. No, I have not, because as of the last conversation we had a few days ago there was not a single position he had a hold on.

Mr. GEYELIN. I mean he was about to get a hold on Gene Rostow, wasn't he, for head of the . . .

Mr. PERCY. Yes, but we did not even have the nomination. There's no decision made by the administration. How can he put a hold on a name that's not even been sent forward. . . . That's just a newspaper report.

Mr. GEYELIN. Yes, the reason you don't have a nomination is because they know if they did they'd have a hold on it.

Mr. PERCY. Well, that is incorrect, because there's no decision made on the administration yet on who should head the Arms Control Agency.

Mr. GEYELIN. But, you will admit that a lot of the delay has been caused by the fact that names have been floated, and shot down by Senator Helms, or others, or at least encountered a lot of objections. Assistant Secretary Eagleberger is certainly an example.

Mr. PERCY. No, I would be the first to say, and simultaneously to Senator Helms, that he is not an obstruction in this process. He has categorically denied it, and . . . .

Mr. GEYELIN. He's categorically denied it, but the administration doesn't see it that way, I think.

Mr. PERCY. They consult with Senator Helms the way they consult with many of the senators on positions that they know those particular senators are very much interested in. Obviously on the appointment for Latin America, Jesse Helms has a right to be concerned. He is the chairman of the Subcommittee on the Western Hemisphere.

Mr. GEYELIN. But here the Western Hemisphere's been put front and center as our greatest concern, and somehow this administration working together with the Senate cannot come forward with somebody to deal with that part of the world. I mean, that's the last glaring vacancy, and it's been made the single most important issue.

Mr. PERCY. Well, the question that I have raised is not the procedure in the Department, but the clearances necessary in the White House, and there are, and I have spoken with the President's aides there, men that I highly respect, and have urged that the decision-making process be speeded up, if only from the standpoint that we don't have time to be lobbied. I am lobbied by 100 senators, each of whom have one or two people in their state they think are ideally suited to be ambassador in some countries, and that's just the beginning of it. We must take the time, then, when a senator asks you to interview someone to talk to them. But we do not really initiate these nominations, yet people don't really believe that. They somehow think we have a vast influence with the administration in every appointment. We can advise, but it's their job, in the executive branch, to nominate, and we hope these nominations will be coming forth rapidly, and I'm pleased to see that the logjam does seem to be breaking up now.

Mr. GEYELEN. So I can't get you into an argument with Senator Helms?

Mr. PERCY. There's nothing to argue about there, because there was one newspaper report that he was folding up the head of AID. It was absolutely untrue, and he cleared it up in five mintues.

Mr. LOORY. If I can interrupt now, we do have to take a break. We'll be right back.

Mr. LOORY. Back with Newsmaker Sunday. Our guest today is Senator Charles Percy, chairman of the Senate Foreign Relations Committee. With me to question him are Philip Geyelin, the syndicated columnist, and Walter Mears, the Washington bureau chief of the Associated Press. Mr. Mears.

Mr. MEARS. Senator, do you subscribe to the theory that Secretary of State Haig advanced before your committee that El Salvador is the first, or perhaps second, nation on a hit list that the communist world is working through, that they go over to Central America?

Mr. PERCY. Well, the Soviet Union, the Kremlin, has not shared with me their hit list. All we can do is look at the circumstances. President Sadat, for instance, is absolutely convinced that they have an overall strategy to engulf and take over Africa as a means of controlling the Gulf. He is very convinced of this in his posture, and every attitude is evidence of that. The Secretary is convinced that there is a pattern in Central America that we cannot overlook, and for that reason he is taking a test case in El Salvador to see if we can reverse that pattern, and I support him in that effort.

Mr. MEARS. And would you support forceful action against Cuba to prevent supplies from going to El Salvador?

Mr. PERCY. I don't see that force is necessary under the present circumstances. We have an attitude, a posture towards Cuba that has been regardless of administration and party, for the last 20 years, and the present administration is consistent with that, and they absolutely categorically deny that there are any plans for use of military force against Cuba at this time.

Mr. MEARS. There was a discussion the other day of contingency plans in that area.

Mr. PERCY. Well, a nation would be irresponsible if it didn't have many contingency plans. The war games problems carried on by the Defense Department day by day always takes into account the worst-case situation as well as the more hopeful situations. They must have options for everything and no government on earth would not, in the power position that we occupy, with the responsibility that we have to protect and defend the free world. It would be irresponsible not to have such plans, or thoughts, or options. But there are no plans, as such.

Mr. LOORY. This is a question that might sound a little frivolous, but it isn't. The Secretary, if I'm correct, was asked whether he thought that a domino theory was active in Central America, and he said no. There is no domino theory, but there is a hit list. Then he went on to indicate what countries were involved, El Salvador, Nicaragua, Guatemala, and Honduras. What's the difference between the domino theory and a hit list?

Mr. PERCY. Well, a hit list might be such as Africa. It might not be one right after another, countries alongside each other, but they start in with the ones that are most vulnerable. Mozambique, Ethiopia, South Yemen. Any areas in which they can find vulnerability the Soviets have been moving in and we've got to be careful, to watch for that, to work with our allies around the world to prevent it happening.

Mr. LOORY. Well, it has been said here in Washington we are in danger of getting into a Vietnam-type situation. Possibly the dispatch of ½ million American troops, or anything like that, but still a modality of the situation in which the country intervenes out of the feeling that another power, namely the Soviet Union, is intervening, and out of the wrongful feeling. Is there any possibility that this is the case, and that the administration has not really proved its case?

Mr. PERCY. I think the administration has proved its case to the satisfaction of a great many countries abroad, and certainly to the satisfaction of certain members of the Foreign Relations Committee. They've shared the intelligence with them. I do not think we will get into a Vietnam. First of all, we won't get into a Vietnam because we've had a Vietnam. We've gone through that experience, and we're not about to repeat it. Secondly, we have a new provision on the books, because Vietnam came about because constitutionally the founding fathers wisely said only Congress can declare war. What we've done is make war without declaring it, and the War Powers Act, which a few of us worked on, was designed to prevent that happening, to take into account we make war without declaring it, and to therefore set up trigger points which will require the President to come back to Congress for authority to proceed.

Mr. MEARS. Do you believe the Congress would have stopped the Vietnam war given the atmosphere that existed during the escalation period? It was pretty late in the game by the time that even the doves were saying we ought to get out.

Mr. PERCY. Yes, but I think it would have triggered certain actions by Congress that took ten years ultimately to be taken, and—after all—that war and our participation in it was legislated to an end. It was ended by Congress, not by the President. It was with his reluctant concurrence, but then full concurrence after that. You cannot guarantee anything in a fragile world such as we live in, but we've done everything we can to prevent another Vietnam, and certainly the announcement that was made late this week that there is going to be a withdrawal program for 16 of the 54 advisers. They will be back by, presumably, July. This at least is the plan and the goal, and I know it brings to mind Bob MacNamara saying "We're going to be home by Christmas," but this will be a very vigilant Congress, and certainly the Foreign Relations Committee will have very, very careful oversight, and we hope a partnership in working with the executive branch of government in preventing another Vietnam.

Mr. GEYELIN. Well, Senator, of course we did eventually withdraw from Vietnam, and then lost it. It seems to me that part of the Vietnam analogy that fits has to do with this business of staking everything, putting all of your chips, on one very, very unstable country, associating yourself with a government that is as vulnerable from a coup from the right as it probably is from the left. But saying to the world this is where we draw the line, and that's precisely what the administration says, that the be-all and end-all, the test of our ability to deal with the Soviet Union will be made in El Salvador, of all places, where they kill people at the rate of ½ million a year in this country by our own terms. Isn't that a dangerous proposition), I mean in political psychological terms?

Mr. LOORY. I think we should say ½ million a year if it were in this country with this population, to make that clear.

Mr. GEYELIN. I said that, per capita. Right.

Mr. PERCY. I don't think it's dangerous, Phil. I think first of all, Vietnam was another part of the world where its security was not vital to our own national security interest. El Salvador is in the heart of this hemisphere. It's a vulnerable point in Central America, the area of the Panama Canal, which is certainly a vital lifeline between the two oceans. Secondly, the situation in Vietnam was almost beyond repair, because the government was in such ill repute, and it never changed, and our military preponderance over economic assistance was an order of 10–, 20–, 30–1, where in this case, the Reagan administration has made very clear that it wants economic assistance to be 3- to 4-times as large as the military, and the military will be non-combat. It will only be teaching and training, and just as quickly as we can move them from El Salvador back to this country they will be moved back, and that is the plan.

Mr. LOORY. Senator, I want to come back to Cuba, and what you had to say about no

need for any force to be used against Cuba. What kind of sanctions should we be using against Cuba that we're not using at the present time?

Mr. PERCY. Well, I've come to think the present sanctions are adequate, and certainly in my judgment Cuba wants to restore more normal relationships because they have seen, years later, aid from the Soviet Union at the rate of $1 million, $2 million, $3 million-a-day is not even adequate. What they need desperately is a trading relationship with this country. We have the market for the products that they turn out, and until they have access to those markets, that economy will never be back on its feet.

Mr. LOORY. You raise a whole new subject, and I want to pursue it, but first we have some messages.

SEGMENT V

Mr. LOORY. We're back on Newsmaker Sunday. Our guest today is Senator Charles Percy, chairman of the Senate Foreign Relations Committee. Before we broke, you were talking about how the Cubans want better relations with the United States, and there was kind of an implication that now is the time to improve those relations. I am struck by the idea that if everything that the administration says about what Cuba is doing in Central America, and elsewhere in the world, is actually so that now would not be the time to reward the Cubans with an improvement in relations. Is there not a dilemma there in a paradox?

Mr. PERCY. Well, there's no dilemma. The line is very clear. Unless they signal to us that they want better relationships with us, particularly in trade, badly enough they have to cease, cease and desist, in their activities, or their activities as a surrogate of the Soviet Union, in a sense, around the world.

Mr. LOORY. And you think this would be enough of a sanction to convince them ultimately to stand down in Central America, Latin America, Africa?

Mr. PERCY. Possibly, ultimately, economic forces come to bear, and pressure internally that they may have to respond to. They just simply may not be able to afford the exhilaration they get being talked about all the time, even on a program like this, where they never were before. But they simply have made a mark in the world as a surrogate of the Soviet Union in a sense, but also at a bitter, bitter cost to their people at home. How long will the people tolerate that?

Mr. LOORY. Why is it that other countries in Latin America don't see Cuba as the same menace as we do? Mexico is the best example.

Mr. PERCY. Mexico has a very large leftist element in the country. They will never be to the right of any president of the United States, I can conceive, in our lifetime, no matter who that president is. They have an element there with a very, very large unemployment, levels of poverty, and the higher illiteracy rate that pushes them to the left, rather than even to the center, and the government, even Portillo, reflects that.

Mr. MEARS. Let me ask you about another dilemma. The President as a candidate denounced the grain embargo against the Soviet Union, when President Carter imposed it. He now says he hasn't decided whether to lift it or not. The indecision seems to be a decision, since it's still there. Is there a point at which it can be lifted? It certainly has some bearing on part of your constituency as well as on foreign policy.

Mr. PERCY. Yes, I hope that it would be a decision that could be made by planting time. There's no rush ahead of that, but I would be the first to say, having taken a position and having a desire to have a consistency of policy in certain respects, with respect to the Soviet Union, that this would not be the time for us to blink, to signal them without any movement in Afghanistan, for which the embargo was originally intended, to just go about trade as usual, and business as usual, particularly with their forces poised on the borders of Poland.

Mr. MEARS. Well, with the other problems that have occurred since Afghanistan it would appear that the embargo would be a permanent fixture if . . .

Mr. PERCY. I hope not, and I trust that once the talks get underway, as they will, with the Soviet Union that this will be taken into context with all of the other discussion. Because I sensed in Moscow a desire on the part of the Soviet Union to have a better relationship with the United States, to go back to the bargaining table on arms reduction. They place a very high priority on that, and they place a high priority also on trade with the Western world. Just as they see China, a communist system that is simply not working, their system in the Soviet Union is not working either. It's not working in Poland. It's not working in Romania. It can't even feed its own people adequately. Therefore, they need contact with the Western world, and they must make the same decision as Castro: Do we want it bad enough to dampen down our imperialistic intentions in other areas, so that we can take care of our own people? That's a decision they have to make, but they are certainly seeking meetings at the higher level, even asking for a summit now.

Mr. GEYELIN. Could we move to another area? You are one of the first members of the Senate, I think in 1975, to recognize the Palestinian problem as a legitimate grievance, and to speak up on it, and I think you took a lot of flack back in Illinois. Where do you put that Palestinian issue and the Camp David process, now leaving aside that we have to probably wait until the Israeli election is over? But where do you put it in your sense of the priorities in that part of the world? The present administration seems to look upon it as really a military strategic asset, and the real problem there is an east-west confrontation. How do you relate to that?

Mr. PERCY. I see the Palestinian issue no differently than I did six years ago as a centerpiece of the problem. There is going to be no solution to the Middle East problem until such time as we find an equitable solution for the Palestinians. There are 3½ million of them in the area. Maybe 20,000 to 100,000 are members of the PLO, and a smaller element than that even are the terrorist PLOs. But 3½ million people cannot be overlooked, and their legitimate complaints have to be answered somehow. But even if you answer that you've still got the problem of Jerusalem, you've got the Golan Heights, and you've got the Sinai which, at least the Sinai, seems to be being resolved so that you've taken one point of the problem and started to work a solution out on that. You've taken Egypt out as a major military force against Israel. You've now removed them from the process. Progress has been made, and I give the Carter administration credit for the progress that has been made in those areas.

Mr. GEYELIN. Well, even if you solve those problems. Even if you solve the whole Palestinian problem, you still have the problem of security for the Persian Gulf, and how to arrange it. Secretary Haig hinted in I think the House committee hearings this week that an American military presence could squeeze into those Israeli air bases when they are returned in the final stage of the Egyptian-Israeli peace accord. Do you think we need a military presence in the Persian Gulf larger than we now have? If so, how would you go about getting it?

Mr. PERCY. Yes I do, but I think it also has to be done in concert with our allies in Europe. We need joint maneuvers. We need multinational presence down there, by the British, the French, and others, and we have discussed those issues with them as their chiefs of state have been coming to Washington. We can't be expected to shoulder the whole load, and we told the Japanese that. They must expend money. If we're developing bases in Somalia, in Kenya, and Oman, they must help with development assistance in those countries. That's not contrary to their constitution because it's protecting Japanese oil as well as European oil. A $9 billion of expenditure in rapid deployment forces is being made. They must burden the share with us.

Mr. GEYELIN. Are you talking, in burden sharing, about Japanese or NATO military forces in the area, or are you asking them to take up the slack or to make up what we have to divert to that area to make that up in the NATO area?

Mr. PERCY. In the Japanese we are specifically requesting of them, as we move ships out of the Pacific to put them in the Gulf area, that they then move ahead with anti-submarine capabilities, mine-laying capabilities, because after all they've got the Russians in the northerly islands, and they're worried about them also. We then asked them to develop and pick up the load from us of humanitarian and development assistance in areas where they, as the third most powerful economic source on earth today, can well afford to do it, if they're willing to, and we had meetings this week on that very subject.

Mr. LOORY. This would be in Africa specifically, so far as the Japanese are concerned?

Mr. PERCY. I think as far as the Japanese are concerned, it should be in Kampuchea as well. It should be in their area. Why should we have the burden whenever there's a human disaster of always paying out of PL 480 funds for those? They've got plenty of yen. They can buy rice from us, from California. They can buy corn and beans from Illinois, let's say, and they did agree with me to do that, and they have begun, in a sense, a 480 program. I asked for 100,000 tons of rice to go to Kampuchea out of stocks in Japan. They didn't do that, but they sent 50,000 tons which I felt was a generous gesture on their part.

Mr. LOORY. Excuse me, Phil. We do have to take a break now, and we'll be right back.

SEGMENT VI

Mr. LOORY. Back for the last segment of Newsmaker Sunday with our guest, Senator Charles Percy, chairman of the Senate Foreign Relations Committee. Mr. Geyelin.

Mr. GEYELIN. You were talking about what our allies could do to pick up a larger part of the burden of defending or stabilizing the Persian Gulf. You certainly talked to all of these European leaders who have been making this pilgrimage to the new administration as they pass through, and so have a lot of the rest of us. Do you really sense that they have a great enthusiasm for doing that, or indeed for doing anything that would threaten their own private so to speak detente with the Soviet Union?

Mr. PERCY. They have no enthusiasm for doing it, but we've had assurances from the Germans, the French, the British certainly, that they would do their fair share, and what they can do. If they don't want to send their forces down to the Gulf, although the British and French have, if countries don't want to send forces down, and NATO probably won't extend itself to the Gulf, then they can strengthen themselves in Europe and not depend so much on U.S. forces in Europe. That's a long fight I've had some 12 years now with my friends in NATO, and I think they're tired of hearing me talk about it, but they're at last responding now, and the modest request of a real increase of 3% is essentially being met by most countries.

Mr. LOORY. Senator, let's see if we can't

pin you down a little bit on your feelings on American troops in the Middle East. Do you think that there should be American troops based in the Sinai?

Mr. PERCY. There should not be now under these conditions, because it would destabilize possibly Sadat in Egypt. There would be a strong pressure from the Egyptian people, once the Sinai has gone back to Egypt, that if U.S. forces went back in it would have to be with their consent, of course, and an assurance that it would not in any way undercut Sadat, on whom we have put so many chips. Phil, you remember, you mentioned my trip six years ago. I did say at that time in my report to the Senate that Sadat, in my judgment, was one of the greatest men of peace I have ever met, and I was derided for that statement, and fortunately he proved it accurate. He is a magnificent, noble man, so therefore, if we just immediately move back in and occupy those bases, and put pressure on him to do so, we cannot do so, and I am so notified by the Israelis that we cannot do so if it would endanger his political standing in Egypt.

Mr. GEYELIN. But Senator, I wasn't suggesting that the Secretary of State suggested that. What he suggested was that as part of the other settlement between Israel and Egypt, which calls for a supervisory force, international or some other kind, that American troops be given a kind of a dual mission. Their principal mission would be supervisory, but they would also keep those bases operative in case we wanted to use them.

Mr. PERCY. I would have no objection to that use of American personnel there because we have done it in the past, and we do it right today on the border of Honduras and El Salvador. We, along with four other nations, have people there who are sort of a demarcation line to prevent any oversweep of that particular area. The same thing happens, of course, between North and South Korea. There is a demarcation line there, and I think the use of American personnel in that way would be perfectly legitimate if it would help ensure the peace, particularly considering the U.N. has refused to put forces there.

Mr. LOORY. How about basing American troops anywhere in the Middle East where they're not based now?

Mr. PERCY. I think the present provision whereby we have three new bases established in the countries I mentioned, plus the possibility of a base in Egypt itself, which has been offered by President Sadat, I would tend to think that at present that is an adequate presence, particularly considering the number of ships that we have, some 30 ships in that area now.

Mr. MEARS. Do you have any concern that given all the areas of difficulty, pressure and possible contention that we've talked about, and given the fact that the administration has said that we're woefully behind where we should be in defense, can we meet this whole array of commitments from where we stand right now?

Mr. PERCY. We're stretched very thin, indeed, and of course we must build up strength in our conventional forces. In my judgment, there is no way to have a credible foreign policy, unless you have a strong national defense, and there's no way to afford that unless you have a strong underpinning in the economy. That's why the administration is right to put their highest priority on the economic recovery program here at home, then build up our defense. Certainly, to build up our conventional forces, it would be helpful if there were a mutual agreement between ourselves and the Soviet Union to put a ceiling and actually to reduce the strategic weapons that we have, because both of us have enough to make life uninhabitable on earth if they were ever released.

Mr. LOORY. You say that your talks in Moscow in December convinced you that the Soviets want to move in this direction. Do you have any concern that the Reagan administration may be moving too slowly on its part?

Mr. PERCY. Well, Secretary Haig has already met with Anatoliy Dobrynin, the Soviet ambassador, just before he went to the 26th Congress. The words that Secretary Haig gave him in that meeting certainly were transmitted a few days later directly to Brezhnev, because Dobrynin certainly is one ambassador the Soviet Union has who has direct access to President Brezhnev, so there was no problem of communication. They know how strongly we feel about certain things. The talks, really in a sense, have already begun.

Mr. GEYELIN. Senator, your committee gets pretty good intelligence. What is the latest reading on the Russian intentions toward Poland, and the likelihood that they would intervene in a really serious military way, not in terms of just maneuvers, or joint maneuvers, but actual use of force?

Mr. PERCY. My own personal judgment—I cannot give you an intelligence reflection on it, but I can give you personal judgment—is that the Soviet Union will not use force. Wars many times, and conflicts and hostilities, are gotten into because of miscalculation. I think that was true in Afghanistan. I never think they ever dreamed that we would be as strong, and the whole world community would stand together as they have, against this use of force in a Third World country. But there's no miscalculation. I had direct talks in Moscow with all of the leadership. Secretary Haig has had direct communication with the leadership, and the latest message sent through Dobrynin. There is no miscalculation about how Europe would react to their movement there, so that it would only be under dire circumstances as a last resort that they would move into Poland, I think, with force.

Mr. GEYELIN. Well, the dire circumstances that most people speak of is if the communist party there loses control, and that could become contagious to the rest of the bloc.

Mr. PERCY. That's right.

Mr. GEYELIN. That could happen, I mean another outbreak of strikes.

Mr. PERCY. It could happen, but in talking with the Polish ambassador late this week, and in the meeting that I have upcoming with the deputy prime minister of Poland who is coming to this country, I do not see that. They feel that they can handle this internally. They do not think it is going to get out of hand, and that they, outside of the instance of violence that we had in the last few days, have handled it with restraint and moderation, adequate to signal to Moscow, let us handle this internally.

Mr. LOORY. Senator, I'm sorry we do have to stop. For my colleagues Phil Geyelin, and Walter Mears, I'm Stu Loory. Good day.●

RESOLUTION TO CHANGE THE STATUS OF THE COMMITTEE ON SMALL BUSINESS TO A STANDING COMMITTEE

● Mr. LEVIN. Mr. President, I am pleased to be joining Senators WEICKER and NUNN in cosponsoring their resolution to elevate the status of the Small Business Committee from a select committee to a standing committee. This change codifies the committee's jurisdiction in the standing rules and reflects the status of this committee as one that has legislative jurisdiction.

Since 1976, the Small Business Committee has acquired all of the powers, authority, and responsibilities of a standing committee. The committee has legislation referred to it, holds hearings, and reports bills for consideration by the full Senate. It is appropriate that the committee be recognized as a standing committee. Further, it is important to the small business community that appropriate recognition be granted to the one committee in the Senate whose sole responsibility is to be concerned with the state of small business in the Nation.

I applaud the chairman and ranking minority member of the Small Business Committee for taking the leadership on this issue and the majority and minority leaders for their support of this important resolution.

ANGEL CUADRA: IMPRISONED CUBAN POET

● Mr. JACKSON. Mr. President, in an effort to attract world attention to his unwarranted imprisonment in Cuba, Amnesty International has adopted the Cuban poet, Angel Cuadra, as "Prisoner of the Month" for March. Initially a supporter of the revolution in Cuba for its avowed humanitarian ideals, Cuadra became increasingly disillusioned with Fidel Castro's government. Cuadra was arrested in 1967 and sentenced to 20 years in prison. Released in December 1976, he was again arrested and placed in prison in 1977 for continuing to write poetry considered by the regime to be subversive.

My continuing personal concern over Cuadra's inhumane detention is reflected in a compelling letter to the editor of the Washington Star by a thoughtful student of Cuban affairs, Mr. Lee Cancio. I ask that this letter, which was published in the Washington Star on March 15, 1981, be printed in the RECORD.

The letter follows:

DE PROFUNDIS

(By Lee Cancio)

But wound covers wound; here in triumphant death,
gnawed by executioners, by chains
and him who crumples distances, ignoring us,
here we carve on rock and blood
the essential dignity of the people.
—Angel Cuadra

For most of the last 14 years, an internationally respected poet, Angel Cuadra, has suffered imprisonment in Cuba. I became interested in his plight only recently. It seems to be attracting more and more attention. Amnesty International has just chosen Cuadra as "Prisoner of the Month" for March in a worldwide attempt to win his freedom.

This growing concern, I think, is more than justified. Cuadra's sole "crime" was the publication abroad of translations into English, German and Russian of several of his poems. Following the publication of A Correspondence of Poems (Solar, 1979) in the United States, he was taken off the "rehabilitation-re-education" program and sent to Boniato prison. There he is absolutely forbidden to write anything. No one is allowed to visit him. The inhumane conditions at Boniato have brought on a decline in his health.

Perhaps the best description of his confinement is his own, such as the lines from "Song of Political Imprisonment" quoted below.

As Cuadra put it in one of the last messages smuggled out of prison from him. "There is no legal basis for this new reprisal against me. Only that I am a poet; that the world speaks my name; that I do not use poetry for other political ends, but only literary, universal ones."

I endorse Amnesty International's adoption of Cuadra as Prisoner of the Month. As someone who has gotten to know Cuadra through his poems, I can only hope that this will speed his release. May I suggest that the public can help by writing to President Fidel Castro, Havana, Cuba.●

TRIBUTE TO EDWARD DILLON

● Mr. METZENBAUM. Mr. President, it is an honor for me to pay tribute today to Edward J. Dillon, an outstanding Ohioan who is retiring after 36 years of dedicated service to the Boy Scouts of America. Tonight, the Columbiana County Council of Boy Scouts will hold a dinner to honor him for his devotion to generations of young people.

Mr. President, it is a rare and wonderful thing when we find a member of our community who gives so generously of his time and energies to those around him. Edward Dillon—husband, father of three sons who also are Eagle Scouts, active church member and leader in many civic organizations—provides us with an outstanding example of what community service is all about.

Edward Dillon began his professional career with the Boy Scouts of America in 1946 as field Scout executive for the Lonesome Pine Council. Within 5 years, he tripled his council's membership and more than doubled the amount of money raised. He was equally successful after he transferred to the position of district executive of the Tri-State Council. Eventually, he went on to hold other positions within the organization—always with impressive results.

Edward Dillon's dedication to helping boys through Scouting activities will be sorely missed by the organization he is leaving.

But Edward Dillon's contributions to his community have not been limited to his work with the Boy Scouts.

He is an active member of the United Presbyterian Church, having held a long list of offices. He is a member of the Kiwanis Club, on whose behalf he established a complete summer recreational program. He was active in a program for the mentally retarded. He is a member of the Rotary and served as chairman of the student loan fund. He served our country in the military.

Throughout this Nation, there are many Edward Dillons—individuals who become community leaders not out of obligation or because of profit motive, but out of spirit and desire. It is the collective strength of these individuals, Mr. President, that truly makes this country great.

I join Edward Dillon's friends and neighbors in saluting him today.●

JAPANESE AUTOMOBILE IMPORTS

● Mr. DANFORTH. Mr. President, imports of passenger cars from Japan last year were at an all-time high of almost 2 million. Imports for January of this year ran over 200,000. But that is only part of the picture.

In September 1980, inventories of Japanese automobiles in this country were 253,657 units, rising to over 330,000 in December—an estimated 76 days supply—and dropping back to just under 300,000 in February due to a surge in sales. But even with the slight dip in inventories in February, the number of Japanese cars in storage were still more than 15 percent over February of last year.

I have maintained from the beginning that it is time for Japan to play its part in helping to ease the crisis facing the automobile industry in this country. If this is to be reflected in Japanese imports into this country, we cannot forget the very real impact that standing inventories will have on total sales.

The Senator from New Jersey (Mr. WILLIAMS) and the Senator from Kentucky (Mr. HUDDLESTON) have asked to be added as cosponsors to S. 396. This brings to 19 the number of cosponsors to this legislation.

Mr. President, I submit the following letter from Senator HEINZ of Pennsylvania for printing in the RECORD.

The letter is as follows:

COMMITTEE ON FINANCE,
Washington, D.C., March 4, 1981.

Hon. JOHN C. DANFORTH,
U.S. Senate, Washington, D.C.

DEAR JACK: Like you, I have been deeply concerned about the state of the U.S. auto and auto parts industry. Japanese imports have increased over 100 percent in the last five years, capturing over 20 percent of our market. At the same time over 200,000 auto workers have lost their jobs, many of them for good. Without question this industry is facing the most serious crisis in its history, and the government has a responsibility to act.

In light of these problems, I want to congratulate you on moving so quickly on hearings in January and on developing your legislation. I have carefully studied your bill, S. 396, which would impose quotas on imports of Japanese automobiles, together with the hearing record from last January, and I want you to know that I certainly believe that it is appropriate to send the Japanese a strong message that their pattern of trade relations with this country is unacceptable. As a rule, I am reluctant to support legislated quotas except as a tactic of last resort; however, I believe that we are in that situation with respect to our auto trade and that it is essential we convey our concern to the Japanese in the strongest terms.

For that reason, as a member of both the Finance Committee and your Trade Subcommittee, I will give the bill my support both in Committee and on the floor.

I also want you to know that I have discussed this matter with Douglas Fraser of the United Autoworkers and have also indicated to him that I plan to support the bill.

Sincerely,

JOHN HEINZ,
U.S. Senate.●

SPANISH DEMOCRACY

● Mr. PELL. Mr. President, in our relations with American friends and allies in Europe, nothing could be more unfortunate than the conclusion recently drawn by certain persons and publications in Spain that the United States is indifferent to the fate of democracy in that country. Over the last 5 years, Spain has undergone an inspiring transition. Under the guidance of King Juan Carlos, Spanish democracy was born and has taken root. The direct beneficiaries of this development are the Spanish people. But also well served is the entire alliance of Western democracies, which can now count Spain among their numbers—as a full partner sharing common interests and common values.

It is difficult to evaluate how seriously Spanish democracy was actually threatened by the recent insurrection. Nor is it possible to predict what other challenges may await Spain's still-young parliamentary government. But there should be no doubt anywhere about American support for the freedoms which the Spanish people have won for themselves since the passing of Franco.

Secretary of State Haig was not incorrect in noting that developments in Spain are indeed an internal matter. They are not, however, a matter of American indifference. We felt deep concern about the brutal repression of the Franco regime. And we felt profound gladness when tyranny in Spain was replaced by liberty.

Those in Spain who are concerned about American attitudes should perhaps be reminded of the Senate's past actions in this regard. In 1976, when Franco still held sway, the Senate approved the United States-Spanish treaty of cooperation only after attaching a strong declaration of advocacy that Spain move quickly to create free institutions. At the time, this Senate action was deeply resented by the Franco regime. But it also gave hope to those Spanish patriots who were struggling to bring just such institutions into being. Two years later, when the battle was won, the Senate again expressed its view—this time through a resolution congratulating the Spanish people on their progress toward the construction of a stable and lasting democracy.

Mr. President, I trust that Secretary Haig's remark will not contribute to any deterioration in United States-Spanish relations. Any such development would indeed be an historic irony and tragedy. For it is Spain's noble achievement in building democracy which has opened the prospect for closer relations between Spain and the United States than have ever existed before. Toward that end, I am pleased that the Senate is again—this time in accompaniment with the House—expressing the American people's abiding hope that democracy will flourish in Spain, tomorrow and beyond.

Mr. President, I ask that the two resolutions to which I referred be printed in the RECORD.

The resolutions follow:

TEXT OF THE RESOLUTION OF RATIFICATION OF THE UNITED STATES-SPANISH TREATY (1976)

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Friendship and Cooperation Between the United States of America and Spain, signed at Madrid on January 24, 1976, together with its seven Supplementary Agreements and its eight related exchanges of notes (Executive E. Ninety-fourth Con-

gress, second session) subject to the declaration that:

(1) the United States, recognizing the aspiration of Spain to achieve full participation in the political and economic institutions of Western Europe, and recognizing further that the development of free institutions in Spain is a necessary aspect of Spain's full integration into European life, hopes and intends that this Treaty will serve to support and foster Spain's progress toward free institutions and toward Spain's participation in the institutions of Western Europe political and economic cooperation;

(2) the United States, while recognizing that this Treaty does not expand the existing United States defense commitment in the North Atlantic Treaty area to create a mutual defense commitment between the United States and Spain, looks forward to the development of such an expanded relationship between Western Europe and a democratic Spain as would be conducive to Spain's full cooperation with the North Atlantic Treaty Organization, its activities and mutual defense obligations;

(3) the United States, recognizing that this Treaty provides a framework for continued nuclear cooperation for peaceful purposes with Spain, looks forward to a continued relationship in this field commensurate with steps taken by Spain toward becoming a party to the Treaty on the Non-Proliferation of Nuclear Weapons or placing all of its nuclear facilities under safeguards administered by the International Atomic Energy Agency;

(4) Senate advice and consent to ratification shall be understood to apply to the initial five-year period of the Treaty, so that any United States agreement to an extension of the Treaty shall require the further advice and consent of the Senate; and

(5) the sums referred to in the Supplementary Agreement on Cooperation Regarding Materiel or the Armed Forces and Notes of January 24, 1976, appended to the Treaty, shall be made available for obligation through the normal procedures of the Congress, including the process of prior authorization and annual appropriations, and shall be provided to Spain in accordance with the provisions of foreign assistance and related legislation.

SECTION 605 OF THE FOREIGN RELATIONS AUTHORIZATION ACT, FISCAL YEAR 1979—ENACTED IN 1978

SPANISH DEMOCRACY

SEC. 605. (a) The Congress finds that—

(1) the Senate, in rendering its advice and consent to ratification of the Treaty of Friendship and Cooperation between the United States and Spain (signed on January 24, 1976), declared its hope and intent that the Treaty would serve to support and foster Spain's progress toward free institutions;

(2) this declaration reflected the strong desire of the United States Government and the American people to see a restoration of democracy in Spain and an expansion of mutually beneficial relations between Spain and the democracies of America and Europe; and

(3) political developments in Spain during the past two years constitute a major step toward the construction of a stable and lasting Spanish democracy.

(b) The Congress finds further that—

(1) the masterpiece "Guernica", painted by Pablo Picasso, has for four decades been a powerful and poignant symbol of the horror of war;

(2) this treasured painting, while universal in its significance, holds special meaning for the people of Spain by its representation of the tragic civil war which destroyed Spanish democracy;

(3) Pablo Picasso, having painted "Guernica" for the Spanish Republican Government and concerned for Spain's future when that government fell, stipulated that the painting should remain in the custody of the Museum of Modern Art in New York until Spanish democracy had been restored; and

(4) the United States and Spain, in a Supplementary Agreement entered into with the Treaty of Friendship and Cooperation, have committed themselves to expand their cooperation in the fields of education and culture.

(c) It is therefore the sense of the Congress, anticipating the continuance of recent promising developments in Spanish political life, that "Guernica" should, at some point in the near future and through appropriate legal procedures, be transferred to the people and Government of a democratic Spain.

(d) It is further the sense of the Congress that the American people, having long benefited from this treasure and admiring Spain's achievement, would wish, as an expression of appreciation and congratulation upon the transfer of "Guernica" to Spain, to assist in the preparation of facilities for the permanent display of the painting, if such assistance is found to be appropriate by the elected leaders of Spain.●

RAOUL WALLENBERG

● Mr. PELL. Mr. President, in 1944 a Swedish citizen named Raoul Wallenberg went to Hungary to do what he could to rescue Jews and others marked for extermination as part of Hitler's "final solution." He risked his life so that others might live; because of his efforts, at least 20,000 people were saved from being deported to the death camps, and tens of thousands of others were saved from violent deaths in the ghetto of Budapest. In January 1945, however, Raoul Wallenberg was taken into custody by Soviet forces.

The Free Wallenberg Committee, of which I am a cochairman, has been working to secure Raoul Wallenberg's release from a Russian prison. Sunday's Washington Post included a penetrating article about Raoul Wallenberg written by Elizabeth Moynihan, the wife of my distinguished colleague, the senior Senator from New York. In order that Mrs. Moynihan's timely article might reach as wide an audience as possible, the senior Senator from Wisconsin, Mr. PROXMIRE, very considerately inserted it into the CONGRESSIONAL RECORD.

Tuesday's Washington Post featured another piece on Raoul Wallenberg, Richard Cohen's thoughtful column entitled "Raoul Wallenberg: One Can Make a Difference." Mr. President, I ask that Mr. Cohen's article from the Washington Post, March 24, 1981, be printed in the RECORD.

The article follows:

RAOUL WALLENBERG: ONE CAN MAKE A DIFFERENCE

(By Richard Cohen)

The telephone rang and the caller said I should write something about Raoul Wallenberg. She said that he remains alive in the Soviet Union, maybe jailed in the Gulag, but that he lives and that a member of Congress would try to make Wallenberg an honorary citizen and then we, the United States, could approach the Russians and ask what they have done with Raoul Wallenberg. They would say he died. But he lives, the caller says, he lives.

He has been seen several times after he was supposed to be dead. He was seen in a Russian prison and in a mental institution and people who later were freed from Soviet prisons said they saw him—said they knew of a Swede named Wallenberg. They said he lives. They said Raoul Wallenberg lives.

Raoul Wallenberg was a rich Swede, educated as an architect but a banker by profession, who during World War II went into the heart of Nazi Europe to do what he could to rescue Jews. He rescued some of them. He could not, of course, rescue most of them, but there are people alive today because of what Raoul Wallenberg did.

He was a hero. He was a brave man. He went up against the most evil regime in all history and he did it not because he was trapped, caught in some circumstance not of his own making—a Jew in Poland or a Gypsy in Romania or a Jehovah's Witness in Belgium—but because he chose to. He came from a neutral country, Sweden, and went to Hungary to risk his life saving the lives of others.

The pictures show a handsome man—aristocratic features, soft looks. The pictures cannot show you what went on inside his head, show he decided to do what he did, but you know he had to realize that he was just one man and the enemies were many. You know, too, that he must have said something about how sometimes you have to proclaim your humanity, do what you have to do even though you have to do it alone. This point is sometimes lost.

In Cleveland recently, a man was tried on the charge of lying about his past when he was admitted to this country. He was alleged to have been an extermination camp guard whose sadism and cruelty stood out even in a place where sadism was routine. The inmates called this man Ivan the Terrible but his neighbors say that that beast could not be the man they know.

The man they know is a nice man. The man they know respects the law. The man they know goes to church and mows his lawn and is kind to children. The man they know could never commit crimes like those he is accused of. But what they don't know, what they could not tell you, is whether a man like this could kill when the government says that killing is not a crime, but a civic obligation. The difference between such a man and a man like Wallenberg is the entire span of human history and we can measure one by the other.

At the end of the war, the Russians came for Wallenberg. Actually, he went looking for them to greet them as an ally. The Russians arrested him as a spy and put him in prison and when people asked, they said he was dead. They said he had been killed by the Nazis and then later, when people came forward to say that they had seen him, the Russians said that there had been some sort of mistake. The Nazis had not killed him after all. He had died in the Lubyanka prison, Moscow. The date was July 17, 1947. Sorry for the mistake, but no matter. He was dead, that was for sure.

But even after he was supposed to be dead for sure, he was seen. Even after the second announcement of his death, he was glimpsed in the Gulag—a figure in the snow, a character out of Solzhenitsyn, a saint in that frozen hell of a place where Russia hides its soul.

By now, Wallenberg would be 68. By now, his hair would be gray or gone and his features would be different and . . . who knows what 35 years of prison have done. By now, of course, there is a good chance that he is really dead and there is little chance that the Soviets, if they keep him still, would admit it, free him and humiliate themselves to the world.

For this reason, I told the person on the

phone it was probably pointless to write about Wallenberg. She listened and then she started to tell again what Raoul Wallenberg had done. Her message was clear. You have an obligation to do something and you do what you can. This, I suppose, was the message of Raoul Wallenberg.

This is why he lives.●

IN GOD WE TRUST

● Mr. HELMS. Mr. President, on February 16, I introduced S. 481, a bill to restore the right of voluntary prayer in public schools. This subject is not new to the Senate. In fact, in the last Congress, this body passed legislation which contained provisions identical to those of S. 481.

Since the Supreme Court decisions of the early 1960's which effectively did away with voluntary prayer in schools, public support to restore those rights has arisen all across this Nation. One outspoken advocate of the rights of children to have voluntary prayer included in their school day is Rabbi Menachem M. Schneerson, the Lubavitcher Rebbe.

On January 15, Rabbi Schneerson delivered an address to more than 5,000 followers who had gathered to mark the completion of 30 years of world Jewish leadership by the Rebbe. That statement eloquently presents a clear perspective on the principle of separation of church and State and, in turn, on the case for voluntary school prayer. In the words of the Rebbe—

> Separation between religion and state is not, nor ever was, meant to imply antagonism to, or even indifference to religion. . . . school prayer does not negate the concept of separation of religion and state, for in no way is this religious intolerance, which was the sole concern of the founders of this country when instituting this concept.

Mr. President, the Rebe's points merit the attention of the Members of this body. Therefore, I submit the text of his statement, " 'In G-d We Trust': Safeguard for Religious Freedom," to be printed in the RECORD at the conclusion of my remarks.

The text is as follows:

"IN G-D* WE TRUST": SAFEGUARD FOR RELIGIOUS FREEDOM

(Delivered January 15, 1981, by Rabbi Menachem M. Schneerson, the Lubavitcher Rebbe)

In a democracy such as the U.S.A., an orderly transference of government is effected through the electoral process. The choice made by the people in the polling booths decides who will occupy the highest office in the land—the Presidency; thereby ensuring a smooth and peaceful transition from one administration to the next.

Yet a disturbing trend has been evident in past elections. When the previous incumbent in the Oval office is the defeated candidate, his defeat has triggered a less than noble response; it is seized upon by some as an opportunity to rejoice in his discomfiture. Stripped as he now is of power, such critics fear no retaliation on his part; nor can they now expect to gain any favors. And so they indulge in the ignoble pastime of rubbing salt into the wound.

But such is not the way of Torah. Notwithstanding any past mistakes, Torah bids us to be grateful, to acknowledge those good things which were done. In the eyes of Torah, to be an ingrate is a despicable thing, unworthy of any decent human being. And in the past administration, the outstanding achievement was the prevention of war. There were instances in the past four years, which, but for the endeavors of the President, could easily have led to war. Not only did he thus save millions of Americans from the horrors of such a consequence, but in all probability the rest of the world. And for this he deserves our thanks and gratitude.

Possibly, political considerations would dictate greater caution in expressing gratitude, from fear of offending the new holder of office. But the new President will undoubtedly tender recognition for the good accomplished; especially when the good was of such paramount importance as the prevention of war.

A short note of caution is in order here. The above acknowledgement is in no way to be construed as a retraction from my previous stand concerning the Camp David accords. I reiterate as strongly as possible that it was, and remains, a disaster and peril for Jews and the rest of the world. The President's part in the accords was, no doubt, motivated by the hope that it would bring peace—and for this he is to be commended. But the fact remains that all that has been achieved is that one side has made numerous concessions, including giving up land and essential oil supplies, for no substantive return whatsoever. Such concessions merely prompt demands for further concessions, creating an even greater danger to peace.

To return to our main point: notwithstanding any errors made, we are enjoined by Torah to express gratitude where credit is due. This is a man who safe-guarded the well-being of millions of Americans, and to him we duly express our gratitude.

While Presidents can and do change, the office of the Presidency remains constant. The beginning of a new term of office will certainly elicit even more vigorous efforts on the part of the new President in the discharge of this office. The first and foremost duty is to strengthen the basis of our very existence. That basis is the foundation upon which this country was born and is stated on every dollar bill printed in the U.S.A.- "In G-d We Trust."

There are various words which roughly express the same meaning as "trust"—for example, belief, faith. Trust, however, has a meaning which is more profound than mere belief. Belief in a Deity does not always mean unquestioning confidence in that Deity's willingness to help a person in every facet of life. One can believe in G-d—but not to the extent that one puts his trust in G-d. As in the business world, where assets are given to another to be held in trust, so too, our faith in G-d must be to the extent that we "trust" in Him. We believe that G-d is not some demote Being, removed and aloof from His creations, but that every detail of our lives can be safely entrusted to G-d.

And this is one of the main areas in which we hope the new President will invest special efforts, working to instill such trust in G-d within each and every citizen, ensuring that their conduct is proper and becoming to He in Whom we place our trust. The only way to assure that such conduct will become second nature is through the proper education of our children. In the U.S., the state is responsible for the education of its citizens. It is thus the responsibility, and indeed privilege, of the public school system to instill in its charges the knowledge that G-d is not only the Creator of the world, but a Being in Whom we trust. It is this knowledge which is the foundation for a life of productivity and decency.

Of course, there will be those who object to this with the argument of separation of religion and state. They, however, base their argument on a faulty premise. Separation between religion and state is not, nor ever was, meant to imply antagonism to, or even indifference to religion. Historically, the founding fathers were refugees from religious persecution, and hence, when founding this country, sought to ensure that there would be no interference by the state in the religious beliefs and practices of its citizens.

But there is no question that their intention was to safeguard against any form of religious intolerance or persecution. Today, however, separation of religion and state has been taken to extreme, if not absurd lengths. Any attempt to help parents defray the costs of educating their children in the way they feel proper is met with outbursts of protest and condemnation. But actually the reverse is true: Such financial aid is not incorrect; it is not illegal; it is perfectly within the boundaries of the Constitution. Indeed, to withhold finances from religions schools is tantamount to religious persecution! For it is the inalienable right of every parent to choose their child's education; and since in public schools one cannot receive a religious education (not even that stated on our money—"In G-d We Trust") parents are forced to build their own schools. Yet they are still required to pay, through their taxes, for the public schools! And surely all excuses are invalid when it comes to the question of helping religious schools pay for the cost of non-religious components of schooling—e.g. travel, health, secular subjects, etc. Refusal to help defray the cost of religious schools, or at least to grant tax rebates to those parents whose children attend the religious schools, is thus a subtle form of financial persecution.

But even financial help such as that described above is not enough. Every child, including those attending public school, must be inculcated with that belief—"In G-d We Trust." This should be the very foundation of education, with each day beginning with a non-denominational prayer affirming our trust in G-d. Obviously, this is not in any way meant to give license to the state to differentiate between one religion and another. We refer to that which is common to all religions—a simple declaration of trust in G-d. This does not negate the concept of separation of religion and state, for in no way is this religious intolerance, which was the sole concern of the founders of this country when instituting this concept.

All of the above may be verified by actual experience. The best, if not only way to train a child to be a moral and decent citizen is to instill in him the knowledge, at least through a simple recitation every day, that we trust in G-d. Such knowledge helps to check temptations to do wrong, and to ensure that a child's conduct is fitting and proper. And those who automatically raise the objection of separation of religion and state do so without reckoning with the devastating consequences of a generation reared without any knowledge of G-d. The results are obvious: Many adults of today feel no responsibility to train or influence their children, resulting in the frightening state of our society.

It is, we firmly believe, imperative to instill in children the knowledge that the basis of our society, and indeed of each individual, must be the awareness and trust in He Who is the true Existence—G-d. And, as noted earlier, this is as a beginning carried out through a simple declaration by children at the beginning of each day, those four words which so succinctly sum up what we have been saying—"In G-d We Trust."

*As a matter of religious belief Orthodox Jews will not write the word God because they regard it a violation of the prohibition against graven images.

The importance of the above demands an urgency that must transcend the normal length of time taken to implement legislative action. Besides being perfectly within the framework of the Constitution and law, it is the foundation of the existence of our country, and as such cannot, must not, be tied up in the usual legislative red tape. No committees are necessary, no cost/benefit studies are needed; but instead direct action.

American money not only bears the inscription "In G-d We Trust," but also "E Pluribus Unum" (out of many—one). This motto sums up the American democratic process. A government is installed when the "pluribus," the many, participate in free and true elections. The purpose of any election is the unity that will be its consequence; for once the majority has expressed its choice, even the dissenting minority must unite behind that decision. In the case of Presidential elections, those who cast their ballot for a different candidate, representing different policies, will now, after the elections, also accept the victorious candidate as their President. And the reverse is also true: The victorious candidate is not only the president of the majority that elected him, but also of the minority which opposed him. He will fulfill his Presidential duties with complete integrity, not differentiating between those who previously voted for or against him. He is the President of the United States of America—of all Americans.

May it be G-d's will that this country conduct itself in all its matters with justice, kindness and peace. May all the above suggestions be speedily implemented, making it truly fit for G-d's presence, by everyone and all of us becoming and being a shining example in everyday life of "In God We Trust."●

"I SPEAK FOR FREEDOM" CONTEST

● Mr. QUAYLE. Mr. President, a young scholar, Miss Jeanine Gozdecki of Munster, Ind., has distinguished herself in a speech competition, the "I Speak for Freedom" contest. Her thoughtful speech addresses itself to the timely theme, "How Economic Freedom Affects Progress," and I feel it is worthy of my colleagues' consideration.

Mr. President, I ask that Miss Gozdecki's prize-winning oration be printed in the RECORD.

The document is as follows:

HOW ECONOMIC FREEDOM AFFECTS PROGRESS

"The most powerful single force in the world today is neither Communism nor capitalism, neither the H-bomb nor the guided missile—it is man's eternal desire to be free and independent."

This quotation by John F. Kennedy illustrates man's universal desire for freedom, a desire which has not been altered by the passage of time. We are all well aware of our forefathers who experienced this powerful force in establishing these United States. Nearly 200 years later this identical desire was again exemplified. In 1949 Chiang-kai Shek, a Chinese political leader in search of freedom from Communism, was driven from mainland China to a neighboring island. There, on this tiny island, Chiang-kai Shek established the Republic of China on Taiwan.

From the very beginning Taiwan was labeled as a failure by other nations. Yet, in light of the fact that Taiwan has continued its independence for more than 30 years, it seems that Taiwan has successfully defied those early predictions. Even the United States, Taiwan's major benefactor in the early years, quietly circulated word that a takeover of Taiwan by the Communists was imminent and that economic prosperity was impossible. But with the help of the United States, Taiwan developed a thriving export industry. Look around—the results are everywhere. How many Christmas tree ornaments, trinkets, and clothing have you seen with the infamous label, "Made in Taiwan?"

The boom in the export industry has strengthened Taiwan's economic freedom. The Chicago Tribune reported on February 4, 1979, that the Gross National Product has grown by an average of 8% a year for the past 25 years. It also indicates that the unemployment rate is only 1.5% and inflation stands at approximately 6%. Robert Parker, the President of the American Chamber of Commerce in Taiwan alleges the reason for the solid economic indicators is that the Taiwanese are "educated, well-fed, hard-working, and dedicated people." Such dedication has swept in billions in foreign investment. Newsweek, September 29, 1980, remarked that the U.S. invested over 80 million dollars in 1979, and overall foreign investment in 1979 was 54% higher than in 1978.

Clearly, Taiwan has economically progressed. This economic progress has allowed for an increased military—to protect against possible intervention by China, and to support its economic freedom.

Though it began in 1949 with virtually nothing, Taiwan has since expanded its forces to 500,000 men who are prepared, armed, and ready for combat. Fortifying this initial number are 1.3 million trained reserves. Taiwan has not only built up its troops, but has acquired potent equipment as well. According to Arizona Senator Barry Goldwater, Taiwan possesses 200 F–5E fighter planes. The importance of this figure is emphasized by Goldwater, stating that these fighter planes are more powerful and more effective than any plane China has or is likely to develop.

Taiwan, the country doomed to failure 30 years ago, has acomplished goals once thought to be unattainable. Initially aided by the U.S., Taiwan developed an export industry which led to greater economic freedom. This in turn provided the means for developing a more powerful defense, and with this strong military preparedness, Taiwan has been able to maintain its economic freedom. Thus, when examining how economic freedom affects progress on the Republic of China on Taiwan, the positive results are undeniable. The western world's view of Taiwan is quite simple, "They seem to be doing everything right."—JEANINE M. GOZDECKI, 1981.●

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, is there an order for the Senate to convene on tomorrow?

The PRESIDING OFFICER. There is no order.

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate completes its business tonight, it stand in recess until the hour of 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF SENATE CONCURRENT RESOLUTION 9 AT 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I further ask unanimous consent that, at not later than 10 a.m. on tomorrow, the Senate resume consideration of Senate Concurrent Resolution 9.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m.. tomorrow.

The motion was agreed to; and at 6:36 p.m., the Senate recessed until Friday, March 27, 1981, at 9:30 a.m.

NOMINATION

Executive nomination received by the Senate March 26, 1981:

DEPARTMENT OF STATE

Robert L. Brown, of Virginia, to be Inspector General of the Department of State and the Foreign Service. (New position.)

CONFIRMATIONS

Executive confirmations confirmed by the Senate March 26, 1981.

SMALL BUSINESS ADMINISTRATION

Michael Cardenas, of California, to be Administrator of the Small Business Administration.

DEPARTMENT OF STATE

O. Rudolph Aggrey, of the District of Columbia, to be a Foreign Service Officer of the Class of Career Minister, A Consular Officer, and a Secretary in the Diplomatic Service of the United States of America.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF JUSTICE

William Francis Baxter, of California, to be an Assistant Attorney General.

IN THE AIR FORCE

The following-named officer for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapters 35, 831, and 837, title 10, United States Code:

To be brigadier general

Col. Wess P. Chambers, [redacted] FG, Air National Guard.

EXTENSIONS OF REMARKS

THE REAGAN TAX REDUCTION WILL INDUCE GREATER PRODUCTIVITY AND SAVING

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. ROUSSELOT. Mr. Speaker, Dr. Paul Craig Roberts, Assistant Secretary of Treasury for Economic Policy, has written an excellent article, appearing in the March 19, 1981, Wall Street Journal, which rebutts "The Keynesian Attack on Mr. Reagan's Plan." Dr. Roberts points out, through some simple calculations, that it is the aggregate effect of small individual responses to the improved incentives for work and saving which will lead to enormous increases in our Nation's productivity and saving. He also alludes that a reduction in marginal tax rates is not just an individual or personal tax cut, but a business tax cut as well. This is a result of the capital gains tax rate being dropped from 28 percent to 20 percent, the tax rate on investment income falling, and the effect that the Reagan tax proposal will have on thousands of unincorporated businesses and partnerships will be affected.

Mr. Speaker, I am convinced that our economic policy course must be changed. Our clear alternative is to implement the supply side approach of the Reagan administration. If we fail to achieve this, it is certain that our old Keynesian policies, which have brought us double-digit inflation, high levels of unemployment, and other economic dislocations, will lead us down the path of doom.

I urge my colleagues to read Dr. Roberts' analysis of the administration's tax proposal so that they may be aware of the tremendous gains our economy will accomplish through the Reagan proposal's adoption by the Congress.

THE KEYNESIAN ATTACK ON MR. REAGAN'S PLAN

Every morning when I pick up my New York Times I expect to read in Steven Rattner's reports that I have abandoned supply-side economics. After all, he even reported that Jack Kemp himself had abandoned his own bill in disagreement over an inconsequential detail.

Mr. Rattner has established himself as leader of a corps of reports trying to drive permanent wedges into any crack of disagreement that policy discussion inevitably generates. The object is to isolate the supply-siders. Last Week Hobart Rowen, a Washington Post commentator long identified with the liberal Keynesians, said it wouldn't be long before supply-side economics is back on the shelf. Critics sense that if they can blunt and deflect the intellectual cutting edge of the Reagan program, the rest of it can gradually be chopped up with the familiar interest-group and income-redistribution arguments.

But in spite of all the journalistic smoke, the supply-siders still have on their side the Office of Management and Budget. Treasury and the President—not exactly what you would call a hunkered-down position. And the Reagan tax bill is still very much alive. The problem isn't in controlling the policy but in controlling the explanation of it.

While supply-siders have been busy making the policy, stalwart representatives of the status quo like Walter Heller and other leftover economists from a bygone era have been busy explaining the policy in Keynesian terms. When you hear supply-side economics interpreted by a demand-side economist, it sounds scary indeed.

EXPLAINING INFLATION

The policy will be "actively inflationary," warns Otto Eckstein of Data Resources Inc., an economic consulting firm. Supply-side analysis, chimes in Mr. Heller, is a "fairy tale." The true story, he charges, is that supply-siders are unleashing the wolf of inflation to devour the country. Because both these demand-siders have been so thoroughly associated with the policies that have inundated us with inflation, people think they must be inflation experts.

It is nevertheless a fact that neither Mr. Eckstein nor Mr. Heller has ever been able to explain why it is inflationary when people spend their own money, but not when the government spends it for them. Yet it is easy enough to understand why supply-side tax cuts aren't inflationary. All you have to do is to stop thinking like a Keynesian.

The administration wants to cut personal income tax rates, not in order to give people more money to spend, but in order to increase incentives to earn more taxable income. Today people are taxed at unprecedented high rates on any additional income that they earn, either from work effort, saving or upgrading their skills. The inevitable results of little reward for extra effort are worsening work attitudes, high absenteeism rates, reluctance to work overtime and to assume risks, and the lowest personal saving rate in anyone's memory.

For the supply-side policy to work, taxpayers don't have to respond to lower marginal tax rates by giving up vacations, going on a double-shift and saving all of their income. When you have a work force of more than 100 million people, small individual responses result in a large aggregate effect. If the average number of hours worked per week rises from 35 to 35.5, GNP rises by $24 billion. If the absentee rate declines by one-half percentage point, GNP rises by about $10 billion. If the personal savings rate rises from about 5.5 percent to about 7.5 percent as it did after the Kennedy tax rate reductions, private savings increase by $42 billion annually at current income levels. The increased savings together with the revenue "reflows" and the budget cuts more than pay for the tax cuts, thus making possible "crowding in," or increased capital formation.

If you are a Keynesian, however, you don't think about any of this, because in the Keynesian model tax cuts have only a single purpose—to increase demand. Therefore, Keynesians focus only on the question: What are people going to do with the tax refunds that they get back on their existing earnings? The answer is that what they do with them is much less important than how they respond to the changed incentives. If savings, investment and work effort do not respond to higher after-tax rewards, then the policy will have no effect on the economy, and the downside risk is simply: no change.

Keynesians, however, should have their question answered, even if it is irrelevant. Polls indicate that people plan to use more than half the tax refund to build savings and pay off debts. But suppose they spend it all. Keynesians would say that total spending has increased and, therefore, the tax cuts are inflationary. But the government is spending less, so how has total spending increased?

At this point the critics claim that Congress will cut taxes, but not spending. Surely then the tax cut would be inflationary. No, not unless the Federal Reserve prints more money.

A tax cut without a spending cut can result in a budget deficit, but a deficit is not inflationary unless the Fed monetizes it. If the Treasury finances the deficit by selling bonds to the public, it recovers by borrowing what it handed back in tax refunds, and total spending does not change. That's why supply-siders insist that it is not necessary to offset a tax cut with a budget cut in order to avoid inflation. The supply-side rationale for the budget cut is to prevent the increase in private savings from being used up financing the growth in government spending. Supply-siders want the increased savings to go into private capital formation and not into government bonds.

Tax cuts are associated in people's minds with higher demand and inflation because that is the way it works in the Keynesian policy to which they are accustomed. In the Keynesian policy the purpose of a tax cut is not to alter incentives but to create a budget deficit. The Fed is then pressured to monetize the deficit in order to increase aggregate demand. But since the Reagan administration is not cutting taxes in order to stimulate demand, it will apply no pressure on the Fed to monetize debt.

Indeed, it is applying the opposite pressure, which has confused some of the Keynesians in the Fed. Your policy will have no effect at all, they say. The fiscal stimulus you are providing with the tax cut will be offset by the tight monetary policy you are urging on us, and the policy will be a wash. We hope the Fed catches on sooner rather than later that we are not trying to provide a fiscal stimulus.

PERSONAL VS. BUSINESS

Once people catch on to the supply-side, they will realize that the old categories of personal versus business tax cuts don't make any sense. The proposed reduction in the personal income tax rates is a business

tax cut too. It automatically reduces the maximum capital gains tax from the present 28 percent. It increases the rate of return to investment income across the board. It lowers the tax rates on partnerships and unincorporated business income. It increases savings. It improves work attitudes, lowers wage demands and contributes to better labor productivity. What "business tax cut" does more?

People will learn also that supply-side economics doesn't have a "Phillips Curve"—the idea that you can't have higher economic growth without higher inflation. To get a "Phillips Curve" you have to mix together demand stimulus and supply disincentives like high marginal tax rates and inadequate capital cost recovery. Thus when The Washington Post charges that President Reagan's "scenario lies far beyond the limits of any past experience in this country or any other industrial democracy" it is wrong for two reasons. It ignores the policy context of the past experience in this country, and it overlooks Japan. In 1974 the Japanese had a real economic growth rate of −0.2 percent and an inflation rate of 24.5 percent. Five years later real growth was 6.1 percent and inflation was 3.6 percent.

Now that's what I would call a real rosy scenario. President Reagan is a piker by comparison. Do the "prestige press" and congressional Democrats really believe that the U.S. economy can't perform even half as well as the Japanese? Supply-siders see nothing to be gained from writing off America at the start.●

BUDGET CUTS—FACTS AND MYTHS

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MICHEL. Mr. Speaker, many myths have grown up around the proposed budget cuts. We hear horror stories and we hear charges that the administration is not compassionate. Well, is it compassionate to cause inflation, to ruin family budgets, to put the poor in a position where they can never even hope to get out from under? I do not call that compassionate. But those who are now criticizing the President are exactly those who for years were voting for inflationary legislation that has crippled a generation of Americans. Where was their compassion then? Where was the compassion of groups now speaking against budget cuts when middle-income families were being taxed into ruin and despair because big spenders took their money in taxes?

The next time I hear a call for compassion from those who caused this vicious inflation or those poverty warriors who benefit from it, I am going to ask to see copies of the remarks they made against inflation's devastation in the years when they were calling for more and more spending.

For the present I want to introduce into the RECORD two newspaper articles which give some facts about the proliferation of income distribution programs in this country over the past few years.

I ask unanimous consent that "Census Finds U.S. Benefits Reach 1 Out of 3 Families" from the New York Times and "Public Aid Is Shown To Go To Many Who Aren't Poor" from the Wall Street Journal, both dated March 13, 1981, be included in the RECORD.

CENSUS FINDS U.S. BENEFITS REACH 1 OUT OF 3 FAMILIES

WASHINGTON, March 12.—The Census Bureau, in its first look at who gets help from the Government, said today that Federal benefit programs reached one out of every three American households in 1979.

The agency reported that 27,190,000 of the 79,108,000 households counted in the 1980 census used at least one of five Federal benefit programs: Medicare, Medicaid, food stamps, school lunch aid and subsidized housing.

Medicare is the single largest program, covering one or more persons in 18,526,000 households. Gordon W. Green Jr., author of the report, said that the large number of people covered by Medicare meant that the totals did not reflect only assistance to the poor.

AGE OR DISABILITY FACTOR ARE CITED

He noted that eligibility for Medicare was based on age or disability, not income, and said that people receiving only Medicare totaled more than half of those studied. Thus, those receiving assistance based on income level accounted for about one household in six.

Ninety percent of the people covered by Medicare were white and 9 percent were black. According to the report, 15 million of the households involved included someone 65 years of age or over.

The median income of households with someone covered by Medicare was $8,584, compared to $16,533 for all households in the country. Mr. Green noted that most Medicare recipients were over 65 and were retired.

While Medicare is aimed at the aged and disabled, Medicaid tries to help needy families with dependent children. It covered 18.1 million people in eight million households under a complex array of rules that vary from state to state.

MEDIAN INCOME IN MEDICAID HOUSEHOLDS

The median income of household with Medicaid coverage was $5,990. Of them, 68 percent were white, 30 percent were black, and 9 percent Hispanic, according to the figures.

Those totals and some others add up to more than 100 percent because some Hispanic Americans list their race as white or black and their national origin as Hispanic; this can result in a household being counted as Hispanic and also under the white or black category.

According to the report, about 5.9 million households received food stamps, 66 percent of them including children under age 19. These households had a median income of $5,300 and 77 percent of them had incomes under $10,000.

Of these, 42 percent were families in which no husband was present and 17 percent were 65 or over. Food stamp households were 63 percent white, 35 percent black, and 10 percent Hispanic.

DATA ON PUBLIC SCHOOL LUNCH PROGRAM

While all public school lunches are at least partly subsidized, special programs provide lunches free or at a reduced cost to children from low-income families. Children from families earning less than 125 percent of the Federal poverty level get free lunches, while price reductions are available for those from families whose annual income ranges from 125 percent to 195 percent above the poverty level. For a family of four, the Federal poverty level is $7,450.

A total of 4.9 million households have children receiving this assistance, about 18 percent of all households with school-age children.

The bureau said that about 2.5 million families lived in public or subsidized housing, about 3 percent of all households in the nation.

The median income for the group was $4,980. Thirty-nine percent were black and 8 percent Hispanic. About 66 percent were families in which no husband was present.

PUBLIC AID IS SHOWN TO GO TO MANY WHO AREN'T POOR

WASHINGTON.—The Census Bureau reported that 39.5% of households getting food stamps aren't poor.

The bureau also found that 57.3% of households getting subsidized school lunches are above the poverty line, along with 53.4% of households in subsidized housing, 52.5% covered by Medicaid and 82% of those covered by Medicare.

The findings are contained in the bureau's first survey of the economic and demographic characteristics of those receiving noncash public assistance.

The findings are likely to be used by both sides in the current debate over President Reagan's proposals to pare spending for most of these programs.

The President insists his cuts wouldn't hurt the "truly needy," while critics are insisting the poor will suffer most.

The survey did find that beneficiaries are largely above the official poverty line, which for a nonfarm family of four was $7,412 in 1979, the year the survey was conducted. But it also found that few beneficiaries are affluent.

FOOD-STAMP HOUSEHOLDS

For example, only 10% of food-stamp households had incomes above $15,000 a year, and one-quarter of those were families with six or more mouths to feed. Median income for all U.S. households was $16,533.

Similarly, 7% of those in subsidized housing had incomes exceeding $15,000, along with 21.8% of those getting school lunches, 17.8% of those covered by Medicaid and 25.7% of those covered by Medicare.

The bureau found the extent of noncash benefits has grown to enormous proportions. More than 27 million households, or 34.4% of all U.S. households, received one or more of the benefits in 1979.

By far the largest of the programs was Medicare, which covers the aged and disabled. But even the other benefits—intended primarily to assist the needy—reached 13.4 million households, or 16.9% of the U.S. total.

PUBLIC HOUSING

Nearly six million households received food stamps. Their median income was $5,300. The average annual value of the food stamps was $810 per household.

More than 2.5 million households were living in public housing or benefitting from federal rent subsidies. Median income was $4,978.

About 4.9 million households had children receiving free or cut-rate school lunches. Median income was $9,190.

Medicare covered 18.5 million households, or nearly one in every four. Median income for this group, 81% of which included a householder 65 years old or older, was $8,584.

Medicaid covered eight million households, with median income of $5,990.●

THE 99TH ANNIVERSARY OF THE KNIGHTS OF COLUMBUS

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. CARMAN. Mr. Speaker, I would like to call the attention of the House to an important anniversary . . . the 99th year of the Knights of Columbus on March 29.

The Knights of Columbus is an international organization of Roman Catholic men, founded by Father Michael McGivney in 1882 to supply insurance benefits to Catholic families. Today, it is one of the largest fraternal organizations helping the handicapped and needy, sponsoring religious, welfare, and educational programs.

The Knights of Columbus has about 1,200,000 members in the United States, Canada, Mexico, and other countries. Members must be at least 18 years old and practicing Roman Catholics.

Mr. Speaker, It gives me pride to salute the Knights of Columbus on its 99th anniversary, which was called to my attention by the Knights of Columbus council in my hometown of Farmingdale, N.Y. I know they will continue their program of good works for the communities they serve for many years to come.●

JAPAN'S DEFENSE SPENDING INADEQUATE

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. FINDLEY. Mr. Speaker, as the National Security Record, published by the Heritage Foundation, notes in its March 1981 issue, the United States spends a higher percentage of its gross national product on defense than any of the other 10 wealthiest Western nations. The disparity is particularly great between the percentage of GNP which the United States spends on defense—5.2 percent—and the percentage Japan spends—0.9 percent.

The National Security Record makes some particularly useful suggestions for ways in which Japan can contribute to the Western defense effort to enhance our common security. I would like to call these suggestions to the attention of my colleagues.

The material follows:

THE ALLIES AND DEFENSE SPENDING

The United States and its Western allies have reached a critical watershed in their politico-military relations. Ambitious Soviet geostrategic goals aimed at severing Japan and the nations of Western Europe from their American ally, whether through indirect political and economic isolation or direct military intimidation, can only succeed if the nations of the West fail to understand the scope of the Soviet threat and do not act to preserve the political, economic and security framework that has protected their interests for the past 30 years.

Every aspect of Western security-political, economic, and military—is important, and should not be considered as more significant than any other. However, the one aspect that continues to pose the most difficult problems for the nations of the West is that of paying for their collective defense. The issue of Western burden-sharing in the defense sphere deserves particular attention because of current trends in U.S.-Soviet defense expenditure. General David C. Jones, Chairman of the Joint Chiefs of Staff, underscored the significance of the divergence in U.S.-Soviet defense spending in his FY 1982 Military Posture Statement by noting that the U.S.S.R. out-spent the U.S. on defense by $450 billion over the past ten years. According to Jones, the Soviets outspent the U.S. on defense activities by 50% in 1979, or by approximately $70 billion.

Clear, such a wide disparity in U.S.-Soviet defense expenditure is unacceptable. The U.S. should act promptly to reverse these adverse trends in a militarily prudent and fiscally efficient manner. Yet it is not the sole responsibility of the United States to redress the growth of Soviet military power.

Current estimates of the FY 1982 defense budget of the Reagan Administration project an increase of from $20-25 billion in budget authority above that proposed by the outgoing Carter Administration. Wisely spent, such an increase can do much toward redressing the imbalance in U.S.-Soviet military power. However, even given such sizeable and necessary U.S. defense spending increases, a U.S.-Soviet defense spending gap will still remain. As the following table indicates, it is well within the capacity of the ten wealthiest nations of the West to help the U.S. decrease this spending gap.

The purpose of this comparison is to highlight the enormous economic base the West can draw on to compete against the Soviets militarily—heretofore underutilized because of a lack of direction from the U.S. and a collective hesitation against increasing defense spending.

TABLE I.—COMPARATIVE DEFENSE SPENDING FOR THE 10 WEALTHIEST WESTERN NATIONS

[Dollars in billions]

Nation	As percent of GNP [1]	1980 U.S. dollars
U.S.	5.2	$142.7
U.K.	4.9	24.4
Japan	0.9	9.0
W. Germany	3.3	25.1
Italy	2.4	6.6
Canada	1.7	4.2
Australia	2.8	3.9
Belgium	3.3	3.7
France	3.9	20.2
Netherlands	3.4	5.2

[1] Defense spending as percent of GNP figures on 1979 estimates given by The Military Balance. 1980 figures not yet available.

Source: The Military Balance, 1980–81, pp. 96–97.

EAST ASIA

Of all the nations in East Asia, Japan is the most reluctant to increase its defense spending substantially. In late July 1980, it appeared as if the Japanese would raise their 1981 defense budget by 9.7%, excluding pay raises. The cabinet supported a joint Finance Ministry/Defense Agency compromise to raise defense spending by this amount in the coming year. However, following further cabinet negotiations on the defense budget in December (occurring with the prospect of increased budgetary deficits in view), Prime Minister Suzuki announced that the 1981 defense budget would be raised by 7.6%—or 4% after adjusting for inflation.

Although this downward revision of the Japanese defense budget is unfortunate, one should note that in July, the Defense Agency won an important concession from the Finance Ministry: the Finance Minister promised to hear future Defense Agency budget requests in the context of "domestic and international circumstances," clearly implying that Japanese defense spending could rise in the future if security considerations warrant it.

Japan's constitution mandates that its military forces be used for "self-defense" only, and for over 20 years Japan has spent less than one percent of its GNP on national defense, Moreover, the 1960 U.S.-Japanese Security Treaty stipulates that the U.S. come to Japan's defense if it is attacked, but not vice-versa. It is unlikely that the structure of the U.S.-Japanese security relationship can be changed in the near future. However, given the proper direction from the U.S., it may be possible for Japan to increase its self-defense capability in areas vital to its immediate security concerns.

There is reason to believe that Japan would be receptive to such direction. The 1978 Guidelines for U.S.-Japanese Defense Cooperation already provide for joint military exercises, joint planning and "major improvements in Japanese naval mining, air defense and anti-submarine warfare capabilities. . . ." Although powerful bureaucratic interests in Japan such as the Finance Ministry and MITI (Ministry of International Trade and Industry) have opposed major defense increases in the 1981 budget, a clear delineation of what Japan's future defense posture should be, coupled with continued U.S.-Japanese trade and an absence of foreign policy "shocks" reminiscent of the 1971 dollar devaluation, may help to achieve positive results over time.

Japan should seriously consider upgrading its self-defense forces in the following areas:

ASW—Japan plans to procure a total of 45 P-3C antisubmarine warfare aircraft (capable of mining waters under day and night all-weather conditions), with formation of the first P-3C unit in 1982, are steps in the right direction. Japan should also make efforts in future years to procure additional SH-3B ASW helicopters and ASW frigates for its maritime self-defense forces, as fewer of these systems are to be procured this year than was originally planned. Japanese ASW surveillance capabilities could be further enhanced with the procurement of shipboard ASW helicopters, now undergoing operational tests.

Sea-Lane Defense—Japan should resolve to undertake a greater role in the defense of the sea lanes. Aside from procuring ships

for limited coastal defense, Japan could markedly increase its sea-lane defense capabilities by procuring new destroyers, CG-47 Aegis cruisers and destroyer escorts armed with surface-to-surface and anti-ship-missiles, and additional RH-53E minesweeping helicopters.

Sea/Land Air Defense—Current Japanese plans to procure up to 123 F-15 fighters for homeland defense are reasonable, but consideration also should be given to extending the air defense capability for the Japanese fleet. Procurement of long-range, land-based F-14 fighers, if armed with Phoenix air-to-air missiles (incorporating active terminal guidance), would help in this mission. Another option, although perhaps less feasible politically, would be the deployment of ASW carriers, equipped with V/STOL (vertical/short take off landing) aircraft.

Foreign Assistance—Another means by which Japan can contribute to the security of the West is to provide ecomonic assistance to financially-troubled U.S. allies. Such aid has already been extended to Turkey and Egypt, and should be continued. By assuming more of this burden for the West, Japan can decrease the foreign economic aid requirements of its allies.

The crux of the issue involved in obtaining a commitment from Japan to increase its defense capabilities is not whether it should increase them at a certain percentage or up to a fixed rate of GNP (i.e., 1%). indeed, to do so may be neither sufficient for Japan, in terms of its real defense needs, or effective if those funds are not properly allocated. Instead, the U.S. should work and consult with Japan as a full partner in the Pacific region to define clearly the security threat to Western interests and to outline specific defense missions which Japan could undertake in cooperation with the U.S. in deterring Soviet expansionism.●

NUCLEAR WASTE MANAGEMENT POLICY ACT

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. DERRICK. Mr. Speaker, I am today introducing the Nuclear Waste Management Policy Act, a bill creating a framework for the establishment of licensed Federal geologic repositories for the disposal of high level radioactive waste, transuranic waste, and spent nuclear fuel. This measure provides a Federal program to insure:

Development of guidelines for the recommendation of sites for repositories;

Selection of two or three sites in different geologic media suitable for development as repositories by January 1, 1985, and site characterization studies to be conducted by the Secretary of Energy on these sites;

Recommendation by the President to the Congress, no later than January 1, 1987, of a site which he considers qualified for application for license as a repository;

Establishment of a process and specific role for State and local participation with respect to decisions regarding siting and development of waste repositories;

The existence of an appeals process by the State regarding a site's selection, with review of this appeal by Congress;

Adequate involvement by the Nuclear Regulatory Commission and a specific judicial review process of any administrative decision.

In addition, the Nuclear Waste Management Policy Act requires the Department of Energy to develop, in conjunction with other Federal agencies and departments, annual nuclear waste management reports describing activities undertaken and those planned. By March 1, 1982, the report should also include an assessment of the feasibility of providing payments to States or local governments to mitigate impacts caused by the development of permanent repositories, including the possibility of a form of payments-in-lieu program.

By June 30, 1985, report is required to be submitted to the Congress and the President by the Department of Energy, outlining proposed fees to be collected from those holding title to the waste or spent fuel which is subject to disposal. These fees would be offset the construction, operation, administration and other costs incurred by the Department. This report will also review appropriate mechanisms for the possible creation of a revolving fund, so that funds could be made available for disposal costs without the up-front expense to the Federal Government.

Further, this measure calls for an accelerated demonstration program to be conducted at reactor sites, in cooperation between the Federal Government and private utilities, for the purposes of demonstrating onsite dry storage technologies of spent nuclear fuel. Onsite dry storage offers a potential solution for the interim storage of spent fuel and efforts should be made to provide for the licensability of this process.

Mr. Speaker, the policy established by this bill is long overdue. Even with enactment of this proposal, it will be 1997 at the earliest before a permanent repository is completed and ready to accept this waste. We cannot debate and delay any longer; the public demands that we act now.

During the past few years, as I have studied and worked on this issue, I have come to realize that our country possesses the technical expertise to resolve this problem. What we lack is the political courage to make the difficult decision to once and for all determine where we are going to dispose of this waste. Our hesitancy is due to the fact that such a decision is politically unpopular, because the obvious point is that no one wants the waste disposed in their State. I believe the solution lies in the determination and establishment of a policy whereby the selection of a permanent repository is based on sound technical and scientific decisions. With these sound decisions, we should locate a repository where the greatest protection is provided the American public and environment. The Nuclear Waste Management Policy Act provides such a solution and I urge my colleagues to join with me in supporting this measure.●

U.S. POLICY IN EL SALVADOR

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues a recent editorial which appeared in the Press-Courier, from Oxnard, Calif., in my district.

The editorial puts clearly into perspective the serious elements affecting our policy toward El Salvador. It merits the careful attention of all of us who must make decisions on economic and military assistance to that Central American nation.

The article follows:

U.S. POLICY IN EL SALVADOR

El Salvador is a small Central American country in which 12,000 people have been killed in the last 14 months. It has virtually no strategic significance of its own but has become the focus of international forces in the new cold war.

The Reagan administration is sending more Army training advisers and $25 million more in military aid to El Salvador. Earlier, U.S. economic aid to Nicaragua was suspended until Nicaragua gives assurances that it will halt the flow of weapons through Nicaragua to the rebel guerrillas in their mountain strongholds in El Salvador. Secretary of State Alexander Haig warned Cuba that this country will take action, if necessary, to keep Cuba from supplying arms to the rebels.

It is clear that the rebel leadership in El Salvador is made up, largely, of hard-line Marxists. A victory for them would be a victory for communism, for Castro and for the Soviet Union. It would threaten the stability of other Central American governments, such as the one in neighboring Guatemala, and it could threaten the Republic of Mexico.

The United States cannot allow such a communist victory in the Caribbean. But in preventing it, this nation must be sure that it does not jeopardize its good relations with Mexico and Venezuela, which are of more strategic importance than is El Salvador and which have democratic governments.

U.S. military aid to the junta in El Salvador can prevent a communist victory. But, by itself, it will not create the political conditions necessary for peace and tranquility within the troubled country. Only recently, El Salvador's president, Jose Napoleon Duarte, said the peasants would have to wait five to 10 years for the enactment of the second and most important phase of the government's land reform program. The announcement was expected to increase the

peasants' sympathies for the leftist guerrillas.

It is required that Americans seek to repel the forces of communism whenever they seek lodgment in this hemisphere, not only by military aid but also by constructively working to improve the lot of the common people.

Such a humanitarian policy is essential in Americans' relationship with the people of El Salvador. They must not become mere pawns in a power struggle between the superpowers.●

LAMB IMPORT LEGISLATION

HON. TOM LOEFFLER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. LOEFFLER. Mr. Speaker, over the last several years, sheep producers in this country have suffered a steady and serious decline in their herds. In 1950, for example, domestic sheep numbered some 50 million head. As a result of inflationary production costs, increasing predation of live sheep and lambs, and rising imports, by 1978 this figure had dropped to 11.7 million head. As a result, as foreign imports of lamb have increased, the supply of domestically produced product has severely declined.

Moreover, lamb is now the staple of the American sheep industry, and imported lamb is currently in direct competition with domestically produced lamb, creating an excess supply in a relatively small market, reducing the ability of the American producer to market the sheep industry's main product.

In addition, unlabeled foreign lamb meat is sold in many stores alongside fresh domestic lamb; thus the American consumer may not be afforded the opportunity to choose between the imported product and the usually more fresh domestic lamb.

Mr. Speaker, the legislation which I am introducing today along with Mr. ROUSSELOT, Mr. STENHOLM, Mr. HANCE, and Mr. SKEEN, will correct the oversight created when this important commodity was omitted from current meat import restrictions by providing a modest limit on the quantity of lamb meat which may enter the United States during any year. This legislation will provide protection for both the consumer and the producer of lamb by assuring an adequate supply of domestic lamb meat at a fair price while maintaining the stability of our international lamb trade, and I urge my colleagues' support.●

SOMEWHERE IN FRANCE

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. BEARD. Mr. Speaker, the November 1980 issue of Eagle and Swan, a magazine published for members of America's Armed Forces, contained an article which should be of interest to all students of American military history. "Somewhere in France" is the story of Ralph W. Tyler, the first accredited black war correspondent. Mr. Tyler was a remarkable man who braved enemy fire and endured life in the trenches to report the heroic deeds of black fighting units whose great contribution to the allied war effort was overlooked by the majority press.

The article is taken from a soon to be published book of the same title written by Mr. Jesse B. Brown of Potomac Electric Power Co., the electric utility which serves Washington, D.C. In addition to his work with Pepco, Mr. Brown is a captain in the U.S. Army Reserve. He conducted the research for the article and book while he was a graduate student at the University of Chicago under the direction of the noted historian, Prof. John Hope Franklin.

As the chronicle of Ralph Tyler's war accomplishments, "Somewhere in France" will be published under the auspices of the National Black Veterans Organization. I urge my colleagues to read the following article and watch for the book when it is released.

SOMEWHERE IN FRANCE: THE STORY OF THE ONLY BLACK AMERICAN CORRESPONDENT IN WORLD WAR I

(By Jesse B. Brown)

American Black soldiers played an important and often heroic role in World War I. Before the end of the war, more than one third of the entire American force—50,000 men in 115 different units—were Black. Each of the four infantry regiments of the 93rd Division, one of two Black divisions, were awarded one of the highest medals bestowed by France, the Croix de Guerre, for their valor. Reporting on the life and activities of these "Hell Fighters," as they were called by the Germans, was Ralph W. Tyler, the first Black man to be named as a regular war correspondent by any government in the world.

The field correspondents' life, while not lived in the first line of danger, was difficult. Rough terrain, deep mud during the rainy season and the difficulties of transportation made his work hard. Tyler was more than the usual war correspondent too. In addition to his strictly journalistic efforts, Tyler tried to bring to light the blatant discrimination then widely practiced against Blacks in the Army. His were often the only reports which clearly and accurately told the story of the bravery and good character of Black troops.

Ralph W. Tyler was not always a distinguished figure in war journalism. He was born in Columbus, Ohio, in 1859. During the Theodore Roosevelt administration, he served as an auditor in the United States Navy. For seventeen years, Tyler served in various departments on the Columbus Evening Dispatch and the Ohio State Journal, gaining experience in the newspaper business. His experience afforded him the opportunity for association with many influential newspaper men. This intimate contact with white journalists was invaluable to Tyler in his labors as a war correspondent.

By 1918, well after the American entry into the war, the Negro press was understandably annoyed that it had no observer on the Western Front. After all, thousands of Black men were making a substantial contribution to the war effort and despite the horrors of the trenches, supported the war enthusiastically. Negro editors wanted to send a trained Black newspaper writer to report on the life and the activities of these soldiers, as he saw them, for the Negro press of America.

On September 17, 1918, Ralph Tyler was appointed by the Committee on Public Information, an organ of the War Department headed by George Creel, as a regularly commissioned war correspondent "to do specialized reporting on the conditions surrounding the colored troops in France and to make reports on activities and engagements in which the colored soldiers are prominent." Creel introduced Tyler by saying in part, "He will be on the staff of General John Perishing, Commander-in-Chief of the American Expeditionary Forces overseas. Every facility has been provided by me for the prompt and accurate gathering of all facts that may be of interest to the colored people."

Writing from "Somewhere in France" Tyler sent his reports to the Committee on Public Information in Washington, D.C. After the CPI received the reports, they were given to Emmett J. Scott, Assistant to the Secretary of War for Colored Affairs and another outstanding Black man. Scott would edit the reports and circulate them throughout the country to the Black papers.

Tyler served his purpose in France. He reported, in instance after instance, that while the other newspapers have credited the "Americans" for daring raids, they failed to mention to the world that it was the Black soldiers of America who were the heroes. He was also a watchdog over the Army camps in France. While in many camps he reported that discrimination was not a factor, in others he found it worse than in America.

One rumor at the time was that "Black soldiers were only good for raping French women." Tyler proved that white soldiers had a much higher rate of Venereal Disease than Black troops. Indeed, he showed that in many Black units no cases of V.D. had been reported. He also noted that Black soldiers were saving their money in order to support their families and get basic or advanced education. In one of his articles, Tyler documented that the freedom afforded many of the Black troops did much to induce thriftiness. He found the number of Black soldiers saving was most gratifying.

In his last letter from France, Tyler turned his thoughts to the effect that white American race prejudice had on the French people. "It is something fierce," said Tyler, "the way some American white soldiers are striving to introduce color prejudice in Paris and everywhere in France. You cannot begin to imagine how strenuously they have worked along this line, and in some places they have actually introduced discrimina-

tion here in Paris." Emmett Scott, his friend and superior in Washington, tried to console him by responding that he hoped Tyler would preserve as much equanimity of spirit as possible. "There is so much for all of us to do that you cannot for one minute permit yourself to be overcome by the unjustices that surround us. In order words, it is possible, I sometimes fear, for most or all of us to permit our indignation to eat into our very vitals."

Tyler returned home, his job complete, in mid-January 1919. What was most striking about the Armistice, Tyler reported, was that the Black troopers felt that it was another Emancipation Proclamation—not so much the European people as for themselves. A trench soldier moved Tyler when he said "Now freedom must come; we have won it. We came to France and won a man's chance."

Ralph W. Tyler only lived two more years. He did not have a chance to see his dream of a totally integrated American Armed Forces. Indeed, it was not until the Korean War, some thirty years later, that the Armed Forces became totally integrated by Presidential Proclamation and the achievements of Black troops began to be covered on a consistent basis by the majority press.●

TAKING MONEY OUT OF THE GAME

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MICHEL. Mr. Speaker, there has been quite a bit written and spoken about our current economic problems. But recently I came across an article which very cleverly made a memorable and quite original point about a grave problem: underinvestment. I commend this article to your attention and am inserting in the RECORD "Taking Money Out of the Game" by C. L. Dancey of the Peoria Journal Star, March 24, 1981:

TAKING MONEY OUT OF THE GAME

(By C. L. Dancey)

A sports fan who loves the game is apt, normally, to have an attitude that the athletes he watches are what make the game—and the owners are rich—so anything the players can get out of the owners is fine and dandy.

But what really makes "the game" is two games being played well. One is the financial and organizational "game" and the other is football, baseball, or whatever on the field.

There are also two kinds of money involved. Money for personal use, spending money, let's say, of the kind we live on . . . and money at a level nobody can "spend," which has a totally different function as a tool in the industry or the economy of the nation. Investment money.

We are now paying star athletes what is no longer simply abundant money for their personal use and security. We are paying them Tool Money. Investment Money.

What are they doing with it? They are taking it out of the industry. They are taking it out of the game. If it keeps up they are likely to be hurting the game.

The owners, those rich bums, are the ones who put money in, and worked out the kind of packages which—up to now—have made the whole thing work through a complex and balanced combination of deals with players and pop sellers and ball parks and ticket sales and TV contracts.

And the experienced owners seem to be trying to bail out in bunches in baseball.

It applies to show business as well. Jane Fonda's politics may be screwy but she's made millions with her talent—and she puts millions back into new shows. No matter that her motive may be more propaganda. She puts money back in show business. Most big money stars do not. They take it out, if they can, and plow it into "solid" investments like real estate. Those "greedy" producers are the ones who plow the money from their hits back into show business. So what helps show business most? Producer profits or confiscatory "star salaries?"

This process has a much wider application.

There is really only one basic economic system working in this world—capitalism. Existing communist or socialist systems play with the words but are really nothing more than practicing state capitalism. They face the same need to acquire a surplus generated by their economic activities or by outright coercion to invest in modernization, expansion and development—or the whole thing goes to pot.

The only real differences behind all the fancy words are pretty simple. One way the politicians and the bureaucracy decide where to put the money, and the other way a whole bunch of people who have been successful in previous investment are the real "mainstream" engaging in independent judgments on where to invest, again.

Free capitalism is like the sports game, itself. The winners with proven investment skills make money and win the chance to invest more. The losers with poor skills lose money and fall by the wayside—or invest less.

With all the fluff and errors around the edges of this freedom, in whose hands does the game of capital best serve those of us who buy goods, and services and tickets to ball games?

Bureaucrats and politicians? Or a host of people who rise or fall depending on how well they perform this very function in detail?

The other difference, of course, is that places like Russia and its milder imitators, both, extract capital from the citizenry on a massive scale by sheer force, whereas true capitalism acquires its surplus mostly through seduction instead of rape.

The trouble in our own society may well be that the politicians and bureaucrats have confiscated so much of the Tool Money, the Seed Money, the Investment Money in our system that the free society hasn't enough money left to invest wisely or otherwise—while our government doesn't invest it either. They just spend it.

We have been thus depriving ourselves of a prime economic necessity for any society, capitalist or socialist, by seizing so much of both our Spending Money and our Tool Money and then distributing it instead of putting it to work—thereby taking the steam out of our engine.

And when it doesn't run, or runs only fitfully, everybody loses.

There may well be thus a rather close relationship between what the player privileges and pay now threaten to do to professional sports, if we are not careful, and what special interest applicants at the doors of the politicians and voters have done to our national economy.

Let's hope we can salvage them both by facing the facts: that the economic wheel can't spin smoothly if part of it is flat.●

LEGISLATION TO REVERSE DECLINE IN U.S. MERCHANT MARINE

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. DONNELLY. Mr. Speaker, yesterday I introduced legislation to reverse the steady decline in the U.S. merchant marine. This extended period of deterioration has impeded our international commerce, eroded our balance of payments, jeopardized our emergency sealift capabilities, and cost the jobs of American seamen, stevedores, and shipbuilders.

The first bill I have introduced will speed the depreciation schedule for American-built oceangoing ships.

A number of other countries have garnered a large share of the world's shipbuilding business by permitting a more accelerated depreciation schedule. While I recommend nothing as radical as adoption of these formulas, our own 14-year depreciation schedule is now unrealistic at the other extreme.

By reducing to 5 years the full depreciation of American-built and American-operated ships, we can put the United States in a more competitive position.

The second bill I have introduced will establish a further tax incentive for construction of ships in American yards. Under this proposal, all profits earned from a ship will be exempt from taxation if they are reinvested in new ship construction within the United States. This will lead to an expansion of the American-flag merchant fleet, and stem the tide of American firms going overseas for their new ship construction and documentation.

It is essential that Congress address the serious problems underlying the decline in American shipbuilding and merchant shipping. The proposals I have put forward today are the basis for such action.●

GEORGIA SUPPORTS THE NRA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26,, 1981

● Mr. McDONALD. Mr. Speaker, on January 2, 1981, the great State of Georgia took it upon itself to publicly and formally endorse a position in complete accord with the National Rifle Association and in defense of the

second amendment to the Constitution. I am in complete concurrence with this stand and commend the Georgia House of Representatives for taking a stand in the public debate on this vital issue.

The resolution passed by this body follows:

A RESOLUTION

Supporting the position of the National Rifle Association on restrictive firearms legislation; and for other purposes.

Whereas the National Rifle Association is now, and for more than a century has been, America's most effective spokesman against any erosion of our constitutional right to keep and bear arms; and

Whereas the National Rifle Association correctly maintains that any legislation or regulation having the effect of restricting the lawful acquisition, possession, or use of any particular type of firearm, such as handguns, would represent a giant step toward governmental control over all firearms; and

Whereas the position of the National Rifle Association is that governmental control over the lawful acquisition, possession, or use of firearms results only in disarming law-abiding citizens, while criminals continue to acquire, possess, and use firearms unlawfully; and

Whereas such result negates any argument that gun control is an effective means of inhibiting crime; and

Whereas the position of the National Rifle Association on this issue, so vital to our constitutional rights, represents the viewpoint of the great majority of Georgians: Now, therefore, be it

Resolved by the House of Representatives, That this body hereby goes on record as being in complete support of the position of the National Rifle Association on restrictive firearms legislation; and be it further

Resolved, That the Clerk of the House of Representatives is hereby directed to transmit an appropriate copy of this Resolution to the Honorable Ronald Reagan, President of the United States, to each member of the Georgia Delegation to the United States Congress, and to the Honorable John B. Layton, President of the National Rifle Association.●

SAINTHOOD IS SOUGHT FOR FOUNDER OF KNIGHTS OF COLUMBUS

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. DENARDIS. Mr. Speaker, the Knights of Columbus, a religious, fraternal, and mutual insurance organization with 1.35 million members nationwide, was founded by the Reverend Michael McGivney on March 29, 1882, in New Haven, Conn., which is in the district I represent.

Father McGivney has been proposed for sainthood. The process of beatification leading to possible canonization has been underway for 3 years. The Catholic action organization which Father McGivney founded while serving as a curate at St. Mary's Church is considered by many to be his moral miracle. I agree with that assessment. The miracle, however, is not in numbers alone, but in the morally upright existence members of the Knights of Columbus have been directed to live, with emphasis on the value of the sacrament of marriage, on the sanctity of family and home and children, on respect for humanity and country, and on the importance of religion.

Mr. Speaker, on Saturday, March 14, 1981, the New Haven Register, a newspaper in my district, published an article concerning the pending beatification of Father McGivney. I ask that the article be printed with these remarks to call the attention of my colleagues to Father McGivney's great personal achievement, currently under study by church authorities. If Father McGivney is ultimately canonized, the United States will have its second saint.

The article follows:

SAINTHOOD IS SOUGHT FOR FOUNDER OF K. OF C.

(By John Knoble)

New Haven may have its own Roman Catholic saint.

For the past three years, the process of beatification of the Rev. Michael J. McGivney has been under way. Virgil C. Dechant of Hamden, supreme knight of the Knights of Columbus, revealed Friday. Beatification is the first step toward sainthood.

McGivney founded the Knights of Columbus on March 29, 1882, when he was a curate at St. Mary's Church on Hillhouse Avenue.

Saints have to have lived as spotless a life as is reasonably possible for human beings. They must have shown "heroic piety" in their Christian witness, and there must have been miracles.

"The Knights itself, now numbering 1.35 million members is in Father McGivney's case, the miracle," said Elmer von Feldt, the Knights' communication director. He explained that recently candidates for sainthood have been advanced on the basis of "moral miracles," rather than exclusively on circumstances like miraculous healing.

Von Feldt hopes that substantial progress can be reported by 1982 (the Knights' centennial). In the meantime, sculptor Stanley Bifeld of Weston is at work on a statue of McGivney to be placed in the plaza fronting the Knights' 23-story building at the foot of Chapel Street, the order's international headquarters.

The procedures to be followed are preparation of the McGivney's biography, study of his writings, and assessment of his piety by witnesses in written or oral testimony.

Anyone old enough—probably now close to 100—who as a child had contact with Father McGivney before his death in 1890 should contact von Feldt. There also may be stories passed on by parents relevant to the record.

All documents and testimonies must be examined by a church tribunal under the direction, in this case, of the Most Rev. John F. Whealen, archbishop of Hartford. If the case looks propitious, the documents will be sent on to the Sacred Congregation.

"Preparation of an exhaustive biography," said Dechant, "has already begun." Christopher Kauffman, formerly of the St. Louis University history faculty and author of a volume on the K of C, is in charge.

Wheaton has endorsed research into McGivney's life and ministry. "If eventually I come to the conclusion that substantial evidence of heroic sanctity exists," the archbishop said, "I would most willingly cooperate in the canonization cause."

The Rev. Justin Cunningham, pastor of St. Mary's, expressed great delight at the Knights' move. "What an honor and blessing it would be for our parish!" he exclaimed.

The oldest of 13 children of Patrick and Mary Lynch McGivney, Father McGivney was born Aug. 12, 1852, in Waterbury. At age 13 he went to work in a spoon factory.

He was ordained in 1877. Assigned to St. Mary's under the Rev. Patrick Murphy, who built the present edifice. McGivney found it was weighed down by heavy debts as well as by the antagonism of some of the city's leading citizens.

Later, under the Rev. P. P. Lawler, ministering to a large population of immigrant Irish, McGivney was helped by an undertaker friend who showed him first-hand glimpses of his parishioners' heartaches and poverty. Particularly poignant was the bleak future faced by a widow and her children after the death of the husband. The experience motivated one of the two early objectives of the K of C—a mutual insurance program to help widows and their children. The other objective was to meet the need for courage and mutual support among Catholic men in fighting religious discrimination.

Working with Catholic laymen, McGivney was a leading force in the setting up of the Knights' organization. He served as its secretary, and later, while pastor of St. Thomas Church, Thomaston, as its chaplain. He died of tuberculosis at the age of 38 in 1890. By then the order had 59 chapters in Connecticut and Rhode Island.●

ORPHAN DRUG LEGISLATION

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. BARNES. Mr. Speaker, thanks to recent media publicity and the introduction of legislation by Representative TED WEISS, awareness of problems relating to the treatment of low-incidence diseases is beginning to grow. But for individuals who suffer from such diseases as Tourette syndrome, Huntington's disease, muscular dystrophy, and others, the complications surrounding the manufacture of orphan drugs are depressingly familiar.

Representative WEISS's bill—H.R. 1663—of which I am a cosponsor, would establish an office within the National Institutes of Health to provide grants, loans, and contracts for research and development of drugs which could help or even cure victims of serious but relatively rare diseases, but which are unavailable because of their low profitability to manufacturers.

Tourette syndrome is a good example of a disease for which there is hope for effective treatment, yet the barriers to development of therapeutic drugs are formidable. This disease, which strikes children between the ages of 2 and 14, is a neurological disorder typified by multiple involuntary muscular movements and vocalizations. Its victims are perfectly normal in every other respect, yet they must live with the extreme stress which accompanies this disease. Because of the complex nature of Tourette syndrome and the absence of appropriate education on this subject in medical schools, the affliction is largely undiagnosed. And aside from the basic necessity for more research, there is an immediate need for new drugs. Tourette syndrome is now treated with a strong tranquilizer, Haldol, which is given in small amounts—yet some patients are not helped by this drug, and for others its side effects are worse than the disease.

The sad truth is that even if a cure for Tourette syndrome existed today, it probably would not be manufactured. To begin with, it now costs $70 million to develop, test, and market the average new drug, with a 7- to 10-year investment of time, which in turn eats away at the patent. Food and Drug Administration regulations become more stringent as time goes on, and safety and effectiveness requirements demand increasingly long studies. And finally, manufacturers fear that if they began to market such a drug, it could not be withdrawn from patients who benefited from it, no matter how few those patients were.

Does this mean that we must tell those who suffer from Tourette syndrome and other low-incidence diseases that there is no hope? I believe that is a preposterous response, considering the research capabilities that we possess. We do not know how many effective drugs there are that have never reached the marketplace, how many lives could already have been saved, or how much suffering might already have been alleviated. But I believe that it is not only appropriate, it is, in fact, imperative that the Federal Government step in to begin to correct this intolerable situation. The profit motive must no longer be a factor in the treatment of human suffering.●

REMEMBERING THE DISAPPEARED

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. HARKIN. Mr. Speaker, I would like to commend to the attention of my colleagues an article about the phenomenon of the disappeared, written by Jeff Nesmith for the Atlanta Constitution. In one article, Mr. Nesmith talks about the littlest prisoners and describes the case of Victoria Julien—age 1—and her brother Anatole Julien—age 4—whose parents disappeared, and who were jailed themselves in Argentina.

It is estimated that during the past decade an estimated 35,000 people have vanished in South and Central America. In Mr. Nesmith's words:

Because of who they were or what they believed or what someone thought they believed, people were plucked from their homes, the streets, the places they worked, even their churches. Most never were seen again. Families in Chile, Guatemala, Uruguay, Argentina and elsewhere have begged for information about missing relatives, only to be ignored.

Mr. Speaker, in the administration's foreign aid request, President Reagan has requested that the current ban on military assistance to Argentina be lifted. That ban was legislated by the Congress in 1978 precisely because the Government of Argentina is responsible for as many as 10,000 to 15,000 disappearances like the ones Mr. Nesmith describes. I have met personally with the anguished families of disappeared persons in Chile and Argentina. In Guatemala, the families know sooner what has become of their loved ones because their tortured and mangled bodies usually turn up—dumped by the side of the road, or thrown into deep ravines.

I would ask the Reagan administration and my colleagues in the House who wish to provide weapons to the Argentine Government—what outside force threatens the borders of Argentina? What does the Government want more weapons for, if not to further torture and abuse its civilian population?

The article follows:

[From the Atlanta Constitution]

THE VANISHED

(By Jeff Nesmith)

VALPARAISO, CHILE.—Police were mystified by the strange case of two small children found wandering through a park in the center of the city.

The youngsters seemed well-fed and were well-clothed. Yet they obviously had been abandoned at the park, and from the boy's accent it was plain they were not Chileans.

The boy said he was 4. He was taking care of his sister, who appeared to be about a year old.

Who were they? Where were their parents? How did they happen to be in the park? A strange incident—but soon forgotten.

The people of Valparaiso had no way of knowing that in the three months before the worried faces of the two youngsters appeared in newspaper photographs, the boy and girl had been held in political prisons in Argentina and Uruguay.

At times the children heard—perhaps even recognized—the screams of adults who were being interrogated and tortured. Apparently, one of the adults was the children's father.

Swept from prison to prison and country to country by historical tides that small children could not comprehend, Anatole and Victoria Julien Grisonas were part of what has been called "the phenomenon of disappearances."

Wholesale disappearances, evidently meant to eliminate dissent by eliminating dissenters, is not exclusively a Latin American problem. But because of indications the Reagan administration intends to soften the Carter White House's emphasis on human rights in foreign policy—especially in favor of what have been called "moderately repressive regimes"—the Latin American disappearances have taken on new significance.

During the past decade an estimated 35,000 people have vanished in South and Central America. Because of who they were or what they believed or what someone thought they believed, people were plucked from their homes, the streets, the places they worked, even their churches. Most never were seen again.

Families in Chile, Guatemala, Uruguay, Argentina and elsewhere have begged for information about missing relatives, only to be ignored.

In a recent report, a House committee said the phenomenon of disappearances was "a shocking picture of violation of human rights on an unprecedented scale." Other agencies and organizations have issued similar reports. These accounts often overlook details.

In the late 1960s, Mario Roger Julien Caceres and his wife, Victoria, were leaders of an organization in Uruguay known as the Victory for the People Party. Uruguayan exiles now living in Washington say the party was a non-violent group of middle-class radicals. Julien's mother says he was a "Christian socialist."

In any event, the party was not popular with the right wing in Uruguay and after a military junta took over the government in 1972, the Juliens were forced to flee. They took their baby boy, Anatole, and moved to Buenos Aires in neighboring Argentina.

Other Uruguayans—of various political persuasions—also were forced to flee, and a community of exiles grew in Buenos Aires. They took jobs and fell into the routine of life in Argentina. Many tried to conduct a sort of remote-control revolution, agitating with letters and broadcasts beamed back to Uruguay.

The Juliens were living in Buenos Aires May 7, 1975, when their daughter was born. They named her Victoria, after her mother.

Although the exiles hoped political change in Uruguay would allow them to go home, it did not materialize. Instead, in March 1976 economic chaos in Argentina led to a military coup against the government of Isabel Peron.

The exiles were trapped. The views of generals and admirals in power in Argentina were more like those of their counterparts in Uruguay than to their own. A few months later, mysterious police squads started rounding up Uruguayans in Buenos Aires.

On Sept. 26, 1976, neighbors say, a group of men came to the Julien home in the Buenos Aires suburb of San Martin and opened fire, wounding one of the adults. The entire family was arrested. The neighbors never again would see anyone from the Julien family.

Alvaro Nores Montedonico is a Uruguayan exile now living in Canada. In a statement given to Amnesty International, the London-based human rights advocacy

group, Nores Montedonico, who was arrested in Argentina in Oct. 2, 1976, a week after the Julien kidnapping, gave this account following his subsequent release:

"They took me to their base in Buenos Aires, where I was tortured on 5 October, 1976. I was removed from this base and put on a Pluna Airlines plane for Montevideo in Uruguay. On arrival, I was taken to another base run by the Uruguayan Army.

"While I was held prisoner in these two places, I discovered that about 50 Uruguayans had been arrested in the same fashion. Among them were two small children, Anatole and Victoria Julien Grisonas, whom I observed with my own eyes in Buenos Aires on the day I was kidnapped and later in the base in Montevideo.

"The two children were taken from the base to the home of a sergeant of the Servicio de Informacion de Defensa (of Uruguay) where they stayed until the end of November."

After that, Nores Montedonico lost track of the two children. So did almost everyone else.

Nores Montedonico is only one of several dozen political prisoners who have either escaped or been released from prisons in Argentina and Uruguay. These persons have offered convincing evidence that thousands of adults were tortured in these prisons. Some have described screams pouring from the torture chambers.

Did little Anatole and Victoria Julien Grisonas hear either or both of their parents screaming during torture? Officials at the Argentine and Uruguayan embassies in Washington refused to answer any questions.

Maria Caceres de Julien, the mother of Mario Julien Caceres, began writing letters soon after her son, daughter-in-law and grandchildren disappeared in 1976.

"I've written to everyone," she recalled a few years later, "the queen of England, the king of Spain, President Carter, President Videla (of Argentina), even the editor of Reader's Digest."

Mrs. Julien enclosed photographs of her grandchildren in all her letters. Many of her appeals may never have left Argentina. The White House, for example, has no record of receiving the letter she wrote to President Carter. Neither has the State Department.

But a letter mailed to a Catholic Church human rights organization in Sao Paulo, Brazil, got through. The organization publishes a magazine, Clamor, which circulates among human rights activists. In July 1979, Clamor published Mrs. Julien's letter, along with photographs of the children, taken before the family disappeared.

A Chilean exile living in Venezuela read of the missing Julien children in Clamor. The article reminded him of a story he had seen in a newspaper in Chile three years before.

Police were mystified, the story had said, by the case of two small children who were found wandering hand-in-hand through the Plaza O'Higgins, a park at the center of Valparaiso. . . .

Although the little boy seemed very upset about something, he had tried to answer questions from the strangers who surrounded him. He said he and his sister, Victoria, were brought to the park in a "big car" driven by "Tia Monica" (Aunt Monica), who left them there. Police were not able to identify "Tia Monica."

The boy spoke with a strange accent, the newspaper account had said, and used terms that were not known in Chile. He did not recognize the names of characters from television programs popular among Chilean youngsters.

He could describe a house where he had lived with his parents and little sister. He said the house had "big stairs." One day, he said, men came to the house and there were bullets and his father took him and his sister up the stairs and put them in the bathtub for protection.

The boy said he was 4. His sister, he said, was solo un ano (only one). He said his name was Anatole. His sister was Victoria.

The children were placed in a foster home and, after months went by, a childless Valparaiso couple, a dentist and his wife, adopted them.

The person who read of the missing children in Clamor contacted the magazine's offices in Sao Paulo and told of the children in Valparaiso. That was 1979. Three years after the family disappeared, Mrs. Julien found her missing grandchildren.

She arranged to meet the foster father at the school Anatole, then 7 years old, attended. Later, she was taken to the dentist's home and introduced to the children as their aunt.

"Little Anatole came up to me when his foster parents introduced me as their aunt," she said. "He gave me a hug, then kissed the Crucifix I always wear around my neck.

"I asked his foster mother if he knew the Lord's Prayer, and he recited it to me."

Mrs. Julien realized the adoptive parents loved her grandchildren as if they were their own. She decided it would be unfair to the children to disturb the arrangement. She and the new parents agreed the children should be told the truth when they are old enough to understand. They visit her in Uruguay in the summers.

From scattered reports, it is generally believed that Victoria Lucia Grisonas de Julien, the children's mother, is dead, perhaps killed in the shooting when the family was kidnapped in Buenos Aires. There are occasional reports that the father is still alive in a prison somewhere in Uruguay.

The affair left scratches on the souls of his two children. Four years ago, little Anatole, upset and confused, told authorities in Valparaiso of a strange remark he had been taught to repeat.

"Papa malo. Mama mala. Yo malo."

"Papa is bad. Mama is bad. I am bad."●

MUTUAL NUCLEAR WEAPONS MORATORIUM

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. CONTE. Mr. Speaker, on November 4, 1980, voters of western Massachusetts instructed their State senators to vote in favor of a resolution requesting the President of the United States to propose to the Soviet Union a mutual nuclear weapons moratorium. This vote is believed to be the first ever of its kind; voters had an opportunity to say no to the arms race, and they did. This nonbinding public policy question received 59 percent support.

The question called for an immediate halt on testing, production, and deployment of all nuclear warheads, missiles, and delivery systems. Realizing that in the event of nuclear war no one can win, voters elected to put the race aside. The bilateral freeze proposal passed by the voters of western Massachusetts is only a small part of a growing movement.●

AGRICULTURE DAY

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. NAPIER. Mr. Speaker, last Thursday, March 19, 1981, was Agriculture Day in America. It was an occasion to honor American farmers and to contemplate the enormous contribution they make to the physical and economic well-being of this country. In my opinion, enough cannot be said in praise of this small group—about 3 percent of the total population—that labors so hard to provide the food and fiber to fill our needs and the needs of a good portion of the rest of the world.

I have a copy of an editorial that recently appeared in a newspaper in my district, the News, Kingstree, S.C. It contains some startling facts that I would like to call to the attention of my colleagues. The average farmworker produces enough food for 68 people. One out of every five jobs in this country is related to agriculture; $1 out of every $5 of products exported originated on the farm.

Mr. Speaker, the Sixth District in South Carolina is one of the largest farming districts in the country. I am bullish on farming and I hope all of my colleagues feel the same, because farming is our basic industry.

The editorial follows:

[From the Kingstree, (S.C.) News, Mar. 19, 1981]

OUR BASIC INDUSTRY

We couldn't agree more with Williamsburg County farmer Tommy Bishop, who states in the tobacco designation supplement in today's paper that it's time for our country to get bullish on farming.

Mr. Bishop rightly noted that farming is no more significant than any other industry in this country. However, as a nation we often take this basic industry for granted, assuming it will survive and prosper regardless of trade embargoes, government regulations, inflation, etc. To think thus, is to make a dangerous mistake, Mr. Bishop says.

While today's paper is highlighting Williamsburg County's main crop—tobacco—it should also be noted that March 19 is Agriculture Day in South Carolina. The South Carolina Department of Agriculture is, of course, bullish on farming, and provides the following information to encourage others to join the ranks.

There are approximately 2.4 million farms in the United States and 34,000 of those are located in South Carolina. Today, the average farm worker produces enough food for 68 people. This 1.68 ratio substantiates why we should be concerned about the American farmer and the agricultural process.

Food remains this country's best buy. It takes the average wage earner only 16 minutes to earn enough to buy a pound of beef in the United States compared to 135 minutes of work in France and 60 minutes in Brazil. Only 14 percent of this country's income is spent on food, whereas 35 percent of income in the Soviet Union is spent on food.

Farm exports generate jobs. During 1980, $40 billion worth of farm products were exported and 1.3 million jobs created. One out of every five jobs in the U.S. is related to agriculture, 70 percent of this country's oil imports is paid for with agriculture exports, and $1 out of every $5 of product exports originated on the farm.

The average acreage per farm in South Carolina is 188 acres. The average age of South Carolina is 52, and 90 percent are male. Thirty-three percent of the land area of the state—6.4 million acres—is devoted to farming.

Those statistics show the impact farming has on this state and the nation. Can we dare be anything less than bullish on farming?●

DO NOT BUCKLE ON AUTO SAFETY

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. WIRTH. Mr. Speaker, on March 23, the New York Times printed an editorial that I highly recommend to my colleagues. As we strive to gain control over the Federal budget and to approach our tasks as policymakers in the most cost-effective way, it becomes increasingly clear that we cannot do away with all regulations just for the sake of saying we have done so. As the following article points out, the delay of the requirement to install automatic crash restraints in new cars would cost Americans billions of dollars, not to mention the tragic loss of life and limb that will occur—upwards of 600 deaths and 4,300 serious injuries by the Department of Transportation's own estimation.

Currently DOT is reviewing the passive restraint standard and considering such a delay. The Department should carefully review the taxpayers price for delay—a bill 10 times the investment required by the automobile industry, and weigh heavily the thousands of serious injuries and hundreds of lives that will be unnecessarily sacrificed.

The article follows:

DON'T BUCKLE ON AUTO SAFETY

"Regulatory action shall not be undertaken unless the potential benefits to society . . . outweigh the potential costs."—President Reagan, Feb. 17, 1981.

That's timely common sense. But it may soon embarrass the Administration, which is searching for ways to reduce the regulatory burden on the financially pressed auto industry. For one regulation they hope to kill—the requirement to install automatic crash restraints in new cars—would generate benefits far in excess of the cost.

When used, ordinary lap and shoulder belts are lifesavers—but only one rider in eight bothers. That's why the Carter Administration proposed for new cars "passive" restraints that don't require cooperative users. The technology is old hat. Airbags have been road-tested on thousands of cars for a decade; self-closing belts are standard on the Volkswagen Rabbit. Both work well. But most manufacturers would likely choose the automatic belt, costing $50 to $100 less per car.

Detroit, however, wants no new regulation. Auto makers postponed the Federal rulemaking through the Carter years, managing to undo a Congressional compromise that would have delayed a phase-in of the rule to 1983. Now, with Mr. Reagan in charge, they hope to kill mandatory passive restraints altogether.

Yet the harder one looks at the case for passive restraints, the stronger it seems. William Nordhaus, an economic adviser to President Carter and a known skeptic of regulation, has examined the costs and benefits on behalf of the insurance industry. Using conservative estimates of the lives and injuries avoided, he estimates that a year's delay in the rule would sacrifice $5 billion in benefits. That compares with an auto industry saving of only $500 million.

The benefits would be shared by all car users. Every belt installed at a one-time cost of $50 to $100 would reduce auto insurance cost by $40 to $80 per year. Insurance, by the way, covers only about half the direct economic losses from accidents.

The auto makers say they cannot afford to gear up for installation. Actually, most of the investment has already been made. By Federal reckoning, additional costs would amount to only $20 million—a pittance for an industry with revenues exceeding $50 billion.

Another argument against passive restraints deserves more serious consideration. New cars already have seat belts; why force people to pay for protection they apparently don't want? One answer is that few people really ever compare the small risk of injury against the small annoyance of buckling up. But even if one assumes that every driver conscientiously made the calculation each time he or she sped off to the supermarket, there is a good case for help from Uncle. It is that victims pay only a fraction of the $15 billion to $20 billion annual cost of injuries from auto accidents. The rest is borne by the taxpayers, or by other drivers when they pay higher insurance premiums.

There are ways to make the passive restraint rule less burdensome. They might be phased in, going first into small cars, which need the protection most. This would spread out the total cost, and put a relatively greater burden on imports, which are almost all small. But in the eagerness to relieve Big Auto of overregulation, it would be a shame to scrap a rule that would save so much misery at so little cost.●

THE BUREAUCRACY: WORKING FOR GOOD WITHIN

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, I read last November's election returns as an expression of widespread public alienation from Government. In a sense, the electorate was saying that the Jeffersonian balance of close proximity between the governed and the governing has become a wide breach.

Similarly, the public demanded a reduction in the massive Federal spending that allows bureaucracies to be peopled by supposedly slothful, wasteful, and unregarding souls. The people wanted a change. They wanted a scissor taken to the budget, and a broom to the massive bureaucracies.

Mr. John Q. Public, the author of an article which I would like to submit into the RECORD for the enlightenment of my colleagues, cares about working the bureaucratic system back into the classic public service role that it was intended to be. Mr. Public's suggestions might have "cost him his job," he says. He wrote a pithy but poignant essay on internal bureaucratic reform for a recent edition of the New York Times which bears reprinting—and reading by the occupants of the agencies which Mr. Public is concerned about.

Real improvement in responsiveness by the unelected bureaucracy to the electors will come about only by concerted remedial attempts from within. This is what Mr. Public seeks to do. His article is a primer for new Federal employees, and it is also a worthy essay for all of us.

The article follows:

HOW TO KNEAD A 4-YEAR LOAF

(By John Q. Public)

BETHESDA, MD.—This is a primer for new Federal appointees, especially those who are cutting budgets to the bone, wiping the slate clean, clearing out deadwood, helping the country make a new beginning, and who harbor other such fantasies.

Its wisdom (if I may call it that) is derived from the experiences of a man who entered the bureaucracy with naive hopes of being productive.

I work in a backwater of a small agency that is either mistaken for another, or draws a total blank from 99 percent of the population (excluding a handful of Congressmen most of whom by now have left Capitol Hill.)

The agency's main function is to give away money "for useful projects." Its budget supports 1,200 workers in Washington, many of whom have a salary far above what they could command elsewhere, in addition to thousands throughout the country who are busy writing proposals, computing, and watching video display terminals. The average grade of its workers is GS-10. In 1980, their average pay was $27,000. But averages mislead, for the agency employs more GS-15's ($44,547-$50,112 annually) than any other single grade.

The function of my division is to report numbers gathered by others working on contracts. This makes its 50 people middlemen, passing money from the Treasury to contractors. This process requires forests of forms, memos, revised memos, and rerevised memos, not to mention reports that take eons to produce and revise.

There are four types of people employed in this division. The first is its director, who

after entering the Government clinging to the coattails of a long-gone agency head, was periodically demoted (in status and responsibility but not, of course, salary) in attempts to insulate subsequent agency heads from his advice and to find his level of competence (only the former goal was reached). In fairness, it must be said that the director has some positive qualities: He is a consummate bureaucrat (if success is measured by survival); he is a good world traveler, often found in Paris, San Francisco, or Las Vegas attending meetings; and he provides an excellent subject for imitations by his staff. As a manager, supervisor, or writer, he is considerably wanting.

The second type consists of those in their preretirement years, who are putting in time while hoping that no one tampers with the Civil Service retirement system.

The third type is those not yet of preretirement age but who are too old and with too much invested in the Civil Service to leave. Moving to other Federal agencies is tempting, but those agencies may be just as bad, and might expect more work and responsibility for the same pay. Furthermore, there is not much incentive to seek a promotion, for these people are approaching the $50,112 maximum and any possible raise would not change their styles of life. Besides, their jobs provide them with ample opportunity to spend Government time thinking about their country homes and to play squash in the afternoon. In short, life is easy and their unpleasant encounters with the director are usually quickly forgotten, for tomorrow he will not remember what he asked today, and by next week will be in Paris.

The final group consists of young people. Those with intelligence and ambition leave before the director learns their names, and the others join the third group.

I have developed four guidelines for new appointees while observing this operation.

1. Check the senior management of your organization. Any individuals arriving at their positions by climbing down the ladder have probably not descended far enough. The Senior Executive Service was designed to facilitate the shifting of people to jobs closer to their level of incompetence.

2. Bodily eject bureaucrats who brief you by using multicolored slides to depict simple numbers and trends. These shows are expensive, inane, and substitute for the need to be articulate.

3. Beware of bureaucrats who in one breath tell you how well they and their organizations perform and with the next complain about the lack of staff, funds, and space. Their organizations could function better with half the staff.

4. Finally, don't take your job too seriously. The bureaucracy existed before you, and will continue after you. The bureaucrats have witnessed the grandiose plans and good intentions of your predecessors, including: regularly communicating with the staff, keeping doors open, welcoming suggestions, rewarding good work, etc.

Freud characterized government as one of the three endeavors predestined to yield unsatisfactory results (the others being education and psychoanalysis). So, relax. A year after you leave, you'll be referred to as "what's-his-name," and the bureaucrats will continue to play the game of self-preservation.●

THE HISTORICAL RECORD OF TAX RATE REDUCTIONS BY JOHN MUELLER IN THE WALL STREET JOURNAL

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. KEMP. Mr. Speaker, lack of knowledge of our Nation's history has led many to oppose President Reagan's program for reducing personal income tax rates. These opponents claim that the expectation of supply-side responses to the rate reductions is based on untried theories, that there is no historical evidence to support the President.

I call the attention of my colleagues, therefore, to an outstanding article by Mr. John Mueller which appeared recently in the Wall Street Journal. Mr. Mueller is economic counsel to the House Republican Conference and one of our most thoughtful and able economic writers. In this article he places the Reagan proposal in the historical tradition of two of our greatest Presidents, Calvin Coolidge and John F. Kennedy. Each of these Presidents followed the path President Reagan now advocates with the result of triggering periods of economic expansion and prosperity.

Mr. Speaker, I believe that after reading this piece the most ardent skeptics will agree that the proposed tax rate reductions are not based on blind faith but on the sound knowledge that workers and entrepreneurs continue to respond to the same incentives in the marketplace which have always encouraged them toward creativity, hard work, and industriousness.

I commend this brilliant article by Mr. Mueller to my colleagues:

[From the Wall Street Journal, Mar. 5, 1981]

LESSONS OF THE TAX-CUTS OF YESTERYEAR

(By John Mueller)

Significant across-the-board cuts in marginal income tax rates, of the sort proposed by President Reagan, have occurred twice: In 1922-25 and 1964-65. In both cases, claims of eventual revenue increases played a significant part in congressional debate. An analysis of IRS revenue statistics for the two periods should encourage the Reagan administration.

In 1913, marginal income tax rates ranged from 1% to 7%. Because of World War I, they stood at 4%-73% by 1921. These rates comprised a 4%-8% "normal rate" on all net income and a "surtax rate" on incomes over $6,000 of up to 65%. President Harding described his "return to normalcy," in part, as "to lift the burdens of war taxation." At his urging, Congress cut the surtax rates for 1922 from a 65% to a 50% maximum, lowering the top rate from 73% to 58%. It also repealed the wartime "excess profits tax" and instituted preferential treatment for capital gains.

When 1922 income-tax receipts exceeded expectations, Treasury Secretary Andrew Mellon began pushing for a further halving of surtax rates. Reported Time: "He asserts that such readjustments would yield as large or larger revenues. The reason for his belief is that high surtaxes drive wealthy men to invest their money in tax-free securities and nonproductive enterprises and to seek every permissible means of avoiding the realization of taxable income. The result is an unsound industrial condition and actually a decrease in revenue."

"SOAK THE RICH!"

The political prospects were poor. Harding died suddenly, the Democrats cried "Soak the rich!" and Mellon's own party followed Senator Smoot, heir-apparent to the Finance Committee chairmanship, who declared that as sure as God lives and the sun rises in the morning, Congress would enact a veterans' bonus, not a tax cut.

In December 1923, Mellon proposed to Congress a cut in normal rates, a halving of surtax rates to a 25% maximum, an increase in personal and surtax exemptions and a 25% credit for all earned income. Mellon told Congress that "in all probability the revenue from the reduced (surtax) rates will soon equal or exceed what would accrue at the present rates"; but as he later wrote, it was thought that the other changes "would result in considerable loss of revenue."

President Coolidge argued: "Taken altogether, I think it is easy enough to see that I wish to include in the program a reduction in the high surtax rates, not that small incomes may be required to pay more and large incomes required to pay less, but that more revenue may be secured from large incomes and taxes on small incomes may be reduced."

Congress responded, whether convinced by the administration's arguments or by other factors ("Secretary Mellon gained more applause for his tax proposal than John Barrymore in 'Hamlet.' It was a tremendous surprise to the professional politicians," Time reported). In 1924, Congress retroactively refunded 25% of taxes for 1923, cut normal and surtax rates for 1924 to a 2%-46% range, and enacted the 25% earned income credit.

In a final round of tax-cutting, effective with 1925, Congress enacted increases in the personal and surtax exemptions and cut marginal rates to a 1.5%-25% range.

IRS statistics show that for every year in which marginal tax rates were cut, there was a level of net income, below which revenue dropped in all classes and above which revenue increased in all classes. This "break-even" point was $20,000 in 1922, $30,000 in 1924 and $20,000 in 1925. (A $20,000 net income typically faced a marginal tax rate of 18% in 1921, before the tax-rate cuts.)

These revenue changes became progressively larger toward the top and bottom of the income scale. From 1921 to 1925, income tax paid in the $0-$5,000 class dropped by 85%; in the $5,000-$10,000 class, by 72%; in the $10,000-$15,000 class, by 57%; and in the $15,000-$20,000 class, by 39%. Income tax paid in the $20,000-$50,000 class was virtually unchanged. In the $50,000-$100,000 class, revenue increased by 28%; in the $100,000-$500,000 class, by 64%; in the $500,000-$1 million class, by 114%; and in the over $1 million class, by 113%.

The result was a revolution in the distribution of the income tax burden. In 1925, 44% of the taxpayers were removed from the rolls by the increase in personal exemptions. From 1921 to 1925, the share paid by the under-$10,000 class fell from 22% to 4%;

by the under-$20,000 class, from 35% to 11%. The share of tax paid by the over-$100,000 class rose from 28% to 49%; by 1928, this class paid 61% of the tax burden, or $714 million, which exceeded total income tax revenue for 1923 or 1924.

The net effect was a revenue increase in every year except 1923, for which Congress had retroactively refunded 25% of taxes without changing marginal rates (revenue declined 23%). Revenues were $719 million in 1921, $861 million in 1922, $664 million in 1923, $704 million in 1924, and $735 million in 1925, a net increase of 2% over 1921. Revenue rose another 59% to $1.16 billion, by 1928. Since prices were declining, the real increases were somewhat larger.

The circumstances of the Kennedy tax cuts need less description. In 1962, the Treasury accelerated depreciation rules and Congress enacted a 7% investment tax credit. In January 1963, Kennedy asked Congress to cut the World War II-vintage 20%-91% personal rates over three years to 14%-65%, an average of 23%. He also asked for offsetting "structural changes" amounting to a 5% tax increase and a cut in the corporate rate from 52% to 47%.

In February 1964, Congress enacted a 14% to 70% personal rate schedule—a 20% average cut, two-thirds effective in 1964 and the rest in 1965. Most of the "structural changes" were jettisoned. Congress increased the capital gains exclusion and cut the corporate rate to 48%. About two million lower-income taxpayers were dropped from the rolls in 1964 by the new minimum standard deduction.

The Kennedy administration argued that the tax cuts would ultimately result in increased revenues but did not spell out whether these increases were expected in any particular income classes or tax brackets. The Treasury's static estimates, derived by applying the proposed rates to a sample of actual returns from an earlier year, predicted revenue losses in all income classes. Since such estimates are still the basis of official revenue predictions, it is interesting to compare the static estimates with the actual revenue change by adjusted gross income class from 1963 to 1965.

In the $0-$5,000 class, the predicted revenue loss was 30% and revenue declined 27%. In the $5,000-$10,000 class, the predicted decline was 21%, and revenue declined 11%. In the $10,000-$20,000 class, the predicted decline was 17% and revenue increased 15%. In the $20,000-$50,000 class, the predicted decline was 16% and revenue increased 11%. In the over-$50,000 classes, the predicted decline was 13%, and revenue increased 38%. The 38% increase included a 25% increase in the $50,000-$100,000 class, a 46% increase in the $100,000-$500,000 class, a 68% increase in the $500,000-$1 million class, and an 85% increase in the over-$1 million class.

Revenue increased in tax brackets as low as the 26% marginal rate, which was cut to 22%. It is not possible to say with certainty that revenue increased in every taxable income bracket of 26% or above, however, because of a discontinuity of the data; beginning in 1964, a $2 billion chunk of revenue, representing special computations such as income averaging, is not broken down by marginal tax rate. The effective or average tax rate for this revenue is almost twice the rate for all revenue, which means it belongs largely in the upper brackets. It can be said that in both 1964 and 1965 revenue increased in all adjusted gross income classes above $10,000. By 1966, the revenue increases ranged from 30% to 88%.

The net result was that total individual income tax revenue declined from $48.2 billion in 1963 to $47.2 billion in 1964, or by 2%, though there was no absolute decline on a fiscal year basis. Revenue rose to $49.5 billion in 1965 (3% above 1963), $56.1 billion in 1966 (16% above 1963), and $62.9 billion in 1967 (31% above 1963), the last year before the Vietnam surtax. Inflation averaged 2% a year.

LESSONS FOR REAGAN PLAN

President Reagan's three-year 30% cut in marginal income tax rates would take four tax-filing years because of its July 1 effective date. The 15% cut of the first two years approximates the first year of the Kennedy cuts, and the whole plan is half the percentage size of the Mellon cuts. What are the lessons for the Reagan plan?

1. Paring down the upper-bracket marginal rate reductions to "save revenue" or "tax the rich" would almost certainly have the opposite result. Especially in the short run, cuts in higher marginal rates help finance cuts in lower rates and non-marginal tax cuts, which have no incentive effect.

2. The initial "break-even" level may be much lower than even some advocates of the Reagan plan seem to think. For example, the 26% tax-bracket (the apparent break-even point for the Kennedy cuts) is reached or exceeded today at an adjusted gross income of $16,200 for a single person and $24,200 for a family of four, using the standard deduction. Because of inflation, the portion of taxpayers in tax brackets of 25% or above was almost three times as high in 1977 as in 1963, and is probably much larger today.

Finally, the historical evidence should prod those who think of tax policy in terms of aggregates—disposable income and multipliers or average tax rates and supply elasticity—to think instead about marginal tax rates: those which confront real, live people.●

SALUTING THE OHIO DEPARTMENT OF THE CHINA-BURMA-INDIA VETERANS ASSOCIATION

HON. LYLE WILLIAMS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. WILLIAMS of Ohio. Mr. Speaker, I rise to ask my colleagues in the U.S. House of Representatives to join me in saluting an outstanding veterans organization as it observes its silver anniversary. The organization is the Ohio Department of the China-Burma-India Veterans Association. The Ohio department received its charter on March 18, 1956. Ohio, along with Texas and Florida, is one of only three States to boast departments of the CBIVA.

The CBIVA is a nonprofit group with membership open to any person who served in or with the U.S. Armed Forces in the China-Burma-India Theater of operations during World War II. Members must also have had honorable service during the period of issuance of the Pacific Theater ribbon.

In order to better acquaint you with the CBIVA, let me quote some of the association's aims and purposes, as called to my attention by Mr. John Novicky, Ohio department commander:

To faithfully serve our country in peace as we did in war.

To promote a feeling of fellowship by renewing old acquaintances and making new friends among those who have a common bond by reason of their mutual service in the Armed Services of the United States of American in the China-Burma-India Theater of Operation in World War II.

To pay tribute to and preserve the memories of those of our comrades who gave their lives in defense of their country.

To maintain a proper standard of dignity and honor among all veterans of World War II.

To establish, organize and regulate local branches, or Bashas, throughout the United States, its territories and possessions, and to hold and participate in national, district and statewide meetings for the furtherance of the aims and purposes herein enumerated.

As you can see, gentlemen and ladies, by its statement of purpose, the CBIVA is indeed a worthy organization. The CBIVA was first conceived during a reunion in Milwaukee, Wis., on August 28, 1948. Since then, Bashas have sprung up in all corners of the United States. In Ohio, there are Bashas in Cincinnati, Toledo, Dayton, Akron, Cleveland, and Youngstown.

So I ask all of my fellow Representatives to join with me in honoring the Department of Ohio of the China-Burma-India Veterans Association on the occasion of its 25th anniversary.●

GILMAN INTRODUCES IRA IMPROVEMENT BILL

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. GILMAN. Mr. Speaker, I rise to announce that I am introducing legislation to reform the system of individual retirement accounts (IRA's), which permit individuals to set aside money, on a tax-deferred basis, for their retirement.

Present law permits IRA contributions of up to $1,500 per year, or 15 percent of income, whichever is less, if an individual is not eligible to participate in another retirement system or program.

The current level of allowable contributions is not adequate to meet the needs of Americans who depend on a combination of social security and their own resources to provide for their retirement. The dollar limitations have not changed since 1975. Another problem is in relation to people who are eligible to participate in a retirement plan, but not choose to, or whose plans do not provide sufficient resources for their retirement needs.

They are unable to supplement those plans with an IRA of their own.

To solve the first problem, my bill will allow those individuals who are currently permitted to establish an IRA to contribute $2,500 annually—up from the present $1,500.

My bill would also allow every worker to establish an IRA, regardless of whether the worker participates in a qualified pension plan at the present time.

Finally, my bill would increase these contributions ceilings on a yearly basis by the increase in inflation. The indexation of the ceilings would protect the value of the deductions during this inflationary period.

Mr. Speaker, I urge my colleagues to join me in cosponsorship of this legislation, and I submit a copy of the bill be printed at this point in the RECORD.

H.R. —

A bill to amend the Internal Revenue Code of 1954 to increase the limitations on the deduction for retirement savings, to allow such deduction to individuals covered by employer pension plans, and to provide for inflation adjustments in the limitations on such deduction

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. INCREASES IN LIMITATIONS ON DEDUCTION FOR RETIREMENT SAVINGS.

(a) GENERAL RULE.—

(1) AMENDMENT OF SECTION 219.—Paragraph (1) of section 219(b) of the Internal Revenue Code of 1954 (relating to maximum deduction) is amended by striking out "$1,500" and inserting in lieu thereof "$2,500".

(2) AMENDMENT OF SECTION 220.—Subparagraph (C) of section 220(b)(1) of such Code (relating to maximum deduction) is amended by striking out "$1,750" and inserting in lieu thereof "$3,000".

(b) INDIVIDUALS COVERED BY EMPLOYER PLANS ELIGIBLE FOR DEDUCTION.—

(1) AMENDMENT OF SECTION 219.—Paragraph (2) of section 219(b) of such Code (relating to individuals covered by other plans) is amended to read as follows:

"(2) LOWER LIMITATION IF COVERED BY OTHER PLAN.—If for any part of a taxable year—

"(A) an individual was an active participant in—

"(i) a plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

"(ii) an annuity plan described in section 403(a),

"(iii) a qualified bond purchase plan described in section 405(a), or

"(iv) a plan established for its employees by the United States, by a State or political subdivision thereof, or by an agency or instrumentality of any of the foregoing, or

"(B) amounts were contributed by the individual's employer for an annuity contract described in section 403(b),

paragraph (1) shall be applied with respect to such individual for such taxable year by substituting '$1,500' for '$2,500.'"

(2) AMENDMENT OF SECTION 220.—Paragraph (3) of section 220(b) of such Code (relating to coverage under certain other plans) is amended to read as follows:

"(3) LOWER LIMITATION IF COVERED BY OTHER PLAN.—If for any part of a taxable year—

"(A) an individual (or his spouse) was an active participant in—

"(i) a plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

"(ii) an annuity plan described in section 403(a),

"(iii) a qualified bond purchase plan described in section 405(a), or

"(iv) a plan established for its employees by the United States, by a State or political subdivision thereof, or by an agency or instrumentality of any of the foregoing, or

"(B) amounts were contributed by the individual's employer (or his spouse's employer) for an annuity contract described in section 403(b),

paragraph (1) shall be applied with respect to such individual for such taxable year by substituting '$1,750' for '$3,000'."

(c) INFLATION ADJUSTMENTS IN LIMITATIONS.—Subsection (c) of section 219 of such Code is amended by adding at the end thereof the following new paragraph:

"(6) INFLATION ADJUSTMENTS.—

"(A) IN GENERAL.—In the case of a taxable year beginning in a calendar year after 1982—

"(i) paragraphs (1), (2), and (7)(A)(ii)(II) of subsection (b) of this section, and

"(ii) paragraphs (1) and (3) of subsection (b) of section 220,

shall be applied by substituting for each dollar amount contained in such paragraphs an amount equal to such dollar amount plus such dollar amount multiplied by the inflation adjustment for the calendar year. Any amount determined under the preceding sentence shall be rounded to the nearest multiple of $10.

"(B) INFLATION ADJUSTMENT.—For purposes of this paragraph, the term 'inflation adjustment' means, with respect to any calendar year, the percentage (if any) by which—

"(i) the implicit price deflator for the gross national product for the 3rd calendar quarter of the preceding calendar year, exceeds

"(ii) such deflator for the calendar quarter ending September 30, 1981.

"(C) FIRST REVISION OF PRICE DEFLATOR USED.—For purposes of subparagraph (A), the first revision of the price deflator shall be used."

(c) TECHNICAL AMENDMENTS.—

(1) Subclause (II) of section 219(b)(7)(A)(ii) of such Code is amended by striking out "$1,500" and inserting in lieu thereof "$2,500".

(2) Subsections (a)(1) and (b) of section 408 and paragraph (4) of section 409 of such Code are each amended by striking out "$1,500" each place it appears and inserting in lieu thereof "$2,500 (adjusted in the manner provided in section 219(c)(6))".

(3) Subparagraph (A) of section 408(d)(5) of such Code is amended by striking out "$1,750" and inserting in lieu thereof "$3,000 (adjusted in the manner provided in section 219(c)(6))".

(4) Subsection (j) of section 408 of such Code is amended by striking out " '$1,500' in the following provisions" and inserting in lieu thereof "the dollar limitations in effect under the following provisions".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.●

REAGAN'S FOREIGN POLICY MACHINERY IN DISARRAY

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. ROSENTHAL. Mr. Speaker, in the past few days, dissension and squabbling within the highest circles of Government has raised serious questions about the direction and coherence of American foreign policy. The spectacle of top officials jockeying for power—and that is what it is—must already be having dangerous consequences abroad. Who speaks for America? What does America have to say to the world? Three months into this administration, nobody really knows.

From the perspective of Congress, and the committees with jurisdiction over foreign policy, certain points must be made clear now.

Competition between the White House staff and the Secretary of State must stop. The Secretary of State, by Constitution and tradition, must be the President's principal diplomatic spokesman. If the White House does not like the man they appointed, let them fire him. Expressing their doubts to the press, directly or indirectly, demeans the Government and erodes its authority.

I do not share Secretary Haig's views. I hear from him no positive vision of American diplomacy. His singlemindedness disturbs me. but he is the guy who has got the job, and he is the guy the Congress expects to deal with.

The administration's idea that crisis management can be separated from day-to-day foreign policy is insupportable. Appointment of the Vice President to a position overseeing diplomatic crises represents nothing more than an attempt to settle bureaucratic infighting. This is no solution.

But all these questions raise a deeper issue: Where is President Reagan?

Territorial squabbles among his highest appointees, unauthorized statements, policy vacillations, searches for someone to oversee crises—all this leads one to question whether we have a full-time President, enunciating his own policies, on top of his own administration, clearly and continuously in control.

All these recent confusions grow out of a vacuum of leadership at the top. The President must be held accountable.●

HONORARY CITIZENSHIP FOR RAOUL WALLENBERG

HON. CHARLES F. DOUGHERTY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. DOUGHERTY. Mr. Speaker, I usually like to believe statements by foreign officials regarding their policies. However, the evidence that is available strongly leads me to believe that the Soviet Union is lying about the fate of Raoul Wallenberg. I understand the embarrassment Soviet officials would suffer were they to admit that Mr. Wallenberg is still alive, but I truly do not understand their reluctance to share more information about Mr. Wallenberg's whereabouts.

When Raoul Wallenberg first went to Hungary with the mission to save Jews from Nazi concentration camps, he overcame the fear of putting himself in a most dangerous situation. Nevertheless, at the request of the American War Refugee Board and the Swedish Government, he succeeded in helping 100,000 Jews escape the Holocaust. Unfortunately he did not foresee the Soviet Union's reaction to his presence in Budapest. Although it escapes me what threat he might have posed to the Russians, they imprisoned him and have been silent about his well-being ever since.

Recently I joined over 200 of my colleagues in cosponsoring legislation that would make Raoul Wallenberg an honorary citizen of the United States. I am proud to be able to take part in honoring this man who so bravely saved others from cruel imprisonment and death. It is my hope that the bravery this man demonstrated to us will never be forgotten.●

STAFF SALARIES INCREASE

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. COLLINS of Texas. Mr. Speaker, yesterday during the debate on committee funding, my distinguished colleague from Texas, Mr. KAZEN, asked me to yield the floor. He wanted to get the full facts before the House debate. Mr. KAZEN stated that:

> I have sat here this afternoon and listened to speaker after speaker come to the well, and now we get this motion to recommit based upon the figures that the committees spent last year. This is what it is based on; is it not? The gentleman has just finished saying that we are asking for more money than the committees spent last year. The gentleman well knows that last year was an election year. I did not have in the committee that I am privileged to chair quorums to go out and hold hearings because everybody was interested in his own reelection. That was a bad year to hang onto.

He thus indicated that the expenditures of the House Armed Services Committee was lower in 1980 than it was in 1979 because 1980 was an election year.

I want to take this opportunity to set the record straight. I went back to my office to review the financial statement of the Armed Services Committee. In 1979, the investigative expenditures of this committee were $496,661. In 1980, this same committee spent $683,920 for investigative staff expenditures. Furthermore, the Armed Services Committee is budgeted for $952,000 in the resolution the House just passed.

To further clarify the facts for Mr. KAZEN, let me give you the total funding for investigative staffs, with $35,500,000 in 1979, which expanded up to $39,971,551 in 1980.●

THE COMMITTEE FOR A FREE AFGHANISTAN SUPPORT PRESIDENT

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, the Soviet occupation of Afghanistan—along with the fall of Iran—has seriously altered the strategic equation in the Middle East. America's vital strategic interests are threatened and increased Soviet efforts to penetrate the region can be expected.

Contrary to every code of human conduct, the Soviets have carried out a massive campaign of death and material destruction against the Afghanistan people. To date, it has been estimated that nearly 1½ million innocent Afghanistan people—most of them women, children, and old people—have been killed as of the beginning of this winter. In addition, more than 1½ million people have been made homeless and are now refugees in Pakistan and Iran.

Moreover, considerable suspicion exists that these atrocities have been made all the worse by the introduction and use of chemical weapons by Soviet forces.

And yet, the American people remain basically unaware of the existence and the meaning of these acts. Nor has this Nation taken the necessary actions to support the Afghan people in their struggle to preserve freedom against Soviet tyranny.

Mr. Speaker, the Committee for a Free Afghanistan was formed for the purpose of educating the public and the Congress about the situation in Afghanistan and the significance it plays in Soviet global strategy. Last month, for instance, the committee sponsored the visit to Washington by a delegation of Afghan freedom fighters. During their stay, they met with some 60 of our colleagues in both the House and the Senate, as well as representatives from the intelligence community, the Department of State, and the National War College. In addition, they were honored by the American Legion and the Reserve Officers Association.

In frequent public appearances, President Reagan has referred to the Soviet occupation of Afghanistan and the atrocities they have committed as inhuman, brutal, and illegal. Recently, he vowed in a television interview that if the Afghan freedom fighters requested arms, the United States would provide them.

Mr. Speaker, I applaud the President's statement. The Committee for a Free Afghanistan has also expressed its support and has so expressed itself in a letter addressed to the President on March 12, 1981.

The letter is as follows:

MARCH 12, 1981.

RONALD REAGAN,
President of the United States,
White House.

DEAR MR. PRESIDENT: The Committee for a Free Afghanistan lauds you for your statement of support for the Afghan freedom fighters during your ABC interview, and particularly your drawing the distinction between "rebels" and freedom fighters.

As you probably know, a delegation of freedom fighters led by Sayed Ahmed Gailani, the spiritual leader of the Afghan people and head of the National Islamic Front of Afghanistan, was in Washington last month to put their case before the American people and to request assistance and support from this country.

Your recognition of their situation and your unequivocal pledge of support for their fight will hearten all people who cherish freedom.

The world hungers for American leadership, Mr. President. It is no coincidence that since the election a parade of freedom fighters from a host of oppressed countries has beat a path to your door. They know their trust in you as the liberator who will help them throw off the yoke of Communist oppression is not misplaced.

From both our own vital strategic interests and our moral obligation to stop the genocide of a valiant people, Afghanistan is the most urgent of cases for us to take up. The Afghan freedom fighters ask only the means to defend themselves, and if we give them total support, we open a window of opportunity to tie the Soviets down long enough to get on our feet again, and to start turning back Soviet imperialism.

The Committee for a Free Afghanistan is at your service, Mr. President, to assist you in any way to carry out a program of support to the Afghan resistance.

Yours sincerely,

KAREN MCKAY.●

POW'S STILL HELD BY THE VIETNAMESE: THE EVIDENCE MOUNTS

HON. DANIEL B. CRANE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. DANIEL B. CRANE. Mr. Speaker, although both the United States and Communist Vietnamese Governments have for years denied it, significant evidence exists to indicate that the Vietnamese Communists still hold American prisoners captured in the Vietnam war.

Some 2,500 American servicemen and civilians are still unaccounted for. New evidence continued to trickle in to indicate that at least some of them have been used as slave labor for years by the Communists. What is also shocking is evidence that our own Government, for shallow political purposes, may have aided and abetted Hanoi in its quest to bury the POW and MIA issue.

I know that is a very serious charge. However, thanks largely to the singular efforts of journalist Barbara Hollingsworth, new evidence—including names and specific sightings—have been uncovered.

Fortunately, there is some indication that the Reagan administration will take a greater interest in this tragedy than has been the case in previous administations.

I urge my colleagues to read Barbara Hollingsworth's account of her investigation in the Maine Paper of March 16-23, 1981, and to seriously consider the mounting evidence:

[From the Maine Paper, Mar. 16, 1981]

ARE REDS STILL HOLDING AMERICAN PRISONERS IN VIETNAM?

(By Barbara Hollingsworth)

WASHINGTON.—In April 1975 Vietnamese Communist forces swept into Saigon and dealt the fatal blow to the struggle of South Vietnam for survival. To a war-weary United States, it marked an ignoble end to more than 14 years of battling a tough, determined enemy.

But while the war may have ended, ugly reminders continue to plague the nation's conscience. There remains to this day a nagging, persistent nightmare that centers around the 2,500 American servicemen and civilians who are still unaccounted for in Vietnam, Laos and Cambodia.

Increasingly strong evidence points to perhaps hundreds of them—still alive—being held prisoner throughout Southeast Asia. Some of this evidence has been uncovered by TMP and is being revealed here publicly for the first time.

MOUNTING EVIDENCE INDICATES AMERICANS HELD CAPTIVE BY VIETS

The shocking fact is the Communists deny holding any Americans, and deny they can account for those men they at one time acknowledged they held captive. The U.S. government, for political purposes, may have aided and abetted Hanoi in its quest to make the prisoners of war and missing in action a forgotten issue.

YANKS VIEWED

The influx of the "boat people" in the late 1970s brought with it hundreds of unsettling eyewitness accounts of Americans still being held. But an account by a Norwegian construction worker suddenly revived interest in the matter.

In an unclassified Defense Department cable obtained by TMP, American ambassadors throughout Southeast Asia were alerted to the report of Stein Gudding, who had left a job on a paper mill construction project north of Hanoi in November 1980.

He told Seattle radio station KIRO some of his fellow workers, while motorcycling in a rural area, came across a road gang of Americans. "They were prisoners, working about 200 kilometers (125 miles) away from Hanoi, toward the Chinese border,." Gudding said. "They were Americans speaking English with American accents."

Police ordered the cyclists to leave immediately, threatening them with weapons, but not before they heard the Americans shout, "tell the world about us." Gudding added many Vietnamese routinely talk about U.S. prisoners still being detained in their country.

RED POLICY ON POW'S

The holding of POWs long after hostilities have ended is by no means a new practice among the Communists. For example, the Soviet Union was known to be holding thousands of German POWs into the mid-1950s. There are also persistent reports well-known Swedish diplomat Raoul Wallenberg may have been arrested while working in the Soviet occupation zones during World War II, and is still being held more than 35 years later.

North Korea and Red China have never accounted for 389 Americans they captured in the Korean Conflict of 1950-1953. Further, nearly 2,000 other military personnel from countries which fought alongside the United States remain unaccounted for.

Many, including the U.S. Government, presume the missing men are dead. But Robert Dumas of Canterbury, Conn., continues to press the case of his brother, Cpl. Roger A. Dumas, known to have been captured but never repatriated by the Communists.

In Vietnam, French soldiers who had last seen action in 1954, when the Communists defeated the French colonial forces, were still being turned over to France as late as 1974, upon payment of ransoms by the French government. France was also forced to pay the Communists for the "privilege" of being allowed to locate French military gravesites as well as reclaim the bodies and personal effects of POWs who had died in captivity.

Larry Stark, a civilian POW for five years, emphasized this point to TMP. Captured in South Vietnam but transported north, he said at one point a Vietnamese interrogator remarked, "Would you believe we still have Frenchmen?"

Officially, the Vietnamese repatriated 566 Americans following the 1973 cease-fire. But curiously, some of the returnees were not on the official POW lists previously released by Hanoi, and some returned whose fate had not been previously known.

Further, there are at least nine missing servicemen about whom there is almost irrefutable proof of capture. But Vietnam has denied knowledge of their whereabouts even though their detention had been previously admitted by the Communists.

Among them is Cmdr. Ron Dodge, whose 1967 capture was broadcast by the Vietnamese and further substantiated by a photograph of him being taken into custody.

Capt. David Hrdlicka, captured in Laos in 1965, was also photographed in captivity. His photo appeared in Pravda, the Moscow daily, in August 1966. Reports from other POWs indicate Hrdlicka may still be alive.

What's more, Communists worldwide have apparently cooperated in humiliating the United States.

For example, at least two Cubans have been identified by name as taking part in the torture and questioning of U.S. POW-MIAs. And there is evidence the "forgotten men" of Korea were shipped through China to some desolate spot deep within the Soviet Union.

FIGHT FOR INFO

The frustrating task of keeping open the issue of unaccounted for POW-MIAs has fallen almost entirely on the National League of Families of American Prisoners and Missing in Southeast Asia.

Operating on a shoestring budget from donated offices in downtown Washington, the league keeps the spirit of hope alive, refusing to let U.S. government indifference or duplicity force the matter out of the public eye.

In December, League Executive Director Ann Mills Griffith met with Ha Van Lau, Vietnam's UN Ambassador. He reportedly agreed to relay to Hanoi the request for a face-to-face meeting between the league and communist authorities.

Meanwhile, there has been some important progress. Carol Bates, a former league executive director, told TMP that under the Reagan administration, the National Security Council is taking a greater interest and a more active role in the POW-MIA issue than it has in the past.

Officially, the U.S. government considers only 12 POW-MIA cases open. Yet 2,553 military and 43 civilian personnel are unaccounted for at the time of the 1973 repatriation. This includes at least 96 POWs; 1,178 servicemen believed killed in action but whose bodies have not been recovered and 1,279 missing in action; plus 25 civilians missing and 16 presumed dead. One of these includes Sean Flynn, the son of actor Errol Flynn, captured in Cambodia by Viet Cong forces while on assignment for CBS News.

In 1977, President Carter ordered status reviews of all the above cases. Except for the 12 left open, all the others were given a "presumed dead" status by the Defense Department, even though there was no evidence of death, and in the face of evidence some of the missing were in fact still alive.

SUIT AGAINST CARTER

The league filed a class action lawsuit against the Carter administration in an attempt to prevent the government from changing the status of the POW-MIAs without any evidence such a change should be made. The suit, Hopper vs. Carter filed in September 1977, also tried to make the government retreat from its contention it was not legally obligated to seek a full accounting for the missing men.

The league has consistently fought the status changes, believing presumptive findings of death without evidence would only act as a rationale for the government to stop looking for the men. They also claim it severely weakens U.S. pressures on Hanoi for a full accounting.

One person outraged at the Carter administration actions is Maj. Gen. John K. Singlaub, commandant of U.S. forces in South Korea until 1977. In a conversation with

TMP, Singlaub said he has "no doubts" Americans are still being held prisoner in Vietnam: he believes at least 50 men are still alive.

"Clearly, the policy of the Carter administration was to remove any obstacle to normalizing relations with North Vietnam." Gen. Singlaub said. "That's why the administration took the steps to have all the men declared presumably dead. It was an easy way to remove the obstacles. Unfortunately, it was not sufficient to attack the problem brought about by the large number of first-hand sightings."

Also in 1977, as part of the attempt to normalize relations, Maine Senators William Hathaway and Edmund Muskie voted to kill an amendment banning aid to Vietnam, Laos and Cambodia, despite the fact that these countries had refused to account for the missing men.

Communist denials notwithstanding, sightings of captive Americans continue. Gen. Singlaub said he received one such sighting from a Vietnamese refugee. "He told me he saw somewhere between 30 and 38 Americans in one group. He couldn't tell for sure exactly how many becaue they were moving. It was a fairly recent sighting, within the last year and a half."

Singlaub added he had plans to meet with a senior Reagan administration official at the White House in an effort to spark action. While the identity of the official is known to TMP, the general asked it not be disclosed, stressing the importance of confidentiality in the critical early stages of establishing a new U.S. policy on the matter.

SWEPT UNDER RUG

In August 1979 all the reports of sightings of Americans in Vietnam were classified by the Defense Intelligence Agency, ostensibly to protect both the sources and any captives, even though they were officially presumed dead by the government. Since 1975 DIA has received over 1,000 reports from Indochinese refugees, including at least 310 first-hand sightings of Americans. Some of the now-classified documents were given to the DIA by the league in the first place.

Why then the classification?

Retired Army intelligence officer Col. Earl Hopper, originator of the league lawsuit, whose eldest son is missing in action, told TMP DIA's excuses for classifying the documents were "a bunch of baloney."

Since WWII, he noted, publicity about a prisoner has actually improved his treatment.

The real reason was given to him by a deputy to the DIA director, who told Hopper, "We have classified the information so we do not become entangled in litigation."

In other words, the information is being withheld not from the Vietnamese, who know which POWs they have anyway, but from the families of the missing. In a grim Kafkaesque twist, the families, who have refused to accept government's contention that all the men are dead, have become the enemy.

In December, DIA Director Lt. Gen. Eugene Tighe Jr. told a congressional subcommittee that "of all the live sighting reports DIA has evaluated, there are none which can be substantiated relative to Americans being detained against their will in Southeast Asia."

A DIA spokesman told TMP the agency "can't prove that any (sightings) are true. The evidence is not strong enough."

But former Army intelligence officer Larry O'Daniel, author of "Missing In Action: Trail of Deceit," doesn't agree.

In fact, O'Daniel thinks the evidence of Americans still alive is overwhelming.

"According to the government, 'substantiate' means to identify a person by name at a certain place and time, and then verify it by your own sources," he explained. Because the refugees did not know the names of the Americans they saw, he added, the government discounts their stories.

Dermot Foley of New York City, former league counsel and the original attorney for Marine Pfc. Robert Garwood (convicted last month of collaboration with the North Vietnamese during his 14 years there) also asserted "hundreds upon hundreds of sightings substantiate one another."

GARWOOD MAY BE KEY

The reappearance of Garwood, after his existence had been denied by Vietnamese authorities, helped focus new attention on the fact there were many servicemen unaccounted for eight years after the 1973 Paris Peace Accords.

Garwood himself engineered his departure from Vietnam when he passed a note to a traveller saying he was an American and wanted to return to his homeland. The note added cryptically, "there are 15 others." Foley told TMP "Garwood can furnish valuable information in respect to the accounting issue."

Garwood's case was also significant for another reason. The government called two potential witnesses against Garwood, who positively identified Garwood as the American they saw in Vietnam. One of them, Nguyen Van Tao, now lives in Wilton. He told TMP he saw Garwood in the Yen Bai POW camp near Hanoi.

Nguyen was not called upon to testify against Garwood. "We elected not to use him," according to Maj. Werner Hellmer, the chief prosecutor.

However, his identification of Garwood is that first "substantiation"—a sighting with a name—that DIA apparently deems necessary as proof that Americans are still over there, and certainly lends credibility to the other sightings, according to a knowledgeable source.

WAS MYSTERY MORTICIAN PLANT

Paralleling the dramatic Garwood reappearance was the stunning testimony of a former North Vietnamese mortician before a Congressional subcommittee last summer. The Pentagon went to great lengths to protect his identity, having him appear in a disguise while testifying. However, TMP has learned his name is Ny Van Loc, and that his presence in the United States may have been planned by Hanoi.

Ny told the Congressmen he had personally processed the remains of 452 American servicemen killed in the war for the Vietnamese government. He also said he knew of the existence of specific identity records corresponding to each body as well as a careful history of all U.S. aircraft downed in the war. Of the 452, only 26 remains were returned to the United States.

Furthermore, Ny testified he "saw three Americans who came into the military law jurisdictional area" where he worked, "one blond and two with dark hair."

Two well-informed sources told TMP that subcommittee members were briefed beforehand on key questions to ask Ny. But as that line of questioning began—specifically, the last time he saw American prisoners—the subcommittee suddenly moved on to another witness after being passed a note by DIA officials, and Ny was immediately escorted out of the hearing room.

Rep. Tennyson Guyer, R-Ohio, a panel member present that day, says he "doesn't remember" the incident, when asked for confirmation by TMP. Significantly, Guyer's careful response does not deny the allegation.

Pentagon officials confirm Ny's information is "irrefutable," since he passed a polygraph test they administered. Yet in some quarters it is believed the mortician, who held a trusted position, was a "plant" sent to the United States.

Since his testimony was very explicit on the place he worked and the job he performed, why was his identity kept secret?

Secondly, he told the panel he was kicked out of Hanoi because he was Chinese and a "lackey of Peking." Why didn't Hanoi find other means of dealing with him, in light of the sensitive information he was privy to, instead of allowing him to leave the country?

Lawyer Foley agrees with the contention the "mortician" was actually Vietnamese Communist cadre, and said he was aware of two other such "defectors" now in France. "I know who they are and the jobs they had in Vietnam," he said.

According to this theory, the mortician was dispatched to the West to give discreet yet unimpeachable evidence, direct from Hanoi, that Americans are still held in Vietnam. The expectation is U.S. officials will, as a result, begin negotiations for their release, perhaps in the same manner France has done: with payments. There is also unconfirmed speculation the reappearance of such a key figure as Robert Garwood was permitted by Hanoi for the same reason.

NEW REPORT MADE PUBLIC

The sheer volume of refugee reports that Americans remain in Vietnam, alive and abandoned by the government they fought for, is staggering. Inquiries made by TMP among the 25,000-member Vietnamese community in the Washington, D.C. area turned up yet another sighting, this one apparently previously unknown to either the government, the League of Families, or other key sources.

"About three or four months ago two men came into the restaurant where I was working," a refugee recounted. "An American and a Vietnamese man. The Vietnamese man had escaped and had a letter he said was from his brother. They asked me to translate the letter, since neither knew the other's language.

"The Vietnamese man appeared very fearful, and repeatedly asked what the translator was telling the American, and denying responsibility for the letter. 'Not mine,' he said.

"[The writer] said he saw two American soldiers on Phu Quoc Island, near Cambodia. They were 'very skinny and boney—and their faced looked very sad. They were being forced to go on a boat. I don't know where they were going."

Where indeed? Rep. Robert Dorman, R-Calif., originator of the POW-MIA bracelets and an outspoken ally of the League of Families, summed up the sentiments of those still pressing for a full accounting:

"There are two options that are left to us in this circumstance: the option of hope and the option of despair. [We] should never rest until we find out the absolute truth about the condition of those listed missing in action. It is obvious we are not in possession of that truth."●

EDITORIAL PROPOSES TO DESIGNATE JANUARY 20 AS FREEDOM DAY

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. NAPIER. Mr. Speaker, I would like to take the opportunity to call to the attention of my colleagues an editorial broadcast by WOLS, a radio station in Florence, S.C. The subject of the editorial is a proposal to make January 20 a new national holiday to be known as Freedom Day. January 20 was chosen because it was, as you all know, the day on which the 52 Americans held prisoner in Iran at last were freed. That is also Inauguration Day. The holiday would be to honor those Americans, known and unknown, who have made immeasurable contributions to the freedom we in America hold so dear.

The editorial is well worth reading and I commend it to you. The genuine patriotism and love for our country expressed in the proposal are touching. Mr. Speaker, I ask unanimous consent that the editorial be included in the RECORD at the conclusion of my remarks.

LET'S CALL IT FREEDOM DAY

January 20, 1981 is a day that will always be special in the hearts and minds of most Americans. It is the day the long national nightmare of the hostages came to an end. At the same time Americans inaugurated a new President and paid respects on an outgoing President who departed Washington with great dignity. It was a day of rejoicing and celebrating and observing.

It was a day for Americans to take stock of the blessings we enjoy in this country, and to glow with pride. The two events which took place symbolize and articulate just what this country is all about.

For many years the world has viewed the United States as united in name only. We have been looked upon by many as a nation divided against itself. It was not true, but other governments and other people wanted to believe it was. No longer can we be perceived in that fashion.

America stands for freedom 365 days a year. It is fitting that we set aside one day to commemorate those individuals, known and unknown, who have made immeasurable contributions to our freedom. We should commemorate this special day, January 20, for all time. It is a day that should never be forgotten, and future generations should be reminded of its meaning. We have demonstrated the value of human life in America. We have acknowledged the overwhelming importance of freedom to all Americans, the dignity of each human life, and the manner in which trouble and travail bring us together again, as United States.

The search for freedom brought about the establishment of this Nation more than 200 years ago. Once again we have been reminded of how fragile, and how precious, our individual liberty is.

With all that in mind, we recommend that January 20 be proclaimed by Congress as a new national holiday, to be known as freedom day. Freedom day would serve as a reminder of what prison and captivity have meant to many Americans who have fought for our freedom. It would honor every hostage, the commandos who attempted the rescue, every prisoner-of-war and the crews of the Pueblo and the Mayaguez. It would honor other great Americans such as Thomas Jefferson, Susan B. Anthony and Martin Luther King, Jr., who have contributed to the growth of specific freedoms in this country. Unsung heroes who do not now have a day in their honor would share in freedom day. And it would remind all other governments that Americans do not take lightly the lives, or the freedom, of our citizens.

Every fourth year, Freedom Day and Inauguration Day would coincide. What better joining together could there be. For Freedom Day will celebrate our past heritage and the inauguration will herald our future. On a national holiday, school children and all Americans will have the opportunity to witness, either in person or on television, the many stirring events that accompany the inauguration of a President. It will be a reaffirmation each year of the principles on which this country was established.

Freedom Day, on January 20 each year, will be a day for all Americans to remember what makes this country so great. The symbol for Freedom Day would be a yellow ribbon on flag staff below the American flag. The tragic ordeal of the hostages has helped re-unite America after several long and trying years. Freedom Day, a remembrance and a celebration of the dignity of America, its strength and its compassion, can help keep us together. If you agree, if you think this idea is a good one, will you write a letter to your Senator or Congressman in support of Freedom Day? Write to them direct, or send your letters to us at radio station WOLS, Box F-13, Florence, S.C. 29501, and we'll see that they get it.

The magnificent principle of liberty for all must never be forgotten. Freedom Day will be an annual reminder.●

FIRST CONGRESS OF THE INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. FISH. Mr. Speaker, yesterday I placed in the CONGRESSIONAL RECORD a brief statement regarding the historic meeting of the International Physicians for the Prevention of Nuclear War during which 70 physicians from 11 countries met in Virginia to discuss the medical and environmental consequences of nuclear war. I included copies of letters to world leaders and physicians all over the world to demonstrate the commitment of the International Physicians to this issue.

Today I would like to bring to the attention of my colleagues the conclusions reached by the first congress of the International Physicians regarding the predictable and unpredictable effects of nuclear war. The human suffering described in the following statement is quite disturbing, and is certainly adequate cause to work for the prevention of nuclear war.

PREDICTABLE AND UNPREDICTABLE EFFECTS OF NUCLEAR WAR

The consequences of the nuclear attack on Hiroshima and Nagasaki were disastrous. Yet even they do not serve as adequate precedents for the amount of death and destruction that would follow nuclear warfare today. Given any scenario of a massive nuclear strike in present conditions, the fate of the inhabitants of those two cities would be shared by tens to hundreds of millions of people. Even a single one-megaton nuclear bomb explosion (80 times more powerful than that dropped on Hiroshima) over an urban area would cause death and injury to people on a scale unprecedented in the history of mankind and would present any remaining medical services with insoluble problems. In the event of a major nuclear war there would be thousands of such explosions.

We must distinguish between the immediate and the delayed effects of nuclear war. Among the immediate effects are mass deaths in the first hours, days and weeks after an explosion. These are caused by the simultaneous effects of blast, heat and large doses of penetrating radiation. The numbers of such deaths would be magnified catastrophically by the destruction of buildings, by secondary fires, by disruption of all life-support systems including electric power, communication and transportation, and by the destruction and contamination of the water supply and of foodstocks.

It is difficult for us, as physicians, to describe adequately the human suffering that would ensue. Hundreds of thousands would suffer third-degree burns, multiple crushing injuries and fractures, hemorrhage, secondary infection, and combinations of all of these. When we contemplate disasters, we often assume that abundant medical resources and personnel will be available. But contemporary nuclear war would inevitably destroy hospitals and other medical facilities, kill and disable most medical personnel, and prevent surviving physicians from coming to the aid of the injured because of widespread radiation dangers. The hundreds of thousands of burned and otherwise wounded people would not have any medical care as we now conceive of it: no morphine for pain, no intravenous fluids, no emergency surgery, no antibiotics, no dressings, no skilled nursing, and little or no food or water. The survivors will envy the dead.

It is known from the Japanese experience that in the immediate aftermath of an explosion, and for many months thereafter, the survivors suffer not only from their physical injuries—radiation sickness, burns, and other trauma—but also from profound psychological shock caused by their exposure to such overwhelming destruction and mass death. The problem is social as well as individual. The social fabric upon which human existence depends would be irreparably damaged.

Those who did not perish during the initial attack would face serious—even lifelong—dangers. Many exposed persons would be at increased risk, throughout the remainder of their lives, of leukemia and a variety of malignant tumors. The risk is emotional as well as physical. Tens of thousands would live with the fear of developing cancer or of transmitting genetic defects, for they would understand that nuclear weapons, unlike

conventional weapons, have memories—long, radioactive memories. Children are known to be particularly susceptible to most of these effects. Exposure of fetuses would result in the birth of children with small head size, mental retardation, and impaired growth and development. Many exposed persons would develop radiation cataracts and chromosomal aberrations.

Delayed radioactive fallout from multiple nuclear detonations would render large areas of land uninhabitable for prolonged periods of time, making it impossible to produce the food upon which the survival of whole populations would depend. Aside from the severe effects in the areas most immediately affected by explosion or local fallout, there would occur effects from both ground and air bursts throughout the world. Fallout would increase the incidence of cancers and of genetic defects in nations and populations far from the targeted areas. These and other effects are difficult to quantify, but is is known that they would occur.

The use of nuclear weapons with an aggregate yield greatly exceeding that of all the explosions (including atomic explosions) in human history poses dangers to the entire planet, and to all of mankind. Among these are profound disruptions of the ecological, with consequences of a nature and magnitude we can only guess at. For example, the release into the atmosphere of large quantities of oxides of nitrogen, formed during multiple nuclear explosions, could disturb the ozone layer of the atmosphere, which protects the surface of the earth from the penetrating component of ultraviolet radiation, and this would probably cause the death of vegetation and animals, and injury to people. In the magnitude, duration, and variety of the dangers it poses to biological and social survival, nuclear war has no precedent in the experience of mankind. The survival of civilized life is at stake.

In one likely and specific scenario that we have considered, an all-out nuclear war between the United States and the Soviet Union in the mid-1980's, it is likely that—

(1) The population will be devastated:

Over 200,000,000 men, women, and children will be killed immediately.

Over 60,000,000 will be injured.

Among the injured:

30,000,000 will experience radiation sickness,

20,000,000 will experience trauma and burns,

10,000,000 will experience trauma, burns, and radiation sickness.

(2) Medical resources will be incapable of coping with those injured by blast, thermal energy, and radiation:

80 percent of physicians will die.

80 percent of hospital beds will be destroyed.

Stores of blood plasma, antibiotics and drugs will be destroyed or severely compromised.

Food and water will be extensively contaminated.

Transportation and communication facilities will be destroyed.

(3) The effect on adjacent countries is incalculable.

(4) Civil defense will be unable to alter the death and devastation described above to any appreciable extent.

(5) The disaster will have continuing consequences

Food production will be profoundly altered.

Fallout will constitute a continuing problem.

Survivors with altered immunity, malnutrition, an unsanitary environment, and severe exposure problems will be subject to lethal enteric infections.

(6) Profound changes in weather caused by particulates and reduction of atmospheric ozone with attendant alterations in man, animal, and plant species may be anticipated.

(7) Among long-term survivors, a striking increase in leukemia and other malignancies will be observed, most severe in those who are children at the time of exposure.●

CHICAGO TRIBUNE QUESTIONS RAPID DEPLOYMENT FORCE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. PORTER. Mr. Speaker, it is clear that the American people expect the Congress to improve our country's military capability. Yet fiscal restraint demands that the Congress seek assurances that the military's efficiency improves as its budget authorization increases.

Toward that end, I ask my colleagues to consider the following editorial from the March 24, 1981, issue of the Chicago Tribune which urges restoration of the Marine Corps' traditional role as the Nation's preeminent rapid deployment force. The Tribune forcefully argues that the effects of such action would be to simplify the force's command structure, to enhance the force's coordination, and to free valuable military personnel from redundant administrative duties.

THE RABBIT DEPLOYMENT FORCE

That greatly ballyhooed answer to all that ails us in the Persian Gulf—the Rapid Deployment Force—has become a special favorite of cartoonists, who delight in depicting it as a hutchload of rabbits spilling pell-mell across a desert: the "Rabbit Deployment Force."

In truth, the RDF is a rabbit, a sleight-of-hand rabbit that was yanked out of a brass hat during the Carter administration. It was a propaganda ploy, an attempt to show that the United States was doing something about its suddenly-discovered vulnerability in the Gulf region. But like most such quick-fix schemes, it is turning out to be a bad idea. It should be given a decent burial before too many more millions are squandered on it.

The essence of the RDF's weakness showed up almost immediately in the form of interserve bickering over how the force should be structured and led. As originally conceived during the crisis in our relations with Iran, the RDF was to be an amalgam of all four services. Units from the Army, the Air Force, the Navy, and the Marine Corps were designated to prepare to play roles in the RDF in the event of its being mobilized. A small command and staff structure was sent up in Florida under a Marine, Gen. P. X. Kelley, and including representatives from all the forces.

But, predictably, there was no joint agreement on the precise character of the joint force. In recent Senate hearings the differences have become public. The Marines and some elements of the Navy leadership favor a sea-based command that would depend mainly on Navy ships for logistics and on Marines and Navy air power for the "cutting edge" of an RDF deployment. And the Army and the Air Force, naturally, prefer a land-based command that would emphasize their own primacy in the RDF.

Another part of the RDF problem involves its mission. What, exactly, is it supposed to do? Some military leaders talk of blocking Soviet forces from attempting overland offensive against the Middle Eastern oil fields. But that suggests a direct military confrontation with a massive, heavily armored Soviet force on the Southwest Asian land mass—a ludicrous prospect for a relatively small and lightly-armed American RDF.

In fact, the RDF's mission would not be to commit that particular kind of folly. It would be to protect the sea lines of supply of Middle Eastern oil bound for the West and to forcibly take over the oil fields in the event of insurrection, terrorism, or a regional war that threatened the integrity of those supplies. Military leaders and policy makers prefer not to talk much about that mission, which causes consternation among the states of the region. But that is what an RDF is for, and that is what it should be organized to do.

As presently conceived, however, the RDF is a military disaster waiting to happen. The multi-service arrangements are complicated, and complexity is dangerous to military operations. The RDF plan depends on close liaison among officers whose military backgrounds and perspectives differ sharply. Military units designated for eventual RDF duty will work together only during periodic exercises, and meanwhile they will have their normal duties to attend to. They are likely to regard the RDF assignment as a burdensome extra chore and give it short shrift.

So what to do about our still-unresolved problem in the Gulf? The answer is simple, because we have had a perfectly capable RDF all along. It is the U.S. Navy and Marine Corps. The Gulf problem is protection of sea lines of supply, which also happens to be the primary mission of the Navy. That duty may involve the necessity of armed intervention ashore, which is the specialty of the Marines.

The Navy is uniquely equipped to guarantee the safe passage of tankers by the use of carrier-based air power, antisubmarine forces, and minesweepers. The Navy and the Marines together are uniquely experienced in the rapid deployment of light infantry ashore.

To do the same job, the Air Force and the Army would need planes and troops at large permanent land bases somewhere in the region. At present, there are no prospects for getting such bases because none of the countries involved wants large U.S. forces on its soil. Even if such bases could be obtained—in Egypt, for example—they could never be considered permanent. A coup or revolution could shut them down unexpectedly, as has happened before in the Middle East.

This doesn't mean that the Army and the Air Force have no vital role in protecting Gulf oil supplies, or that the United States will not have to spend a considerable amount of money to provide credible protection. The Air Force would have an important logistical function from the start of any RDF action, and both the Air Force and

the Army must be prepared to move quickly with combat forces behind the Navy-Marine cutting edge of the action. A large, new cargo plane, the CX, will be needed, and the Navy will need additional ships for moving men and supplies. More money must be spent on the prepositioning arrangements already begun in Oman, Somalia, Kenya, and Egypt, and in the buildup on Diego Garcia island. The Marines may need to recruit a few more good men.

But the basis of the RDF should be the Navy and the Marines. It is a job they have been doing for most of America's existence as a free republic, and they should keep on doing it.●

COMMITTEE STAFF REDUCTION: A POLITICAL CASUALTY

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, I rise today to bring further attention to a matter of extreme importance that unfortunately has been tainted by very partisan actions.

The general topic of my statement concerns itself with Government spending. Specifically, I, and many other Members of Congress, am extremely concerned with the failure of this body to impose a true cut in committee staff funding.

In all candor, Mr. Speaker, the proposal adopted yesterday is a sham, and an affront to the American people who have clearly expressed their desire that Government spending be curtailed.

Confronted with an enormous national deficit, inflation and high interest rates, the Reagan administration has set out to bring the Federal bureaucracy and all its related ills under control. Clearly, a reduction in Federal spending, wherever it may occur, will help to restore the confidence of the American people who so desperately seek an end to big Government, big spending and big deficits.

My Republican colleagues have sought gallantly to enact meaningful spending cuts, but the success of any legislative endeavor undertaken during the 97th Congress will require the cooperation of the House majority. To date, that cooperation has been nonexistent.

So important is the need to examine the implications of the thwarted attempt to cut the committee staff budget, that I am submitting a short analysis of the facts and figures relating to this issue.

In 1971, the total authorized funding for House committees, excluding the Appropriations and Budget Committees and House Information Systems, was approximately $9.9 million. The comparable requested authorization level for 1981 is about $37 million—nearly a fourfold increase.

There is something seriously amiss here.

The major portion of these expenditures is for salaries of investigative staff; that is, those employees in excess of statutory staff levels. Such staff members are not exclusively engaged in investigative work; many are responsible for clerical duties. Appointments to the investigative staff are made on a strict patronage basis at the behest of individual committee chairmen—all of whom are Democrats. Given the extent of their responsibilities, the majority chairmen have conducted themselves with a glaring lack of professionalism as is evidenced by the political composition of the committee staffs.

Currently, there are 859 Democrat staff members as compared to 156 Republican staffers—a ratio of 5½ to 1. At the very least, the minority staff membership should reflect the ever-increasing Republican House membership, now totaling 44 percent.

Mr. Speaker, my concern for the methods of committee staff selection and funding are well founded. Just yesterday, the Democrats moved to consider all committee funding resolutions in one bill. That tactic required a rule which enabled the Democrat majority to offer a substitute bill—the Wright amendment—which imposes a token 10-percent reduction over last year's committee staff funding authorization. That resolution was approved along party lines, 231 to 171.

I am dismayed by the shallowness of this action. The 10-percent reduction of the 1980 authorization for 1981 merely represents the elimination of funds not utilized last year. The Wright amendment offered no spending cut, nor does it save the taxpayers any money.

A reduction in the rate of increase is not a cut.

It is not surprising then, that again, the Republican leadership sought to impose a real spending cut by seeking a 10-percent reduction in the actual expenditures of 1980.

My learned colleague, Mr. COLLINS of Texas, has devoted considerable effort exploring the specifics of committee staff reduction. He has entered numerous articles into the RECORD outlining his contention that viable committee staff reductions can be readily accomplished given the inordinate growth these committees have demonstrated over the past few years.

Facts and sentiment favored a reduction of committee staff levels. Despite that fact, a motion offered by my distinguished colleague, Mr. FRENZEL of Minnesota, to recommit the resolution and reduce the committee staff authorization by $6.6 million, was defeated along party lines, 225 to 184.

In the final analysis, a vote to impose a real reduction of committee staff expenditures would have been a clear signal to the American people that the Congress, too, is aware of the need to cut back and economize. Instead, the House majority party, the Democrats, have made spending cuts a political issue by refusing even to clean their own house.

If the time comes when the American people exhibit still greater disgust for their representatives in Washington, they may well recall the day when the Congress refused to cut a budget that had increased by 300 percent in a 10-year period.●

SYRACUSE TO BE CONGRATULATED ON NATIONAL INVITATION TOURNAMENT APPEARANCE

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. LEE. Mr. Speaker, though I realize that athletic competition does not often fit into the dealings of the Congress of the United States, I would like to take the opportunity to offer my congratulations today to Syracuse University's basketball team for its highly laudatory appearance in the recently completed National Invitation Tournament held in New York City.

The sports program at this fine university serving my 33d Congressional District of New York State has long been known as one of the Nation's most outstanding. College athletic competition builds character in the leaders of tomorrow—the leaders which this Nation perpetually thirsts for.

Last night, March 25, in a heartbreaking contest between Syracuse and Tulsa University for the championship of the National Invitation Tournament, Tulsa defeated our Orangemen with a final basket in the final 30 seconds of an overtime period. To be certain, congratulations are due Tulsa.

Yet, for the marvelous characteristics of sportsmanship and superb play which brought this team to a winning season and within 30-seconds of a national title, I today offer my thanks and the deep appreciation of every Syracuse supporter. The team's final, 22-12 record, is a matter of distinct pride to each of us who have watched through this season.●

SAUDI F-15 ADDITIONAL ARMS SALE

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. LONG of Maryland. Mr. Speaker, I oppose the Reagan administration plan to sell additional offensive equipment for the F-15 fighter to Saudi Arabia, as I opposed the original Carter administration sale of the planes in 1978. The sale of additional fuel tanks and air-to-air missiles threatens the security of Israel and is not justified politically or strategically. The additional armaments would also break our original promise that the F-15 will not have the range to strike Israel.

The major danger to Saudi stability is internal and is not reduced by increased arms sales. Iran collapsed inwardly a short time after it had achieved greater military power than any other Moslem nation in the region.

The major external threat perceived by the Saudis is the Soviet Union. Advanced equipment on 62 planes can scarcely enable Saudi Arabia to defend itself against a Soviet attack or provide adequate protection against any other move to the oilfields. Even the planes themselves are largely ineffective in dealing with any ground attack. The real deterrence to any move against the oilfields is their position in American strategic planning due to their importance to the West. This applies to threats from within the Middle East, such as Iraq, as well.

The administration cites the changed security situation as the reason behind this proposal prohibited by the original 1978 sales agreement. Yet, these sales do not address any of the problems associated with either the Soviet invasion of Afghanistan or the Iran-Iraq war, the major changes in security cited by the administration. The sale of this additional equipment is just not justified by Saudi security considerations.

The United States has demonstrated a special commitment to the continued security of the State of Israel. This sale would threaten Israel's well being. The additional equipment proposed would enable Saudi planes, accurately and with little warning, to hit any target in Israel from any base in Saudi Arabia. Air security is the key to Israeli defense strategy and the danger of these planes, with these capabilities, is clear.

The Israelis' fears are scarcely imaginary. Saudi forces have played an active role in three out of four of Israel's wars in the past 32 years. The Saudis currently fund the PLO with hundreds of millions of dollars a year. They have condemned the Camp David agreements and have gone as far as to break off relations with, and cut off assistance to, Egypt. As recently as last month, the Saudi Government called for a Jihad, holy war, to eliminate the Jewish state. Israel, may, in the face of perceived hostile action, be drawn into a preemptive destruction of the Saudi planes.

The additional armaments for the F-15, and indeed the planes themselves, are being used by the administration as a symbol of American support for the Saudi Government despite clear political and military support already abundantly demonstrated. This proposal further undermines American credibility.●

FTC'S CASE AGAINST THE CEREAL INDUSTRY

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. WOLPE. Mr. Speaker, recently I introduced legislation, H.R. 2509, that concerns the Federal Trade Commission's shared-monopoly case against the three major cereal manufacturers. The legislation, cosponsored by 72 of my House colleagues, seeks to place a moratorium on any initial decision in a shared-monopoly case until such time as the Congress determines that share-monopolies exist and finds them unlawful.

Yesterday, the Washington Star published a column on the FTC's case against the cereal industry that addresses many of the concerns that ultimately led to the introduction of H.R. 2509. I would like to commend the article to the attention of my colleagues.

[From the Washington Star, Mar. 24, 1981]

THE FTC COMES TO BREAKFAST

(By Tom Bethell)

On April 26, 1976, the Federal Trade Commission filed a complaint against the Kellogg Company, General Mills, General Foods, and Quaker Oats, charging them with having a "highly concentrated, noncompetitive market structure in the production and sale of ready-to-eat-cereal." In effect, the FTC claimed, although no one company has a monopoly on the $740 million-a-year industry, these four companies had managed to achieve a shared monopoly over it.

To correct the alleged monopoly, the FTC has proposed a draconian remedy. If nothing else, demonstrates how much is at stake in the case. This was in any event made perfectly clear in 1976 by a former FTC staffer named Charles Mueller, who had helped launch the cereal case in 1969. "Should the courts side with the FTC," he said in Newsweek, "they would be declaring about one-third of the U.S. economy to be illegal."

If the courts do side with the FTC in this case, Kellogg will have to sever limbs from its own corporate body, splitting off three new companies; General Mills and General Foods will likewise have to dismember themselves. The five new companies must each have enough capacity to supply approximately six per cent of the ready-to-eat-cereal market; and each would be assigned exclusive rights to manufacture and sell one or more brands already established in the marketplace.

A NAIVE REMEDY

Even if the companies involved have been engaged in a tacit conspiracy, this proposed "remedy" would strike many people as being both naive and arrogant. It makes the fundamental mistake of assuming that viable new companies can simply be ordered into existence; that we will all necessarily be better off when they do exist; and that the necessary efficiencies of scale, management, and productivity can be created by fiat. We see here the uncomfortably close resemblance between the bureaucratic and the totalitarian mind.

But let us look more closely at the FTC's charge of "shared monopoly." Edward F. Howrey, a counsel for General Mills, has said that "the FTC has created an entirely new offense that they call 'shared monopoly.'" Similarly, a Kellogg memo on the case claims that "the FTC's case is without legal precedent. . . The idea of a 'shared monopoly,' aside from being self-contradictory, is completely unprecedented in the law."

The charge of "shared monopoly" is indeed not found in any statute. The history of antitrust strongly suggests that the charge of sharing a monopoly reflects the endless frustration that academics, officials, and lawyers have encountered in their search for a real monopoly. By 1968 a White House Task Force on Antitrust Policy was recommending the adoption of a Concentrated Industries Act, designed to fragment an industry in which "any four or fewer firms had an aggregate market share of 70 percent or more. . . " No such act has been passed, but the FTC investigation of the cereal companies, whose combined market share satisfied this test, began the following year.

In bringing the complaint against the cereal companies, the FTC advanced the shared monopoly doctrine into the final stage—without any supporting statute. But, curiously enough, someone or some faction within the FTC seems to have "blinked" at the last minute. And so there was added to the complaint the FTC's charge that the cereal companies not merely had a certain combined market share, but had achieved it and maintained it by engaging in collusive, anticompetitive practices of a type that have been declared illegal in earlier antitrust cases.

WIDE RANGE OF CHOICES

A charge of monopolization really only makes sense with respect to a product which cannot be satisfactorily substituted for something else like it. A moment's thought shows that ready-to-eat breakfast cereal does not fall in this category. There are numerous other breakfast products available on the supermarket shelves; cereal that must be cooked, or to which hot water must be added; bacon and eggs; grits; liquid instant breakfast; instant breakfast bars; frozen waffles; muffins, pastries, etc. What was being "monopolized"? Not food, of course; not breakfast food either. Not cereal, even. But ready-to-eat cereal; a small subset of the domain of breakfasts!

It is clear, too, that the public has not been switching away from ready-to-eat cereal in response to unconscionably high-priced Product 19 or Rice Krispies. In 1970, the year the FTC investigation began, 25

per cent of the country's 73 billion "potential breakfasts" involved the consumption of allegedly monopoly-priced ready-to-eat cereals. By 1975 this share would grow to 35 per cent. In short, the public has not been protecting itself against the alleged monopolists by the simple expedient of switching to non-monopolized alternatives. Oligopolistic corn flakes have remained more enticing than competitive muffins.

Of course, this argument is not likely to be persuasive to FTC lawyers. The FTC charges that the companies "were able to establish a procedure for changing list prices that enabled them to raise their prices regularly without fear that they would lose sales and market shares to one another." This procedure is termed by economists "collusive price leadership." The FTC makes no charge of an actual conspiracy to achieve this result. Morever, the FTC did not even claim that there had been collusive price increases between individual, competing cereal brands. Only groups of products, arbitrarily selected from the competing companies, were said to be collusively priced. By analogy, one could say that all trees in the forest grow at different rates, but if an observer is allowed to make his own selection of individual trees, he could find one group that was growing, on average, at the same rate as another group, and then claim that there was "collusion" between the two.

ODD INTERPRETATIONS

Thus the charge of price leadership fails completely. But it is interesting to note that one of the rocks on which it founders is the discovery by the FTC that the proliferating brand names, box sizes, and packaging techniques made it extremely difficult for each company to figure out what its rivals were doing. Nevertheless, the FTC charges that "product proliferation" is an anti-competitive activity, constituting a "barrier to entry."

If companies want to enter into a tacit price conspiracy, they could best do this by homogenizing their product as much as possible. The cereal companies have instead done their best to differentiate them. It would be hard to imagine a more difficult way to maintain a tacit conspiracy. It is the restraint of trade that violated the Sherman anti-trust act. But the proliferation of it has now specifically been attacked by the FTC.

"If the FTC is not standing antitrust law on its head I simply do not understand what the law says," University of Chicago professor Yale Brozen has written.●

PENSION PLAN RESERVES

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. WON PAT. Mr. Speaker, today I submit for consideration by the Congress legislation which would correct a technical oversight in section 805 of the U.S. Internal Revenue Code.

Under existing laws, residents of the U.S. territory of Guam are denied the privilege of investing their private pension funds in tax free shelters here within the 50 States. Such programs are operated by a number of well-known insurance companies and are designed to help protect pension funds by sheltering them from U.S. taxes. Currently, the ability to invest private pension funds in such programs is enjoyed by the residents of all 50 States and Puerto Rico.

Guam's residents are denied access to section 805 programs of the Internal Revenue Code of 1954. However, because the territory uses what is known as a mirror-image tax. Codes with the United States and funds from Guam are thus considered to be foreign for tax and investment purposes in such instances. It is my hope that the Congress will act to include Guam as an eligible area in the section 805 programs.

We are American citizens and while we do have a different tax status, the inclusion of island residents in this tax shelter program will have absolutely no effect on the U.S. Treasury nor will it cost other American taxpayers 1 cent. Our inclusion in the program, will, however, be of enormous importance to the private business firms on Guam and their employees. They, like all of us, look forward to the day when they can retire secure in the knowledge that their pension funds have been wisely invested and protected. This is not now the case on Guam. Local firms must often use speculative areas of investment to attain the maximum yield for their pension funds. My legislation would provide these funds with a safe haven here in the United States. Thank you.

The text of the bill follows:

H.R. —

A bill to amend the Internal Revenue Code of 1954 to provide that the pension plan reserves of a life insurance company shall include amounts allocable to certain trusts forming part of a pension, profit-sharing, or stock bonus plan all of the participants of which are residents of Guam

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (d) of section 805 of the Internal Revenue Code of 1954 (relating to pension plan reserves) is amended by adding at the end thereof the following: "For purposes of paragraph (1)(A), a trust shall be deemed to be described in section 401(a) and exempt from tax under section 501(a) if such trust forms part of a pension, profit-sharing, or stock bonus plan and is exempt from income tax under the laws of Guam and if all of the participants of such plan are residents of Guam."

(b) The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1977.●

DIMINISHING RETURNS

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MICHEL. Mr. Speaker, how much of any given social or economic or environmental problem can government solve? This is an important question because it is obvious that when you get down to the last, often terribly difficult parts of a problem, the amount of money needed to make even a small dent in the problem often must be weighed against the probable results. In other words, we can't do everything and we can't solve every part of every problem. That is common sense. But to hear some special interest groups talk, if every part of every problem is not totally and absolutely solved, forever, then we have failed. I do not believe that and the American people do not believe that.

The Peoria Journal Star recently addressed this problem and I want to bring to your attention that newspaper's commonsense attitudes. At this time I wish to insert into the RECORD "Diminishing Returns" from the Peoria Journal Star, March 24, 1981.

[From the Journal Star, Mar. 24, 1981]

DIMINISHING RETURNS

It may well be that the central problem that has landed us with a government that produces poor results at high costs is the way politicians and bureaucrats have forgotten the law of diminishing returns.

No businessman would forget it or ignore it, probably, but then we have filled this government with graduate lawyers who never practiced outside of government, and with academics, entertainers, public relations men, former pro athletes and career politicians.

Those are not activities that have an awareness or a decent respect for the law of diminishing returns.

They do not recognize that in productive activities there is an optimum point of benefits for the amount of input—after which it takes more and more input to get less and less result.

To those inventing paper laws, law by its nature demands an absolute total result. (Otherwise, it is "discriminatory.")

Hence, we have galloped off into hundreds of programs mandated to forge ahead without regard to the realities of the law of diminishing returns—and when it sets in, they just keep demanding more and more funding to strive for that less and less result.

That's what really costs the taxpayer.

Government can attack major abuses, for example, and get spectacular results with a minimum of cost and effort, but when it gets down to nit picking and hair splitting and abstract arguments to decide if something shadowy really is an abuse under the program—or an entitlement—the cost and effort becomes astronomical and the results, often, bizarre.

It is not a question of what program is more needed and which can be dispensed with—although that seems to be the only language some people understand.

The central problem is the "over-administration" of just about every program under the sun—and the related propensity of lawmakers to mandate ideal goals without regard to the possibilities or the cost . . . and just turn the bureaucracy loose to go for it full blast.

That process is not just costly to the taxpayer. It often proceeds with a scorched earth attitude versus employers, producers, job-holders and taxpayers alike.

With their narrow jurisdiction and single track mandate, they often do not seem to care how much resources they burn up and destroy, nor whether it is public or private. The havoc to the society and its basic economy has been ignored as if it were irrelevant.

To pour resources as if they were endless into those last impossible, struggling minute gains on the theory that only then have we really done the job is idiotic.

It has been recognized as such through generations of practical people.

But that reality has been treated as irrelevant by zealots with a variety of causes, by politicians eager to nail down their purpose and enforce its absolute compliance, and by bureaucrats whose function is to pursue the mandate to the last shoelace on the last basketball player in Crosswitch, Kentucky, Junior High.

That's where the money goes.

And that's where it accomplishes the least.

Half the skill of management in the real world lies in the ability to recognize the point of diminishing returns so as to divert resources at that point to something that will produce useful results—instead of pouring it down a rat-hole.

But in government, a mandate is unlimited and absolute, and so a key role of managing doesn't even exist.

If two percent of the mandated task is not accomplished, cannot be reached, the answer is to call for more and more funds to whack away—often fruitlessly—at that last, stubborn, impossible two percent.

The stupid $40 million-plus sewer project in Peoria and its counterparts all over the nation provide a classic example.

Ninety-nine percent pure isn't good enough for the purists. So, they shrug their shoulders as if we have no choice and insist that the taxpayers must finance an endless losing war on the last percentile—admitting that this giant project will only dent it.

You realize that as long as the present attitude and method exists, this $40 million is not the end? Next will come $80 million to try to knock off another quarter of a percent.

The agency has to keep demanding.

That's its business.

And the demands keep getting more outlandish, less useful, and more expensive.

Meanwhile, if the responses of our supposed governmental leaders are to wring their hands and tell us how helpless they are to do anything about it, what kind of leadership is that? We are wasting our money on them, too.●

CLEAN AIR ACT

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. RAHALL. Mr. Speaker, today I had the opportunity to present a few opening remarks for a 2-day symposium, which I believe will serve a great benefit to interested Members of this body and to their staffs as well.

The Energy Research Center of West Virginia University, in cooperation with the Library of Congress, is presenting an open and objective discussion of the Clean Air Act.

The energy research center, headed by Dr. Dayne Aldridge, is well respected worldwide for their work in the energy field. They have assembled a distinguished group of panelists, and I hope those who are interested will take advantage of their expertise and insight of this issue.

At this time, I would like to share with my colleagues, my opening remarks.

CLEAN AIR ACT SYMPOSIUM

Good morning, and thank you for coming. I'm Congressman NICK RAHALL from the Fourth District of West Virginia, and I would like to briefly thank my good friends from West Virginia University for setting up this symposium. I believe it will be a worthwhile tool for all of you.

This nation undertook an ambitious set of programs over the past decade to control pollution and preserve environmental quality, with some 200 major laws enacted at the Federal level alone. The most prominent being, of course, the Clean Air Act.

The air is indeed cleaner and the water purer, and the total environment therefore is presumably healthier, as a result of these efforts.

Data on the ambient air quality in most metropolitan areas show that levels of smoke and dust, sulfur dioxide, and carbon monoxide have been reduced. Surveys of water quality likewise show reductions in the levels of various pollutants.

In very few Federal initiatives of recent times, has so much been accomplished within a brief span of time, as in the environmental area. Protection of the environment indeed has become an ongoing commitment, not the passing fad it was sometimes thought to be.

The context within which environmental issues are dealt today differs from that of the early 1970's. As the last decade began, Americans seemed to believe that the nation could rather quickly enjoy a healthier and cleaner environment. The 1980's are likely to be characterized by a greater appreciation of the magnitude of this endeavor.

After roughly a decade's experience with implementation of the Clean Air Act, the public has a better understanding of the complexities of controlling pollution. The public has also been confronted with evidence that a cleaner environment can only be bought at a substantial price.

In the midst of high inflation and stagnant economic conditions, it is believed by some that industrial growth and expansion has been hindered by some degree in our quest for cleaner air. As these efforts continue, questions will certainly be raised over how high a priority should be assigned to a cleaner environment, how quickly a given environmental standard should be attained, and what additional price should be paid.

Related and additional questions include: Has technology sufficiently advanced to solve all our problems at a "reasonable cost"? Are standards that seek to protect all individuals from all possible risks, thus ignoring the concept of acceptable risk, in the public's best interest? Can cost-benefit analyses be applied to environmental goals? What impact does unreasonable clean air standards have upon employment, the control of inflation, and other desirable social goals? Are excessive clean air requirements a genuine threat to our national security by forcing our continued reliance upon expensive and unstable imported oil? These are only a few of the many questions that have to be answered.

For years, nearly every interest group in this nation has been developing amendments which they believe will make the Clean Air Act more operative without weakening its primary objective, the protection of human health. No one will quarrel with this goal, and no one is out to "gut" or wipe the Clean Air Act completely off the books. The American people do not want such action, nor will the Congress take such action.

But we still have to face up to the costs to some Americans.

Steel facilities, and in particular, coke batteries which provide the basic building block for the steel making process have been closed for failure to meet regulations promulgated by the EPA. Further, utility boilers currently burning costly imported oil have been prevented from converting to coal due to stringent regulations. So some may say that regulations, not the Act, are the problem. This is another question I am sure will be addressed.

Today and tomorrow, the West Virginia University Energy Research Center, in cooperation with the Library of Congress, have brought together a most distinguished group of experts who will discuss the Clean Air Act's implication on stationary sources. I believe special interest should be given to the panel on acid rain, a topic about which we are reading more and more, especially as coal is being pushed as a dominant domestic energy source.

This symposium will contribute immensely to a rational discussion of important reform issues posed by both industry and environmental groups, and to the attainment of a rational balance among environmental, energy, and economic objectives.

At this time, I will turn the program over to Dr. Dayne Aldredge, who is director of the Energy Research Center at WVU, and who is a close personal friend of mine. Dr. Aldredge will serve as the moderator for the program.

Again, let me thank you for attending. I am sure this two-day session will provide a unique opportunity for you to develop an understanding of the Clean Air Act and the issues surrounding it.●

EMPLOYEE RETIREMENT SAVINGS ACT OF 1981

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. ERLENBORN. Mr. Speaker, the bill I am introducing today with my colleague, Mr. FRENZEL, is the first of several legislative initiatives which will set a new course in pension policy whereby private pensions and individual retirement savings may grow to meet the retirement income challenges of this Nation in the 1980's and beyond.

The demographics of the future cast doubt on the health of the social security system. It is difficult to foresee how current levels of support can be maintained, yet far too many workers already depend on social security benefits as their sole source of retirement earnings.

On the other hand, individual incentives for personal retirement savings

and investment are not emphasized enough. New inducements will be necessary to encourage individual retirement initiatives, particularly during this era of shrinking disposable income, when this aspect of retirement planning is the first to be dismissed.

Our bill, the Employee Retirement Savings Act of 1981, provides the necessary inducements: First, by increasing the deductible limit on contributions to individual retirement accounts (IRA's) from $1,500 to $2,000; second, by removing the present 15 percent of earned income limit on IRA's in order to simplify IRA administration and to induce low wage earners to save more; third, by permitting a deduction within the $2,000 limit for voluntary or mandatory contributions to employer-sponsored pension and savings plans; fourth, by permitting all employees to split their contributions in order to pay up to $1,000 into an IRA for their spouse regardless of spousal earnings; and fifth, by removing the age 70½ restriction on contributions to IRA's.

The bill also equalizes the tax treatment of retirement contributions for private and public employees. Public employees covered under social security and paying the FICA tax could deduct up to $2,000 in contributions to their pension plan or IRA. Public employees not covered under social security would have the $2,000 deductible limit reduced by the amount of the FICA tax they would have had to pay if they had been covered under social security. Besides creating tax equity, a side benefit of this provision will accrue to the ailing Social Security Trust Funds. Groups of public employees in plans already covered under social security will in the future be less likely to pull out from under social security, since it would mean the loss of significant tax benefits to individual participants. This would halt the recent hemorrhaging of social security revenues due to the loss of taxes from public employee groups who have voluntarily withdrawn from the system.

BENEFITS OF NEW POLICIES UNDER BILL

Currently, individuals who are active participants in a retirement plan cannot establish an IRA and cannot receive a tax deduction for their own plan contributions whether such contributions are voluntary or mandatory.

By providing tax deductions to plan participants for their own contributions, the bill will solve several problems which have manifested themselves under the current law. When an employee already participating in a plan desires to establish an IRA but is precluded from doing so, pressure is created for the employee to withdraw from the plan. On a collective scale, this pressure could jeopardize the plan's qualified tax status. The bill will eliminate the current pressure for employees to withdraw from plans.

The current law prohibiting participants from setting up an IRA works as a particular hardship on mobile employees such as engineers. Under the bill, employees who participate in the plan but terminate before they are vested would not receive any plan benefits, but they would at least have their IRA to fall back on.

Finally, under the bill, those who participate in inadequate plans—for example, profit-sharing arrangements when there is minimal profit—will have the freedom to set up their own IRA's or contribute to their own plans, if permitted, and receive a tax deduction.

The bill will also encourage the establishment of new pension plans in cases where employers were previously reluctant or unable to fund for pensions at a meaningful benefit level.

The expansion of pensions and retirement savings under our bill will have a profound positive effect on our national economy. Aggregate savings and capital formation will be enhanced. The resulting economic expansion will be reflected in higher levels of employment, real wage rates, and a larger stock of capital. The increased emphasis on investment and savings will help put a damper on the intolerably high rates of inflation our Nation has recently suffered.

In summary, our bill creates a new retirement policy framework in which retirement income security will be enhanced through increased retirement savings and pension plan formation. We appeal to our colleagues in the Congress, and President Reagan as well, to set a new course responsive to the retirement needs of our Nation's workers and their families by quickly enacting the Employee Retirement Savings Act of 1981.●

DISAPPROVAL OF PELL GRANT PROGRAM SCHEDULES

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. SIMON. Mr. Speaker, I am today introducing two resolutions of disapproval of a Department of Education, March 13, 1981, final regulation, establishing family contribution schedules for the Pell grant (formerly BEOG) program. The regulation sets forth the formulas used to determine student eligibility for Pell grants on the basis of need.

On January 19, 1981, the Department of Education published a family contribution schedule which continued a practice begun during the 1973-74 school year of indexing by the CPI the calculation of family size offsets. These offsets determine how much money parents have as disposable income to pay for college costs—thereby determining the size of a student's grant. The January 19, 1981, family contribution schedule had already been published as a proposed rule. Comments had been received and it was then published as a final regulation.

As a result of the President's suspension of all regulations on January 21, 1981, the Department stopped processing all student applications for Pell grants and revised the final regulations which were signed by the Secretary on March 9, 1981, but not published until March 13, 1981. The revised regulation would freeze the family size offset at its 1980-81 level, rather than increasing the offset by the Consumer Price Index (CPI) as is customarily done. The reason given for the change is to reemphasize "the traditional responsibility of the family in financing postsecondary education" and to "combat inflation." It was noted that one commenter on the FCS notice of proposed rulemaking dated August 1, 1980, "suggested that the use of the Consumer Price Index artificially increased financial need." It appears that the Department is using this comment as a partial rational for not indexing the offsets.

Upon close examination of this comment, it is evident that the commenter, Robert Walling, director for financial aid, Central Michigan University, did not request that the offset not be indexed, but that the CPI may not be the best index to use. He was concerned that the CPI includes current mortgage interest rates which do not necessarily apply to parents of college-age students. He urges the Department fo reevaluate the use of the CPI as the index or to extract the mortgage interest rate component from the CPI.

As most of you know, I have serious reservations about "indexing" as a general rule. I believe that Mr. Walling makes a valid point, however. Now is not the time to consider policy changes which will further delay processing or deny access to the Pell grant program to students who expect to participate.

The administration's budget reductions, to the extent that they rely on major policy changes, through regulations or legislation, in the Pell grant program, are opposed by a majority of our subcommittee. The March 13, 1981, family contribution schedule is just such a proposal to change policy.

If the family size offset for 1981-82 is not indexed, the Congressional Budget Office (CBO) estimates 154,000 students would lose eligibility in 1981-82 and $220 million would be saved. The administration believes that $134 million would be saved and

about 100,000 students would no longer be eligible for Pell grants. An alternative method of achieving savings under the Pell grant program is by applying the first stage of the grant reduction schedule. If this reduction schedule is used, CBO estimates the $179 million would be saved with no loss of eligibility. The administration has slightly lower estimates of $136 million savings with a 100,000 loss in eligibility if the offset is not indexed. It also estimates that use of the reduction schedule would save $159 million.

Because of my strong personal concern about the Department's failure to process Pell grant applications over the last 60 days, Chairman PERKINS and I wrote Secretary Bell on March 18 questioning both the legality and the propriety of the suspension of the January 19 regulation. Secretary Bell believes the legal basis for the suspension and subsequent amendment of the January 19, 1981, final regulation—without following the procedure set forth in the statute—is legal.

Notwithstanding these legal questions, the subcommittee is most concerned with how the Department's decision to modify the family contribution schedule affects the processing of 2.5 million student applications for Federal and other student financial assistance. Pell grants are the foundation for all Federal student aid and these grants are also used by many State scholarship agencies to award grants. In my home State, the Illinois State Scholarship Commission relies on Pell grant awards not only to determine which students are eligible for State scholarships, but also how much their awards will be. The Department's failure to process Pell grants will have a serious impact on the future education of millions of college students.

I want the Members of the House to know that the subcommittee, its Senate counterpart, and the higher education community have sought to resolve the impasse. Discussions are still underway. The members of this subcommittee, and the higher education community, have worked with the administration over the past few days to resolve the budgetary and policy differences which separate us, and more importantly, begin the processing of Pell grant applications of the more than 1 million students who need assistance.

I am submitting the necessary resolution of disapproval, in the event the current negotiations do not succeed.

My hope is that they will.●

GUATEMALA: A GOVERNMENT PROGRAM OF POLITICAL MURDER

HON. MICHAEL D. BARNES
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. BARNES. Mr. Speaker, Amnesty International, the internationally recognized human rights organization, has published a report on human rights conditions in Guatemala. The thrust of the report is aptly summed up by the subtitle: "A Government Program of Political Murder." The opening paragraph of the report states the case with chilling simplicity:

The human rights issue that dominates all others in the Republic of Guatemala is that people who oppose or are imagined to oppose the government are systematically seized without warrant, tortured, and murdered, and that these tortures and murders are part of a deliberate and long-standing program of the Guatemalan Government.

I regret to say that Guatemala now appears to be the Western Hemisphere's most egregious human rights violator. Despite the fact that Secretary Haig considers Guatemala to be on the hit list of international communism, it is clear that any unrest in that country can be attributed principally to official Government repression.

The Guatemalan Government has steadfastly refused to take action against terrorism by the national police, or to countenance reforms. In this situation, the only course open to the United States is to maintain its distance from the Guatemalan regime. Thankfully, the administration is not requesting military assistance for Guatemala for fiscal year 1982. I trust this policy will be maintained, and that no economic aid will be permitted that does not directly reach and benefit the poor, so long as the Government's abysmal human rights record continues.

I strongly urge my colleagues to read the Amnesty International report. I include the introduction to the report at this point:

A GOVERNMENT PROGRAM OF POLITICAL MURDER

The human rights issue that dominates all others in the Republic of Guatemala is that people who oppose or are imagined to oppose the government are systematically seized without warrant, tortured and murdered, and that these tortures and murders are part of a deliberate and long-standing program of the Guatemalan Government.

This report contains information, published for the first time, which shows how the selection of targets for detention and murder, and the deployment of official forces for extra-legal operations, can be pinpointed to secret offices in an annex of Guatemala's National Palace, under the direct control of the President of the Republic.

The report also includes transcripts of two unique interviews; the first is with a peasant who, as far as Amnesty International knows, is the sole survivor of political imprisonment in Guatemala in 1980; the second is with a former conscript soldier who served as a member of a plainclothes army unit and who described the abduction of civilians who were later tortured and murdered.

Between January and November in 1980 alone some 3,000 people described by government representatives as "subversives" and "criminals" were either shot on the spot in political assassinations or seized and murdered later; at least 364 others seized in this period have not yet been accounted for.

The Government of Guatemala denies having made a single political arrest or holding a single political prisoner since President Romeo Lucas Garcia took office in July 1978. All abuses are attributed to "independent" paramilitary groups beyond official control. This report adds to previously available evidence that these actions are carried out by units of the regular security services. No convincing evidence has been produced that the groups described by the authorities do in fact exist.

In the final section of the report, Amnesty International reproduces the interviews, transcribed from tape recordings, with two Guatemalans who have had personal experience with the torture and murder of political suspects by the Guatemalan army.

The former prisoner was abducted on 15 February 1980 by a plainclothes army squad in a village in northern Guatemala. He escaped from Huehuetenango army base in western Guatemala after being held for 11 days.

He gives details of his place of detention—in the base slaughterhouse—and of how he was interrogated under torture by Guatemalan army officers.

He describes the execution of three other prisoners in his presence, strangled with a garrotte—a technique cited as the cause of death in hundreds of killings in 1980, including those of 37 people found in a mass grave in San Juan Comalapa, near Guatemala City, in March 1980 (see case histories).

The former conscript soldier, of Kekchi Indian origin, gives an account of his second year of military service, when he served as a member of a plainclothes army unit in Guatemala City. He describes the surveillance of civilians under political suspicion, and the abduction of civilians for interrogation under torture, and then murder, at the Guatemalan army base of the Brigada Militar Mariscal Zavala on the outskirts of Guatemala City.

His testimony is of particular significance as a document of record. Political killings and "disappearances" involving government forces are not new in Guatemala: in 1976 Amnesty International estimated that about 20,000 people had been victims of these abuses since 1966, when they first began to occur regularly. But although in the past other members of the security services have told of their participation in abductions and killings—for instance, Lauro Alvarado Y Alvarado, a National Police officer, who was later killed in 1975 (see "Guatemala: Amnesty International Briefing," 1976, page 15)—this former conscript's testimony is the most extensive and detailed of its kind and the first by a conscript soldier describing the routine extra-legal security measures of regular army units.

Although the two interviews transcribed in part here were not conducted directly by Amnesty International, they are published

as illustrations of the nature of political imprisonment and murder in Guatemala.

The interviews were conducted in February 1980. The transcripts have been edited for length and the names of those involved removed. Their publication was decided only after their authenticity and accuracy had been determined by exhaustive analysis of the two tapes and extensive cross-checking of information. Only indirect communication was possible with the interviewer of the escaped prisoner but the former soldier was interviewed by a journalist from Europe now in close contact with Amnesty International.

The interviewers agreed to the tape transcripts being published by Amnesty International provided that they were edited so that no one could be endangered by their release. Although the escaped prisoner, whose identity is known to the Government of Guatemala, and the former soldier are now reported to be safe outside Guatemala, there is still fear of reprisals by the Government of Guatemala if their identities are publicized.

A number of anti-government guerrila groups have been operating in Guatemala since 1966 and Amnesty International is aware that there continue to be armed confrontations between government and guerrilla forces, with lives lost on both sides. However, Amnesty International does not accept government assertions that all or most killings of the sort described in this report are the result of armed conflict or are the work of agents operating independently and out of the government's control.

Amnesty International opposes the torture and execution of prisoners in all cases, whether by government forces or opposition groups. It believes that confrontation between government and violent opposition groups cannot be held to justify these human rights violations.●

SOCIAL ACTIVISTS IN LEGAL SERVICES

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MICHEL. Mr. Speaker, one of the untold stories of our time is the attempts—successful in many cases—of social activists to capture Government programs. I need not tell you that the ACTION agency, under Sam Brown and the left-radical activists he hired, was abused and misused during the Carter years. Now we are learning that the legal services programs has suffered the same fate.

I am inserting "A Brief Look at Legal Aid Horror" by Patrick Buchanan, the Chicago Tribune, March 24, 1981, in the RECORD.

The article follows:

A BRIEF LOOK AT LEGAL AID HORRORS

WASHINGTON.—In the abstract, the case for taxpayer-funded legal services for the poor is compelling.

After all, ought not an affluent nation provide legal counsel for a destitute, deserted mother of five to prevent her eviction from a dismal tenement for frivolous reasons by a malevolent landlord?

Had the Legal Services Corp. adhered to its mandate—providing free counsel to poor folks in their myriad confrontations with civil courts and uncivil bureaucrats—it would today have a broad constituency that would spare it the forthcoming rendezvous with David Stockman's ax.

But the Legal Services Corp. lost that constituency. Because the LSC has been captured by arrogant activists committed to confrontation politics; it has become yet another playpen for radical children who believe have some God-given right to tax dollars to implement their ideas of social change.

In Hartford, Conn., a legal services lawyer has demanded that taxpayers foot the $10,000 bill for a sex change operation for some 35-year-old guy who likes to prance around in women's clothes.

In Florida, the state department of education, which wanted to hold up high school diplomas until the graduating student passed a "functional literacy" test, was hailed into court and charged with unconstitutional discrimination against blacks.

In Madera County, Cal., legal service types sued the school board to challenge a district regulation on the hair length of male students. This was followed by a lawsuit on behalf of an unmarried teenaged "Jane Doe"—never located—who was apparently denied by the county free contraceptives to continue her active sex life.

What has caused legal services its present problem is that, in community after community, horror stories are no longer the exception; they are becoming the norm.

In January, a conclave of legal services lawyers gathered in San Juan—at a cost of $100,000 to taxpayers—to devise a political strategy for combating the Reagan administration.

In December, the central office of legal services—in the person of one Alan Houseman—sent two confidential memoranda to activists in the field, blueprinting a program of guerrilla warfare against the mandate the new administration had just won, democratically, from the American people.

In the call to battle stations, Houseman pointed up the necessity of "the survival of committed, aggressive, and political staff" engaged in "aggresive advocacy."

"As we proceed in our fight, we must take all steps necessary at national, local, or state levels to assure the continuation of other social benefit and entitlement programs. It is essential that we join with others in preventing cutbacks in these programs and preventing changes in other federal policies such as affirmative action."

Query. Does the Reagan administration have an obligation to continue taxpayer funding of a Legal Services Corp. whose radical activists are using their privileged position on the public payroll to fight the changes voted for by the American people?

After reading Houseman's confidential memos, Jack Kilpatrick, the lonely conservative defender of legal services, bailed out, pulled the rip cord, hit the silk.

When the corporation was created, under President Nixon in 1974, it was believed by some of us that, if adequate restrictions were written directly into the charter—keeping the red-hots out of political and controversial social issues—the lawyers would devote their time to what it was Congress paid them to do. It didn't work, and President Reagan is right to write the experiment off.

After all, not a dime of this money goes to poor people. Most of it subsidizes some 5,000 sons and daughters of the upper-middle class and rich, post-graduates of trendy, fashionable law schools, who get their jollies by posing—starting salary $15,000 a year—as heroic defenders of the downtrodden, many of whom are abusing their position to advance their own agenda, from rent strikes to rent control, from gay rights to battling Proposition 13s across the country.

Rather than defend some welfare mother in a sticky divorce case, the kids prefer to take on the banks. "Our program prides itself on taking on the big fish," boasts Greg Shell, Harvard graduate, legal services lawyer. Well, good for you, Greg. Only, you go fishing for your corporate marlin with your own money, on your own time.●

VINSON-TRAMMELL REFORM

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MAVROULES. Mr. Speaker, today, I am introducing legislation to repeal the Vinson-Trammell Act, and to substitute in its place a new system for measuring excessive profits from Defense Department contractors and subcontractors during wartime, or a period of national emergency.

Unless the Congress acts before October 1, the Department of Defense will be required to implement a 47-year-old law which, almost everyone agrees, is out of date.

Among the detrimental consequences of Vinson-Trammell enforcement are:

A horrendous paperwork burden for both the Government and Defense Department contractors. According to the National Journal 1 million new reports would be required annually under Vinson-Trammell.

New Government costs for processing and reviewing these new reports of $100 to $280 million. When this Congress is attempting to reduce Government to a more manageable and efficient size, Vinson-Trammell creates new bureaucracies and more paperwork.

Catastrophic consequences for small businesses under contract with the Defense Department. One official of the Small Business Administration estimates that implementation of Vinson-Trammell will simply force small contractors out of the work force available to the Defense Department.

Major programs escape coverage under Vinson-Trammell. While profit reports would be required from the manufacturers of military aircraft and ships, as well as each of their subcontractors performing work in excess of $10,000, other programs like the multibillion-dollar MX missile escape coverage because of the limited jurisdiction of Vinson-Trammell.

Very clearly, Vinson-Trammell must be replaced.

A convincing case can be made against the statute now on the books.

However, the question once the disposition of Vinson-Trammell is accomplished becomes, what should replace it?

The experts disagree.

The Reagan administration apparently supports no replacement provision on contractor profits. However, other Members of the House have proposed repealing Vinson-Trammell and replacing it with a more cumbersome renegotiation board.

My legislation substitutes in the place of Vinson-Trammell a very simple mechanism used only during wartime or national emergency, when it might be necessary for the military services to abandon present procurement procedures because of emergency requirements to supply soldiers in the field.

Let me explain how this wartime mechanism will work.

The measure is applicable only during a state of war, or a period of national emergency declared either by the President or the Congress.

To prevent a detrimental impact on small business Defense Department contractors or subcontractors, a reporting ceiling of $15 million is established. Only those contractors or subcontractors doing business annually in excess of $15 million are covered by the reporting provision during the emergency period.

Also, contracts or subcontracts for which the price of the item is based on adequate price competition, such as an item sold in substantial quantities to the general public, or prices which are set by law or regulation, shall be exempt. As the largest organization in the United States, the Defense Department purchases all kinds of different items. An example is a refrigerator. The Defense Department procures them in large quantities, but very clearly they are not part of the military effort. Consequently these types of procurements are exempt from the reporting requirements during the emergency period.

The next question you may be asking yourself is how is an excessive profit defined and calculated. Rather than proposing a percentage limitation on profits, as was the case in Vinson-Trammell, I believe a formula measuring several variables is more appropriate.

Let me explain the formula for the calculation of excessive profits.

First, the profit shall be computed annually on an aggregate basis for each contractor and subcontractor for all their contracts under jurisdiction of the act.

Second, the computation of profit shall be consistent with the method used to compute profit as reported by the contractor or subcontractor for IRS purposes.

Third, excessive profit shall be determined by comparison with the profit realized by a contractor in a nonemergency period.

Fourth, the cumulative average profit for the period 3 years prior, for contractors and subcontractors, will be a base line against which the contractor's profit for the reporting period is measured.

Fifth, and finally, if an excess profit is determined to exist, as measured against the cumulative average profit, the head of the agency who holds the greatest amount of business with the contractor, shall determine how much of the excess profit should be returned to the Government based upon consideration of several factors, including the degree of risk assumed, the nature of the product, the contractor's past performance, and the contractor's investment in facilities.

The Secretary of Defense shall draft regulations for the enforcing of the act, and is required under the legislation to provide implementation standards which can be realized with a minimum of paperwork.

Having explained, in some detail, the purpose of my legislation, let me now explain why the measure is needed.

In 1934, with the Nation moving toward World War II, the Congress adopted the Vinson-Trammell Act. The act established a system for recovering excess profits from defense contractors, who might stand to make unreasonable profits at the expense of the war effort.

Yet, for a number of reasons, the 1934 act, although permanent law, was never enforced. That is, until today. Under existing statutes, the 1934 Vinson-Trammell Act is scheduled for implementation at the beginning of the next fiscal year, on October 1, 1981.

The present law covers contracts on ships and aircraft only. As a consequence, a large segment of the defense industry escapes coverage. The law does not include missile contracts, like M-X, or countless other types of defense contracts.

The 1934 statute requires applicable defense contractors with a contract over $10,000 to file a profit report annually. The cost of reviewing these new reports, as well as the cost of preparing the reports, ranges from $100 million, the Defense Department estimate, to upward of $280 million, a figure often cited by industry.

Regardless of the estimate used it will be expensive to implement the Vinson-Trammell Act.

Last year, during hearings before the Armed Services Subcommittee on Investigations, Phillip Coates, Assistant Commissioner for Compliance with the Internal Revenue Service, was asked how much it would cost to implement the Vinson-Trammell Act. The Commissioner responded:

> We do not really know. I guess it will depend a whole lot on what the final determination of the Congress is on reporting requirements and what the threshold would be on the requirements. We would not know how many reports would be filed as of now or how many we would have the responsibility for administering.

Further Mr. Coates testified that implementation of Vinson-Trammell would require "extensive training of our IRS agents in new areas."

Dr. William Perry, Assistant Secretary of Defense for Research and Engineering during the Carter administration has stated that the 1934 act does not "take into account changes in laws and IRS and DOD regulations that were made during the period of Vinson-Trammell suspension."

In addition, Dr. Perry stated:

> The contest for administration of the Vinson-Trammell Act profit limitations has changed substantially in the 43 years since enactment of that statute. During that period, comprehensive statutes governing procurement have been enacted. Among other things, these statutes require detailed disclosure of costs in connection with negotiated procurement and establishment of compliance with cost accounting standards.

As to the number of new reports required under the act, and as to the wisdom or necessity for the profit reports, Dr. Perry revealed:

> It has been estimated that over 1,000,000 individual contract reports will be filed annually pursuant to the Vinson-Trammell Act by more than 30,000 contractors. Our statistics on defense contract profit levels lead us to doubt that substantial amounts of excess profit will be collected under the Act. The data from our "Profit 76" study indicated an average pre-tax return on defense sales of 3.7 percent for aircraft, and .6 percent for naval vessels.

The impact of Vinson-Trammell on small business would be most detrimental. IRS regulations would require documented disclosure of costs and pricing data on each contract, together with data on how the contractor calculated his profit when computed against an accounting formula. This type of reporting requires a financial expertise unavailable to most small businesses. Rather than incur these expenses, a small contractor is likely not to bid for Government work.

During the hearings last year, the Chief Counsel for Advocacy for Small Business, Mr. Milton D. Stewart, presented a statement on behalf of the Small Business Administration. The job of the Chief Counsel for Advocacy was created so that small business would have a focal point for complaints on Federal agency policies.

In his statement, Mr. Stewart presented this view on Vinson-Trammell:

> It is clear that most small businesses would be unable to comply with VT (Vinson-Trammell) if implemented. Many small business contractors are unable to determine which contracts are for all, or part of a naval vessel or military aircraft, and hence subject to V-T. Furthermore, small business accounting systems generally

cannot provide the data necessary to comply with V-T.

Unlike larger firms, most small businesses do not have elaborate cost accounting systems that readily compute profits on a per-job basis. A prudent small businessman bidding on a contract would have to put an additional amount in his bid to cover the contingency of having to retroactively alter his accounting system to comply with V-T.

Knowledgeable small businesses may decide to forego defense work rather than roll the dice on V-T applicability to future contracts. This may lead to a dangerous erosion of the defense industrial base.

The impact of Vinson-Trammell on our small business subcontractor base is my principal concern. If implemented, the following problems would greatly hamper small business.

First, a horrendous paperwork burden for both the Government and small business contractors.

Second, a multiplier effect, which would result in the dollar amount of small business subcontracts subject to Vinson-Trammell exceeding the amount of prime contract awards subject to Vinson-Trammell.

And, finally, many small firms would probably refuse Government work rather than altering their accounting systems.

The law on the books simply will not work.

With the exception of wartime, or periods of national emergency, I believe their are sufficient safeguards to prevent excessive profits in a Defense Department contract. However, if during peacetime, the Government has the time to carefully negotiate a contract, and if the supervisorial agencies have sufficient time to monitor and check contracts, circumstance may change with troops in the field.

With soldiers in the field, and possibly under fire, there will be little room for time consuming negotiations. The procurement rule will be expediency rather than caution. There may be occasions when it would be necessary to take a second look at a wartime contract.

Under my legislation, such a mechanism will be in place should it ever be needed.

During peacetime, I would argue that existing statutes and regulations govern against improper contracting or profits.

Government contracting has changed significantly since the passage of the 1934 Vinson-Trammell Act. There is a legal and professional contracting environment that has been designed to protect the government from the problems that spurred the passage of the Vinson-Trammell Act. Some of the significant legal and professional safeguards are as follows:

LEGAL

Truth in Negotiations Act (Public Law 87-653) requires certification of cost and pricing data that must be furnished by defense contractors on prescribed forms. The law provides for the performance of defective pricing reviews and subsequent recovery by the Government where the Government agrees to a higher price because the contractor failed to provide current, accurate, and complete cost and pricing data.

Cost Accounting Standards Act (Public Law 91-379) created the Cost Accounting Standards Board, chaired by the Comptroller General, to issue cost accounting standards designed to achieve uniformity and consistency in cost accounting practices which are to be followed by Government prime and subcontractors. The Board issued 19 standards that cover practically every aspect of cost accounting required for Government contracts. The Government is entitled to a price reduction if contractors do not comply with cost accounting standards.

Audit By Comptroller General. In 1951, the Comptroller General was given the right to audit negotiated contracts of the Department of Defense (10 USC 2315(b)) to permit a meaningful examination of the reasonableness of the prices charged to the Government. The Comptroller General may examine payments made to contractors and may disallow them if they are not proper. The Comptroller General may rule that the contract is not binding on the government if it was entered into contrary to statutes.

Anti-Kickback Act enacted in 1946 and amended in 1960 prohibits subcontractors from making a gift to a prime contractor or higher tier subcontractor or its employee as an inducement for the award of a subcontract on a negotiated Government contract.

Gratuities. In 1962 the Congress provided in 10 USC 2207 that all contracts using Department of Defense appropriations must contain a clause providing for stringent penalties, including the loss of the right of the contractor to proceed under the contract, if gratuities are given.

Contingent Fees—By a 1941 Executive Order and later codified in 10 USC 2306(b), contracts may be terminated without liability by the Government if the contractor has employed a person or selling agency for the purpose of securing the contract with the understanding of paying a commission, percentage, brokerage, or contingent fee. Contracts containing contingent fees are void and unenforceable.

Fraud Statutes. Court rulings have strengthened the impact of the fraud statutes applicable to Government contracts. Under the False Claims Act contractors may be fined $2,000 for each false claim and double damages for the replacement cost of the fraudulent product. In 1962, the court established that each payment voucher was subject to the False Claims Act (United States v. Ueber, 299 F2d 310 (6th Cir. 1962)). There can be hundreds of vouchers on each defense contract. Under the False Statements Act contractors may be fined not more than $10,000 and imprisoned not more than 5 years if he willfully falsifies, conceals, or covers up by any trick, scheme, or device any material fact, or makes any false, fictitious, or fraudulent statements or representations. In 1959 it was ruled that the Government did not have to prove it relied on the false statement (United States v. Coastal Contracting and Engineering, 174 F. Supp 474 (D. Md. 1959)).

Cost Allowability Rules. Section 15 of the Defense Acquisition Regulation defines allowable and unallowable costs and requires specific allocations. Major disallowances are expenditures for interest, independent research and development and bid and proposal expense over ceiling amounts, etc. These disallowances reduce realized profit by 2 to 3 percent.

PROFESSIONAL

There is a professional staff of over 54,000 contracting officers, price analysts, and auditors involved in the contracting process.

The Defense Contract Audit Agency is a professional staff that audits defense contracts; analyzes labor, overhead, and material cost; performs defective pricing audits to check for compliance with the Truth in Negotiations Act; and reviews contractor estimating systems.

Estimating techniques have become more reliable. Learning curves were developed during World War II to predict manufacturing cost. The availability of computers has made it practical to use sophisticated statistical techniques of correlation, regression, and time series analysis to predict costs. Cost modeling and independent cost estimating is used.

Training programs have been developed to enhance the professionalism of Government contracting personnel. These courses cover contract law, administration, pricing, program management, etc.

Government contracting personnel have great visibility into contractor management through cost and schedule control and reporting systems.

The legislation I have introduced is a realistic and practical alternative to the cumbersome statutes now on the books.

I hope you will join me in working toward its enactment.●

REAGAN TAX PLAN WILL GENERATE REVENUE FEEDBACK

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. ROUSSELOT. Mr. Speaker, one stated concern by opponents of the Reagan tax proposal to reduce marginal income tax rates is that the Government will lose billions of dollars in tax revenues which will lead to inflation. On the contrary, history has proven to be the best argument against these claims. Repeatedly we have seen that revenues have increased as a result of an expanded tax base and have not decreased as has been often predicted. In 1964 and 1965, the Kennedy-Johnson tax cuts generated $143 billion more in revenue than the Treasury predicted. Revenue increases were seen again in 1978 with the capital gains tax reduction as $3.8 billion more receipts were received than estimated by the Treasury Department. Similar reflows have been witnessed in the 1920's as the highest marginal tax rate was dropped from 73 percent in 1921 to 25 percent in 1925, in California after adoption of proposition 13, and recently, in Puerto Rico also.

Yes, Mr. Speaker, history has proven to be the best case of revenue feedbacks to the surprise of many economists as well as past Treasury Departments. The March 16, 1981, U.S. News & World Report best illustrated the

surprise behind the Kennedy-Johnson tax cuts when it reprinted an article in its magazine in June 13, 1966. I point out that this was before all of the revenue reflows had been realized.

Conservative estimates have indicated that the Reagan plan will generate $30 billion in new revenue during the first few years. This is in addition to a forecasted increase in real GNP of $90 billion. I believe it is crucial to our Nation's economic recovery that the Reagan tax plan be enacted.

At this point I share this U.S. News & World Report with my colleagues:

THE STORY REAGAN SAID IS "MUST READING"

At the heart of Ronald Reagan's economic program are deep tax cuts that the President contends will stimulate so much business growth that the U.S. government will wind up collecting far more tax revenues than it would lose from income-tax reductions in the short run.

The President made just that point in a television interview with Walter Cronkite of CBS News on March 3, when he said: "There is a page from a June issue of U.S. News & World Report, 1966, that I recommend as must reading."

From that article—

The unusual budget spectacle of sharply rising revenues following the biggest tax cuts in history is beginning to astonish even those who pushed hardest for tax cuts in the first place.

Tax reductions put into effect from 1962 through 1965 had been advocated as the cure for a "fiscal drag."

The theory: High tax rates were such a brake on business that the economy could not generate the tax revenues needed to balance the big federal budget. The prescription: Cut taxes and, in time, reach a budget balance.

In four years, tax reductions were ordered on an unprecedented scale. Rates were reduced for individuals and businesses. Tax deductions for depreciation were speeded up. Special tax credits were offered for business investments. Excises were eliminated or cut. All told, relief from the annual burden of federal taxes was granted in the total of about 20 billion dollars. The steepness of the revenue rise that followed was never predicted by the advocates of the "new economics."

Since the year that ended in mid-1962, budget revenues have risen from 81.4 billion dollars to 103.9 billion—a gain of 22.5 billion.

Next year, the one starting July 1, the prospect is for 116.2 billions in budget revenues. That figure—predicted by the Joint Tax Committee of Congress—would mean a gain of 34.8 billions, or nearly 43 percent, in just five years. Now the Tax Committee is talking about an actual balance in the regular budget for the year starting July 1.

What has led to all this is high prosperity, with high individual and business incomes on which taxes are collected. The prediction of a surplus next year is considered overoptimistic by many close observers of the budget.

Expenditures, the record shows, have increased almost as rapidly as revenues.

Still, even the approach that now is being made to a budget balance is being interpreted as meaning two things.

Advocates of the "new economics" are taking the steep rise in revenues to mean that they were correct in pushing for major tax cuts. It was tax relief, they say, that gave business activity the fillip that was needed to boost the economy to the levels required to generate budget-balancing revenues.

Talk of a budget balance, at the same time, has all but scotched any serious discussion of an increase in taxes to head off inflation.●

PROVIDE FOR THE COMMON DEFENSE

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. GINGRICH. Mr. Speaker, as Members of the House of Representatives we have sworn to uphold the Constitution and work to attain the ends laid out in its preamble. One of those ends is to provide for the common defense. Judging by how we have handled the issue of civil defense, we have been negligent.

Our present response to the challenge of protecting our people through an effective civil defense program is inadequate. It is less than what we could do. It is less than what we must do.

Some Western nations have done more. Sweden and Switzerland, both humane nations, have superb civil defenses. And the Soviet Union, which is not normally concerned with the rights and dignity of its people, also has an extensive civil defense program.

John Crown's article, reprinted below, makes a persuasive case for an American civil defense program. It is an issue that must be addressed. And as an institution responsible for upholding the Constitution's directive to provide for the common defense, the House must address it.

John Crown's article from the Atlanta Journal follows:

[From the Atlanta Journal, Feb. 24, 1981]

A SURVIVAL ISSUE

(By John Crown)

One of the more implausible aspects of life on this planet has to do with the startling contrast in which civil defense is perceived by major powers.

The Soviet Union and the Peoples Republic of China are not wealthy nations in terms of a high standard of living for their respective populations. They have no great preponderance of the comforts of life.

The United States, on the other hand, is a virtual cornucopia. Prosperity and material wealth abound for the vast majority of the people here. In fact, abundance is so taken for granted that what would dazzle the eyes of the average Soviet or Chinese citizen would merely bore the average American.

So logic and common sense would point to the United States taking drastic steps to defend and preserve what it has, while the Soviet Union and mainland China adopt a fatalistic attitude of hoping that disaster would not strike.

But in this instance logic and common sense do not prevail, which reduces the entire matter to one of incredulity.

The Soviet Union and the Peoples Republic of China have taken what little they have, combined that with massive effort, and have constructed elaborate and effective civil defense shelters for their people and their manufacturing capabilities.

But here in the United States we decry staggering costs in money and effort of such preparations, and so we do nothing more than give lip service to civil defense—lip service that would protect nothing in the event of disaster.

In its 1980 national platform, the Republican Party projected this goal:

"To create a strategic and civil defense which would protect the American people against nuclear war at least as well as the Soviet population is protected. . . ."

It is a goal which I trust the Reagan administration will keep in mind, along with all the other responsibilities which are being shouldered.

But the issue of civil defense, of survival itself, comes into focus later this week when Col. William E. Smith, director of Atlanta-Fulton County Civil Defense, appears before the subcommittee on military installations and facilities of the House Armed Services Committee. It should be noted he is appearing at the invitation of Congressman Jack Brinkley of Columbus, who is chairman of that subcommittee.

Bill Smith will be in Washington Friday to support proposed changes in Public Law 81-920 Civil Defense Act of 1950, which would make it more effective and more realistic. In a statement which he has prepared to deliver to the subcommittee, Bill Smith lays it on the line as to what must be done—and why.

Herewith excerpts from that statement:

"If we are ever to approach the horrendous task of developing a realistic disaster preparedness program for the protection of the citizens of the United States against all hazards, including that of nuclear attack, then we must concentrate our efforts on the strengthening of local governments' disaster preparedness programs. We must establish a realistic program at the national level and follow it through to a staisfactory conclusion. In my more than 20 years of working with civil defense/disaster programs at the local level, no nationwide project has ever been brought to completion. This has resulted in tremendous confusion. . . ."

He then asks the subcommittee "to demand the administration either initiate appropriate action to develop a national civil defense/disaster preparedness plan to cope with this situation or advise the citizens of this great country of ours that there is no plan for their protection. Let them know that they are pawns on the sea. We must either develop a realistic program or scrap our half-hearted attempts. I see no need to continue to pour $100 million a year down a rathole without any end results.

"Remember, if there is not a realistic, viable, local program and organization at the local level there can be no effective state, regional or federal organizations or programs unless the federal government assumes the responsibilities and funding costs. . . ."

Bill Smith, in characteristic fashion, has said it well.●

IMMEDIATE NEED FOR TAX RELIEF FOR ALL AMERICANS

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. FIELDS. Mr. Speaker, in the last several weeks, a number of our colleagues have submitted statements for inclusion in the RECORD concerning the President's 10-percent, across-the-board tax cut.

While each of these statements have attempted to analyze the impact of this proposal, one thing is absolutely certain and that is that individual income taxes can and must be cut immediately by this Congress.

For as my colleagues well know, the misguided economic policies of the last few years have resulted in this Nation taxing its citizens to the point of economic stagnation.

As a result, we must now act to reverse these policies by providing meaningful tax relief to each and every American by cutting his or her marginal tax rate.

For unless we reduce this staggering burden, taxes will increase next year to the point where the average household in this Nation will pay $9,490 in State, local, and Federal taxes.

We must not allow this to happen and I am convinced that through enactment of the President's individual 3-year tax proposal, we can and will restore economic vitality to this Nation.

Failure to pass this legislation will only further compound our current economic ills which include: massive unemployment, astronomical interest rates, negative levels of productivity, nonexistence savings and investment, and lack of economic growth.

At this point, Mr. Speaker, I would like to submit for my colleagues' consideration, two excellent articles concerning the immediate need for tax relief as reflected in the President's proposal. The first article was presented during a recent broadcast of the radio show "Spectrum" by Mr. Joe Sobran, and the second was coauthored by Dr. Martin Feldstein and Dr. Kathleen Feldstein who are, of course, two distinguished economists.

The text of these articles follows:

[From the radio show "Spectrum"]

I'm Joe Sobran.

Here it is tax time again and the IRS is already baying for more money. When I was growing up in Michigan, my parents, New Deal Democrats, gratefully thought of the government as the agency that would save them, if worst came to worst, from the wolf at the door. Today government is the wolf at the door.

Everybody complains about big government and high taxes, but the subject is really personal. Each of us faces legal penalties, including possible jail sentences, if we don't pay our taxes. Now, that's fine with me. I'm a conservative, not a radical anarchist. Government is there to protect our rights and it needs money to do that. But how much? I like to think of myself as a good citizen. I pay my own way, respect others' rights, and obey as many laws as I can keep track of. But enough is enough.

I know times change. But when our government began 200 years ago, the first federal budget was about $4 million, and they weren't sure where the money was going to come from. Well, they've certainly licked that problem. Today, with federal budgets approaching a trillion dollars, the question isn't where the money comes from, but where it goes.

I said the problem was personal for every taxpayer. But it must be personal at the other end too. We hear a lot about government waste and I believe it. The newspapers have had lots of case histories documenting it. There must be lots of people out there on the receiving end of all that waste. The money isn't just burned. If it were, inflation would be under control. For all the millions of taxpayers, there must also be millions of tax addicts—people who have found themselves eligible for handouts they didn't really need, but who can't bring themselves to kick the habit.

And it must be personal for the middlemen too. Forgive me, but I get more and more skeptical of all these politicians who claim my money in the name of compassion. Apparently nobody just spends public money to win political power. No, it's always compassion. You'd think people like Tip O'Neill and Edward Kennedy had forsaken careers in private charity, the better to serve the needy through government.

The other side of compassion is greed. Greed, in a politician's mouth, means wanting to make a profit through free exchange in the private sector. A man who builds a career in public life on excessive taxation and votes himself a raise into the bargain is never guilty of greed. I once heard a senator describe a tax revolt as "an orgy of greed and selfishness" by the taxpayers.

That's me. I'm greedy. I lack compassion. I don't trust these guys anymore. I want my money back.

This is Joe Sobran for Spectrum.

ENCOURAGE THE SAVERS

(By Martin and Kathleen Feldstein)

The liberal soothsayers and politicians whose previous policies created the current inflationary mess are now rushing forward to oppose the tax cut as inflationary. Is this evidence of contrition and a return to old-time virtues? We doubt it.

Our guess is that the liberals who are opposing the tax cut are simply afraid that if tax rates are lowered the government will have a hard time getting that money back again to finance increased spending programs. In the past 40 years, Congress has never raised tax rates except in time of war. The surge of spending in the past 15 years has been supported by the extra revenue that comes in automatically as inflation pushes us all into higher tax brackets. The debate over whether or not to cut taxes is in reality a dispute over the level of government spending.

We also suspect that the liberals who are posing as inflation-fighters don't like the form of the tax cut either. In the 1970s, tax cuts were a vehicle for redistributing income from the middle- and upper-income taxpayers to those with lower incomes. But now the Reagan administration wants to cut the taxes of the middle- and upper-income groups in order to strengthen incentives and to give back some of the extra taxes that the government has collected because of inflationary bracket creep.

But even if their motives are suspect, isn't there validity to the argument that the tax cut will swell the deficit and thereby exacerbate inflation?

No. Although a tax cut would increase the deficit, only a textbook Keynesian theory equates changes in the government deficit with changes in aggregate demand. In the current debate, far too much emphasis is being placed on the federal deficit as a measure of excess demand. In considering the President's program, it's important to recognize that a tax cut that increases the deficit does not add an equal amount to consumer spending and that pairing a tax cut with an equal spending cut actually lowers the demand for goods and services and therefore reduces inflationary pressure.

When the government increases its spending by a dollar, the demand for goods and services is also increased by a dollar. And when the government increases transfer payments or food stamps by a dollar, most, if not all, of that increase is spent. In contrast, lowering taxes by a dollar does not raise personal spending by an equal amount because some part of the reduced tax is saved.

The share of the tax cut going into savings is likely to be particularly important for the tax cut proposed by President Reagan. Since taxpayers with adjusted gross incomes over $30,000 pay 60 percent of the total income tax, they would get 60 percent of an across-the-board tax cut. This relatively high-income group—about the top one-sixth of all taxpayers—saves a much higher share of income than the average household. Indeed, one-third of an across-the-board tax cut would go to those with incomes over $50,000, while less than one-fifth would go to those with incomes under $20,000.

The tendency to save a large part of the tax cut will be reinforced to the extent that the cut is regarded as providing only temporary relief. While many low-income households spend all of their after-tax income each year, higher-income families use saving and dissaving to avoid large fluctuations in consumption. For such individuals, each year's level of spending reflects not only current income but also what they expect after-tax income to be in future years. Although the president has proposed a permanent cut in tax rates, inflation can rapidly undo this reduction by pushing individuals into higher brackets. Even a 30 percent tax cut would be completely offset at the current rate of inflation in about five years.

Looked at in this way, the administration proposal represents only a temporary tax cut and will therefore result in a proportionally smaller increase in spending. Moreover, some kind of tax cut has been anticipated for many months now. The higher-income taxpayers who base their spending on expected future income will increase their consumption after the tax cut is enacted only to the extent that the final legislation involves a bigger tax cut than they had anticipated. And reducing the maximum tax rate on interest and dividends to 50 percent should be a further stimulus to saving at high-income levels.

Although it seems almost certain that taxpayers will save a substantial part of the personal tax cut, economists cannot say with precision just how much will be saved. It is important to recognize, however, that the saving rate is not fixed but can vary sub-

stantially—it ranged in the past half-dozen years from 5.2 percent to 8.6 percent—and that even a 1 percent increase in the saving rate would cut consumer spending by nearly $20 billion.

But don't get us wrong. In advocating a tax cut, we're certainly not saying that deficits don't matter. When the government borrows to finance a deficit, it absorbs savings that would otherwise be available to private investors. Indeed, over the past decade the high rate of government borrowing has been an important contributor to our nation's low rate of capital formation.

The tax cuts must therefore be coupled with the spending cuts the administration has proposed. The exact timing and balance of the tax and spending cuts are matters on which experts can disagree. But we're hopeful that Congress will not be seduced by the false prophets of fiscal rectitude into continuing the current policy of over-taxing the American people.●

PRESIDENT REAGAN'S SPEECH

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MICHEL. Mr. Speaker, President Ronald Reagan delivered a memorable speech at the recent meeting of the Conservative Political Action Conference in Washington, D.C. If there is anyone that doubts the President believes in the conservative philosophy he has espoused and defended all these years, one look at this speech will set him straight.

I ask unanimous consent that the President's speech to the Conservative Political Action Conference, March 20, 1981, be placed in the RECORD at this time.

REMARKS BY THE PRESIDENT

Thank you for inviting me here once again. As you know, with the exception of the two election years, I have addressed every meeting of the Conservative Political Action Conference. Let me say now that I hope we will be able to keep this tradition going forward and that you will invite me here again next year.

And let us also salute those with vision who labored to found this group—the American Conservative Union, the Young Americans for Freedom, National Review and Human Events.

It has been said that anyone who seeks success or greatness should first forget about both and seek only the truth * * * and the rest will follow.

Well, fellow truth-seekers, none of us here tonight—contemplating the seal on this podium and a balanced budget in 1984—can argue with that kind of logic. For whatever history does finally say about our cause, it must say: the conservative movement in 20th century America held fast through hard and difficult years to its vision of the truth.

And history must also say that our victory, when it was achieved, was not so much a victory of politics as it was a victory of ideas, not so much a victory or any one man or party as it was a victory for a set of principles—principles that were protected and nourished by a few unselfish Americans through many grim and heartbreaking defeats.

You are those Americans I am talking about. I wanted to be here not just to acknowledge your efforts on my behalf, not just to remark that last November's victory was singularly your victory, not just to mention that the new Administration in Washington is a testimony to your perseverance and devotion to principle—but to say, simply, "Thank you," and to say those words not as a President, or even as a conservative, but as an American.

I say this knowing there are many in this room whose talents might have entitled them to a life of affluence but who chose another career out of a higher sense of duty to country. And I know, too, that the story of their selflessness will never be written up in Time or Newsweek or go down in the history books.

You know, on an occassion like this it's a little hard not to reminisce—not to think back and realize just how far we have come. The Portuguese have a word for such recollection—saudade—a poetic term rich with the dreams of yesterday.

And surely in our past there was many a dream that went a glimmering and many a field littered with broken lances.

Who can forget that July night in San Francisco when Barry Goldwater told us that we must set the tides running again in the cause of freedom "until our cause has won the day, inspired the world, and shown the way to a tomorrow worthy of all our yesteryears?" Had there not been a Barry Goldwater willing to make that lonely walk, we would not be talking of a celebration tonight.

But our memories are not just political ones.

I like to think back about a small, artfully-written magazine named National Review—founded in 1955 and ridiculed by the intellectual establishment because it published an editorial that said it would stand athwart the course of history yelling "stop."

And then there was a spritely-written newsweekly coming out of Washington named Human Events that many said would never be taken seriously but would later become "must reading" not only for Capitol Hill insiders but for all of those in public life.

How many of us were there who used to go home from meetings like this and with no thought of giving up, still find ourselves wondering in the dark of night whether this much-loved land might go the way of other great nations that lost a sense of mission and a passion for freedom.

There are so many people and institutions who come to mind for their role in the success we celebrate tonight. Intellectual leaders like Russell Kirk, Friedrich A. Hayek, Henry Hazlitt, Milton Friedman, James Burnham, and Ludwig von Mises shaped so much of our thought.

It is especially hard to believe that it was only a decade ago, on a cold April day on a small hill in upstate New York, that another of these great thinkers, Frank Meyer, was buried.

He had made the awful journey that so many others made: He pulled himself from the clutches of "The God that Failed," and then in his writing fashioned a vigorous new synthesis of traditional and liberatarian thought—a synthesis that is recognized by many today as modern conservatism.

It was Frank Meyer who reminded us that the robust individualism of the American experience was part of the deeper current of Western learning and culture.

He pointed out that a respect for the law, an appreciation for tradition, and regard for the social consensus that gives stability to our public and private institutions—these civilized ideas—must still motivate us even as we seek a new economic prosperity based on reducing government interference in the marketplace.

Our goals complement each other—we are not cutting the budget simply for the sake of sounder financial management. This is only a first step toward returning power to the States and communities, only a first step toward reordering the relationship between citizen and Government. We can make Government again responsive to people but only by cutting its size and scope and thereby insuring that its legitimate functions are performed efficiently and justly.

Because ours is a consistent philosophy of government, we can be very clear: we do not have a separate social agenda, a separate economic agenda, and a separate foreign agenda. We have one agenda. Just as surely as we seek to put our financial house in order and rebuild our Nation's defenses, so too we seek to protect the unborn, to end the manipulation of school children by utopian planners and permit the acknowledgement of a Supreme Being in our classrooms just as we allow such acknowledgements in other public institutions.

Now obviously we are not going to be able to accomplish all this at once. The American people are patient. I think they realize that the wrongs done over several decades cannot be corrected instantly.

But I also believe we conservatives, if we mean to continue governing, must realize that it will not always be so easy to place the blame on the past for our national difficulties.

You know, one day the great manager, Frankie Frisch, sent a rookie out to play center field—the rookie promptly dropped the first fly ball hit to him. On the next play he let a grounder go between his feet and then threw the ball to the wrong base. Frankie stormed out of the dugout, took his glove away from him, and said, "I'll show you how to play this position." The next batter slammed a line drive right over 2nd base. Frankie came in on it, missed it completely, fell down when he tried to chase it, threw down his glove and yelled at the rookie: "You've got center field so screwed up nobody can play it."

The point is we must lead a Nation; that means more than criticizing the past—indeed, as T. S. Eliot once said: "Only by acceptance of the past will you alter its meaning."

During our political efforts, we were the subject of much indifference and often times intolerance—that is why I hope our political victory will be remembered as a generous one and our time in power will be recalled for the tolerance we showed those with whom we disagreed.

But beyond this, we have to offer America and the world a larger vision. We must remove Government's smothering hand from where it does harm; we must seek to revitalize the proper functions of Government. But we do these things to set loose again the energy and ingenuity of the American people. We do these things to reinvigorate those social and economic institutions which serve as a buffer and a bridge between the individual and the state—and

which remain the real source of our progress as a people.

And we must hold out this exciting prospect of an orderly, compassionate, pluralistic society—an archipelago of prospering communities and divergent institutions—a place where a free and energetic people can work out their own destiny under God.

I know that some will think about the perilous world we live in and the dangerous decade before us and ask what practical effect this conservative vision can have today.

When Prime Minister Thatcher was here recently we both remarked on the sudden, overwhelming changes that had come recently to politics in both our countries.

At our last official function, I told the Prime Minister that everywhere we look in the world the cult of the state is dying. And I held out the hope that it would not be long before those of our adversaries who preached the supremacy of the state were remembered only for their role in a sad, rather bizarre chapter in human history.

We have heard in our century far too much of the sounds of anguish from those who live under totalitarian rule—we have seen too many monuments made not of marble or stone but of barbed wire and terror.

But from these terrible places have come survivors—witnesses to the triumph of the human spirit over the mystique of state power, prisoners whose spiritual values made them the rulers of their guards. With their survival, they brought us "the secret of the camps"—a lesson for our time and for any age: evil is powerless if the good are unafraid.

That is why the Marxist vision of man without God must eventually be seen as an empty and a false faith—the second oldest in the world—first proclaimed in the garden of Eden with whispered words of temptation: "Ye shall be as gods."

The crisis of the Western world, Whittaker Chambers reminded us, exists to the degree in which it is indifferent to God. "The Western world does not know it," he said about our struggle, "but it already possesses the answer to this problem—but only provided that its faith in God and the freedom He enjoins is as great as Communism's faith in Man."

This is the real task before us: to reassert our commitment as a Nation to a law higher than our own, to renew our spiritual strength. Only by building a wall of such spiritual resolve can we, as a free people, hope to protect our own heritage and make it someday the birthright of all men.

There is, in America, a greatness and a tremendous heritage of idealism which is a reservoir of strength and goodness. It is ours if we will but tap it.

And, because of this—because that greatness is there—there is need in America today for a reaffirmation of that goodness and a reformation of our greatness.

The dialogue and the deeds of the past few decades are not sufficient to the day in which we live—they cannot keep the promise of tomorrow.

The encrusted bureaucracies and the engrained procedures which have developed of late respond neither to the minority nor the majority.

We have come to a turning point. We have a decision to make.

Will we continue with yesterday's agenda, and yesterday's failures, or, will we re-assert our ideals and our standards, will we reaffirm our faith, and renew our purpose?

This is a time for choosing.

Those of us who call ourselves conservative have pointed out what's wrong with Government policy for 25 years—and now we have an opportunity to make policy—and to change our national direction.

All of us in Government—in the House, in the Senate, in the executive branch—and in private life can now stand together:

We can stop the drain on the economy by the public sector.

We can restore our national prosperity.

We can replace the overregulated society with the creative society.

We can appoint to the bench distinguished judges who understand the first responsibility of any legal system—to punish the guilty and protect the innocent.

We can restore to their rightful place in our national consciousness the values of family, work, neighborhood, and religion.

And, finally, we can see to it that nations of the world clearly understand America's intentions and respect her resolve.

Now we have the opportunity—yes, and the necessity—to prove that the American promise is equal to the task of redressing our grievances, and equal to the challenge of inventing a great tomorrow.

This reformation—this renaissance—will not be achieved or will it be served—by those who engage in political claptrap or false promises. It will not be achieved by those who set people against people, or class against class, or institution against institution. It will not be achieved by those who preach politics as usual.

So while we celebrate our recent political victory, we must understand there is much work before us: to gain control again of Government, to reward personal initiative and risktaking in the marketplace, to revitalize our system of federalism, to strengthen the private institutions that make up the independent sector of our society and to make our own spiritual affirmation in the face of those who would deny man his place before God.

Not easy tasks perhaps. But I would remind you—as I did on January 20th—that we are, after all, Americans. This year we will celebrate a victory won two centuries ago at Yorktown—a victory of a small fledgling Nation over a mighty world power. A British band provided the music at that surrender—we had no band. It is said they played a popular song called "The World Turned Upside Down." I'm sure it was far more appropriate than they realized. The heritage from that long difficult struggle is before our eyes today in this city—in the great halls of our Government and in the monuments to the memory of our great men.

It is this heritage that evokes the images of a much-loved land—a land of struggling settlers and lonely immigrants, of giant cities and great frontiers—images of all that our country is and all that we want her to be.

This is the America entrusted to us—to stand by, to protect, and, yes, to lead her wisely.

Fellow citizens, fellow conservatives—our time is now, our moment has arrived. We stand together—shoulder to shoulder in the thickest of the fight. If we carry the day and turn the tide we can hope that as long as men speak of freedom and those who have protected it, they will remember us and say: here were the brave, and here their place of honor.●

COL. FLOYD J. THOMPSON

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. HOLLENBECK. Mr. Speaker, at this moment, Col. Floyd J. Thompson, a distinguished veteran and POW from the Vietnam war, remains in stable condition recovering from a serious stroke at Walter Reed Hospital here in Washington. I believe our Nation owes Colonel Thompson our undying gratitude for the many sacrifices he made in the service of his country both before and during his 9-year captivity as a POW in North Vietnam. The longest held POW in American history, Thompson was captured while serving as an adviser in South Vietnam close to the DMZ before the United States openly committed regular forces to the war.

Today, on the 17th anniversary of Colonel Thompson's capture in 1964, I am proud to have this opportunity to share his heroic story. On March 26, 1964, as Colonel Thompson, commanding Detachment A31, 7th Special Forces Group, and his L-19 pilot, Capt. Richard Whitesides, were flying reconnaissance near the Da Krong River in Quang Tri Province in South Vietnam, they were struck by ground fire during a low pass over a footbridge and crashed almost instantly. Thompson awoke 3 or 4 days later while being carried on a stretcher. His VC guards told him that Captain Whitesides had been killed in the crash. Thompson had lived because he was seated in the rear of the small plane, but he suffered three broken vertebras in his back, a concussion, leg burns, and a facial wound. For weeks he could do nothing but lie flat on the stretcher or on the ground. Guards offered him food, but he could not eat. The pain was intense and incessant. Frequently in a coma, sometimes hallucinating, he came very close to death.

When I first met the colonel on his recent visit to my Washington office, I was immediately struck by the strength of his inner being. I have no doubt that it was this strength to persevere which pulled Colonel Thompson through his 9-year captivity. After 3 weeks of agony during which Thompson several times thought he was slipping into death, something in his spirit steeled itself to fight through the pain and bring motion to his joints and muscles. Little by little he drove himself to move his legs and torso. He rolled from side to side, pushed away from the floor, and eventually made himself stand. In a few days, he could walk within the village. Even in his weak and crippled state,

he had thoughts of escape—escape to his family and the Nation he loved.

In surviving 9 years of captivity, nearly half of it in isolation, he gave his captors but one minor statement, after torture in 1964, and he resisted them constantly, trying five times to escape. After 1968, when he was held at small camps with other POW's taken during the Tet offensive, he assumed leadership and set the example which sustained the morale and, in some cases, the lives of fellow prisoners. Entitled, under terms of the Paris agreements, to leave Hanoi on the first plane in Operation Homecoming, he characteristically announced that he should stay until the last junior ranking soldier had been repatriated.

On this the anniversary of Colonel Thompson's capture in 1964, I wish to acknowledge his past sacrifices and wish him a speedy recovery to full health. I know that he will be pleased to learn that we have successfully collected over 135 cosponsors to House Joint Resolution 213 which designates July 17, 1981, as a "National POW-MIA Recognition Day." I urge my colleagues who have not already joined in this effort to cosponsor this measure and, in so doing, partially show our gratitude to individuals, like Col. Floyd J. Thompson, who have given so much for their country.●

IMPACT OF REAGAN'S TAX AND ECONOMIC PROPOSALS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. CONYERS. Mr. Speaker, the Reagan administration has sought to convince the public that its tax and economic proposals primarily serve the interests of economic growth, new investment, and higher productivity. While there is yet no hard analysis from the administration that would support its claims, it is clear by now that the high-minded rhetoric it employs to justify its proposals is necessary to mask the serious attacks on the progressive income tax and equity that the programs represent.

A recent analysis of the administration's tax proposals by Woodrow Ginsburg, research director of the Center for Community Change, indicates that the benefits of the tax cuts are heavily weighted to the advantage of the highest income households. Not only is equity dashed by these proposals, but the intended effects of the cuts in boosting investment and growth have been repeatedly called into question. Recently, for example, Walter Heller, the University of Minnesota economist who managed the Kennedy-Johnson tax cuts of 1963-64, disputed the administration's claims that its proposed cuts, like the Kennedy tax cuts, generated significant savings and investment.

As the impacts of the Reagan proposals become better understood, it will become clear that the real goal of the Reagan administration is not to spur the economy, but to radically redistribute income to the highest income groups and to dismantle the social legislation and commitments that have been built up over the last four decades.

I recommend to my colleagues the following analysis by Mr. Woodrow Ginsburg of the Reagan proposals.

ANALYSIS OF REAGAN TAX PROPOSALS

President Reagan, Treasury Secretary Regan, and Press Secretary Brady have repeatedly claimed that the tax proposals fall equitably on all income groups, and that the savings from the 30-percent reductions in tax rates will be shared fairly by all Americans. To support these claims they state that 72 percent of taxpayers will get 73 percent of the benefits from the tax cuts.

These statistics are misleading and distorted. They are computed by the deceptive technique of eliminating some 22 million taxpayers in the lowest income bracket and some 4 million taxpayers in the highest brackets. These two groups of taxpayers—those below $6,000 a year in income and those above $50,000 a year in income comprise some 28 percent of all taxpayers.

The 22 million taxpayers with below $6,000 annual income will see their taxes reduced about $400 million which amounts to less than one-half of 1 percent of the total tax savings. The 4 million taxpayers above $50,000 a year will see their taxes lowered by $23.6 billion which amounts to 30 percent of total tax savings. By eliminating these two groups of taxpayers from their calculations, the administration can point to the remaining 72 percent of taxpayers receiving some 70 percent of the benefits from the tax cuts.

Including all taxpayers provides a more complete and accurate picture of the heavy concentration of benefits going to the well-to-do.

(1) The 19 percent of taxpayers with income of $30,000 and over receive 61 percent of the benefit.

(2) The 63 percent of the taxpayers with income of less than $20,000 receive only 18 percent of the benefit.

The table below provides the details on taxpayers by income group and their tax savings.

TAX SAVINGS FOR 1984—REAGAN PROPOSAL OF 30 PERCENT REDUCTION

Income group	Taxpayers		Tax reductions	
	Number in millions	Percent of total	Amount in billions	Percent of total
Less than $20,000	58.9	62.9	$14.1	18.0
$20,000 to $30,000	17.1	18.2	16.7	21.4
$30,000 and over	17.7	18.9	47.5	60.6
Total	93.6	100.0	78.3	100.0

Source: A Program for Economic Recovery, Feb. 18, 1981, The White House.

The precise figures excluded from the above table by the Reagan team are:

Income group	Taxpayers		Tax reductions	
	Number in millions	Percent or total	Amount in millions	Percent of total
Less than $6,000	21.7	23.2	$362	0.5
Over $50,000	4.1	4.4	23,600	30.1

QUESTIONS AND ANSWERS

1. Q. What are the main features of the Reagan tax proposal for individuals?

A. To reduce tax rates by approximately 30 percent beginning July, 1981, with a 5 percent tax cut for the balance of 1981, followed by a 10 percent cut for 1982, a 10 percent cut for 1983, and the final cut of 5 percent beginning in 1984. In sum, the cuts would reduce tax rates by approximately 30 percent beginning in 1984.

2. Q. Which groups would benefit most from the Reagan proposals?

A. From the tables in the Administration document (A Program for Economic Recovery, February 18, 1981) the tax cuts are heavily concentrated in the high income groups.

Of the 93.6 million taxpayers, 63 percent have less than $20,000 a year. This group would receive 18 percent of the tax savings. At the upper end of the income ladder, taxpayers with income of $30,000 and over—a group which comprises 19 percent of all taxpayers—would receive 61 percent of the tax savings.

3. Q. What are the figures on taxpayers and tax reductions on which that statement is based?

A. The table below is taken from the Administration's figures appearing in the February 18, 1981 document mentioned above.

TAX SAVINGS FOR 1984 REAGAN PROPOSAL OF 30-PERCENT REDUCTION

Income group	Taxpayers		Tax reductions	
	Number in millions	Percent of total	Amount in billions	Percent of total
Less than $20,000	58.9	62.9	$14.1	18.0
$20,000 to $30,000	17.1	18.2	16.7	21.4
$30,000 and over	17.7	18.9	47.5	60.6
Total	93.6	100.0	78.3	100.0

Source: A Program for Economic Recovery, Feb. 18, 1981, the White House.

4. Q. What would be the impact on individuals of the Reagan tax proposal for 1981?

A. Because the effective date for the 1981 reductions is July 1981, the income tax cut proposed would cover only half the year. Higher social security taxes however, became effective January 1 and for close to half the taxpayers in the nation more will be deducted from earnings to cover the higher social security taxes than will be saved through the Reagan tax program. So for example, the head of a four-person family earning $15,000 a year would save $75 in income taxes from the Reagan proposals. The social security tax for 1981 will be $85 greater than a year ago.

5. Q. The Reagan proposals for increasing investment by American industry are aimed at improving productivity, strengthening the ability of business to compete and helping to reduce inflation. What is the likelihood that the incentives to industries will achieve their goals?

A. Most economists agree that even with substantial increases in plant and equipment it will take several years for that investment to bring about an improvement in the rate of productivity. Based on extensive

evidence the productivity gains will shave the inflation rate by a maximum of one percentage point. While that is important many other significant factors contribute to an inflation averaging 10 percent or more a year. It is unrealistic to expect higher rates of productivity to bring down such rapid inflation.

6. Q. The Reagan administration has strongly advocated offering industry major investment incentives—tax credits, accelerated depreciated schedules and other tax reductions. Are such incentives likely to help declining industries particularly, and other industries and business as well?

A. First, investment by American firms during the past two decades has remained rather stable—as a percentage of total output. That is, as a nation we have been using a steady 10 to 11 percent of our gross national product for plant, equipment and similar capital goods. According to the latest information gathered by the government, investment has been rising.

Second, far more important to investment decisions than tax incentives are inflation and the state of the economy. Clearly skyrocketing inflation and exhorbitant interest rates have deterred investment activities. Also, as data from past recession periods demonstrate, when the economy is stagnant or declining, investment falls sharply.

Third, many economists question the likely impact of Reagan's tax proposals for industry.

7. Q. What are the chief reasons for the doubt about the industry tax proposals?

A. In brief here are some major concerns:

1. The more prosperous, competitive firms which are already investing heavily will gain most from the tax breaks.

2. For many small, newly developing companies, not yet very profitable, the tax incentives will not spur expanded investment. Similarly slumping industries like steel, auto, and construction, might not be in a position to utilize the tax incentives.

3. For many multi-national corporations and for conglomerates the new tax breaks might free up funds for investments overseas or for further acquisitions—neither effect would.

4. With no guidelines or requirements on how funds are invested, firms with older facilities in midwest and northeast cities could find the new tax provisions make it worthwhile to move to other regions.

8. Q. What key economic projections have been made by the Reagan administration?

A. On the assumption that the Reagan budget and tax proposals are adopted, here are the Administration's forecasts.

Unemployment: 4th Quarter 1981—7.7 percent; 4th Quarter 1982—7 percent.

Consumer Prices: Actual 4Q 1979 to 4Q 1980—12.6 percent; Estimate 4Q 1981 from 4Q 1980—10.5 percent; Estimate 4Q 1982 from 4Q 1981—7.2 percent.

Economic Growth (Real Growth GNP): Estimate 1981—1.1 percent; Estimate 1982—4.2 percent; Estimate 1983—5 percent.

9. Q. The Reagan administration has argued that drastic slashes in federal spending are essential because they have contributed to budget deficits which have been identified according to Reagan spokesmen as the major factor in bringing on inflation. Is there that close a link between budget deficits and inflation?

A. The evidence is substantial and conclusive that cutting federal spending in our current low growth economy will have minimal impact on inflation.

10. Q. The Reagan administration tax cuts are based on the theory that with lower federal taxes, people will work harder and save more. The greater savings will result, as the theory goes, in expanded investments, higher productivity, which in turn will lead to lower inflation, stimulate the economy, and in turn produce more federal revenues than the size of the tax cuts. What economic evidence supports these expected outcomes?

A. There have been a parade of economists, experts from leading economic consulting firms and even writers for such journals as Business Week, who have seriously questioned the many assumptions on which the Reagan policies are based. Perhaps the biggest question relates to the expectation that lower income taxes would produce more revenue. Models of the economy prepared by the leading economic consulting firms find this so called "revenue reflow" will be far less than the Reagan spokesman suggests.

11. Q. What other aspects of the impact of lower taxes have been questioned?

A. There is a large body of economic evidence that changing tax rates has little effect on savings. In this period of high inflation, many are expecting consumers to use the tax savings to buy goods and services they need and not to save significant portions of the tax cut. If this occurs, there might be pressures that could create even higher prices instead of a lowering of inflation which the administration promises.

Other carefully documented studies point to lower taxes encouraging people to take more leisure, that is work less, instead of the Reagan expectation of working longer.●

RULES TO LIVE BY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. KEMP. Mr. Speaker, as a parent I have thought a good deal about how we can give our children a strong sense of purpose, a respect for themselves and others, and a moral code which will guide them in good times and bad. A good friend and my former administrative assistant, Randal Teague, has offered some "Rules to Live By" in an article published February 10 in the Independence, Mo., Dispatch-Tribune. I commend his words of wisdom to the attention of all my colleagues and thank him for his perspicacity.

The article follows:

[From the Independence (Mo.) Dispatch-Tribune, Feb. 10, 1981]

RULES TO LIVE BY

(By Randal Teague)

The most difficult, yet challenging, task of parenting is teaching. Teaching your children the rules to live by. And in terms of which rules and why.

Only time can tell whether a particular set of parents has done this task well. For these are the rules which will be the inner government of the minds and hearts of those children. And I fervently believe that last point: that to be consistently followed, they must be understood rationally and felt emotionally.

My wife, Jessica, and I have been blessed with this opportunity twice. With our first son, 2-year-old Randal Cornell T., Jr., known as Cornell. And with our second, Robert Townsend T., to be known as Townsend. Townsend joined our world on February 10. Welcome son.

Over the years which have grown to many, I have gathered the rules which I think should govern life, wishing that I had come to more than a few of them much sooner for my ownself. Some are mine; most are others'. They are not universe of guiding principles, but they are their important foundation. And I here offer them to all new, and not-so new parents. And to their children.

Communicating. Hide all the tears inside and sooner or later you'll drown in them.

Life. Life is a struggle with things to maintain itself among them. (Ortega y Gasset, the Spanish philosopher.)

Purpose. It is the bridge between dreams and reality.

Dreams. If you don't have a dream, how ya gonna have a dream come true? (Oscar Hammerstein II, from "The King and I.")

Determination. Men who saw night coming down about them could somehow act as if they stood at the edge of dawn. (The Civil War historian, MacKinley Kantor, about soldiers of the confederacy.) And, set your face to the wind.

Responsibility. Cain't no man run 'way frum trouble. Ain't no place dat fer away. (Joel Chandler Harris, Tales of Uncle Remus.)

Work. I don't like work, no man does. But I like what is in work, the chance to find yourself, your own reality, for yourself, not for others, what no other man can ever know. (Novelist Joseph Conrad.)

Ideas. Daring ideas are like chessman moved forward; they may be beaten, but they may start a winning game. (The 19th-cent. German literarist, Johann Goethe.)

Knowledge. Something can be understood, something can be divined, but all cannot be known. Knowledge must know its own limits. (Jacob Bronowski, "The Ascent of Man.")

The use of that knowledge. Life is really three parts: learning and experience; thinking and connecting, the knowing; and teaching, the imparting of that knowing, the wisdom. (Former missionary to China and Member of Congress, Dr. Walter H. Judd.) Shakespeare put it another way in "Romeo and Juliet": They stumble, that run too fast.

Your soul and the role of faith. Call no thing truly your own but your soul. (Miguel DeCervantes.) A divine intent rules society as well as conscience, forging an eternal chain of right and duty which links great and obscure, living and dead. (Mid-century America's conservative movement thinker, Russell Kirk.)

Freedom. Nought nobler is, than to be free. (Wm. Watson, "The Things That Are More Excellent.") They have rights who dare maintain them. (James Russell Lowell, "The Present Crisis.")

Fidelity. Love is the calligraphy of life. But script it with only one pen at a time.

Fame. The rainbow comes and goes. (Wm. Wordsworth's "Ode on Imitations of Immortality.")

Defeat. Anybody can slip and fall down in life. It takes a helluva man to get back up and keep going. (Football coaching great Vince Lombardi.")

Regrets. It is the worst thing in the world to harbor regrets. (Noel Coward.) It's one of the great tragedies of life that this is a realization which does not come in youth.

When you're my age, my sons, you'll start to realize that what you look back upon with those regrets is more often what you didn't do rather than what you did, and they are not always the opposite sides of the same coin.

But there will be fewer, much fewer, of these regrets for me, my children, if your lives are governed by what I have here set down for you. For I shall measure more of my life in your accomplishments than in mine. And a Boston, Massachusetts writer whose name and person I failed to write down when I read a paragraph that to me summed up this thought, put it this way:

"He looked at life as if it were a small envelope of memories. Time raced across his thoughts, bringing flashbacks of the things he thought he had forgotten and the things he had filed away. It was as if days, years, events and people, love and loss, were like small pieces of luggage in a railway station and life had been spent trying to figure out which pieces should be taken on the next leg of the trip and which pieces should be left behind. He guessed that he had not traveled light but that, perhaps, his one real accomplishment was his sons who sat there now."

Well said.●

ALTERNATIVE BUDGET CUTTING STRATEGY

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. UDALL. Mr. Speaker, as we begin consideration of the administration's so-called plan for economic recovery, it is important for the Congress to recognize the complexity of the task we face. For this reason, I commend to the attention of my colleagues the following article which, I believe, provides useful insights for an alternative budget cutting strategy:

[From the Washington Star, Mar. 1, 1981]

DANGEROUS POTHOLES IN ROAD TO ECONOMIC RECOVERY

(By Terrence Bracy and Mortimer L. Downey)

A poem, W. H. Auden wrote, is never completed, only abandoned. So it is with the federal budget, now contained in a tome of more than 1,000 pages, pieced together in a process without beginning or end—the bureaucratic equivalent of a perpetual motion machine.

And just as the creators of perpetual motion ignore the laws of physics and thus arrive at fantasy, budget-makers in the executive branch who ignore the laws of congressional politics are doomed to give birth to a product that can never become reality.

The architects of the new Reagan budget have been credited with innovative thinking and, indeed, they have proposed cutting far closer to the bone than their most miserly predecessors. But the fact remains that the actual surgery will have to be performed on Capitol Hill. Without a sound political strategy there, hopes for major budget reductions are likely to be destroyed.

This prediction is based on three realities of the budget process

Reality No. 1: The Executive Branch is no longer dealing the cards, but is merely one of the players.

While OMB has real clout within the Executive Branch, the Executive Branch itself has lost control of the budget process. At the peak of OMB's power during the early Nixon years, the president could blithely refuse to spend money appropriated by Congress. Impoundment was the polite term for what amounted to an unconstitutional abridgement of the Congress' authority to spend money. During those years, an OMB budget examiner could—and frequently did—overrule a Cabinet officer or committee chairman.

The practice ended when Congress approved the Budget Act in 1974, reasserting its right to direct federal spending by establishing a process of annual budget formulation and specifically outlawing the Nixon abuses. Budget committees were formed in both houses; large, expert staffs were assembled.

OMB was left with little more than a bully pulpit from which to preach the case for fiscal discipline. It is a pulpit which the new OMB chief, David Stockman, has cleverly pressed to its limits.

Reality No. 2: Even with the powers vested by the 1974 Act, the Budget committees cannot overcome the clout of the authorizing and appropriating committees.

The Budget committees have no institutional constituencies—either federal departments or organized lobbies—of the kind which create a natural pocket of political strength. The committees are institutional orphans. Thus, they are not in a position to confront the entire array of committees of the House and Senate which have oversight over departments of government and specific programs.

The natural inclination of the authorizing committees—whether chaired by Democrats or Republicans—is to protect what they consider sound and needed programs against "unwarranted cuts." Thus, for one example, the attempt by President Carter to end funding for a number of water projects was defeated ultimately by a bipartisan coalition of Westerners who served on committees such as Interior and Insular Affairs. The nature of most programs is such that the battle is unequal. If the authorizing committees do not act, programs continue and even grow in response to economic conditions. A successful budget strategy requires a positive response from these panels, perhaps building on the tentative success of last year's reconciliation bill effort, a subject addressed later. Brock Adams, the first Budget Committee chairman, assured the continuity of this process by working through the leadership and standing committees.

Reality No. 3: The public itself is sending mixed messages favoring a general budget cut, but expressing concern over specific categories.

The New York Times recently polled the public and found that 70 per cent favor balancing the federal budget. Support for budget cutting was, in fact, greater than for tax cutting. However, when the budget was subdivided into seven categories where cuts might be made, a majority favored either increases or maintaining the current spending level in six.

Thus, public attitudes reflect the same contradiction encountered in the Congress: support for an overall budget cut without decreasing spending in the subcategories which would make a reduction possible. The 70 per cent majority for a balanced budget dwindled to 25 per cent favoring cuts in college aid, 18 per cent in anti-pollution programs, and 8 per cent in Social Security.

This sampling of public attitudes will be read with equal validity by Budget committees as a mandate to cut, and authorizing committees as an argument to continue specific spending. It is this institutional tension—with each side representing a legitimate and broadly supported point of view—which accounted for the failure of the last Congress to pass a final budget resolution until the waning hours of the lame duck session.

When added to a slipping schedule, the three realities of the budget process may well doom a budget-cutting strategy governed by confrontational tactics of an era past when the Executive Branch and OMB were dominant.

AN ALTERNATE STRATEGY

Is there a way that substantial budget reductions can be achieved this year? We believe the goal is reachable, but only if budget strategy is designed to fit the congressional system, rather than violate it. A possible strategy would run along the following lines.

First enact a one-year budget "freeze."

A special congressional resolution would set binding limits on controllable expenditures at the FY 1981 levels and establish caps on the growth of indexed social programs similar to those that have been placed on recent federal pay raises. Follow up legislation needed to accomplish these savings—such as deferrals in federal construction and procurement—would put the skids on spending already invisibly built into next year's budget.

This approach would provide an instant savings of $30 billion, resulting in a balanced budget. Even if Congress chose to exempt military spending, or to enact tax cuts, the "freeze" would yield a minimum savings of $20 billion, just $7 billion short of the projected deficit for FY 1982.

BOTH SIDES GAIN

Why is this approach politically preferable to OMB's red pencil? First, both conservatives and liberals have something to gain. Conservatives would find merit in immediate, rather than prospective, budget balancing so as to produce the psychological shock needed to reverse inflationary expectations. Liberals could take comfort in a one-year extension of social programs otherwise targeted for extinction.

Second, a "freeze" is easily understood by the public and, according to the polls, would gain overwhelming support. It is a means to channel the public's theoretical acceptance of budget-cutting into real action before their enthusiasm wanes as the axe is wielded program by program.

The political imperative is for a budget cutting program that demonstrably calls for a sharing of pain in roughly equal doses in programs effecting old and young, rich and poor—in other words, a budget freeze.

The freeze would be managed on a departmental basis, allowing for broad reprogramming of funds in order to reflect changing priorities. Thus, the Transportation Department would not have to forego its new program to finance urgent rehabilitation of interstate highways, if it were given broad authority to hold up on new highway starts. The legal vehicles for such actions would be the regular appropriation bills by which executive reprogramming authority could be approved. This would immediately focus Congress attention on the quality of spending rather than increasing the quantity.

In fact, during the one-year hiatus in spending growth, a whole new slant on pri-

orities would emerge. Urgent needs would inevitably be met; less urgent ones delayed. This is precisely the sorting out process that has been tried unsuccessfully by three administrations under such euphemisms as management-by-objective and zero-based budgeting.

Second, turn the job of budget-cutting over to the institutions that can do it—the authorizing committees.

During the freeze, the congressional leadership could channel the attention of standing committees away from the development of new legislation and into a period of intensive oversight of their constituent departments and programs. The object would be for the committees to recommend how efficiencies can be achieved by the end of this session of Congress—in effect, changing their focus from program growth to program efficiency.

In order to be effective, this sorting-out of priorities will require direction as well as time. That direction can be given by the Budget committees in what is known as the reconciliation process. This process, under which Congress assigns savings goals to its constituent committees, was modestly successful last year, faltering only when conflicting economic signals raised doubts about the continued need for budget restraint. This incipient mechanism provides a needed trigger to assure a continuing congressional evaluation of programs, rather than forcing decision-makers to pick sides in sporadic and divisive debates prompted by hastily-drawn spending cuts. In a time of budget constraint, the reconciliation process can actually use the program expertise of authorizing committees as its most powerful weapon.

Third, make the deadlines and schedules of the congressional budget process work for success instead of against it.

A major criticism of the budget process in its five-year history has been its inability to meet deadlines. Compromises reflected in the 1974 Budget Act did not fully rationalize the three spending-related cycles Congress now carries out—authorizing, budgeting, and appropriating. This failure means that the Budget Committee cannot anticipate legislative changes affecting the bottom line; that the Appropriation Committees either fall behind schedule or ignore the other cycles; and that the entire Congress caves in at the end of a session to the temptations of temporary spending resolutions which allow the government to proceed, but without proper supervision.

A budget freeze this year, together with a serious and well-defined effort of program oversight, could put the budget process back on track. An achievable goal is not FY 1982, but rather FY 1983. The one-year freeze would allow the committees to produce a long-term spending strategy—perhaps for four years—which could combine with stable monetary policy to encourage private-sector planning and economic growth.

NOT GOOD VERSUS EVIL

The 1980 elections established a mandate for control of federal spending. But the process of controlling budgets is not a contest of good versus evil. The list of government programs for which no one will fight is short indeed. In many cases, the issue comes down not to whether the service will be performed, but who will do the job—federal government, state or local government, or the private sector. And in the aggregate, even the level of budget cutting recommended by President Reagan is marginal in terms of the whole economy.

Recognizing that the budget is the ultimate political document—the scorecard of who gets what, when and how—we must be sensitive to manage expenditure control as a prolitical process. OMB, no matter how effective its leadership, cannot dictate the results. It can act as a mediator between the Executive and Congress, holding the line against the individual agendas of bureaus and agencies. But OMB must forge agreement, rather than spark confrontation with Congress, where the tools and power now exist, to tame the spending dragon.

A unified effort can succeed; a divisive one will certainly fail. That failure will result in a further alienation of the American people from its government, as they watch one more turn of the perpetual motion machine.●

ARMED ASSAULTS ON PHARMACIES CONTINUE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. HYDE. Mr. Speaker, I am pleased to file today a list of 32 of our colleagues who have agreed to cosponsor H.R. 2034, which will make it a Federal crime to rob a pharmacy of controlled substances.

Support for H.R. 2034 or similar legislation is growing rapidly around the country, as pharmacists in ever-increasing numbers continue to be assaulted by armed robbers demanding drugs.

Of particular interest to my colleagues from Illinois are the following accounts of a few of these occurrences in our State. The National Association of Retail Druggists maintains a clipping survey of pharmacy robberies, and would, I am certain, provide similar information to my colleagues from other States.

ILLINOIS PHARMACY ROBBERY REPORT

1981

Key Pharmaceutical Service, Bloomington.—Undetermined amount of drugs stolen at gunpoint after employees handcuffed by assailant—4 p.m. in the afternoon.

Holden Drug, Bridgeport.—At 5 p.m. an assailant also threatened to kill father, son and 14 year old granddaughter if druggist refused to turn over Demerol and morphine. He was killed in the course of the robbery by 68 year old owner.

1980

Brownback's Drug Store, Ashland.—Third robbery in two years. Total loss estimated at $6,000.00 including an assortment of prescription drugs.

Barth's Pharmacy, Brookfield.—Robbed at 3:45 p.m. by two gunmen who forced the pharmacist and clerk on to the floor and threatened harm; made off with cash and a parcel of drugs.

Medicine Shoppe, Casey.—At 6:25 p.m. was victimized by two assailants armed with automatic weapons. The thugs took cash and drugs.

Bakers Pharmacy, Champaigne.—At 9:30 a.m. was robbed by two armed assailants who demanded powerful controlled substances.

Apothecary Shop, Springfield.—A part-time pharmacist was shot by an assailant demanding "Class A" or very high abuse patented drugs.

Sentry Drugs, Rockford.—A 16 year old girl tending the register was suddenly grabbed by an assailant, held around the neck, with a gun to her back. The robbers, suspected of several other pharmacy robberies, left the terrified girl behind.

Druggists and retail pharmacists are becoming an "endangered species" as criminals and junkies turn to the neighborhood drug store for readily available drugs. Crime is moving off the streets and into the drugstores, with the customers as innocent and often helpless victims.

"American Druggist" magazine recently published a list of 234 pharmacy robbery incidences, which I want to share with my colleagues. The list covers only 14 States and is not a complete list for each State. Nevertheless, it is a graphic description of the dangers confronting pharmacies as they become an open battle ground for junkies. Each pharmacist listed was on duty at the time of the robbery, and/or was the person who reported it.

CASUALTY LIST OF PHARMACISTS VICTIMIZED IN ARMED ROBBERIES

ARIZONA

Mary Cole, Vic's 333 Pharmacy, Phoenix; Harvey Drucker, Don's Medical Pharmacy, Phoenix; H. J. Dykema, 24 Hour Pharmacy, Phoenix; Lou Gordon, Everybody's Clinic Pharmacy, Mesa; Martin Kahan, El Rancho Pharmacy, Phoenix; John Kovascics, Revco Drug, Phoenix; Norbert Laskowski, K and L Pharmacy, Phoenix; Gregory Myhra, Revco Drug, Mesa.

John Nagel, Pink Pill Pharmacy, Phoenix; Marty Newman, Fed Mart Pharmacy, Phoenix; Earl Norris, Norris' United Drug, Phoenix; Eugene Price, Sy's Pharmacy, Phoenix; Seymour Rosenberg, Mack's Pharmacy, Phoenix; Ronald Smith, Village Pharmacy, Flagstaff; T. Sutherland, Williams Hospital Pharmacy, Williams; Oscar Yrun, Modern Pharmacy, Sierra Vista.

ARKANSAS

Joe Bowen, Medic Pharmacy Inc., Little Rock; Ronald M. Bledsoe, Bledsoe's Pharmacy, Turrell; Don Byrum, Byrum's Pharmacy, Benton; William Cheatham, Wilson Bearden Pharmacy, Magnolia; Carl Collier, Collier Rexall Drug Store, Inc., Fayetteville; Lee Dickson, Consumers Pharmacy, Fayetteville; Jim Griffis, Prince Drug Store, Fort Smith.

Glenn Headley, McCutchen's Health Services, Barling; Charles Hovey, City Pharmacy, Springdale; Robert Lyon, Lyon Drug, No. Little Rock; Bob Matthews, Oak Forrest Pharmacy, Little Rock; Hugh McKnight, Finnegan Drug, Little Rock; Randy Millerd, Consumers Pharmacy, Hot Springs; Kenneth Petway, Corner Drug Store, Rogers.

Allen Schluterman, Osco Drug #406, Fort Smith; Mary Shuffield, Lake Hamilton Pharmacy, Hot Springs; Mark Speer, Mark's Pharmacy, Sherwood; Tommy Thompson, The Medicine Shoppe, North Little Rock;

CALIFORNIA

Frank Baron, Alameda Rexall Pharmacy, San Jose; Blossom Hill Pharmacy, San Jose; Walter Bolling, Carl's Drug, Hayward; Jacob Bowser, Bowser & Banks Pharmacy,

Riverside; Bryant's Pharmacy, Vacaville; Robert W. Church, Pioneer Payless Drug, Marysville; Tom Clayton, Eureka Pharmacy, Eureka.

Jim Coleman, Placer Pharmacy, Auburn; Corner Drug Store, Woodland; Cortland Pharmacy, Cortland; Crane Prescription Center, Turlock; John Crosetti, Poehlmann's Pharmacy, San Rafael; Allen DeHerrera, Mel's Pharmacy, Van Nuys; Del Norte Pharmacy, Marysville.

Harry Della-Santa, Fairfield Pharmacy, Vacaville; Doug Eiliot, Foothill Pharmacy, Sacramento; Gilroy Medical Center Pharmacy, Gilroy; Grand Terrace Pharmacy, San Bernardino; Gregg's Pharmacy, Bakersfield; Ross Gresham, Dentoni's Pharmacy, Stockton; Richard A. Hart, Village Pharmacy, Marysville.

Hilton Olaf Johnson, Hilton Johnson Pharmacy, Chico; Kamian's Pharmacy, Watsonville; Kaiser Hospital Pharmacy, Hayward; Kelstan Pharmacy, El Cajon; Mike Kersey, Long's Drug Store, Redding; Alfred J. Koll (killed), Koll's Professional Pharmacy, Pasadena; Ronald Lim, Lim's Family Pharmacy, Redding.

Robert MacInnis, Anderson Pharmacy, San Francisco; Paul Marcuchi, Sutter St. Medical Pharmacy, San Francisco; Marin Center Pharmacy, San Rafael; Medico-Dental Pharmacy, San Rafael. Mondota Drug, Mendota; Paul Moffat, Family Medical Pharmacy, San Ramon; Monte Diablo Drug Store, Stockton.

Donna Nicklow, Safe-Save Pharmacy, Marysville; Payless Pharmacy, Yuba City; Tom Rafferty, 7-0-2 Pharmacy, Porterville; R & J Pharmacy, Woodland, California; Lynn Rasmussen, Shasta Pharmacy, Redding; Regal Rexall Drug, Walnut Creek; Ruth Rush, Spruce Drugs, Oroville.

Mark Shaefer, Family Medical Pharmacy, San Ramone; Elbert Stallcup, Cunningham Drug, San Bernardino; Max Stollman, Family Pharmacy Service, Beverly Hills; Thrifty Drug Store, Cores; Thrifty Drug Store, Merced; Tuttle's Pharmacy, Santa Rosa; John Tyler, Brimhall's Pharmacy, Napa.

I urge my colleagues to cosponsor H.R. 2034, which calls for a maximum fine up to $5,000 and 20 years impris-

onment, or both, plus increased penalties for subsequent offenses, assault, and use of a dangerous weapon. In addition, H.R. 2034 provides for mandatory minimum sentences, a certainty in sentencing which is imperative if we are to effectively deter criminal activity.●

A TALKFEST WITH THE HUNTS

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. McDONALD. Mr. Speaker, in the aftermath of all the fuss about the fall in the silver market last year and the alleged stranglehold on the market of the Hunt family in Texas, Fortune magazine sought out the Hunt family in order to get the other side of the story. This article appeared in Fortune magazine for August 11, 1980. I am placing this item, in part, in the CONGRESSIONAL RECORD in my continuing attempt to get some balance since much of the reporting on the Hunt family and the silver market in the press was distorted and sensational in content.

The article follows:

A TALKFEST WITH THE HUNTS

(By Roy Rowan)

Silver Thursday still rankles, but they reveal they're even richer than everyone thought.

It's 6 A.M. The scorched orange sky over Dallas indicates the dawning of yet another 105-degree July day. Herbert Hunt is pounding along the jogging track that circles Bachman Lake, describing his and his brother Bunker's painful appearances before the congressional committees that have been investigating their silver transactions. "The trouble with those hearings is they're no-win deals," he says. "You may not get convicted. But you sure as hell don't get acquitted either."

Until now, the Hunt brothers' congressional testimony has constituted their only public utterances on the role they played in the climb and collapse of silver. They have shunned the press, not just because they are instinctively private people or have been counseled by their attorneys to keep quiet. They have shunned it because, according to Bunker's conspiracy theory, "the same guys that were able to break the market were also able to get the media to attack its victims—which happened to be us."

Now, however, the brothers have had a change of heart. They've decided to tell their side of the scary silver drama exclusively to Fortune. In three days of interviewing—sort of progressive journalistic feast that moved from their office suite through their homes, clubs, and even onto the jogging track—they talked freely about what spurred them to buy so much silver, the whipping they took on the commodity exchanges, and their business plans for the future.

In giving their version of the events, which differs from the accounts of other participants, Herbert and Bunker Hunt added dozens of arresting details on what it was like to be riding the silver roller coaster. They did not flinch from any questions or call for a time-out to consult their lawyers. Neither did they depart from the basic line they have hitherto conveyed in sketchy form. They continue to scoff at the idea that they were trying to corner the world market in silver. They also insist that they speculated in silver primarily as a hedge against inflation, and they would have succeeded but for collusion at the New York Commodity Exchange (Comex).

SOME HOSTILE LETTERS

Another concern of Herbert's this day is the flood of mail they are receiving—much of it addressed simply: Hunt Brothers, Dallas, Texas. Some letters are quite laudatory. "You may be taking a lot of flak," writes an engineer, "but we in the mining industry consider you heroes." A Ph. D. in Bethesda, Maryland, writes that he has asked the Franklin Mint to create a silver medal honoring the Hunt brothers as a scholarship-fund-raising device. "I hope your sense of humor will authorize me to have the medal struck," says the professor.

Some letters are hostile. Many echo the question posed by Congressman John Conyers of Michigan at one of those hearings: How could the Hunt brothers have obtained a fast bail-out while Chrysler was having so much difficulty arranging one? To Herbert the difference is perfectly obvious. "Chrysler needed a government guarantee," he points out. "The Hunts didn't need any guarantee at all because we had the assets."

After he crisply utters those last four words, Herbert goes on to make an astonishing disclosure about the Hunts' riches. Their current indebtedness, of course, is notorious. Just about every income-producing asset owned by the two brothers, as well as other properties owned jointly with the rest of the clan, has been pledged as collateral against the $1.1-billion bank loan that saved Bunker and Herbert from dumping their remaining 63 million ounces of silver on a depressed market. What was not known was the extent to which this collateral exceeds the loan. In Herbert's words, "The terms of the loan were awful tough—the collateral is probably eight or nine times as large."

In a backhanded way, Herbert is saying that those assets are worth a staggering $8 billion or $9 billion. Even if a sizable chunk were sold off to repay the bank loan, the Hunts, on the basis of Herbert's statement, would still be around $8 billion from the poorhouse. That figure includes the brothers' hoard of silver bullion, which with the recent rebound is worth enough to cover the loan all by itself. Even if a calamity drove silver prices through the floor, the Hunt family would only be down to its last $7 billion.

Perhaps never before in history has a family gone so deeply into hock with so little hardship. Still, Herbert talks about that bank loan like any strapped homeowner who wants to get the finance company off his back. "We're going to work hard getting it paid off," he vows. Some securities, he indicates, have already been liquidated. But no silver has been disposed of, and he expects it won't have to be before the bullion regains the real value he and Bunker believe it has: "I think people are still waiting to see what we're going to do. We're keeping our options open, though I personally think the price of silver is very cheap at this point."

An effusive man in ballooning sport shirt and slacks sallies in smiling. He does not resemble the sinister fat-cat figure the press portrayed standing before the House subcommittee on commerce, consumer, and monetary affairs headed by Congressman Benjamin Rosenthal of New York to face accusations that he tried to corner the world's supply of silver. Instead, he is a picture of jauntiness.

Soon the Bunkerisms seep out: "When they give you a bill at the Ritz, you think you've bought the place. No such thing as a bad meal in Paris—or a cheap one. The disease of socialism is pretty far along over there."

SCORN UNREPRESSED

The brothers differ enormously in the way they express their opinions, which do not always coincide. Herbert, who usually serves as spokesman for the two, as he did during the congressional hearings, is much more restrained. Bunker is irrepressible in his scorn for such Eastern Establishment outfits as the New York Times, the Trilateral Commission, or for that matter, the short sellers on the Comex Board of Governors, who in his opinion caused silver prices to tumble (see "Who Guards Whom at the Commodity Exchange?" Fortune, July 28). "All those exchanges," fumes Bunker, "are run by the shorts, for the benefit of the shorts, and with the connivance of the shorts."

How both brothers rode out the storm in silver is a story only they can tell. The high drama really began early last September, when Herbert and his lawyer, Bart Cousins, walked unannounced into the New York office of Mocatta Metals Corp., which had a precariously large short position in silver on the Comex at a time when the price was rising. "Chairman Henry Jarecki was in complete turmoil; he was getting eaten alive by margin calls," recounts Herbert. "Between us, Bunker and I had put up 10.7 million ounces of silver with Mocatta, for which we had obtained loans totaling $50 million. But the loan agreement was so fouled up we didn't have the right to pay it off without Mocatta's permission. In fact, we didn't even realize that Jarecki could borrow against our bullion. It was perfectly legal. But suddenly I discovered he had hocked our silver for as much as the banks would loan him—about $185 million, I believe.

"As soon as I found out that Jarecki was having financial problems I called Bunker and said, 'You better come up here and look after your own interests.' Bunker hustled up to New York. We spent most of the next seven days in the Mocatta office. We did everything but sleep there. They brought in dinner about 10 or 11 each night. And each day we went out and bought another shirt."

Bunker chimes in with his own memories of the Mocatta episode. "When the price of silver is going up," he says, "Jarecki will give you almost a religious speech about how he's fully hedged." In other words, as Bunker tells it, Jarecki claimed to have enough bullion on hand to cover his short position in the futures market in case the price went up. "But let me tell you," continues Bunker, "I was concerned about getting our silver back before he blew it."

One day when the price of silver pushed on up past $17, Herbert recalls, Jarecki rushed into his office and announced: "When it hits $22.90 I'm broke—Mocatta is insolvent." A few minutes later, Herbert adds, he came back even more alarmed and said: "I've miscalculated. The figure's a little lower."

Herbert and Bunker got their bullion back only through a convoluted three-sided

transaction involving Mocatta, the two brothers, and IMIC, the Bermuda-based International Metals Investment Corp., which the Hunt family owns jointly with two Saudi partners. In the jargon of the commodities world, this transaction is known as an E.F.P. (exchange for physicals: i.e., silver). First, IMIC matched up its long positions with Mocatta's short positions and canceled them out. This shrank Mocatta's margin requirements. Then Mocatta sold IMIC 23 million ounces of silver. The proceeds of this sale, the Hunts claim, provided Jarecki's company with the cash to pay off the bank loan for which it had ponied up Herbert's and Bunker's original 10.7 million ounces of bullion as collateral. Jarecki was then free to give the Hunts back their bullion.

The only catch was that IMIC had to accept a combination of bullion, silver coins, and silver leases (IOUs from industrial users of silver) in the E.F.P.—since that was what Jarecki had available. "If we and the other directors had played tough with IMIC and not accepted the coins," says Herbert, "we'd have been just two more creditors in Mocatta's bankruptcy proceedings."

Herbert's lawyer, Bart Cousins, asserts that after the terms of the E.F.P. were all worked out, "we had to stay right on our toes" to keep from being outsmarted by Jarecki. The actual silver content of coins depends on how well-worn they are. For instance, a bag of half dollars, quarters, and dimes, which has a face value of $1,000, can contain anywhere from 715 to 727 ounces of silver. "Jarecki insisted on getting credit for 725-ounce coins," Cousins claims. "He got the best of us by three or four ounces per bag."

Jarecki disputes the Hunts' claim that he borrowed so heavily on their bullion, or that Mocatta's solvency was ever in question. His company had all the collateral and lines of credit it needed, he says. It is backed by a British bank holding company with "infinite pockets"—assets of $29 billion. Those worn coins, he adds, are now selling for a fat premium.

Looking back on their dealings with Mocatta, Bunker now says philosophically: "I always thought Jarecki would make it one way or the other, and I said so at the time." But according to Bunker, Jarecki still bears him a grudge, even though Mocatta later enjoyed an excellent first quarter of 1980 when silver plunged. The Mocatta chairman told a mutual friend that "Bunker Hunt cost me a lot of sleep. But for every hour he's cost me I'm going to make him lose ten." The story amuses Bunker. "I want you to know I'm a very good sleeper," he drawls. "I may lose money, but I don't lose sleep."

Taking possession of silver wasn't part of the Hunt brothers' game plan. "In general, we wanted to stay in there and roll our contracts forward instead of taking delivery," Bunker says. "But the margins went skyhigh." Bunker and Herbert have repeatedly cited this desire to roll over the futures contracts as proof that they were not trying to corner the market.

SITTING DOWN IN DALLAS, LONG

Early this year, Bunker recalls, there was turmoil of a different sort when "that 'liquidation only' rule was imposed by Comex." He refers to the emergency edict of January 21, which banned futures trading except for the purpose of liquidating speculative positions. This rule change, the Hunts and others say, helped bring about the collapse in silver prices. Once it was imposed, Bunker says, "there was no way to sell anything except at a distress price. The shorts were sitting on the Comex board, and we were sitting down here in Dallas long, trusting them."

Bunker makes even more precise accusations about Comex. "There are 23 people on the Comex board," he says. "I've heard at least half of them made a huge amount of money. One gentleman supposedly made $15 million to $20 million. They positioned themselves the day before the big January 21 liquidation vote. They didn't even have the silver bullion. They just sold short. They know they could break the market because they were the guys voting."

Where did Bunker obtain this damaging information? From the "peeved," as he calls them—a few of the Comex board members who didn't short the market and are annoyed by the killing their colleagues made. "It was a sting, a scam," adds Bunker. "Looking back, we should have refused to take delivery and refused to sell. That would have stalemated the market." Bunker acknowledges that he knew all along that the Comex directors could change the rules of the game anytime they wanted. But any rules changes, he says, were supposed to be "market neutral" in their effect on prices.

After the crash on Silver Thursday, as March 27 was christened, the Hunt brothers stated that they were thinking of suing Comex on the grounds that the rules changes were anything but market-neutral. They say they are still weighing this option. Even if they decide not to sue, Bunker believes, "the time will come when these professional shorts can no longer hold the price of silver down."

Because the brothers consider themselves the victims and not the villains of the silver boom-and-plunge, they wonder why the politicians, press, and public keep picking on them. "I feel like the lady who had her purse snatched and then got arrested for indecent exposure because her clothes were ripped," says Herbert.

Absolutely infuriating to the two brothers was the sworn deposition given to Congressman Rosenthal by Bill Bledsoe, a former Hunt Energy Corp. vice president. In it, Bledsoe accused the brothers of acting in concert to manipulate the silver market. (See "A Hunt Crony Tells All," Fortune, June 30.) "Crony, ——!" explodes Bunker. "He was just another employee. But he's determined to get us indicted." The Hunts claim they can refute the 51-page deposition line by line. To discredit the document, Herbert recently made public Bledsoe's 1979 letter of resignation in which he agreed to make restitution for mineral transactions involving a possible conflict of interest. Later he paid $91,000 to the Hunts, who are now suing for more.

For all the grief silver has brought the Hunts, they still consider it an excellent investment. "I'll stick by my predicton of 5 to 1," says Bunker, meaning that's how he appraises the true gold-silver value ratio. By Bunker's reckoning, silver should be selling in the vicinity of $125 an ounce—two and a half times its recent peak. He figures that practically all the gold mined since the days of the Pharaohs is still stashed away in strongboxes, while the world's silver supply is constantly being used up. Bunker claims that despite all the stories that the brothers bought and sold silver in lockstep, "there were periods when I had three times as big a position as Herbert."●

THE JAPANESE PRODUCTIVITY CHALLENGE: A MODERN RASHOMON

HON. RICHARD BOLLING

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. BOLLING. Mr. Speaker, the following remarks, "The Japanese Productivity Challenge: A Modern Rashomon," were presented by C. Jackson Grayson, chairman, American Productivity Center, before the Economic Club of Detroit on March 9, 1981. At a time when we are particularly concerned about the imports of automobiles from Japan, the more we can inform ourselves about the nature of the Japanese system, the better. We had best understand clearly that there is a Japanese system, and that there is a great deal we can learn from it. Much of what we have to learn lies in the abstruse area of productivity. On the wide range of this complex subject, Mr. Grayson has also written the best article I have seen to date. Since it recently was published in the Joint Economic Committee's Special Study on Economic Change, I recommend this 40-page article to all true scholars of the subject. The title is "Productivity: The Foundation of Growth" and is contained in volume 10 of the Special Study on Economic Change, December 29, 1980.

THE JAPANESE PRODUCTIVITY CHALLENGE: A MODERN RASHOMON

If present trends continue, Japan will pass the United States productivity level on May 14, 1992 at 3:45 in the afternoon.

Fiction?

Ten years ago, even five years ago, you wouldn't have paused to lable that statement an absurdity. A few seconds ago, I'll bet you hesitated. While no one can tell you whether that will happen, much less the moment, the facts indicate that unless things change this is well within the realm of possibility.

The United States is still the leader in productivity. But the Japanese are gaining, and fast. For the past two decades, Japan's productivity (GDP/Hour Worked) has averaged a growth of 7.2 percent per year. The United States has averaged 2.2 percent per year.

For the past three years in a row, United States productivity has actually declined, while Japan's has continued to grow.

Is it Bye-Bye American Pie?

Have Japanese labor, Japanese business, Japanese government found a better combination? Or have the Americans simply gone to sleep? Why have the Japanese been so successful? Is it Japanese government-business "administrative guidance?" Is it protected markets and subsidization? Is it the pecularities of the Japanese culture?

As in the great Japanese movie, Rashomon, where does the truth lie?

Rashomon tells the story of a murder and a rape in 8th century Japan. The great film director, Akira Kurosawa, tells the story four times from the point of view of a samurai, his wife, a bandit, and a woodcutter.

I will tell the tale of Japanese productivity growth from three viewpoints. Those who see it as (1) a Japanese government phenomena, (2) a business management phenomena, and (3) a peculiar Japanese thing, cultural and societal.

TALE NO. 1: THE JAPANESE GOVERNMENT

It is clear that the Japanese government has been, and still is, the prime moving force in the fantastic growth in Japanese productivity. In the early 1950's, the Japanese economy was in ruins: a devastated capital stock, little money, few raw materials, no world markets, an image of "cheap Japanese products," and a productivity level 16 percent (as measured by output per employee) of that of the United States. Their per capita GNP was only $188. Below that of Brazil, Malaysia, and Chile, and 10 percent of that of the United States.

Enlisting the cooperation of business and labor, the government established economic growth as the highest objective in Japan. They set out to raise productivity levels, improve the quality of Japanese products, and move into world markets. Growth, through a productivity and quality emphasis, would create jobs, make the adjustment process easier for moving out of declining industries, and enhance Japan's world markets for international exchange and prestige.

They designated the Ministry of Finance and MITI (Ministry of Industry and Trade) as lead agencies and through a procedure known as "administrative guidance," directed and assisted business into selected growth sectors through the use of subsidies, tax breaks, loans, government contracts, and protection from imports. They funded "winners" and orchestrated the movement of "losers" out of declining sectors, assisting both capital and labor in the transitions.

Banks, both public and private, made generous (high debt-equity) loans to favored industries, and starved others. They operated somewhat like a giant multidivisional company ("Japan, Inc."), a corporate headquarters responsible for planning and coordination, formation of long term policies, and major investment decisions. They initiated the development of the Japanese Productivity Center, and for the past 30 years they planned, steered, and scoured the world for ideas, techniques, and know-how that they copied, adapted, improved and implemented.

Result 1980: the world's third largest economy, the world's leader in productivity growth, a productivity level about 70 percent of the United States, a per capita GNP almost equal to the USA, product quality of world reknown, a leading world marketer, and the world's highest savings and investment rate.

And all from a nation 10 percent smaller than California, ⅔ the size of France, and about the size of Montana.

The government continues subtly, but firmly, to call the plays, allocate investment funds, and influence world marketing strategies—all documented in the March, 1980, document: "The Vision of MITI Policies in the 1980's."

The truth about the source of Japanese productivity growth lies in the role of government.

Or does it?

TALE NO. 2: JAPANESE MANAGEMENT AND LABOR

It is clear, that while the government has been of assistance, the real success behind Japanese productivity growth has been the quality, philosophy, and practices of Japanese management and labor.

Japanese managers made a pact with Japanese labor in 1955 with the mutual declaration of three guiding principles in the establishment of the Japan Productivity Center:

Productivity improvement should be done jointly with labor and management.

Productivity improvement leads to more jobs, and temporary redundancy should be dealt with by re-allocation.

The fruits of improved productivity should be fairly distributed among management, labor, and consumers.

Japanese managers set about to accomplish this with their workers as part of their "family:" they protected them with lifelong employment; planned productivity and quality improvements with consultative and participative teams called "quality circles (an idea originated by Americans but implemented by Japanese); concentrated on speedy delivery; reduced inventories through the Kan-ban inventory system in cooperation with their suppliers; planned worldwide manufacturing and marketing strategies; invested for the long run in basic process improvements; conducted extensive training and re-training programs for their employees; offered employees extensive fringe benefits in the form of subsidized loans for housing, resort houses, and company medical care; informed employees of company plans, profits and problems; lowered status and pay differentials between management and labor; and socialized off the job in clubs, bars, and picnics.

Japanese managers invested and thought long term. An example is Mr. Konosuke Matsushita, who stated that his full goal of "Meichi" ("to realize our mission") was not short term. To totally realize his objective, he said, would require a carefully planned and totally dedicated long range plan of 250 years. He divided this goal of accomplishment into ten generations of determination, 25 years each, and further sub-divided every 25 years into three-segment business cycles.

And each step of the way, Japanese managers included, involved, rewarded, and recognized the importance of their employees.

As Chris Wada, Assistant Vice President, Sony Corporation of America, said in hearings before Congress in October, 1980, ". . . even if you secure needed capital, unless you have the heart of the people, you cannot make it."

Clearly Japanese labor and management are the primary explanation of Japanese productivity growth.

Or is it?

TALE NO. 3: JAPANESE CULTURE AND SOCIETY

While Japanese government, management, and labor have been important in Japanese productivity, these are only manifestations of something deeper, more fundamental—Japanese culture and societal structure, dating back thousands of years.

Writers, students, and travelers to Japan are all impressed with something over and beyond institutional relationships, their governmental policies, and employee relations. It's a mixture of duty, obligation, and loyalty that permeates their daily living, the way they approach work, and how they treat others.

Ruth Benedict, the cultural anthropologist, reports these in The Chrysanthemum and the Sword as a series of contradictions: They are unprecedentedly polite, but also insolent and overbearing; extremely rigid, but adaptable to extreme innovations; submissive but not easily amenable to control from above; loyal and generous but also treacherous and spiteful; both brave and timid; a nation that both cultivates chrysanthemums and is devoted to the cult of the sword and the prestige of the samurai.

Mariko explains it to a puzzled and frustrated Anjin-san in "Shogun," "It's our custom."

It's wellsprings go back to feudal Japan where one's sense of proper station, order, heirarchy was minutely specified, and reflected itself in their religion, family, the State, and economic arrangements. It was rearranged violently in the Meji Restoration, refined successfully through generations, until the last major wrenching that occurred after World War II.

While institutions, particular rules, even customs may change, some things remain the same. Three stand out.

One is the Japanese ability to achieve consensus around a superordinate goal that manifests itself in organizations, in individuals, and society as a whole. Everyone, to achieve this goal, has a place. Their history has been one of defining and re-defining goals, but everyone knows that he has a role and an obligation and a duty to do his part. In return, the organization and society return to him dignity, security, and respect.

A second is their sense of the necessity for fulfillment of purpose, which drives them to intense effort. Whatever it is that they collectively set as their purpose, they tackle with incredible energy, intense dedication, zeal, and desire for perfection. They incur a strong self-watchfulness, self-surveillance, and self-criticism that constantly searches for improvement, excellence and respect.

A third is their tremendous adaptability—their willingness to change. When situations change, Japanese change their bearings and set themselves on a new course. They do not, like Americans, know only victory or defeat, or argue about principles or convictions, but what works.

It manifests itself in their intense desire for knowledge—information gathering on a massive scale, information that allows them to select the best, to constantly renew their ideas, their factories, their institutional practices, their relationships to the world.

These three characteristics of Japanese culture manifest themselves in many ways to explain modern Japanese productivity growth: their ability to achieve widespread consensus about the importance of productivity to the individual, his company and the nation; the loyalty of the individual to the company and the reciprocal loyalty of the firm to the individual; the incredible energy, zeal, and desire for perfection in product quality, process improvement, and marketing; the ceaseless quest for knowledge that takes them to the far corners of the world for new productivity improving ideas, their voracious appetite for newspapers, books, and television, their extensive communications, training and re-training programs.

Any other explanation for Japanese productivity growth is superficial, it is peculiarly "Japanese."

THE TRUTH?

Which of these three tales is true? Government? Labor-Management? Culture?

At this point, the viewer of the film Rashomon is also confused. Each successive telling of the tale by the samurai, the wife, and the bandit was somewhat different. But each seemed equally convincing and equally true.

What is the Truth?

Wait a minute. There was a detached observer—the woodcutter—who chanced to be

in the forest. He saw it all. He must know the truth.

The tale continues.

TALE NO. 4: THE WOODCUTTER'S TALE

I'll assume the role of the woodcutter in telling this tale, that of the supposed detached observer.

My tale is short.

No single tale captures the truth, though each contributes to it. It is the congruence, the "fit" between these tales that has produced the fantastically successful productivity story of post-war Japan.

The explanation lies in the combination of the Japanese government, the labor-management relations, and the Japanese culture. The idea that the explanation lies in any one of them is partially romantic, partly apocryphal, partly wishful thinking, and partly accurate.

Al Rockwell said in a speech in 1977, "The phenomenal rise of industrial Japan has been attributed to many things, but most of these are myths. And believe me when I say Rockwell International knows better than to believe those myths."

Let's take the role of the government.

There is little question that the Japanese government did, and does, have a hand in assisting and in guiding the economy. But the magnitude, the degree of power, and fixed character of that role is distorted.

The government did protect some markets, particularly in the beginning, but that has greatly diminished. It is true that the government helps to create an economic environment favorable to business, not only in a general way, but in specific measures creating new opportunities with subsidies, tax concessions, and wide dissemination of information and advice. It is true that government agencies consult regularly with business leaders, and that they talk, dine and drink together in a mutually supportive relationship. It is true that MITI regularly publishes plans, helps to influence loans to industries, and attempts to guide allocations of resources.

It is not true that the government controls the economy as some monolothic, superpowerful force that skillfully picks winners, waves goodbye to losers, appoints cartels, and tracks the economy on a master PERT chart.

The economy is still essentially a private enterprise, highly competitive. Government economic policy operates through the private market system, and has not had such a good record in picking winners and losers. Its plans are often resisted or ignored by a stubborn private enterprise system, that believes it knows world markets better than the government—and is often right.

Automobiles, for example. MITI has discouraged and attempted to dismantle the automobile industry for over 20 years. The Governor of the Bank of Japan, who often represents the government's position, said during the 1950's: "Japanese passenger cars are uncomfortable and often have troubles. There is no reason to believe that we may stay competitive with the imported cars. Stop manufacturing passenger cars in Japan!" I thought you'd appreciate that in Detroit.

Within the government itself, there is not always harmony and agreement. There are inter-agency rivals, empire building. Clearance processes hold up action, and agencies are jealous of prerogatives.

In sum, it is true that the government has had, and continues to have, a close relationship and a supportive relationship with business in the improvement of productivity. But to suppose that they are the dominant and sole cause of Japanese success is dangerously deluding.

And so is the explanation that the sole cause of productivity growth is Japanese labor and management.

It is true that this is a powerful positive force. But the image of omnipotence and absence of problems are myths. There are bad managers who make bad decisions. Discrimination exists among workers. Some workers are unhappy with boring assignments, and there is anxiety about performance. Creativity is often sacrificed for conformity. Decision making is often slow and laborious. Transit systems are frequently crippled by strikes.

And labor policies concerning life long employment, seniority, retirement, and hiring are increasingly strained by changing demographics of an aging population and extended life expectancy.

The third explanation—Japanese culture—unquestionably exerts influence on everything that the Japanese do, including productivity.

But to attribute sole causation to this explanation ignores the fact that these particular cultural features can take a nation anywhere, and not necessarily toward higher productivity.

As Ruth Benedict points out in her book, there are many Japanese social arrangements and habits of life which have parallels in other nations, even in primitive tribes of the Pacific islands. The characteristics of consensus building toward a superordinate goal, the drive to excel, and the quest for continuous learning also make for successful gardeners, warriors, and academics, and have been present in different civilizations at various times, including England, France, and the United States, especially in its earlier years.

In the early 1950's the Japanese picked improvement in productivity and quality as their national goal. Everything converged toward achievement of the goal—political institutions, labor and management, and cultural factors.

At least, that's the way that this woodcutter sees it.

With the clarity of hindsight, all of the pieces seemed to fit. There was no large scale model or plan, but an alignment of purpose by government, business, and labor to create a national consensus, which directed their energy to the creation of a powerful industrial base and a world marketing system.

It was not "destined" to be so. It wasn't preordained by the culture, the history, or the form of government. They looked around and saw a devastated economy—virtually without plant and equipment, money, raw materials, trained personnel, or markets. Japan was faced with economic survival.

Out of this crippling set of circumstances, a national consensus emerged to make productivity and quality improvement the unifying intention of the country. Individuals and institutions were not told what to do—they took whatever actions were appropriate. New institutions and relationships were created when needed. The history, tradition, and cultural forces were marshalled to support this overarching goal. They could have chosen anything, but they chose productivity and quality.

It was 1955.

Today, it is 1981. Japan is a world economic power.

I could end here with the woodcutter's tale, leaving you to ponder the nature of truth. And your version of it. Whatever the truth, what does all this have to do with the United States?

The United States has before it the opportunity to re-create the national consensus of purpose that carried this nation forward for over 200 years to become the world's productive leader, a leader who now finds herself in economic disarray and in a productivity decline. We have the opportunity—the necessity—to energize a new phase of growth, innovation, jobs, and profits. The quality of our lives and freedom depends on it.

I could end here with a resounding call to action, but too often that is all that happens in the country: Clarion calls, alarm bells, but no programs, no follow through.

As one Japanese manager told me, "You in America are awake. You have heard the alarm. But you are not yet getting out of bed."

Let's begin. Today.

We can start by admitting to our problems: raging inflation, high unemployment, falling real wages, declining real profits, and aged capital stock, stagnant productivity growth, adversarial relations between labor-business-government, increasing foreign competition, some declining industries, under-investment in technology and plant, high energy costs, excessive governmental regulations, high government spending, and a rising national debt.

The worst place to start would be a hunt to fix blame on government, business, or labor—to seek the "truth" as to who or what caused our fall in productivity growth. It would be nice to know, but as in Rashomon, I doubt that we will ever know the truth. Anyway, that is not the most important thing. The most important thing is to do something.

The first step is an acknowledgement, a recognition that we have a productivity problem.

We've already taken that step. Productivity is on the lips of almost everyone, and the shock waves of three successive years of productivity decline are reverberating through government, business, and labor.

To actually get started, to create an alignment of wills and resulting action, each of our existing institutions has a role to play.

GOVERNMENT

The single most important thing that the goverment—Congress and the Administration—could do is to analyze every major public policy's impact on productivity and U.S. competitive strength, consider the negative or positive consequences, and—on balance—move toward higher national productivity growth.

Peter Drucker, writing in the January-February, 1981 Harvard Business Review said:

"One of these (Japanese) habits is to consider thoroughly a proposed policy's impact on the productivity of Japanese industry, on Japan's competitive strength in the world market, and on Japan's balance of payments and trade.

"This has become almost second nature for Japanese policymakers in the ministries, in the Diet, and in business as well as for analysts and critics in the popular newspapers, and university economics departments."

The United States policies most likely to impact productivity are: Tax, Regulation, R&D, Anti-trust, Trade, and Labor.

President Reagan's economic program, for the moment, is focused almost exclusively on tax policies and government spending.

Both are important items. But all policies and programs that affect productivity must be thoroughly and explicitly considered.

Supply-side economics does move in the right direction by encouraging the rate of capital formation and investment. But what we want is not investment, but productivity of investment. And if productivity is not tackled on a broader basis, with both macro and micro actions, it will not flow automatically from investment. Investment is necessary but not sufficient.

We need a broadly based examination of all government policies and action programs that follow from the examination.

This is presently not being done. The GAO documented this recently in three separate reports pointing out the neglect of productivity considerations and actions by the Department of Labor, Council on Wage and Price Stability, and the National Productivity Council. The most recent of these reports was issued three weeks ago, and appropriately titled, Stronger Federal Effort Needed to Foster Private Sector Productivity.

I suggest four things:

First, create within the Executive Branch a focal point where the productivity improvement responsibility will lie. I suggest OMB, but the President may choose to designate another group. It could be an organizational form similar to the recently appointed Task Force on Regulatory Relief. The most important thing is that it be a seat at the highest levels of economic policy making. This would not be another bureaucratic agency, but a consistent and articulate force for productivity improvement in all economic policies.

Second, appoint a "Council on Productivity" composed of leaders from the private sector—business, labor, and academia.

This would be a group of about 20 persons, part-time, non-compensated, whose sole function would be to regularly examine and report on areas where government policies, procedures, and laws are positively and negatively impacting productivity. It would work with the public sector group and, reports would be given regularly to the President and to the Congress.

Third, fund and direct the Departments of Labor and Commerce to improve the coverage and quality of our national and international statistics on productivity. They are inadequate.

Fourth, direct by Executive Order and legislation, every single government agency to initiate programs to improve the productivity of that agency. These programs should be explicit, in writing, with goals, measures, employee involvement, reports, follow up. The public sector focal point would be responsible for creating, directing, and monitoring these programs.

These actions by government should be matched by similar actions in the private sector.

PRIVATE SECTOR

The single most important thing that the private sector could do is to start explicit productivity and quality improvement programs in every industry, business, university, hospital, law firm, non-profit organization, trade and professional organization in the United States.

When I say an explicit program, I mean explicit. Not just "we take productivity into consideration and regularly discuss it in our management meetings and employee publications." I mean a planned, specific program in writing, with multi-year goals, timetables, assigned responsibilities, measures, training programs, communications programs, incentives—and most of all—employee involvement from the CEO to the lowest level employee.

We need not wait on national policy changes. The Japanese have shown that great improvements in productivity and quality are available to us right now. They have acquired or built plants in the United States, operated with American workers and Japanese managers under existing United States tax laws, United States government regulations, and United States anti-trust laws. And they have achieved high quality levels, low absenteeism and turnover rates, low scrap and reject rates, and high productivity—equal to or better than similar Japanese plants.

You can start today.

You do not have to wait for a major announcement from government. You do not have to wait for major revisions of tax, regulatory, R&D, or anti-trust policies. And you do not have to wait for a national social contract between labor and management. A change in the ocean begins with a light breeze and grows and grows.

If I've been convincing at all, the "truth" about productivity and quality growth is that there does not need to be a super plan or a super race. I am not speaking of the formation of U.S.A., Inc., any more than Japan has a Japan, Inc. I am speaking of a vision, sense of purpose, a consensus, and a shared commitment to pull together. And I have made specific suggestions. It is political, it is business like, it is humane, it is cultural.

Individual action will add up to a national will.

EPILOGUE OR PROLOGUE

Do not interpret any of my remarks as my belief that the Japanese don't have problems, are eight feet tall, have discovered the mother lodestone of productivity, and are inevitable victors in any economic contest with the United States.

It simply isn't so.

Many American firms and products are better than those of the Japanese. We still lead the Japanese in level of productivity. We still are the world's largest economy.

But it is equally incorrect—and dangerous—to assume that this will necessarily always be so, that the Japanese are not better at some things than we are, to ignore that they are gaining fast, and to assume that we cannot learn from them.

Together, our two nations create about 31 percent of the world GNP: The U.S. 21.5 percent and Japan 9.4 percent. In the next few years, it is likely that Japan will pass Russia to become the world's second largest economic power behind the United States. We should remain friendly competitors and partners.

I agree with American businessmen and labor leaders that we want not just free trade, but fair and unsubsidized trade. We want access to Japanese markets, just as we give her access to ours. We want Japanese investment in the United States and the opportunity to invest in Japan.

It would be a mistake to be angry or vengeful toward the Japanese. It should be Japan's dynamism, her vigor, her self-renewal that we should be learning from, not objecting to.

To quote Al Rockwell again, "I welcome the Japanese as the alarm clock that just might wake up our nation."

When Cyrus, King of Persia, captured Babylonia in 585 B.C., he said, "To have been once brave men is not sufficient. It is harder to hold what you have gained than to gain it."

The only way to hold it is to move on.

And that's the truth.●

FISCAL YEAR 1982 REAGAN BUDGET VERSUS FISCAL YEAR 1982 PEASE BUDGET: THE MEAT AX VERSUS THE SCALPEL

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. PEASE. Mr. Speaker, the revisions sent to this Congress by President Reagan for the fiscal year 1982 budget exhibit a peculiar definition of evenhandedness. Increasingly it appears that this administration in its haste to cut government spending has proposed cuts without any firm awareness of the consequences of its actions. For example at a recent hearing before the House Budget Committee, our distinguished majority leader, JIM WRIGHT, asked Secretary of Labor Raymond J. Donovan why the Reagan budget eliminates funding for job training at the very time it hopes to put more Americans back to work. Secretary Donovan responded, "On the surface it looks illogical as hell." He went on to assert that by running the Department of Labor more efficiently he could save other funds that could be used for job training programs. This means that Secretary Donovan is going to have to come up with $4.6 billion in administrative savings within the Department of Labor just to offset the cuts President Reagan has proposed for the CETA program.

On March 12 I offered an alternative fiscal year 1982 budget that recognizes the public demand for reduced Federal spending. It matches the level of cuts proposed by President Reagan dollar for dollar. But my alternative budget spreads the cuts much more evenly and equitably across the whole range of Government spending and Federal programs. Consider the following side-by-side comparison of cuts proposed by President Reagan for fiscal year 1982 and those I have identified:

	Reagan	Pease
General science, space and technology:		
General science and research programs of NSF and DOE	Cut $360 million	Cut $99 million.

	Reagan	Pease
Space research and technology	Cut $521 million	Cut $428 million.
Energy:		
Alcohol fuels and biomass	Cut $100 million	Cut $29 million.
Solar energy and energy conservation bank	Eliminate	Fund at fiscal year 1982 current service level.
Energy conservation programs	Cut $680 million	Cut $155 million.
Solar energy programs	Cut $383 million	Fund at fiscal year 1982 current service level.
Nuclear programs	Add $338 million	Cut $1.1 billion.
Strategic Petroleum Reserve	Add $200 million	Defer $1.8 billion pending changes in approach and management.
Natural resources and environment:		
Water projects	Cut $375 million	Defer $830 million in new construction.
EPA construction grants	Eliminate	Cut $70 million.
Land and Water Conservation Fund (State share)	do	Fund at fiscal year 1982 current services level.
Urban parks grant program	do	Do.
Historic Preservation Fund	Eliminate (except for $5 million in National Trust)	Do.
Agriculture:		
Grain facility loans	Cut $100 million	Do.
REA lending and outlays	Cut $6.6 billion	Cut $548 million.
Commerce and housing credit:		
National Consumer Cooperative Bank	Eliminate	Fund at prescribed level.
Postal Service	Cut $794 million	Cut $794 million.
Public housing and subsidized housing	Cut $542 million	Fund at fiscal year 1982 current services level.
FmHA rural housing programs	Cut $86 million	Do.
SBA business assistance	Cut $100 million	Do.
FTC	Cut $30 million	Cut $5 million.
Federal highway construction	Cut $400 million	Cut $400 million.
Mass transit capital grants	do	Cut $196 million.
Amtrak	Cut $300 million	Cut $66 million.
Maritime operating and construction subsidies	Cut $40 million	Cut $15 million.
Education, training, employment, and social services:		
Elementary and secondary education programs	Cut $1.1 billion	Cut $36.7 billion.
Vocational education	Cut $200 million	Cut $17 million.
National Endowment for the Arts and Humanities	Cut $100 million	Cut $23 million.
Public service employment	Cut $3.6 billion	Cut $305 million.
Youth employment and job training	Cut $700 million	Cut $150 million.
Welfare reform demonstrations	Cut $200 million	Cut $155 million.
Social services	Cut $1.2 billion and combine into block grants	Cut $336 million.
Health: Medicaid grants and medicare	Cut $1.7 billion and cap medicaid outlays	Cut $2 billion.
Income security:		
Food stamps	Cut $2.3 billion	Cut $943 million.
Child nutrition programs	Cut $1.2 billion	Cut $184 million.
Trade adjustment assistance	do	Cut $200 million.
Unemployment compensation	Cut $2.2 billion	Cut $1 billion.
AFDC program	Cut $700 million	Cut $250 million.
Social security student benefits	Cut $1 billion	Cut $700 million.
Black lung	Cut $378 million	No cuts and raise company fees to make trust fund self-sufficient.
Veterans' benefits and services	Cut $800 million	Cut $125.6 million.
Administration of justice: Legal Services Corporation	Eliminate	Cut $21 million.
General government	Cut $200 million	Cut $418 million.
General-purpose fiscal assistance: Revenue sharing to localities	Provide $4.6 billion	Cut $319 million.

SISTER CITIES INTERNATIONAL 25TH ANNIVERSARY

HON. WAYNE GRISHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. GRISHAM. Mr. Speaker, it is my pleasure to take this opportunity to wish continued success to the international sister cities program, which will celebrate its 25th anniversary at a White House ceremony tomorrow.

Private diplomacy, fostering good will between people in various nations, is an important adjunct to our Nation's public diplomatic efforts. Throughout its 25-year history, the international sister cities program has played an important role in keeping alive the dream of international harmony and cooperation.

I would also like to bring to the attention of the House the efforts of Sister Cities President Betty Wilson, a councilwoman from the city of Santa Fe Springs, in California's 33d District.

When I was mayor of La Mirada, Calif., I had the opportunity to work closely with Betty Wilson on the sister cities program and can testify to her untiring dedication to the international community.

As a participant in the sister cities program, I had the chance to visit the city of Santa Tecla, El Salvador, sister city to my home town of La Mirada. The experience has helped me to better understand the current troubles in that nation.

My case is not unusual. There are thousands of individuals across our Nation who have benefited from the city-to-city and people-to-people links established by Sister Cities International.●

A TRIBUTE TO JIM PLUNKETT

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today on behalf of my colleagues from California, DON EDWARDS and PAUL MCCLOSKEY, to honor one of San Jose's finest athletes, Mr. Jim Plunkett, the most valuable player of the 1981 Super Bowl.

On Friday, April 3, 1981, a consortium of groups will be honoring Jim with a banquet and the establishment of the Jim Plunkett Scholarship Fund.

His success story is right out of the Horatio Alger tales we all read when we were younger. Raised in San Jose, in a poor neighborhood, both his parents were blind and the only way he could attend college was on a scholarship. He was an all northern California quarterback at James Lick High School, in San Jose, setting local records and receiving many awards and accolades. He had the choice of attending almost any college or university.

He chose to attend Stanford University because it allowed him to remain close to his parents. His collegiate football career beginnings were less than spectacular. He missed his first football game because of a thyroid tumor and ended up playing only three games all season. The following year he redshirted and then began a spectacular 3-year college career that climaxed when he won the Heisman Trophy in 1970 and led his team to a Rose Bowl victory.

Friends and coaches, when asked to describe Jim Plunkett, always agree that he is a determined man who willingly shares the good times with others and keeps the bad ones to himself. He is a caring, sharing person who always shoulders his responsibility.

His coach at Stanford, John Ralston, recently said in an interview with Chet Wood of the San Jose Mercury newspaper:

> Somebody asked him (Plunkett) during his senior season what he wanted to do most, go to the Rose Bowl or win the Heisman Trophy and he didn't even stop to think about it. He said "go to the Rose Bowl, because I can share that with my teammates."

During his rookie year with the New England Patriots he led the team to a

third place finish in the AFC East with a 6-8 record, an improvement over the 2-12 season they had had the year before. The fans in New England were so impressed with his skills and abilities that they nicknamed him "the Savior." He threw 19 touchdown passes that year and earned rookie of the year honors, edging out two other highly touted rookies, Dan Pastorini and Archie Manning.

Unfortunately, Plunkett's career has also taken some downturns in recent years. But, he survived those too. He was traded to the San Francisco 49er's and then to the Oakland Raiders. This year after an injury to starting quarterback Dan Pastorini, Plunkett came to the rescue and proved himself mighty again. He took a team with a 2-3 record and led it to 12 more victories in the next 14 games for a final season of 14-5, good enough for the super bowl. The rest is history. Jim Plunkett did what all of us from the Santa Clara Valley knew he could do. He brought the Raider team to a Super Bowl victory, and in the process, throwing an 88-yard touchdown pass, the longest in super bowl history and earning himself most valuable player honors.

Mr. Speaker, I ask our colleagues in the House of Representatives to join DON EDWARDS, PAUL MCCLOSKEY and myself in honoring this outstanding athlete both on and off the playing field, and wishing him success in all his future endeavors.●

BIG OIL SHOULD DIVEST

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 26, 1981

● Mr. MOTTL. Mr. Speaker, while American motorists are being bled dry at the gas pumps, the big oil companies are drowning in profits. A line seems to be forming on Wall Street, as these companies take the fruits of oil price decontrol and their comfortable relationship with OPEC and turn them into mining companies, coal companies and who knows what.

Today I am reintroducing legislation to sharply limit oil company investment in nonrelated businesses.

The oil companies' grab for control of other industries should be an embarrassment to those of us who bought the line that the so-called free market for energy would yield more production and lower prices.

What we have instead is the brazen refusal of these rich corporations to recognize any sense of public responsibility, as they concentrate only on the bottom line of their income statements.●
